1793, Jan. 23. The second partition of Poland, between Russia and Prussia (p 477). Catharine, though very hostile to the French Revolution, took care not to become involved Instead, she furthered her own designs in Poland, and, by

1795, Oct. 24. The third partition of Poland (p 478) helped to extinguish the kingdom By her immense gains in Poland, Russia advanced far into central Europe and became an ever more important factor in European affairs. Catharine was succeeded by her son

1796-1801. PAUL I, a tyrannical and mentally unbalanced ruler Nevertheless, he was the first Russian ruler who tried to put certain limits to the spread of serfdom (1797, manifesto limiting the peasants' work for the landlord to three days a week).

1797. Paul repealed the law of succession of Peter the Great and decreed that succession should be by genealogical seniority

1799-1801. Russia participated in the **War of the Second Coalition** against France (p 586).

1801, Mar. 24. Paul was assassinated in the course of a palace revolution, and was succeeded by his son

1801-1825. ALEXANDER I.

(*Cont. pp* 586, 701.)

11. THE OTTOMAN EMPIRE

1656-1661. Mohammed Kiuprili, grand vizier. Through unlimited ruthlessness he tamed the restless Janissaries, executed incapable commanders, purged the court, raised the finances (taxes and confiscations). The war with Venice was vigorously pressed and Lemnos and Tenedos retaken (1657). **George II Rakoczy** of Transylvania was defeated and deposed

1661-1678. Ahmed Kiuprili (son of Mohammed), grand vizier Order having been restored, he ruled with a lenient hand, humoring the sultan and outwitting his enemies The war with Venice he

tried, in vain, to bring to an end by compromise.

1663-1664. War with Austria After the Treaty of Westphalia, Austria was able to devote attention to the Near East once more.

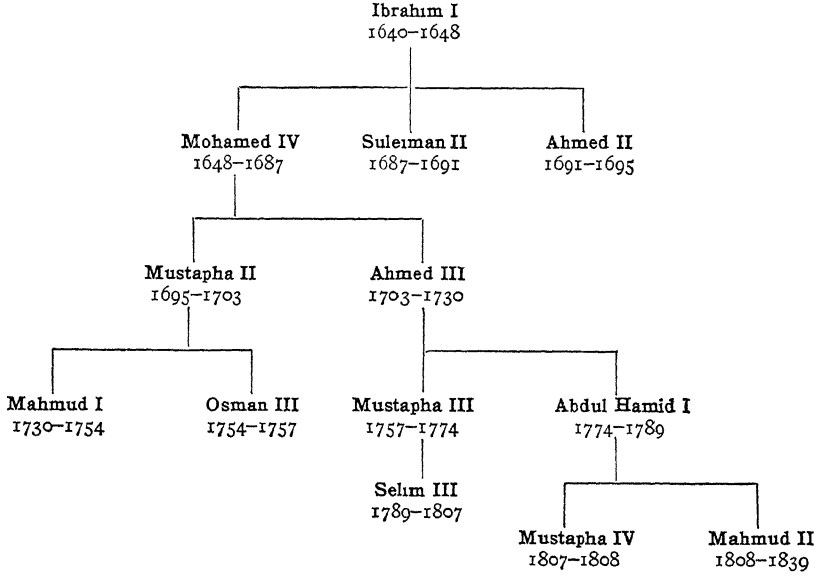
1664, Aug. 1. Battle of St. Gotthard, a victory of the imperial general, Montecucculi, over the Turks A 20-year truce concluded at Vasvar, the Turks losing no territory, but recognizing the election of the Prince of Transylvania by the local estates

1669. Fall of Candia, after a long siege In the peace with Venice (1670) the latter retained only three fortified posts on the island

1672-1676. War with Poland, the result of countless border raids (Tatars and Cossacks) and rivalry for control of the Ukraine The Turks raided as far as Lemberg, but were twice defeated by King John Sobieski In the **Treaty of Zuravna** (Oct. 16, 1676) the Turks acquired most of Podolia and the Polish Ukraine, thus coming in contact with Russia

1677-1681. First war with Russia, following Cossack raids. By the **Treaty of Radzin** (1681) the Turks were obliged to give up most of the Ukraine and accord the Cossacks trading rights on the Black Sea

1678. Kara Mustafa (brother-in-law of Ahmed Kiuprili), grand vizier. He was an incompetent but ambitious man, who at once supported Emeric Tökölli as King of Hungary against the Emperor Leopold I.



1682-1699 War with Austria, which was allied to Poland

1683, July 17-Sept. 12. SIEGE OF VIENNA by Kara Mustafa Violent assaults on the walls, extensive mining operations, valiant defense by the garrison under **Rudiger von Stahremberg.** Successful relief of the city by a united German and Polish army under **Charles of Lorraine** and **John Sobieski.**

1684. Venice joined Austria and Poland in a **Holy League,** sponsored by the pope The Poles, however, soon withdrew, influenced thereto by Louis XIV of France The Austrians advanced rapidly to Budapest (1685), while the Venetians took most of the fortresses in the Morea and the Russians laid siege to Azov (1687, 1689)

1687, Aug. 12. Second battle of Mohacs. Charles of Lorraine defeated the Turks and the Diet of Pressburg conferred hereditary succession to the Hungarian throne upon the male line of Austria. Panic in Constantinople, **deposition of Moham-**

Ottoman Sultans (1649-1839)

med IV, who was succeeded by **Suleiman** III (1687–1691).

1688. The Austrians took Belgrade and then (1689) Vidin.

1689. **Mustafa Kuprili** (brother of Ahmed), grand vizier

1690. The Turks drove the Austrians out of Bulgaria, Serbia, and Transylvania and retook Belgrade (flight of the Serbs into southern Hungary)

1691, Aug. 19. The Turks defeated by Louis of Baden in the **battle of Salem Kemen;** Mustafa killed The war continued, but was not pressed by Austria, which had become involved in war with France (**War of the League of Augsburg,** 1688–1697)

1696, July 28. Peter the Great finally took Azov from the Turks

1697, Sept. 11. Battle of Zenta, a great victory of **Eugene of Savoy** over the Turks

1699, Jan. 26. TREATY OF KARLOWITZ, concluded for 25 years Austria received all of Hungary (except the Banat of Temesvar), Transylvania, Croatia and Slavonia, Venice received the Morea and most of Dalmatia, Poland obtained Podolia. Russia continued the war until 1702, when the peace treaty recognized the Russian conquest of Azov. Peter was obliged to postpone his far-reaching plans to liberate his coreligionists in the Balkans

1710-1711. War with Russia, instigated by France and by Charles XII of Sweden, who had fled to Turkey after his defeat by the Russians at Poltava (1709) Peter posed as the champion of the Balkan Christians and made efforts to stir up revolts. But in 1711 he was surrounded on the Pruth River by a vastly superior Turkish army and had to buy himself off. By the **Treaty of the Pruth** (1711, July 21) Russia was obliged to give up Azov again

1714-1718. War with Venice. Corinth and the Venetian stations in Candia were taken, but Austria entered the war and pressed the campaign in Hungary

1716, Aug. 5. Eugene of Savoy won a victory at **Peterwardein** and captured Belgrade (1717),

1718, July 21. TREATY OF PASSAROWITZ: The Turks lost the Banat of Temesvar, northern Serbia, and Little Wallachia, but they retained the Morea.

1725-1727. The Turks, by agreement with Russia, secured the western part of Transcaucasia. This led to war with Persia (**Nadir Shah**), who drove the Turks out (1730).

1736-1739. War with Austria and Russia, partly the result of Turkish protests against Russian action in Poland, partly of French pressure. The Russians retook Azov and raided the Crimea, but in the campaigns of 1737 the Turks were successful against both Russians and Austrians

1739. Spectacular advance of the Russian general, Munnich, to Jassy Austria, alarmed by the successes of Russia, accepted French mediation.

1739, Sept. 18. TREATY OF BELGRADE. Austria gave up northern Serbia and Belgrade The Russians, deserted by Austria, joined in the peace, agreeing to raze the fortifications of Azov and not to build a fleet on the Black Sea.

1743-1746. An indecisive **war with Persia,** marking, in a general way, the end of a long duel. The mid-century was, on the whole, a period of peace (European powers involved in the War of the Austrian Succession and the Seven Years' War) and cultural progress (**Raghib Pasha,** grand vizier, 1757–1763) But the unaggressiveness of the central government soon led to the rise of the **Derebeys** (lords of the valley), who established themselves in many parts of Anatolia and set themselves up as semi-independent potentates.

1768-1774. First war of Catharine the Great against the Turks This arose from the Russian policy in Poland, the rising of the Poles and their subsequent flight into Turkey, whither they were pursued by Russian troops. The Porte, instigated by France, declared war Catharine, though she did not want the war, threw herself into it energetically Her generals overran Moldavia and Wallachia and sent agents to Greece to raise a revolt, which was officered by Russians.

1770, July 6. Battle of Chesmé, in which a Russian fleet, officered by British, having come from the Baltic to the Anatolian coast, defeated the Turkish fleet.

1771. The Russians conquered the Crimea. Frederick the Great, alarmed by the Russian successes, offered mediation and arranged the first partition of Poland (p 477), but the war went on until the Russians were diverted by the great revolt of Pugachev (1773).

1774, July 21. TREATY OF KUCHUK KAINARJI (a village near Silistria on the Danube) Russia received Kinburn, Yenikale, and Kertch in the Crimea and obtained the right of free navigation for trading vessels in Turkish waters, the Ta-

tars of the Crimea were recognized as "independent" on condition that they accept the sultan as caliph (first move of the sultan to exploit his claim to religious leadership of Islam), Moldavia and Wallachia were returned to Turkey on condition that they be leniently ruled (Russia reserved the right to intervene on their behalf); Russia was given the right to build a Greek church in Galata (foreign quarter of Constantinople), the Turks promised protection to the Christian churches and recognized the right of Russia to make representations in behalf of the church to be built in Galata These provisions were to become the basis of much Russian interference later.

1781. Austro-Russian Treaty, following a famous meeting of Catharine and Joseph II (1780) Catharine's *Greek Scheme* to drive the Turks out of Europe and restore the Greek Empire, with her grandson Constantine (born 1779) as emperor The Austrians were to receive the whole western half of the Balkans

1783. The Russians incorporated the Crimea, on the plea of restoring order. England and Austria persuaded the outraged Turks to accept the inevitable.

1787-1792. Second War of Catharine against the Turks, resulting from Turkish intrigues with the Crimean Tatars and from Russian designs on Georgia Austria joined Russia (1788) under the terms of the alliance treaty of 1781

1788. The campaign was indecisive, the Russians being unprepared and the Turks having difficulty in getting troop contingents from the Derebeys

1789-1807 SELIM III, an intelligent ruler, bent on victory and reform of the empire

1789. The Austrians took Belgrade and the Russians, under Prince Potemkin and Gen Suvorov, advanced to the Danube.

1791, Aug. 4. The Austrians, under Prussian pressure, made the separate **Treaty of Sistova,** giving back Belgrade in return for a strip of northern Bosnia

1792, Jan. 9 TREATY OF JASSY, between Turkey and Russia, which, worried by Prussian activity in Poland and deserted by Austria, decided to end the war Russia obtained Oczakov and a boundary along the Dniestr River, but returned Moldavia and Bessarabia

(*Cont. pp.* 586, 710, 721)

C. LATIN AMERICA

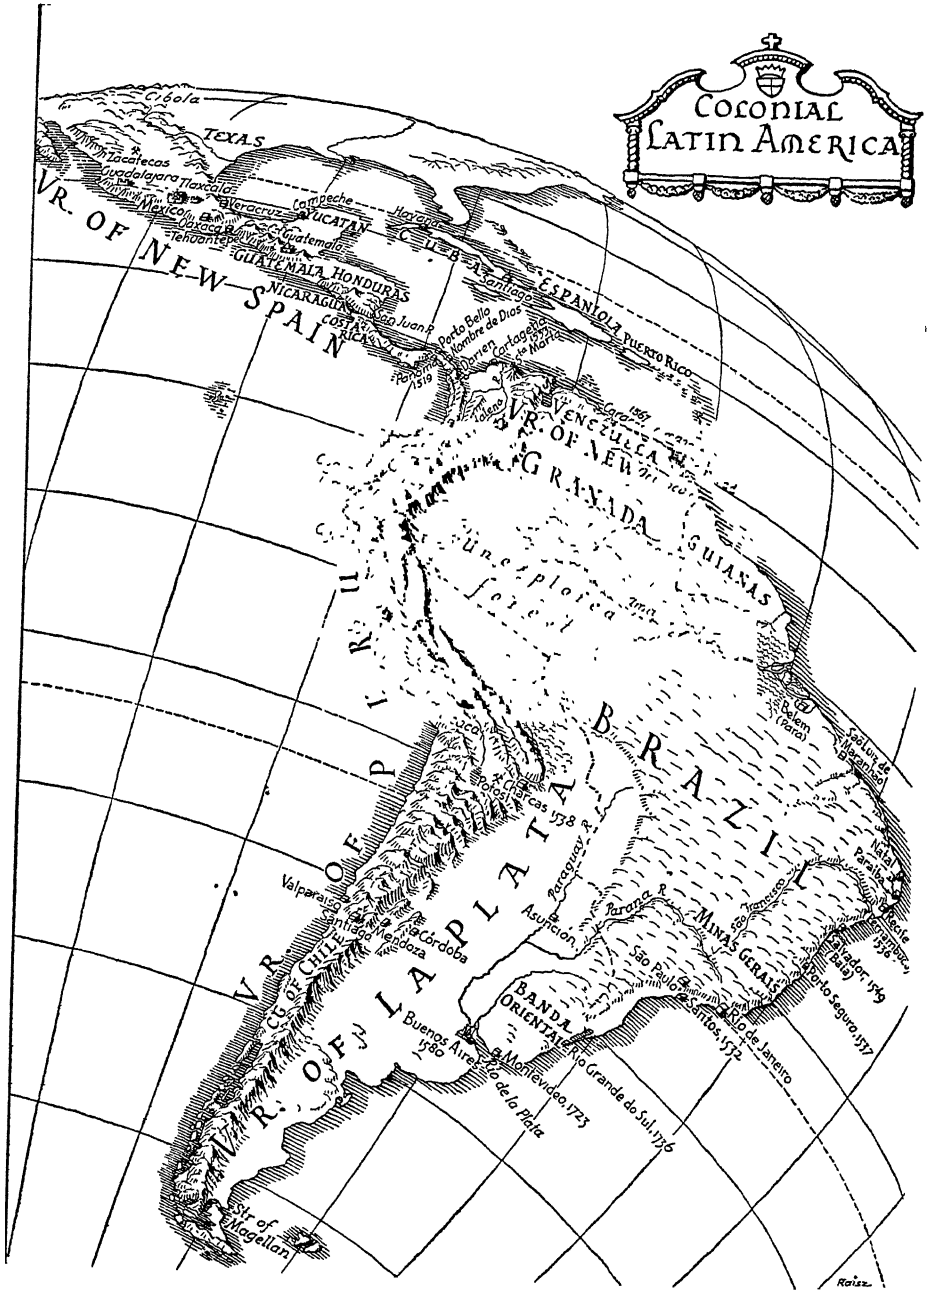
1. NATURE OF THE CONQUEST

In the broader sense the conquest and colonization of Spanish America progressed logically outward from the earliest colony in Santo Domingo until by 1600 the territory from New Mexico and Florida on the north to Chile and the Río de la Plata on the south was, with the exception of Brazil, effectively under the rule of the crown of Castile

The motives which inspired the Castilian sovereigns to create a vast empire in the Americas were the desire to achieve more extensive realms, propagate Christianity, and obtain increased revenues The early *conquistadores* were impelled by several motives which varied in intensity with regard to individuals, time, and place: desire to gain wealth and position, desire to add to the glory of the Castilian crown, zeal to propagate Christianity, and love of adventure The most important of the early conquests were achieved at no direct cost to the crown Individual leaders by their own initiative, in the name of the sovereign or by virtue of royal patents, conquered territory at their own expense, hoping to receive or to be assigned authority and revenues in the lands subjugated In this manner Cortés conquered Mexico, Alvarado Guatemala, Pizarro Peru, Jiménez de Quesada New Granada, and Montejo Yucatan. The crown of Castile soon established direct and absolute control and evolved complex machinery of government to rule its vast colonial empire. The Church, over which the crown exercised patronage, achieved complete organization and exercised vast influence. The military triumphs of the Spaniards over incredible numerical odds was the triumph of indomitable representatives of a more highly developed society over those of a lesser The conquest was accompanied by great cruelty, but it was no greater than that of contemporary conquest elsewhere Ruthless exploitation of the natives followed colonization, but such was the common lot of subject peoples during the period The intent of the Castilian crown toward the Indian masses, if not the actual practice, was beneficent While the production of gold and silver was the chief source of crown revenues in the Indies and became the basis of much private wealth, agriculture, grazing, and commerce were soon highly developed and local industries of various types came into existence. Certain colonies like Chile, Yucatan, and the Río de la Plata were almost exclusively agricultural and pastoral A relatively large measure of intellectual activity came into being in the larger cities and within the Church The existence of a large Indian population, many groups of which possessed high cultures of long standing, and the impact of European culture and Christianity on the New World civilizations led to fundamentally important social, cultural, and racial developments

2. THE WEST INDIES AND THE ISTHMUS

Santo Domingo became the first seat of Spanish government in the Indies Immigration to Española, although not heavy, increased and mining and agriculture were developed



1501. Negro slavery was introduced The Indian population rapidly disappeared as a result of warfare, enslavement, and disease

1508-1511. Puerto Rico was conquered, San Juan being founded, and **Jamaica** was settled

1511-1515. Diego Velâsquez, as lieutenant of the viceroy, Diego Columbus, conquered Cuba and founded Santiago and San Cristóbal de la Habana

1509-1513. Under royal patents **Alonso de Ojeda** founded a colony on the coast of South America east of the Isthmus of Panama and **Diego de Nicuesa** founded Nombré de Dios on the Isthmus. The settlement founded by Ojeda was transferred to the Isthmus at the suggestion of Vasco Núñez de Balboa (1474–1519) There the colonists united with those of Nicuesa

1513. Balboa became governor of the colony and as such he discovered

the South Sea (Pacific Ocean) and took possession for the crown of Castile

1513-1514. A jurisdiction independent of Española, **Castilla del Oro** (Darien), was created in the region of the Isthmus and **Pedro Arias de Ávila** (1442–1531) was appointed royal governor, bringing some 1500 colonists from Spain

1514-1519. Ávila dispatched expeditions by land and sea to adjacent areas, including the Gulf of Nicoya, Zenú, and the Gulf of San Miguel, founded **Panama** as the seat of government, refounded Nombre de Dios, and established a route across the Isthmus Balboa, as *adelantado* of the South Sea and subordinate to Ávila, continued explorations on the Pacific coast, but as a result of quarrels with the governor, was executed by him (1519)

1522-1523. Under authority independent of Ávila, **Gil González Dávila** and Alonso Niño led a combined land and sea expedition westward from the Isthmus. Dávila conquered the area about the Gulf of Nicoya and Lake Nicaragua and Niño sailed to Fonseca Bay Ávila then dispatched **Francisco Hernández de Córdoba** to conquer Nicaragua for himself

1523-1531. Dávila, returning to Española, secured license to continue exploration and conquest, and returned to Central America by way of Honduras. Hernández de Córdoba, after establishing a short-lived colony on the Gulf of Nicoya, entered Nicaragua and founded León and Granada Forces sent northward by him were defeated by Dávila, who in turn was overcome by Cristóbal de Olid Hernandez de Córdoba rebelled against Ávila and was executed, after which Ávila became governor of Nicaragua In this capacity he dispatched an expedition along the San Juan River to the sea, exploration which was continued after his death (1531).

3. VENEZUELA AND NEW GRANADA

Early efforts to colonize the eastern portion of the north coast of South America met with no success

1521. An attempt made by **Bartolomé de las Casas** (1474–1566) to found a colony at Cumaná in accord with his theories of peaceful reduction failed

1530. **Antonio de Sedeño** achieved but little success in an effort to occupy Trinidad Island

1531-1535. The efforts of **Diego de Ordaz** to explore the region of the Orinoco, led to no result Ordaz lost his life In the western areas permanent colonization was established at an early date

1527. **Juan de Ampués,** commissioned by the *Audiencia* of Santo Domingo, founded Santa Ana de Coro This territory was granted by the Emperor Charles V to the **Welsers,** the great Augsburg banking firm to which he was heavily indebted.

1529. The Welsers at once sent out colonists and established an administration. Exploration was carried on through the valley of the Orinoco and into the Andes The government of the Welsers was marked by ruthless enslavement and maltreatment of the Indians On that account and because of protests in Spain against grant of lands in the New World to foreigners, their concession was ultimately revoked (1546–1556) The conquest and colonization of Venezuela was then undertaken by the Spaniards Caracas was founded by Diego de Losada in 1567.

The history of the **conquest of the Chibcha Indian empire** by Quesada has been overshadowed by the fame of Cortés in Mexico and Pizarro in Peru, though it was in some respects no less striking.

1525. **Rodrigo de Bastidas** founded Santa Marta, the first permanent settlement in what was to become New Granada. **Cartagena** was founded in 1533 by Pedro de Heredia, acting directly under royal authority.

1536-1538. **Gonzalo Jiménez de Quesada** (1495–1576), under commission from the governor of Santa Marta, moved up the Magdalena River, reached the plateau of Bogotá, reduced the Chibchas (p. 361) and founded **Santa Fé de Bogotá.**

1539. **Nikolaus Federmann,** an agent of the Welsers, arrived at Bogotá after three years of wandering in the lowlands. Very soon afterward there appeared from the west coast **Sebastian de Belalcázar,** one of Pizarro's lieutenants. A dispute arose regarding jurisdiction Finally the three captains went to Spain to lay the controversy before the crown Federmann died Belalcázar was confirmed in the governorship of Popayán, but Quesada's claims were rejected in favor of those of the son of the deceased governor of Santa Marta.

1549. The ***Audiencia* of New Granada** was created It included Santa Marta, Cartagena, Popayán, and Santa Fé (Bogotá), the latter town being the seat of government over this large area.

4. PERU AND THE WEST COAST

1522. Continuing exploration southward from Panama, **Pascual de Andagoya** (c 1495–1548) reached a point south of the Gulf of San Miguel and advanced into Biru (**Peru**), where he learned of the rich and powerful **Inca Empire** (p 361) Andagoya planned the conquest of the lands reported, but was forced to relinquish the project by ill health

1524-1528. **Francisco Pizarro** (1470–1541), under authority of Ávila, in association with Diego de Almagro (1475–1538) and Hernando de Luque, a priest, determined upon the conquest of Peru An initial expedition reached the San Juan River and a second the Gulf of Guayaquil and Túmbez, where evidence of the high civilization and great wealth of the Inca was encountered

1528-1529. Pizarro went to Spain and concluded a capitulation with the crown by which he was granted the right of discovery and conquest in Peru for a distance of 200 leagues south of the Gulf of Guayaquil with the offices of *adelantado*, governor, and captain general Almagro was assigned command of the fortress of Túmbez, and Luque was named Bishop of Túmbez.

1531. Returning to Panama, accompanied by his brothers, Gonzalo (c 1505–1548) and Hernando, and a small group of recruits, Pizarro organized an expedition of 180 men, with 27 horses and two pieces of artillery, and sailed for the conquest Pizarro consolidated his position at Túmbez and founded San Miguel After having been joined by further recruits, Pizarro moved into the interior with 62 horse and 102 foot, invited by the Inca **Atahualpa,** and reached Cajamarca on the central plateau, near which the Indian monarch was encamped with a large army.

1532, Nov. 16. When Atahualpa visited the Spanish camp, Pizarro seized him This bold stroke produced great moral effect among the Inca and paralyzed the machinery of government While a prisoner, Atahualpa caused his rival half-brother Huascar to be murdered

1533. The Inca paid an enormous ransom in gold and silver, but for political reasons was executed by the Spaniards Having been joined by Almagro, Pizarro occupied **Cuzco,** the Inca capital, and set up **Manco,** brother of Huascar, as Inca.

1535. Pizarro, having left Cuzco, founded **Lima,** which became the capital of the later viceroyalty of Peru In Pizarro's absence the natives revolted under Manco and conducted a lengthy but unsuccessful **siege of Cuzco.** This was the only serious attempt of the Incas to expel the Spaniards (1535–1536).

In the following years the area of Spanish dominion was greatly extended In the south the region about Lake Titicaca was reduced and Chuquisaca founded (1536–1539) The rich silver mines of **Potosí** were opened in 1545 To the north the region of Quito, where lieutenants of Atahualpa had established control after his seizure, was reduced in 1534 by Pizarro's subordinate, Belalcázar (1495–1550) **Pedro de Alvarado,** governor of Guatemala, having heard of rich lands in Peru, led an expedition of some 500 men from Central America and sought to secure control of Quito in 1534–1535. Alvarado was ultimately induced to relinquish his claims in return for monetary compensation. Belalcázar founded Cali and Popayán (1535–1536) and advanced to the Bogotá plateau, where in 1539 he encountered Quesada. In the same year Gonzalo Pizarro, governor of Quito, led an expedition across the Andes and reached the upper Amazon One of his lieutenants, **Francisco de Orellana,** seeking to gain territory for himself, continued down the Amazon and reached the sea (1541). He went to Spain and secured authority to conquer the Amazonian area, but died on the return to the New World His followers accomplished nothing

1537. After a dispute with Pizarro regarding jurisdiction over the city of Cuzco, Almagro occupied the city, thus beginning a series of civil wars between the Spaniards Almagro was defeated and executed (1538).

1541. Dissension continued Partisans of Almagro assassinated Pizarro and set up Almagro's son as governor, but the younger Almagro was, in turn, overthrown by the royal governor Vaca de Castro (1542)

In the meanwhile the Spaniards had begun **expansion into Chile.**

1535-1537. Almagro the elder had advanced as far as the Maule River.

1540-1553. **Pedro de Valdivia** (c 1498–1553) penetrated the fertile valley and founded **Santiago** (1541). A series of wars ensued with the **Araucanian Indians,** most warlike of the tribes

Valdivia having lost his life in the wars (1553), the conquest was continued by

García Hurtado de Mendoza (1557–1561) whose forces advanced to the Straits of Magellan The conquest was extended into Cuyo and the town of Mendoza founded

With the creation of the viceroyalty and *audiencia* of Peru (1542), **Blasco Núñez Vela,** the first viceroy, proclaimed the **New Laws,** with provision for eventual abolition of *encomiendas* (1544) This aroused much opposition, culminating in open revolt under the leadership of **Gonzalo Pizarro.** Vela was deposed and Pizarro assumed the position of governor (1544) The viceroy sought to quell the revolt, but was defeated and killed (1546).

1546–1550. The emperor, fearing a separatist movement, appointed **Pedro de la Gasca,** a churchman with high qualities of statesmanship, his representative and endowed him with virtually unlimited powers De la Gasca, adopting a conciliatory policy and promising remedy of the causes of complaint, won over many of the opposing party, defeated Pizarro in the **battle of Xaquixaguana** (1548), and restored direct royal authority. Gonzalo Pizarro was executed.

1550–1551. **Antonio de Mendoza** was named viceroy of Peru, but died after a short period in office The *audiencia* exercised interim authority, crushing a revolt of yet dissatisfied elements led by Francisco Girón, until the arrival of Andrés Hurtado de Mendoza (1557)

1569–1581. **Francisco Alvarez de Toledo,** a proved soldier and diplomat, and one of the greatest of the magistrates of the colonial period, as viceroy of Peru systematized the administration. Codes were promulgated, mining was stimulated and regulated, *corregimientos* on the Castilian model were erected for both Spanish and Indian districts, the tribute of the natives was regularized, the *mita,* or system of enforced labor of the Indians in the mines, on the *haciendas* and for public works was established, the natives were concentrated in towns to facilitate administration and indoctrination, and public works were constructed **Francis Drake** raided the coast of Peru during the incumbency of Toledo

5. THE RIO DE LA PLATA

1526–1532. **Sebastian Cabot,** in the service of a group of merchants of Seville, set out with an expedition to reach the Moluccas, but diverted it to the **Río de la Plata** in search for a passage to the east The expedition passed up the Paraná and Paraguay Rivers and founded a short-lived settlement on the lower Paraná

1535. Permanent colonization of the La Plata was undertaken by the expedition of **Pedro de Mendoza,** to whom the conquest of the area was assigned

1536. Mendoza founded **Buenos Aires** (Santa María de Buenos Aires) on the estuary of the La Plata Expeditions were sent to explore the Paraná and Paraguay and search for a route to Peru A fort was established at Asunción (1537) to which the colony at Buenos Aires was soon transferred Mendoza died (1537) on a voyage to Spain, and Domingo Martínez de Irala was elected governor

1542–1544. **Alvar Núñez Cabeza de Vaca,** named by the crown to replace Mendoza, reached Asunción with more colonists, having traveled overland from southern Brazil He was opposed by Irala, who again became governor and was at length confirmed by the crown.

1573. **Juan de Garay,** with colonists from Asunción, founded Santa Fé and a few years later refounded Buenos Aires (1580)

6. NEW SPAIN

a. THE CONQUEST OF MEXICO

1518–1519. To continue the discoveries of Hernández de Córdoba and Grijalva (p. 368), Diego Velásquez and **Hernándo Cortés** (1485–1546) organized an expedition of some 600 men, with 17 horses and 10 cannon. Cortés was put in command. Sailing from Cuba despite Velásquez' orders, he followed the coast of Yucatan, subjugated Tabasco and reached San Juan de Ulloa There he renounced the authority of Velásquez and, acting as a direct agent of the crown, founded **Villa Rica de la Vera Cruz.** Cortés was elected chief magistrate by the soldiers and sent representatives to Spain to secure confirmation.

After negotiations with **Moctezuma** (Montezuma), ruler of the Aztecs (p 360),

and after winning the support of the **Totonac,** a people subject to the Aztec, Cortés moved into the interior, overcame Tlaxcala, and formed an alliance with the republic Moving on the Aztec capital, Cortés thwarted a treacherous attempt to destroy his force at Cholula and entered **Tenochtitlán** (1519, Nov 8), where he was amicably received by Moctezuma To safeguard his position, Cortés soon made the native ruler a prisoner, and the latter and his chiefs swore fealty to the Castilian sovereign.

1520. Meanwhile Velásquez, named royal *adelantado* of the lands discovered by Hernández de Córdoba and Grijalva, sent an expedition under **Pánfilo de Narváez** to reduce Cortés to obedience. Cortés, placing Pedro de Alvarado (1485–1541) in command at Tenochtitlán, went to the coast and by combined subterfuge and vigorous action won over the majority of the force of Narváez, thereupon returning to the Aztec capital Harsh rule by Alvarado aroused the Aztecs to revolt against the Spaniards and Moctezuma, and Cortés was forced to evacuate Tenochtitlán with heavy losses (1520, June 30) Moctezuma, who had been injured by his own subjects, died or was killed by the Spaniards at the time of the evacuation Cortés retreated around the northern end of Lake Tezcuco, overcame an overwhelming Aztec army at **Otumba** (1520, July 7), and reached Tlaxcala, which remained loyal. At Tlaxcala Cortés reorganized his forces He then conquered the province of Tepeaca, founding Segura de la Frontera An expedition was sent into southern Vera Cruz, and two outposts were established. Having received reinforcements, among them the members of the Garay expedition to Pánuco, Cortés established his base at Tezcuco and undertook the investment of Tenochtitlán by land and water.

1521, May 26-Aug. 13. After a prolonged and desperate siege the Spaniards, aided by a horde of native allies, captured the Aztec capital, making prisoner **Cuauhtémoc,** who had become emperor and had organized resistance. Spanish control was firmly established over the immediate vicinity and the conquest was rapidly extended. Tenochtitlán was razed and **Mexico City,** which became the seat of government of the later viceroyalty of New Spain, was erected. A bitter suit between Cortés and Velasquez, carried on before the crown during the period of the conquest, terminated in favor of Cortés and the emperor named him *governor* and *captain-general of New Spain* (1522, Oct. 15).

b. EXPANSION TO THE SOUTH

1522-1524. **Cristóbal de Olid** subdued Colima and part of Jalisco Another settlement was made in Michoacan, the territory of the independent and civilized Tarascans, whose ruler had given allegiance to Cortés Farther south Oaxaca and Tehuántepec were reduced, the latter by Alvarado.

1523-1525. Embassies from certain towns of Guatemala having made submission, Cortés sent Alvarado to that region Alvarado conquered the civilized Quiché and Cakchiquel and founded the city of Guatemala The conquest was then extended into **Salvador,** and Alvarado become governor of the general district of Guatemala Chiapas was reduced by expeditions from New Spain (1523–1528).

1524-1526. Cortés then sent Olid to conquer and settle **Honduras.** Olid sought to free himself from the authority of Cortés and overcame Gil González Dávila, but was defeated and later killed by a lieutenant of Cortés Trujillo was founded during this period (1523–1526). Cortés led an expedition overland to Honduras by way of Tabasco and Petén, and established his authority, thereupon returning to Mexico (1524–1526)

1526-1536. Almost complete anarchy continued in Honduras, despite appointment of royal governors. The acting governor, **Andrés de Cerezeda,** established the majority of the colonists in the area of the Río de Ulúa (Higueras), and soon summoned Alvarado to preserve the colony (1534–1536) Alvarado as governor founded **San Pedro** and dispatched an expedition to found Gracias a Dios, but departed for Spain without definitely reducing the area (1536).

1527-1535. **The conquest of Yucatan** was assigned to **Francisco de Montejo** (c. 1473–1553) as *adelantado* The first attempt of Montejo to conquer the Maya failed after eight years of effort, and he was diverted to Honduras upon appointment as governor The final conquest and colonization of Yucatan were achieved by the son and nephew of Montejo under his general direction Campeche, Mérida, Valladolid, and Salamanca (Bacalar) were founded (1539–1545)

1537-1539. **Francisco de Montejo,** as royal governor, conclusively subjugated Higueras, founding Comayagua. Alvarado, upon returning, again became governor, but after his death (1541) governmental affairs fell into confusion. Stability was created

with the establishment of the *Audiencia* of Confines (1542–1544)

1546. A serious revolt of the Maya was crushed

Tabasco, which had been colonized at an early date but was in danger of abandonment, was assigned to the jurisdiction of Montejo and was pacified by him and his son (1529–1540) The area of Petén was not conquered until the close of the seventeenth century

c. EXPANSION TO THE NORTH

1522-1527. The initial efforts of Garay to colonize Amichel having failed, Cortés subdued the region of the Panuco River and founded a town Further efforts by Garay were forestalled, and a revolt of the natives was put down by one of Cortés' lieutenants (1523) The Panuco district became a special jurisdiction under the crown, with Nuño de Guzmán as governor (1527).

1531-1550. In the interior Spanish expansion was slower. Querétaro was reduced and the town of that name was founded The Zacatecas and Guanajuato silver mines were opened, the former proving to be the richest in New Spain San Luis de Potosí, in which mining was soon developed, was conquered by Francisco de Urdiñola, whose son continued the work of colonization

1539. Reports brought by Cabeza de Vaca and the legend of the *Seven Cities of Cíbola* caused the viceroy, Mendoza, to send the Franciscan **Fray Marcos de Niza** northward. Having reached the Zuñi pueblos of New Mexico, the friar returned with exaggerated accounts.

1540-1542. **Francisco Vásquez de Coronado,** governor of New Galicia, with the authority of the viceroy, led an expedition overland to the new lands, while **Hernando de Alarcôn** proceeded by sea along the west coast. Coronado reached the Zuñis and his lieutenants reached the Moqui pueblos and the **Grand Cañon** of the Colorado. In search of Gran Quivira, Coronado traversed northern Texas, Oklahoma, and eastern Kansas before his return

1562-1570. **Francisco de Ibarra,** governor and captain-general, conquered New Vizcaya and founded **Durango.**

1598-1608. Under royal patent, **Juan de Oñate** secured the submission of New Mexico and sent out expeditions which explored the region from Kansas to the Gulf of California **Santa Fé** was founded soon after the resignation of Oñate

In the meanwhile the Spaniards had extended their conquests far up the Pacific Coast

1529-1531. **Nuño de Guzmán,** president of the first *audiencia* of New Spain, subjugated a considerable area to the north and west of Mexico City, including Jalisco and Sinaloa This region was called *New Galicia*, of which Compostela became the capital

1532-1533. In search of a strait and of new lands, Cortés dispatched expeditions which reached northern Sinaloa and Lower California

1535. Cortés himself attempted, though without success, to found a colony in Lower California, but **Francisco de Ulloa,** in command of an expedition organized by Cortés, reached the head of the **Gulf of California** (1539). Alarcón, co-operating by sea with Coronado's expedition to New Mexico, reached the same district and passed up the **Colorado River** (1540)

1541. In the absence of Coronado, the natives of New Galicia rose in revolt, but were finally subdued by the viceroy, Antonio de Mendoza.

1542-1543. As part of his project for South Sea discovery, Mendoza sent **Juan Rodríguez de Cabrillo** to search for a northern strait. Cabrillo, and, after his death, the pilot Bartolomé Ferrelo, explored the Pacific coast as far as **Oregon,** but failed to discover the Bays of Monterey and San Francisco.

1548. An *audiencia* was created to govern New Galicia, **Guadalajara** becoming the political and ecclesiastical capital.

1602. The occupation of the Philippines (p 908), the development of trade, and the need for protection against English, French, and Dutch aroused renewed interest in the California coast and the possibility of a northern strait. The Madrid government having ordered the exploration of the coast, **Sebastian Vizcaino** proceeded to a point above San Francisco Bay, which, however, he did not discover. Plans to colonize the Monterey Bay region did not materialize.

1680. The Spaniards, driven from New Mexico by a revolt of the natives, reconquered the area somewhat later (1696).

1720-1722. Fearing loss of territory to France, the Spaniards permanently occupied **Texas,** mainly through the efforts of the Marquis of Aguayo, governor of Coahuila.

1769-1786. Under Gálvez' direction Upper California was occupied San Diego (1769), Monterey (1770), Los Angeles (1781), and San Francisco (1776), were founded and a system of *presidios* and missions, the latter under the Franciscan order, was established

1774-1776. Juan Pérez, Bruno de Heçeta, Bodega y Quadra, and other Spanish explorers were sent north along the coast to counter British and Russian activity They discovered the mouth of the **Columbia River** and advanced as far as 60° N L

1776. **José de Gálvez,** minister of the Indies, erected New Vizcaya, Sinaloa, Sonora, the Californias, Coahuila, New Mexico, and Texas into the *Provincias Internas* under the governorship of a commandant-general responsible directly to the crown

1789-1795. Attempts were made to colonize the region north of California Settlements were made on Vancouver Island and at Cape Flattery, but without permanent results

d. THE GULF COAST, FLORIDA AND THE CAROLINAS

1521. **Juan Ponce de Leõn,** under royal patent, tried unsuccessfully to colonize Florida.

1526-1528. A colony, **San Miguel de Gualdape,** was established in the Carolinas by **Lucas Vâsquez de Ayllôn,** but was abandoned on his death

1528. **Pánfilo de Narvâez,** having secured authority to colonize the territory assigned to Garay on the Gulf coast and to Ponce de León in Florida, landed in Florida with colonists from Spain. After exploration he tried to reach the area of the Pánuco River. The expedition was wrecked on the coast of Texas and most of the colonists died of hunger and disease, or at the hands of the Indians

1536. **Alvar Núñez Cabeza de Vaca** and three companions, after six years of captivity, escaped and traversed Texas and northern Mexico, reaching Culiacán

1539-1543. **Hernando de Soto** (1499-1542), granted a patent for the colonization of the Gulf coast (Florida), headed an expedition from Spain, landed in Florida, explored the southeastern portion of the United States, discovered the Mississippi River (1541), traversed Arkansas and Oklahoma to the Arkansas River, and followed the latter river to the Mississippi While moving down the Mississippi, De Soto died (1542) and the expedition, under Luis de Moscoso, continued on to the area of the Pánuco (1543) Luis de Cancer, a Dominican, and certain companions sought to bring the nations of Florida to obedience by peaceful means, in accord with theories of Las Casas, but De Cancer was killed, and the attempt was abandoned (1549)

1559-1561 Under directions from the crown, the viceroy, Velasco, dispatched a large expedition under **Tristân de Luna** to colonize the region of the Carolinas (Santa Elena) De Luna established a garrison at Pensacola, moved inland, and founded a settlement The colonists were soon transferred to Pensacola. Villafañe replaced De Luna as governor and sought without success to colonize the Carolinas. The garrison left at Pensacola was soon withdrawn. In view of constant failure, Philip II ordered that no further attempt be made to colonize Florida (1561), but need for protection of the Bahama Channel (the route for the return to Spain of plate and merchant fleets) and French attempts to occupy the region led to a reversal of this policy

1562. **Jean Ribaut** failed in an attempt to establish a French Huguenot settlement at Port Royal (in South Carolina), but shortly afterward **Laudonnière** founded Fort Caroline, on the St John's River (1564) Ribaut arrived with a third expedition, with instructions to establish a fortified place to command the route of the Spanish plate fleets As a result of these activities Philip II determined upon the expulsion of the French and the permanent colonization of Florida

1565. As *adelantado* of Florida **Pedro Menéndez de Avilés founded St. Augustine,** captured Fort Caroline, and slew the garrison. Thus danger of French occupation was removed

1565-1574. Menéndez de Avilés established *presidios* and posts throughout a wide area and explored and sought to colonize the area north of the peninsula **Jesuits,** and later **Franciscans,** supported by the *adelantado,* established missions as far north as Virginia. The peninsula of Florida was secured for Spain by Menéndez de Avilés, but the attempts to achieve permanent possession of the territory to the north failed.

7. FOREIGN ENCROACHMENTS AND TERRITORIAL CHANGES

The commercial and territorial monopoly of Spain in the Indies, international war, and religious conflict caused England, France, and the Netherlands to attack Spanish shipping and coastal towns in the colonies and to colonize within areas controlled by Spain

16th cent. French corsairs early attacked Spanish vessels off the coasts of Europe and at the Azores and Canaries and soon extended their activities into the Caribbean, where they attacked towns as well as commerce In the latter half of the 16th century English freebooters, with the tacit approval of the crown, became active in the Atlantic, Caribbean, and Pacific. The raiding of the Pacific coast by **Drake** during his voyage around the world (1577–1580) is the most outstanding example of English activity in the Pacific during this period The activities of British freebooters became official after the outbreak of war between Spain and England Spanish commerce suffered greatly, and many towns were held for ransom or sacked, among them Nombre de Dios, Cartagena, Santo Domingo, and Valparaiso **Drake, Hawkins, Oxenham,** and **Cavendish** were the most important of the English mariners, and two of the expeditions commanded by Drake constituted formidable armaments Coincident with the struggle for independence in the Netherlands, Dutch mariners became active

17th cent. With the decline of Spanish power, official **colonization of the lesser Antilles,** neglected by Spain, was undertaken by England, France, and Holland Settlements were established by these powers in the Guianas England colonized Bermuda and the Bahamas, the Netherlands unsuccessfully sought to colonize the Pacific coast of South America, and France and Holland sought to gain possession of portions of Brazil Powerful Dutch armaments were dispatched to American waters, one of which, under Piet Heyn, captured a plate fleet from New Spain (1628) An expedition sent against Spanish possessions by Cromwell captured Jamaica (1655), of which England remained in permanent possession. Western Española, in which French buccaneers had secured a foothold and official colonization had later been undertaken, was ceded to France by the **Treaty of Ryswick** (1697). The activity of English, French, and Dutch freebooters in the Caribbean reached its height during the 17th century, and played an important part in the decline of Spanish commerce. The Englishman **Henry Morgan** was the most important of these freebooters, and during his career captured numerous cities and towns, including Puerto Bello and Panama (1655–1671)

18th cent. The European wars in which Spain was involved in the 18th century and the early part of the 19th had important consequences in the Americas. Control of the seas by Great Britain and the naval weakness of Spain rendered protection of the colonies increasingly difficult. The Spanish commercial monopoly was, moreover, incapable of enforcement, and extensive illicit commerce participated in by British, French, and Dutch merchants developed

1701-1713. During the **War of the Spanish Succession** there was considerable fighting between the allied Spaniards and French in the West Indies and Florida By the **Treaty of Utrecht** (1713) Great Britain was granted the *asiento,* or monopoly of the slave trade with the Spanish possessions and the right to send one ship each year to trade with Atlantic ports of the Spanish colonies

1718-1720. Incident to war between France and Spain, military operations took place in Florida and Texas, as a result of which Spanish possession of Texas was assured, although the boundary remained disputed

1739-1748 In the **"War of Jenkins' Ear,"** which merged into the **War of the Austrian Succession,** Spain, as a result of reforms introduced by the Bourbons, maintained a successful defense of her possessions Inconclusive operations took place in Florida and on the frontier of Georgia, and a powerful British expedition under Admiral Vernon was repulsed at Cartagena, which had been heavily fortified as a principal bulwark of colonial defense (1741). The **Treaty of Aix-la-Chapelle** (1748) provided for no important territorial changes

1762. When Spain entered the **Seven Years' War** as an ally of France, British expeditions captured Havana and Manila (1762). By the **Treaty of Paris** (1763) Spain ceded Florida to Great Britain and received Havana, Manila being restored later. France ceded Louisiana to Spain, although Spanish authority was not estab-

lished in the latter without opposition from the French colonists

With the temporary elimination of France by the Seven Years' War, Great Britain and Spain became the great colonial powers, and **Charles III** (1759–1788), convinced that Great Britain would seek to possess herself of the Spanish colonies, believed a decisive conflict inevitable Internal and colonial reforms introduced by Charles III raised Spain to the highest position of power and influence enjoyed since the 16th century, and she was comparatively well prepared for an eventual conflict.

1771. A dispute between Spain and Great Britain concerning possession of the **Falkland Islands** brought the two nations to the verge of war, but France refused to afford the support anticipated under the **Family Compact** (p. 452) and Spain was forced to agree to an accommodation.

1776-1783. The **American War of Independence,** becoming a European war after the alliance between France and the colonies, afforded Spain a desired opportunity to check British expansion, and she entered the conflict (1779) Spanish forces captured Mobile and Pensacola, overran the Bahamas, and blocked British attempts to gain control of the Mississippi (1779–1783). By the **Treaty of Versailles** (1783) Spain regained Florida, but relinquished the Bahamas.

1789. Controversy between Great Britain and Spain arose over the seizure of British ships at Nootka. Considering sovereignty involved, Spain invoked the **Family Compact** and prepared for war The French revolutionary government failed fully to support Spain and she yielded Great Britain and Spain adjusted the incident by treaty (1790–1794).

1795. By the **Treaty of Basel** Spain relinquished the eastern two-thirds of Española to France This territory was returned to Spain by the **Treaty of Paris** (1814) Trinidad was ceded to Great Britain (1797) Great Britain during the 18th century gained permanent control of Belize and established a protectorate over the Mosquito Indians of Honduras and Nicaragua

Controversy arose with the **United States** concerning the navigation of the Mississippi, the mouth of which Spain controlled through the acquisition of Louisiana.

1800. France under the consulate forced Spain to return **Louisiana,** guaranteeing that the territory would not be transferred to any power other than Spain.

1803. France notwithstanding soon sold Louisiana to the United States. As a result of increasing pressure from the United States, Spain sold **Florida** to that nation (1819–1821)

The establishment of territorial jurisdiction in South America in accord with the **Line of Demarcation** (p 367) created much friction between Spain and Portugal Colonia was established on the left bank of the estuary of the Río de la Plata by the Portuguese (1680–1683) and Montevideo was founded some years later by the Spaniards to prevent Portuguese expansion (1723) Colonia soon became a base for illicit British and Portuguese trade with the province of the Río de la Plata. The **Treaty of Madrid** (1750), an attempted settlement, provided that Colonia should be given to Spain in return for seven Jesuit *reductions* on the east bank of the Uruguay; that Portuguese claims to the basins of the Amazon and Paraná and Spanish claims to the Philippines be recognized, and that boundaries be surveyed The Guaraní of the seven *reductions*, incited by the Jesuits, rebelled against transfer, and it became necessary for the Portuguese to subdue them by force, the **War of the Seven *Reductions*** (1752–1756). Portugal, notwithstanding, retained Colonia, and Charles III annulled the Treaty of Madrid (1761). Spanish forces captured Colonia (1762) and invaded Río Grande do Sul (1762), but these territories were returned by the **Treaty of Paris** (1763). Pombal (p. 454) desired to expand Portuguese territory, and, relying on British support, encroached upon Spanish territory Rivalry between Spain and Portugal continued, and when Great Britain, because of developments in Europe and North America, failed effectively to support Portugal, Charles III dispatched a strong force which captured Colonia and moved against other Portuguese territories (1776–1777). With the dismissal of Pombal (1777) hostilities were suspended and the **Treaty of San Ildefonso** was concluded (1777), by which Colonia and disputed Paraguayan territory were assigned to Spain, and Portuguese claims to the interior were recognized Meanwhile the **Viceroyalty of La Plata** had been created as a defensive as well as an administrative measure (1776) The Portuguese later occupied the disputed missions territory incidental to European hostilities (1801), but by posterior settlements Spain received Colonia and Uruguay while Portugal secured Río Grande do Sul Attempts of Great Britain to secure territory in the region of the Río de la Plata failed completely (1806–1807)

8. THE SPANISH COLONIAL SYSTEM

a. POPULATION

Emigration to the Indies was rigidly controlled by the crown and the *Casa de Contratación*. Heretics, Moors, Jews and their descendants were excluded The vast majority of immigrants were from the realms of the crown of Castile In the early 16th century the crown adopted active measures to encourage immigration Negro slavery, introduced at the opening of the century, was extensive only in the West Indies and northern South America Intermixture between male Spaniards and native women produced a large mixed group (*mestizos*) In 1574 the Spanish population was estimated at some 160,000, and at the close of the colonial period the estimated population was 3,276,000 whites, 5,328,000 *mestizos*, 7,530,000 Indians, and 776,000 Negroes (New Spain 1,230,000 whites, 1,860,000 *mestizos*, 3,700,000 Indians, Guatemala, 280,000 whites, 420,000 *mestizos*, 880,000 Indians, Peru and Chile, 465,000 whites, 853,000 *mestizos*, 1,030,000 Indians; Colombia and Venezuela, 642,000 whites, 1,256,000 *mestizos*, 720,000 Indians, Río de la Plata, 320,000 whites, 742,000 *mestizos*, 1,200,000 Indians; Cuba and Puerto Rico, 339,000 whites, 197,000 mixed, 389,000 Negroes) Negroes in all colonies except Cuba and Puerto Rico numbered 387,000

Social composition. There existed six relatively distinct groups in the population of the colonies: Spanish colonial officials, upper grade creoles (those of Spanish blood born in the Indies) and socially superior Spanish immigrants; lower grade creoles and Spanish immigrants, high rank *mestizos* and Indian nobility, *mestizos* (mixed white and Indian), mulattoes, *zambos* (mixed Negro and Indian), and certain Indians, Indians, who constituted the largest group numerically; Negro slaves. The two upper classes possessed virtually all the wealth of the colonies

b. ADMINISTRATION

The discovery of America was accomplished under commission of the sovereign of Castile and the new lands consequently became realms of the Castilian crown, from which all authority emanated. In accord with the theory of royal absolutism the crown abrogated governmental authority granted Columbus and the early conquistadores and established direct royal control The machinery of royal government was fully formed by the third quarter of the 16th century.

After appointment to supervise preparations for the second voyage of Columbus (1493) **Juan Rodríguez de Fonseca** became virtual minister of the Indies, and as such laid the foundation for the expansion of the machinery of royal government. With the development of trade the *Casa de Contratación* was established at Seville to control colonial commerce and maritime enterprise (1503) The nucleus of a council to administer the Indies was evolved and this body, under the presidency of Rodríguez de Fonseca, rapidly developed into a formal **Council of the Indies** (*Consejo de Indias*) Upon the death of Rodríguez de Fonseca the *Consejo de Indias* was reorganized (1524) and by the close of the reign of Charles V its organization and functions were fully developed The *Consejo de Indias* exercised supreme administrative, judicial, and ecclesiastical authority over the Indies and possessed supervisory authority over the *Casa de Contratación*. The legislation for the Indies promulgated by the crown and *Consejo de Indias* was codified in the *Recopilación de Leyes . . de las Indias*, one of the greatest of colonial codes (1680). At the opening of the 17th century a *Junta de Guerra y Armadas de Indias*, to administer the armed forces and the dispatch of fleets to the Indies, and a *Cámara de Indias*, to control ecclesiastical affairs and appointments, were created as adjuncts to the *Consejo de Indias* Early in the Bourbon period the office of *Minister of the Indies* was created with the establishment of a *Secretaría de Guerra, Marina e Indias* (1714). This secretariat underwent numerous changes and before the close of the century a separate **secretariat of the Indies** was formed With the creation of these institutions the *Consejo de Indias* declined in importance

Direct royal government in the Indies was instituted with the appointment of **Francisco de Bobadilla** as judge and governor of Española and the removal of Columbus (1499–1500). Bobadilla was succeeded by Nicolás de Ovando (1502), and he by Diego Columbus, son of the admiral, named governor at the will of the crown (1509). A tribunal of three royal judges was created in Santo Domingo as a check on the governor (1511), and this body was later established in a fully developed form as the *Audiencia of Santo Domingo* and

given governmental authority over the West Indies (1526).

On the mainland government was at first permitted to rest with those who had conquered the several areas under royal patent or with crown recognition and who governed with the titles of *adelantado*, governor, or captain-general The threat to royal absolutism inherent in government by powerful vassals with privileged positions caused early extension of direct government to the mainland

The institution of the *adelantado* was of great importance during the period of conquest By capitulation with the crown the *adelantado* undertook the conquest of a specified area at his own cost and in return was assigned governmental authority and hereditary privileges. The institution was of value in bringing new lands under Spanish dominion, but its character threatened royal authority and the powers granted were revoked after achievement of the royal purpose

An *audiencia* was created to govern New Spain (1527), but proved weak in its executive aspects and shortly after a *viceroy*, Antonio de Mendoza, was appointed (1529), although he did not take office for some years (1535) The **Viceroyalty of Peru** was created by the New Laws (1542), which also established an *audiencia* at Lima The **Viceroyalty** (or *Reino*) **of New Spain,** with its capital Mexico City, came to include all Spanish territory north of Panama, the West Indies, Venezuela, and the Philippine Islands That of Peru, with its capital Lima, included Panama and all Spanish territory in South America except Venezuela

Audiencias, each with its definite area, were created for Guatemala (1542), New Galicia (1548), New Granada (1549), Charcas, or Upper Peru (1556), Quito (1563), and the Philippine Islands (1583–1593)

The viceroys, as direct representatives of the sovereign, possessed wide civil and military authority, and certain ecclesiastical powers They were presidents of the *audiencias* of their capitals The *audiencias*, composed of a president, *oidores*, a *fiscal* (crown prosecutor), and lesser officials, exercised supreme judicial authority within their districts, and the *audiencias* not directly under viceroys exercised governmental authority The viceregal *audiencia* acted as an advisory council to the viceroy and in this function evolved legislative power The *audiencias* were co-ordinate in judicial affairs, appeals going directly before the *Consejo de Indias*, and they were empowered to correspond directly with the crown. The *audiencias* varied in status according to the rank of the presiding officer, i e , viceroy, president and captain-general, or president The presidents of the *audiencias* of Santo Domingo, Guatemala, and New Granada were early accorded military authority and became presidents and captains-general. As such they became practically independent of the viceroys Guadalajara, Quito, and Charcas remained presidencies. In the absence of the viceroy or president and captain-general the *audiencia* assumed the government During the Bourbon period New Granada, Panama, Venezuela, and Quito were erected into the **Viceroyalty of New Granada** (1717–1739), the **Viceroyalty of La Plata** was established (1776), the captaincies-general of Venezuela (1773), Cuba (1777), and Chile (1778) were created, and *audiencias* were established in Buenos Aires (1783), Caracas (1786), and Cuzco (1789).

Major administrative areas were divided into *gobiernos*, *corregimientos*, and *alcaldías mayores*, of which the *gobiernos* were, in general, the more important and frequently consisted of more than one province This organization persisted until the reign of Charles III, when a system of intendants was established throughout the Indies (1769–1790) The intendants possessed administrative, judicial, financial, and military authority, and in fiscal and economic matters were directly responsible to the crown.

In accord with mediaeval Castilian traditions the **municipalities** at first enjoyed a large measure of self-government under their *cabildos*, composed of *regidores* (councilmen) and *alcades* (mayors), the former elected by the householders and the latter by the *regidores* Before the close of the 16th century the election of *regidores* gave way to royal appointment, hereditary tenure, and venality of office *Cabildos abiertos* of all citizens were at times held to discuss important matters The municipal government exercised executive, legislative, and judicial authority within its district, although frequently under control of royal officials

Fiscal administration was from the first directly under the crown through the *Casa de Contratación* and *contadores*, *factors*, *tesoreros*, and *veedores* in the New World jurisdictional areas With the establishment of the intendants those officials assumed administration of fiscal affairs

The Castilian institutions of the *residencia*, *visita*, and *pesquisa* were early instituted in the New World.

The principal sources of **crown revenues** were the *quinto*, or one-fifth of the products

of the subsoil (gold, silver, precious stones) under the theory of crown ownership of the subsoil, the *almojarifzgo* (customs imposts), the *alcabala* (sales tax), the tributes of the natives, the *media anata* of civil and ecclesiastical offices, and the sale of the *Crusada*. Although revenues from the Americas were great, they at no time during the period of Spanish greatness exceeded 25% of the total income of the crown

The presence of a great **Indian population** created extraordinary administrative problems Municipal governments on the Castilian model were established in the Indian towns Local Spanish officials had jurisdiction over the native towns in their districts Protectors of the Indians were created for general and local districts to guard their interests. The *repartimiento-encomienda*, which early developed, was an institution of great political, social, and economic importance In the earlier period this institution involved the assignment of specified towns to *conquistadores* and colonists, the Indians of which gave tribute, labor, and service to the *encomendero*, who was obligated to afford protection, indoctrination in Christianity, and instruction. Abuses caused the crown to regulate the system Fixed quotas of tribute were established and labor and service were eliminated about the middle of the 16th century Before the close of the century the *encomienda* was virtually reduced to the right to enjoy the revenues from specified towns The crown after the publication of the **New Laws** (1542–1543) assumed control of many towns, and grants of *encomiendas* were brought under control of higher authorities Attempts were made to abolish the system, notably in the New Laws, but it was not until the first part of the 18th century that abolition was definitely decreed In certain areas the institution persisted almost until the close of the colonial period Forced labor of the natives in the mines, on the *haciendas*, and for public works, the *mita*, was established late in the 16th century Indians not within the *encomienda* system were required to pay an annual tribute and after the abolition of the *encomienda* this was required of all

Extensive **enslavement of Indians** took place during the period of conquest under the law of just war, but this was prohibited by the New Laws The natives were regarded as wards of the crown and throughout the colonial period legislation was promulgated for their welfare and protection, notable examples of such legislation being the Laws of Burgos (1512), and the New Laws. A section of the Laws of the Indies was devoted to Indian legislation (1680) The beneficent intent of the crown was to a large degree rendered nugatory by the difficulties of administration and the conflict of theory and practice Many Spaniards acted as advocates of the Indians, the greatest of whom was **Bartolomé de las Casas** (1474–1566).

c. THE CHURCH AND THE MISSIONS

The union of State and Church in the Spanish Americas was exceedingly close. The crown early secured almost complete control of ecclesiastical affairs through the patronage of the Indies (*real patronato de Indias*) granted by Alexander VI in the bulls *Inter caetera* (1493, May 4) which assigned dominion over the Indies and exclusive authority to convert the natives, and *Eximiae devotionis* (1501, Nov 16), which granted the titles and first fruits of the Church in the Indies, and by Julius II in the bull *Universalis ecclesiae* (1508, July 28), which conceded universal patronage. The extent and nature of the patronage was further defined by bulls issued at intervals throughout the colonial period The crown exercised ecclesiastical control through the *Consejo de Indias* and later through that body and the *Câmara de Indias*. Papal bulls were not permitted to be placed in effect without the approval of the crown.

The full **organization of the Church** in the Indies followed closely upon the conquest and colonization, and at the close of the colonial period there existed 7 archbishoprics and some 35 dioceses The Church possessed its own courts, with jurisdiction over all cases touching the clergy and spiritual affairs The Spanish **Inquisition** was introduced (1569), and tribunals were established in Mexico City and Lima (1570–1571) This institution rapidly achieved great religious and political influence Indians, considered incapable of rational judgment, were exempt from the Inquisition.

The Church played an important part in the Indies through conversion of the natives, aid in the maintenance of Spanish political authority, transmission of culture, and education It achieved vast wealth and a privileged position, and at the close of the colonial period is estimated to have controlled half of the productive real estate in the Indies.

The **religious orders**, Franciscan, Dominican, Jesuit, Augustinian, Capuchin, and others, early achieved complete organi-

zation and carried on an exceedingly important work in converting the natives and instructing them in the rudiments of European civilization The task of preserving and extending Spanish control in outlying areas was assigned to the religious orders, especially the Franciscan, Dominican, Capuchin, and Jesuit, as official agencies of the crown. Missionaries, accompanied by small groups of soldiers, and frequently by colonists, established missions and instructed the natives in Christianity They developed agriculture, grazing, and simple industry *Presidios* were established to protect the missions. Civilian colonists occupied the territory and secularization followed Carrying forward on the northern frontier of New Spain, toward the close of the 17th century, Jesuits under the leadership of **Eusebio Kino,** began the establishment of missions in Pimería Alta (Arizona) and under **Juan María Salvatierra** in Lower California, over which the order was granted complete authority A wide area was eventually brought under Spanish control Early in the 18th century a system of missions and *presidios* was established in Texas and late in the century in California Dominicans and Franciscans were active in Guatemala, Capuchins in the area of the lower Orinoco, to check French, English, and Dutch encroachments, and Jesuits in the territory of the Araucanians and Paraguay The mission system in Paraguay was one of the most important in the New World. Granted complete authority to convert and organize the Guaraní east of Asunción, the Jesuits established missions (*reductions*) along the upper Paraná. The natives were later transferred farther south because of Portuguese slave raids A complete governmental organization was established, controlled by a father superior at Candelaria, the natives were instructed in Christianity and the rudiments of European civilization, and agriculture and industry were extensively developed. By the **Treaty of Madrid** (1750) seven *reductions* were transferred to Portugal The Guaraní, incited by the Jesuits, rose in revolt to resist transfer, but were defeated By later adjustments the territory remained in Spanish possession. With the expulsion of the Jesuits (1767) the Paraguayan *reductions* were given to Franciscans, but failed to prosper.

d. ECONOMIC CONDITIONS AND POLICIES

Mining of gold and silver, fostered by the crown, rapidly became the most important industry in the Spanish colonies Rich silver deposits were early discovered throughout central Mexico, especially in the districts of Zacatecas, Guanajuato, Pachuca, Taxco, and San Luis Potosí, and at Potosí in Upper Peru (1530–1600). Gold deposits were worked throughout the Indies Silver production came to surpass that of gold, and after the third quarter of the 16th century Peru produced about two-thirds of the total output of precious metals.

Agricultural and pastoral pursuits were highly developed All plants and animals of Spain were introduced into the Indies and native plants, especially maize, potatoes, cotton, tobacco, and cacao were cultivated.

Local textile, iron, pottery, shipbuilding, gold and silver working, and sugar (West Indies) industries developed

The principal imports into the colonies were manufactured goods, and **exports** consisted almost exclusively of precious metals, raw materials, and agricultural products.

The economic policy of Spain was based upon mercantilist theory Trade was a monopoly of the metropolis under direct crown control and economic activity in the colonies which competed with that of Spain was prohibited or restricted

The economic privileges of Columbus were almost immediately rendered inoperative and the crown assumed direct control over all phases of economic activity In the earliest period Juan Rodríguez de Fonseca as *de facto* minister of the Indies controlled commerce (1493–1503), and trade under license was authorized by the crown (1495–1501) The *Casa de Contratación,* "a board of trade, a commercial court, and a clearing-house for the American traffic," was established at Seville (1503) This body came under the supervisory authority of the *Consejo de Indias.* Seville was accorded a monopoly of the American trade In the New World Vera Cruz, Cartagena, and Puerto Bello, alone were permitted direct trade with Spain. General intercolonial commerce was early prohibited, and before the close of the 16th century commerce with the Philippines was restricted to Acapulco Trade between Manila and China was confined to Chinese.

Naval warfare, attacks by corsairs, and the necessity of protection for gold and silver shipments caused the establishment of a system of **convoyed fleets,** one each year for New Spain (the *flota*) and one for Peru, the *galeones* (1543–1561) On the return the fleets united at Havana and sailed for Spain together. Fairs for the exchange of goods were held annually at Puerto Bello and Jalapa (Mexico) Trade between Acapulco and the Philippines

(Manila) was restricted to one vessel a year each way. With the period of Spanish decadence trade declined greatly

Under the Bourbons many reforms were introduced By the Treaty of Utrecht (1713) England was conceded the monopoly of the slave trade with the colonies (*asiento*) and the privilege of sending one vessel each year to Puerto Bello to trade With the establishment of the office of the minister of the Indies early in the 18th century (1714) the *Casa de Contratación* tended to decline in importance The *Casa de Contratación* and trade monopoly were transferred to Cadiz (1717–1718) To develop trade the monopolistic **chartered companies** of Honduras (1714), Guipúzcoa, or Caracas (1728), Havana (1740), and Santo Domingo (1757) were formed With the decline in trade the sailings of the fleets had become irregular Supplies were increasingly carried to the Indies in registered vessels and by the chartered companies and in the middle of the 18th century the fleet system was abolished (1748) Charles III promulgated a series of reform measures authorizing trade between more than twenty Spanish ports besides Seville and Cadiz and a large number of ports throughout the Indies and permitting direct intercolonial trade between New Spain and Peru and Guatemala and New Granada (1764–1782). A great increase in trade resulted. Royal secretaries having increasingly assumed its functions, the *Casa de Contratación* was abolished (1790) During the wars of the French Revolution neutral vessels were permitted to engage in the carrying trade with the colonies (1797)

e. EDUCATION, LEARNING, AND FINE ARTS

Education in Spanish America, with the exception of the rudimentary instruction afforded the Indians by the Church, was largely confined to the upper classes. The earliest universities were those of **Mexico** (1551), **San Marcos de Lima** (1551), and **St. Thomas Aquinas** of Santo Domingo (1558), founded by royal decree They were modeled after the University of Salamanca. A school of mines was established in Mexico by Charles III (1783).

A vast body of **historical writing**, much of it of high quality, was produced during the colonial period, and important anthropological and linguistic studies were made In the sciences the most important figures were **Carlos Sigüenza y Góngora** (1645–1700) and **Pedro de Peralta Barnuevo Rocha y Benavides** (1663–1743).

Juan Rúz de Alarcón (d 1639), a Mexican creole, achieved a high place in the Spanish drama and **Sor Juana Inés de la Cruz** (b 1651), also a Mexican creole, attained recognition for her poetry

The first **printing press** was introduced into Mexico by the Viceroy Mendoza (1535) At the close of the colonial period there were a number of presses in operation in the larger cities Newssheets and scientific and literary publications appeared in Lima and Mexico City toward the close of the 18th century.

Intellectual activity was, in general, seriously hampered by the Inquisition

In **art and architecture** Spanish models were followed Local schools of painting developed in Mexico and Quito. Charles III founded the **San Cárlos Academy of Fine Arts** in the former city (1778) An outstanding architectural achievement was the **Cathedral of Mexico,** begun late in the 16th century and completed in the first part of the 19th (*Cont p* 799)

9. PORTUGUESE AMERICA

1500-1521. Absorbed by interests in the Orient, **Manuel the Fortunate** (1495–1521) made no effective effort to colonize the territory claimed by Portugal in South America, although certain royal expeditions were dispatched and trading posts were established through private enterprise

1521-1530. French activities having menaced Portuguese possession, **John III** (1521–1557) undertook systematic colonization.

1530-1532. Martin Affonso de Souza, as captain-major and leader of a colonizing and exploratory expedition, founded São Vicente and actively furthered colonization, introducing cattle and European grains and fruits and laying the foundations of a sugar industry

1532-1536. A system of feudal hereditary captaincies under *donatarios* with virtually sovereign authority was established by the crown, but proved unsuccessful and a more centralized administration with a directly responsible governor-general at its head was created

1549. Thomé de Souza, the first governor general, founded **São Salvador** (Bahia), which was made the seat of government. De Souza firmly established the

administration and effectively furthered colonization This task was ably continued by **Mem de Sá** (1558-1572). **São Paulo** was founded shortly after the middle of the century.

1549. **Jesuits,** headed by Manuel de Nobrega and José de Anchieta, undertook the conversion of the natives and established missions, playing an important part in colonization

1551. The fundamental relationship between Church and State was established by a bull of Julius III which conceded to the crown complete spiritual jurisdiction over conquests and the right to nominate bishops, collect tithes, dispense church revenues, and receive appeals from ecclesiastical tribunals. The Bishopric of Bahia, suffragan to the Archbishop of Lisbon, was erected (1551)

France, Holland, and England did not permit Portugal to remain in possession of Brazil unchallenged French efforts to establish an empire in South America passed through two distinct phases

1555. With the intention of creating an "Antarctic France," a colony was founded on the Bay of Rio de Janeiro under **Nicolas Durand de Villegagnon.**

1565-1567. The Portuguese under leadership of Mem de Sá destroyed the colony and founded the city of **Rio de Janeiro,** ending French attempts in that area Henry IV projected the establishment of an "Equinoctial France"

1612 After his death, although without direct royal aid, a town was founded on the island of **Maranhão** and exploration was conducted on the mainland with the purpose of occupying the area of the mouths of the Amazon The State of Maranhão was created (1621), directly subordinate to the home government The Jesuits established missions along the Amazon and gave Portugal control of the vast river basin Maranhão was independent of Brazil until 1777

1615. The Portuguese forced the surrender of the colony, and shortly thereafter founded Belem These events terminated French efforts to establish an extensive empire in South America.

The personal union of the crowns of Spain and Portugal (p. 392) carried important consequences for Brazil. **English attacks** on coastal towns occurred in the final decades of the 16th century, Santos being sacked

1624-1625. Dutch activities were far more serious. Shortly after the organization of the **Dutch West India Company** (p. 438), the Dutch captured Bahia (1624), but were forced to capitulate to a Spanish fleet (1625).

1630. Continuing the effort, a powerful Dutch armament captured Recife and Olinda The conquest was extended over a wide area.

1637. The West India Company named **Prince Maurice of Nassau-Siegen** governor, and under his able administration Dutch control was established over an area extending from the São Francisco River to Maranhão.

1644. As the West India Company displayed greater interest in profit than in colonization, Prince Maurice returned to Holland.

1645. Immediately thereafter, in a truly popular movement, the Portuguese rebelled and within a decade forced the Dutch to capitulate (1654). These events ended Dutch occupation of Brazilian territory, a situation later recognized by treaty (1661, Aug 6)

Slave-raiding parties began to penetrate into the interior from São Paulo (1629) and by the middle of the century these Paulistas had explored an extensive area of southern Brazil They attacked the Spanish Jesuit *reductions* on the upper Paraná, forced their transfer to a more southern area, and made possible Portuguese possession of the region. Simultaneously Portuguese Jesuits established missions in the south, coming into conflict with the Paulistas in their efforts to protect the Indians, in which they received royal support.

1680-1683. Seeking to gain possession of the left bank of the Río de la Plata (*Banda Oriental*), the Portuguese founded **Colonia.** Spain and Portugal immediately came into conflict over this area; **Montevideo** being founded by the Spaniards (1723) The territory changed hands frequently during the remainder of the colonial period

1693. Decreasing profits from slaving operations and increasingly effective protection afforded the Indians by the Jesuits caused the Paulistas to direct their efforts to a search for gold, and toward the end of the 17th century extensive deposits were discovered in **Minas Geraes.** An influx of gold-seekers ensued, among them many newly arrived Portuguese.

1701-1713. The alliance of Portugal with England during the War of the Spanish Succession led to French attacks on Brazilian ports, **Rio de Janeiro** being sacked and held for ransom by Duguay-Trouin (1711)

1708-1709. Efforts of the Portuguese to displace the Paulistas resulted in open warfare, the **War of the Emboabas,**

in which the former were successful Through the efforts of the Paulistas Matto Grosso and Goyaz, far to the west of the Line of Demarcation, were gained for Portugal

1709. With the colonization of the interior the crown created the captaincy of **São Paulo and Minas Gerães,** with a captain-general directly responsible to the sovereign, erected Minas Gerães into a separate jurisdiction (1720), and established the captaincies of Matto Grosso (1744) and Goyaz (1748)

1710-1711. The War of the Mascates. Rivalry between the native Brazilians of Olinda, the political capital of Pernambuco, and the Portuguese of the commercial town of Recife, concerning the elevation of the latter to *villa* status led to armed conflict. Recife, notwithstanding, was accorded municipal privileges and eventually superseded Olinda as the seat of government

The **Line of Demarcation** never having been surveyed, as Portuguese expansion progressed, efforts were made to establish limits

1750 In the **Treaty of Madrid,** Spain recognized Portuguese claims to extensive areas in the basins of the Amazon and Paraná, and although this treaty was abrogated, the bases of settlement were reaffirmed by the **Treaty of San Ildefonso** (1777) While the limits were not definitely surveyed, Portuguese claims to territory vastly greater than that assigned under the **Treaty of Tordesillas** (p 367) were permanently established.

1750-1777. Pombal as minister of Joseph I (p 453) introduced far-reaching colonial reforms Administration was unified, the capital being transferred from Bahia to Rio Janeiro and Maranhão being incorporated with Brazil (1777). Commerce between Portugal and Brazil was encouraged, certain restrictions and taxes were removed and trading companies were organized Native Brazilians were appointed to important governmental posts, racial equality was advocated, and defenses were improved Pombal strongly pressed Portuguese territorial claims. **The Jesuits were expelled** from Portugal and her possessions during his ministry (1759)

1789. The Conspiracy of Minas. Maladministration, heavy taxes, and reactionary government led to an abortive attempt at revolution in Minas Gerães, led by **Joaquim José de Silva Xavier** (*Tiradentes*).

1807. The determination of Napoleon to force Portuguese adherence to the Continental System and his plan to partition Portugal exercised a decisive influence on Portuguese and Brazilian history

1807-1808. Apprised of the designs of the emperor, upon the approach of a French army, **Prince John,** regent after 1792 because of the insanity of María I, created a regency in Portugal, fled to Brazil, and established his government at Rio de Janeiro

1808-1816. The regent adopted many reforms advantageous to Brazil Decrees were issued establishing free trade, removing restrictions on industry, promoting agriculture and communications, establishing a royal press, founding the Bank of Brazil, and encouraging the arts and sciences Brazil was erected into a coordinate member of the **United Kingdom of Portugal, Brazil, and Algarves** (1815, Dec. 16) The regent became **John VII** upon the death of María I (1816, Mar 1)

1808. Prince John declared war on France and dispatched an expedition which occupied **French Guiana.** This territory was returned by the **Treaty of Paris** (1814). The regent sought also to annex the *Banda Oriental* and supported the designs of his wife, Carlota Joaquina, sister of Ferdinand VII of Spain, to establish her rule over the provinces of the **Río de la Plata.**

1812. The opposition of the viceroy and the revolutionary *junta* of Buenos Aires and British influence caused the regent temporarily to renounce intervention in the area of the Río de la Plata.

1816-1821. After becoming king, John took advantage of the situation arising from the struggle for independence in the *Banda Oriental* and the violation of Brazilian territory by the leader of the movement, **José Artigas** (p 801) He then intervened again in the *Banda Oriental.* Portuguese troops occupied Montevideo and defeated Artigas, and the territory was incorporated into Brazil as the **Cisplatine Province** (1821). Projects against other provinces of the Río de la Plata were renounced under threat from Ferdinand VII and in face of a potentially united Argentina.

10. THE PORTUGUESE COLONIAL SYSTEM

Population and Race A complex racial situation developed in Brazil Intermixture between Portuguese males and Indian women gave rise to a large group of *mestizos*. From the middle of the 16th century onward Negro slaves were introduced in large numbers to meet labor requirements and extensive intermixture of Negro and white blood occurred There was also intermixture between Negroes and natives In 1583 the population was estimated at 25,000 whites, 18,000 civilized Indians, and 14,000 Negro slaves In the mid-17th century, considerable immigration having taken place, at 150,000 to 200,000, three-fourths of whom were Indians, Negroes, and mixed At the close of the 18th century at 3,000,000, a population already greater than that of Portugal In 1818 the population was estimated at 843,000 whites, 1,887,500 Negroes, 628,000 mixed, and 259,400 civilized Indians The bulk of the population was concentrated in São Paulo, Minas Gerães, Pernambuco, and Bahia. Originally the crown permitted any person of Catholic faith to enter Brazil, but after 1591 aliens were excluded

Portuguese colonial administration was not clearly differentiated from that of the metropolis prior to the union of the crowns of Portugal and Spain For general purposes there existed an inspector of finances and a *Casa da India* The *Mesa da Consiencia e Ordems*, with ecclesiastical and financial powers, was created in 1532 Upon the establishment of a more centralized government in Brazil, a commissioner of finances and a chief justice were appointed for the colony (1548) For local administration there were *corregedores*, with judicial and military functions Municipal organization was patterned on that of Portugal The fundamental code was the *Ordenanças Manuelinas* (1521)

During the period of the union of the thrones of Spain and Portugal (1580/1581–1640) Spanish administrative forms were introduced The inspector of finance was replaced by a council, the *Conselho da Fazenda* A Council of the Indies (*Conselho da India*) was created (1604), a supreme court was established in Bahia (1609), and the title of *viceroy* was introduced (1640). Under Philip III (1598–1621), the *Ordenanças Philippinas*, which permitted greater local autonomy, superseded the *Ordenanças Manuelinas*. The greater portion of these innovations were permanent.

By the close of the 18th century the structure of royal government was fully formed The **Transmarine Council** (*Conselho do Ultramar*), formerly the Council of the Indies, exercised general religious and military authority over Brazil Parã, Maranhão, Pernambuco, Bahia, São Paulo, Minas Gerães, Goyaz, Matto Grosso, and Rio de Janeiro were captaincies-general, provinces of the first rank, under captains-general usually appointed by the crown. The viceroy, who was also captain-general of Rio de Janeiro, possessed legal authority over the captains-general in certain matters, but the latter frequently received instructions directly from the crown, with which they could correspond directly A tendency toward local autonomy existed There were a number of districts of inferior status, captaincies, subordinate to the captaincies-general Two superior judicial districts existed, with high tribunals at Bahia and Rio de Janeiro (founded 1757) respectively. Appeals from these courts went directly to Lisbon The municipalities, with their councils (*senados da camera*), enjoyed a certain degree of self-government.

Portuguese economic policy was founded upon mercantilist theory Commerce was a monopoly of Portugal until 1808 and trade was restricted to Lisbon and Oporto In 1649 a monopolistic **Commercial Company of Brazil** was organized and greatly developed commerce The **Maranhão Company**, also monopolistic, was formed in 1682. Both companies aroused opposition and were abolished in the first part of the 18th century. To foster commerce two chartered companies, one with a monopoly of the trade of Pará and Maranhão and the other with a monopoly of that of Pernambuco and Parahyba, were formed during the period of Pombal, but were abolished after his fall Between 1548 and the formation of the Commercial Company of Brazil commerce was carried on through convoyed fleets Discontinued during the existence of the company, the system was re-established upon its abolition and continued until finally abolished by Pombal

Restrictions were placed upon industry and agriculture which competed with that of Portugal, and a government monopoly, which produced important crown revenues, existed for the exploitation of Brazil wood, mining of diamonds, and other activities Customs duties were levied, and a royal fifth (*quinto*) of the product of mining activity was required Agriculture and pastoral pursuits were highly developed. Cotton and sugar cane were the principal agricultural products. The cultivation of

coffee was introduced The mining of gold and diamonds (rich deposits of the latter were discovered in 1721), the gathering of Brazil wood, and the production of sugar and hides were the chief industries Brazilian sugar production became the greatest in the world and was the basis of the wealth of the colony.

The Church and education. In 1676 Innocent XI created the **Archbishopric of Brazil,** with Bahia as the metropolitan see, at the same time erecting the suffragan bishoprics of Rio de Janeiro and Pernambuco. At the close of the 18th century there were nine bishoprics, two of which were suffragan to the Archbishop of Lisbon. The **Inquisition** was not introduced into Brazil. The **Jesuits** until their expulsion (1759) played an important rôle through conversion of the natives, extension of Portuguese influence, and establishment of schools and colleges, the earliest being that of São Paulo (1554) No institution of university status was created in Brazil during the colonial period, but seminaries and academies were established, among them the seminaries of São Pedro and São José at Rio de Janeiro (founded 1736).

(*Cont. p.* 805)

D. NORTH AMERICA

1. EXPLORATION AND SETTLEMENT

a. THE FRENCH IN NORTH AMERICA

Norman and Breton fishermen visited Newfoundland coasts perhaps as early as 1500 There are unconfirmed reports of attempts to explore the Gulf of St Lawrence in 1506 and 1508, and of an unsuccessful colony on Sable Island in 1518

1524. Giovanni de Verrazzano, sent out by Francis I, probably explored the coast from Cape Fear to Newfoundland

1534-1541 Voyages of **Jacques Cartier.** On the first voyage he sighted the Labrador coast, passed through the Straits of Belle Isle and explored the Gulf of St. Lawrence On the second (1535-1536) he sailed up the St Lawrence, stopped at the site of Quebec, proceeded to the La Chine Rapids and to the site of Montreal. On the third (1541) he was accompanied by M Roberval, a Picard nobleman, whom Francis I had made viceroy of Canada, Newfoundland, and Labrador Unsuccessful attempts were made to establish a settlement at Quebec, and therewith the French efforts to colonize the St Lawrence Valley came to an end until the 17th century

In the south the activities of the French necessarily led to conflict with the Spaniards

1562 Admiral Coligny, as part of his plan to attack Spain, sent **Jean de Ribaut** to establish a colony in Florida A colony on Port Royal Sound failed, but in 1564 Ribaut and **René de Laudonnière** established **Fort Caroline** on St John's River In the very next year the Spaniards, led by Menéndez de Avilés, massacred the French colonists and took the fort Commanded by the Chevalier de Gourgues, the French (1567) avenged themselves by attacking the Spanish fort on the St John's and putting the garrison to death

1598. **Marquis de la Roche** attempted to found a colony on Sable Island The survivors were rescued five years later.

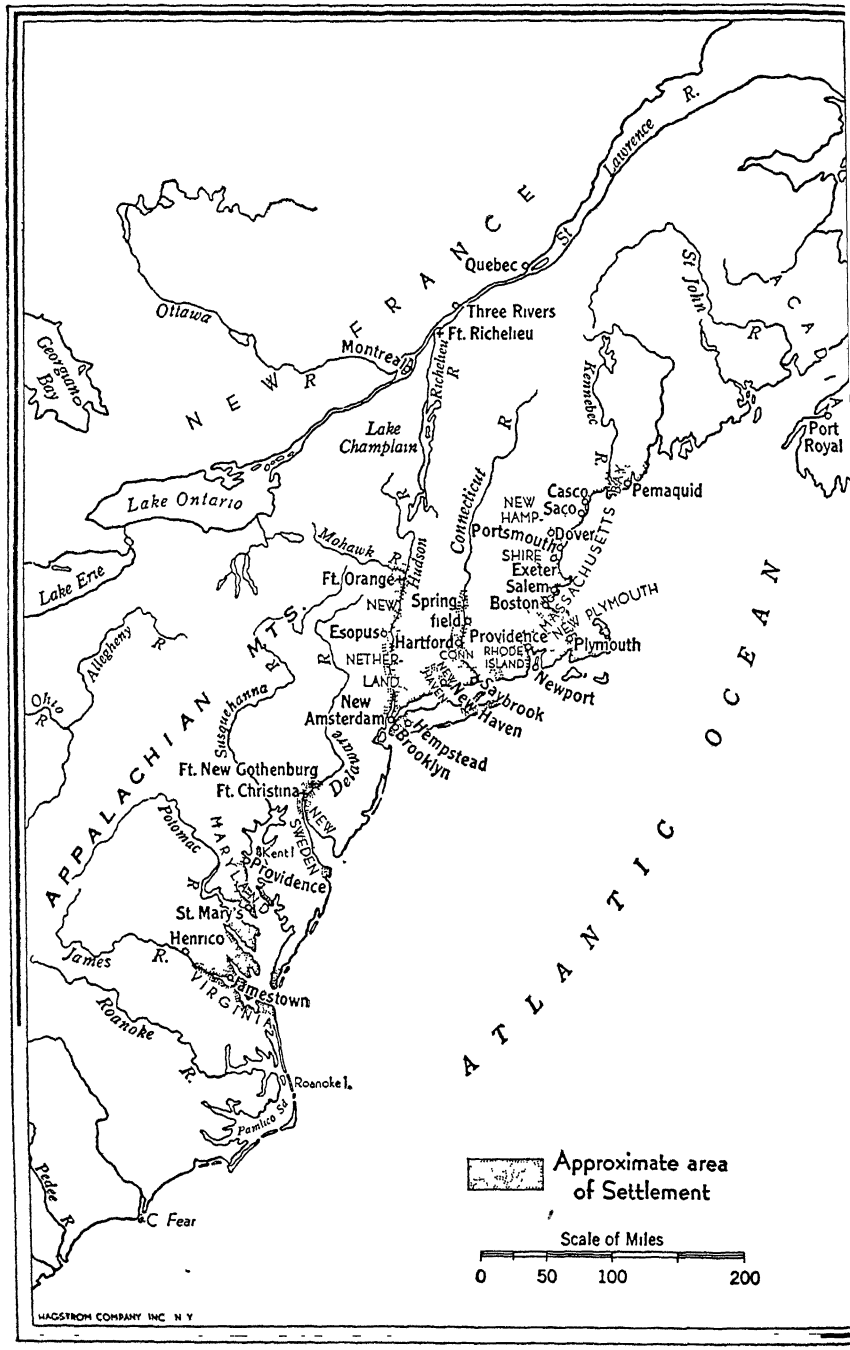
1600. **Pontgravé, Chauvin, and De Monts,** with a grant of the fur-trade monopoly, made another unsuccessful attempt to colonize, this time at **Tadoussac** on the lower St Lawrence

1603. Pontgravé, accompanied by **Samuel de Champlain,** explored the St Lawrence as far as La Chine Rapids Champlain also explored the Acadian coast In the next three years De Monts and Champlain organized a settlement on St Croix Island, but moved later to **Port Royal.** Champlain followed the New England coast as far as Cape Cod, and returned to France in 1607.

1608, July 3. Champlain, acting as lieutenant for De Monts, founded the settlement of **Quebec.** In the following year, accompanied by a party of Algonquin and Huron Indians, he ascended the Richelieu River to the lake which now bears his name

1610. Poutrincourt re-established Port Royal

1613. Champlain explored the Ottawa River to about 100 miles above the present city of Ottawa In 1615 he went up the river to Lake Nipissing and thence to Georgian Bay, being the first white man to blaze the fur-trader's route into the interior



1615. Four **Recollet friars** arrived at Quebec, marking the beginning of French missionary activity In 1625 five **Jesuits** arrived, beginning the work of that order

1625-1664. **French settlements in the West Indies.** The first was St. Christopher (1625) The **Company of St. Christopher** was formed in 1626, to extend the settlement This was superseded in 1635 by the **Company of Isles of America.** Guadaloupe, Martinique, and Tortuga were occupied, and between 1648 and 1656 settlements were made on St. Martin, St. Bartholomew, St. Croix, The Saints, Marie Galante, St Lucia, and Grenada

1627. Richelieu organized the **Company of the Hundred Associates** to colonize New France The company was given all lands between Florida and the Arctic Circle, with a monopoly of trade, except in cod and whale fisheries

1628. Acadia and Quebec captured by the English, but restored in 1632.

1634. Champlain, hearing of a great waterway in the west and believing it might be a passage to China, sent **Nico-**

EARLY SETTLEMENTS ON THE CONTINENT OF NORTH AMERICA

let on an exploring expedition Nicolet reached Sault Ste. Marie, explored the south shore of the upper peninsula of Michigan, and reached the southern extremity of Green Bay

1642. **De Maisonneuve** founded **Montreal.**

1658-1659. Radisson and Groseillers traded and explored in the country at the western end of Lake Superior.

1665. **Father Allouez** established the La Pointe Mission near the west end of Lake Superior

1673. **Fathers MARQUETTE** and **JOLIET** followed the Fox and Wisconsin Rivers to the Mississippi, which they descended to the confluence of the Arkansas In the same year **Count Frontenac,** governor of New France, founded Fort Frontenac on Lake Ontario

1679-1683. **Explorations of La Salle,** along the shores of Lake Michigan and in the Illinois country He erected **Fort Crèvecoeur** near present Peoria (1679) and sent Hennepin to explore the upper Mississippi while he himself returned to Fort Frontenac In 1682 La Salle reached the mouth of the Mississippi and took possession of the whole valley in the name of the King of France.

1683-1689. Attempts of La Salle to establish a French colony at the mouth of the Mississippi, in order to control the fur trade and to provide a base for attack upon Spain in America He left France with some 400 men in 1684 and reached the West Indies Continuing his voyage he missed the mouth of the Mississippi and landed at Matagorda Bay, on the coast of Texas. In the meanwhile, **Tonty** had descended the Mississippi, but had failed to find La Salle (1686) La Salle conducted four expeditions to the northeast in the hope of finding the Mississippi On the fourth of these (1687) he was murdered by his companions His colony was completely wiped out by an Indian attack (1689)

1699-1702. To check the Spanish advance, to control the Gulf coast and to forestall possible British occupation of the lower Mississippi, French forces under **Iberville** established posts at Biloxi and started the French colony in **Louisiana** (1699) The post was moved to Mobile Bay in 1702 and named St Louis **Mobile** was founded in 1710 and **New Orleans** in 1718

1699. A Sulpician mission was set up at Cahokia in the Illinois country In 1700 Jesuits moved down the Illinois River to Kaskaskia.

1701. **Detroit founded by Cadillac,** to control the entrance from Lake Erie to Lake Huron and to control the trade with the Illinois country

1712. **Antoine Crozat** was granted a monopoly of the trade in the territory from Illinois to the coast. Crozat surrendered his patent (1717) and Louisiana was in the same year taken over by the **Compagnie d'Occident,** which became the **Compagnie des Indes** (1719)

b. THE ENGLISH IN NORTH AMERICA

(1) *Exploration*

Following the voyages of the **Cabots** (see p 367) the English showed little interest in the New World until the second half of the 16th century

1562. **John Hawkins,** having taken a cargo of slaves in Africa, disposed of them in Española The Spaniards made efforts to stop a second slave-trading voyage (1564–1565), and on his third voyage (1567–1568) Hawkins was driven by a storm into the harbor of Vera Cruz, where his fleet was largely destroyed

1572-1580. **Francis Drake,** nephew of Hawkins, carried out reprisals on Spanish commerce. Sailing in 1577 he passed through the Straits of Magellan, up the west coast of South America and north to Drake's Bay, California. He named the region **New Albion** and took possession for England He then sailed to the East Indies, across the Indian Ocean, around the Cape of Good Hope, and thence home to England, being the first Englishman to circumnavigate the globe

1576-1578. After unsuccessful efforts by explorers of the **Muscovy Company** to find a northeast passage to China, English efforts became concentrated on the search for a northwest passage. **Martin Frobisher** sailed from England in June, 1576, explored the Labrador coast, crossed Hudson Strait, coasted along Baffin Land, and entered the inlet known as **Frobisher's Bay.** In 1577–1578 he made a second voyage (p 559)

1583. **Sir Humphrey Gilbert** took possession of Newfoundland in the name of Elizabeth, but lost his life on the return voyage.

1585. **John Davis** explored Davis Strait, but failed to find a northwest passage A second attempt (1586) was equally unsuccessful (p 559)

1586-1588. **Thomas Cavendish,** following Drake's course, plundered Spanish commerce and circumnavigated the globe.

(2) *Virginia*

1584. **Sir Walter Raleigh,** under patent, sent out Amadas and Barlow to establish a colony They landed on Roanoke Island and named the country **Virginia.** Supply ships were sent out in 1586, but they found the colony deserted, the colonists having been taken back to England by Drake

1587. Another party of colonists was sent out, under Governor **John White** Upon his return in 1591, White found only the ruins of the colony.

1602-1606 A number of voyages were made to America, the most important having been that of **George Weymouth** in 1604 Weymouth visited the New England coast and his favorable report did much to stimulate the desire to establish further colonies

1606, Apr. A group of London men was given a charter to organize the **London Company,** with the object of colonizing the region between 34° and 41° N L. Another group, composed of Plymouth, Bristol, and Exeter men, was chartered as the **Plymouth Company,** to operate between 38 and 45° N L The London Company at once sent out (Dec. 1606) three ships with 120 colonists, under command of Captain **Christopher Newport.**

1607, May. **FOUNDING OF JAMESTOWN COLONY** at the mouth of the James River The colony was held together largely through the efforts of Captain **John Smith**

1609. The London Company was enlarged and given a new charter which vested the government in a council, with power to appoint its own officers

1610, May. **Captain Newport** arrived with 400 more colonists and with **Lord Delaware,** the new governor Delaware left again in 1611, but remained governor until his death in 1618 **Sir Thomas Dale** was left in command of the colony and ruled with an iron hand

1612. Beginning of the **cultivation of tobacco,** which was to play a vital part in the economic and social life of the colony

1612. Third charter of the London Company. The Bermuda Islands were included in its jurisdiction

1618. **Sir Edwin Sandys** became the dominant figure in the colony. He carried through a policy of assigning 50 acres of land to every person who would transport one more settler to the colony.

1619. Arrival of the **first Negro slaves** in the colony.

1619. **Sir Thomas Yeardley** arrived as governor, bringing instructions for each plantation to elect two burgesses to a general assembly The assembly met at Jamestown on July 30 and was the **first representative assembly** in America.

1621. **Sir Francis Wyatt,** the governor, brought over new regulations providing for government through a governor, council of state, and assembly, the latter consisting of two burgesses each elected from every plantation and town.

1624 **Revocation of the charter.** This step was taken as a result of dissension within the company and because of the king's disapproval of popular government and of the raising of tobacco, as well as because of his desire to please the Spanish, who had protested against the founding of the colony. Virginia became a royal colony, with a governor and council appointed by the crown.

(3) *New England*

(a) Massachusetts

1606. Granting of the charter to the **Plymouth Company.** In this very year two unsuccessful attempts were made to found colonies In 1607 settlers were landed at the mouth of the **Kennebec River,** but the enterprise was abandoned the next spring.

1614. **Captain John Smith,** of the Virginia settlement, explored the coast of New England and mapped it He was made *Admiral of New England* by the Plymouth Company (1615) and made an abortive effort to start a colony. Several fishing and trading voyages were made to the New England coast between 1615 and 1620 under the direction of **Sir Ferdinando Gorges,** a member of the Plymouth Company

1620, Nov. 13. **The Council for New England.** The Plymouth Company having failed to found a colony, Gorges and others secured the incorporation of the council, which was given jurisdiction between 40 and 48° N L

1620, Nov. **ARRIVAL OF THE PILGRIMS** at Cape Cod. The Pilgrims were a group of separatists who had migrated from Scrooby to Amsterdam and thence to Leyden in Holland In 1617 they decided to seek a new home in order to preserve their English identity. They obtained a patent from the London Company and **John Carver** was made their

governor They left England in the *Mayflower* and reached Cape Cod, which they found to be outside the jurisdiction of the London Company They therefore drew up the **Mayflower Compact,** by which they formed themselves into a body politic and agreed to enact laws for the welfare of the colony The basis of government, then, was the will of the colonists rather than that of the crown **Plymouth** was selected as the site of the settlement

1621. **William Bradford** became governor on the death of Carver

1623. **Settlements at Portsmouth and Dover** (New Hampshire) and at **Casco Bay** and **Saco Bay** (Maine) were made under the auspices of the Council for New England. A group of Dorchester merchants settled on Cape Ann (1624).

1628, Sept. **John Endicott** and some 50 colonists arrived at Salem, acting under a patent obtained by Rev. **John White** of Dorchester from the Council for New England This patent ran for lands between the parallel three miles north of the source of the Merrimac River and that three miles south of the Charles River.

1629, Mar. **ROYAL CHARTER** issued confirming the grant to Endicott and his associates, which members of the Gorges family had protested. The new corporation was known as the **Governor and Company of Massachusetts Bay** in New England

June 27. Five ships, with some 400 settlers, arrived at Salem. **John Winthrop** and other prominent men meeting at Cambridge (England) agreed to emigrate to Massachusetts Bay, provided the charter and government might be legally transferred to America The company decided to make the transfer and Winthrop was named governor.

1630. Seventeen ships brought about 1000 persons to the colony By the end of the year settlements had been made at Dorchester, Boston, Watertown, Roxbury, Mystic and Lynn The first **general court** of the colony was held at Boston (Oct 19) From then on no person was to be admitted as a freeman of the corporation unless a member of some church within the colony In 1634 a representative system was introduced into the general court, because the growth of the colony prevented attendance of all freemen

1630-1642. **The Great Migration** to Massachusetts Bay Colony During these years some 16,000 settlers arrived from England

1635. The coast of New England was reapportioned **Gorges** received the land in Maine between the Penobscot and Piscataqua Rivers; **Mason** received New Hampshire and northern Massachusetts as far as Cape Ann, **Edward Gorges** from Cape Ann to Narragansett Bay. In this same year the Council for New England gave up its charter and the king demanded also the charter of the Massachusetts Bay Colony, because of Archbishop Laud's dislike of the Puritan Commonwealth. The king was unsuccessful

1636. The general court voted £400 toward the founding of a college In 1638 **John Harvard** bequeathed to the college £780 and 260 books The institution was named **Harvard College** in 1639

(b) Connecticut and Rhode Island

1631. **The Earl of Warwick,** to whom the Council for New England had granted much of the Connecticut River Valley, transferred his rights to **Lord Saye and Sele.**

1633. **The Dutch,** who had explored the coast, erected a fort on the river near the present **Hartford.**

1635. Lord Saye, with his associates, sent out settlers under John Winthrop, Jr , who established **Fort Saybrook,** at the mouth of the river. In the same year settlers from Dorchester (Massachusetts), seeking better land, established themselves at Windsor In 1636 Rev **Thomas Hooker** led Cambridge settlers to Hartford, while other colonists from Watertown settled at **Wethersfield.**

1638. Rev **John Davenport** and **Theophilus Eaton** founded a theocratic colony at **New Haven.**

1639 Hartford, Windsor, and Wethersfield drew up **Fundamental Orders,** which provided that the governor and assistants, with four representatives from each town, should constitute the general court These three settlements were commonly referred to as **Connecticut.**

Meanwhile **Roger Williams** had arrived at Boston, from England (1631) After spending some time at Salem, he repaired to Plymouth, where he concluded that the land rightfully belonged to the Indians and that the king had no right to grant it. He returned to Salem, where he argued that the church and the state should be separated He denied the right of the magistrate to control the churches, and objected to enforced oaths, since they obliged wicked men to perform a religious act, thereby destroying the freedom of the soul. In Oct 1635, he was banished from Salem

1636, June. **ROGER WILLIAMS SETTLED AT PROVIDENCE,** where he organized a government democratic in

character, with separation of church and state

1638. Mrs. **Anne Hutchinson,** the center of a controversy which shook Massachusetts Bay Colony to its foundations, was banished and took refuge on the island of Aquidneck, later called **Rhode Island,** where she and a small group of associates founded the settlement of **Portsmouth.** The following year another settlement was made at **Newport.**

(4) *Maryland*

George Calvert (later Lord Baltimore) had bought the southeastern peninsula of Newfoundland from **Sir William Vaughan** (1620) and had secured a charter (1623) for a colony, which he called **Avalon.** He visited Newfoundland in 1627 and resolved to abandon the colony because of the unfavorable climate He then asked for a grant in Virginia, which was made in 1632, despite opposition from the Virginians.

1632, Apr. The charter of the new colony was drawn up in the name of Cecilius Calvert, George Calvert having died. The province was named **Maryland,** and Calvert, as proprietor, was given the right to collect taxes, make grants of land, create manors, appoint ministers and found churches according to the laws of England. As the charter did not forbid the establishment of other churches than the Protestant, Baltimore (Calvert) made use of it to help his co-religionists, the Catholics

1633, Oct. Baltimore dispatched to Maryland two vessels with some 20 gentlemen, mostly Catholics, and about 200 laborers, chiefly Protestants Arriving at the mouth of the Potomac (1634, Mar.), they founded the settlement of **St. Mary's.**

(5) *Island Settlements*

1609. A Virginia supply ship, under command of **Sir George Somers,** was wrecked on one of the Bermuda Islands On his return to England Somers interested a number of persons, mostly members of the Virginia Company, in the islands, with the result that the **Somers Islands Company** was formed (1612) for the colonization of Bermuda The island had 600 settlers in 1614 and between 2000 and 3000 in 1625. It became an important producer of tobacco.

1625. **St. Christopher** was settled, and **Sir William Courten** established the first colony on Barbados. Nevis was occupied by the British in 1628, and settlements were made on Antigua and Montserrat in 1632. By 1640 the island possessions of England had a population of 20,000, devoted chiefly to the cultivation of sugar, which soon supplanted tobacco as the leading crop.

c. DUTCH AND SWEDISH SETTLEMENTS

1602. **The United East India Company** was chartered by the States-General of Holland

1609. The company employed **Henry Hudson,** an Englishman, to search for the northwest passage He sighted land at Newfoundland, explored the New England coast, rounded Cape Cod, proceeded south to Virginia, probably entered Chesapeake Bay, entered Delaware Bay, and explored the **Hudson River** to Albany Friendly relations with Iroquois Indians

1612. Dutch merchants sent **Christianson and Block** to Manhattan Island to engage in fur trade A post was established in 1613.

1614. **Fort Nassau,** later Fort Orange, built near present Albany Exploration by Adrian Block of Long Island Sound, Connecticut coast, Narragansett Bay and Cape Cod As a result the **New Netherland Company** was formed and given monopoly of trade between the 40th and 45th parallels Fur trade carried on and the coast explored.

1621. **The Dutch West India Company** was chartered and given a monopoly of trade in Africa and America

1626. **Peter Minuit** became director-general of the company. He purchased **Manhattan Island** from the Indians for 24 dollars and founded the settlement of **New Amsterdam.** The company also made settlements in Connecticut, New Jersey, Delaware, and Pennsylvania Men, known as *patroons,* were given large areas of land on condition that they bring over a stipulated number of settlers. The Dutch, under Governor Kieft of New Netherland, protested in vain against the founding of New Haven.

Meanwhile the attention of Gustavus Adolphus of Sweden was called to the Delaware country by **William Usselincx,** who had withdrawn from the Dutch West India Company. Usselincx received a charter for the **South Company** which came to naught. In 1633 the **New South Company** was organized, but it, too, failed to

achieve anything In 1637 the **New Sweden Company** was organized, chiefly as a result of the encouragement of two Dutchmen, Samuel Blommaert and Peter Minuit.

1638. Two Swedish vessels arrived on the Delaware and **Fort Christina** was established This intrusion of the Swedes angered **Peter Stuyvesant** of New Netherland, who urged the West India Company to occupy New Sweden, which was done in 1655.

2. COLONIAL HISTORY

a. NEW ENGLAND

1641. **The Body of Liberties,** a code of 100 laws, was established by the General Court of the Massachusetts Bay Colony

1643, May 19. **The New England Confederation** was formed by Connecticut (Hartford, Windsor, and Wethersfield), New Haven, Plymouth, and Massachusetts Bay for purposes of defense.

1644. Union of Providence and the Rhode Island towns (Newport and Portsmouth) under a charter obtained by Roger Williams. Union of Saybrook and Connecticut under the latter name.

1646. In Massachusetts, **John Eliot** began his missionary work among the Indians (Translated the Bible into Massachusetts dialect, 1661–1663)

1649. Incorporation in England of the **Society for Propagating the Gospel in New England.**

1653. Settlements in southern Maine accepted the jurisdiction of Massachusetts

1662. **Charter of Connecticut** granted by the king Assembly composed of the governor, deputy-governor, 12 assistants, and two deputies from each town

1663. **Charter of Rhode Island and Providence Plantations.** This was retained throughout the colonial period and was the constitution of the state until 1842.

1664. Union of Connecticut and New Haven, because of the latter's fear of annexation to New York

1665. **Maine** was restored to the heirs of Sir Ferdinando Gorges.

Royal commissioners, after an unsuccessful attempt to hear complaints in New England, left the provinces.

1668. Massachusetts reassumed the government of Maine.

1675-1676. **KING PHILIP'S WAR** in New England Although primarily due to the advance of the frontier of settlement upon the Indian hunting grounds, there were numerous minor infractions of the law Christianizing of Cape Cod Indians by John Eliot aroused the suspicions of the Wampanoags, who saw in it an attempt to weaken their power **Philip,** son of **Massasoit,** chief of the Wampanoags, formed a league comprising most of the Indians from Maine to Connecticut Border attacks were followed by the white attack upon the stronghold of the Narragansetts near Kingston, Rhode Island, in Dec 1675, with heavy losses to the Indians Deerfield was attacked by Indians and most of the houses were burned During the war 500 white men were captured or killed and nearly 40 towns damaged, 20 being destroyed or abandoned. Chief Canonchet of the Narragansetts was shot (Apr. 1676) and the war came to a close with the death of Philip (Aug. 1676)

1677. The dispute between Massachusetts and the heirs of Sir Ferdinando Gorges regarding Maine having been decided in favor of the latter by the English courts, Massachusetts bought all of the province except that granted to the Duke of York.

1680. **New Hampshire** was separated from Massachusetts by royal charter.

1684. **ANNULMENT OF THE MASSACHUSETTS CHARTER.** The independent course of Massachusetts had long irritated the crown. The heirs of Mason and Gorges charged that Massachusetts had usurped their rights London merchants claimed the colony evaded the navigation acts by sending tobacco and sugar directly to Europe Lack of respect for the king's authority and the exercise of powers not warranted by the charter were also charged In 1679 **Edward Randolph** arrived in Boston as collector of the customs, bearing instructions for the colony to relinquish jurisdiction over New Hampshire and Maine, the latter of which was disregarded Friction continued, as did Randolph's complaints against the colony,

until legal action in 1684 resulted in the annulment of the charter.

1686. DOMINION OF NEW ENGLAND formed through consolidation of the New England colonies. Sir **Edmund Andros** was made governor. *Quo warranto* proceedings were instituted against Connecticut and Carolina Andros arrived in Boston (Dec 20) and assumed the government of Plymouth and Rhode Island In 1687 he assumed the government of Connecticut and demanded the charter which Captain William Wadsworth concealed in a hollow tree, the famous *Charter Oak*

1689. Upon news of the flight of James II from England, the people of Boston rose in revolt, imprisoned Andros and restored charter government. Similar action was taken in Rhode Island and Connecticut

1692. New charter for Massachusetts, which included Plymouth, Maine, Nova Scotia, and all land north to the St. Lawrence A governor, to be appointed by the crown, was vested with the power of calling and dissolving the general court, appointing military and judicial officers, and vetoing acts of legislature. The electoral franchise was extended and religious liberty secured to all except Catholics **Sir William Phips** was made governor

1692. Salem witchcraft trials.

1701. Founding of Yale College, New Haven, Connecticut

1728. William Burnet, governor of Massachusetts, became involved in a quarrel with the legislature over the question of a fixed salary for the governor, which the court refused to grant "because it is the undoubted right of all Englishmen, by Magna Carta, to raise and dispose of money for the public service, of their own accord, without compulsion"

b. NEW YORK, NEW JERSEY, PENNSYLVANIA

1664. Grant of New Netherland, from the Connecticut to the Delaware, to the King's brother, **James, Duke of York.** The grant included the eastern part of Maine and islands south and west of Cape Cod The region between the Hudson and the Delaware was granted by the Duke of York to **Lord Berkeley** and **Sir George Carteret.**

1664, Aug. 27. SURRENDER OF NEW AMSTERDAM to the English. Name of the colony changed to **New York.** On Sept. 24 surrender of Fort Orange, whose name was changed to **Albany.**

1673. In the war between England and Holland, the **Dutch captured New York** and established temporary control over Albany and New Jersey. They were restored when peace was made in 1674

1676. Line of demarcation between East and West New Jersey **Settlement of Quakers** in West New Jersey (1677–1681)

1681, Mar. 4. CHARTER OF PENNSYLVANIA signed, granting to **William Penn** the region between 40° and 43°, extending 5° west from the Delaware River. These limits brought the colony into conflict with New York on the north and Maryland on the south. The dispute with Maryland was finally adjusted when in 1767 two surveyors, **Mason and Dixon,** ran the present boundary between the two states. The form of government of the colony was to be determined by the proprietor The first body of colonists arrived in 1681 and a frame of government was provided for the government of the colony

1682-1683. Penn arrived in the colony and **Philadelphia** was laid out (1682) Penn entered into a treaty with the Indians (1683) which had the effect of keeping the colony free from Indian wars.

1683. In response to persistent demands of the people, the Duke of York conceded a legislative assembly to New York. In October, 17 representatives drew up a **Charter of Franchises and Liberties,** which the duke signed, only to reject when he became king

1688. The Lords of Trade determined to bring New York and New Jersey under the government of Andros. In 1689, New York proclaimed William and Mary

1702. New Jersey reunited as a royal province

1715-1750. SETTLEMENT OF THE PIEDMONT, partly by newcomers and old settlers, who crossed the fall line into the areas, partly by Germans, Swiss, and Scotch-Irish entering at the port of Philadelphia and pushing southward through the valleys, especially the Shenandoah **German immigration,** which began with the founding of Germantown, Pennsylvania (1683), increased greatly in volume after 1710 Occupation of the Piedmont resulted in the formation of a restless, aggressive frontier society which became increasingly important.

1720-1726. William Burnet, governor of New York, began efforts to counteract French attempts to hem in the

English colonies in the west He prohibited trade between the Iroquois and the French In 1722, he established a trading post at **Oswego** and carried on negotiations at Albany with the Six Nations A treaty with the Senecas, Cayugas, and Onondagas (1726) added their lands to those of the Mohawks and Oneidas, which were already under English protection.

1735. Trial in New York of **John Peter Zenger,** printer of a paper, for libel The court contended that it should decide the libelous nature of the statements made, and that the jury should determine the fact of publication. Zenger's lawyer, Andrew Hamilton, argued that the jury must decide whether or not the publication was libelous He won his suit, thereby materially safeguarding the freedom of the press

c. VIRGINIA, DELAWARE, AND MARYLAND

1652. Parliament assumed control of Maryland and suspended the governor

1659. Virginia proclaimed Charles II King of England, Scotland, and Ireland, and restored the royal governor, **Sir William Berkeley.**

1662. Lord Baltimore was confirmed in the government of Maryland

1676. Bacon's Rebellion in Virginia Led by Nathaniel Bacon, this revolt was largely the result of the indifference of Governor Berkeley to the problem of frontier defense against the Indians Jamestown was burned, but the rebellion collapsed with the death of Bacon

1689. Virginia and Maryland proclaimed William and Mary.

1692. College of William and Mary chartered in Virginia

1716. Governor Spottswood of Virginia led an expedition to the Blue Ridge, and into the Shenandoah Valley He recommended the securing of the mountain passes and the establishment of settlements on Lake Erie.

d. THE SOUTHERN COLONIES

1663. Grant of Carolina by the king to eight proprietors, including the Earl of Clarendon. The grant included land between 31° and 36° N L. After Raleigh's unsuccessful effort, the region between Virginia and the Spanish settlements in Florida had received little attention until the grant of the region to Sir Robert Heath (1629), which also came to naught.

1667 Grant of the Bahamas to the Carolina proprietors.

1669 Adoption of the Fundamental Constitutions, drawn up for Carolina by John Locke, which provided for an archaic feudal régime totally unsuited to the needs of a frontier colony

1711. Tuscarora War in North Carolina The Tuscaroras massacred some 200 settlers Virginia and South Carolina sent aid and the Indians were defeated (1712). Remnants of the Tuscaroras moved to New York and were incorporated in the Iroquois as a sixth nation

1715. Defeat of the Yamassees and allied Indian tribes in Carolina. They were driven across the Spanish border into Florida

1719-1729. REORGANIZATION OF THE CAROLINAS. Economic differences between the northern and southern portions of Carolina had resulted in governmental differentiation. The governor was located at Charleston with a deputy governor in the north. In 1713 the proprietors appointed **Charles Eden** governor of North Carolina and from this time the provinces were virtually separate Popular discontent with the proprietors because of their indifference to defense against Indians and pirates The situation was aggravated by refusal of the proprietors to allow the distribution of the Yamassee lands Meanwhile the proprietors had incurred the ill-will of the British government Their incompetence in the Yamassee War was the last straw which convinced the Board of Trade that a change was necessary. It upheld the people against the proprietors and in 1729 an act of Parliament established royal governments in both North and South Carolina

1733. FOUNDING OF GEORGIA, the last of the 13 English colonies on the continent. In the triangle between the Carolinas, Florida, and Louisiana, English, French, and Spanish claims conflicted The international boundaries had never been defined In 1716 the Carolinians had established a fort on the Savannah River and from 1721 to 1727 had maintained **Fort George** on the Altamaha In 1730 **Sir Alexander Cuming** was sent on a mission to the Cherokees which resulted in their acknowledgment of English supremacy. The need of a buffer colony on the southern boundary had long been realized by the British In 1717 **Sir Robert Montgomery** had secured from the Carolina

proprietors a grant of the land between the Savannah and the Altamaha Rivers, known as the **Margravate of Azilia.** Plans for its settlement proving unsuccessful, **James Oglethorpe** became interested in the settlement of the region An advocate of a strong policy against the Spanish and a humanitarian interested in improving the condition of imprisoned debtors, he conceived the idea of a barrier colony In 1732 he secured a charter, granting to him and his associates the region between the Savannah and the Altamaha from sea to sea. Proprietary government was to prevail for 21 years, when the colony was to become a royal province. Religious liberty was guaranteed to all except Catholics Colonists left England in the autumn of 1732, arriving at Charleston in Jan. 1733. The town of **Savannah** was immediately laid out; and in 1737 a fort was established at **Augusta.**

3. WARS OF ENGLAND WITH FRANCE AND SPAIN

1651-1673 **The British Navigation Laws.** These applied mercantilist doctrine to colonial trade The **Act of 1651,** designed to strike a blow at Dutch shipping, required that colonial products be shipped to England in ships of Great Britain or the Plantations This law was re-enacted in 1660, with the additional provision that certain enumerated articles of colonial production could be shipped only to England The **Staple Act of 1663** required that articles of European production, destined for the colonies, must be shipped first to England The **Act of 1673** imposed intercolonial duties on sugar, tobacco, and other products

1667. **Treaty of Breda** between England and France Antigua, Montserrat, and the French port of St. Christopher surrendered to England.

1670. **The Hudson's Bay Company** incorporated and given a monopoly of the trade in Hudson's Bay Basin

1689-1697. **KING WILLIAM'S WAR,** with France. This was the American phase of the general war against Louis XIV known as the **War of the League of Augsburg** (see p 443) The French were aided by the Indians of Canada and Maine, while the Iroquis supported the English In 1690 the French and Indians massacred colonists at Schenectady, Salmon Falls, and Casco Bay An English force under **Sir William Phips** captured Port Royal (1690, May 11), but a Massachusetts expedition against Quebec, led by Phips, resulted in failure The **Treaty of Ryswick** restored all conquests (1697)

1696-1698. Renewed efforts of the English government to control colonial trade. **A Board of Commissioners for Trade and Plantations** was organized (1696) and a navigation act of the same year was designed to prevent further evasion of earlier regulations Since the war with France had interrupted the usual trade, the New Englanders had taken up manufacturing The **Woolens Act** (1698) forbade the colonists to ship wool or woolen products from one colony to another

1702-1713 **QUEEN ANNE'S WAR,** the American phase of the **War of the Spanish Succession** (see p 445) In 1702 the English plundered and burned St Augustine in Florida, while in 1704 the French and Indians surprised Deerfield in the Connecticut Valley Their attacks soon spread over much of the frontier and even to the outskirts of Boston In 1707 the English organized an expedition against **Acadia.** Troops from New England laid siege to Port Royal, but failed to reduce it The French province was, however, conquered in 1710, when 4000 colonists under **Francis Nicholson,** aided by British ships and a regiment of marines, attacked and captured Port Royal. Acadia then became the British province of **Nova Scotia** and the name of Port Royal was changed to **Annapolis Royal.** For the year 1711 a joint land and sea campaign against Canada was planned Nicholson's colonials and Iroquois were to attack Montreal, while an expedition was to be led against Quebec by Admiral Sir Hovenden Walker and General Sir John Hill Seven of Marlborough's best regiments were included The force gathered at Boston, where it was reinforced by 1500 colonials In August the fleet entered the St Lawrence, but the destruction of ten ships compelled the abandonment of the attack News of this reached Nicholson and induced him to give up the campaign against Montreal By the **Treaty of Utrecht** (1713) England secured recognition of her claims in the Hudson's Bay country and the possession of Newfoundland and Acadia. The claim of the English to the Iroquois country was also admitted, and St. Christopher was ceded to England.

The French were excluded from fishing on the Acadian coast, but were allowed to retain Cape Breton Island The **asiento** gave the English the exclusive right for 30 years of bringing Negroes into the Spanish possessions

1733. The Molasses Act The increased production of sugar in the French and Dutch West Indies after 1715, the disposition of the English colonists on the mainland (especially the New Englanders) to take advantage of the low prices of sugar, molasses, and rum in the foreign islands, and their desire to avail themselves of the market afforded for their own products in the islands, contributed to bring about a severe depression among the sugar planters of the English island possessions In response to pleas from the West Indian planters, Parliament enacted the Molasses Act, which placed prohibitive duties on sugar and molasses imported into the colonies from other than British possessions. In 1732 Parliament had stopped the importation of hats from the colonies and had restricted their manufacture This was in accord with the mercantilist policy of encouraging the production of raw materials (including furs) and of discouraging manufactures that would conflict with those of the mother country.

1739. WAR BETWEEN SPAIN AND ENGLAND (War of Jenkins' Ear, see p. 434). Dissatisfied with the provisions of the Treaty of Utrecht with respect to trade with Spanish possessions, English merchants had resorted to extensive smuggling, which, in turn, had led to the seizure of British ships and the rough treatment of British sailors by the Spanish The loss of Jenkins' ear was merely one of many similar episodes In the course of the ensuing war the British captured Puerto Bello and demolished its fortifications (1739) In 1740 they bombarded Cartagena and captured Chagres, while Oglethorpe led an expedition of Georgia, Carolina, and Virginia troops into Florida and made an unsuccessful attack on St Augustine The British were likewise unsuccessful in an attack on Santiago (Cuba) in 1741 In the next year they planned, but then abandoned an attack on Panama The Spanish attacked Georgia (1742), but soon withdrew again to Florida In 1743 Oglethorpe once more invaded Florida, but failed to take St Augustine.

1743-1748. KING GEORGE'S WAR, the American phase of the **War of the Austrian Succession** in Europe (see p. 465). The outstanding event in the war in America was the **capture of Louisburg** (1745) The French had made the fortress one of the strongest in the New World After an invasion of Nova Scotia by the French, Governor Shirley of Massachusetts assembled volunteers from Massachusetts, New Hampshire and Connecticut and placed them under the command of **William Pepperel.** Transports were supplied by the colonies, while warships were provided by the British navy. The expedition appeared before Louisburg on April 30 and the fortress capitulated after a siege (June 16). An attempt of the French to recover Cape Breton and Nova Scotia was made in 1746, but was doomed to failure when a storm destroyed the fleet off the coast In the interior an abortive attempt of the northern colonies to conquer Canada spurred the French and Indians to attack the frontier as far south as New York (1746–1748) The New York and Pennsylvania frontiers were protected by **William Johnson,** an Indian guide, who kept the Mohawks friendly, and by **Conrad Weiser,** whose support of the Iroquois land claims as against the Delawares kept the Six Nations on the English side. At sea the British twice defeated the French in the West Indies (1745, 1747) and in 1748 the British admiral, Knowles, captured Port Louis on the southern coast of Haiti, bombarded Santiago, and attacked the Spanish fleet off Havana

1748. The Treaty of Aix-la-Chapelle, based upon European rather than colonial considerations, restored all the conquests of the war In America the treaty was merely a truce, for Nova Scotia, the Ohio Valley, and the Cherokee country continued to be areas of conflict. In order to strengthen the British hold on Nova Scotia, Lord Halifax sent out 2500 settlers in 1749 and founded the town of **Halifax.** In the Ohio Valley traders from Virginia and Pennsylvania pushed westward as far as the Indian villages on the Mississippi Virginia frontiersmen made a settlement at **Draper's Meadow** on the Greenbrier River in 1748

1749. The Ohio Company, organized by a group of Virginians and a number of prominent Englishmen The company obtained a grant of 500,000 acres on the upper Ohio and sent out **Christopher Gist** (1750) to explore the region as far as the falls of the Ohio. His favorable report led to the erection of a trading house at **Wills' Creek,** the present Cumberland (Maryland), and to the blazing of a trail to the junction of Redstone Creek and the Monongahela River. This activity roused the French to action In an effort to detach the Iroquois from the English they founded the mission at present-day **Ogdensburg**

(1748) To divert trade from Oswego, they established **Fort Rouillé** on the site of present-day **Toronto** (1749) Another post was located at **Niagara** portage, **Detroit** was strengthened, and in 1749 the governor of Canada sent **Céloron de Bienville** to take possession of the Ohio Valley

1753. **Marquis Duquesne** sent an expedition of 1500 men to occupy the Ohio country **Fort Presqu' Isle** was erected and a road was cut to French Creek, where **Fort Le Boeuf** was built. It was planned to establish another fort at the forks of the Ohio In the same year Governor Dinwiddie of Virginia sent out **George Washington,** a young surveyor, to demand the withdrawal of the French He proceeded to Fort Le Boeuf, but was told that Dinwiddie's letter would be forwarded to Duquesne It was quite clear that the French would not leave the valley peacefully.

1754 Virginia troops dispatched to the Ohio, with Washington second in command. The French had, in the meanwhile, built **Fort Duquesne** at the forks of the Ohio. Washington pushed on to Great Meadows where he constructed **Fort Necessity.** He was attacked by the French and forced to surrender

1754, June 19. The Albany Convention. The advance of the French had shown the need for a common plan of defense. Representatives of New York, Pennsylvania, Maryland, and the New England states met with the Six Nations Upon the suggestion of **Benjamin Franklin,** the convention drew up a plan of union which was, however, rejected by the colonies. The plan called for union under a president appointed by the crown, with a grand council of delegates elected by the colonial assemblies, this body to have legislative power subject to approval by the president and the crown

1755-1763. THE FRENCH AND INDIAN WAR, the American phase of the **Seven Years' War** in Europe (see p 466) In 1755 the governors of Virginia, North Carolina, Pennsylvania, Maryland, New York, and Massachusetts met in conference at Alexandria (Virginia) with **General Braddock,** the English commander, recently arrived They planned a fourfold attack on the French upon Fort Duquesne, Niagara, Crown Point, and Fort Beauséjour **Braddock** led the expedition into the Ohio country, but was surrounded and defeated near **Fort Duquesne** (July 9). In the Crown Point campaign the French were defeated in the **battle of Lake George** (Sept. 8), but the English made no attempt to capture Crown Point itself. They built **Fort William Henry** at the southern end of Lake George, while the French fortified **Ticonderoga.** In 1756 war was formally declared between France and England **Earl Loudoun** was named commander-in-chief of the British forces in America The French were commanded by **General Montcalm,** who took and destroyed Forts Oswego and George (Aug) and in 1757 took Fort William Henry (Aug 9) The garrison, whose retreat to Fort Edward had been guaranteed by Montcalm, was massacred by his Indian allies

The resistance of the English was weakened by the friction between Lord Loudoun and the Massachusetts general court over quartering of troops, and between the governor and assembly of Virginia over various matters of taxation In 1758 (July 8) General Abercromby was defeated before Ticonderoga, but Amherst and Wolfe took Louisburg (July 26), Bradstreet took Fort Frontenac (Aug 27) and Forbes took Fort Duquesne (Nov 25).

For the year 1759 the English planned four campaigns against Niagara, against settlements on Lake Erie, against Ticonderoga and Crown Point, and against Quebec **The battle of the Plains of Abraham** (Quebec) was fought on Sept 13, both Wolfe and Montcalm losing their lives. Quebec surrendered to the English on Sept. 18 On Sept 8, 1760 Montreal surrendered and all Canada passed into the hands of the British In 1762 **Rodney** forced the surrender of Martinique, Grenada, St. Lucia, St Vincent and the other French West Indies

1763, Feb. 10. THE TREATY OF PARIS, between Great Britain, France, Spain, and Portugal. France ceded to England all claim to Acadia, Canada, Cape Breton, and all that part of Louisiana situated east of the Mississippi except the Island of Orleans France retained certain fishing rights on the Newfoundland banks and was given the islands of St. Pierre and Miquelon England restored to France the islands of Guadeloupe, Martinique, Belle Isle, Maria Galante, and St Lucia. England restored to Spain, Havana, in return for which Spain ceded Florida to England France, by a previous treaty (1762, Nov. 3) had ceded to Spain all French territory west of the Mississippi and the Island of Orleans, as compensation for the loss of Florida to England.

1763. The Conspiracy of Pontiac. This was an aftermath to the war. Indian tribes north of the Ohio, fearing eviction by the British, embittered by the arrogance and dishonesty of British traders, and disappointed by the economy of General

Amherst in the matter of presents, were ready to revolt against British occupation of the posts recently held by the French Pontiac, chief of the Ottawas, organized a rising of the Algonquins and of some of the Iroquois and of tribes on the lower Mississippi In a simultaneous attack all but three of the northwestern posts fell in May By 1765, however, the British forces were in possession of the last of the French posts in the west

1763, Oct. 7. Proclamation of 1763, issued by George III. It created four distinct provinces from the recent conquests Quebec, East Florida, West Florida, and Grenada It also closed, temporarily, to white settlement all lands west and north of the streams flowing into the Atlantic Ocean Fur trade in this Indian reserve was opened to licensed subjects In 1764 **Lord Hillsborough** drew up a plan for the management of the Indians and the fur trade It continued the northern and southern departments for Indian affairs (created in 1755) and provided that in the north all trade must be conducted at regularly established posts and in the south at the Indian towns

1763-1775. Expansion beyond the mountains. Numerous colonies had been planned by land companies before 1763. With these the Proclamation of 1763 interfered In 1768, however, a plan for the gradual and controlled establishment of colonies in the west was worked out In that year treaties with the Creeks, Cherokees, and Iroquois extinguished Indian rights to large areas A group of Pennsylvanians, including Franklin, organized the **Vandalia Company** for the establishment of a colony in what is now West Virginia. Purchase of land was made in 1769 and by 1775 the proposed colony of Vandalia had been approved by the king and council The outbreak of the Revolution rendered the plan abortive.

The **Watauga settlement** in eastern Tennessee was made in 1769 and was augmented by the arrival of Virginians and North Carolinians under **James Robertson** and **John Sevier** (1770–1771) Finding themselves beyond the pale of organized law, the settlers, proceeding on the compact theory, formed the **Watauga Association** (1772), organized as Washington County (North Carolina) in 1777

Richard Henderson, of North Carolina, together with his associates, organized the **Transylvania Company,** purchased land from the Cherokees and established the Transylvania settlement in Kentucky in 1775 **Daniel Boone** was Henderson's agent and cleared the wilderness road to Kentucky **The settlement of Kentucky** (1775–1777) was facilitated by the peace forced on the Indians as a result of **Lord Dunmore's War** (1774).

4. THE AMERICAN REVOLUTION

1763-1775. The Preliminaries of the American Revolution. By 1761 the British government was thoroughly aroused by the systematic evasion of the **Molasses Act** of 1733 through colonial smuggling, and by the illicit trade which the colonies had carried on with the enemy during the War of the Austrian Succession and the Seven Years' War British officials felt that the trade prolonged French resistance. To prevent smuggling, the British resorted to **writs of assistance,** general search warrants, which made possible the search of all premises where smuggled goods might be found This aroused the opposition of merchants who alleged the writs were illegal. In 1761, when Boston customs officers applied for the writs, the merchants contested their use **James Otis** argued cogently against their legality before the Massachusetts Supreme Court. Although the court decided they were legal, the argument of Otis did much to shape public opinion.

1763. The Parsons' Cause, argued in Virginia by **Patrick Henry,** still further aroused and molded public opinion against British policy, in this instance the disallowance of a Virginia statute

1763-1765. George Grenville in power in England The acquisition of the vast territory from France in America necessitated increased revenues for defense and Indian administration The ministry decided to enforce the navigation laws, tax the colonies directly and use the revenue to maintain an army in America. Powers of the admiralty courts were enlarged, and colonial governors were instructed to enforce the trade laws.

1764. Enactment of the **Sugar Act,** with the avowed purpose of raising revenue in the colonies and reforming the old colonial system, both economically and administratively.

The **Colonial Currency Act** prevented colonies from paying their debts in England

in depreciated currency and forbade issues of unsound money. This act created a shortage of money in the colonies at a time when the Sugar Act injured the West Indian trade of the colonies, which had previously supplied the necessary specie.

1765. Disregarding colonial protests against the two previous acts, Grenville pushed through Parliament the **Stamp Act** providing for stamps on commercial and legal documents, pamphlets, newspapers, almanacs, playing cards, and dice

The Quartering Act was passed, providing that, in the event of insufficiency of barracks in the colonies, British troops might be quartered in public hostelries

May 29 **Patrick Henry** introduced into the Virginia House of Burgesses a series of resolutions boldly challenging the position of the British government

June. The Massachusetts General Court sent an invitation to colonial assemblies to send delegates to meet in New York and consider the Stamp Act Meanwhile the arrival of the stamp officers led to riots in various cities, including Boston, where the house of Lieut.-Gov Hutchinson was sacked

Oct. 7. **Stamp Act Congress** at New York Twenty-eight delegates from nine colonies drew up memorials to the king and Parliament and adopted a **Declaration of rights and liberties** (Oct 19)

1766. **Mar. Repeal of the Stamp Act,** followed by the **Declaratory Act** (Mar. 18), declaring that the king, by and with consent of Parliament, had authority to make laws to bind the colonies in all respects

1767. Suspension of the New York Assembly because of its refusal fully to comply with the Quartering Act.

The **Townshend Acts** imposed duties on glass, lead, painters' colors, tea, and paper imported into the colonies. Out of these revenues fixed salaries were to be paid to royal officials in the colonies. A Boston town-meeting adopted a **non-importation agreement.**

1768. The Massachusetts General Court drew up a petition to the king, sent letters to the ministry, and dispatched a circular letter to the other colonies

June. The seizure of John Hancock's sloop *Liberty*, because of false entry, led to a riot.

Oct. British troops arrived in Boston and the town refused to provide quarters.

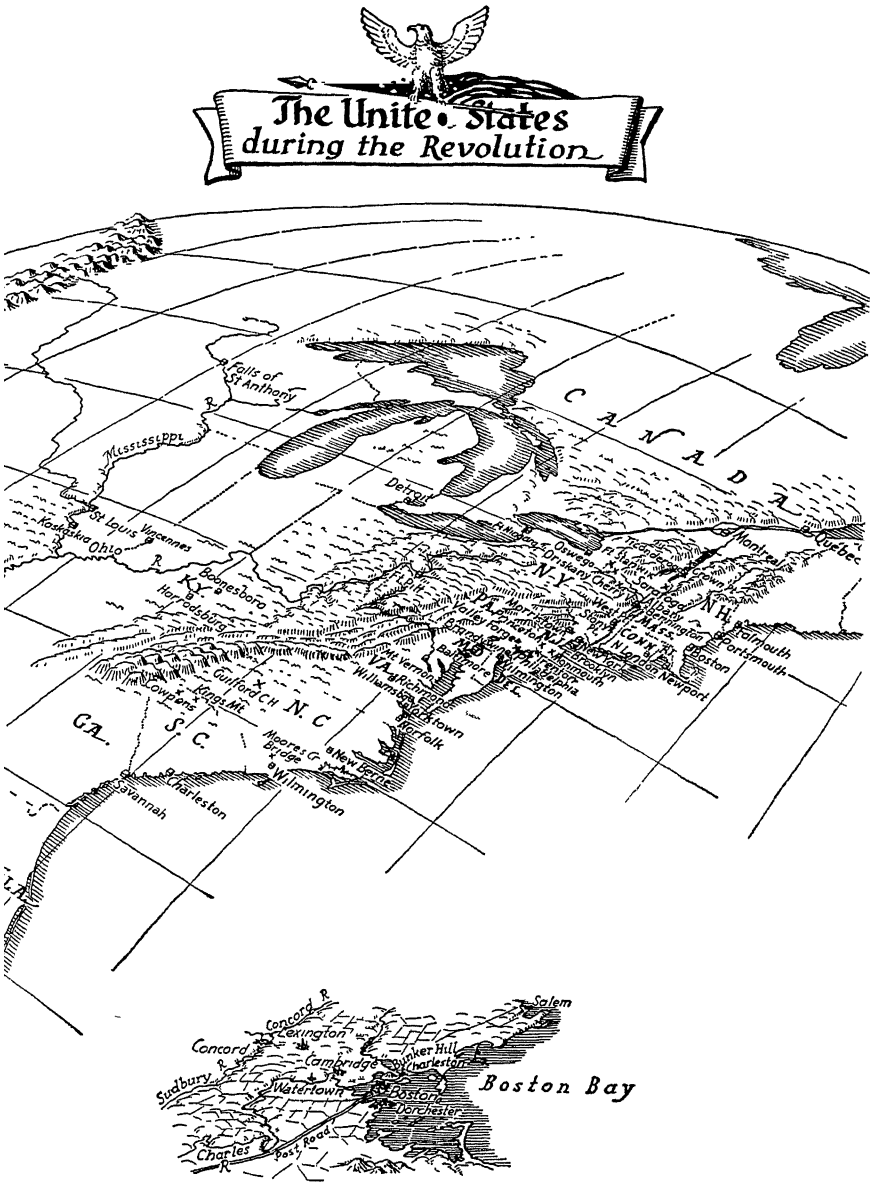
1769. Parliament advised the enforcement of a statute of Henry VIII, allowing the government to bring to England for trial those alleged to have committed treason outside the realm. Resolutions of protest adopted by the Virginia House of Burgesses.

1770. **Mar. 5.** **The Boston Massacre** Popular hatred of the British troops in the city led to a brawl in which several citizens were killed or wounded Preston, the commanding officer, was acquitted, being defended by John Adams and Josiah Quincy

An act repealing duties on paper, glass, and painters' colors, but retaining that on tea This gesture produced a conservative reaction in the colonies, in which the merchants worked for conciliation This truce was broken by the arbitrary acts of crown officials and by the announcement in

1772. That salaries of governors and judges in Massachusetts were to be paid by the crown, thus rendering them independent of the assembly's control of the purse, and by

June 10. The **Gaspée Affair,** in which a revenue boat, whose commander's conduct had enraged public opinion in Rhode Island, was burned by a mob in Narragansett Bay.



1772, Nov. 2-1773, Jan. Formation of 80 town **committees of correspondence** in Massachusetts under the leadership of **Samuel Adams.**

1773, Mar. 12. The Virginia House of Burgesses appointed a **Provincial Committee of Correspondence** to keep in touch with sister colonies By Feb 1774, all the colonies except Pennsylvania had appointed such committees

To provide relief for the East India Company the government allowed it a drawback of the tea duty in England, but the full duty was to be paid in the colonies. There was a protest to the landing of the tea in Charleston, Philadelphia, and New York, while in Boston there occurred

Dec. 16. **The Boston Tea Party** in which citizens, disguised as Indians, boarded the ships and dumped the tea into the harbor.

1774. The resistance to the landing of the tea provoked the ministry to the adoption of a punitive policy The so-called **Coercive Acts** were passed, including. The **Boston Port Act,** closing the port after June 1; the **Massachusetts Government Act,** depriving the people of most of their chartered rights, and greatly enlarging the governor's powers; the **Administration of**

Justice Act, providing that persons accused of a capital crime in aiding the government should be tried in England or a colony other than that in which the crime was committed, the **Quartering Act**, and the **Quebec Act**, extending the boundary of that province to the Ohio River, cutting athwart the claims of Massachusetts, New York, Connecticut, and Virginia Although not designed as a punitive measure the Quebec Act was so regarded by the colonies.

County conventions in Massachusetts protested against the acts (Aug–Sept) The **Suffolk Convention** resolved that they should be "rejected as the attempts of a wicked administration to enslave America" (**The Suffolk Resolves**).

May 27. The Virginia House of Burgesses adopted resolutions calling for a congress of the colonies Copies sent to other assemblies

Sept. 5. The **FIRST CONTINENTAL CONGRESS** assembled at Philadelphia All colonies except Georgia represented Members divided into radicals led by **Samuel Adams** and conservatives led by **Joseph Galloway** of Pennsylvania. The radicals obtained approval of the Suffolk Resolves and defeated Galloway's proposed plan of union, designed to effect an adjustment of difficulties **Declaration of rights and grievances** drawn up.

Oct. The delegates adopted the *Association* providing for non-importation of English goods after Dec 1 If redress had not been obtained by Sept 11, 1775, non-exportation was to go into effect

1775, Feb. 1. Chatham presented to Parliament a plan of conciliation, based on mutual concessions, but it was rejected.

Feb. 20. Lord North made an unsuccessful effort toward conciliation

1775-1783. WAR FOR INDEPENDENCE.

1775, Apr. 19 Battles of Lexington and Concord. British troops detailed to destroy stores at Concord became embroiled with provincials at Lexington Proceeding to Concord, the troops destroyed the stores, but after the fight at the bridge were forced to retreat, first to Lexington, then to Boston

May 10-12. Ticonderoga captured by **Ethan Allen** and **Crown Point** captured by **Seth Warner.**

May 10. The **Second Continental Congress** assembled at Philadelphia.

May 31. Troops before Boston were adopted as the **Continental Army** and on

June 15. George Washington (1732–1799) was appointed commander-in-chief of the forces

June 17. Battle of Bunker Hill, opposite Boston Americans driven from entrenchments, but only after inflicting great losses on the British

1775, July-Mar. 17, 1776 Siege of Boston.

1775. A letter by Congress to the people of Canada having failed to enlist their aid, a campaign against them was planned One force, under **Richard Montgomery**, proceeded by Lake Champlain to Montreal, which was taken on Nov 12. Another force, under **Benedict Arnold,** advanced by the Kennebec with a view to meeting Montgomery at **Quebec.** Montgomery was killed before Quebec (Dec 21) Arnold carried on the unsuccessful siege for the remainder of the winter

1776, Mar. 4 Occupation of **Dorchester Heights** by Washington

Mar. 17. Evacuation of Boston by the British forces

Meanwhile the unyielding attitude of the British government, the hiring of German mercenaries, the events on the Canadian frontier, and the burning of Norfolk inflamed public opinion The appearance of **Thomas Paine's** *Common Sense* crystallized that opinion in favor of independence

May 15. Congress announced that the authority of the British crown should be suppressed and power of government established under authority of the people of the colonies

May 15. The Virginia convention, called to form a new government, instructed Virginia delegates in Congress to propose independence

June 7. Resolution of **Richard Henry Lee** in Congress, "That these United Colonies are and of right ought to be free and independent States" Congress appointed a committee of five to draft a declaration of independence The committee asked **Thomas Jefferson** to prepare the document

1776, July 4. DECLARATION OF INDEPENDENCE adopted

Following the British evacuation of Boston, Washington proceeded to New York **General Howe** and **Admiral Lord Howe** prepared to attack, but the latter first proffered peace terms which were rejected

Aug. 27. Battle of Long Island, with defeat of Putnam and retreat to New York.

Sept. 15. New York occupied by the British, Washington retreated to Harlem Heights.

Oct. 11-13. Arnold defeated in two naval engagements on **Lake Champlain.**

Oct. 28. Engagement between Howe and Washington at **White Plains,** followed by retirement of Washington to a line of heights back of his previous position on Oct. 31

Nov. 16. Surrender of **Fort Washington** to the British, followed by that of **Fort Lee** on Nov 20

Nov. 28. Beginning of Washington's retreat across New Jersey into Pennsylvania.

Dec. 26. Battle of Trenton. Crossing the Delaware by night, Washington surprised and captured about 1000 Hessians at Trenton. This was followed by the defeat of the British at the

1777, Jan. 3. Battle of Princeton. The British plan of campaign for 1777 was to divide the states by the line of the Hudson Burgoyne was to proceed from Canada by way of Lake Champlain, St. Leger was to co-operate with Burgoyne from Lake Ontario, while Howe was to ascend the Hudson and join Burgoyne

Aug. 16. Battle of Bennington, in which Stark defeated Colonel Baum, sent by Burgoyne to seize stores.

Sept. 19. First battle of Bemis Heights, in which Burgoyne held the field, although suffering heavy losses

Oct. 7. Second battle of Bemis Heights, or **Saratoga.** Burgoyne was defeated and, finding himself surrounded, called a council of war at which it was decided to negotiate terms

Oct. 17. Burgoyne surrendered his entire force to Gates

Howe's campaign. Instead of advancing up the Hudson, Howe, on Aug 25, disclosed his purpose of attacking **Philadelphia.** Washington offered battle, but in the

Sept. 11. Battle of Brandywine, the Americans, under Greene, were defeated.

Sept. 27. Howe occupied Philadelphia

Oct. 4. Attempting to surprise the camp at Germantown, Washington was defeated in the **battle of Germantown.** With the capture of Fort Mifflin and Fort Mercer on Nov 16 and 20, British control of the Delaware was complete.

1777-1778. Winter suffering of Washington's army at **Valley Forge. Unsuccessful attempt of the Conway Cabal** to remove Washington from command

1777, Nov. 15. ARTICLES OF CONFEDERATION and perpetual union agreed upon in Congress These provided for a confederacy to be known as *The United States of America,* and were sent to the states for ratification

Burgoyne's defeat and surrender stirred France to action in support of the United States. To re-establish French prestige in Europe, so greatly weakened in the Seven Years' War, was the aim of **Vergennes,** the French minister of foreign affairs After supplying secret aid in money and supplies to the Americans for two years, France signed,

1778, Feb. 6. Treaties of Commerce and Alliance with the United States **Lafayette** and **De Kalb** had arrived the previous summer to offer their services **Beaumarchais,** French playwright, had drawn heavily on his personal resources to aid the Americans

Feb. 17. Lord North presented to Parliament his plan for conciliating the Americans, which included renunciation of the right of taxation Commissioners sent to the United States with a peace offer, which was rejected by Congress (June 17) With the French alliance an assured fact, only independence would now satisfy the Americans

June 18. Evacuation of Philadelphia by Sir Henry Clinton, who started to march across New Jersey, where on

June 28. Washington won the **battle of Monmouth.**

July 4. Wyoming massacre in Pennsylvania

July 8. Arrival of **Count d'Estaing's** fleet off Delaware Capes He and Washington planned a land and sea attack on the British in Newport After a storm on Aug 9, which prevented a clash between the French and British fleets, D'Estaing sailed to Boston for repairs, leaving General Sullivan unsupported, who on Aug 29 gave up the siege of Newport.

Nov. 11. Massacre of Cherry Valley in New York.

1779, Feb. George Rogers Clark, with a force of Virginians, completed the conquest of the Old Northwest, capturing Hamilton, the British commander, at **Vincennes.**

June. Spain entered the war against England, on the promise of France that she would assist Spain to recover Gibraltar and the Floridas.

Sept. 23. Naval victory of **John Paul Jones** of the *Bonhomme Richard* over the *Serapis* and the *Countess of Scarborough.*

Meanwhile the British had decided to try, with the aid of loyalists, to overrun the southern states In 1778 **Savannah** was captured and in 1780 Sir Henry Clinton laid siege to Charleston

1780, May. Charleston surrendered.

July. Rochambeau arrived at Newport with 6000 French troops.

Despite brave resistance of Thomas Sumter and Francis Marion, South Carolina was overrun by the British, and in the

Aug. 16. Battle of Camden, Gates was defeated by Cornwallis

Aug. 18. Sumter's force was defeated by Tarleton, and Marion retreated to North Carolina.

Sept. 23. A plot of **Benedict Arnold** to surrender West Point to Sir Henry Clinton was revealed through capture of the British agent, **Major André.** Arnold escaped, but on

Oct. 2. André was hanged as a spy

Oct. 7. Battle of King's Mountain, in North Carolina, in which the British, under Major Ferguson, were defeated

1781, Jan. 17. Battle of the Cowpens, in which the British cavalry under Tarleton was defeated by Morgan

Mar. 15. Battle of Guilford, British victory.

Sept. 8. Battle of Eutaw; defeat of Greene, followed by retreat of British to Charleston.

Meanwhile British forces under Cornwallis were concentrating in Virginia, where they fortified themselves at **Yorktown.** While Cornwallis remained inactive, Washington, Lafayette, and Rochambeau closed in on him at Williamsburg, and De Grasse, with the French fleet, entered Chesapeake Bay.

Sept. 30-Oct. 19. Siege of Yorktown. Finding himself bottled up,

Oct. 19. CORNWALLIS SURRENDERED with 7000 men.

In the peace negotiations, Vergennes was in the difficult position of trying to please both of his allies, Spain and the United States. This led to delay which aroused the impatience of the American commissioners, who, disregarding their instructions not to negotiate a separate peace with England, proceeded to do so The British, eager to win American friendship and trade, thereby defeating the aspirations of the French, readily acceded to the American demand for the Mississippi as the western boundary and full rights in the fisheries off the Canadian coast

1783, Sept. 3. DEFINITIVE TREATY OF PEACE between Great Britain and United States, signed at **Paris.** It recognized the independence of the United States Provisions of the treaty with respect to the northeastern and northwestern boundaries led to later difficulties with England, while the southern boundary provision led to trouble with Spain

Full rights in the Newfoundland fisheries were guaranteed to the United States Creditors of neither country were to encounter legal obstacles to collection of debts, while the Congress would recommend to the states the restoration of the confiscated estates of loyalists

Navigation of the Mississippi was to be open to both Great Britain and the United States.

1783-1787. THE CRITICAL PERIOD OF AMERICAN HISTORY. The Articles of Confederation had gone into effect in 1781, and with the achievement of independence in 1783 the young nation found itself in a difficult economic situation, not due primarily to the particular forms of government then in operation. Treated as a foreign people by England as well as by other European countries, and denied participation of their ships in the trade of the British West Indies, so important in their economy before the Revolution, far-reaching economic dislocations resulted, producing a deep depression in 1784–1785, from which the country began to recover as early as 1787. While not fundamentally responsible for the unfortunate situation, the Articles of Confederation received the blame and were widely believed to be inadequate. The economic situation was aggravated by paper-money experiments of the states and by the inability of Congress to raise an adequate revenue The weakness of the central government was dramatized by **Shays' Rebellion** (1786) in Massachusetts, in which the use of state troops was necessary to protect the federal arsenal at Springfield

1785. The Land Ordinance enacted The cession by the landed states of their claims to western lands, made necessary by Maryland's refusal to ratify the Articles of Confederation unless such cessions should be made, created the public domain of the United States, for the administration of which a land policy was necessary This ordinance established the rectangular system of survey, provided for survey in advance of sale, and laid down terms and conditions of sale

1787. THE NORTHWEST ORDINANCE enacted, providing for the government of the northwest The region was to be divided into not less than three and not

more than five districts, which, after passing through territorial or colonial stage, should be admitted to statehood This principle of co-ordinancy or ultimate statehood became the basic and distinguishing feature of the American colonial system of the nineteenth century. Slavery and involuntary servitude were prohibited in the area

1787, May. THE CONSTITUTIONAL CONVENTION assembled at Philadelphia The inability of Congress to raise revenue, the outbreaks of disorder, and the obstructions to commerce resulted in an increasing desire for a more perfect government Commissioners from Virginia and Maryland met at **Mount Vernon** in 1785 to consider the possibility of a uniform commercial code This conference made clear the need of wider co-operation, so Virginia invited all the states to send delegates to a convention at **Annapolis** (1786). This convention was attended by delegates from but five states, who proposed a convention to meet at Philadelphia in May, 1787. Congress officially called such a convention. The convention was to convene on May 5 All states except Rhode Island were represented After four months of labor,

1787, Sept. 17. The Constitution was signed by the delegates present. The document was sent to the states for ratification, with the provision that it should become operative upon the acceptance of nine states

1788, June. Ratification by New Hampshire, the ninth state, placed the constitution in operation. In several states the anti-Federalists exacted promises of amendments in return for unconditional ratification. (*Cont. p.* 764)

E. AFRICA, 1517-1800

1517. Conquest of Egypt by Selim I (p 422). The country was put under a Turkish governor, but the Mamluk beys were left in effectual control, acting as a landholding oligarchy.

1517. Regular establishment of the **slave trade** through a concession granted by Charles V to a Flemish merchant

1517. Defeat of the Songhoy ruler by the forces of **the Haussa Confederation,** which became the dominant power east of the Niger, under the leadership of Kebbi

1520-1526. Mission of **Francisco Alvarez** to Ethiopia. He wrote the first detailed description of the country

1527. **Ethiopia** was overrun by the Moslem Somali chief, Ahmed Gran, who used firearms The negus thereupon called upon the Portuguese for aid

1534. The Turks, under Khaireddin Barbarossa, took **Tunis** (p 422)

1535. **Spanish conquest of Tunis,** completing the conquest of the North African coast begun in 1494 with the acquisition of Melilla.

1541. Abortive expedition of Charles V to Algiers (p 401)

1541. Portuguese expedition to Ethiopia under **Christopher da Gama,** son of Vasco. The Portuguese succeeded in expelling Ahmed Gran

1555-1633. THE PORTUGUESE (Jesuit) **MISSIONS IN ETHIOPIA.** Conversion of two successive rulers Remarkable influence and work of **Pedro Paez.** The conversion led to repeated religious wars against the Portuguese faction. Ultimately the Portuguese were expelled and all Catholic missions prohibited

1562-1576. **John Hawkins** initiated the British slave trade, making three voyages from West Africa to the New World with slave cargoes.

1571-1603. Apogee of the **EMPIRE OF KANEM** or **BORNU** (dating from the 13th century) under **Idris III.** It controlled most of the territory about Lake Chad.

1574. The Spaniards lost Goletta. End of the Spanish rule in Tunis, which became a Turkish regency, with an elected bey.

1574. The Portuguese began the settlement of Angola at **São Paulo de Loanda.**

1578. **Sebastian** of Portugal, called upon to intervene in the dynastic struggles in Morocco and determined to conquer the country for himself, was overwhelmingly defeated at **Kasr al-Kabir. Ahmed al Mansur** established the Sharifian dynasty

1580. The Spaniards occupied **Ceuta,** which remained technically a possession of Portugal till 1688

1581. The Moroccans took Tuat, beginning the penetration of the Sahara.

1591. A force of Spanish and Portuguese renegades in the service of the Moroccans, crossed the desert and defeated the forces of **Songhoy** by use of firearms. Gao was destroyed and the Moroccans established themselves at Timbuktu. The entire Negro culture was destroyed and the country fell a prey to rival pashas These made themselves independent of Morocco in 1612 and continued to rule at Timbuktu until 1780

1595. First establishments of the **Dutch** on the **Guinea coast.**

1598. The Dutch took Mauritius (Isle de France)

1616. The Portuguese, **Gaspar Boccaro,** journeyed from the upper Zambezi to Kilwa on the coast, one of the first recorded explorations of the interior

1618. Journey of the Frenchman, **Paul Imbert, to Timbuktu.**

1618-1619. **G. Thompson** ascended the Gambia River for about 400 miles.

1621. The Dutch took **Arguin and Goree** from the Portuguese

1626. The French established themselves at St Louis at the mouth of the Senegal

1626. First French settlements on **Madagascar** (inhabited by various primitive tribes and by the **Hovas,** who had arrived from overseas about 1000 A D)

1637. The Dutch took Elmina from the Portuguese and built numerous forts on the Gold Coast.

1637. The French, under de Rochefort, explored the Senegal for about 100 miles and established posts.

1645. Capuchin monks ascended the Congo River, possibly as far as Stanley Falls.

1650. **Ali Bey** made himself hereditary Bey of Tunis.

1652, Apr. 7. CAPETOWN FOUNDED by the Dutch under **Jan van Riebeeck.**

1660. Rise of the **BAMBARA KINGDOMS** (Segu and Kaarta) on the upper Niger. They defeated and replaced the **Manding Empire** (1670) which thenceforth became a minor state

1662. Portugal ceded **Tangier** to England

1662. The British built a fort at James Island at the mouth of the Gambia

1668. The Dutch advanced their South African settlement as far as Mossel Bay.

1672. Foundation of the **Royal African Company.**

1677. The French conquered the Dutch posts on the Senegal

1683. The Prussians built the fort of **Grossfriedrichsburg** on the Guinea Coast (abandoned 1720)

1684. The British abandoned Tangier to the Sultan of Morocco.

1684. French expeditions against the piratical deys of **Algiers.** Various coast towns were bombarded and the deys were obliged to surrender Christian slaves.

1686. Louis XIV proclaimed the annexation of **Madagascar.**

1697. The French, under **André de Brue,** completed the conquest of the Senegal region and advanced up the river to Mambuk (1715)

1698. The Portuguese were expelled from their posts on the east coast by Arabs from Oman Mombasa was abandoned in 1730, but the Portuguese retained Mozambique.

1699. **C. Poncet,** an emissary of Louis XIV, traveled overland from Cairo to Gondar in Ethiopia.

1705. Hussein ibn Ali founded the **Husseinite dynasty** in Tunis and threw off Turkish authority.

1708. The Spaniards were expelled from Oran

1713. **The Asiento Treaty** (p. 432) gave Britain the right to import African slaves into the Spanish colonies in the New World, thus initiating the most active period of the British slave trade

1714. **Ahmed Bey** made himself ruler of Tripoli, founding the Karamanli dynasty which lasted until 1835

1715. The French took the island of Mauritius.

1723. **Bartholomew Stibbs,** for the African Company, took over the Gambia region as far as the Barrakonda Falls.

1732. The Spaniards retook Oran

1757-1789. Reign of **Sidi Mohammed** in Morocco He established law and order and abolished Christian slavery (1777).

1758. The British captured the French possessions on the Senegal.

1760. The Dutch, in South Africa, crossed the Orange River and began the penetration of Great Namaqualand.

1766. **Aki Bey** established himself as ruler of Egypt and proclaimed independence of the Turks His successor, Mohammed Bey, recognized Turkish suzerainty again (1773).

1768-1773. **James Bruce** explored Ethiopia, traveling from Massawa to Gondar and thence to the Blue Nile He returned by way of Egypt and reported the Ethiopian Empire in decline, restricted to the area north of the Blue Nile and wracked by rebellion.

1776. Rise of the Tukulor power in West Africa

1778. The French recovered their possessions on the Senegal

1778. Explorations of **W. Paterson** in the Kafir country.

1783. By the Treaty of Paris the British secured the Senegal again They held it until 1790

1787. The British acquired **Sierra Leone** from the natives In 1791 it was devoted to the settlement of freed slaves.

1788. **Sir Joseph Banks** founded the *African Association* for the furtherance of exploration and the development of trade.

1791. The Spanish abandoned Oran, retaining only Melilla and Ceuta and a few minor stations on the North African coast.

1792. **Denmark prohibited the slave trade,** the first country to take this step.

1801. Conquest of the Haussa power by **Usman dan Fodio,** a Tukulor chief, who converted this area to Islam and founded the **Kingdom of Sokoto.**

(*Cont. p.* 826)

F. ASIA

1. PERSIA, 1500-1794

1500-1524. SHAH ISMAIL, founder of the **Safavid dynasty,** the first national dynasty in many centuries. Ismail traced his descent to **Safi al-Din** of Ardabil (1252–1334), a supposed descendant of Ali, the fourth caliph Safi al-Din founded among the Turk tribes an order of dervishes, devoted to mystic teachings and Shi'a doctrine. His influence and that of his successors spread over northwestern Persia and into eastern and southern Anatolia Sheikh Joneid, head of the order from 1448–1460, attempted to extend his temporal power and ultimately secured the protection and alliance of **Uzun Hasan,** whose sister he married His son, Haidar, married a daughter of Uzun Hasan and devoted himself to the reorganization of the order, which became a powerful military instrument (*Kizil-bashes* = red heads, from their headdress). Haidar was defeated and killed by Jaqub of the White Sheep, but left several sons, of whom Ismail was one. After years spent in hiding, Ismail was able to take advantage of the confusion following the death of Rostam Shah

1501. Battle of Shurur, in which **Ismail** defeated Alwand of the White Sheep He soon took Tabriz and had himself proclaimed shah With his accession the Shi'a doctrine became officially established in Persia

1507-1622. The Portuguese established at Hormuz

1510. Ismail defeated the **Uzbeks** and drove them out of Khorasan

1514. BATTLE OF CHALDIRAN, following the invasion of Persia by the Turks under Selim I (p 421). Ismail was defeated and Tabriz taken, though later evacuated by the Turks. Beginning of a long duel between Turks and Persians, resulting largely from religious conflict.

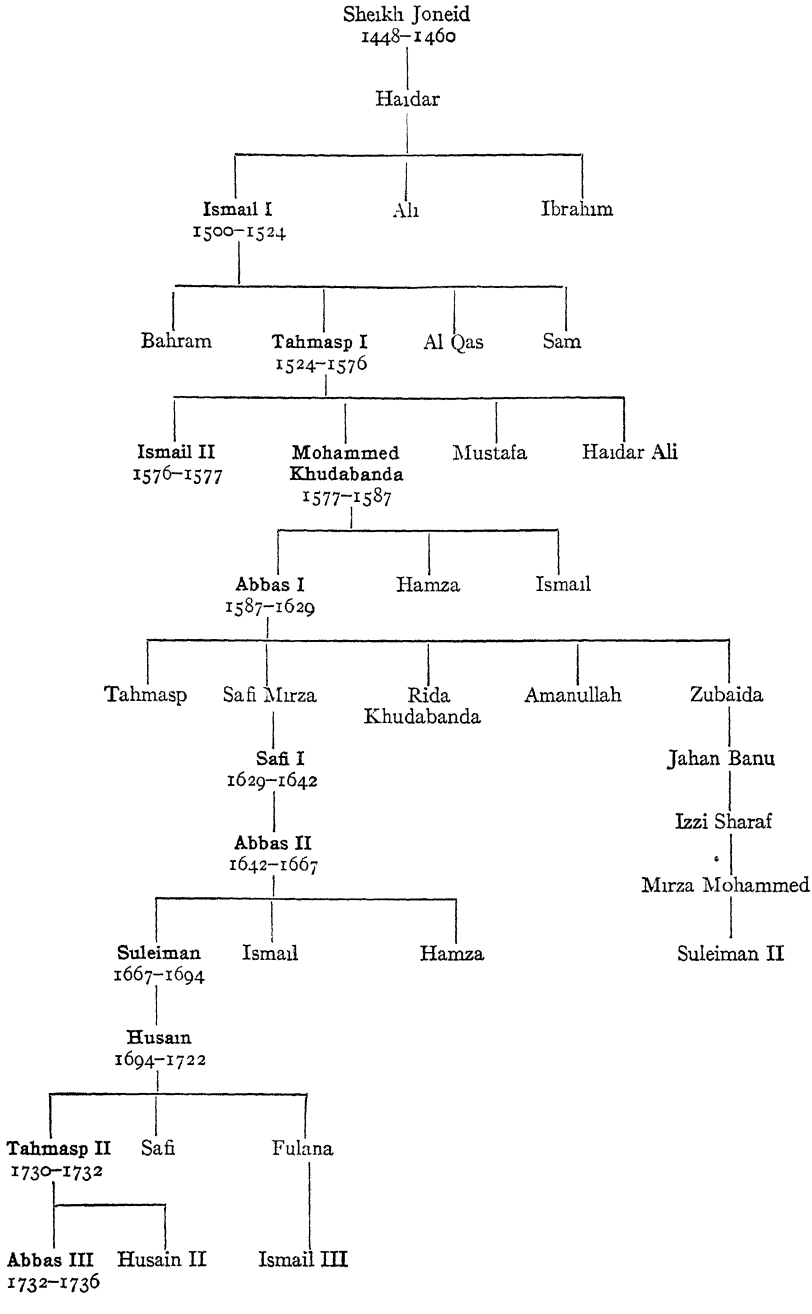
1524-1576. SHAH TAHMASP I, the son of Ismail, who ascended the throne at ten. The reign was marked by continuous raids and campaigns against the Uzbeks of Transoxiana and by repeated incursions of the Turks, who conquered Mesopotamia and on several occasions took Tabriz, Sultanieh, and Ispahan. **Peace with the Turks** was finally concluded in 1555.

1561-1563. Anthony Jenkinson, of the English Muscovy Company, **reached Persia** overland through Russia and opened commercial relations which continued until 1581.

1576-1577. ISMAIL II, fourth son of Tahmasp, who succeeded on the death by poison of his father. He killed off all his relatives and rivals, but himself died after a year of office

1578-1587. MOHAMMED KHUDABANDA, the half-blind eldest son of Tahmasp, who had escaped his brother's vengeance. Renewal of the Turkish attack, which was less decisive than before

1587-1629. SHAH ABBAS I (*the Great*), most highly esteemed of the Persian rulers He was a man of broad outlook and strong will, though personally suspicious and cruel (he had one son murdered and two others blinded) In his early years Abbas was wholly under the domination of the Kizil-bash chiefs, but he later succeeded in counteracting their influence by organizing a new tribe of "friends of the shah," and by building up a new infantry and artillery force, modeled on the Turkish. In this he was greatly aided by **Anthony** and **Robert Shirley,** two brothers who came with 26 followers in 1598. Robert remained in Persian service during most of Abbas' reign



1590. Abbas made peace with the Turks, abandoning Tabriz, Shirvan, Georgia, and Luristan This he did in order to be free to deal with the Uzbeks, who, under Abdullah II, had taken Herat, Meshed, and other towns of Khorasan.

1597. The Persians defeated the Uzbeks, whose invasions of Khorasan were stopped for many years

1602-1627. Further **wars with the Turks** (mission of Sir Anthony Shirley to Europe to enlist the co-operation of the emperor and King of Spain) In 1603 Abbas managed to retake Tabriz, and then Erivan, Shirvan, and Kars A great victory was won over the Turks at **Lake Urmia.** Thereafter Abbas conquered Baghdad, Mosul, and Diarbekr. Peace was made in 1612, but war broke out again in 1616. Efforts of the Turks to retake Baghdad (1625) failed.

1616. The British East India Company began trading with Persia from Surat. Their activity was resented by the Portuguese, who attacked the Eng-

The Safavid Dynasty

lish, but were defeated in the **battle of Jask** (1620).

1622. The English merchants, co-operating with a Persian army, took **Hormuz** from the Portuguese, receiving special privileges there

1629-1642. SHAH SAFI, the grandson of Abbas Beginning of harem rule and rapid decline, as in the Ottoman Empire fifty years before Like his contemporary, Murad IV (p 424), Shah Safi distinguished himself by wholesale executions

1630. Murad IV took and sacked Hamadan, the first move in the campaign to retake the conquests of Abbas the Great

1635. The Turks took Erivan and Tabriz

1638. The Turks took **Baghdad** and forced the shah to make peace Erivan was left to the Persians, while the Turks retained Baghdad

1642-1667. SHAH ABBAS II, the son of Safi He was only ten when he reached the throne and at no time showed any particular ability

1664. First Russian mission to Ispahan Beginning of Cossack raids on the Caucasus front In the same year the French secured permission to trade in Persia

1667-1694. SHAH SULEIMAN, the son of Abbas II, another dissolute ruler who did nothing to check the decline

1694-1722. SHAH HUSAIN, a devout ruler whose renewed emphasis on Shi'a doctrine gave his Sunnite neighbors an excuse for making trouble

1709. Rising of the Afghans at Kandahar, led by **Mir Vais,** a Ghilzai chieftain and a Sunnite Mir Vais succeeded in defeating the Persian armies sent against him (1711) and established the independence of the Afghan state

1715-1717. Mir Abdullah, ruler of Kandahar in succession to Mir Vais He was overthrown when he attempted to make peace on the basis of Persian suzerainty over Kandahar

1717-1725. Mir Mahmud, ruler of Kandahar. In 1717 the Abdalis of Herat also revolted and established another Afghan state

1722. Invasion of Persia by Mir Mahmud and an army of Afghans The Persian court and army were completely demoralized and offered little real resistance. They were defeated at **Gulnabad,** after which Mahmud took Ispahan. Husain abdicated and

1722-1725. Mahmud became shah Husain's son, **Tahmasp,** however, escaped to Mazandaran and tried to organize national resistance

1722. Peter the Great, taking advantage of the confusion, took Derbent on the plea of supporting Tahmasp In 1723 he added Resht and Baku, and Tahmasp agreed to cede all of Shirvan, Daghestan, Gilan, Mazandaran, and Astrabad in return for effective aid

1723. The Turks, hoping for a share of the spoil, took Tiflis

1724. Russia and Turkey made an agreement for the dismemberment of Persia, the Turks reserving for themselves Tabriz, Hamadan, and Kermanshah. These places they occupied in 1724–1725.

1724-1725. Reign of terror in Ispahan, where Mahmud, gone mad, ordered the massacre of the Persian nobility and of all available Safavid princes, to say nothing of large numbers of soldiers and inhabitants

1725-1730. ASHRAF SHAH, in succession to Mahmud. He was more conciliatory, but from the outset failed to get much sympathy from the Persians, or much support from Kandahar

1726. Ashraf defeated the Turks, who were advancing on Ispahan Peace was concluded in 1727, Ashraf securing recognition from the sultan in return for the cession of the conquered territories

1726-1728 Tahmasp, supported by Nadir Kuli, a powerful chief of the Afshar tribe of Khorasan, conquered Meshed and Herat and, after defeating an Afghan army, retook Ispahan.

1730. Final defeat of the Afghans near Shiraz Ashraf was murdered on his way to Kandahar and his followers fled from Persia as best they could

1730-1732. SHAH TAHMASP II was hardly more than a figurehead, the real ruler being **Nadir Kuli,** who married Tahmasp's sister Nadir, having defeated the Afghans, turned against the Turks, whom he forced to give up Hamadan, Kirmanshah, and Tabriz He then marched east to deal with the Abdalis, and Tahmasp, thinking to complete the victory over the Turks, met with disaster and lost all that Nadir had gained He agreed to the terms submitted by the Turks, for which Nadir deposed him.

1732-1736 **ABBAS III,** the eight-months-old son of Tahmasp, was elevated to the throne as a mere puppet He was the last of the Safavid dynasty

1732. By the **Treaty of Resht** the Russians gave up their claims to Mazandaran, Astrabad, and Gilan, which had never been effectively occupied

1733. **Nadir,** having been seriously defeated by the Turks in the **battle of Kirkuk,** managed to retrieve his position and blockade Baghdad But these operations were interrupted by the need for a further campaign in Transcaucasia (1734)

1735. Russia, by treaty, gave up the last Persian acquisitions of Peter the Great, Baku and Derbent, and joined in alliance with Nadir against the common enemy, the Turk Nadir won a great victory over the Turks at **Baghavand,** and took Tiflis

1736-1747. **NADIR SHAH** became ruler on the death of Abbas III He accepted the throne on condition that the Persians renounce the Shi'a heresy. He himself, being a Turk by race, was also a Sunnite But he never succeeded in making orthodoxy acceptable to the Persians

1737. Nadir and his generals reduced Baluchistan and Balkh.

1738. **Capture of Kandahar.** Nadir thereupon proceeded to invade India Kabul, Peshawar, and Lahore were taken and in 1739 a huge army of the Mogul emperor was defeated at **Karnal,** near Delhi **Delhi** was taken and a tremendous massacre followed Nadir left the Mogul emperor on the throne, but levied an indemnity of almost half a billion dollars and took all the territory north and west of the Indus

1740. Nadir subjected **Bokhara and Khwarezm** (Khiva) This marked the greatest extent of his dominion and at the same time marked a turning-point in his career. Nadir was a great soldier, but he lacked real statesmanship and administrative ability. His efforts to stamp out Shi'ism resulted in growing unrest, and the need for suppressing discontent made the shah ever more ruthless and cruel In the end he ruined the country by his huge contributions and despotic exploitation

1743-1747. Resumption of **war with the Turks,** the sultan having refused the Persian terms. In 1745 Nadir won a resounding victory near **Kars** and in 1747 was able to secure peace he gave up his demand for recognition of a fifth (Persian) orthodox sect, but secured recognition for the frontier as it had been in the time of Murad IV

1747. **Nadir Shah was assassinated** by one of his own tribesmen

1747-1750. A period of anarchy, during which the succession was hotly disputed **Ahmad Kahn Durani** established himself at Kandahar, took Meshed and Herat and annexed Sind, Kashmir, and parts of the Punjab, founding a powerful Afghan state

1747-1748 **Adil Shah,** the nephew of Nadir, became shah, but was soon dethroned and executed

1748-1751. **Shah Rukh,** grandson of Nadir, was elevated to the throne He was defeated and blinded by a Shi'a rival, but ultimately established his rule in Khorasan (to 1796) The rest of Persia continued to be hotly disputed between competing chieftains, until

1750-1779. **KARIM KHAN,** of the **Zand dynasty,** succeeded in maintaining himself against the powerful Kajar leader. Karim Khan, whose strength was in the south (Shiraz the capital), was a just and benevolent ruler, during whose reign the country was enabled to recover

1763. The English established a factory at Bushire, and somewhat later (1770) at Basra

1775-1776. Karim Khan sent an expedition against Basra This important station was taken, but was voluntarily abandoned on the death of Karim

1779-1782. Another period of anarchy, during which Karim's brothers disputed the succession and the Kajar chief, Aga Mohammed, again took the field

1782-1785. **Ali Murad Shah.** He re-established the capital at Ispahan.

1785-1789. **Jafar Shah.** Continuation of the confusion, marked by cruelty and barbarity.

1789-1794. **Lutf Ali Khan,** last of the Zand dynasty; a brilliant and chivalrous, but arrogant ruler Unable to get the better of his rivals, Lutf was finally defeated and killed.

1794. **Aga Mohammed founded the Kajar dynasty.** (*Cont. p* 862)

2. AFGHANISTAN, TO 1793

Prior to the 18th century, Afghanistan was in part ruled by Persia, in part by India and in part by the central Asian khanate of Bokhara In 1706 **Kandahar** made itself independent and there followed the Afghan conquest of Persia (1722, see p 528) This remained but an episode, for in 1737 Nadir Shah, having driven the Afghans out of Persia, carried the offensive eastward and subjected all of Afghanistan and western India

1747-1773. AHMAD SHAH, one of the Afghan generals of Nadir Shah, on the murder of the latter assumed control of the Afghan provinces. He was a member of the Durani (Sauzai) clan of the Abdali tribe and established the **Durani dynasty** and empire Most of his reign was filled by his nine **expeditions to India,** where he successfully asserted his claim to the Indian provinces of Nadir's empire The dying Mogul Empire was unable to offer effective resistance Ahmad took Lahore (1752) and then Delhi, which he plundered (1755) In 1761 he won a resounding victory over the Marathas at **Panipat,** and in 1762 over the Sikhs near Lahore On his death the Afghan Empire extended from eastern Persia (Meshed) over Afghanistan and Baluchistan and eastward over Kashmir, and the Punjab.

1773-1793. Timur Shah, the son of Ahmad, proved to be a weak and ineffectual ruler. He moved the capital from Kandahar to Kabul, but was unable to prevent the loss of some of the Indian territory or the gradual disintegration of his authority even in Afghanistan

(*Cont p* 866)

3. INDIA

1498. VASCO DA GAMA, having rounded the Cape of Good Hope, reached Malabar. The Portuguese, after constructing forts at Cochin (1506) and Socotra (1507), soon diverted the spice trade from the Red Sea route

1504. Yusuf Adil Shah of Bijapur, having annexed Gulbarga, established the Shi'a form of Islam, despite protest from many Sunnites

1509. The Portuguese, under **Francisco de Almeida,** at Diu destroyed an Egyptian-Indian fleet which had, in the previous year, defeated a Portuguese squadron at Chaul

1510. The Portuguese acquired Goa as headquarters, in place of Cochin

1512. Golconda became independent (till 1687)

1526-1537. Bahadur, the last active sultan, with the aid of Khandesh, captured Mandu and annexed Malwa (1531), after which he captured Chitor (1534)

1526-1761 (1857). THE MOGUL EMPIRE in India was founded by **Babar** (1483–1530), descendant of Timur in the 5th generation, who had seized Kabul (1504) and Lahore (1524) as compensation for loss of Ferghana and Samarkand. Decisive victory at **Panipat** over Ibrahim Shah Lodi gave him Delhi and Agra, which he defended in the

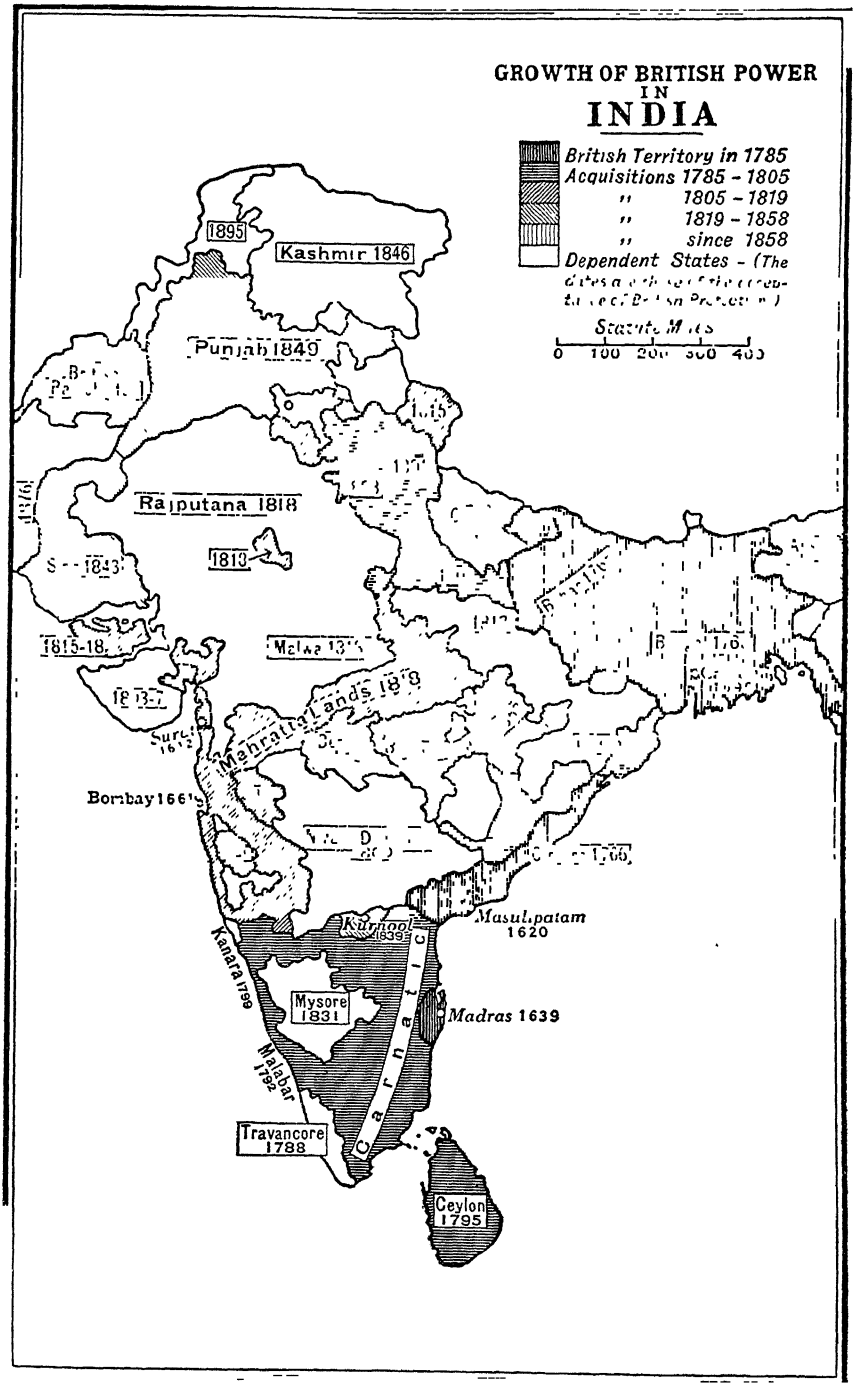
1527. Battle of Khanua against Rana Sanga of Chitor, chief of a Rajput confederacy.

1529. Victory on the Gogra, where it meets the Ganges, completed conquest of the Kingdom of Delhi to the frontier of Bengal

Babar's acts, problems, and personality appear in his Turki *Memoirs.*

1530-1540, 1555-1556. Humayun drove Bahadur Shah of Gujarat to flight before Chitor and captured Mandu and Champanir (1535), but lost both through a year of inaction The same fault and treachery of his brothers lost the empire to the

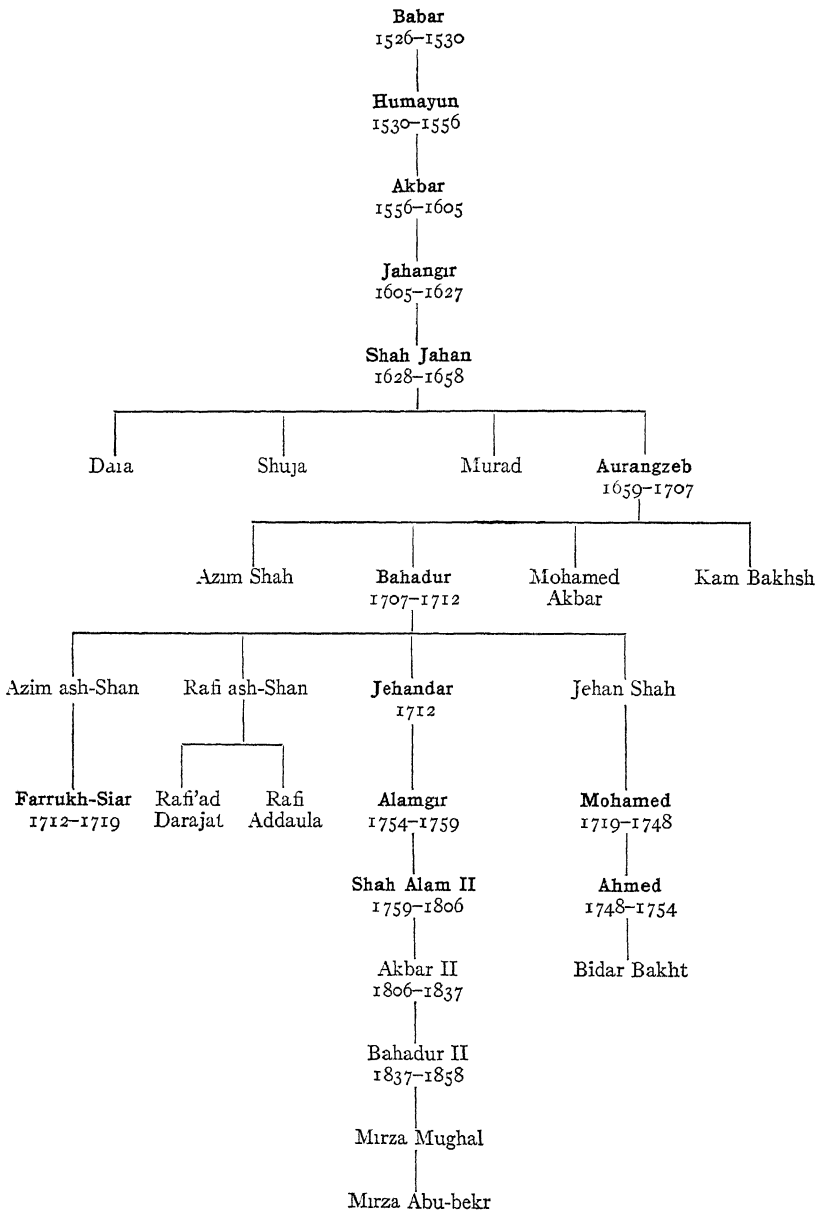
1539-1555. Sur dynasty of the Afghan **Sher Shah** (1539–1545) who had consolidated power in Bihar and drove Humayun to seek refuge in Persia, whence he returned precariously to Delhi and Agra (1555)



1535. The Portuguese secured by treaty Bassein, and were allowed to fortify Diu, which they defended against an Ottoman fleet and a Gujerati army (1538)

1546. Efforts to expel the Portuguese failed miserably

1556-1605. AKBAR (b 1542, personal rule 1562) restored and consolidated the empire throughout northern India



1556. Guided by **Bairam Khan,** his guardian (till 1560) he crushed the Afghans at Panipat.

1559. Constantine de Braganza seized Daman

GEORGE PHILIP AND SON, LTD.

The Mogul Emperors

1561. Conquest of **Malwa** was effected by the harem party (dominant 1560–1562)

1562. Akbar's marriage to a Rajput princess of Amber (mother of Jahangir) and abolition of the *jizya* tax on non-Moslems (1564) marked a new policy of impartiality and conciliation of subjects

1564. The Gond Chandels (capital Chauragarh) were conquered. (Construction of the stone fort at Agra was begun)

1565. A coalition of Ahmadnagar, Bijapur, Bidar and Golconda decisively defeated Vijayanagar at **Talikota,** and led to the execution of the raja. In 1574 Ahmadnagar annexed Berar, which had hindered the allied campaign

1568. **Chitor** was taken by Akbar and about 30,000 Rajputs massacred

1571 A new city at Fathpur Sikri, near Agra, was founded and magnificently built, but abandoned on Akbar's death

1572-1573. Conquest of **Gujarat** gave Akbar access to the sea, new ideas and revenues To defend his conquest he rode with 3000 horse 450 miles in 11 days

Re-organization of administration was begun by (1) resumption to the crown of all lands, hitherto held by officials as temporary assignments, but now to be administered and revenue collected directly; (2) establishment of a hierarchy of paid military officials in which civil servants held rank; (3) substitution of a single tax of one-third produce of the land for the traditional levy of one-sixth plus numerous cesses which were now declared abolished, (4) the branding of all horses maintained for government service, to prevent usual fraud

1576. **Bengal** was definitely conquered from the Afghans

1577. **Khandesh** was induced to submit as first step toward reconquest of the Deccan, actually accomplished only by Aurangzeb (1659–1707)

1578. Public debates on religion, instituted for Moslems only in 1575, were thrown open to Hindus, Jains, Zoroastrians, Sabaeans, and Christians Akbar showed new respect for animal life (Jain *ahimsa*), Zoroastrian reverence for the sun, and invited to court from Goa the Portuguese Jesuits Antonio Monserrate and Rodolfo Acquaviva (1579, arr 1580). These, like later missions (1590, 1595), failed despite a friendly reception

1582. In spite of revolt which followed a claim to infallibility under Moslem law (1579), the emperor decreed a new *Divine Faith* derived largely from non-Islamic ritual. He won for it only limited support, which collapsed at his death.

1589-1591. **Jamal Khan,** minister of Ahmadnagar, an adherent of the Mahdavi heresy which anticipated the advent of the Mahdi (world savior) in A. H. 1000, persecuted both Sunnites and Shiites

1601-1604. Prince Salim, later Jahangir, rebelled but was restored to favor

1603 **John Mildenhall,** representative of the English East India Company (London Company, founded Dec. 31, 1600) arrived at Agra, but secured no concession until 1608

1605-1627. **JAHANGIR** maintained his father's empire in northern India but, himself given to drink, allowed power to pass to his wife Nur Jahan (1611)

1609-1611. **William Hawkins** failed to secure a treaty for James I, as did **Sir Thomas Roe** (1615–1619), but the English won trading rights at Surat after defeating a Portuguese fleet (1612)

1616. **Bubonic plague,** clearly identified for the first time, became epidemic

1628-1658. **SHAH JAHAN** (d 1666) ruled with even less regard for his subjects, but destroyed Ahmadnagar (1632) and defeated Golconda (1635) and Bijapur (1636).

1632-1653. **The Taj Mahal** was built as tomb for his wife, Mumtaz Mahal, for whom he had already built the splendid palace Khass Mahal on the fort at Agra

1639. The site of **Madras** was granted to an Englishman

1647. **Aurangzeb** campaigned unsuccessfully in Badakhshan and Balkh, and

1649-1653. Failed to wrest Kandahar from the Persians

1653-1658. Again governing the Deccan, he campaigned ambitiously and arrested the revival of Bijapur; but failed to check the Maratha raider Sivaji

1658. **Aurangzeb rebelled,** following the illness of Shah Jahan and competition for the succession among his four sons. He imprisoned Shah Jahan (d. 1666), and became emperor

1659-1707. **AURANGZEB** emperor The Mogul dominion was undermined, in part by Aurangzeb's sacrifice of political stability to religious zeal, and his failure to control his subordinates, of whom he was inordinately suspicious

1659-1680. Sivaji reduced Bijapur (1659) and sacked Surat (1664 and 1670), the English factory escaped harm. In 1667 he won the title of *raja* from Aurangzeb and began to levy land taxes in Mogul territory (Khandesh, 1670); he successfully organized Maratha government on Hindu principles with the guidance of the poets Ramdas and Tukaram, and was enthroned as an independent ruler (1674).

1666. Chittagong was annexed for Aurangzeb by the Bengal governor

1669. In the first purely religious persecution since Akbar's accession, **the Hindu religion was prohibited** and Hindu temples destroyed, with great loss to Indian art, and the *jizya* reimposed on non-Moslems (1679) The period was marked by Jat rebellions (1669, 1681, 1688–1707), Hindu uprisings, and troubles with Afghan tribes and with the now militant and theocratic Sikhs (1675–1678).

1679. **Marwar** was annexed in war against the Rajputs, hostilities continued nearly thirty years

1681. Prince Akbar revolted unsuccessfully against his father's misgovernment, and died in exile.

1681-1707. Assuming personal command in the Deccan, Aurangzeb subjugated Bijapur (1686) and Golconda (1687) but failed to check the Marathas.

1685-1688. **Aurangzeb seized Surat** (1685), intending to expel the English, whose unwise attempt to seize Chittagong lost them all their claims in Bengal (1688); their naval superiority menaced Mogul trade, however, and they were encouraged to return to Bengal (**Calcutta founded,** 1690)

Following the decline of the Portuguese power in India, that of the English had been increased by the acquisition of **Bombay** (1661) and the absorption of Dutch ambitions chiefly in the Spice Islands Foundation of the French *Compagnie des Indes Orientales* (1664) under strict government control, and numerous settlements (Pondichéry, 1674), now opened the way for acute Anglo-French rivalry

1689. Capture of Sivaji's successor, **Sambhaji,** failed to crush the Marathas and indecisive warfare continued until 1707

The intellectual curiosity and luxurious tastes of the Mogul rulers, except Aurangzeb, fostered brilliant cultural progress Histories, annals, and memoirs, chiefly in Persian, a dictionary supported by Jahangir, and the unsurpassed poems of **Tulsi Das** (1532–1623), formed important literary contributions. Slavish imitation of Persian painting was modified by Hindu and even European influences, a height of keen observation and delicate rendering was attained under Shah Jahan Under him also the building of palaces, mausoleums, and mosques in Indo-Persian style attained an exquisite elegance

1707- Following Aurangzeb's death the empire rapidly disintegrated, various provincial governors became virtually independent (1722 ff), and wars of succession and foreign invasions culminated in anarchy

c. 1708. **The Sikhs,** who had been founded in the 15th century as a strictly religious order, proclaiming Moslem and Hindu fellowship and monotheism, and opposing caste restrictions and priestcraft (except for the secular and religious authority vested in the Guru Hargovind, 1606), became a thoroughly militant order under the last Guru, **Govind Singh** (1666–1708); they menaced Mogul rights in the Deccan but their strength was broken by Bahadur Shah (1707–1712)

1715. **The English East India Company,** through gifts and medical service, secured exemption from customs duties, and other concessions. The reorganized Maratha government gradually became pre-eminent in India, exacting taxes from the whole Deccan (1720)

1739. A pillaging invasion of Persians under **Nadir Shah** checked the Maratha expansion northward, defeated imperial troops, and withdrew, retaining possession of Afghanistan and the wealth of Delhi (p 529)

1746-1748. Following the outbreak of the **War of the Austrian Succession** in Europe (p 465), the French, strengthened by their participation in Indian intrigue under the guidance of **Dupleix,** captured Madras (1746) and defeated the protesting Nawab of the Carnatic **The Treaty of Aix-la-Chapelle** (1748) restored Madras to England

1748-1754. **Anglo-French rivalry** continued, each side supporting candidates for the positions of Nizam of the Deccan and Nawab of the Carnatic French domination, at its height in 1751 when Bussy virtually ruled the Deccan and Dupleix the Carnatic, was checked by **Robert Clive's** (1725–1774) brilliant seizure of Arcot (Sept 12, 1751). The recall of Dupleix (1754) left English prestige firmly established.

1756. The Nawab (**Suraja Dowla**) of the Bengal region captured Calcutta (June 20) and imprisoned unescaped residents in the *Black Hole.*

1757. The English retook Calcutta and, being again at war with France, seized Chandernagor (destroyed 1759), and under Clive overwhelmed the French and their allies in the **battle of Plassey** (June 22), which practically destroyed French claims in India. From their own candidate as nawab, the English secured rights of landholder over the *zamindari* of Calcutta (c 882 sq. mi.) A French expedition under Lally arrived too late, and failed to take Madras (besieged Dec. 1758–Feb. 1759)

1758-1760. Maratha occupation of the Punjab (1758) and renewed northern activity (1760) excited allied opposition of Mohammedan rulers, Rohilla Afghans, and Nadir Shah's Afghan successor, Ahmad Shah Durrani, under whose direction the Marathas were crushingly defeated in

1761. **The battle of Panipat.** Subsequent mutiny caused Ahmad Shah's withdrawal, leaving India in chaotic dissension

1761. English supremacy in India's foreign relations was assured by their defeat of the Dutch (1759) and capture of **Pondichéry** from the French, who by the **Treaty of Paris** (1763) retained only Pondichéry, Chandernagor, and other scattered stations, with limited numbers of troops. The *Compagnie des Indes* was dissolved in 1769.

1764. The English pensioned the nawab and established uncontested control in Bengal.

1765-1767. Clive administered Bengal affairs for the company a grant of *diwani* (revenue control) in Bengal, Bihar, and part of Orissa was arranged, the company itself becoming *diwan* in 1771; official perquisites were reduced among the company's servants.

The militarism of the Moguls and the predatory policy of the Marathas led to an emphasis on warfare and piracy as sources of prestige and wealth, and a gradual decline of industry, education, and cultural progress except as maintained by some Vaishnava teachers and Hindu traditions General economic chaos ensued, with westerners and Indians alike profiting from intrigue and usury. One exception was Indore (1765–1795) under the rule of the pious (**Ahalya Bai**).

During dissension in the Maratha confederacy, **Haidar Ali** (1721–1781) gained power, usurped the throne of Mysore (1761), and

1769. Compelled the British at Madras, who became involved in war against him (1765), to sign a treaty of mutual assistance.

1772-1774. As governor of Bengal, **Warren Hastings** (1732–1818) initiated reforms, including simplification of the revenue system, reformed coinage, government control of salt and opium manufacture, reduction of dacoity with native co-operation, study of Mohammedan and Hindu law He became governor-general under the

1774. **REGULATING ACT**, which provided for government of British India by a governor-general and council; limitation by the crown of the rights of the company's directors, and prohibition of officers' private trade and receipt of presents Hastings' energetic administration incurred the censure of jealous colleagues, notably **Philip Francis**, and led to his impeachment (after his retirement in 1785), with a trial (1788–1795) resulting in acquittal.

1776. **The Amini Commission**, appointed by Hastings, brought about the substitution (1781) for the board of revenue (estab. 1772) of a central committee of revenue, which unwisely eliminated all local control

1778-1782. Hastings sent an expedition across the peninsula from Calcutta to Surat (arr 1779), which broke the coalition between the Marathas, Haidar Ali, and the Nizam, and by the **Treaty of Salbai** (1782) obtained for Bombay twenty years' peace with the Marathas and the cession of Salsette and Elephanta.

1778. France and England again at war, Hastings took Pondichéry and Mahé. Provoked by this action,

1780-1784. **Haidar Ali**, with French help, attacked the English in the Carnatic, but was defeated at **Porto Novo** (1781); the **second Mysore war**, continued by his son **Tippoo Sahib**, was terminated when French aid was withdrawn.

1784. **PITT'S INDIA ACT**, in an endeavor to check territorial expansion, forbade interference in native affairs or declaration of war except in case of aggression; it put the company strictly under crown control, setting up the clumsy "double-government" system which lasted until 1858.

1786-1793. **Lord Cornwallis** (after a 20-month interregnum of John MacPherson) became governor-general and commander-in-chief, with power to overrule his council (extended clearly over all local authority 1793). Under injunctions to preserve peace, he made administrative reforms (adequate fixed salaries for company officers).

1790-1792. Tippoo attacked Travancore, opening the third **Mysore War;** Cornwallis allied himself with the Peshwa and Nizam, and Tippoo was defeated and ceded half his territory, paying a large indemnity (Mar 19, 1792)

1793. Cornwallis' Code inaugurated substantial reforms The *Permanent Settlement* stabilized the revenue system by fixing the assessment in Bengal, Bihar, and Orissa (and Benares Province, 1795) with collection through *zamindars*, whose expansive powers allowed corruption to continue nevertheless, it also effected ruthless sale of *zamindar* rights in case of default, led to a "no rent" policy and its faulty remedy, distraint (1799), closed the way to later reliable surveys because of individual interests, and caused great financial loss to company and government. The **judicial system** was reshaped on the British model, but with a paucity of courts and a subordination of Indian officials *Zamindars* were left only revenue duties, their magisterial and police functions being transferred to European district judges (*zillahs*) and Indian police (*darogas*)

In Madras a careful survey along the lines of local practice led to a system of direct levy from the *ryot* (peasant), more satisfactory than the Bengal system

Meanwhile the principal Maratha leader, **Mahadaji Sindia** (d 1794), assumed protection of the emperor, reclaimed Delhi, and extended his power in northern India.

1793-1798. Sir John Shore, governor-general

1798. Ceylon became a crown colony

(*Cont p* 868)

4. CHINA

1520-1521. The Portuguese, who under Albuquerque had seized Malacca (1511), sent Thomé Pires to Peking. Piratical conduct of Simao d'Andrade and others led to their expulsion from China in 1522

1522-1566. THE CHIA CHING REIGN of Shih Tsung was filled with the effort to repel attacks (especially 1542 and 1550) of Altan Khan, Prince of the Ordos; and of Japanese pirates (1523 and 1552), who even besieged Nanking (1555).

1557. A Portuguese settlement was permanently established at **Macao.**

1577. So-nam gya-tso, third successor of Tsong-kha-pa (1357–1419), who **reformed Tibetan Buddhism** by foundation of the yellow-capped "Virtuous" church, and himself an incarnation of Avalokitesvara, presided over a Mongol assembly beside Koko-nor. Altan Khan entitled him *Dalai Lama* (Lama of all within the seas), and formally accepted his spiritual authority for his people. The hold of the Tibetan church over Mongolia was cemented by recognition of two new divine incarnations· **Manjusri** in the Dongkur Hutuktu of the Ordos (1579) and **Maitreya** in the Jebdzun-damba Hutuktu of Urga (c 1602)

1573-1620. THE WAN LI REIGN of Shen Tsung is famous for cultural attainment.

1592-1593, 1597-1598. Japanese invasions of tributary Korea sent by Hideyoshi were repelled, the first from P'yong-yang (1593), the second from southern Korea.

1615. Nurhachi gave military organizations as eight banners to a group of Tungus tribes in eastern Manchuria

1616. He adopted the title *Chin Khan* and the surname *Aisin Gioro*, "Golden Tribe," to identify his people as heirs of the Chin (1116–1234) They later (1652) called themselves *Manchus* (Man-chou, probably from the Bodhisattva of learning, Manjusri)

1621. He expelled the Ming from the Liao Basin and moved his capital to Liaoyang

1636. THE MANCHUS proclaimed an imperial Ta Ch'ing dynasty at Mukden, and set up a civilian administration copied closely on the Chinese.

1644. The last Ming emperor hanged himself when a bandit, Li Tzu-ch'eng, seized Peking

MING THOUGHT was at first almost wholly dominated by authority of **Chu Hsi** and his school. The *Hsing Li Ta Ch'üan*, a digest of moral philosophy from the works of 120 of these scholars, was published under imperial authority in 1416. Opposition to the positive and authoritarian aspects of such teaching was most vigorously expressed by **Wang Shou-jen** (pen-name *Wang Yang-ming*) (1472–1528 or 1529), who insisted that moral judgments spring from the intuitive faculties within all men. Sages differ from common men in quantity, not quality, of true perceptions. Experience is for him the test of truth Chu Hsi through emphasis on objective study had opened the door to scientific re-

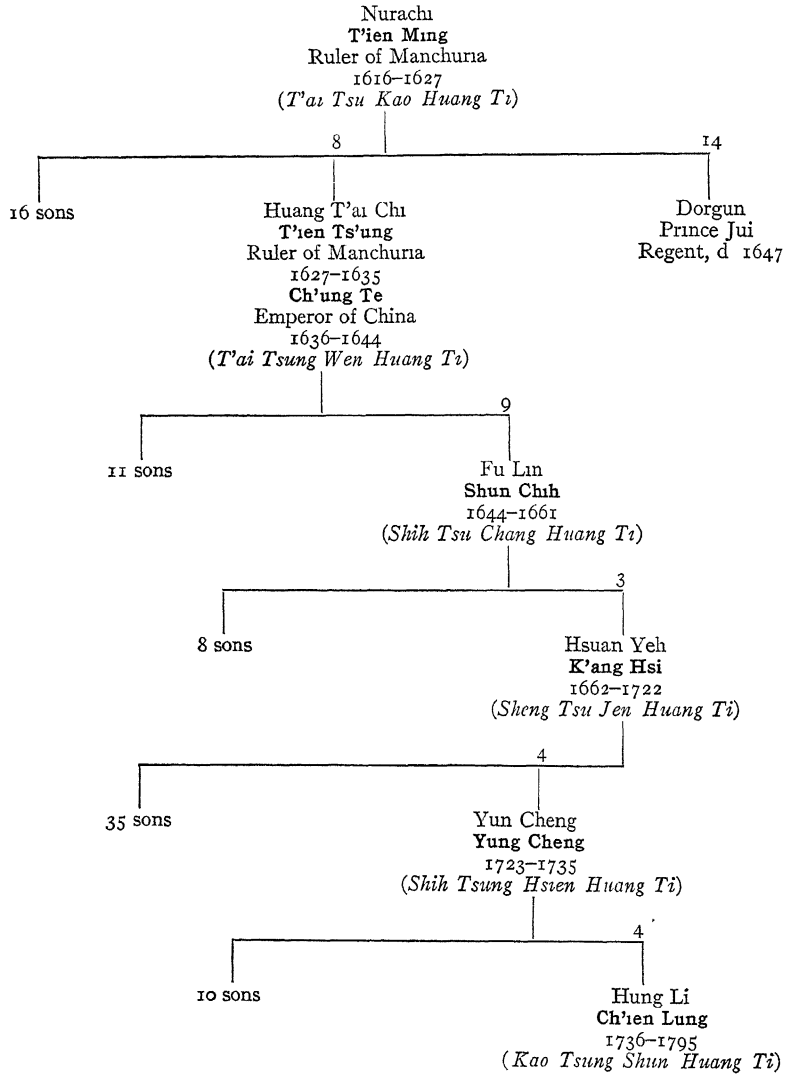
search. Wang, by insistence on subjectivity, did much to prevent it.

The early part of the dynasty saw a vigorous national reaction led by the **Academy of Letters** (Han Lin Yuan) against all things foreign Buddhism was now almost completely naturalized as Chinese, and Islam was too strongly entrenched in the north and southwest to be eradicated, but both Nestorian and Roman Christianity were suppressed So too were various secret fraternities with obscure social and political objectives, like the **White Cloud** and the **White Lotus**, which had enjoyed official status under the Mongols

Matteo Ricci (1552–1610, Macao, 1582) won toleration for the Jesuits and a salary at court (1601) by presenting clocks, etc., to the throne and preparing a huge map of the world. News in Peking (1606) of the arrival in Kansu of **Benedict de Goez**, who had come overland from India (1603–1605), first established for modern Europe identity of **Marco Polo's Cathay** with maritime China (Thinai in the *Periplus*, A D. 80–89, from Sanskrit Cina) Rapid conversions and private church services at Nanking brought suspicion of secret aims like those of the White Lotus, and consequent deportation (1616) of the missionaries to Macao, whence they gradually returned **Johan Adam Schall von Bell** (1591–1666, Peking, 1622) was charged (1630) to reform the dynastic calendar (already begun by Jesuits, 1611 and 1629) He cast astronomical instruments; and (1636–1637) twenty 40-lb. cannon, with camel-guns for use against the Manchus

The Academy of Letters supervised an imposing series of official compilations. The *Yung Lo Ta Tien*, an encyclopaedia into which numerous whole works were transcribed, was compiled in 10,000 manuscript volumes of folio size (1403–1409) The precedents of the T'ang, Sung, and Yuan were followed by issue, in numerous editions, of the dynastic legal and administrative codes and a territorial survey of the empire The practice was begun of gathering many small choice works by various authors into uniform collections **Mao Chin** published from his private library the *Chi Ku Ko*, fine critical editions of the *Thirteen Classics with Commentaries*, the *Seventeen Standard Histories*, and many other works

Ming painters, besides much imitation of Sung ink landscape which was now reduced to conventional formulae, revived a coloristic tradition of vivid blues and greens **Tai Chin** (fl c. 1446) especially developed a new style of free rapid composition in ink which was better adapted to representation of life and movement than the exquisite but somewhat static Sung technique. The potters of the Hung Wu and Yung Lo reigns achieved bold effects by application of "three-color" glazes (aubergine, turquoise, and yellow) with dark blue to monumental potiches In the Hsuan Te period they learned to control copper oxide red for decoration of white paste under clear glaze, in addition to the cobalt "Mohammedan blue" of which the purest supply came intermittently from Turkestan Decoration in overglaze enamels, often in combination with underglaze blue, was used brilliantly on rather bombastic vases in the Chia Ching and Wan Li periods The imperial kilns at Ching-te-chen in Kiangsi were developed to supply immense quantities of porcelain to the palace



1644-1912. THE CH'ING DYNASTY entered Peking by surprise when the Manchu regent **Dorgun** (1643–1650) had helped the Ming general Wu San-kuei to drive off the bandit Li Tzu-ch'eng

1644-1661. THE SHUN CHIH REIGN of Shih Tsu was filled with military effort to destroy Ming resistance, which centered about Prince Fu at Nanking (1644–1645), Prince T'ang in Fukien (1645–1646), Prince Lu at Shaohsing, Amoy, Chusan (1645–1651), and Prince Kuei from Canton to Yunnan (1646–1659). Conquest was accompanied by imposition of the Manchu shaven head with queue Foot-binding, at first forbidden (1638, 1645, 1662), was at length permitted to Chinese only (1668) Manchus were appointed as colleagues of Chinese in all principal posts of central administration, and garrisons from the eight Manchu banners were distributed among strategic provincial cities; but Chinese were appointed in the provinces both to civil posts and to command of Chinese auxiliary troops. Four Chinese were sent as viceroys to hold the south and southwest

1645-1683. A pirate dynasty upheld the Ming. Chen Chih-lung (1645–1646, executed at Peking 1661) was succeeded by **Cheng Ch'engkung**, known to the Portuguese as *Koxinga* (1646–1662). Koxinga seized Amoy (1653), Ch'ung-ming Island (1656), attacked Nanking (1657), and by a long siege of Fort Zelandia (1661–1662) wrested Formosa from the Dutch. So formidable was his naval power that the Manchus (decreed 1661) evacuation of the whole coastal population to a depth of ten miles from the sea

1662-1722. THE K'ANG HSI REIGN of Sheng Tsu (b. 1654, personal rule in form 1667, in fact 1669) opened a period

The Manchu (Ta ch'ing) Dynasty (1644–1795)

NOTE: Names in plain type are personal names, taboo after a ruler ascended the throne.
Names in boldface type are reign titles, or year names, adopted for reckoning time, but often applied by Westerners to the emperor himself.
Names in italic type are dynastic titles, or temple names, conferred posthumously to refer to the ruler. *Huang Ti* means simply "emperor."

of cultural achievement which surpassed the greatest of earlier dynasties. The fifteen provinces of the Ming were increased to eighteen by separate recognition of Anhuei (1662), Hunan (1664), and Kansu (1705).

The Dutch had founded Batavia (1619), their Formosan station (1624–1625), and captured Malacca (1641) from the Portuguese, who lost their commercial empire, but retained Macao. A mission of Pieter van Goyer and Jacob van Keyser (1656) secured nothing better than tributary status, only slightly improved (1667) by the mission of Pieter van Hoorn. Disgruntled by loss of Zelandia,

1663-1664. **Balthasar Bort** with a Dutch fleet helped a Chinese army drive Koxinga's son and successor Cheng Chin (1662–1681) from the Fukien coast to Formosa

1670. A Portuguese embassy under **Manuel de Saldanha,** like that of Bento Pereyra de Faria (1678–1679), won only confirmation of the status of Macao. The much later missions of A M de Souza y Menezas (1726) and F.-X. Assis Pacheco y Sampayo (1742) achieved no more.

1674-1681. Revolt of three viceroys followed imperial orders providing for their withdrawal (1673).

1674. Viceroy Wu San-kuei from Yunnan held Szechuan, Kueichou, Hunan, and Kuangsi for five years (1674–1679). Keng Ching-chung, grandson and heir of the Fukien viceroy, joined him and invaded Kiangsi.

1675. A revolt by Burni in Chahar was quickly suppressed Cheng Chin's pirates resumed depredations in Chekiang and Fukien.

1676. Shang Chih-hsin forced his aged father, viceroy of Kuangtung, to surrender Canton to the rebels

1681. Re-entrance of imperial armies to Yunnan City marked complete military triumph, supplemented by

1683. **Surrender of Formosa** by Cheng Chin's son Cheng K'o-shuang (1681–1683). Formosa was for the first time given imperial administration, as appendage of Fukien.

The Russian **Poiarkov** explored the Amur (1643–1646) and Khabarov built a fort at Albazin (1651) A mission under Baikov (1656) proved futile, but Spatar Milescu (1676) performed the kotow (*k'ou t'ou*) with dignity on a reciprocal basis, and mapped Siberia.

1689. By the **Treaty of Nerchinsk** the Russians adopted advice of the Jesuit negotiator Jean-François Gerbillon to abandon Albazin and military pressure for commercial penetration. L. V. Izmailov (1720–1721) established a trading agent and an Eastern Orthodox church in Peking

1691. The emperor, at a great assembly of Mongols at Dolon Nor, reorganized the four Khalkha states of central Mongolia which he had just defended (1690) against the provoked attack (1688) of Galdan, chief of the Olöt (West Mongol) Jungars

1696. Galdan was crushed near Urga and took poison (1697).

1705. Forcible enthronement as Dalai Lama at Lhasa of an imperial candidate aroused Tibetan opposition and appeal to the Olöt (1714).

1712. Domestic peace since 1681 and vigilant administration with frugality not only paid for foreign wars, but led to a permanent settlement of land and poll-taxes on the basis of returns for 1711.

1717. Olöt **seizure of Lhasa** by direction of Galdan's nephew, Tsewang Rabdan (1697–1727), was learned in Peking too late to save a relief column from annihilation (1718) Well-prepared armies from Kansu and Szechuan

1720. Enthroned a popular Dalai Lama and established imperial garrisons in Tibet.

1721. Revolt in Formosa led by Chu I-kuei was suppressed.

The Jesuits enjoyed toleration and favor in return for scientific services. **Schall** prepared the dynastic calendar (1645–1664) until imprisoned on representations of jealous Moslem astronomers. **Ferdinand Verbiest** (1623–1688, arr. 1659) was reinstated in control of the almanac (1669), installed a new set of instruments on the observatory (1674), and promulgated a perpetual calendar (1678). **Fontaney** cured the emperor of fever with quinine (1693). **Régis** and eight others prepared the first maps of China to be based on astronomical observation, triangulation, and measurement (1708–1718). Benefits of an edict of toleration (1692) were ruined by a bitter quarrel over Jesuit acceptance of Chinese rites toward Heaven, Confucius, and ancestors. These rites were condemned (1693) by Mgr Maigrot. Appeal to the emperor (1700) accentuated conflict of imperial and papal authority, which neither of two patriarchs, De Tournon (1705) and Mezzabarba (1720), sent by Clement XI, could reconcile. Dabbling in intrigue for succession among the twenty adult sons of the emperor won only (1722) permanent

hostility of the victor, the end of the active mission.

From his accession **Sheng Tsu** labored to win support of the scholar class by daily classical study, honors to Confucius and the Sung Neo-Confucianists (*Ju*), and patronage of scholarship He founded (1677) the **College of Inscriptions** (*Nan San So*) affiliated to the Academy of Letters. Most important among many books compiled by his order, in addition to the several administrative and archival works prescribed by precedent, were the standard *Ming History* (53 scholars appointed, 1679), *Complete T'ang Poetry* (1707), the *P'ei Wen Chai Shu Hua P'u* repertory of works on painting (1708), the *Yuan Chien Lei Han* encyclopaedia (1710), *P'ei Wen Yun Fu* thesaurus of literary phrases (1711), *K'ang Hsi Dictionary* (1716), and the *T'u Shu Chi Ch'eng* encyclopaedia (5020 vols. 1726) Private scholars were also active· **Huang Tsung-hsi** (1610–1695), the philosopher and critical historian of Sung, Yuan, and Ming philosophy, **Ku Yen-wu** (1613–1681), historical geographer and critic; **Chu I-tsun** (1629–1709) author of the critical bibliography of the classics *Ching I K'ao*, **Hsü Ch'ien-hsueh** (1631–1694), who brought together 480 vols of choice classical comment, *T'ung Chih T'ang Ching Chieh*, **Mei Wen-ting** (1633–1721), the mathematician, and many others

The most brilliant epoch in the history of the imperial kilns at Ching-te-chen followed appointment of **Ts'ang Ying-hsüan** as supervisor (1682). The techniques of enameling on the biscuit, of composite monochrome glazing over colored glaze, of application of underglaze blue in powder form, and of decoration overglaze in transparent *famille verte* enamels were perfected. Progress of the minor arts followed establishment of 28 kinds of artisans within the palace precincts (1680).

1723–1735. THE YUNG CHENG REIGN of Shih Tsung, although peaceful at home, was filled with inconclusive war against Mongols and western tribesmen

1727. **The Kiakhta Treaty** fixing the Russian frontier was concluded by Sava Vladislavitch after a mission to Peking (1726–1727).

1729. Large-scale operations against the Jungars led to

1732. Establishment of an advisory military council (*Chün Chi Ch'u*) which gradually usurped the executive functions of the grand secretariat (*Nei Ko*).

1736–1795. THE CH'IEN LUNG REIGN of Kao Tsung marks a new advance in population and wealth, which supported imposition of imperial control throughout Central Asia Cultural activity continued to enjoy imperial patronage and leadership. Corruption of the civil service led by the venal Ho Shen (1750–1799) during the last twenty years of the reign provoked revolts which continued until the end of the dynasty

1747–1749, 1755–1779. Campaigns of exceptional difficulty were waged to pacify the native tribes of the Tibetan border.

1750. Violence by and against the imperial Residents at Lhasa led to the

1751. **INVASION OF TIBET** and establishment of control over the succession and the temporal acts of the Dalai Lama

1755. **Amursana,** grandson of Tsewang Rabdan, after ten years' succession struggle, was enthroned by imperial troops as Prince of the Jungars, but revolted. Suppression of the revolt, following a smallpox epidemic, depopulated the Ili Valley. The Jungars were annihilated or dispersed.

1757–1842. Restriction of foreign maritime trade to Canton was maintained despite efforts of the British interpreter Flint at Tientsin (1759), Capt Skottowe at Canton (1761), and the Earl of Macartney at Jehol and Peking (1793).

1758–1759. **Kashgaria** was conquered by Chao-hui from the Turkish Khoja dynasty.

1765–1769. **Invasion of Burma** failed to reach Ava, but secured recognition of suzerainty.

1771. The Torgud, who had fled beyond the Volga to escape the Jungars, now dared accept an invitation by T'u-li-ch'en (1712), and migrated back to Ili.

1774. The first Chinese rebellion in nearly a century broke out in Shantung and was traced to the White Lotus Society

1781, 1784. Revolts in Kansu by Mohammedans, including the Wahabees, were suppressed.

1784. **The United States** entered the profitable Canton trade.

1786–1787. Revolt in Formosa was suppressed.

1792. **Invasion of Nepal** under Fu-k'ang-an, provoked by attack on Tashilunpo, the seat of the Panchan Lama, resulted in defeat of the Gurkhas and their recognition of imperial suzerainty.

1795–1797. Revolt by the Miao tribes of Hunan and Kueichou was suppressed.

The best critical edition of the 24 *Standard Histories* was issued by imperial authority (1739–1746) Chief among many later imperial literary enterprises was the assemblage (1772–1781) by manuscript transcription, of a select library, *Ssu K'u Ch'üan Shu* or *Complete Work of the Four Treasuries*, embracing 3462 works in 36,300 vols Seven copies were eventually distributed. The printed critical *General Catalogue* in 92 vols (1789) contains additional notices of 6734 works not included in the library The emperor exploited the occasion of compilation to expurgate from Chinese literature all derogatory references to the Manchus and their northern predecessors More than 2000 works were condemned to total destruction (1774–1782), most of them minor writings of the period 1616–1681. Contrary to precedent, two propagandist histories were compiled fraudulently to identify the Manchus as descendants of the Juchen Chin The technique of textual criticism was perfected and applied by numerous able scholars, to the classics, especially by **Lu Wen-ch'ao** (1717–1795), **Chiang Sheng** (1721–1799), and **Tuan Yu-ts'ai** (1735–1815) **Wang Ming-sheng** (1722–1797) and **Ch'ien Ta-hsin** (1728–1804) distinguished themselves as commentators on the standard histories **Pi Yuan** (1730–1797) compiled a supplement to the general history of Ssu-ma Kuang The practice of gathering choice literature of diverse kinds into uniform collections was spurred by issue from the imperial Wu Ying Tien of a series of 138 works printed from movable wooden type in 800 vols (1773–1783) **Pao T'ing-po** (1728–1814) published his *Chih Pu Tsu Chai Ts'ung Shu* in 240 vols

Under direction of **T'ang-Ying** (1736–1749) the imperial kilns at Ching-te-chen developed the elaborate *famille rose* palette of opaque overglaze enamels, which is distinguished by mixed colors and replacement of ferric oxide red by carmine derived from gold

1795. **Kao Tsung abdicated,** but continued to direct affairs until death (1798) (*Cont p* 877)

a. BURMA

Following the arrival during the 15th century of a few European travelers (Nicolo di Conti, c 1435), in

1519. The Portuguese by treaty secured trading privileges at Martaban, and an increasing portion of the foreign trade was conducted by Europeans.

1539. **Tabin Shwehti,** ruler of Toungoo (1531–1550), captured Pegu, was crowned King of Lower Burma (1542), and after extending his power northward to Pagan (1546) assumed the title of *King of all Burma*. With Portuguese mercenaries he attacked unsuccessfully both Arakan to the west and Siam to the east.

1555. His successor, **Bayin Naung** (ruled 1551–1581), took Ava, destroyed the Tai kingdom of Chiengami (1557) in northern Siam, and subdued Ayuthia (1563) temporarily Exhausted by these wars, the central power declined; in

1600. Pegu was destroyed and Burma broke up into a number of petty states

1619. The Dutch and English East India Companies opened factories, but trade did not flourish and they were closed later in the century.

1753 **Alaungpaya** reunited Burma, with assistance from the English East India Company and in opposition to the French His second successor destroyed Ayuthia (1767) and subdued Siam for a time, retaining the Tenasserim coast in Burmese possession (*Cont. p* 872)

b. SIAM

Portuguese trading stations were established in the 16th century and about the beginning of the 17th century large numbers of Japanese were active in Siam, in war and trade

1602. A Dutch trading post was established at Patani, where the British soon followed, until their withdrawal from Siam in 1623

1664 By a commercial treaty, the Dutch gained a monopoly of Siamese foreign trade, which was, however, thwarted by French intrigue, a French embassy and military expedition (1685) in turn failed to secure the acceptance of Christianity, and French influence, and led to

1688. A popular revolt which began a period of prolonged civil war.

1767. A **Burmese invasion** destroyed Ayuthia and compelled temporary acceptance of Burmese rule until

1782. **Rama I** founded a new Siamese dynasty, with its capital at Bangkok, which has ruled to the present day (1939). (*Cont p.* 872)

c. MALAYSIA

1511. The Portuguese, under Albuquerque, captured **Malacca,** the center of the East Indian spice trade. They sub-

sequently sent envoys to develop commercial relations with near-by native states, and set up fortified posts from which to dominate the trade

1594. The Lisbon spice market was closed to Dutch and English traders, thus providing an incentive to direct trade between England and Holland and the Far East The operations of the English and Dutch East India Companies (formed 1600 and 1602 respectively) led to the destruction of the Portuguese forts

1605. The Dutch seized Amboyna and in

1619. Established themselves at Batavia

1623. The English abandoned trade in Siam, Japan, and the East Indies, following a massacre of their people by the Dutch

1639. The Portuguese were expelled from Japan and finally

1641. The Dutch captured Malacca For the next century and a half they dominated the East Indies, acquiring a direct overlordship in Java

1786. The English East India Company secured a grant of Penang (permanent cession 1790), which made a fourth Indian presidency (1805), but proved useless as a naval and commercial base

(*Cont p* 875.)

5. KOREA

1506. A revolt against the cruel ruler, Yonsangun, brought to the throne

1507-1544. Chungjong, whose attempt to curb the great families by means of the Confucian scholars led to the destruction of the latter

c. **1570.** The Confucian scholars gradually established their control over the court, but, although only the orthodox Chu Hsi school of philosophy was tolerated, they broke up into bitterly antagonistic factions Meanwhile the decline of the Ming brought a similar political and cultural decline in Korea.

1592-1598 Japanese invasions laid waste the land (p 544)

1623. Injo was put on the throne by the so-called southern faction of Confucianists, which had triumphed over the northern faction These two groups were originally branches of the eastern faction, which previously had superseded the western faction.

1627. The Manchus overran Korea.

1637. Korea became a vassal state of the Manchus (Ch'ing dynasty) after an invasion led by T'ai-tsung, but the court and people remained loyal to the Ming

1675-1720. Under Sukchong the western faction of Confucianists returned to power and divided into the old and young factions, which fought bitterly with each other.

1725-1800. A period of great intellectual activity, for the most part limited to moral philosophy and to genealogical research or fabrication

(*Cont p* 885)

6. JAPAN, 1542-1793

1542 or 1543. Portuguese landed from a Chinese ship on the island of Tanegashima, off the southern coast of Kyūshū These were the first Europeans to visit Japan. They introduced the musket, which soon modified Japanese warfare Other Portuguese ships followed and entered into trade relations with the lords of western Japan.

1549-1551. ST. FRANCIS XAVIER (1506–1552), the famous Jesuit missionary, introduced Christianity into Japan, proselytizing in the feudal domains of the west and also at Kyōto, but with no great success. On the whole he was well received and in some cases the feudal lords even encouraged conversions in the hope of attracting Portuguese trade. But the dogmatic intolerance of the missionaries soon earned them the bitter enmity of the usually tolerant Buddhist clergy and led to proscriptions of the new religion in certain fiefs Xavier left behind two Jesuits and the Japanese converts, who formed the nucleus of the new church

1568. Oda Nobunaga (1534–1582) seized Kyōto and set up a puppet *shōgun*, Yoshiaki (1568–1573, d 1597) Lord of the provinces of Owari, Mino and Mikawa east of Kyōto, Nobunaga had acted in response to a secret appeal from the emperor. By this daring blow he became the virtual dictator of central Japan, and with this date commenced

1568-1600. THE PERIOD OF NATIONAL UNIFICATION (usually called the *Azuchi-Momoyama Period*). The process of political disintegration of the

nation had already run its course, and in these few decades, through the efforts of three great leaders, the nation was again united as the periphery was gradually subjugated by the military hegemons of the capital region This was unquestionably one of the most dynamic epochs of Japanese history The Japanese pirate traders were at their height and were active even in Siamese and Philippine waters. Excess national energy also expressed itself in a great invasion of Korea Closer contacts with the Asiatic mainland and with Europeans resulted in an influx of new intellectual and artistic currents Buddhism was in decline, and its monasteries were being deprived of their military power, but militant Christianity was at its height in Japan, and there was a revival of lay learning after the years of warfare New skills and new products from the Occident profoundly affected the economy of the land, and in these years of relative peace the wealth and productivity of the nation expanded rapidly The private customs barriers which had hampered trade were abolished, and the old monopolistic guilds (*za*) for the most part came to an end

The artistic and intellectual spirit of the period was almost the antithesis of what it had been in Ashikaga times It was an exuberant, expansive age Refined simplicity had given way to ostentatious pomp and faddism Architecture, which perhaps most clearly expressed the spirit of the age, showed a love of gorgeous decoration and majestic size. Castles and palaces rather than monasteries were the typical structures of the day.

1570. **Nagasaki** was opened to foreign trade by the local lord, Ōmura (sometimes dated 1567 or 1568) A hitherto unimportant fishing village, it soon became Japan's greatest port for foreign commerce

1571. **Nobunaga** destroyed the Enryakuji on Mt Hiei, thus eliminating this the most powerful of all the monasteries, as a military force In these same years he also waged usually successful wars against other Buddhist groups, especially the militant groups of the True Pure Land sect (Ikkō sect), as in the siege of their central monastery, the Ishiyama-honganji in Ōsaka (1570–1580) Nobunaga's violent opposition to Buddhism as an organized political force finally broke the temporal power of the monasteries

1576. Nobunaga commenced work on the **Azuchi castle** on the shores of Lake Biwa. This was the first great castle of Japan and heralded the beginning of several decades of widespread castle-building Azuchi was destroyed at the time of Nobunaga's death.

1577-1582. **Toyotomi** (at this time Hashiba) **Hideyoshi** (1537–1598), the brilliant but basely born chief general of Nobunaga, conquered much of western Japan from the Mōri family in the name of Nobunaga

1578. The death of **Uesugi Kenshin** (1530–1578), together with the earlier demise of his great enemy, **Takeda Shingen** (1521–1573), removed Nobunaga's two most formidable rivals in eastern Japan.

1578. The conversion of **Ōtomo Yoshishige** (Sōrin) (1530–1587), one of the greatest lords of Kyūshū, to Christianity gave the foreign religion a greater foothold in the island, where it had already become quite strong since the conversion of some lesser lords of the western littoral, like Ōmura (1562) and Arima (1576) The Christians, who were for the most part confined to the fiefs with Christian lords, were estimated at 150,000 in 1582.

1582. **Nobunaga was killed** by a discontented general, Akechi Mitsuhide (1526–1582). Hideyoshi returned from his western campaigns and destroyed Mitsuhide A contest for power with the remaining members of the Oda family, supported by **Tokugawa Ieyasu** (1543–1616), one of Nobunaga's vassal lords in eastern Japan, brought about the elimination of the Oda and an understanding with Ieyasu, resulting in

1584. The hegemony of Hideyoshi over central Japan. The preceding year he had already commenced the construction of the great Ōsaka castle as his home base

1585. **Hideyoshi** was appointed civil dictator (*Kampaku*), and two years later he became prime minister (*Dajodaijin*) as well

1585-1587. A greater stratification of the classes (1, gentlemen-warriors; 2, farmers; 3, artisans, 4, merchants) was brought about by legislation (1585, 1586) and by the disarming of the peasantry (1587).

1587. The subjugation of the Shimazu family of southern Kyūshū completed Hideyoshi's conquest of western Japan.

1587. **Hideyoshi** issued a decree banishing the Portuguese missionaries from Japan, but failed to enforce it for ten years. His motive for this sudden opposition to Christianity was probably fear of the growing political and military strength of the Christians

1590. The capture of the stronghold of the Hōjō family at Odawara induced all eastern and northern Japan to accept Hideyoshi's rule and completed the political unification of the land At this time Hideyoshi's prominent vassal, Tokugawa Ieyasu, moved his administrative and military base to Edo (the modern Tōkyō), a strategic spot for the domination of the great plain of eastern Japan.

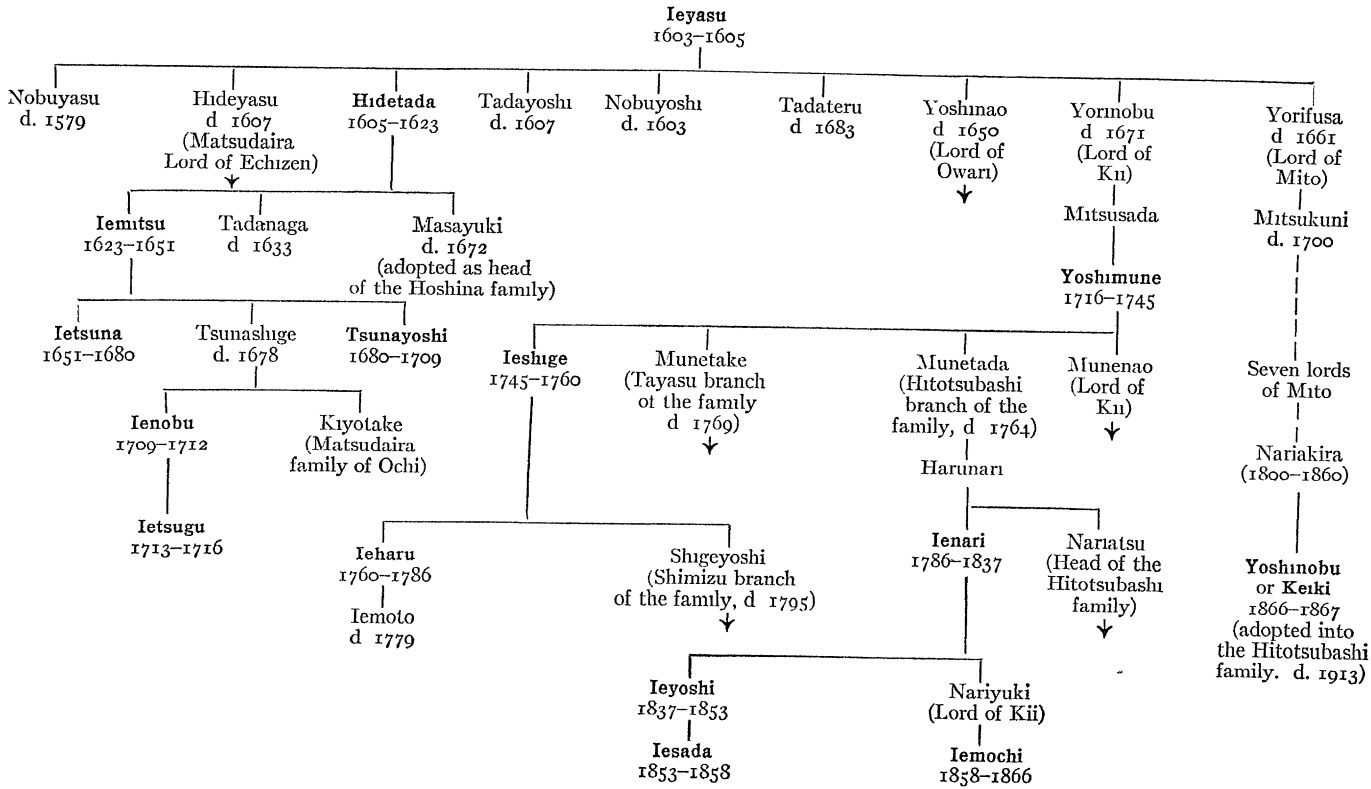
1592. **THE INVASION OF KOREA** Possibly motivated by the fear of the excess of experienced warriors in Japan, the ambitious Hideyoshi planned the conquest of China When Korea refused to grant the Japanese transit, he invaded the peninsula. Under the leadership of **Katō Kiyomasa** (1562–1611) and **Konishi Yukinaga** (d 1600) the expeditionary force of some 200,000 overran almost the whole of Korea, but was forced by a large Chinese army to withdraw to the southern coast in 1593

1597. The Korean campaign was resumed, but with no great success After Hideyoshi's death (1598) all the Japanese soldiers returned to Japan. The lasting political results of the Korean venture were negligible, but a rapid development and expansion of the ceramic industry in Japan was brought about by many Korean potters who were taken back to Japan by the retreating captains.

1597. Hideyoshi, irritated by the bickerings between the Portuguese Jesuits and the Spanish Franciscans (who had come to Japan in 1593), and suspecting that Christian proselytizing was merely an opening wedge for the subsequent conquest of Japan by the Europeans, executed 3 Jesuits, 6 Franciscans, and 17 Japanese Christians The remaining missionaries were ordered to leave, but only a small number did so Hideyoshi did not press the persecution further, because he did not wish to drive away the Portuguese traders, who were then especially welcome, since direct commercial intercourse with China had been stopped

1598. **Hideyoshi's death** was soon followed by a contest for power among his former vassals, culminating in

1600. **The battle of Sekigahara**, where Ieyasu defeated a coalition of his rivals This victory made Ieyasu the virtual ruler of the whole land, and, although he was not appointed *shōgun* until 1603, from this time is usually dated



1600-1868. **THE TOKUGAWA** (or Edo) **PERIOD.** Ieyasu established the military capital at Edo (Tōkyō), which grew phenomenally to become the economic and cultural as well as political capital of the nation Because of the fate of the Oda and Toyotomi families, Ieyasu made the perpetuation of the rule in his family his major objective, and this colored the whole spirit as well as the political organization of the epoch, giving them strong conservative and even reactionary tendencies The feudal lords were divided into the *Fudai* and *Tozama Daimyō* The former, who were the vassals and allies of Ieyasu before Sekigahara, now occupied the central provinces. The latter, who had only submitted after Sekigahara, were located in more remote regions and were usually excluded from the central government Both groups were compelled to leave hostages in Edo and to spend alternate periods there and in their fiefs Important cities were ruled directly by Edo The building and repairing of castles were strictly limited The conduct of the warriors was closely regulated, and the emperor and his court, though financially generously treated, were strictly controlled.

The administrative hierarchy, which grew out of the Tokugawa family organization, consisted in order of rank of a *shōgun*; at times, and especially between 1638 and 1684, one or more prime ministers (*tairō*); four or five elders (*toshiyori* or *Rōju*) as a council of state, a group of junior elders (*wakadoshiyori*), who controlled the direct petty vassals of Edo; a class of officials known as *metsuke*, who served as censors or intelligence officers; and a large group of civil administrators called *bugyō* The laws lacked coherent organization, but were based on certain fundamental moral precepts, primarily that of loyalty Criminal codes were severe and cruel There was a stringent stratification of the classes *Daimyō* were to a large extent autonomous rulers in their own domains, but Edo kept a watchful eye on them, and there was a strong tendency for the feudatories to adopt the laws and organization of Edo

The peace and prosperity of the early Tokugawa period brought a gradual rise in the standard of living and an increase in population as well as in the national wealth. With the growth of industry and commerce, a powerful merchant class grew up in the larger cities, and a gradual transition from a rice economy to a money economy commenced. This transition, together with the rise in living standards and the increase in population tended to make production inadequate and brought about great economic ills during much of the period.

Political conservatism and isolation from the rest of the world made the Tokugawa period outwardly stagnant, but it was inwardly a time of great intellectual develop-

The Tokugawa Shogun (1603-1867)

ment. Buddhism was in decline, and Christianity was early stamped out, but there was a great revival of lay learning, the old feudal code of conduct received definite formulation under the name of *Bushidō*, Confucian philosophy enjoyed a protracted period of unparalleled growth and popularity, philosophers and teachers of ethics abounded, there was a revival of interest in Japanese antiquity, Shintō developed new life both as a nationalistic philosophy and as a popular religion, and the newly arisen merchant class contributed greatly to the intellectual and cultural growth of the land

Literature and art in the Tokugawa period were comparatively free from Chinese influences and were less aristocratic and more popular than in earlier periods because of the influence of the merchant class A new poetic form, the *haiku*, which consists of only 17 syllables as opposed to the classic form of 31 syllables, was popularized at this time The novel enjoyed a second great period of flowering The refined *Nō* drama slowly gave way to more realistic, more exciting, and decidedly less restrained forms, the *Kabuki* and puppet plays, which both developed from long poetic recitations called *Jōruri* Applied arts reached great heights of technical excellence, but architecture was an uninspired and often debased imitation of 16th-century styles Painting was largely traditional, but there were able masters of design and an important new school of realism The most interesting development in painting was the so-called *ukiyo-e* school, a school of popular artists who chose for their subject matter, not Chinese scenes and historical events, but the people, street scenes, and landscapes of contemporaneous Japan The style was introduced in the 17th century and found its most popular expression in the prints of the great wood-block masters of the 18th and first half of the 19th centuries

c. **1602.** **The arrival of Spanish traders** in eastern Japan Ieyasu befriended Spanish missionaries, hoping thereby to persuade Spanish traders to trade directly with eastern Japan, but, although a formal treaty was negotiated with the Spanish acting governor of the Philippines in 1610, few traders ever came

1605-1623. **HIDETADA** as *shōgun* (d 1632). This was the formative period of the Edo government, first under the direction of the retired *shōgun*, Ieyasu (d 1616), and then under that of his uninspired but dependable son, Hidetada

1608. **Hayashi Razan** (1583–1657), a Confucian scholar, was appointed attendant scholar (*jidoku*) to Ieyasu This marked the beginning of a Tokugawa policy of using **Confucianism** as a stabilizing force in politics and society Razan, who founded the Edo Confucian temple in 1623, represented the orthodox Sung Confucian school of Chu Hsi (J *Shushi*), which was the orthodox school in Japan throughout the period Other schools of Confucian philosophy were those of **Wang Yang-ming** (J *Ōyomei*), of Ming China (represented by Nakae Tōju [1608–1648] and Kumazawa Banzan [1619–1691]), and the **Ancient School** (*Kogakuha*), a reformed school which returned to pre-Sung Confucian commentators (represented by Itō Jinsai [1627–1705] and Ogyū Sorai [1666?–1728]) The Japanese Confucianists made many contributions in various fields of learning and some attacked the pressing economic problems of the time

1609. **The Dutch** established a trading post at Hirado in western Japan after an invitation from Ieyasu in 1605. This invitation had been obtained by Will Adams (d 1620), the English pilot of a Dutch vessel wrecked in Japan in 1600 Adams was forced to remain in Japan by Ieyasu, who made of him an honored adviser

1612. A definite **persecution of Christianity** commenced after a series of anti-Christian edicts beginning in 1606 Ieyasu's mounting fears of the political menace from Christianity and his realization that trade with Europe could be maintained without the presence of Catholic missionaries as decoys had made him gradually abandon his at first friendly attitude toward the missionaries

1613. Cocks established an English factory at Hirado

1613. **Date Masamune** (1565–1636), a prominent lord of northern Japan, dispatched an embassy to Spain and to the pope

1614-1615. **The Siege of Ōsaka Castle.** **Hideyori** (1593–1615), the son and heir of Hideyoshi, and the former's mother, **Yodogimi** (1577–1615), had remained in the Ōsaka Castle after the battle of Sekigahara, constituting a dangerous rallying-point for disaffected elements Their ultimate destruction was deemed necessary by Ieyasu. In 1614 on a trumped-up charge he laid siege to the castle, and after a short peace captured and destroyed it and its inmates in 1615.

1615. **The Bukeshohatto,** a collection of general maxims for the warrior class, was issued.

1616. **Death of Ieyasu.**

1617. **Hidetada**, aroused by the mutual recriminations of the various European nationalities and religious associations in Japan, intensified the persecution of the Christians (estimated then at 300,000), and for the first time since 1597 European missionaries were executed Jesuits, Franciscans, and native believers were executed in increasing numbers in the following years (particularly 1622–1624) This marked the height of the Christian persecution Catholic missionaries still continued to arrive, but eventually all were killed or forced to leave or to apostatize.

1623-1651. **IEMITSU** as *shōgun* This was the period of consolidation of Tokugawa rule As means of achieving this goal the suppression of Christianity was carried to a successful end and the policy of national isolation was adopted

1623. The English voluntarily left Hirado because their trade with Japan had not proved profitable

1624. All Spaniards were driven from Japan and all intercourse with the Philippines was stopped.

1636. Japanese were forbidden to go abroad, and those abroad were not allowed to return Two years later the building of large ships was also proscribed

1637-1638. **The Shimabara uprising.** The peasants of the peninsula of Shimabara and the island of Amakusa near Nagasaki, which had been a thoroughly Christianized region for decades, rose in desperation over economic and religious oppression Some 37,000 of them defended themselves in the dilapidated Hara Castle on the coast of Shimabara for almost three months against vastly superior forces, aided by a Dutch vessel until food and musket ammunition, on which they depended, failed them They were killed almost to a man in the fall of the castle, and with this slaughter Christianity was virtually stamped out

1638. The Portuguese traders were expelled because of suspicions as to their complicity in the Shimabara uprising. When they sent an embassy in 1640 to reopen trade, almost the whole party was summarily executed This left the Dutch at Hirado and some Chinese traders at Nagasaki as Japan's sole means of contact with the outside world

1641. The Dutch traders were moved from Hirado to the islet of Deshima in Nagasaki Harbor, where they were in virtual imprisonment and were subjected to many inconveniences and indignities

1651-1680. **IETSUNA** as *shōgun*.

1651-1652. Two successive abortive *coups d'état* at Edo were the last revolutions the Tokugawa had to face until the 19th century

1657 **Tokugawa Mitsukuni** (1628–1701), lord of Mito, commenced the compilation of a *History of Japan* (*Dainihonshi*) on the model of Chinese dynastic histories Among the many scholars who aided him were Chinese *émigrés* The original task was not officially completed until 1720, and supplementary work was continued until 1906. The school of Japanese historians which grew up around this enterprise was one of the important factors in the imperial revival movement

1657 A great fire destroyed most of Edo and the Edo castle buildings

1680-1709. **TSUNAYOSHI** as *shōgun* Sakai Tadakiyo (1624–1681), prime minister at the time of Ietsuna's death, proposed to have an imperial prince succeed the heirless Ietsuna, but on the insistence of Hotta Masatoshi (1634?–1684) Ietsuna's brother, Tsunayoshi, was made *shōgun*, and presently Masatoshi succeeded Tadakiyo as prime minister. The early years of this period were characterized by vigorous administrative measures until

1684. **The assassination of Hotta Masatoshi** left Tsunayoshi with inferior counsellors who allowed him to ruin the Edo finances and to bring great hardships on the people by edicts inspired by Buddhism prohibiting the killing of any living creature and extending special protection and privileges to dogs

1688-1704. **The Genroku year period** is regarded as the apogee of the vigorous culture of the merchant class of the Tokugawa period Already by this time the warrior class was becoming mired in debt to the merchants, into whose hands the wealth of the nation was beginning to pass. Consequently, this was a time of ebullient and unsuppressed self-expression on the part of the merchant class. The centers of the gay and extravagant life of the cities were the puppet and *Kabuki* theaters and the licensed quarters, the famous Yoshiwara in the case of Edo. Among the great spirits of the age were **Matsuo Bashō** (1644–1694), who made of the *haiku* a great poetic medium; **Ibara Saikaku** (1642–1693), the author of *risqué* novels about courtesans; **Chikamatsu Monzaemon** (1653–1725), Japan's greatest playwright, and **Hishikawa Moronobu** (1638–1714), an early *ukiyo-e* master Repressive measures and a gradual amalgamation of the merchant and warrior classes in time tempered the Genroku spirit.

1703. **The Chūshingura** (called the "Forty-Seven *Rōnin*") **Incident.** Kira Yoshinaka was killed by a group of former retainers of Asano Naganori, Lord of Akō, whose execution in 1701 they felt to be Yoshinaka's fault The deed thrilled the nation, for, although they had broken the laws of the land, they were but following Confucian ethics in avenging their lord's death They were eventually ordered to commit suicide

1703. A great earthquake and fire at Edo was followed in the next five years by several other catastrophes, including the last eruption of Mt Fuji (1707)

1709-1712. **IENOBU**, as *shōgun* With the aid of the orthodox Confucian scholar, **Arai Hakuseki** (1657–1725), this able and vigorous ruler carried out a series of much-needed financial reforms

1713-1716. **The infant Ietsugu** as *shōgun*

1715. The quantity of copper allowed exported by the Dutch was greatly reduced Copper was the mainstay of the Dutch trade, but its export by them and by the Chinese was a drain on the metal resources of the land This reduction was followed later by even greater reductions and resulted in the limitation of the number of Dutch vessels calling at Japan to two a year.

1716-1745. **YOSHIMUNE** as *shōgun* (d 1751). Since Hidetada's line had come to an end the new *shōgun* was chosen from the Tokugawa house of Kii, which, with the houses of Owari and Mito, were made by Ieyasu the three Tokugawa cadet branches (*Gosanke*) from which *shōgun* were to be selected when needed. Perhaps next to Ieyasu the ablest and wisest of the Tokugawa rulers, Yoshimune attempted to revive the feudal regimentation and military virtues of Ieyasu's day and to carry through economic reforms He also encouraged scholarship in all fields, and the Confucian scholar, **Muro Kyūsō** (1658–1734), was one of his chief advisers. Despite this able leadership, economic and social ills began to become acute in Yoshimune's time. The peasants were losing the ownership of their land, and the farm population began to decline because of infanticide and movements to the towns. The military class was badly indebted to the merchants, and to save them from ruin a long series of petty laws in favor of the debtor class was commenced at this time. These economic conditions led to a mingling of the classes, which began to efface the old rigid class barriers.

1720. **Yoshimune** removed the ban on the study of Europe and on the importation of European books, exclusive of those on religion This broadminded move made possible the development of a small but vigorous group of students of Dutch and through this medium of occidental sciences, particularly medicine A manuscript Dutch-Japanese dictionary was produced in 1745, and in 1774 **Sugita Gempaku** translated a text on anatomy This early start in the occidental scientific method produced achievements in cartography and military science and proved of great value in Restoration days

1732-1733 A great famine in western Japan was met with positive measure of relief by Yoshimune

1742. The criminal law of the land was codified for the benefit of judges and administrators This codification remained the basis of criminal law during the rest of the Tokugawa period

1745-1760. **IESHIGE** as *shōgun* (d 1761) An incompetent sensualist, Ieshige made no attempt to stem the rapid administrative and economic decline which set in after Yoshimune's death in 1751

1758. **Takenouchi Shikibu** (1714?–1768), a scholar favoring an imperial restoration, and his noble disciples in Kyōto were punished by Edo

1760-1786. **IEHARU** as *shōgun* Though an able man, Ieharu was dominated by the tyrannical and avaricious **Tanuma Okitsugu** (often called Mototsugu) (1719–1788), and Tokugawa rule continued its downward course During this period peasant uprisings became frequent and serious, and they continued to be so until the fall of the Tokugawa

1783. A great **eruption of Mt. Asama** and a famine in the north came as a double climax to a series of disasters resulting in

1787. Rice riots in Edo.

1787-1793. **Matsudaira Sadanobu** (1759–1829) as head of the government for the child *shōgun*, **Ienari**, carried through a series of reforms. At this same time imperialist opposition to Edo became apparent in Kyōto and the military government became aware of the menace of the rapidly expanding European powers.

(*Cont. p.* 887)

V. THE NINETEENTH CENTURY

A. SCIENCE AND SOCIETY

1. SOCIAL THOUGHT AND SOCIAL MOVEMENTS

1776. Publication of **Adam Smith's** *Wealth of Nations*, the most influential economic treatise ever written, founding the classical school of political economy and containing the germ of nearly all economic ideas which have since appeared, even in rival systems.

1798. *The Essay on Population* of **Thomas Robert Malthus** (1766–1834), a young clergyman, propounded the stern thesis that population tends to increase more rapidly than food supply and is limited only by such positive checks as war, famine, and malnutritional diseases, or by abstinence from marriage Hence wages must sink to a subsistence level.

1817. **David Ricardo's** (1772–1823) *On the Principles of Political Economy and Taxation* set forth the famous law of "differential rent"? and explained wages as tending to seek the minimum subsistence level. His theories revealed the interests of the different social classes as far from identical and portrayed landholders as innocent but parasitical beneficiaries of the "unearned increment" Ricardian economics enjoyed an immense practical success, culminating in the adoption of free trade in England (1846). Its tenets were enthusiastically adopted by a rising manufacturing class which sought low wages and freedom from governmental interference. These doctrines were rendered more dogmatic in the writings of **James Mill** (1773–1836), **John Ramsay McCulloch** (1789–1864), and **Nassau William Senior** (1790–1864). In France they were systematized by **Jean Baptiste Say** (1767–1832), **Count Pellegrino Rossi** (1787–1848), and **Michel Chevalier** (1806–1879).

1825. *The New Christianity* of **Count Claude Henri de Saint-Simon** (1760–1825), the last work of the first eminent socialist writer of the 19th century. **Socialism** was a reaction to conditions arising from the industrial revolution and to the teaching of the classical economists. The socialists, instead of stressing the importance and self-sufficiency of the individual, urged state intervention, social planning, changes in the property system, establishment of economic and social equality, etc. Others of this school were **Charles Fourier** (1772–1837), who urged co-operative associations in rural settings (*phalanstères*), the liberation of men's passions, etc.; **Etienne Cabet** (1788–1856), whose *Voyage to Icaria* (1840) proposed an associationist scheme strongly authoritarian in character, **Louis Blanc** (1811–1882), who, in his *Organization of Labor* (1839), urged the elimination of the capitalist through the foundation of producers' associations financed by the state; **Pierre Joseph Proudhon** (1809–1865), who in numerous writings set forth a society in which justice, liberty, and equality should exist and looked forward to anarchy as the ethical ideal. Similar ideas were expounded in England by **Robert Owen** (1771–1858) **Johann Karl Rodbertus** (1805–1875) introduced the French ideas into Germany. The ideas of all these men were strongly influenced by 18th-century thought: perfectibility of man, importance of persuasion and co-operation, value of political action and universal suffrage, essential malleability of social institutions Their rationalistic outlook and their essentially unhistorical view of society, as well as curious aberrations of some of them, led Marx to dub them *Utopian Socialists*.

1841. **Friedrich List** (1789–1846), in his *National System of Political Economy*, brought the national school to full flower. Following earlier writers like **Jean Simonde de Sismondi** (1773–1842) and **Adam Müller** (1779–1829), he stressed human and particularly national welfare rather than individual wealth and propounded a theory of the relativity of economic policy, contending that each nation passes through definite stages in which different policies should be applied He declared that the German customs union should adopt a policy of protection in the interest of harmonious development of the productive forces in its existing "agricultural-manufacturing" stage, while awaiting a later development in which free trade would be feasible

1830-1842. **Auguste Comte** (1798–1857) became the founder of **Positivism,** a type of social physics describing a society rigidly governed by natural laws, with reason playing a larger rôle in societal evolution Such evolution was described in three stages: a military-theological stage; a critical-metaphysical, and a scientific-industrial stage These ideas were further developed by **Herbert Spencer** (1820–1903), who sought to interpret society in terms of principles derived from mechanics. In his *First Principles* he amassed an enormous amount of data, systematically arranged and accompanied by a more or less consistent body of theory He was properly the founder of sociology and the chief exponent of the philosophy of evolution

1848. **John Stuart Mill's** (1806–1873) *Principles of Political Economy,* the most logical and brilliant exposition of the classical economics But Mill was more sympathetic toward human suffering than his predecessors and favored a mild form of interventionism

1848. The *Communist Manifesto* of **Karl Marx** (1818–1883) and **Friedrich Engels** (1820–1895) marked the advent of "scientific socialism" Its importance at the time was slight and its basic ideas were later developed at length in Marx's *Capital.*

1862-1864. Activity of **Ferdinand Lassalle** (1825–1864),who borrowed heavily from Louis Blanc and Rodbertus and attempted to start producers' associations with state capital His importance lay chiefly in arousing and organizing the German workers and in his demonstration of the importance of political action

1864. Formation of the **First International Workingmen's Association** (*The First International*) by Marx, with headquarters first in London and then in New York It was devoted to the cause of Marxian socialism and aimed at the organization of workers in the various countries. The fall of the Paris Commune in 1871 (p. 637), which Marx had warmly supported, frightened many of the more moderate elements and generally discredited socialism. **Michael Bakunin** (1814–1876), one of Marx's supporters, was at bottom an anarchist who envisaged the abolition of all governments and the institution of an ultra-individualistic régime. But unlike earlier theorists like **William Godwin** (1756–1836) and Proudhon (see above), Bakunin was ready to hasten the advent of anarchy by every form of "direct action" including the bomb and the revolver. Marx and Bakunin broke with each other (1872) and the First International collapsed (1876). The anarchist doctrine of Bakunin was developed by **Prince Peter Kropotkin** (1842–1921), who laid more stress on the importance of the collectivist principle, which would harmonize anarchism with social realities (anarcho-communism) From its very nature anarchism could not become an organized mass movement, but during the period 1880–1900 it gained many adherents in France, Italy, Spain, and the United States, where a long series of outrages were committed.

1867-1894. **Karl Marx's** *Capital,* the basic exposition of his theory Marx held that the course of history has been determined primarily by economic factors: "The mode of production in material life determines the general character of the social, political, and spiritual processes of life" History has been punctuated by a series of "class struggles" (interpreted in terms of the Hegelian dialectic) The nobility has been overthrown by the bourgeoisie and the bourgeoisie is doomed to destruction by the proletariat, leading finally to a "classless society" The existing struggle of capital and labor was rationalized in terms of the theory of "surplus value". profit-seeking capitalists pay labor subsistence wages and take for themselves the "surplus value" which the workers have added to the product through their labor

1889. **The Second International Workingmen's Association,** founded in Paris by representatives of the socialist parties which had been founded in the various countries since 1876 Unlike the First International, it possessed no powerful central authority and was weakened by divergences of interest among the constituent organizations, especially in matters like the attainment of immediate social reform It was finally discredited by the patriotic participation of the various parties in the First World War.

1908. **Georges Sorel's** (1847–1922) *Reflections on Violence,* the main work of the leading "syndicalist" thinker. The **syndicalist movement** had succeeded the defunct anarchist movement about 1895, and was widespread in France, Italy, and Spain The syndicalists accepted the Marxian theory of the class struggle and the need for social revolution, but they insisted that the state must be destroyed (not merely captured) and that this could best be done through the general strike engineered through trade unions The future society was to be a free and flexible federation of autonomous productive and distributive associations based on collective ownership and functioning in accord with the needs of the community (more concretely each in-

dustry should be managed by the workers, organized in *syndicats*). Sorel was interested above all in the capacity of "the myth of the general strike" to moralize the workers and give them an exalted sense of solidarity in the accomplishment of their mission

1916. The *Treatise of General Sociology* of **Vilfredo Pareto** (1848–1923), a huge work of psychological analysis aiming to describe an objective social science on the basis of a distinction between the basic motivations of human nature (*residues*) and their superficial appearance or rationalization (*derivations*) The work has had a large influence on political development and on historical writing, as well as on sociology and psychology.

2. SCIENTIFIC THOUGHT AND PROGRESS

1785. *The Theory of the Earth* by **James Hutton** (1726–1797) laid the foundation of modern geology by positing the uniformitarian hypothesis of geologic causation. Impetus was given to the acceptance of the hypothesis by **William Smith** (1769–1839), who assigned relative ages to the rocks and pointed out their fossilized contents, and by **Jean Baptiste de Lamarck** (1744–1829), who classified and compared recent and fossil shells.

1786. **Luigi Galvani** (1737–1798), having noticed the contraction of a frog's leg under influence of an electric discharge, attributed this to animal electricity **Count Alessandro Volta** (1745–1827) showed that this was not so and invented the primitive primary battery.

1802. Cuneiform writing first deciphered by **Georg Friedrich Grotefend** (1775–1853), opening up a new field of historical research.

1819. Invention of the stethoscope by **René Laennec** (1781–1826), who introduced auscultation in medical practice

1821. **Jean François Champollion** (1790–1832) first deciphered hieroglyphics, making possible the modern science of Egyptology

1824. **Leopold von Ranke** (1795–1886), in his *Zur Kritik neuerer Geschichtschreiber*, completed the earlier critical work of men like **B. G. Niebuhr** (1776–1831) and laid the basis for modern historical criticism

1825. **James Mill** (1773–1836) published his *Analysis of the Phenomena of the Human Mind*, a basic work of modern psychology.

1830-1833. *The Principles of Geology* of **Sir Charles Lyell** (1797–1875), the basis of modern geology. Lyell assembled all the known facts about fossils and all available evidence of changes in the earth At about the same time **Adam Sedgwick** (1785–1873) first investigated and named the Cambrian rocks.

1831. **Michael Faraday** (1791–1867) demonstrated the fact of electro-magnetic induction and laid the foundations for three great branches of practical electrical science: electro-chemistry, electro-magnetic induction, and electro-magnetic waves.

1838. **Matthias Jakob Schleiden** (1804–1881) formulated the cell theory in physiology.

1844. An American dentist, **Dr. Horace Wells** of Hartford, demonstrated that nitrous oxide might be used as an anaesthetic

1846. Another American dentist, **Dr. W. T. G. Morton** of Boston, first used ether as an anaesthetic

1847. **H. L. F von Helmholtz** (1821–1894) first set forth the theory of the conservation of energy.

1852. **Paul Broca** (1824–1880) first localized the speech center in the brain.

1852. **Count Joseph Arthur de Gobineau** (1816–1882) in his *Inequality of Human Races* laid the basis for much later writing on race superiority.

1859. *The Origin of Species*, by **Charles Darwin** (1809–1882), the most important work of modern biology Darwin, inspired by Malthus' population hypothesis, spent twenty years in the collection of data to test his own hypothesis that species evolve through variation and natural selection of those individuals best suited to survive in given environmental conditions. Much the same theory was developed independently by **Alfred R. Wallace** (1823–1913) **Thomas H. Huxley** (1825–1898) was one of the most ardent defenders of the Darwinian theory against opponents drawn chiefly from the religiously orthodox In Germany much the same mission was assumed by **Ernst Heinrich Haeckel** (1834–1919)

1865. An obscure Austrian monk, **Gregory Mendel** (1822–1884), whose work was rediscovered much later, experimented on the cross-breeding of peas and revealed that in heredity certain characters are indivisible units. Mendel established the mechanics of heredity and introduced a "quantum conception into biology"

1865. **Joseph Lister** (1827–1912) initiated the practice of antiseptic surgery.

1869. Sir Francis Galton (1822–1911), a cousin of Darwin, applied the latter's ideas of heredity to man's mental inheritance, his statistical results pointing to the enormous importance of inheritance in relation to individual ability.

1871. *The Descent of Man* and the *Expression of the Emotions in Man and Animals* (1873), works in which Darwin raised the question of the evolution of mental powers and of morality.

1872. The *Principles of Physiological Psychology* of **Wilhelm Wundt** (1832–1920) created modern experimental psychology and devised a method of analysis.

1873. **Walter Bagehot** (1826–1877) in *Physics and Politics* made a significant contribution to social psychology, applying the principles of natural selection to the evolution of custom and institutions.

1876. **Cesare Lombroso** (1836–1909) founded the science of criminal psychology

1880. **Charles Laveran** (1845–1922) discovered the malaria germ. Sir **Ronald Ross** showed (1898) that malaria can be transmitted to birds by mosquitoes, and **Giovanni Grassi** proved (1900) that the disease is carried by the *Anopheles* mosquito

1881. **Louis Pasteur** (1822–1895) discovered the principle of immunization through vaccination against disease This followed years of experimentation by Pasteur and **Robert Koch** (1843–1910) on fermentation, which Pasteur showed to be caused by organisms, not by spontaneous generation Koch, through his studies of anthrax, demonstrated that germs were the cause, not merely the concomitant of disease

1882. **Koch** discovered the germ of tuberculosis

1883. The diphtheria germ was identified by **Edwin Klebs** (1834–1913) It was isolated by **Friedrich Löffler** (1852–1915) and a serum developed (1894) by **Emil von Behring** (1854–1917).

1884. **Koch** discovered the germ of cholera.

1885. **Pasteur** developed inoculation against hydrophobia. He also succeeded in bringing under control the costly pebrine epidemic in silkworms and developed the process of "pasteurization" of milk

1890. **Gabriel de Tarde** (1843–1904) published his *Laws of Imitation*, a pioneer work in the field of social psychology. At the same time **Pierre Janet** (1859–) opened a new era in pathological psychology, and soon afterward **Gustave Le Bon** (1841–1931) published his *Psychology of Crowds* (1895)

1892. The electron theory was formally announced by **Hendrik Antoon Lorentz** (1853–1928)

1894. The germ of the bubonic plague was discovered by **Shibasaburo Kitasato** (1856–1931) and **Alexander Yersin** (1863–1943) **Robert Koch** (1843–1910) demonstrated in 1897 that the germ is transmitted by fleas from rats

1895. **Sigmund Freud** (1856–1939) launched his first work on psychoanalysis, a study of the subconscious Different aspects of the subject were developed by **Carl Jung** (1875–) and **Alfred Adler** (1870–1930)

Wilhelm Konrad Roentgen (1845–1923) detected X-rays.

1896. Anti-typhoid inoculation was introduced by **Sir Almroth E. Wright** (1861–), after the germ had been identified (1880) by **Karl Eberth** (1835–1926)

Antoine Henri Becquerel (1852–1908) discovered that Uranium gave off rays similar to those detected (1895) by Roentgen.

1898. **Pierre Curie** (1859–1906) and **Marie Curie** (1867–1934) observed the phenomenon of radioactivity and isolated Radium

1900. **Walter Reed** (1851–1902) proved that yellow fever was transmitted by the mosquito.

Max Planck (1858–) propounded the Quantum Theory.

1901. Adrenalin was isolated by **Jokichi Takamine** (1854–1922).

1902. The disintegration theory to explain radioactivity was suggested by **Ernest Rutherford** (1871–1937) and **Frederick Soddy** (1877–).

1905. **Albert Einstein** (1879–) offered his **Special Theory of Relativity.**

1906. Vitamins were discovered by **Sir Frederick G. Hopkins** (1861–).

August von Wasserman (1866–1925) introduced the blood test for syphilis.

1910. The hydrogenation of coal to produce liquid fuels was successfully achieved.

1911. Ernest Rutherford bombarded the atom with particles discharged by radioactive substances

1912. Frederick Soddy demonstrated the existence of isotopes.

1913. An improved method of measuring the distance of stars through spectroscopic observations was developed by **Harlow Shapley** (1885–).

Typhus control was rendered possible by **Charles Nicolle** (1866–1936) who demonstrated that the disease is transmitted by lice

1920. Ernest Rutherford suggested a method for the artificial disintegration of the atom

1921. **Frederick G. Banting** (1891–1941), **Charles H. Best** (1899–), **James W. MacLeod** (1876–1935) and **James B. Collip** (1892–) perfected a technique for extracting insulin from the pancreas and purifying it for use against diabetes

1925. Collip obtained an extract of the parathyroid gland for the treatment of tetany

1926. Liver extract was utilized for the treatment of pernicious anemia

1927. **Werner Heisenberg** (1901–) propounded the principle of uncertainty to explain new phenomena observed in physics.

1930. A ninth planet, Pluto, was located

1931. "Heavy Hydrogen," an isotope of hydrogen, was detected at the Bureau of Standards at Washington and isolated at Columbia University by **Harold Clayton Urey** (1893–) in 1933.

1932. Albert Einstein offered his Unitary Field Theory.

Vitamin D was discovered

1935. The therapeutic virtue of sulfanilimide was demonstrated by **Gerhard Domagk** (1888–).

1940. The possibility of splitting the atom of U 235 was demonstrated.

1943. The United States Army adopted the new formula known as DDT as its standard insecticide

Penicillin was successfully applied to the treatment of numerous chronic diseases

1944. The total synthesis of quinine was achieved

1945. The synthesis of Vitamin A was patented

The release of atomic energy for explosive purposes was demonstrated by the use of an atomic bomb dropped on the Japanese city of Hiroshima (Aug. 8)

3. MECHANICAL INVENTIONS AND TECHNICAL ACHIEVEMENTS

c. **1770.** **JAMES WATT** (1736–1819) invented the modern steam engine and introduced revolutionary developments in the form of a separate condenser for steam economy, as well as the principle of double action. The non-condensing, high-pressure engine was the invention of **Richard Trevithick** (1771–1833) and **Oliver Evans** (1755–1819), an American.

1776. Discovery of **hydrogen gas** by **Henry Cavendish** (1731–1810), making possible the development of the balloon

1783. **Stephen** and **Joseph Montgolfier** invented the **balloon**, a paper bag filled with hot air. They made the first ascent. The Robert brothers were responsible for the first hydrogen balloon, constructed later in the same year.

1784. **The Robert brothers** developed the first **airship**, a melon-shaped hydrogen balloon of silk, having a long car suspended under it with six men using silken oars for propulsion.

1794. **The semaphore telegraph** developed by **Claude Chappe** (1763–1805). The first line was from Lille to Paris and was so successful that the system rapidly spread to other countries.

1797. **Charles Newbold**, an American, patented the **iron plow.**

1798. The first **printing press with an iron frame**, constructed by the **Earl of Stanhope.**

1802. The tug *Charlotte Dundas*, built by **William Symington** (1763–1831) was the first practical **steamboat**, equipped with stern paddle

1803. **The Fourdrinier brothers** invented the paper-making machine

1804 **Trevithick built a locomotive** and was the first to use a steam carriage on a railway

1805. **Robert Fulton built the first torpedo.**

1807. **ROBERT FULTON** (1765–1815) and **Robert R. Livingston** (1746–1813) steamed from New York to Albany in 32 hours in the *Clermont*, first **successful steamboat.**

1807. **Gas lights** first introduced in London. By 1820 much of the city was lighted

1809. **The arc lamp**, invented by **Sir Humphry Davy** (1778–1829).

1812. **Friedrich König** and **Andreas Bauer**, Saxons, and **James Bensley**, an Englishman, invented the first **cylinder press**, which was promptly adopted by the London *Times*

1814. **George Stephenson** (1781–1848) completed the adaptation of the steam engine to the railroad

1816. **Regular transatlantic service** was initiated by the *Black Ball Line*, using fast sailing ships between New York and Liverpool

1816. **The celeripede** of **Nicéphore Niepce** (1765–1833), a primitive two-wheeled bicycle propelled by action of the feet on the ground

1818. Introduction of the **use of iron in shipbuilding** (the lighter *Vulcan*, built near Glasgow)

1819. The steamer *Savannah* crossed to Liverpool, chiefly under steam

1821-1831. **Michael Faraday** (1791–1867) developed the **electric motor and generator** He was followed by **Sir Charles Wheatstone** and others

1822 **William Church** of Connecticut designed the first **type-setting machine.**

1824. **Henri J. Paixhans** (1783–1854), a French artillerist, introduced the **shell gun,** a revolutionary invention in the history of warfare

1825, Sept. 27. OPENING OF THE STOCKTON AND DARLINGTON RAILROAD in England, the world's first railway line

1826. First **all-steam crossing of the Atlantic,** by the Dutch steamer *Curaçao.*

1827 **Nicéphore Niepce** (above) secured the first **camera image.**

1829. The first **railroad opened in the United States** (Carbondale to Honesdale, Pennsylvania). The first railroad opened in **France** (Lyon–St-Etienne Line). Both used English locomotives.

1830. Opening of the **Liverpool-Manchester railroad** in England, the first to use locomotive power for traction exclusively and the first to be built for passenger traffic as well as freight. Railroads spread rapidly on both sides of the Atlantic, especially in the 1840's

1832. **SAMUEL F. B. MORSE** (1791–1872) developed the first practical **electrical telegraph,** after a large number of experiments in the preceding hundred years

1834. **Cyrus McCormick** patented the **reaping machine.**

1836. **The Prussian needle-gun,** invented by **Johann N. Dreyse** (1787–1867), made practical the breech-loading principle

1836. Introduction of the **screw propeller,** developed by **John Stevens** (1749–1838) and later applied by **John Ericsson** (1803–1889) and **Sir Francis Smith** (1808–1874)

1836. The *Balloon of Nassau*, the first large-scale balloon, which flew from London to Weilburg, nearly 500 miles

1836. Invention of the **revolver** by **Samuel Colt,** an American

1837 Introduction of the **steel plow** in America, an invention of **John Deere.**

1839 The first real **bicycle,** an invention of **Kirkpatrick MacMillan** of Dumfries

1839. Accidental discovery of the process of **vulcanizing rubber,** by **Charles Goodyear,** an American

1839. **Moritz Jacobi's rotary motor** (invented 1834) was successfully applied to a boat carrying 14 passengers

1839. **The Peninsula and Oriental Line** (*P. and O.*) established regular steamship service from England to Alexandria, to meet the ships of the East India Company coming up the Red Sea

1840. **Samuel Cunard** (1787–1865) founded the first important transatlantic steamship line

1840. The first **incandescent electric light,** invented by **Sir William R. Grove** (1811–1896)

1842 **W. H. Phillips** invented the first **helicopter** using steam power to leave the ground

1844. Morse transmitted the first **telegraph message** over a line between Baltimore and Washington The telegraph was rapidly developed after this, especially by the railroads During the 1850's most of the large cities in America and Europe were connected.

1846. **Elias Howe,** an American, patented the **sewing machine.**

1851. Introduction of the **wet collodion** process by **Scott Archer.** This revolutionized the photographic film

1851. The first successful **submarine telegraph cable** was laid between Dover and Calais. This was made possible by the introduction of gutta-percha as an insulator.

1851. **Charles Page's electric locomotive** drew a train of cars from Washington to Bladensburg, Maryland, at 19 miles an hour. The cost of batteries de-

layed the further development of the electric railway.

1852. The first practical **dirigible balloon,** driven by steam power, was built by **Henry Giffard.**

1855. The **principle of rifling** was applied to the manufacture of artillery and small arms by **Sir Joseph Whitworth** (1803–1887) and **W. G. Armstrong** (1810–1900). It increased both range and accuracy.

1857. **Henry Bessemer** developed the **Bessemer process** of making steel "without fuel," by means of an oxidizing blast

1856-1857. Development of the **dry collodion** process in photography, making possible the extension of the art to amateurs

1859. Opening of **Drake's oil well** at Titusville, Pennsylvania, marking the beginning of the commercial exploitation of petroleum

1859. The first **ironclad frigate** (*La Gloire*) built for Napoleon III by **Stanislas Dupuy de Lôme** (1816–1885)

1860. **Oliver F. Winchester** (1810–1880) introduced the **repeating rifle.**

1862. **Richard J. Gatling** (1818–1903) invented the **machine gun.**

1862. The first **engine** (Beau de Rochas cycle) **using commercial gas.**

1864. **George Pullman** built the first **sleeping car,** for use on railroads

1865-1866. After two unsuccessful attempts, two **transatlantic cables** were laid, long-distance reception having been made possible by the invention of the mirror galvanometer by **William Thomson,** later **Lord Kelvin** (1824–1907)

1865. **William Bullock** of Philadelphia invented the **web press,** using a web or roll of paper and adding speed (similar to the **Walter press** developed for the London *Times*).

1865. Using the regenerative gas furnace principle of **Sir William Siemens** (1823–1883), **Pierre Martin** (1824–1915) developed the **open hearth** process of making steel.

1865. **Pierre Lallement** developed the **two-wheeled velocipede,** the first crank-driven bicycle (the *boneshaker*)

1866. The first efficient **locomotive torpedo,** invented by **Robert Whitehead** (1823–1905).

1868. The **Scholes typewriter** was first put to commercial use.

1869. The **Westinghouse airbrake** was patented

1869. Introduction of **refrigeration in railway transportation.**

1869. First **color photography,** done by **Ducos du Haroun.**

1869, Nov. 16. Official **OPENING OF THE SUEZ CANAL,** under construction for 10 years under the direction of **Ferdinand de Lesseps** (1805–1894) This revolutionized communications between Europe and the Orient

1870-1875. The **use of steel** gradually replaced the use of iron in **shipbuilding**

1871. Introduction of the **"dry plate" process** in photography, invented by **R. L. Maddox,** who discovered the possibilities of an emulsion of isinglass, gelatine, and bromide of silver.

1872. First application of the **moving-picture principle** by **Edward Muybridge,** who recorded the progressive motion of race-horses through the use of a series of co-ordinated cameras, for Senator Leland Stanford of California

1874. The **triple expansion engine** introduced by **A. C. Kirk.** It became the normal type of marine steam engine

1875. The **rotary perfecting press** (printing both sides of a sheet at once and delivering the cut and folded newspaper in one operation) was invented by a number of printers, notably **Andrew Campbell** and **Stephen D. Tucker,** both Americans

1876. The **"safety"** (rear-wheel-driven) **bicycle,** invented by **H. J. Lawson.** This was substantially the model used thereafter

1876. **ALEXANDER GRAHAM BELL** (1847–1922) invented the **telephone.**

1876. **The Otto Silent Gas Engine** of **Nikolaus Otto** (1832–1891) introduced the principle of the internal combustion engine

1877. **Hydroelectric power** first developed at Niagara Falls. **Nikola Tesla** (1857–1943) discovered the rotating magnetic field, making possible the long-distance transmission of electric power.

1877. **Thomas A Edison** (1847–1931) invented the **phonograph.**

1878. **Edison** developed the **bipolar dynamo.**

1878. **Sidney Gilchrist Thomas** (1850–1885) and his cousin, **Percy Gilchrist** (1851–1935), developed the **Thomas-Gilchrist or "basic" process** for removing phosphorus from iron ore, thus making phosphorus ore available for steel manufacture.

1879. First **automatic switching system for telephones.**

1879. Edison perfected the **incandescent electric lamp.**

1879. Introduction of the **electric street car,** by **Werner von Siemens.** The first use in America was in Baltimore (1885)

1882. The Edison system of **central station power production** gave the first real commercial impetus to electric power production

1883. **John Carbutt** of Philadelphia introduced the coated, cut, **celluloid film** for photography

1884. The **compound steam turbine** of **Sir Charles Parsons** (1854–1931) revolutionized steam engineering

1884. **Boston and New York connected by telephone,** the beginning of long-distance transmission

1885. Invention of the **linotype** by **Ottmar Mergenthaler** (1854–1899), a German-American Invention of the **monotype** (casting single characters and assembling them in lines) by **Tolbert Lanston** (1844–1913), also an American.

1885. The first **motorcycles** introduced in France and Germany

1885. **Heinrich Hertz** (1857–1894) verified James Clerk Maxwell's prediction of the existence of **radio waves.** At the same time he discovered **photoelectricity,** fundamental to the development of television

1885 ff. The first **naval submarines** were built by **Thorsten Nordenfeldt** (1842–1920), **Gustave Zedé** (1825–1891), and **John P. Holland** (1841–1914)

1886. **GOTTLIEB DAIMLER** (1834–1900) invented the **internal combustion engine,** using gasoline He applied it chiefly to boats

1886. Introduction of **smokeless powder** and **high explosive** by the French. They were developed chiefly by **Eugène Turpin** (1848–1927) and **Paul Vieille** (1854–1934)

1887. **Edison** invented a **motion-picture machine** in which tiny pictures, mounted specially on a cylinder, in the pattern of a phonograph groove, were viewed in motion under a microscope

1887. **DAIMLER'S AUTOMOBILE,** the first successful one. The automobile was promptly developed by a host of engineers on both sides of the Atlantic

1889. Introduction of the **pneumatic rubber tire** by **John Boyd Dunlop.** This became basic for the development of the bicycle and automobile.

1889. **Panhard** and **Levassor** began to manufacture Daimler engines in France and to develop the automobile

1889. **The straight-line press,** invented by **Joseph L. Firm,** an American. The last fundamental invention in printing

1889. Edison perfected the **motion picture,** using the film on nitro-cellulose base manufactured by **George Eastman.** Edison's new "kinetoscope" was the first successful motion picture. First showings in New York (1894)

1893. **Walter Scott** designed the first **color press** for the New York *World*

1894. **Sir Hiram Maxim** (1840–1916) carried on extensive experiments with heavier-than-air machines along lines marked out by **Sir George Cayley** (1773–1853), **William S. Henson,** and **John Stringfellow** (1799–1883). Maxim designed a mammoth machine which just failed to leave the ground.

1894. The first **gasoline automobile,** a Panhard, incorporated many of the essential features of the modern car.

1895. Invention of the **Diesel engine** by **Rudolf Diesel** (1858–1913) It supplanted the earlier heavy oil engines of **Priestman** (1885) and **Hornsby-Akroyd** (1890). The Diesel engine had spontaneous ignition (no explosion) of the fuel spray under relatively constant pressure. It has been widely used, especially as a marine motor

1895. **GUGLIELMO MARCONI** (1874–1937) invented **wireless telegraphy,** sending messages one mile (1895) and soon across the Atlantic (1901)

1895. The **cinématographe** of **Louis** and **Auguste Lumière** and the **vitascope** of **Thomas Armat,** an American. These did much to solve the problem of projection of moving pictures.

1896. Invention of the **gyroscope** by **Ludwig Obry.** This was first used to give direction to the torpedo

1896 **Samuel P. Langley** (1834–1906) flew a powered airplane model 3200 feet and built a plane powered by an ingenious gasoline engine by **Charles M. Manly.** This twice failed to fly (1903), but was successfully flown later (1914)

1897. The *Avion* of **Clement Ader** (1841–1925), though it did not actually fly, was judged "capable of flight"

1897. Introduction of the **French 75 mm. gun,** designed by **Gustave Canet** (1846–1908) This was based on the quick-

firing principle and revolutionized field artillery.

1898. Alberto Santos-Dumont's (1873–1932) **non-rigid airship.** He built about 14 in all, with which he had amazing accidents and adventures Experimentation with non-rigid types came to a close with the disaster to the Italian ship *Roma* in 1922

1898. Count Ferdinand von Zeppelin introduced the principle of the **rigid airship.** His first ship was 420 feet long, with two motors The first practical one was completed in 1906 Passenger service was begun in 1910. Zeppelins were much used by the Germans in raiding England during the World War

1901. Professor Berson and Dr. Suring made an altitude record of 35,000 feet in a balloon. This was long unexceeded

1902. Invention of the **arc transmitter** by **Valdemar Poulsen.** This was of great value in the development of wireless telegraphy

1903, Dec. 17. First really successful **AIRPLANE FLIGHT,** by **Wilbur Wright** (1867–1912) and his brother, **Orville** (1871–1948) They studied gliders and developed a gasoline motor Their motor-driven plane, carrying a man, made four sustained flights at **Kitty Hawk,** North Carolina, the longest lasting 59 seconds at a speed of 30 miles per hour

1904. The first **sound moving picture.** The idea was Edison's, who had intended the kinetoscope to be complementary to his phonograph. The **cameraphone** synchronized projector and phonograph, but its popularity was short-lived

1906. Launching of the British warship ***Dreadnought,*** the first all big-gun warship, which revolutionized the construction of capital ships

1906. **G. A. Smith** and **Charles Urban** developed the first process of **motion-picture color photography** (*kinemacolor*)

1906. **Eugene Luste** invented the production of sound from photographed vibrations on a film, projected upon a selenium cell, an important step in the development of the sound motion picture

1907. **Lee De Forest** patented the **three-electrode vacuum tube,** later of great importance in the development of radio

1908. **Louis Brêguet** and **Charles Richet** built a combined helicopter and biplane, which flew 64 feet.

1909. **Henry Ford** announced that his automobile factory would thereafter manufacture only the **model T chassis.** This heralded the advent of the automobile as a universal method of individual transportation and brought it within reach of the average man

1909, July 25. **LOUIS BLÉRIOT** (1872–1936) flew a monoplane across the English Channel from Calais to Dover, in 37 minutes.

1915. **Anthony H. G. Fokker** (1890–1939), a Dutchman whose services were declined by the Allies, built for the Germans the first of his famous planes, with synchronization of machine-gun fire through a revolving propeller.

1916. **Igor Sikorsky** (1889–) developed a **twin-motored plane,** laying the foundation for multi-motored planes, essential for bombing operations and later for the development of commercial transports

1918. Development of **long-range artillery.** The German gun, *Big Bertha,* bombarded Paris at a distance of 76 miles

1919, June 15. **Capt. JOHN ALCOCK** and **Lieut. ARTHUR W. BROWN** first crossed the Atlantic in an airplane, flying from Newfoundland to Ireland, 1936 miles, in 15 hours and 57 minutes

1920. **Juan de la Cierva** designed the **autogiro** (combination monoplane and helicopter) It was first flown in 1923.

1920. First **commercial radio broadcasting,** by the Westinghouse station in East Pittsburgh.

1924. First **circumnavigation of the globe** by four United States Army **airplanes.** Elapsed time, 175 days.

1925. **Talking pictures** at last successfully introduced

1927, May 21. **CHARLES A. LINDBERGH** made the second transatlantic flight and the first continuous flight from New York to Paris, in his monoplane *Spirit of St Louis* (3605 miles in 33 hours, 39 minutes).

1927, June 29. **Lieuts. Albert F. Hegenberger** and **Lester J. Maitland** flew from Oakland, California to Honolulu (2400 miles), the longest over-water flight to that date.

1927, Oct. 15. **Capt. Dieudonné Coste** and **Lieut. Commander Joseph Le Brix** made the first east-west flight across the Atlantic, from Senegal to Rio de Janeiro.

1927. First actual **transmission of television signals** (New York to Washington) by the American Telephone and Telegraph Company.

1927. First **transatlantic telephone service** opened.

1928. The first North Atlantic east-west flight accomplished by two Germans, **Baron Gunther von Hühnefeld** and **Capt. Koehl**, and **Commandant James Fitzmaurice** (Dublin to Greeneley Island, near Newfoundland)

1928. First transpacific flight by **Capt. Charles Kingsford-Smith** (the over-water leg from Honolulu to Java, 3138 miles, was unprecedented)

1929 The German dirigible, *Graf Zeppelin* (commander, **Hugo Eckener**), circumnavigated the globe It was then put into regular passenger service from Europe to South America **Zeppelin passenger service** from Europe to the United States was opened in 1935, but was interrupted after the disastrous burning of the *Hindenburg* (1937)

1930, Sept. 2. First non-stop Paris to New York flight, by **Capt. Coste** and **Maurice Bellonte**

1931, May. Prof **Auguste Picard** ascended 52,000 feet in a balloon, the first venture into the **stratosphere.**

June. **Wiley Post** and **Harold Gatty**, Americans, **circled the globe** by airplane in 8 days, 15 hours elapsed time.

1933. **Wiley Post** alone circled the globe in 7 days, 18 hours

1933. **World distance record** for airplanes made by **Maurice Rossi** and **Paul Codos** (New York to Syria, 5657 miles, non-stop)

1935 Capt. **A. W. Stevens** set an altitude record in a **stratosphere balloon**, rising to 72,395 feet

1935. Pan American Airways established **transpacific service by airplane** from California to Manila, with connection to Hongkong Regular commercial lines had already been established to the East Indies (Royal Dutch Airlines), to Indo-China (Air France lines), to Hongkong and Australia (Imperial Airways), to Brazil (Deutsche Lufthansa), and from the United States to South America (Pan American Airways)

1937, June. V. P. Chkalov, G. P. Baidukov, and **A. V. Beliakov,** three Russian fliers, flew non-stop from Moscow over the north pole to Vancouver (5288 miles)

1937, July 14. Mikhail Gromov and two companions, all Russians, flew non-stop from Moscow over the pole to Riverside, California (6262 miles in 62 hours, 17 minutes), a non-stop distance record

1938, July 10-14. Howard Hughes, an American, with four companions flew around the world by way of Europe and Siberia, in 3 days, 19 hours and 17 minutes, averaging between 225 and 250 miles per hour

1939, May 20. Pan American Airways inaugurated regular commercial flights between the United States and Europe, by way of the Azores

4. ARCTIC EXPLORATION

a. EARLIEST EXPLORATIONS

The first known civilization within the Arctic regions appears to have been that of the **Norsemen,** who, before the birth of Christ, seem to have superseded the Finns in Scandinavia For a thousand years the Norsemen developed a rude form of political democracy and, from their own rocky coasts, ranged the coasts of western Europe.

c. 870. The Norseman, **Ottar** (Othere), claimed to have sailed around northern Norway, along the Murman Coast, and into the White Sea as far as the Kola Peninsula, in search of the walrus Thereupon King Harald of Norway declared annexed all territory as far as the White Sea. His successors made various expeditions to that region, both for trade and conquest

875-900. COLONIZATION OF ICELAND (previously discovered by Irish anchorites, see p 365)

877. Gunnbjorn Ulfsson, driven westward from Iceland, sighted Greenland

982-985. Eric the Red, outlawed from Iceland, founded a colony in **western Greenland** (c 61° N L) The Norsemen seem to have carried on sealing and whaling expeditions as far north as Disco Bay (14th-century records indicate stations as far north as 72° 55′) The settlement lasted until the 14th or 15th century.

1000-1006. LEIF ERICSSON and **THORFINN KARLSEFNI,** from Greenland, explored and tried to settle the **North American coast** (p. 365)

1194. Iceland annals record the discovery of modern **Spitsbergen** (*Svalbardi*).

In the course of seal, walrus, and whale hunting the Norsemen explored the White, Barents, and Greenland Seas and reached

Novaya Zemlya But after 1300 Norse enterprise seems to have fallen off (loss of Norwegian independence [1349] and domination of the Hanseatic League)

b. THE SIXTEENTH CENTURY

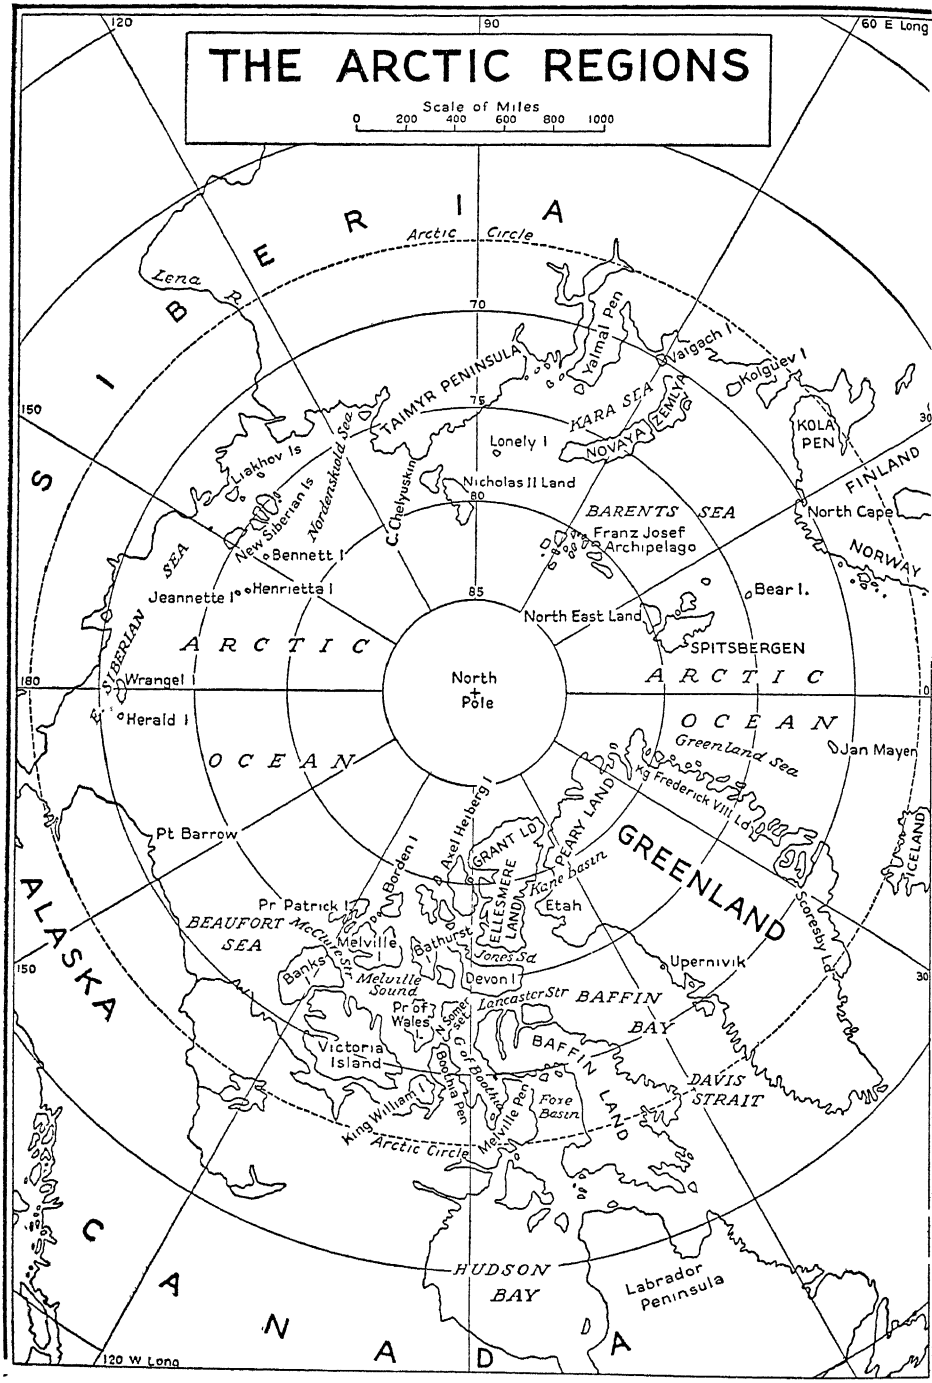
During this period the initiative in Arctic discoveries was taken by England **Bristol** had long carried on trade with Iceland and the Bristolers were therefore well acquainted with the northern routes. After the discovery of the route to India by way of the Cape of Good Hope, the English hoped to find an alternative passage to Cathay either by the northwest, around North America (rediscovered by the Cabots, 1497, see p 367), or to the northeast, around Siberia The Cabots, who were intent on finding a **northwest passage**, having failed in their quest, attention became focused on the Siberian route

1553-1554. Expedition of **SIR HUGH WILLOUGHBY** and **RICHARD CHANCELLOR.** Two of their three ships reached the Russian coast near the mouth of the Pechora River and some new land which may have been Novaya Zemlya or Kolguev Island. They turned back to winter on the Kola Peninsula, where Willoughby and all his men died. The third ship, under Chancellor, reached the site of modern Archangel, whence Chancellor made a trip to Moscow In 1554 he reached England with a letter from the tsar. One result of the expedition was the

1555. Foundation of the **Association of Merchant Adventurers** (*the Muscovy Company*), to trade with Russia The company at once took the lead in northern exploration. Chancellor left on a mission to Moscow in 1555, but was lost on the return voyage (1556).

1556. **Stephen Burrough,** one of Chancellor's men, was sent out by the Muscovy Company to find the rumored Ob River. He discovered Novaya Zemlya and Kara Strait. In 1580 Arthur Pet and Charles Jackman were sent out on a similar mission, but they got no farther than the Kara Sea.

1565. **The Dutch,** under Olivier Brunel and Philip Winterkönig (a Norwegian) became interested in the northeast route and made a trade settlement on the Kola Peninsula, followed by another (1578) near present-day Archangel. Brunel traveled overland as far as the Ob and visited Novaya Zemlya.



1576. Expedition of **SIR MARTIN FROBISHER** to find a northwest passage. Frobisher had carried on a long agitation in favor of this course and he had the support of Queen Elizabeth as well as the London merchants Frobisher discovered Frobisher Bay in southern **Baffin Land,** which he was sure was the desired passage Rumors of gold in some earth which he took back led to further expeditions in the succeeding years On the last of these Frobisher penetrated **Hudson Strait,** but was deterred from "sailing through to China" by orders to bring back loads of "gold ore"

1585-1587. Voyages of **JOHN DAVIS,** sent out by London merchants to follow up the work of Frobisher Davis landed on the west coast of Greenland at Gilbert's Sound and thence crossed the strait named for him He cruised along the Baffin coast south to Cumberland Sound, convinced that he had found the passage. Forced to turn back by contrary winds, he resumed operations the following year and followed the coast south of Labrador. In 1587 he explored the Greenland side of **Davis Strait** as far as 72° 41′ On his return voyage he followed up Cumberland Sound and passed Hudson Strait without realizing its importance

1594-1597. The three voyages of **WILLEM BARENTS** and **CORNELIS NAY.** Barents and his Dutchmen explored much of the western coast of Novaya Zemlya, while Nay sailed into the Kara Sea and reached the west coast of the **Yalmal Peninsula.** Finding the sea open beyond, he was convinced that he had found the northeast passage. In 1595 he and Barents returned and tried to get through, but in vain. In 1596 Barents struck north through the sea that bears his name, discovered **Bear Island** and sighted and named Spitsbergen, which he supposed to be part of Greenland. He rounded the north end of Novaya Zemlya and wintered at Ice Haven (the *first expedition to weather an Arctic winter successfully*). Barents died on the return voyage (1597), having laid the foundation for the lucrative Dutch whale and seal fisheries of the 17th and 18th centuries

c. THE SEVENTEENTH AND EIGHTEENTH CENTURIES

During the 17th century the English and the Dutch continued their efforts to find a passage to China not under Spanish or Portuguese control. The Muscovy Company and individual members of it promoted most of the British expeditions (notably **William Sanderson,** who supported Davis, and **Sir Thomas Smith,** first governor of the East India Company). **Richard Hakluyt's** *Voyages* (1582) and *Principal Navigations* (1598–1600) as well

as the collections of his successor, **Samuel Purchas,** were intended to preserve the records of English achievement and actually provided a great stimulus to exploration and colonization

1607-1611. Voyages of **HENRY HUDSON,** commissioned by the Muscovy Company In 1607 he set out in the *Hopewell* for China by way of the north pole. He discovered the East Greenland coast at 73°, passed thence to Spitsbergen (exploring the west coast). On the return he discovered **Jan Mayen** Island In 1608 he examined the edge of the ice pack between Spitsbergen and Novaya Zemlya in the vain search for a through passage In 1609 he made yet another attempt, this time in behalf of the Dutch East India Company Finding his way barred in the Barents Sea, he turned west to North America, where he discovered the Hudson River In 1610, with English support, he sailed through Hudson Strait and explored the eastern coast of Hudson Bay. The party wintered and on the return voyage the crew mutinied and set out Hudson and the sick and weak to perish in a small boat Hudson's Spitsbergen explorations had much to do with the development of the Spitsbergen fisheries In 1609 **Jonas Poole** was sent out from England. Having seen the whales for himself, he promptly made three more fishing expeditions In 1612 the Muscovy Company was given a monopoly over fishing in those waters. In 1613 it fitted out a large fleet under Benjamin Joseph But the English were never able to exclude the Dutch and the Danes, who finally secured the best fishing grounds on the northern shore of Spitsbergen

1610-1648. The Russian Cossacks, in the course of the conquest of Siberia, reached the Siberian north coast at the mouths of the great rivers (Yenisei, 1610, Lena and Yana, 1636; Kolyma, 1644) There is strong evidence that in 1648 a Cossack named **Simon Dezhnev** led an expedition from the Kolyma through Bering Strait into the Gulf of Anadyr

1612-1613. Sir **Thomas Button** reached the western coast of Hudson Bay and spent the winter at the mouth of the Nelson River. In the following summer he explored the shore of Southampton Island

1615-1616. Robert Bylot (a former member of Hudson's crew) and **William Baffin** explored the coasts of Hudson Strait On their second voyage they penetrated Baffin Bay and explored the coast far beyond the point reached by Davis Baffin's fine scientific observations enabled Prof. Hansteen of Christiania to draw up his *first magnetic chart*

1631. The Englishmen, **Luke Fox** and **Thomas James,** on separate expeditions, continued the exploration of Hudson Bay (extreme north and extreme southern parts).

1664. Willem de Vlamingh, in search of new whaling grounds, rounded the northern end of Novaya Zemlya and sailed east as far as 82° 10′. In the meanwhile Spitsbergen was becoming better known scientifically. In 1671 **Frederick Martens,** a German surgeon, visited the region and wrote the best historical and geographical account prior to Scoresby's work In the years 1700–1728 the **Van Keulens,** father and son, made a famous chart embodying Dutch knowledge of the Spitsbergen region.

1668. Foundation of the **Hudson's Bay Company,** under the auspices of Prince Rupert, for the purpose of trading with the Indians In 1670 the company sent out a reconnoitering expedition under Zachariah Gillan (Gillam), who wintered on Rupert's River and established a station at Fort Charles Trading stations multiplied rapidly, but exploration was badly neglected for nearly a century, the only fruitful expeditions being those sent out by the admiralty to look for a northwest passage: in 1742 **Christopher Middleton** discovered Repulse Bay and Frozen Strait; in 1746 **William Moor(e)** explored Wager Inlet

1721. Hans Egede, a Norwegian priest, touched by the story of the lost Norse colony in Greenland, enlisted the support of Frederick IV in an effort to find it. He failed, but on the other hand began the modern colonization of Greenland. With a party of 40 he founded a settlement at Gotthaab and began to convert the Eskimos Other colonists, including missionaries, followed, and, despite great hardships, multiplied the settlements and spread along the west coast Trade (skins of seal, reindeer, fox, and bear, eiderdown, whalebone, walrus tusks, and dried cod) was organized as a monopoly in private hands from 1750 to 1774, and, after it became less profitable, passed into government hands

1725. Vitus Bering, a Dane in Russian service, was dispatched by Peter the Great to explore the waters off northeastern Siberia In a series of voyages (1728–1741) he discovered **Bering Strait,** explored the Aleutian Islands, and discovered and named Mt. St. Elias on the American side.

1732-1743. Great survey of the whole Siberian coast, sponsored by the Russian government Two Russian officers in 1738 made the voyage from Archangel to the mouths of the Ob and the Yenesei In an effort to effect a passage from the Yenesei to the Lena, a journey was made (1738–1739) eastward past Taimyr Bay to Cape Sterlegov, and repeated attempts were made to round the northernmost point of Siberia by boat These efforts were blocked by the ice But in 1743 S **Chelyuskin** succeeded in making the trip by sledge **Dmitri Laptiev** in a series of voyages (1737, 1742) completed the delineation of the coast east from the mouth of the Lena to Cape Baranov

1750-1820. Height of the English whaling industry in the Spitsbergen and Greenland Seas From 1733 the introduction of bounties had infused new life into the fisheries In 1776 £5000 was offered to the first ship to pass 89° N.L. and £20,000 for making the northwest passage Outstanding among the whaling captains for exploration and scientific work were the **William Scoresbys,** father and son

1760-1768. Russian merchants of Archangel, hoping to find silver in Novaya Zemlya, sent several expeditions to the islands The first circumnavigation was by the pilot Loshkin (1760)

1770-1773. Liakhov, a Russian fur merchant, discovered three of the New Siberia Islands In 1771 he obtained from Catherine the Great monopoly of the mammoth fossil ivory of Liakhov Islands, of which he and his successors made a profitable trade

1773-1778. Exploration of the Canadian Arctic. In 1773 Capt C J Phipps was sent out to search for an opening to the north of Spitsbergen He reached 80° 48′ N L before he was stopped by the ice In

1778. Capt. James Cook, sent by the admiralty to Bering Strait to find a passage northeast or northwest from the Pacific to the Atlantic, sailed north from Kamchatka in the *Resolution* and the *Discovery*. He rounded Cape Prince of Wales, cleared Bering Strait and penetrated eastward to Icy Cape before turning west again to discover and name Cape North on the Asiatic side

d. THE NINETEENTH CENTURY

1806. William Scoresby reached a record north in the Spitsbergen region (81° 30′). In 1820 William Scoresby, Jr., published his *Account of the Arctic Regions*, which at once became the standard work

1818. The British government, at the instigation of **Sir William Barrow,** renewed the offer of £20,000 for making the northwest passage and £5000 for reaching 89° N L

1818. Capt John Ross and **Lieut. Edward Parry** set out on a twin expedition to Baffin Bay It confirmed Baffin's work and pointed the way to the subsequent lucrative whale fishery in that region Ross named Melville Bay and Cape York

1819-1820 Parry returned to northern Baffin Bay, penetrated Lancaster Sound and Barrow Strait, discovered Wellington Channel, Prince Regent Inlet, and the island of North Somerset, and finally advanced westward to **Melville Sound** and Melville Island, where the expedition wintered On the return voyage (1820) he surveyed the western coast of Baffin Bay to 68° 15′ The expedition was noteworthy for the scientific care with which it was conducted

1819-1826. Exploration by land, carried on by the Hudson's Bay Company to fill in the "missing" coastline of northern Canada The work was entrusted to Lieut. (later Sir) **John Franklin** In 1820–1821, with Dr John Richardson, George Back, and Robert Hood, he made a trip from Great Slave Lake to the Coppermine River and down the river to the polar sea They explored 550 miles of coast east to Cape Turnagain

1821. Lieut **P. F Anjou,** in Russian service, was sent out to survey the Arctic coast of Siberia At the same time **Baron Wrangel** explored the coast from Cape Chelagskoi to the mouth of the Kolyma (1820–1823)

1821-1823. Parry's second expedition, in quest of a passage at a lower latitude He spent the first winter in Hudson Bay (Winter Island) and the second among the Eskimos at Igloolik During the summer of 1821 he verified the dead end of Repulse Bay In 1822 he turned north to Fox Channel and discovered the ice-choked Fury and Hecla Strait

1822. William Scoresby, Jr., in the specially constructed *Baffin*, forced his way through the ice and reached the east coast of Greenland, which he surveyed for 400 miles (75° to 69°).

1823. Capt **Douglas Clavering** continued Scoresby's work and charted the East Greenland coast from 72° to 76°, while his associate, Capt Edward Sabine, estab-

lished for the admiralty a magnetic observatory on Pendulum Island

1824. **Parry's third expedition,** on which he hoped to follow the Fury and Hecla Strait west to Prince Regent Inlet He had to abandon the attempt when one of his ships was badly damaged

1825-1826. **Franklin's second expedition** by land He descended the Mackenzie River to the sea and advanced westward to Cape Beechey A party under Dr Richardson reached the shore between the Mackenzie and Coppermine Rivers, discovered and named Union and Dolphin Strait and Wollaston Land

1826. Capt **F. W. Beechey** led an expedition to the Arctic by way of Bering Strait, to connect with Franklin's explorations He traced the coastline as far west as Point Barrow, and narrowly missed connection with Franklin's party

1827. **Parry tried to reach the North Pole** from northern Spitsbergen, using sledge-boats, but the southward drift of the floe was too fast and the party did not get beyond 82° 45′ N L This remained the record north for fifty years

1829-1830. Capt **W. A. Graah** (Danish navy) led an expedition around Cape Farewell and explored the East Greenland coast from the extreme south as far north as 65° 18′.

1829-1833. **Capt. John Ross** and his nephew, **James Clark Ross,** embarked on a private quest for the northwest passage through Prince Regent Inlet They found their way into the Gulf of Boothia, where they wintered In 1830 James Ross crossed the Isthmus of Boothia by sledge, discovering to the west King William Land In

1831, June 1. **JAMES ROSS** located and planted the British flag on the **north magnetic pole.** The expedition remained in the Arctic until 1833 and was rescued in Lancaster Sound by a whaler.

1833. **Sir George Back** and **Dr. Richard King** made an effort to reach the Rosses overland from Great Slave Lake and Great Fish River, which they descended to the mouth Failure of supplies forced them to turn back

1837. **Thomas Simpson** and **P. W. Dease,** of the Hudson's Bay Company, descended the Mackenzie and explored the remainder of the coast westward from Cape Beechey (Franklin's farthest west) to Point Barrow In 1839 Simpson explored east from the mouth of the Coppermine to Simpson Strait and the mouth of the Great Fish River From there he went on to Montreal Island and as far as Castor and Pollux River On the return trip he explored the southern coasts of King William Land and of Victoria Land

1845-1848. **THE EXPEDITION OF SIR JOHN FRANKLIN,** in the *Erebus* and *Terror,* to seek a northwest passage by way of Lancaster Sound Franklin first tried to get through Wellington Channel, but was blocked by ice He wintered at Beechey Island, where the deterioration of a large part of the stores was discovered, restricting the expedition to two winters in the Arctic In 1846 he sailed south down Peel Sound and Franklin Strait and in the winter 1846–1847 was beset by heavy polar ice drifting on the northwest coast of King William Land In the spring a party went south as far as Cape Herschel, thus completing the **discovery of the northwest passage,** although unable to navigate its full length Sir John died in June, as did twenty-three others in the course of the following winter The rest abandoned ship (Apr 22, 1848) and started for Great Fish River According to later reports by Eskimos "they fell down and died as they walked" Not one member of the expedition survived

1847. **Dr. John Rae** closed the gap remaining in the Canadian coastline between Boothia and Fury and Hecla Strait He and his men of the Hudson's Bay Company explored 655 miles of new coast, on foot, and established the fact that Boothia is the northernmost extremity of the American continent

1848-1859. **THE FRANKLIN RELIEF EXPEDITIONS:**

1848-1849. **Sir James Ross** followed Franklin's route by way of Lancaster Sound and explored the northern and western coasts of North Somerset, never realizing, when he turned back, how near he had come to solution of the Franklin mystery

1848-1851. **Dr. Rae** and **Sir John Richardson** searched the American coast between the mouth of the Mackenzie and the mouth of the Coppermine

1850-1851. A great relief expedition was organized in various sections and dispatched by the admiralty: Capt **Horatio Austin** led a renewal of the search from Barrow Strait He found Franklin's Beechey Island camp and in 1851 sent out sledge parties on a systematic quest. Though they found no further trace of Franklin, these parties made an immense addition to geographical knowledge, for members of the expedition covered 7025 miles, of which 1225 were new land

1851-1852. Capt **William Kennedy** and Lieut **J. R. Bellot** (French Navy) were sent out by Lady Franklin to search Prince Regent Inlet They discovered Bellot Strait and turned back just before reaching Franklin's course

1850-1854. Capt **Richard Collinson** and Capt **Robert M'Clure** were sent out by the admiralty to attack the problem from Bering Strait M'Clure wintered in Prince of Wales Strait, whence he could see Banks Strait, blocked by ice Once again the northwest passage was found, but could not be navigated Collinson traced the shore of Prince Albert Land and reached Melville Island, thus connecting with previous explorations from the east He investigated also the south shore of Victoria Land, coming within a few miles of Franklin's location

1852. Capt **Edward A. Inglefield** advanced north in Baffin Bay to Smith Sound, which he correctly surmised to be a channel to the Arctic Ocean He named Ellesmere Land and explored 600 miles of new coast

1852-1854. **Sir Edward Belcher** was sent out by the admiralty on a last effort to solve the Franklin mystery from the east He and Sherard Osborn went north through Wellington Channel, discovered Belcher Channel and explored the northern coasts of Bathurst Island. A subdivision of Belcher's command, under Capt H. Kellett, spent the winter of 1852–1853 at Melville Island, whence sledge expeditions were sent out They completed the exploration of Melville Island and Prince Patrick Island.

1853-1855. An American relief expedition under **Dr. E. K. Kane** advanced up Smith Channel, wintered at Van Rensselaer Harbor, and in 1854 discovered the great Humboldt Glacier In 1855 Kane abandoned ship and retreated to the Danish settlement of Upernivik In 1860 the American **Dr. I. I. Hayes** followed the course of Kane and traveled for a week in Ellesmere Land

1854. **Dr. Rae,** exploring in the region of King William's Land, secured from the Eskimo the first information and relics of the Franklin expedition, thus winning the £10,000 admiralty award

1857. Lady Franklin sent out Capt **Leopold M'Clintock,** famous organizer of sledge operations on earlier expeditions, to complete the search His party went over the Boothia and King William Land regions, and at Point Victory and Point Felix found the records and many relics of Franklin's party In the last analysis the Franklin catastrophe resulted in the exploration of more than 7000 miles of coastline

1858-1872. **Swedish exploration of Spitsbergen.** Seven expeditions were sent to Spitsbergen and two to Greenland.

1860-1871. Expeditions of **Charles Hall,** an American He explored Countess of Warwick Land and came across the ruins of a house built by Frobisher in 1578 The years 1864–1869 he spent looking for relics of Franklin along the south shore of King William Land In 1871 he went north through Smith Channel, Kane Basin, and Kennedy Channel to Robeson Channel (82° 16′ N L)

1863. Capt **E. Carlsen first circumnavigated Spitsbergen** In 1864 Capt. Tobiesen circumnavigated Northeast Land

1868. **Prof. A. E. Nordenskiold** penetrated the pack ice north of Spitsbergen to 81° 42′

1869-1870. The Germans, inspired by Dr. A Petermann, organized a great Greenland expedition under Capt **Karl Koldewey.** He and his lieutenant, **Julius Payer** (an Austrian), explored the east coast of Greenland by sledge to Cape Bismarck in Germania Land One of the ships, the *Hansa*, was crushed by the ice and for nearly a year her crew drifted 1100 miles south on a floe, eventually landing near Cape Farewell.

1870. Nordenskiöld and Dr. Berggren explored the interior of Greenland, advancing 35 miles from Auleitsivikfjord on the west coast and reaching an altitude of 2200 feet

1871-1874. **DISCOVERY OF FRANZ JOSEPH LAND,** by the Austrians, Julius Payer and Carl Weyprecht In 1872 they sought a northeast passage around Novaya Zemlya, were caught in the ice and drifted northwest for nearly a year This brought them to Franz Joseph Land, where they wintered In 1874 they did some exploration by sledge, but ultimately had to abandon ship and return to the open sea, where they were rescued by a Russian schooner

1875-1876. The British, under **Sir George S. Nares,** resumed the effort to penetrate the northwest passage From Smith Sound they entered Lady Franklin Bay, where one ship wintered The other wintered in Robeson Channel. In 1876 **Albert H. Markham,** of the expedition, reached a new record north (83° 20′ on May 11) Another member, Lieut. Aldrich, explored the north coast of Ellesmere Land to Cape Columbia, while Lieut Beaumont

followed the north coast of Greenland to Cape Britannia

1876. Foundation of the Danish committee for the geographical and geological investigation of Greenland This committee stimulated popular interest and sent out many expeditions

1878. **The Dutch,** under **Koolemans Beynen,** began sending out annual expeditions in the specially constructed *Willem Barents* to make scientific observations in the Spitsbergen area

1878-1879. **NORDENSKIÖLD** for the first time made the **northeast passage** in the *Vega* Rounding the northernmost point of Siberia (Cape Chelyuskin) on Aug 19, 1878, he was frozen in and obliged to winter on shore The voyage was completed in the next year, Bering Strait being reached on July 20, 1879

1879-1881. The American expedition of **Lieut. G. W. de Long** in the *Jeannette*, financed by Gordon Bennett The purpose was to explore the northern coast of Siberia from Bering Strait The ship was crushed in the ice and sank (June 13, 1881) De Long and most of the party perished, but a few reached the coast by way of the New Siberian Islands, two northern outliers of which group, Jeannette and Henrietta Islands, were discovered by this expedition

1880. **Leigh Smith,** an Englishman, reached Franz Joseph Land from Spitsbergen and explored the southern coast, naming it Alexandra Land In 1881 his ship sank and the party, after wintering, made its way to Novaya Zemlya in small boats

1881. Lieut Berry, sent out to search for De Long, landed on Wrangel Island (sighted and named by Kellett in 1849) and explored it

1882. **Establishment of international polar stations,** an idea put forward in 1875 by Weyprecht and promoted at the polar conferences of 1879–1880 Norwegians, Swedes, Danes, Russians, Dutch, British, Germans, Austrians, and Americans agreed to co-operate The Dutch were unsuccessful in establishing a station at the mouth of the Yenesei, but the other expeditions carried out their assignments An American mission, under **Lieut. A W. Greely,** carried on observations in Lady Franklin Bay for two years (1881–1883) Greely explored the north coast of Greenland and reached a new record north (83° 24′) at Lockwood Island In 1882 Greely penetrated Grinnell Land, discovered Hazen Lake and sighted a fjord to the southwest In 1883 Lieut **James Lockwood** crossed Grinnell Land to Greely Fjord Relief ships having failed to arrive, the party had to winter in Smith Sound All but six of the party of 24 were dead of starvation when the relief ships arrived in June, 1884

1883 **Nordenskiöld** penetrated 84 miles into the interior of Greenland, reaching an altitude of 5000 feet

1886 **Lieut. Robert E. Peary** advanced 50 miles inland from Disco Bay and reached an altitude of 7500 feet

1888 **FIRST CROSSING OF GREENLAND,** by **Dr. Fridtjof Nansen, Otto Sverdrup,** and five others From near Kjoge Bay on the east coast they covered 260 miles of glacier on skis, reaching an altitude of nearly 9000 feet and striking the west coast near Gotthaab

1892 **Peary** made a 1200-mile dog-sledge journey from Inglefield Gulf in northwest Greenland, north and east over the inland ice to Independence Fjord and back again

1893-1896 **EXPEDITION OF NANSEN** in the *Fram* Surmising that there was a drift across the polar basin, Nansen decided to be frozen in and travel with it With Sverdrup he entered the pack off the New Siberian Islands in Sept 1893, drifted northwest until Nov 15, 1895 Thence the ship moved southward until it broke free off northern Spitsbergen (Aug 1896) The ship reached 85° 55′ N L in the summer of 1895, but Nansen and Hjalmar Johansen in March left the ship and traveled north with skis and dog-sledges, reaching a record north of 86° 14′ on Apr 7 Realizing the hopelessness of reaching the drifting ship, they made for Spitsbergen, wintered at Frederick Jackson Island (one of the newly discovered Whiteland Islands) In the spring of 1896 they were picked up by the relief ship *Windward.*

1894-1897. **The Jackson-Harmsworth expedition** to Franz Joseph Land reached 81° 19′ N L and surveyed a number of islands Jackson covered about 600 miles of new coastline and demonstrated the complexity of the archipelago A number of other expeditions continued the investigations (E Baldwin, 1898, W Wellman, 1898, 1900, discovered Graham Bell Island, W Ziegler, 1901, 1903–1905, reached 82° 4′ N L.).

1897. **S. A. Andrée,** a Swedish flyer, undertook a balloon flight northeastward from Spitsbergen His decapitated body was found on White Island in Barents Sea in 1930, with a diary which revealed that the balloon had come down on the ice pack after 65 hours and that the party

had reached White Island, where all had perished

1897-1898. Sir Martin Conway carried on extensive exploration in the interior of Spitsbergen, as did also Dr A G Nathorst

1898-1902. Capt Otto Sverdrup in the *Fram*, blocked by ice in his effort to circumnavigate Greenland, made several journeys over Ellesmere Land, discovering its western coast In 1899-1902 he explored and mapped that part of the Arctic Archipelago which had not been reached by Franklin and his successors He discovered Axel Heiberg Islands Altogether this expedition charted 1750 miles of coast line

1899. The Russian admiral, Makarov, arranged a trial trip into the ice off Spitsbergen, using the great ice-breaker *Yermak* Though unsuccessful he paved the way for later development of the ice-breaker

1899-1900. Expedition of the **DUKE OF THE ABRUZZI** to Franz Joseph Land From Rudolf Land his lieutenant, Capt. **Umberto Cagni**, led a dog-sledge party on a 753-mile trip and reached a new northern record of 86° 34′ N L (200 miles from the pole)

1900. **G. C. Amdrup** made a survey of the East Greenland coast from Scoresby Sound south to Angmagssalik, thus completing the discovery and mapping of this coast from Cape Farewell north to Cape Bismarck

1900. **Peary,** from his base in Lady Franklin Bay, made a journey along the northern coast of Greenland, rounding the northernmost point and reaching Cape Wyckoff, where he built a cairn (82° 57′ N L) He made an effort to advance over the frozen sea to the north, but found the ice too rough

e. THE TWENTIETH CENTURY

(1) *Conquest of the Pole*

1901. **Peary,** discouraged with Greenland as a taking-off place for the pole, tried a route from Ellesmere Land, but was again blocked by rough ice.

1905-1906. Peary, with **Capt. Robert Bartlett,** went by ship to northern Grant Land and thence westward by sledge to Cape Hecla. From there he claimed to have reached 87° 6′ early in 1906. The claim is questioned by many geographers, since Peary was the only white man in the final party and because the record is unsatisfactory.

1907-1908. **Expedition of Dr. F. A. Cook.** He followed a route discovered by Sverdrup (from Cape Sabine across Ellesmere Land and north along the coast to the northern tip of Axel Heiberg Island)

1908, Apr. 20. **Cook** claimed that he reached the pole on this date Experts regard the claim as improbable, though not impossible His observations were fuller than Peary's, but not very good His chronological table of distances was entirely reasonable The claim has not yet been accepted by authoritative opinion

1909. Apr. 6 **Peary** claimed to have reached the pole on this date, from Cape Columbia, the northernmost extremity of Grant Land. Though popularly accepted, the claim is questioned by some experts because of the inadequacy of the observations and the incredible time-table submitted Possibly neither Cook nor Peary actually reached the pole.

No further progress in polar exploration was made until the aeroplane began to open up new possibilities

1925, May. **Roald Amundsen** (Lieut Riiser-Larsen as pilot) and **Lincoln Ellsworth,** in two flying-boats, flew from King Bay, West Spitsbergen, to 87° 43′ N L, where they landed With great exertion and delay they finally got one of their craft into the air again and managed to return

1926, May **COMM. RICHARD BYRD** and **FLOYD BENNETT** flew from King Bay and reached the pole (May 9) Using the Fokker monoplane *Josephine Ford*, they covered the 750 miles and return in 15 hours

1926, May. **ROALD AMUNDSEN, GEN. UMBERTO NOBILE,** and **LINCOLN ELLSWORTH,** forestalled by Byrd in their effort to reach the pole first, took off in the dirigible *Norge* to fly from King Bay across the pole to Alaska. They landed safely near Nome, having sighted no land in the Beaufort Sea area

1928, May. **Nobile,** in the dirigible *Italia*, made a number of flights from King Bay, one of which (from Cape North around the northern end of Franz Joseph Archipelago, southeast toward Severnaya Zemlya and back over the northern end of Novaya Zemlya and Northeast Land) covered almost 20,000 square miles of unexplored regions No new land was seen The last flight was made (May 24) over northeastern Greenland to the pole. On the return flight the ship encountered a storm and crashed on the ice. Among many relief expeditions, Amundsen's ended disastrously in Barents Sea Amundsen was lost. The

Italia survivors were rescued by other planes and by the Russian icebreaker *Krassin*

1937. May 26-1938, February 19. A SOVIET POLAR STATION organized by Prof Schmidt, and consisting of four members, was transported by plane to a floe near the pole (89° 26′ N.). Oceanographical and meteorological observations were taken over a period of nine months After seven months the drift became strong and ultimately carried the party to the east coast of Greenland

1937, June Three Russian aviators (V P Chkalov, G. P Baidukov, and A V. Beliakov) flew non-stop from Moscow over the North Pole to Vancouver

1937, July 14. Mikhail Gromov and two companions, all Russians, flew non-stop over the pole from Moscow to Riverside, California (6262 miles in 62 hours 17 minutes, a non-stop distance record)

(2) *The Canadian Arctic*

1903-1906. Capt. Roald Amundsen navigated the northwest passage by way of the east coast of King William Land, spending two winters at Petersen Bay and charting the coast of Victoria Land Proceeding westward in 1905, he was frozen in and spent the winter at King Point, but in Aug. 1906, he finally reached Bering Strait. This was the **first time a ship passed from sea to sea.**

1906-1908. The Anglo-American Polar Expedition, led by Einar Mikkelsen and Ernest Leffingwell, with V. Stefansson, took soundings in Beaufort Sea, but discovered no land

1908-1910. THE CANADIAN GOVERNMENT took formal possession of all islands to the north of the continent. Capt. **J. E. Bernier,** sent out by the government, formally annexed Banks and Victoria Islands In 1910 he failed to make the northwest passage by way of Melville Island, but surveyed the west coast of Baffin Land

1908-1912. Stefansson and Dr. R M Anderson made an extensive study of the Eskimos in the Mackenzie Delta region

1913-1917. Donald B. MacMillan led the Borup Memorial Expedition to Ellesmere Land From a base at Etah observations were made over a period of four years and a permanent meteorological station was established In 1914 MacMillan traveled 1200 miles across Ellesmere Land and Axel Heiberg in search of Peary's Crocker Land, which was found not to exist. In 1915 W. E. Ekblaw made an equally extensive trip to explore northwestern Grant Land, where he found numerous ruins of Eskimo houses MacMillan in 1916 attempted to explore King Christian Island, but was frustrated by a blizzard

1913-1918. Stefansson led the **Canadian Arctic Expedition,** one section of which made observations for three years in the Coronation Gulf district, while the other, in command of Stefansson, was beset off northern Alaska One of the ships, the *Karluk*, was driven westward in a gale and was wrecked near Wrangel Island Capt Bartlett made his way to the mainland and eastward 700 miles to Alaska Stefansson himself remained in the field for four years and continued his investigations in a series of remarkable sledge journeys in the vicinity of Banks Island and Melville Island. Many smaller islands were discovered

1921-1924. Knud Rasmussen, with two companions, carried out a 20,000-mile expedition across Arctic America by way of Fox Channel, Hudson Bay, King William Land, Coronation Gulf, and the Mackenzie Delta to Alaska The results of this expedition, primarily ethnological, are laid down in Rasmussen's study of the Eskimos, *Across Arctic America* (1927)

1922- The Canadian government established an **annual police patrol** of the islands and opened a large number of government stations designed for observation, exploration, and the development of the Eskimos. The discovery of a navigable steamship lane through the Mackenzie Delta has led to the development of this waterway as an outlet for the products of the interior Aerial surveys have become a regular part of government activities

1934- J. M. Wordie led two **Cambridge University expeditions** to West Greenland, Baffin Land, and outlying islands

1934-1935. The Oxford University Ellesmere Land Expedition organized by **Edward Shackleton,** son of the famous antarctic explorer, and led by **Noel Humphreys,** made a sledge journey from Etah to northern Grant Land where the British Empire Mountains were discovered The expedition explored Grinnell Land, the eastern coast of Ellesmere Land, and Scoresby Bay

1936- The British-Canadian Arctic Expedition, under T. H. Manning, carried out scientific surveys around South-

ampton Island, Repulse Bay, and Melville Peninsula.

(3) *Greenland*

1905. **The Duke of Orleans** in the *Belgica* traced the northeastern coast from Cape Bismarck to a new northern point (78° 30′, Duc d'Orléans Land)

1906-1908. **L. Mylius-Erichsen** led a Danish expedition from near Cape Bismarck to Northeast Foreland. It was discovered that Greenland extended much farther east than appeared in Peary's chart A party under Lieutenant **J. P. Koch** advanced to the northwest and connected with Peary's earlier explorations, thus completing the discovery of the entire Greenland coast. Mylius-Erichsen and another party were lost on a return trip from Peary's Navy Cliff. His body and part of the records were discovered the next spring by Koch

1909-1912. **Einar Mikkelsen** led an American expedition to search for records of Mylius-Erichsen and to settle the question whether Peary Channel was really a channel or a fjord In 1910 he made a 1400-mile sledge journey from Shannon Island to Danmark Fjord, where he found Mylius-Erichsen's statement that Peary's Channel does not exist On return to Shannon Island, he found that his ship had been crushed and the rest of the expedition taken home in another boat. He and his party spent two more winters alone before being rescued

1912. **Knud Rasmussen** made two crossings of interior Greenland, the first eastward from Inglefield Gulf to Danmark Fjord, whence he explored Peary Land and Independence Fjord Finding that Peary Channel did not exist, he was obliged to make a second crossing from Navy Cliff to Inglefield Gulf

1912. **Dr. de Quervain,** a Swiss scientist, crossed Greenland from Disco Bay to Angmagssalik, discovering the lofty mountain chain which contains Mt. Forel

1912-1913. **J. P. Koch** and **Dr. Alfred Wegener,** a German, after spending a winter on the inland ice at an altitude of 4000 feet, led a party on the long 700-mile crossing over the unknown middle part of Greenland. They reached an altitude of 9500 feet

1917. **Rasmussen,** with two Scandinavian scientists, explored a number of fjords in northern Greenland in an attempt to find the northwest outlet of Peary's Channel.

1917. Denmark strengthened her claim on Greenland by treaty with the United States, ceding the Virgin Islands in settlement of American claims to areas discovered by Peary

1919. Foundation of the **Danish East Greenland Company.** This led to the establishment of trapping stations at Danmark Harbor and Germania Harbor and later at other places

1920-1923. **Lauge Koch** led a Danish expedition to northern Greenland to complete the survey of Peary Land. Extensive investigations were carried on over a period of years.

1921 **Denmark proclaimed sole sovereignty** over the whole country and closed the coasts to foreigners. The Norwegians, however, continued to press a long-standing claim based on original discovery and settlement by the Norsemen.

1924 **Greenland Agreement** between Denmark and Norway, providing that, until 1944, Norwegian hunters and landing parties should suffer no restrictions on the east coast between 60° 27′ and 81°, except at Angmagssalik and the new Eskimo colonies around Scoresby Sound Similar concessions made to the British **Greenland became a crown colony of Denmark,** which exercises a trade monopoly and has undertaken a paternalistic program to preserve Eskimo culture

1925. **Richard Byrd** and **Floyd Bennett** made several trial flights from Etah northwest over Ellesmere Land and over East Greenland, surveying more than 30,000 square miles

1926, 1929. **J. M. Wordie** led two Cambridge University expeditions to East Greenland, mapping in detail a large area of mountains and glaciers around Clavering Island. On the second expedition Petermann Peak (9600 feet) was ascended

1926-1927, and 1931-1934. **Lauge Koch** continued the Danish government surveys from Scoresby Sound northward. Four winter stations were established with radios, and various air surveys were carried out. A large group of scientists carried out an ambitious program of research.

1930. Capt **Ahrenberg** made an airplane flight from Sweden to Angmagssalik In August of the same year **Wolfgang von Gronau** flew over the southern end of Greenland and landed at Ivigtut on his way from Iceland to the United States.

1930-1931. The German Inland Ice expedition under Dr Alfred Wegener established parties at Scoresby Sound and at Kamarujuk Bay (West Greenland) and set up meteorological stations for winter observation The expedition made some use of propeller-driven sledges and echo-sounding apparatus for measuring the thickness of the icecap

1930-1932. The British Arctic Air-Route Expedition, led by twenty-three-year-old **H. G. Watkins,** established a base west of Angmagssalik and set up a weather station at an altitude of 8000 feet Much of the coast was photographed from the air, and the lofty Watkins Mountains were discovered In 1931 a party climbed Mt. Forel (11,100 feet). Another party crossed the icecap to Ivigtut, while yet another section crossed by a more northern route to Holsteinsborg Watkins, with two companions, made a boat trip around the southern coast of Greenland carrying out careful surveys In 1932 Watkins returned to East Greenland and disappeared in the region around Lake Fjord, probably drowned

1931, Aug. Von Gronau made a second and much longer flight over the Greenland icecap from Scoresby Sound to Sukkertoppen

1931, July 10. Norway formally annexed the coastal region north of Scoresby Sound, calling it *Erik the Red's Land* After protests by Denmark the matter was referred to the Hague Court which decided in favor of Danish sovereignty (Apr 5, 1933)

1932-1933. The Danish Scoresby Sound Committee undertook large-scale aerial photography Mikkelsen and Rasmussen worked out a technique for rapid mapping of large areas which was applied by the Danish Air Survey in 1933 both in East and West Greenland

1934. Martin Lindsay led the **British Trans-Greenland Expedition** from Disco Bay to the west slope of the Watkins Mountains, following the range southward for 350 miles The expedition traversed one of the largest "blank spots" and reached an icecap altitude of 10,400 feet

1935-1936. The Oxford University Greenland Expedition, under **H. Hayward,** continued extensive investigations in West Greenland In 1936 a second expedition under **Peter Mott** extended the survey

1935. A. Courtauld, a former companion of Watkins, scaled the highest known peak in the Arctic (about 12,200 feet) in the Watkins Range

(4) *The Spitsbergen Area*

1907-1920. Dr. W. S. Bruce in a series of six expeditions made a complete cartographical, geological, and zoological survey of Prince Charles Foreland In addition he staked a mining claim on which the Scotch Spitsbergen Syndicate was founded (1909), and took an active part in developing the mineral resources of the country

1911. Count Zeppelin in the *Mainz* set up a German meteorological station at Ice Fjord At the outbreak of the World War it was turned over to the Norwegian government, which moved it to Quade Hook

1912. Lt. Schroeder-Stranz led an expedition to the north coast of Spitsbergen on which he and about half the participants lost their lives

1921-1924. A series of three Oxford University expeditions, largely promoted by **George Binney,** initiated the University School of Explorers, composed largely of undergraduates and professional scientists In Spitsbergen these expeditions carried out extensive scientific investigations, as they did in Greenland Great attention was devoted to little known Northeast Land In 1924 Binney introduced a seaplane for geographical exploration and succeeded in making many aerial photographs

1923. Lt. Mittelholzer, a Swiss aviator, made a successful 500-mile flight over Spitsbergen and Northeast Land

1925. Norway acquired sovereignty over the Spitsbergen Archipelago and Bear Island, the whole area becoming officially known by the old Norse name *Svalbard* Since 1906 the government has supported annual surveying cruises, mostly under the leadership of Prof **Adolf Hoel.** Since 1911 meteorological and other stations have been established and in 1936 aerial mapping was begun Svalbard has a great deal of high-grade coal which is being exploited by Swedish and Russian companies whose pre-existing claims were accepted by Norway as a condition of her sovereignty

1925. A British Arctic expedition, under Grettir Algarsson and Comm. F. A Worsley, carried out soundings and other investigations between Spitsbergen and Franz Joseph Land

1925. Beginning of the polar flights of Amundsen, Byrd, Nobile, etc, which all started from King Bay (p. 566).

1931. **The Norwegian-Swedish expedition** to Northeast Land, under Prof. **H. Ahlmann,** carried out a sledge tour over the inland ice and made many valuable scientific contributions

1933-1936. **Two Oxford University expeditions,** led by **A. R. Glen,** concentrated on the little known New Friesland icecap in West Spitsbergen, explored and mapped the greater part of the interior, and carried on extensive biological researches The second expedition (1935–1936) went to Northeast Land and carried out the most comprehensive scientific program of any British Arctic expedition Two observation stations were maintained on the inland ice throughout the winter

(5) *The Russian Arctic*

The development of Siberia and the need for better communications with the Far East served as an important stimulus to Arctic work

1910. The government inaugurated annual hydrographic cruises along the Siberian coast by the ice-breakers *Taimyr* and *Vaigach,* and between 1912 and 1914 established five meteorological stations in the Arctic

1912. **Three Russian expeditions** to Franz Joseph Archipelago and Novaya Zemlya all met with disastrous ends Lieut Sedow spent two winters off northern Novaya Zemlya and perished in the effort to reach the pole in 1914

1913. **Capt. B. Vilkitski,** in an attempt to navigate the northeast passage from east to west, discovered several new islands of the New Siberia group and, above all, the new and extensive Severnaya Zemlya (North Land), about 50 miles north of Cape Chelyuskin

1914–1915. **Capt. Otto Sverdrup** first used radio successfully in the Arctic, communicating with the ice-breakers off Cape Chelyuskin.

1915. Vilkitski arrived at Archangel, having completed the east-west passage

1916. **The Russian government annexed Franz Joseph Land** (claimed by Austria after the discovery in 1873) At the same time the government claimed Wrangel Island, Henrietta Island, and Herald Island, all discovered by Americans in the late 19th century

1918–1925. **Capt. Roald Amundsen,** with **Dr. H. Sverdrup,** in the specially built *Maud,* navigated the northeast passage and spent two winters (1918–1920) in the ice preparatory to his projected drift over the pole. The drift was carried out in 1922–1925, nearly duplicating that of the *Fram,* but without important geographical results

1921. **Stefansson** attempted to plant a British colony on Wrangel Island, which he regarded as a possible future air base Most of the colonists died before they could be relieved in 1923

1921. **Prof. R. Samoilovich,** of the new *Institute for the Exploration of the North* (founded 1921), initiated the annual exploration cruises into the Barents Sea, Kara Sea, and Russian Arctic

1923-1929. Prof Meschachev led a series of cruises to the Franz Joseph Archipelago for the *Moscow Scientific Maritime Institute*

1924. **The Soviet government** founded a colony on Wrangel Island, which has been maintained ever since

1924. The government created the *Islands Administration of the U.S.S.R.* and placed Novaya Zemlya, Kolguev, and Vaigach under its jurisdiction

1925-1928. Prof S. V Obruchev explored the practically unknown territory between the Kolima and Indigirka Rivers, discovering some very high mountain ranges

1926 **The Soviet government** hoisted the flag over Herald Island, and, after Amundsen's flight in the *Norge,* claimed all lands and islands that might be discovered north of Russia and Siberia by flight across the Arctic

1927. The Soviet established a permanent station on the New Siberia Islands. **First Russian hydroplane flight** from Cape North to Wrangel Island

1929-1931. Samoilovich and Prof Otto Schmidt carried on extensive exploration in the Franz Joseph Archipelago and about Severnaya Zemlya

1931. The German dirigible, *Graf Zeppelin,* commanded by **Dr. Hugo Eckener,** cruised over the Franz Joseph Archipelago, Severnaya Zemlya, the Taimyr Peninsula, and unexplored parts of northern Novaya Zemlya.

1932. **The Soviet government** claimed Victoria Island, though this is generally regarded as part of the Spitsbergen group

1932. Prof Schmidt, in the ice-breaker *Sibiriakov,* made a record passage by the northeast route from Archangel

(July 28) to Yokohama (Nov 5), that is, 3000 miles in 9 weeks. It was the first time the passage had been made in one season Since then at least one ship has gotten through each year. In 1936 fourteen ships made the passage

1932. The government established a **polar radio station** on Prince Rudolf Land, in the Franz Joseph group

1932. **Prof. N. N. Zubow** first circumnavigated the Franz Joseph Archipelago

1935. Foundation of the **CENTRAL ADMINISTRATION OF THE NORTHERN SEA ROUTE** by the Soviet government This was a chartered company entrusted with the exploration and development of all Soviet territory north of 62° Under Prof. Schmidt it employed about 40,000 people The extensive new program included navigation of the great Siberian rivers and building of ports at their mouths (to be kept open by ice-breakers), establishment on the coast of permanent stations (there were 57 in 1936) with radio and other scientific equipment, maintenance of planes for reconnaissance of ice conditions, etc , charting of coasts and currents (warm currents discovered along the edge of the continental shelf in 1935), construction of a railway from the Yenesei to the Dudinka and Norilsk mining regions (coal, nickel, platinum, and copper), agricultural stations to develop a food supply for colonists (work on rapidly maturing wheat, etc), education and development of the natives, and protection of reindeer herds, etc

1937, May-1938, Feb. **ESTABLISHMENT OF THE SOVIET POLAR STATION** near the North Pole (p. 567)

1938. The Administration of the Northern Sea Route, like many other branches of the Soviet government, was subjected to a drastic "purge." Prof. Schmidt and many other leading officials were removed and imprisoned, but some of them were later reinstated. Russian activity in the Arctic continued

5. ANTARCTIC EXPLORATION

A legend dating from Greek antiquity and supported by Ptolemy related to the existence of an enormous continent in the southern hemisphere This land-mass is shown by mediaeval cartographers, and even on maps as late as the end of the 16th century, on many of which it is extended to tropical latitudes in each of the three oceans A series of voyages in southern latitudes during the 15th, 16th, and 17th centuries (Da Gama, 1497, Magellan, 1520; Drake, 1579; Tasman, 1642, and others, who were blown southward from their courses) progressively reduced the possible area of this legendary continent by pushing its limits farther and farther southward

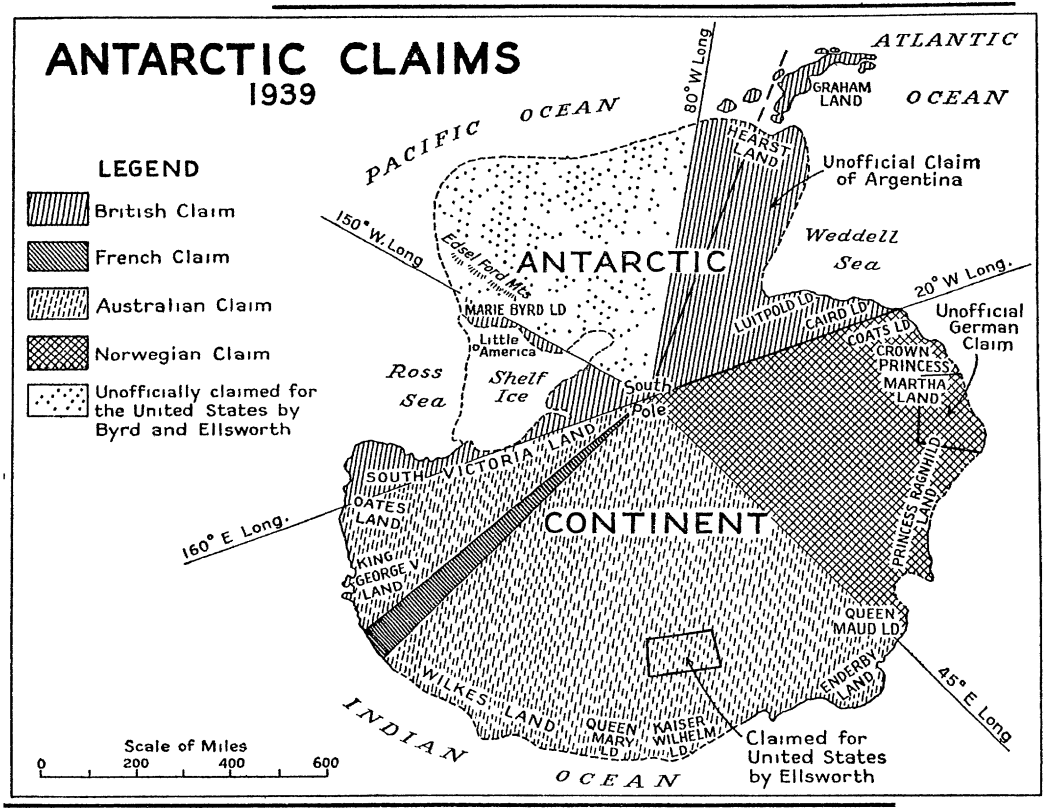
1738-1739. **Pierre Bouvet,** a French naval officer, deliberately set out to prove or disprove the existence of the southern continent, and 1400 miles south of Capetown he sighted land (Bouvet Island, 54° S L)

1756. The Spanish ship *Leon* discovered South Georgia (54°-55° S) in the Atlantic.

1768. Capt **James Cook,** on his first voyage, circumnavigated New Zealand, hitherto supposedly part of the Antarctic continent

1771-1772. Capt. **Yves Kerguelen,** sent out by France to look for "a very large continent."[3] He discovered Kerguelen Island in the Indian Ocean (50° S), which he named *New France*

1772-1775. **SECOND VOYAGE OF CAPT COOK.** He was the first to cross the Antarctic Circle (Jan 17, 1773). He circumnavigated Antarctica, and made extensive exploratory cruises in the surrounding waters, pushing to 71° 10′ S on Jan 30, 1774 (1130 miles from the pole and the record south for the 18th century) He discovered the South Sandwich Islands, annexed South Georgia, and reported the presence there of enormous herds of seals



1778-1839. **Explorations by the sealers.** Suspension of exploration as such The discoveries made in this period were in the main incidental to the operations of British and American whalers and sealers drawn south by Cook's reports

1778. British sealers began operations at South Georgia

1819. Capt **William Smith,** of the British brig *Williams,* discovered and took possession of the South Shetland Islands for the British

1820. **Edward Bransfield,** in the *Williams,* charted 500 miles of the southern coast of the South Shetlands, discovered his strait, and sighted Graham Land

1820-1821. Capt **Fabian Gottlieb von Bellingshausen,** sent out by Alex-

ander I of Russia, circumnavigated Antarctica, and discovered Alexander I Land and Peter Island (68° S), the first land sighted within the Antarctic Circle

1821. **George Powell**, a British sealer, and Nathaniel B. Palmer, an American sealer, discovered the South Orkney Islands, and Powell surveyed and annexed them for the British. Palmer and other American sealers further explored Palmer Archipelago, which skirts Graham Land.

1823. Capt. **James Weddell**, an Englishman, discovered and penetrated Weddell Sea, establishing on Feb 20, 1823, the record south of his day (74° 15′, 945 miles from the pole)

1831-1832. **John Biscoe**, an English sealer, circumnavigated Antarctica, named and annexed Graham Land, discovered the Biscoe Islands, Queen Adelaide Island, and sighted Enderby Land. In 1839, John Balleny, another English captain, discovered the volcanic Balleny Islands, just on the Antarctic Circle, off the coast of Oates Land

1837-1840. Capt **J. S. C. Dumont D'Urville** of the French navy, in the *Astrolabe* and *Zelée*, sighted Joinville Island, Louis Philippe Land (in Graham Land), and Adélie Land on the mainland due south of Tasmania

1839-1840. Capt **Charles Wilkes** of the U.S Navy was antedated in his discovery of Adélie Land by D'Urville, but he cruised westward along the coast of Antarctica from 148° E to 108° E, where he found his way blocked by Termination Barrier (Shackleton Ice Shelf).

1841-1843. **CAPT. JAMES CLARK ROSS** (sent out by the British admiralty) in the *Erebus* and the *Terror* crossed the Antarctic Circle (Jan. 1, 1841), aiming to plant the Union Jack on the south magnetic pole and reach as high a latitude as possible He got through the ice pack, but, finding his way barred by the lofty Admiralty Range behind Cape Adare, cruised southward for 430 miles into Ross Sea, along the scarped eastern coast of South Victoria Land. There he sighted and named, besides the Admiralty Range, the Prince Albert Range and the volcanic mountains Erebus and Terror on Ross Island Finding further passage southward barred at the latter point by the **Great** (Ross) **Ice Barrier**, he cruised eastward along it for 350 miles, before returning to Hobart, Tasmania (Apr. 1, 1841). The following summer he returned to the head of Ross Sea near King Edward VII Land and made a record south (78° 9′, 710 miles from the pole) which held for 60 years. In 1842 he cruised off Graham Land, but made no important discoveries Altogether Ross charted about 1000 miles of coastline He also took possession for Great Britain of all the continental land and islands which he discovered in 1841.

After the voyages of Ross there was a lull of 30 years in systematic exploration of the Antarctic, attention having shifted to the North Pole

1872-1874. H.M S *Challenger* (Capt George S. Nares), the first steam-propelled vessel to cross the Antarctic Circle, renewed the study of oceanography in the Antarctic and helped to redirect public attention to the south

1873-1875. Capt **Eduard Dallmann** (German) in the steamship *Gronland* established the fact that Palmer Land was an archipelago by sailing behind it, and, beyond, discovered Bismarck Strait and the Kaiser Wilhelm Archipelago to the south off Graham Land.

1893. Capt **C. A. Larsen** (Norwegian) in the *Jason* explored Weddell seacoast, discovering and naming Foyn Coast in Graham Land, King Oscar Land, Mt Jason, and Robertson Island

1894-1895. Capt. **Leonard Kristensen** (Norwegian) in the *Antarctic* discovered Ridley Beach at Cape Adare, where the first landing on the continent was made in January by Carsten Borchgrevink He found the first vegetation in the Antarctic —a lichen at Possession Island.

1895. The Sixth International Geographical Congress in London called attention to Antarctic exploration, which it described as the most pressing geographical requirement of the time, and did much to stimulate interest in the problem, both on the part of governments and of private individuals

1897-1899. Lieut. **Adrien de Gerlache** (Belgian) in the *Belgica*, with **Roald Amundsen** as mate, coasted Graham Land, discovered and made several landings in Belgica Strait (subsequently Gerlache Channel), discovered and named Danco Land to the east, and passed south of Peter Island Here on Mar. 3, 1898, they were beset and remained, the first prisoners through an Antarctic night, drifting with the pack ice until Feb. 14, 1899

1898-1900. **Carsten Borchgrevink**, in the whaler *Southern Cross*, led the first party (British and Scandinavian) to winter on the continent, at Cape Adare, where meteorological observations were taken, penguin life studied, and geological collections made. Picked up by their ship in Jan. 1900, they made several landings on the eastern shore of Victoria Land, dis-

covered the Emperor Penguin rookery at Cape Crozier, and cruised along the Ross Barrier. Feb 19, they made a sledge journey on its surface to 78° 45′, a new record south.

1901-1903. The German National Expedition, led by Prof **Erich von Drygalski** in the *Gauss*, discovered and named the Gaussberg and Kaiser Wilhelm II Land, where they sent out the first sledge parties on the Antarctic ice coast This expedition founded a magnetic station on Kerguelen Island

1901-1903. The Swedish Expedition, led by **Dr. Otto Nordenskiold** and Capt Larsen in the *Antarctic*, made exploratory cruises around Graham Land and in Weddell Sea, where they discovered another great ice barrier stretching from Robertson Island to Mt Jason, surveyed the east coast of Graham Land and outlying islands from Erebus and Terror Gulf to 66° S., and discovered and charted the Crown Prince Gustav Channel and James Ross Island as well as the northern archipelago lying around it The *Antarctic* was crushed and sunk by the pack ice and the expedition was obliged to spend two winters at Snow Hill Island, where it was finally rescued by an Argentine ship

1902-1904. CAPT. R. F. SCOTT (British), commanding a large expedition, including **Lieut. Shackleton** and **Dr. E. A. Wilson,** in the *Discovery* reached Cape Adare, Jan 1902 Cruising southward along Ross's course in 1842, he discovered and named the Drygalski and Nordenskiold ice tongues, Granite Harbor, and the Royal Society Mountains He succeeded in surpassing his predecessor's record, reached the eastern end of Ross Barrier, sighted and named King Edward VII Land on the eastern shore of Ross Sea, and charted 150 miles of its coast Upon the return to winter at Ross Island in McMurdo Sound, Mt. Erebus was found to be an active volcano

1903, Nov.-1904, Feb. Scott, Wilson, and Shackleton made a southern trip of 930 miles over the Ross Barrier in an effort to ascertain its limits They discovered that its western boundary was formed by 350 miles of scarped coastline, backed by the lofty Britannia and Queen Alexandra Ranges, the latter containing 15,000-foot Mt. Markham. Their record south was 82° 17′ (500 miles from the pole), near Shackleton Inlet, an enormous ice strait, where they were obliged to turn back At the same time a reconnaissance party under Lieut. **Albert Armitage** made a western trip on to the continental ice-sheet of South Victoria Land's 9000-foot inland plateau, discovering and naming the Ferrar, Taylor, and Blue Glaciers The following season (1903-1904) a party under Scott pushed 200 miles farther over the plateau and on the return trip discovered and explored Dry Valley

1903-1905. The Scottish National Expedition, led by **Dr. W. S. Bruce** in the *Scotia*, carried on oceanographical explorations in Weddell Sea, and wintered on Laurie Island In March, 1904, again exploring southward in Weddell Sea, they discovered Coats Land

1903-1905. Jean B. Charcot (French) in the *Français* operated off the west coast of Graham Land, charted the western side of Palmer Archipelago, sighted Alexander I Land, and discovered Loubet Land

1907-1909. SIR ERNEST SHACKLETON (British), privately financed in the *Nimrod*, led an expedition including Douglas Mawson and Prof. T. W E David to the Ross Sea sector First ascent of Mt Erebus and discovery of the live crater (Mar 5–10, 1908) From a base at Cape Royds on Ross Island, he and three others started on a journey to the pole (Oct 29, 1908) Surpassing Scott's record, they discovered and passed the southern end of Ross Barrier, formed by the Commonwealth Range, and struggled (Dec 7–27) more than a hundred miles up to the head of Beardmore Glacier, where they discovered a seam of low-grade coal At its head (9820 feet) they emerged upon the South Polar Plateau, across which they traveled to 88° 23′ S, on Jan 9, 1909, where a desperate food shortage obliged them to turn back, only 97 miles short of their goal

1908, Oct. 5-1909, Feb. 4. David, Mawson, and Mackay on a 1260-mile sledge trip, explored and surveyed 200 miles northward along the coast of Victoria Land, crossed Drygalski Glacier, and turning inland climbed up the 7000-foot Northern Plateau to reach and plant the British flag on the **south magnetic pole** (1200 miles from the true South Pole) on Jan. 16, 1909 The land was claimed for King Edward Altogether Shackleton's expedition discovered about 1000 miles, and explored 300 miles more of territory previously discovered All the new land explored was formally declared to be British

1908. Great Britain issued letters patent constituting the *Falkland Dependency* (South Georgia, the South Shetlands, the Sandwich Group, and Graham Land) under the jurisdiction of the governor of the Falkland Islands. The Dependency established a sector between 80° and 20° W. Long. running from 50° S. Lat. to the pole.

1908-1910. Second expedition of Jean Charcot. He charted 200 miles of the west coast of Graham Land, extending his previous survey 100 miles beyond Loubet Coast The new land was called Fallières Coast Then advancing southward Charcot first reached Alexander I Land, but could not determine whether it was an island or mainland. In 1910 he discovered Charcot Land, farther to the southwest, and verified Bellingshausen's discovery of Peter Island

1910-1912. DISCOVERY OF THE SOUTH POLE BY CAPT. ROALD AMUNDSEN. Beaten by Peary at the North Pole, Amundsen hoped to anticipate Scott at the South Pole He chose a base on the Bay of Whales and with four others made the trip with dog-sledges (1911, Oct 19–Dec 14). The Norwegian flag was hoisted at the pole on Dec 16, 1911 On the trip Amundsen discovered the 15,000-foot Queen Maude Range which bounds Ross Barrier He ascended this range to the Polar Plateau by way of Axel Heiberg Glacier, and discovered the Devil's Glacier beyond.

1910-1913. SCOTT'S LAST EXPEDITION He aimed for the pole, but was interested mainly in scientific research From a base at Cape Evans in McMurdo Sound, he and four others started (Nov 3, 1911) and followed Shackleton's route up Beardmore Glacier Failure of transport and deficient food resulted in ever slower progress **The pole was reached Jan. 16, 1912,** but the party was so exhausted that before getting back it was overtaken by bad weather. Halfway across Ross Barrier they all died in a blizzard (about Mar 29). The bodies were found by a relief party in Nov 1912.

1910-1912. Lieut Shirase (Japanese), after an unsuccessful attempt to reach Ross Sea (1911), effected a landing on the Bay of Whales Learning that Amundsen had already reached the pole, he contented himself with a short sledge journey across the Barrier

1911-1912 Dr Wilhelm Filchner (German), in an attempt to find out whether Ross and Weddell Seas are connected by a strait, discovered Leopold Land, delimited the southern boundary of Weddell Sea and discovered the Wilhelm Ice Barrier, which fills its head

1911-1913. Dr. Douglas Mawson (British) led a large-scale, well-equipped expedition to explore the 2000 miles of practically unknown coast between Cape Adare and the Gaussberg He was the first Antarctic explorer to use wireless The larger section of the expedition broke through the pack ice and discovered Mertz Glacier, stretching 60 miles out to sea, and beyond it D'Urville Sea Here the party made its base on Commonwealth Bay and (Nov 1911–Jan 1912) Mawson, Mertz, and Ninnis sledged 280 miles over the great ice plateau into King George V Land, crossing the Mertz and the still larger Ninnis Glacier, but Mawson was the only one who got through alive Another party explored the coast to the east for 275 miles, and a third contingent was taken 1200 miles westward in the *Aurora* past the great ice barrier which they named Shackleton's Ice Shelf, discovered Davis Sea, and named the land on its shores Queen Mary Land The party camped on Shackleton Ice Shelf, on which Denman and Scott Glaciers were discovered From here also a party made a 215-mile trip to Gaussberg in Kaiser Wilhelm Land and back

Mawson discovered that the greater part of Antarctica is bordered by ice coasts Altogether his expedition discovered and explored 1320 miles of land, mapped 800 miles of coastline, and made more geographical and scientific discoveries than any previous expedition, although it worked under far worse weather conditions in the most desolate, blizzard-ridden part of the continent

1914-1917 SIR ERNEST SHACKLETON, in the *Endurance*, proposed to cross Antarctica from Weddell to Ross Sea *via* the pole (1800 miles, half over unknown territory) to meet the complementary party under **Mackintosh** in the *Aurora*. This aim was defeated, Shackleton's way south to the destined landing-place being barred by heavy pack ice in Weddell Sea, but he confirmed Bruce's discovery of Coats Land, between which and Leopold Land to the southwest, he discovered Caird Coast, which contains the Dawson Lampton Glacier — probably the world's largest Feb 22, 1915, the *Endurance* was fast beset and drifted 570 miles northwest with the pack until Nov 21, 1915, when she was crushed and sunk by the pressure ice. The party drifted on the disintegrating floe until Apr 9, 1916, when they took to small boats. On Apr 14 they reached Elephant Island, where they were obliged to winter. Shackleton and five others made the 800-mile trip to South Georgia for help in a 20-foot open boat in 16 days, arriving May 10, 1916. A fourth relief expedition to Elephant Island was finally successful in removing the marooned party on Aug. 30, 1916.

The Ross Sea party in the *Aurora* was left stranded with insufficient equipment at its base at Cape Evans when the ship was carried away by the pack in May, 1915.

Scantily-clad, half-starved, and suffering from scurvy, the land party nevertheless fulfilled its part of the plan, laying depots all the way to Beardmore Glacier for Shackleton to use on the last lap of his polar journey. This party was rescued by the *Aurora* in Jan 1917

1921-1922. J L Cope and **G. H.** (now **Sir Hubert**) **Wilkins** (British), landed by Norwegian whalers on the west coast of Graham Land, were foiled in their plan to cross it to Weddell Sea, because the country was too rugged for sledging

1923, July 30. A British order in council constituted the Ross Sea sector a British dependency, known as the *Ross Dependency*, under the governor-general of New Zealand, and fixed as its boundaries the meridians of 150° W , 160° E., and the 60th parallel S , a delimitation which included a large part of Amundsen's discoveries and excluded part of Scott's route to the pole across King Edward Plateau, part of Oates Land, and all of the extensive lands discovered by Mawson, including the south magnetic pole area, which had been claimed for the British by David in 1908.

1924. The French government put **Adélie Land** (between 136° 20′ and 142° 20′ E Long) under the governor of Madagascar

1928-1930. FIRST ANTARCTIC FLIGHTS, BY SIR HUBERT WILKINS. The expedition was sponsored by the American Geographical Society and largely financed by W R Hearst From Deception Bay, Wilkins, piloted by C B Eielson, made a 1200-mile flight (Dec 20, 1928) southwest over Graham Land, discovering Crane Channel, the Lockheed Mts and Stefansson Strait which separates Graham Land from the mainland (named Hearst Land) On Dec 31, 1929, Wilkins, piloted by A Cheesman, flew over Charcot Land, discovered that it was an island and dropped a flag claiming it for Britain Altogether Wilkins mapped about 80,000 sq. miles, discovered a new portion of the continent and determined the insularity of Graham Land

1928-1930. COMM. RICHARD BYRD (American) led a large, scientifically equipped expedition with three aeroplanes In Jan. 1929, they built the base *Little America* on Ross Barrier. A flight on Jan 27 revealed the new Rockefeller Mts and neighboring Scott Land Another on Nov 18 discovered the Charles V Bob Mt Range east of the Queen Maude Range

1929, Nov. 28-29. Byrd, Balchen, June, and McKinley, in the plane *Floyd Bennett*, flew to the pole and back (1700 miles) by way of the 10,000-foot pass over Liv's Glacier In a further flight on Dec 5 Byrd went beyond the Rockefeller Mts., crossed the British boundary, and discovered the huge Edsel Ford Range in a new territory which he named *Marie Byrd Land* and claimed for the U S (between 150° and 120° W)

1929-1931. SIR DOUGLAS MAWSON led the co-operative British, Australian, and New Zealand Antarctic Research Expedition, in the *Discovery* (Capt Davis), to explore the 2500-mile uncharted coastline between King Wilhelm II Land and Coats Land, including Kemp and Enderby Lands Planes were carried along, to be used in cases where pack ice prevented approach to the mainland coasts Dec 29, 1929 Discovery of MacRobertson Land near Kemp Land by flight from the *Discovery* Jan 13, 1930 Landing in Enderby Land, of which formal possession was taken for the crown A large range of mountains discovered there was named after Scott Jan 14, 1930 The *Discovery* met the *Norvegia* (Capt Riiser-Larsen), which was also exploring It was decided that the British should keep to the east and the Norwegians to the west of 40° E. (later changed to 45° E by the two governments). The following (1930–1931) season a landing was made at Mawson's old base on Commonwealth Bay and all land from there eastward to Oates Land was claimed for the British crown under the name *King George V Land* The coast west of Cape Denison was explored by plane and additional surveys of Adélie Land were made. Further discoveries were Banzare Land (west of 127° E), Sabrina Land (between 115° and 116° E), Princess Elizabeth Land (between the Gaussberg and MacRobertson Land), and Mackenzie Sea, a huge bay in MacRobertson Land. These two cruises resulted in the discovery of new coasts covering 29° of longitude, about 1000 miles of which was charted Mawson's major achievement on his two expeditions (1911–1914 and 1929–1931) was the demonstration that the coastline is continuous from Cape Freshfield in King George V Land to Enderby Land — more than 2500 miles

1933. The British government accepted the **Australian claim** to the huge sector between 45° and 160° E Long , exclusive of French Adélie Land

1929-1931. Capt. **Hj. Riiser-Larsen** (Norwegian) led an expedition in the *Norvegia* to look for new whaling grounds and new land He carried two planes and on Dec 22, 1929, he flew to the coast of Enderby Land Jan 15, 1930, he dis-

covered Queen Maude Land (southwest of Enderby Land) and (Feb. 18) Crown Princess Martha Land (by flight), to which 150 miles of coastline was added by a flight on Feb 20. The following (1930–1931) season he extended his explorations of Queen Maude Land 200 miles farther to the west, the new land (between 24° and 30° E.) being called *Princess Ragnhild Land*.

1934-1935. THE SECOND EXPEDITION OF COMMANDER BYRD. The equipment included four planes, four tractors, and an autogyro, and from Jan 17, 1934, to Feb 6, 1935, a comprehensive set of observations was taken in the fields of meteorology, biology, geophysics, botany, and cosmic rays Byrd himself undertook to man single-handed a weather observation station 100 miles inland through the Antarctic winter, but fell ill and injured himself after three months, so that a relief expedition had to be sent after him in one of the tractors Dr Poulter's investigations of Ross Barrier bore out the Japanese contention that much of it was aground. One tractor party explored a new plateau discovered to the southeast of Little America, and another, aiming south, pushed up the glaciers bordering the Barrier, explored mountains only two hundred miles from the pole, where they found plant-fossils, coal, fossilized wood, and other indications that the climate had once been subtropical, and discovered a huge plateau to the east of Thorne Glacier.

Explorations were also carried on by flight, the main achievement being the demonstration that no strait connects Ross and Weddell Seas and that Antarctica is thus one continent A new range called the *Horlick Mountains* was discovered east of Thorne Glacier.

1934-1937. The British Graham Land Expedition, under John Rymill (Australian) In 1935–1936 it operated from a base at the Argentine Islands, exploring the Graham Land coast to Cape Evensen and discovering that it consists of an 8000-foot plateau, rising abruptly from the sea In July, 1936, two parties surveyed the coastline north from a base at Barry Island (Fallières Coast). On Aug. 15 a flight was made westward along the shore of Alexander I Land, which was photographed A flight on Sept. 15 revealed to the south a long, ice-covered strait (King George VI Channel), which the expedition attempted to penetrate with sledges. At 72° S.L. the channel appeared to open into a large bay, which proved that Alexander I Land is larger and extends farther south than previously supposed. Meanwhile another sledge party penetrated the interior of Graham Land, discovered and scaled a 7500-foot pass and reached a point overlooking the east coast, which was mapped for 140 miles, south to 70° 40′. The expedition revealed that what looked like straits to Wilkins were in reality glaciers several thousand feet high and that Stefansson Strait, Casey Channel, and probably Crane Channel are fjords. Graham Land may, after all, be part of the Antarctic continent.

1935-1936. LINCOLN ELLSWORTH (American) in the *Wyatt Earp*, commanded by Sir Hubert Wilkins, succeeded in his third attempt at a transcontinental Antarctic flight. On Nov. 23, 1935, with Herbert Hollick-Kenyon (Canadian) he took off in the *Polar Star* from Dundee Island in the northern part of the Antarctic Archipelago for the Bay of Whales, 2300 miles away. The trip was made in six stages, the last one by sledge after the exhaustion of their fuel. They reached Little America Dec. 15, and were picked up Jan. 15, 1936, by the *Discovery II*, an Antarctic research ship The new territory between Hearst Land and Marie Byrd Land (80° to 120° W) was named *James W Ellsworth Land* and claimed for the U.S, and a high mid-continental plateau was named after Hollick-Kenyon Ellsworth also discovered the 12,000-foot Eternity Range in Hearst Land and the Sentinel Range in James W Ellsworth Land

1936. Australia proclaimed her control over all Antarctic territory south of the 60th parallel between 160° and 45° E Long (except Adélie Land), this being the territory explored by Mawson on his two expeditions. It constitutes an area almost as large as that of Australia.

1938-1939. Ellsworth, on another expedition, surveyed a large part of eastern Antarctica by air, claiming some 430,000 square miles for the United States. The Australian government at once protested against this claim.

1939, Jan. 14. The Norwegian government laid claim to Queen Maude Land, Princess Ragnhild Land, and Crown Princess Martha Land, about 1,000,000 square miles covering roughly one-fifth of the Antarctic continent.

B. THE REVOLUTIONARY AND NAPOLEONIC PERIOD

The period of the revolution and empire may be divided into the following subperiods, distinguished by changes in the form of government

(1) **Estates-General** and **Constituent Assembly** (*Constituante*) from May 5 (June 17), 1789, to Sept 30, 1791 Government a limited, constitutional monarchy Dominance of the upper middle classes

(2) The **Legislative Assembly** (*Législatif*), from Oct 1, 1791, to Sept 21, 1792. The monarchy continued as before, until suspended Rising power of the lower classes

(3) The **National Convention** (*Convention Nationale*), from Sept 21, 1792, to Oct 25, 1795 Height of the revolution The convention, called to frame a new constitution, first abolished the monarchy and condemned the king to death, it supported the Reign of Terror, and then overthrew it. It led the resistance to foreign foes

[N.B In modern party terms the *Left* of the Constituent was the *Right* of the Legislative (though the actual *personnel* was by law different), and the Left of the Legislative was (at first) the Right of the Convention]

(4) **The Directory** (*Directoire*), from Oct 26, 1795, to Nov 9, 1799 (18 Brumaire, An VIII) The middle classes recovered their influence Party divisions. The army General Bonaparte's *coup d'état* Form republican

(5) **The Consulate** (*Consulat*), at first provisional, then definitive, from Dec 25, 1799, to May 20, 1804, civil and military rule, virtually of one man, progress of French arms. Form still nominally republican

(6) **The** (first) **Empire;** from May 20, 1804, to (April, 1814) June 22, 1815. **Napoleon I** made France the controlling power on the Continent, but was finally overthrown.

1. BACKGROUND OF THE REVOLUTION

The spirit of the 18th century — a spirit devoted to the destruction or reformation of existing institutions. Attacks of French writers upon Church and State

Agrarian conditions. The peasantry was almost wholly free (300,000 out of some 20,000,000 still subject to certain servile restriction), and in many regions owned land Often its holdings were too small for adequate support It was subject to certain surviving feudal dues, not in the aggregate large, but annoying, and in 1789 no longer paid for protection. There is evidence that in the last half of the eighteenth century nobles and other owners of these dues were attempting to collect them to the full, and revive those that had lapsed (the so-called *feudal reaction*) Taxation bore heavily on the peasantry, especially the *taille*, a land-tax from which nobles and clergy were exempt. Yet as a whole French peasants were certainly better off than most European peasants, and they took part in the revolution, *not* because they were hopelessly downtrodden, but because they were well enough off to wish to better themselves

The rise of a middle class, generally excluded from politics, and particularly local politics (access to the royal bureaucracy was open to able and ambitious bourgeois), but which had been growing richer with the expansion of French trade, and which read and listened to the *philosophes*

An unwieldy and inefficient machinery of government, not so much tyrannical as irresponsible and unsuited to the needs of a large commercial and agricultural state. Taxation was inequitable, neither clergy nor nobility paying their full share (the clergy did pay a not inconsiderable *don gratuit*, and nobles paid the *vingtième* and *capitation*). Moreover, the indirect taxes were farmed out, and the *fermiers généraux* most unpopular The *gabelle*, or salt-tax, was particularly irregular in its incidence There was no true representative assembly, though the *parlements*, and especially the *parlement* of Paris, sometimes took upon themselves in the eighteenth century the rôle of such an assembly. Justice was by no means arbitrary, and the judges (*noblesse de robe*), though they owned their offices, were generally competent and conscientious The famous *lettres de cachet*, royal orders imprisoning without benefit of *habeas corpus* or similar proceedings, were less important

in fact than in anti-governmental propaganda. Sometimes used against political offenders, their chief use was to back up the family discipline of the upper classes by providing a means of shutting up wayward sons and otherwise keeping the power of the *pater familias* intact.

An ever-growing deficit, which proved impossible of reduction. The Estates-General were called to remedy practical bankruptcy. Once called, they took upon themselves the wholesale reform of the state. France in 1789 was a fairly prosperous society with a bankrupt government.

2. THE NATIONAL ASSEMBLY

1789, May 5. MEETING OF THE ESTATES-GENERAL at Versailles, with a **double representation** of the middle classes, the third estate (*tiers état*), nobles 300, clergy 300, commons 600. Dispute about the manner of debating and voting (whether votes should be cast by the orders as such, or by each member individually) which broke out during the verification of the powers of the members. The nobles and the clergy demanded a separate verification, the commons wished that it should take place in common. The true question was whether the legislative body should consist of a lower house of commons, and an upper house (or two houses) of nobles and clergy which would check the lower, or of **one house** in which the commons equaled in number the nobles and clergy together. Upon the motion of the **Abbé Siéyès** (author of the remarkable pamphlet asking, *What is the Third Estate?*) the representatives of the third estate assumed the title of the

1789, June 17-1791. NATIONAL ASSEMBLY (*Constituante*) and invited the other orders to join them.

June 20. Suspension of the meetings for three days, the hall closed to the members, who at last resorted to a neighboring **tennis court** (*jeu de paume*) and took **an oath** not to separate until they had given the realm a constitution. President Bailly. Many of the clergy and some nobles joined the Assembly.

June 23. Fruitless royal sitting, the king ordered the Assembly to meet in three houses. Principal orator of the Assembly: **Mirabeau** (1749–1791), a Provençal nobleman elected by the third estate. The representatives of the clergy and the nobility joined the third estate by request of the king. Concentration of troops near Paris. Rumors of the king's intention to dissolve the National Assembly, and the **dismissal of Necker** (July 11) caused the

July 14. STORM AND DESTRUCTION OF THE BASTILLE in Paris (murder of its governor, De Launay). Paris in the hands of the mob scarcely controlled by the electors who had chosen the deputies from Paris and who now sat at the Hôtel de Ville as a provisional government. **Necker recalled. Lafayette** commander of the newly established **National Guard.** Bailly mayor of Paris. Adoption of the tricolor: blue, red (colors of Paris), white (color of France).

Beginning of the emigration of the nobles, headed by the **Count of Artois,** second brother of the king, **Prince of Condé, Polignac.**

Rising of the peasants against the feudal lords in Dauphiné, Provence, Burgundy, and throughout France. This *Grande Peur* was *not* systematically spread from Paris but occurred sporadically as a series of mass movements with numerous centers. Riots, provisional governments, guards in the provincial cities.

Aug. 4. Voluntary surrender by the representatives of the nobles (Vicomte de Noailles) of all feudal rights and privileges, but only gradually over a period of years, and with compensation to the owners (this compensation was in most cases never paid; under the Convention these provisions were repealed), abolition of titles, prohibition of the sale of offices, dissolution of the guilds, etc.

Aug. 27. Declaration of the rights of man, a bill of rights compounded from English and American precedents and from the political theories current with the *philosophes*. Discussion of the veto power.

Oct. 5, 6. Outbreak of the mob of Paris, caused by hunger and rumors of an intended reaction. March of a band, consisting principally of women, to Versailles. The royal family, rescued by Lafayette, was obliged to go to Paris, whither the National Assembly followed them. 200 members resigned.

Liberal monarchical constitution: one chamber with legislative power and the sole right of initiation. The royal veto was suspensive only, delaying the adoption of a

measure for two legislative terms The king could not declare war and conclude peace without the consent of the Chamber, ratification by which was necessary for the validity of all foreign treaties

In order to relieve the financial distress the ecclesiastical estates were declared public property *Assignats*, notes of the government, having for security the public lands, the value of which was not to be exceeded by the issue of notes (a check which was inoperative) The state assumed the support of the clergy

1790, July 14. National federation in Paris; the constitution accepted by the king. Abolition of the old provinces and governments; France divided into 83 *departments*, named after rivers and mountains, these departments being subdivided into 374 *districts* and *cantons*. The *communes* were left unchanged (44,000); tax qualifications for the exercise of *active* suffrage in the primary assemblies, which chose electors, who then elected the representatives (745) for a legislature with a term of two years. The administrative officers of the departments and districts were selected from the electors; the municipal officers and the judges were taken from the great body of voters, the *active* citizens Active citizens, who voted, paid direct taxes equal to three days' wages of common labor in their locality *passive* citizens, who did not vote, paid no direct taxes, or less than the above minimum. Each department and each district had a local assembly. Abolition of the *parlements* and the old judicial constitution Juries. Abolition of hereditary nobility, titles, and coats-of-arms. Dissolution of all ecclesiastical orders, excepting those having education and the care of the sick for their objects Civil organization of the clergy; the priests to be chosen by the voters of the districts, the bishops by the voters of the departments Somewhat less than half of the clerics submitted to the new constitution by taking the required oath, creating a distinction between the *prêtres assermentés* and the *prêtres réfractaires*.

Growing power of the clubs, which had existed since 1789 The *Jacobins* (meeting in a monastery formerly occupied by Dominicans in the Rue St Jacques), under the leadership of **Robespierre** soon became the greatest power in the state, making use of a network of daughter societies in the provinces The *Cordeliers*, who met in a Franciscan monastery (leaders **Danton, Marat, Desmoulins, Hébert**) The *Feuillants*, moderate monarchists who had separated from the Jacobins (**Lafayette, Bailly** belonged to this group)

Reorganization of the municipality (*commune*) **of Paris:** 48 sections, with 84,000 voters in a population of 800,000; general council, executive board (44) Each section had a primary assembly

Sept. Fall of Necker. Alliance between the court and Mirabeau, who endeavored to stem the revolution and prevent the overthrow of the throne.

1791, Apr. 2. Death of Mirabeau.

June 20-25 FLIGHT OF THE KING and his family to the northeast frontier, where loyal troops were to protect them The party was recognized and stopped at Varennes, then brought back to Paris At first suspended, then reinstated by the moderate party (Sept) **Louis accepted the constitution** (Sept 14) as revised and completed

Sept. Annexation of Avignon and Venaissin to France

Sept. 30 Dissolution of the Assembly, after it had voted that none of its members should be eligible for election to the next assembly.

3. THE LEGISLATIVE ASSEMBLY

1791, Oct. 1–1792, Sept. THE LEGISLATIVE ASSEMBLY, composed of 745 members, elected by the active citizens, still represented primarily the middle class. **Parties:** The *Right* (constitutionalists, royalists, Feuillants, etc.) became weaker almost day by day The *Left*, comprising the majority, was divided into (1) the *Plain*, an unorganized group of moderate republicans or timid monarchists, swayed in turn by the next two groups; (2) the *Girondists*, so called because the leading members came from Bordeaux (department of the Gironde), had in **Guadet, Vergniaud,** and **Brissot** a group of brilliant orators, advocating the establishing of a form of federal republic, (3) the *Mountain* (la Montagne, Montagnards), so called from their seats, which were the highest on the left side of the hall, was composed of the radicals, champions of a united, indivisible republic. The Mountain drew its strength from the Jacobin and Cordelier Clubs The division between Girondists and the Mountain did not attain its clearest form until the meeting of the Convention (below), but

its beginnings were evident in the Legislative Assembly. **Pétion**, the mayor of Paris, was a Girondist

Aug. 27. Meeting at Pillnitz of **Frederick William II** of Prussia (1786–1797) and **Leopold II** (1790–1792), the emperor The two sovereigns and their ministers reached a preliminary understanding regarding Near-Eastern affairs (p. 485) and above all regarding the French situation. The **Declaration of Pillnitz** was a carefully worded statement that the two rulers would intervene in French affairs only with the unanimous consent of the powers, including England But the French interpreted it as a bald threat of interference

1792, Feb. 7. Alliance of Austria and Prussia against France

1792-1806 (1835). FRANCIS II, emperor in succession to Leopold.

1792-1797. WAR OF THE FIRST COALITION against France. A Girondist ministry (Roland, Dumouriez) took the place of the constitutionalist ministry, whose fall was caused by the Pillnitz Declaration. The Girondists actually sought the war, while on the Austrian side Francis fell completely under the influence of the war party The French *émigrés* had long been trying to provoke intervention, while certain German princes with feudal rights in Alsace (*princes possessionés*) were demanding compensation for losses under the decrees of Aug 4, 1789 Many Prussian and Austrian leaders thought that France, weakened by the revolutionary dissension, would be easily beaten Exact responsibility for the war is hard to allocate In Apr. 1792 both sides wanted it

Apr. 20. The French declared war against Austria and put three armies in the field: Rochambeau (48,000) between Dunkirk and Philippeville, Lafayette (52,000) between Philippeville and Lauterburg, Luckner (42,000) between Lauterburg and Basel The French suffered reverses, which increased the revolutionary excitement in Paris

June 13. Fall of the Roland ministry.

June 20. Attack of the mob on the Tuileries; calm behavior of the king

July 11. The Assembly pronounced the country in danger. Formation of a voluntary army throughout the country Threatening **manifesto of the Duke of Brunswick,** Prussian commander-in-chief. The Paris council was broken up and its place usurped by commissioners from the sections (new commune of 288 members)

Aug. 10 STORMING OF THE TUILERIES by the mob, in consequence of a command of the king ordering the Swiss guard to cease firing. Massacre of the Swiss guards The king took refuge in the hall of the Assembly, was suspended from his functions and confined in the Temple (old house of the Knights Templar) Arrests of suspected persons **Provisional government: Danton** (1759–1794), minister of justice; **Lebrun, Roland, Servan, Monge, Clavière.** The Assembly virtually abdicated its powers, which passed to the Paris Commune and the Jacobin clubs Convocation of a national convention, to be elected by manhood suffrage, to draw up a new constitution

Aug. 20. Lafayette, having been impeached and proscribed, fled from his army, was captured by the Austrians and imprisoned at Olmutz (till 1796) Verdun taken by the Prussians

Sept. 2-7. THE SEPTEMBER MASSACRES at Paris Suspects were taken from the prisons and, after hasty trials by improvised tribunals, were summarily done away with by the mob Blame seems to lie chiefly with Sergent, Panis, and other Paris ward politicians **Danton,** if he cannot be proved to have instigated the massacres, certainly allowed them to run their course Similar scenes were enacted at Versailles, Lyons, Rheims, Meaux, and Orléans

Sept. 20. BATTLE OF VALMY. The French, under **Dumouriez** and **Kellermann,** defeated the Prussians in an artillery duel fought in a heavy fog The engagement, far from important in the military sense, was yet a crucial test It gave heart to the revolutionary armies and was to prove a turning-point

4. THE NATIONAL CONVENTION

1792, Sept. 21-1795, Oct. THE NATIONAL CONVENTION, longest-lived of the revolutionary assemblies It was elected by manhood suffrage and was composed entirely of republicans (749 members, of whom 486 were new men) **Parties:** The Girondists now formed the Right, while the **Mountain,** under Robespierre, the Duke of Orléans (Philippe Egalité), Danton, Collot d'Herbois, etc , formed the Left. The **Plain** (scornfully called the *Marsh* and the *Belly*) appeared as in the preceding assembly.

Numerically it had the majority, but it was dominated first by the Girondists, then by the Mountain

1792, Sept. 21. ABOLITION OF THE MONARCHY. France declared a Republic.

Sept. 22 was the **first day of the year one** of the French republic *Citoyen et citoyenne*, decree of perpetual banishment against emigrants, *tu et toi* Inglorious retreat of the Prussians through Champagne to Luxembourg and across the Rhine The French general, **Custine,** took Speier, Mainz, and Frankfurt on the Main. Occupation of Nice and Savoy (Sept).

Nov. 6. Victory of the French general **Dumouriez at Jemappes.** He took Brussels and conquered the Austrian Netherlands The Prussians retook Frankfurt

Nov. 19. Proclamation of the convention offering French assistance to all peoples who wished to throw off their government

Nov. 27. Savoy and Nice annexed, the Scheldt opened to commerce

1792, Dec.-1793, Jan. Trial of Louis XVI before the Convention Barrère prosecutor; Malesherbes, Desèze, Tronchet, for the defense Proposed appeal to the nation rejected. Jan 15, 683 votes out of 721 declared the king guilty. Jan 16, 361 votes, exactly a majority (among them that of the Duke of Orléans) were cast unconditionally for death, 360 being cast for imprisonment, banishment, or death with respite.

1793, Jan. 21. EXECUTION OF LOUIS XVI.

Feb. 1. War declared against Great Britain, Holland, Spain. England, Holland, Spain, and the empire joined the alliance against France, Sardinia having been at war with the latter power since July, 1792. **Annexation of Belgium.** The *émigrés*, under the Prince of Condé, proclaimed as King **Louis XVII,** who was a prisoner in the Temple.

Mar. Royalist revolt in the **Vendée,** upon occasion of a levy of recruits (Charette, Stofflet, Cathelineau, La Rochejaquelein).

Mar. 18. The Austrians under the Duke of Coburg defeated Dumouriez at **Neerwinden,** and recaptured Brussels. Dumouriez went over to the Austrians with the Duke of Chartres, **Louis Philippe,** son of Egalité.

At Paris, in the Convention, struggle for life and death, between the **Girondists** and the **Mountain.** After the failure of the plan of the Orléanists, belonging to the **Mountain,** to make the Duke of Orléans protector, all power centered in the **Committee of General Security** and the

Apr 6. Committee of Public Safety (*Comité du salut public*) Composed of 9 (afterwards 12) members, who exercised dictatorial power **Leaders: Danton** (from the very start), **Robespierre** (1758–1794), **St. Just, Couthon** (these three in July), **Carnot,** who concerned himself exclusively with military matters, **Collot d'Herbois** (Sept.). The third power in the state was the **commune of Paris,** now reorganized on the basis of manhood suffrage and acting through its committee (reduced to 20) at the Hôtel de Ville **Leaders: Chaumette** and **Hébert** (editor of *Le Père Duchesne*)

Financial difficulties: New issues of *assignats*, based on the lands of the emigrant nobles, the sale of which was ordered Attempts to check depreciation of the *assignats* by severe penalties

June 2 Arrest of 31 Girondist deputies, forced on the Convention by an uprising engineered by the Commune and the Jacobin "machine," with the National Guard, commanded by Henriot Brissot, Vergniaud, Pétion were among the victims. Complete domination of the Mountain, itself the organ of the Paris Commune.

June 22. The Constitution of 1793, an out-and-out democratic system, was sent to the primary assemblies for ratification, but was never actually put into effect

July 13. Assassination of Marat by **Charlotte Corday,** an ardently patriotic girl from the provinces.

1793-1794. THE REIGN OF TERROR. **Robespierre** gradually came to dominate the whole government He was never "dictator" in the modern sense, being checked by his colleagues in the Committee of Public Safety, by the opposing Hébertist faction in the Commune and Convention, and by the commissioners of the Convention sent into the provinces (*représentants en mission*) These commissioners, sent out to suppress counter-revolutionary movements, were often responsible for extreme terrorism in their districts. They collaborated with the local Jacobin Clubs and revolutionary committees (*comités de surveillance, comités révolutionnaires*) Horrors perpetrated by Tallien at Bordeaux, Lebon at Arras, Carrier at Nantes, Couthon, Fouché, Collot d'Herbois at Lyons Some commissioners, however, were fairly clement and spared their regions (the younger Robespierre in the east and south, Lakanal in the southwest)

1793, July. Mainz recovered by the Prussians after a three months' siege.

The Allies also took Condé and Valenciennes Custine executed by the French for negligence **British siege of Toulon.** The troops of the republic were driven back on almost all fronts, with the result that revolts multiplied in the interior, frequently inspired by Girondists who had escaped the purge and had fled Paris Energetic counter-measures of the Committee of Public Safety

Aug. 23. Levy of the entire male population capable of bearing arms Fourteen armies hastily organized and put in the field. Caen, Bordeaux, Marseilles conquered by the republicans.

Sept. 17 Establishment of the maximum price for a large number of commodities, fixation of wages The system was never fully worked out and the *maximum* was frequently violated. It did, however, prevent a catastrophic fall of the *assignats* and insured the provisioning of the armies. The whole experiment was less a socialistic measure than a method of rationing goods during an emergency

Oct. Lyons captured after a two months' siege. The city was partially destroyed and large numbers of the inhabitants were massacred

Oct. 16. Execution of Marie Antoinette.

Oct. 20. Defeat of the Vendéans at Chollet, and at **Le Mans** (Dec 12). Revolutionary tribunal at Nantes (15,000 put to death in three months by Carrier *noyades, fusillades, mariages républicains*)

Oct. 31. Execution of the Girondists (21). Reign of the revolutionary tribunals and the guillotine (Place de la Révolution, now Place de la Concorde). **Fouquier-Tinville,** public prosecutor. Neglect of legal forms, sixty executions a month (including Bailly, Philippe Egalité, Madame Roland, etc).

Nov. 10. Abolition of the worship of God. Cult of Reason (Hébert, Chaumette, Cloots) Profanation of the royal sepulchre at St Denis

Revolutionary calendar, dating from the year one of the revolution (Sept 22, 1792). The months: Vendémiaire, Brumaire, Frimaire; Nivose, Pluviose, Ventose, Germinal, Floréal, Prairial; Messidor, Thermidor, Fructidor. Each month had 30 days, leaving five intercalary days (*sans culottides*) in the year Every tenth day a holiday.

Creation of the new army, really an amalgamation of recruits with loyal elements of the old army. Successes of the new forces throughout the autumn, under Jourdan, Hoche, and Pichegru.

Dec. Retreat of the Allies across the Rhine The French captured Worms and Speier, and took Toulon from the British (first appearance of **Napoleon Bonaparte,** a young artillery officer, closely connected with Robespierre and the Jacobins)

1794. Robespierre (representing the Committee of Public Safety) finally succeeded in crushing the rival powers represented by Hébert and Danton Playing off Danton against the Hébertists, he encompassed

Mar. 24. The execution of the leaders (Hébert, Chaumette, Cloots, etc.). Thereupon he turned on the Dantonists, whose past gave ample opening for accusation.

Apr. 6. Execution of Danton, Desmoulins, Hérault de Sechelles, etc

Apr. 18. Victory of Pichegru at Turcoing.

Apr 19. Treaty of The Hague between England and Prussia, England paying subsidies for 60,000 men.

June 8. Festival of the Supreme Being, a cult of which Robespierre was the high-priest, having abolished the cult of reason

June 10. Law of 22 Prairial, bestowing great power on the revolutionary tribunal juries to convict without hearing evidence or argument Tremendous increase of executions (up to 354 a month)

June 25. Capture of Charleroi by the French.

June 26 BATTLE OF FLEURUS, a French victory which obliged the Duke of Coburg to evacuate Belgium.

July. Conspiracy against Robespierre, by members of the Mountain and by the more moderate elements (Tallien, Fréron, Fouché, Collot d'Herbois, Billaud-Varennes). This was due to jealousy of Robespierre within the Committee of Public Safety, and to rivalry between the two "great committees"

July 27 (9 Thermidor) **FALL OF ROBESPIERRE.** He and his brother, as well as **Couthon** and **St. Just,** were arrested Being released by friends, they were outlawed, surprised at the Hôtel de Ville, and executed, with 18 others On the following days over 80 of the party met the same fate The Paris Commune was nearly extinct This *coup d'état* was carried through by disparate elements, personal enemies of Robespierre, who were opposed to his effort to make France a "republic of virtue" The objective was to remove Robespierre, not to end the Terror. Public

opinion, however, forced them to adopt more moderate policies.

1794-1795. End of the Terror. The convention dominated by the moderates (*Thermidoreans*), who gradually broke the power not only of the Commune, but of the Jacobin Clubs (the Paris Club closed Nov 12)

Dec. 8. The Girondists who had escaped with their lives were readmitted to the Convention

Dec. 24. Repeal of the maximum. New issues of *assignats*, increased depreciation

1795, Apr. 1 (Germinal 12) **Bread riots in Paris;** attack on the Convention suppressed; transportation of Billaud, Collot, Barrère, Vadier, and other radicals Growing reaction in the capital and throughout the country *Jeunesse dorée*, revival of monarchist agitation, return of some of the *émigré* nobility, the **White Terror.**

May 20 (Prairial 1) Further riots and outbreaks Fierce attack on the Convention Firmness of the president, Boissy d'Anglas. The movement was finally gotten in hand and resulted only in the extermination of the remnants of the Mountain

Meanwhile the armies had been uniformly successful Having overrun Belgium, Pichegru invaded Holland in the winter of 1794–1795, the Prince of Orange-Nassau fleeing to England (p 440)

1795-1806. THE BATAVIAN REPUBLIC founded by the French Flanders was surrendered to France

1795, Mar. 5. TREATY OF BASEL between France and Prussia Prussia, financially exhausted and at odds with Austria, withdrew from the war Saxony, Hanover, and Hesse-Cassel followed suit France was to retain the left bank of the Rhine until peace should be concluded with the empire, but was to evacuate the right bank. Northern Germany was to be neutralized Secret articles· Prussia consented to the absolute cession of the left bank to France and was given assurance of compensation through secularization of ecclesiastical territory on the right bank On June 22 Spain and France concluded peace at Basel, Spain ceding St Domingo but recovering other lost territories

June 8. Death of the dauphin (Louis XVII, ten years old) in the Temple Later numerous pretending dauphins appeared, even in the United States. The death of the dauphin is, however, as certain as such matters can ever be

June 27 Landing of the British and *émigrés* at Quiberon (Brittany) to aid the royalists of the region (*Chouans*).

July 16-21. Victories of Hoche over the invaders Over 700 *émigrés* executed Retaliatory massacre of 1000 republican prisoners by Charette

Aug 22. The Constitution of 1795 (third of the revolution). the executive power vested in a directory of five, legislature of two chambers (*Council of Elders*, or Ancients, 250; *Council of Five Hundred*), for the first term, two-thirds of the members of both houses were to be taken from the rolls of the Convention This self-protective proviso led to opposition in Paris and the provinces The Paris royalists instigated an outbreak of the sections On the motion of Barras, the Convention placed Gen. Bonaparte in charge of its troops

Oct. 5. (Vendemiaire 13) **The Day of the Sections.** Bonaparte's "whiff of grape-shot" Cannonade from the church of St. Roch Complete victory of the Convention

Oct. 26. The Convention dissolved, after voting that relatives of *émigrés* should not be permitted to hold office.

5. THE DIRECTORY

1795-1799. THE DIRECTORY. The new government, much maligned by historians and frequently accused of dishonesty and corruption, was faced by an acute financial crisis, the *assignats* having fallen to a fraction of one per cent of their face value. Substitution of *mandats territoriaux*, convertible into a specified amount of land, for the *assignats*. The *mandats* in turn depreciated almost at once

1796, Mar. 5. Final suppression of the insurrection in the Vendée and in Brittany, by Hoche

In the **war against the empire**, the Directory, on advice of Carnot, arranged for a triple attack (1) The Army of the Sambre and Meuse, under **Jourdan**, was to advance from the lower Rhine to Franconia; (2) The Army of the Rhine and the Moselle, under **Moreau**, was to penetrate from the upper Rhine into Swabia and Bavaria; (3) the Army of Italy, under **Bonaparte,**

was to drive the Austrians out of Italy and unite with the other armies by way of the Tyrol

1796. The campaign in Germany. Jourdan and Moreau invaded South Germany, and Baden, Wurttemberg, and Bavaria were obliged to conclude truces (Aug), but suddenly the **Archduke Charles** (brother of Emperor Francis II) took the offensive against Jourdan and defeated him at **Amberg** (Aug) and **Wurzburg** (Sept. 3) Jourdan resigned his command The archduke then turned on Moreau, who retreated through the Black Forest to the upper Rhine

1796, Mar. 9. Marriage of Bonaparte with Josephine de Beauharnais, former friend of Barras and one of the lights of Paris society

1796-1797. BONAPARTE'S ITALIAN CAMPAIGN. Following the coast from Nice, he defeated the Austrians at **Millesimo** (Apr 13) and the Piedmontese at **Mondovi** (Apr 22), compelling Victor Amadeus to conclude a separate peace with France: Savoy and Nice ceded to the French Republic, and the French given the right to garrison Piedmontese fortresses. Napoleon then pursued the Austrians, whom he defeated in

1796, May 10. The battle of Lodi (storming of the bridge over the Adda).

May 15. Napoleon entered Milan, and then conquered all Lombardy as far as Mantua The Dukes of Parma and Modena, the pope and the King of Naples purchased truces at the price of large payments in money and art treasures

May 16. Napoleon set up the **Lombard Republic**

July-1797, Feb. Siege of Mantua by the French. Four attempts by the Austrians to relieve the fortress. They were defeated in the **battles of Castiglione** (Aug. 15), **Roveredo, Bassano,** and in

Nov. 15-19. The battle of Arcola, and

1797, Jan. 14. The battle of Rivoli.

Feb. 2. Mantua surrendered, and Napoleon started on an advance to Rome The pope thereupon hastily concluded with him

Feb. 19. The Treaty of Tolentino, ceding the Romagna, Bologna, and Ferrara.

Mar.-Apr. Bonaparte crossed the Alps to meet the Archduke Charles, advancing from Germany The inhabitants of Venetia rose against the French, and in the Tyrol too the population was called to arms In danger of being cut off, Bonaparte opened negotiations which led to

Apr. 18. THE PRELIMINARY PEACE OF LEOBEN: Austria ceded the Belgian provinces to France, a congress was to arrange peace between France and the empire on the basis of the integrity of imperial territory; Austria ceded the region beyond the Oglio, receiving in return the Venetian territory between the Oglio, Po, and Adriatic (which she was to conquer for herself), Venetian Dalmatia and Istria, and the fortresses of Mantua, Peschiera, and Palma Nova. **Venice** was to be indemnified with the Romagna, Bologna, and Ferrara Austria recognized the **Cisalpine Republic** which was to be formed in northern Italy

May. The French declared **war upon Venice,** under pretext of an outbreak at Verona. Abolition of the aristocracy and establishment of popular government Occupation of the republic by French troops, also of the Venetian islands of Greece (Ionian)

July 9. Proclamation of the **Cisalpine Republic** (Milan, Modena, Ferrara, Bologna, Romagna) Transformation of the Republic of Genoa into the **Ligurian Republic** under French control

Sept. 4 (18th Fructidor) **COUP D'ÉTAT AT PARIS.** Victory of the republican party over the party of reaction, which was represented in the Council of Five Hundred, in the Council of Ancients, and in the Directory. The three republican directors, Barras, Rewbel, and La Révellière defeated their colleagues, Barthélemy and Carnot The latter escaped by flight; Barthélemy and many of his adherents, including Pichegru, were transported to Cayenne

Oct. 17. TREATY OF CAMPO FORMIO. (1) Austria ceded the Belgian provinces to France (2) A congress was convened at **Rastadt** to discuss peace with the empire (3) Austria received the territory of Venice as far as the Adige, with the city of Venice, Istria, and Dalmatia (4) France retained the **Ionian Islands.** (5) Austria recognized the Cisalpine Republic and indemnified the Duke of Modena with the Breisgau Secret articles (1) Austria agreed to the cession of the **left bank of the Rhine** from Basel to Andernach, including Mainz, to France; the navigation of the Rhine was left open to France and Germany in common, those princes who lost by the cession were to receive indemnification in Germany. (2) France was to use her influence to secure to Austria, **Salzburg,** and that portion of Bavaria which lay between Salzburg, the Tyrol, the Inn, and the Salza. (3) Re-

ciprocal guaranty that Prussia should not receive any new acquisition of territory in return for her cession on the left bank of the Rhine.

1796-1801. PAUL I, Emperor of Russia, succeeded his mother Catharine II (p 482)

1797-1840. FREDERICK WILLIAM III, King of Prussia.

1797, Dec.-1799, Apr. Congress of Rastadt. No agreement

1798, Feb. The French occupied Rome. Proclamation of the **Roman Republic. Captivity** of the pope, **Pius VI** (p. 457)

Apr. French invasion of Switzerland. Organization of the **Helvetian Republic** (p. 460) Geneva annexed to France.

1798-1799. BONAPARTE'S EGYPTIAN EXPEDITION, prepared under the mask of an invasion of England (*Army of England* concentrated at Boulogne) Napoleon, having convinced himself of the impracticability of crossing the Channel, persuaded the Directory to deliver a blow at England's Indian empire, by way of Egypt, a country which had long attracted the interest of French political writers Napoleon sailed from Toulon with 35,000 men and a corps of scientists (May 19, 1798), surprised and took **Malta** (June 12), and landed in Egypt (July 1). **Capture of Alexandria** (July 2).

July 21. BATTLE OF THE PYRAMIDS, outside Cairo The French easily defeated the mediaeval Mamluk cavalry, and took Cairo (July 22).

Aug. 1. BATTLE OF THE NILE. The British admiral, **Horatio Nelson,** having sought the French in vain throughout the eastern Mediterranean, finally located the French fleet in the harbor of **Abukir,** east of Alexandria. Without much difficulty he managed to destroy the fleet, which, being crowded in the anchorage, was unable to maneuver. Thus Nelson cut Napoleon and his force off from France.

1799, Feb. The Syrian campaign. The Ottoman government having declared war on France, Napoleon invaded Syria, stormed **Jaffa** (massacre of 1200 prisoners), but was frustrated in his efforts to take **Acre.** Outbreak of plague in the French army, hasty retreat to Egypt.

July 25. Battle of Abukir. The Turks, supported by the British, had landed at Abukir, but they were completely defeated by Napoleon and Murat.

Napoleon left Egypt (Aug. 24) to return to France **Kléber** in command. After long negotiations, he concluded with the Turks the **Convention of El Arish** (Jan 24, 1800), providing for evacuation of the French forces This was opposed by the English. Kléber was assassinated (June) and succeeded by Menou, whom the English defeated at Alexandria (Mar 21, 1801) The French force was repatriated and, by the **Treaty of Amiens** (p. 590), Egypt was restored to the sultan.

6. WAR OF THE SECOND COALITION

1798, Dec. 24. Alliance between Russia and Great Britain, to which Austria, Naples, Portugal, and the Ottoman Empire adhered This **Second Coalition** against France was the work primarily of Paul I of Russia, whom the Knights of Malta had elected as grand master

Plan of campaign: An Anglo-Russian army under the Duke of York was to drive the French from the Netherlands; an Austrian army under Archduke Charles was to expel them from Germany and Switzerland; a Russo-Austrian army was to force the French out of Italy.

A Neapolitan army, commanded by the Austrian general, Mack, had attacked the Roman Republic and occupied the city of Rome (Nov. 29), thus beginning hostilities The French, under Championnet, recaptured the city (Dec. 15) and then overran the entire Kingdom of Naples, Ferdinand was obliged to flee to Sicily, while the French proclaimed

1799, Jan. 23. The Parthenopean Republic, a client state of France Even before this (Nov–Dec. 1798) Gen. Joubert had conquered Piedmont and forced the king to flee to Sardinia (Dec 9) On Mar. 25, 1799 the Grand Duke of Tuscany was driven from his dominions and the French occupied Florence.

Mar. 25. The Archduke Charles defeated Jourdan and the army of the upper Rhine, at **Stockach.** Jourdan retreated across the Rhine and laid down his command. His army and that of the middle Rhine (Bernadotte) were united under command of **Masséna.**

Apr. 5. Battle of Magnano, in which the French army of Italy, under Schérer, was defeated by the Austrians under Kray **Moreau** succeeded to the

command, but was in turn defeated in the

Apr. 27. Battle of Cassano, by the Austrian general Melas and the Russian army under Suvorov The Allies entered Milan and extinguished the Cisalpine Republic In the meanwhile,

Apr. 8. The congress of Rastadt had been dissolved. Mysterious murder of the French delegates, Roberjot, and Bonnier, on their way home, by Austrian hussars (Apr 28)

May 27. Suvorov occupied Turin, and shut up remnants of Moreau's Army in Genoa.

June 4-7. BATTLE OF ZURICH. The Archduke Charles defeated Masséna

June 17-19. BATTLE OF THE TREBBIA. Suvorov defeated the French army under MacDonald, which had hurried north from Naples In the interval the King of Naples returned from Sicily and overthrew the Parthenopean Republic (ruthless vengeance, with massacres). The Roman Republic met with the same fate The Directory now sent to Italy Gen Joubert with a new army

Aug. 15. BATTLE OF NOVI. Suvorov and Melas completely defeated Joubert as he attempted to advance from Genoa Joubert himself was killed

Suvorov then crossed the Alps by the St Gothard Pass in order to unite with the second Russian army under Korsakov, who had taken the place of the Archduke Charles in Switzerland

Sept. 26. Korsakov was defeated and driven out of Zurich by Masséna Suvorov was unable to recover the position in Switzerland and was obliged to fall back to the Grisons with an army decimated by starvation and want Masséna took Constance and threatened the flank of the Archduke Charles, who was preparing the invasion of France from the Rhine.

Oct. 18 Convention of Alkmar, by which the British surrendered all prisoners taken in Holland, in return for unobstructed evacuation The campaign in Holland had been an unqualified failure The British and Russians had not cooperated effectively and the French, under Brune, had more than held their own in the fighting around Bergen (Sept 19)

Oct. 22. The Russians withdrew from the coalition, disgusted with the conduct of their allies, especially the Austrians In the interval (May, 1799) a Russian-Turkish fleet had wrested the Ionian Isles from French control. The islands were organized as a republic (**Septinsular Republic**) under Turkish protection and under Russian guaranty The Russians occupied them until 1807

Nov. 9 (18 Brumaire). **THE COUP D'ÉTAT OF BRUMAIRE. Napoleon** had landed at Fréjus unannounced from Egypt (Oct 8) and had effected an alliance with the directors Siéyès and Roger-Ducos With the aid of his brother Lucien (president of the Council of Five Hundred), he overthrew the Directory and broke up the council on the following day.

7. THE CONSULATE

1799-1804. THE CONSULATE, representing a new system worked out by Siéyès in conjunction with Napoleon **Napoleon was first consul** (term ten years) and was assisted by two other consuls appointed by him (Cambacérès and Lebrun), who had only consultative powers

1799, Dec. 24. Constitution of the Year VIII, which was submitted to popular vote (3,011,107 in favor; 1567 opposed). It preserved the appearance of the republic, but in reality established the **dictatorship of Napoleon** Below the consuls were the following institutions the *Senate* (80), appointed for life from lists of names sent in by the departments, legislative bodies, higher officials; the *Tribunate* (100), which discussed measures submitted by the government, but without voting on them; the *Legislative Chamber* (300), which accepted or rejected these measures, but without debate; the *Council of State*, appointed by the first consul and his chief support in the work of legislation

The people voted for notables of the communes, who then elected one-tenth of their own number as notables of the departments, of whom one-tenth again became notables of France From this final sifting were chosen, by the Senate, the members of the legislative bodies

Establishment of prefectures (administration of the departments) and **subprefectures** (for the districts or *arrondissements*) The administration was gradually centralized. **New system of tax-collection:** a *receveur-général* for each department, and a *receveur particulier* for each *arrondissement*

The new system, which proved to be highly efficient and which has, to a large

extent, been retained to the present day, owed much to experiments and experience of the revolutionary assemblies and the Directory The civil service was recruited largely from former Jacobins In his policy Napoleon, as first consul, followed closely the course marked out by his predecessors.

Napoleon's offers of peace. These were rejected by the Allies, though Russia had left the coalition Defensive alliance between Russia and Sweden (1799), drawing together of Russia and Prussia Friction between Russia and England over Malta Renewal of the **armed neutrality** of 1780 Northern Convention (1800)

1800. RENEWAL OF THE CAMPAIGN AGAINST AUSTRIA. In Italy the Austrians, having defeated Masséna at **Voltri**, advanced to Nice (Apr) Obstinate **defense of Genoa** by Masséna and Soult Capitulation of the city (June 4) after a horrible famine

May Napoleon crossed the St Bernard Pass with 40,000 men, to attack the flank of the Austrians

June 2 The French took Milan and restored the Cisalpine Republic.

June 14. BATTLE OF MARENGO, a great victory won by Napoleon, but by an extremely narrow margin Truce between Napoleon and Melas all fortresses west of the Mincio and south of the Po were surrendered to the French.

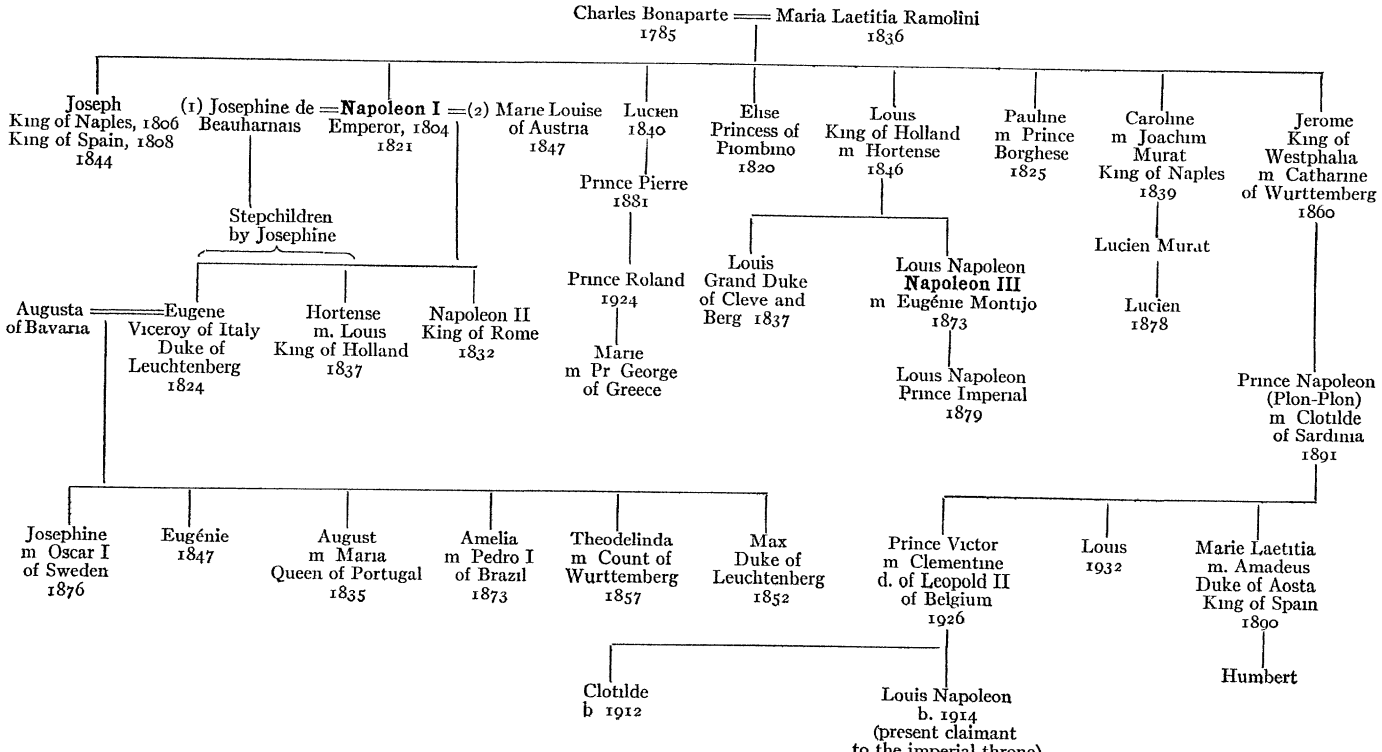
In Germany, Moreau was in command He had crossed the Rhine in April and had advanced into southern Germany

July. Moreau took Munich, after which operations were suspended for some months, causing dissatisfaction on both sides

Dec 3. BATTLE OF HOHENLINDEN. Moreau completely defeated the Archduke John, who had been appointed to take the place of his brother Charles The French then advanced to Linz Another army, under MacDonald, advanced into Tyrol, and in Jan 1801 Brune, with the Army of Italy, crossed the Adige and began the invasion of Austria from the south This decided the emperor to make peace

1801, Feb. 9 TREATY OF LUNEVILLE, which practically involved the destruction of the Holy Roman Empire **Conditions:** (1) Ratification of the cessions made by Austria and to her in the Treaty of Campo Formio (p 595) (2) Cession of the Grand Duchy of Tuscany (Austrian *secundogeniture*) to Parma, to be indemnified in Germany. (3) The emperor and empire consented to the cession of the left bank of the Rhine to France, the valley of the Rhine (i e. the middle of the river), the boundary. The princes who lost by this operation received indemnification in Germany (4) Recognition of the Batavian, Helvetian, Cisalpine, and Ligurian Republics Germany lost by this peace, taking the Belgic territory into account, 25,180 square miles with almost 3,500,000 inhabitants The German princes received an increase of territory The negotiations over the indemnifications lasted more than two years (p 590), during which time the ambassadors of German princes haunted the antechambers of the first consul to beg for better terms, and bribed French ambassadors, secretaries, and their mistresses.

Tuscany was transformed into the **Kingdom of Etruria,** for the satisfaction of Parma Besides losing Parma (a Spanish *secundogeniture*), Spain ceded **Louisiana** to France, which afterward sold it to the United States (1803) The Treaty of Lunéville was succeeded, after conclusion of a truce, by the



Mar 18. Treaty of Florence with Naples **Conditions:** (1) Closure of the harbors to British and Turkish vessels (2) Cession of the Neapolitan possessions in central Italy and the island of Elba (3) Reception of French garrisons in several Italian towns

Prussia joined the Northern Convention against England. **Occupation of Hanover.**

1801-1825. ALEXANDER I, Tsar of Russia Reconciliation between Russia and England (in 1801 England had attacked Denmark, the ally of Russia, and forced her to withdraw from the Northern Convention) The Northern Convention was now dissolved

1801. CONCORDAT BETWEEN FRANCE AND THE PAPACY, concluded after long and trying negotiations This was part of Napoleon's policy of pacification. The concordat provided that French archbishops and bishops should be appointed by the government, but confirmed by the pope. Clergy paid by the government The pope agreed to accept as valid the titles of those who had bought former church property confiscated by the revolutionary government **Pius VII** (elected 1800) was given possession of the Papal States, but without Ferrara, Bologna, and the Romagna The liberties of the Gallican Church were strongly asserted. By the new organization of the **Université,** an incorporated body of teachers who had passed a state examination, the entire system of higher education was made dependent upon the government. The **Institut National** was reorganized and divided

The House of Bonaparte

Dates, unless otherwise indicated, are death dates.

into four (later five) academies (1) *Académie Française* (1635), (2) *A. des Inscriptions et Belles-Lettres* (1663, 1701), (3) *A des Sciences* (1666), (4) *A des Beaux Arts* (1648), (5) *A des Sciences Morales et Politiques* (1832)

After the withdrawal of the younger Pitt from the English cabinet, and after long negotiations, the

1802, Mar. 27. TREATY OF AMIENS was concluded between England and France, thus achieving a complete pacification of Europe (1) Surrender of all conquests made by England to France and her allies, excepting Trinidad, which was ceded by Spain, and Ceylon, which was ceded by the Batavian Republic (2) France recognized the Republic of the Seven Ionian Islands Malta must be restored to the Order of the Knights of Malta In consequence of this treaty, peace was concluded also between France and the Porte

Creation of the **Order of the Legion of Honor** (May 19, 1802) Assumption of regal state and authority. By a popular vote (*plébiscite*, 3½ millions),

Aug. 2. Napoleon became consul for life, with the right of appointing his successor.

New (fifth) constitution. The powers of the Senate, which was ruled by the first consul, were enlarged, the importance of the legislative bodies and the Tribunate was very decidedly reduced

Napoleon had already become president of the **Italian Republic,** as the Cisalpine Republic was henceforward called Elba and Piedmont were annexed to France Military interference of the French in Switzerland, which was torn with civil dissensions The **act of mediation** restored the independence of the separate cantons, but the country remained still so far a single state that it was represented by a landamman and a diet

As regards the internal relations of Germany, the Treaty of Lunéville was executed according to a plan of indemnification established by France and Russia by the

1803, Feb. Enactment of the delegates of the empire (*Reichsdeputationshauptschluss*). Of the ecclesiastical estates there were left only (1) The former Elector of Mainz, now Electoral Archchancellor, with a territory formed out of the remains of the Archbishopric of Mainz on the right bank of the Rhine, the Bishopric of Regensburg, and the cities of Regensburg, and Wezlar (2) The masters of the Order of St. John, and the Teutonic Order. (3) Of the 48 free imperial cities which still existed, only 6 were left, (the 3 Hanseatic cities: Lubeck, Hamburg, Bremen, and Frankfurt, Augsburg, Nurnberg) All other ecclesiastical estates and imperial cities were devoted to indemnifications The electoral bishoprics of Trier and Cologne were abolished Four new electorates Hesse-Cassel, Baden, Wurttemberg, Salzburg

Principal Indemnifications (1) To the **Grand Duke of Tuscany:** Salzburg, and Berchtesgaden (2) To the **Duke of Modena:** Breisgau (in exchange for which Austria received the ecclesiastical foundations of Trent and Brixen) (3) To **Bavaria:** Bishoprics of Wurzburg, Bamberg, Freising, Augsburg, the majority of the prelacies and imperial cities in Franconia and eastern Swabia, in return for which, (4) **Baden** received that portion of the Palatinate lying on the right bank of the Rhine (Heidelberg, Mannheim) Baden also received the portion of the Bishoprics of Constance, Basel, Strassburg, Speier, on the right bank of the Rhine, and many ecclesiastical foundations and imperial cities (5) **Würtemberg:** many abbeys, monasteries, and imperial cities, especially Reutlingen, Esslingen, Heilbronn, etc. (6) **Prussia:** the Bishoprics of Paderborn, Hildesheim, the part of Thuringia which had belonged to Mainz (Eichfeld and Erfurt), a part of Munster, many abbeys, particularly Quedlinburg, and the imperial cities, Muhlhausen, Nordhausen, Goslar (7) **Oldenburg:** Bishopric of Lubeck. (8) **Hanover:** Bishopric of Osnabruck (9) **Hesse** (Darmstadt and Cassel) and **Nassau** divided the portions of the Archbishoprics of Mainz, Trier, and Cologne, which remained, upon the right bank of the Rhine (10) **Nassau-Orange:** Bishopric of Fulda, and Abbey of Corvey As a rule the indemnified princes gained considerably in territory and subjects

New dissensions between France and England, caused by the refusal to surrender Malta and the quarrels of the journalists The French occupied Hanover, where they nearly exhausted the resources of the state. The encampment at **Boulogne** threatened England with an invasion

1804, Feb. Conspiracy against the life of the first consul discovered Pichegru met a mysterious death in prison, **Georges Cadoudal** was executed **Moreau** fled to America. The **Duke of Enghien,** a Bourbon prince of the branch line of Condé, was taken by violence from the territory of Baden, condemned by a commission acting in accordance with the wishes and under the order of Napoleon, without the observation of the ordinary forms of law, and shot at Vincennes on the night of March 20–21.

8. THE FIRST EMPIRE

1804-1814 (1815). **NAPOLEON I,** Emperor of the French He was proclaimed by the Senate and Tribunate on May 18, and consecrated at Paris by Pope Pius VII on Dec 2 Napoleon placed the crown on his own head (in imitation of Pepin and Charlemagne) His elevation was ratified by a plebiscite (3,572,329 in favor, 2569 opposed) The imperial office was made hereditary, succession to be in the male line and the emperor having the right to adopt the children of his brothers, in default of such children, the crown was to pass to Napoleon's brothers, Joseph and Louis

Napoleon at once established a brilliant court grand dignitaries of the Empire; the eighteen marshals of France, development of a new nobility, with many of the privileges of the old, but based on achievement rather than on birth Napoleon really revived the absolute monarchy, but on a more modern and efficient basis

1805. **Napoleon** made himself King of Italy His stepson, Eugène Beauharnais, became viceroy of Naples The **Ligurian Republic** was incorporated with France

9. THE WAR OF THE THIRD COALITION

1805. **Formation of the Third Coalition** against France. England had been at war with France since May 16, 1803, and was now joined by Austria, Russia, and Sweden. Spain was allied with France

Napoleon hastily broke up the camp of Boulogne and shelved his plans (genuine or pretended) for an invasion of England The French armies, under Davout, Soult, Lannes, and Ney, marched quickly to the Rhine to meet the Austrian armies under Archduke Ferdinand and Gen Mack In Italy, Masséna commanded the French against the main Austrian army under Archduke Charles Napoleon then took over the chief command in Germany, crossed the Rhine and marched toward Bavaria, which had been invaded by the Austrians Bavaria, Wurtemberg, Baden, Hesse, and Nassau supported the French

Oct. 17. Mack was obliged to surrender at **Ulm,** with an army of 30,000 men, whom the French had surrounded

Oct. 21. **BATTLE OF TRAFALGAR,** a great victory of **Nelson** (who died of wounds) over the combined French and Spanish fleets This victory broke the naval power of France and established Britain as the mistress of the seas throughout the 19th century

The French, after Ulm, marched down the course of the Danube and took **Vienna** without meeting much resistance. In Italy the Archduke Charles was driven back by Masséna, and returned to Germany. In the meanwhile, however, a Russian army under Kutusov, and a second under **Tsar Alexander I** came to the aid of the Austrians in Moravia

Dec. 2. **BATTLE OF AUSTERLITZ** (*battle of the three emperors*), one of the greatest victories of Napoleon The combined Austrian and Russian armies were defeated, the Austrians hastily agreed to a truce, and the Russians retreated

Dec. 15. **Treaty between Prussia and France.** The Prussians had been on the point of joining the coalition, but after Austerlitz agreed to cede to France the remaining part of Cleve on the left bank of the Rhine, and also Ansbach and Neuchâtel, in return for Hanover.

Dec. 26. **TREATY OF PRESSBURG,** between France and Austria. (1) **France** received Piedmont, Parma, and Piacenza (2) **Austria** ceded to the Kingdom of Italy all that she had received of Venetian territory by the Treaty of Campo Formio, as well as Venetian Istria and Dalmatia; Austria also recognized Napoleon as King of Italy (3) **Austria** ceded to Bavaria the Tyrol, Vorarlberg, the Bishoprics of Brixen and Trent, Burgau, Eichstadt, Passau, Lindau, **Bavaria** also received the free city of Augsburg (4) **Austria** ceded to Württemberg and Baden what remained of the western lands of the Hapsburgs (5) **Württemberg** and **Baden** were recognized as kingdoms. (6) **Austria** was indemnified by being given Salzburg, Berchtesgaden, and the estates of the Teutonic Order, which were secularized The Elector of

Salzburg received from Bavaria Wurzburg as compensation.

Dec. **The Bourbons** in Naples were dethroned by a proclamation of Napoleon from Schonbrunn (*La dynastie de Naples a cessé de régner*)

1806. **Joseph Bonaparte,** elder brother of Napoleon, became King of Naples The Bourbons withdrew to Sicily, where they enjoyed the protection of the British fleet

Joachim Murat, brother-in-law of Napoleon, was created Grand Duke of Berg; Marshal Berthier became Prince of Neuchâtel; **Louis,** third brother of Napoleon, became King of Holland (the former Batavian Republic)

July 12. THE CONFEDERATION OF THE RHINE, organized under French auspices Napoleon was protector **Members:** the Prince Primate, formerly electoral arch-chancellor, the Kings of Bavaria and Wurttemberg, the Grand Dukes of Baden, Hesse, Darmstadt, Berg, the Duke of Nassau, etc Afterward all German princes joined the confederation except Austria, Prussia, Brunswick, and the Elector of Hesse. Thus a large part of Germany came under French domination Territorial changes were constantly made: many princes who held immediately of the empire were mediatized, Bavaria was given the free city of Nürnberg, Frankfurt passed to the Prince Primate (Grand Duke of Frankfurt).

Aug. 6. END OF THE OLD HOLY ROMAN EMPIRE. The Austrian emperor, Francis II, had already assumed the title of *Francis I, Emperor of Austria* (1804) He now laid down the old imperial crown

1806-1807. WAR AGAINST PRUSSIA AND RUSSIA. Reasons for Prussia's entry into the war Establishment of the Confederation of the Rhine, annexation of Wesel; seizure of Verden and Essen; garrisoning of French troops throughout half of Germany, Napoleon's offer to England to take Hanover away from Prussia (on whom he had forced it a short time before) The Prussians were also embittered by the high-handed execution of Palm, a book-seller of Nurnberg, who had published some strictures on Napoleon.

Dangerous **position of Prussia** at the outbreak of the conflict: the complete separation of the military and civil administration had resulted in the safety of the state resting on a half-trained army composed in part of foreigners, on a superannuated general, and on subordinate commanders who, overconfident in the military fame of Prussia since the time of Frederick II, regarded the French with contempt Prussia had no allies, excepting Saxony and far-off Russia. Relations with England were filled with dissension

The Prussian army was commanded by the Duke of Brunswick, and was concentrated in Thuringia As it advanced, it was defeated by the French at **Saalfeld** (Oct. 10) and then in the

Oct. 14. BATTLES OF JENA AND AUERSTÄDT. The main Prussian armies were completely routed and quickly fell to pieces A reserve force under the Prince of Wurttemberg was defeated and scattered at **Halle** (Oct. 17).

Oct 27. Napoleon occupied Berlin. The Prince of Hohenlohe and 12,000 men were forced to surrender at **Prenzlau** (Oct. 28). Blucher, after a valiant defense of Lubeck, was also obliged to surrender at Ratkau (Nov 7) Hasty surrender of the fortresses of Erfurt, Spandau, Stettin, Kustrin, Magdeburg, Hameln, only Kolberg (Gneisenau, Schill, Nettelbeck) and Graudenz (Courbière) defended themselves resolutely.

Nov. 21. BERLIN DECREE: Napoleon proclaimed a (paper) **blockade of Great Britain** and closure of the Continent to British trade, thus inaugurating the *Continental System.*

The French, supported by the Bavarians and Wurttembergers, invaded Silesia and called on the Poles to revolt

Dec. 11. Separate peace between France and Saxony. The elector became *king,* allied himself with France and joined the Confederation of the Rhine

The war also became extended to the Near East The French emissary, **Gen. Sebastiani,** induced the Turks to abandon the alliance with England and Russia. Deposition of the Russophil governors (*hospodars*) of Moldavia and Wallachia (Aug 1806) resulted in

1806-1812. WAR BETWEEN RUSSIA AND TURKEY.

1807. **The French** captured most of the Hanseatic towns and took Breslau and most other fortresses of Silesia In the meanwhile the Russians advanced to the aid of the Prussians The combined armies fought against the French in the

Feb. 7-8. **Battle of Eylau,** a bloody but indecisive engagement. The armies then went into winter quarters. King Frederick William withdrew to Memel.

Feb. 17. A British squadron, under Admiral Duckworth, forced the **passage of the Dardanelles** and appeared before Constantinople. Duckworth was,

however, obliged to retire with a loss of two ships (Mar. 3), because of the threatening preparations of the Turks, inspired by Sebastiani

Mar. 18. The British occupied Alexandria, but, meeting with vigorous opposition from the Turkish forces, evacuated again on Sept 25

May 26. The French captured Danzig and, advancing eastward, fought

June 14. **THE BATTLE OF FRIEDLAND** against the Russians The French were victorious and the Russians fell back. Napoleon then occupied Königsberg and all the country as far as the Niemen River After the conclusion of a truce, Napoleon met Alexander I and Frederick William III on a raft in the Niemen and concluded

July 7-9. **THE TREATIES OF TILSIT,** between (A) France and Russia, and (B) France and Prussia

A. (1) **Russia** recognized the Grand Duchy of Warsaw, which was formed from Polish territory acquired by Prussia through the partitions, under the King of Saxony (2) Danzig restored to the condition of a free city. (3) A part of New East Prussia (Bialystock) ceded to Russia (4) Russia recognized Joseph Bonaparte as King of Naples, Louis Bonaparte as King of Holland, Jerome Bonaparte as King of Westphalia, a new kingdom yet to be created, Russia, moreover, recognized the Confederation of the Rhine, and accepted the mediation of Napoleon in concluding peace with the Turks, while Napoleon accepted the like good offices from Alexander in regard to England In a *secret article,* Alexander agreed to an alliance with France against England, in case the latter refused to accept the proffered peace

B. (1) **Prussia** ceded (a) to Napoleon for free disposal, all lands between the Rhine and Elbe, (b) to Saxony, the circle of Cottbus; (c) all lands taken from Poland since 1772 for the creation of a Duchy of Warsaw, also the city and territory of Danzig. (2) Prussia recognized the sovereignty of the three brothers of Napoleon (3) All Prussian harbors and lands were closed to British ships and British trade until the conclusion of a peace with England. (4) Prussia was to maintain a standing army of not more than 42,000 men. In regard to the restoration and evacuation of the Prussian provinces and fortresses, it was settled by the **Treaty of Konigsberg** (July 12), that Prussia should first pay all arrears of war indemnities

These indemnifications, fixed at 19 million francs by the Prussian calculations, were set at 120 millions by the French, which sum was raised to 140 millions in 1808. After 120 millions had been paid the fortresses were evacuated, excepting Stettin, Kustrin, and Glogau Until this occurred the Prussian state, reduced as it was from 89,120 to 46,032 square miles, was obliged to support 150,000 French troops

Aug. Foundation of the **Kingdom of Westphalia** (capital, Cassel) by a decree of Napoleon, who reserved for himself half of the domains.

Sept. High-handed proceeding of the English against Denmark, which had been summoned to join the Continental system. An English fleet bombarded Copenhagen, and carried off the Danish fleet. Alliance of Denmark with France Russia declared war upon England Stralsund and Rugen occupied by the French.

Nov. **Portugal,** which refused to join the Continental system, occupied by a French army under **Junot** (Duke of Abrantès) The royal family fled to Brazil

Dec. 17. **Milan Decree,** reiterating the blockade against British trade. On paper, Napoleon had closed the entire European coastline to the British

1808, Mar **Spain** invaded by 100,000 Frenchmen under the pretext of guarding the coasts against the English Charles IV (p. 452) abdicated in favor of his son Ferdinand, in consequence of an outbreak which had occurred against his favorite, Godoy Father and son, with Godoy, were enticed by Napoleon to Bayonne and compelled to renounce the throne (May). Napoleon's brother **Joseph** became King of Spain, Murat taking the throne of Naples instead of Joseph General uprising of the Spaniards.

10. THE PENINSULAR WAR

1808-1814. **War of the British against the French in Portugal and Spain.** The British landed in Portugal, under command of **Sir Arthur Wellesley** (later the Duke of Wellington) and defeated the French under Junot at **Vimeiro** (Aug 21, 1808). Nevertheless, Wellesley's successor, Gen. Dalrymple, instead of continuing the campaign, agreed to

Aug. 30. **The Convention of Cintra,** by

which Junot agreed to evacuate Portugal

The **popular insurrection in Spain** (May, 1808) led to retirement of the French, under Murat, behind the Ebro But on July 20 the French managed to recover Madrid. On the same day another French force, advancing toward Cadiz, was defeated by the insurgents and forced to capitulate at Baylen

Sept. **The Congress of Erfurt,** a conference between Napoleon and Alexander I of Russia, attended also by four kings and thirty-four princes, mostly obsequious German satellites Ostensible reinforcement of the Franco-Russian alliance. Napoleon at the height of his power and splendor But in secret the French statesman, **Talleyrand,** was negotiating with Alexander behind Napoleon's back, to frustrate further measures against Austria. Immediately after the Erfurt meeting Napoleon proceeded to Spain in person, with an army of 150,000 He advanced at once upon Madrid (which the French had again abandoned), while his marshals defeated the Spaniards at **Burgos** (Nov 10) and **Espinosa** (Nov 11)

Dec. 13. **Madrid capitulated** to Napoleon. To distract the French from invasion of the south, the British, under **Sir John Moore,** invaded northwestern Spain from Portugal Napoleon turned against him, forcing his retreat

1809, Jan. 16 **Battle of Corunna Marshal Soult,** succeeding Napoleon in the command, defeated and killed Moore The British were forced to evacuate Spain But in Spain guerrilla warfare continued heroic **defense of Saragossa** (Palafox), which, however, was obliged to capitulate (Feb 21) The French, meanwhile, invaded Portugal and took **Oporto.** To protect Lisbon, the British sent out Wellesley with reinforcements Soult was driven out of Oporto, and the British again invaded northwestern Spain

July 28. **Battle of Talavera,** an indecisive engagement, which, however, protected Portugal against further invasion In the meanwhile the French pushed on with the conquest of the south

Nov. 12. **Battle of Ocana,** in which the Spaniards were defeated. The French thereupon overran all Andalusia, excepting Cadiz.

11. THE WAR AGAINST AUSTRIA

After the disasters of 1805–1806, both Prussia and Austria undertook far-reaching political and social reforms, designed to modernize the state and develop greater strength for the further contest with Napoleon. In Prussia the greatest reformer was **Karl, Freiherr vom Stein** (1757–1831), assisted by **Hardenberg.** Reorganization of town government, liberation of industry from burdensome restrictions, abolition of hereditary serfdom, reform of taxation and the whole financial system Reorganization of the army, on the basis of universal military service, by **Gneisenau, Grolmann, Boyen, Clausewitz, Scharnhorst.** Foundation of the **University of Berlin** (1810), by **Humboldt, Altenstein, Niebuhr,** and **Schleiermacher. Fichte's** famous *Addresses to the German Nation* (1807–1808), a tremendous stimulus to national feeling; foundation of the *Tugendbund,* a patriotic organization, development of gymnastics by **Jahn;** patriotic poems of **E. M. Arndt,** etc

Similar, though less extensive, reforms were introduced in Austria, where **Count Stadion** became the leading figure. Reorganization of the army by **Archduke Charles.** The Austrians, impressed by the difficulties Napoleon was meeting with in Spain, and encouraged by the British, who promised subsidies, decided to take advantage of the situation

1809, Apr. **The Archduke Charles** appealed to the whole German people to embark on a war of liberation, and with an army of 170,000 began the invasion of Bavaria Only Tyrol heeded the appeal, and rose in revolt, under **Andreas Hofer.** Napoleon, having hurried back from Spain, engaged the Austrians in Bavaria (using German troops), drove the archduke across the Danube into Bohemia (**battles of Abensberg, Landshut, Eckmuhl, Regensburg,** Apr 19–23) and

May 13. **The French took Vienna.** Napoleon then crossed the island of Lobau, in the Danube, and fought the

May 21-22. **BATTLE OF ASPERN AND ESSLING.** Napoleon was defeated and forced to recross the Danube, where he united his forces with those of the Italian viceroy, **Eugene,** who had driven the Austrians, under Archduke John, from Italy into Hungary. With the combined forces Napoleon recrossed the river and defeated Archduke Charles in the

July 5-6. **BATTLE OF WAGRAM** The Austrians, completely exhausted, agreed to the

Oct. 14. **TREATY OF SCHÖNBRUNN** Austria lost 32,000 square miles of territory, with 3,500,000 inhabitants, as follows. (1) to **Bavaria:** Salzburg and Berchtesgaden, the Innviertel and half of the Hausruckviertel, (2) to the **Grand Duchy of Warsaw:** West Galicia; (3) to **Russia:** the Tarnopol section of East Galicia; (4) to **France:** all the lands beyond the Save River (circle of Villach, Istria, Hungarian Dalmatia, and Ragusa). These territories were, together with the Ionian Islands (ceded to France by Russia in 1807), organized by Napoleon as a new state, the **Illyrian Provinces,** under **Marmont** as Duke of Ragusa Austria further joined the Continental system and agreed to break off all connections with England

The Tyrolese, left to themselves, continued the war against the Bavarians and French with heroic courage, but in the end they were subdued In Nov 1809, **Hofer was captured and shot** by the French at Mantua. Southern Tyrol was annexed to the Kingdom of Italy

Similar **outbreaks in Germany** ended likewise in disaster The bold attempt of Major Schill, a Prussian, to precipitate a war of liberation in Apr 1809, was frustrated by news of Napoleon's victories on the Danube. Schill fell while fighting at Stralsund (May 31) Eleven of his officers were court-martialed and shot at Wesel, while the captured soldiers were condemned by Napoleon to hard labor, after serving for six months in the French galleys, they were enrolled in the coast-guard Another effort was made in 1809 by the Duke of Brunswick, who, with a force of volunteers from Bohemia and Silesia, made his way across Germany to Brunswick (July 31) Forced by superior numbers to withdraw, he managed to reach Bremen and transported his men to England

12. EUROPE, 1810-1812

1810, Apr. MARRIAGE OF NAPOLEON WITH ARCHDUCHESS MARIE LOUISE, daughter of Emperor Francis I of Austria Napoleon had divorced Josephine and was eager for an heir to his great empire. The marriage was arranged by **Metternich,** the Austrian foreign minister after 1809, whose policy was that of alliance with France as the only protection for Austria during the period of recuperation. Birth of an heir to the throne, the King of Rome (Mar. 1811)

July 1. Abdication and flight of **Louis, King of Holland,** who had refused to ruin his country by joining the Continental system. Thereupon **Holland was annexed to France** (July 9), followed by the annexation also of the canton of Wallis, of Oldenburg, of a large part of the Kingdom of Westphalia, of the Grand Duchy of Berg, of East Friesland, and of the Hanseatic cities. The French Empire thenceforth comprised 130 departments and extended along the entire Channel and North Sea coast. These annexations were provoked chiefly by the desire to stop smuggling of British goods, but as such they proved rather ineffectual

THE REVOLUTION IN SWEDEN. By the **Treaty of Tilsit,** Alexander of Russia had been given a free hand to conquer Finland, which he did in 1808, meeting with but feeble opposition from the Swedes. In the course of the war the Russians, under Gen Barclay de Tolly, crossed the Gulf of Bothnia on the ice, captured the Aland Islands, and threatened Stockholm This situation, complicated by an unfortunate war between Sweden and Denmark, resulted in a military overturn. On Mar. 13, 1809, **King Gustavus IV** was arrested by Generals Klingspor and Adlerkreuz, and forced to abdicate (Mar. 29). His uncle became king as **Charles XIII** (1808–1818) and a new constitution was promulgated, restoring the power of the aristocracy The new king concluded with Russia the **Treaty of Friedrichsham** (Sept 17) by which the Swedes abandoned Finland as far as the Tornea River, and also the Aland Islands Through the mediation of Russia, the Swedes secured also the **Treaty of Paris,** with France By this Sweden joined the Continental system, and received in return Swedish Pomerania In Jan 1810, the Swedish Estates elected as heir to the throne Prince Christian of Holstein-Augustenburg, and on his sudden death (May) they chose **Marshal Bernadotte** (Prince of Ponte Corvo) as crown prince Napoleon was unable to resist this compliment and Bernadotte accepted the position (Nov 5). Thenceforth he controlled the Swedish army and foreign affairs

ROME AND THE PAPACY. Growing friction between Napoleon and Pius VII after 1805, when the pope returned to Rome Difficulties about the working of

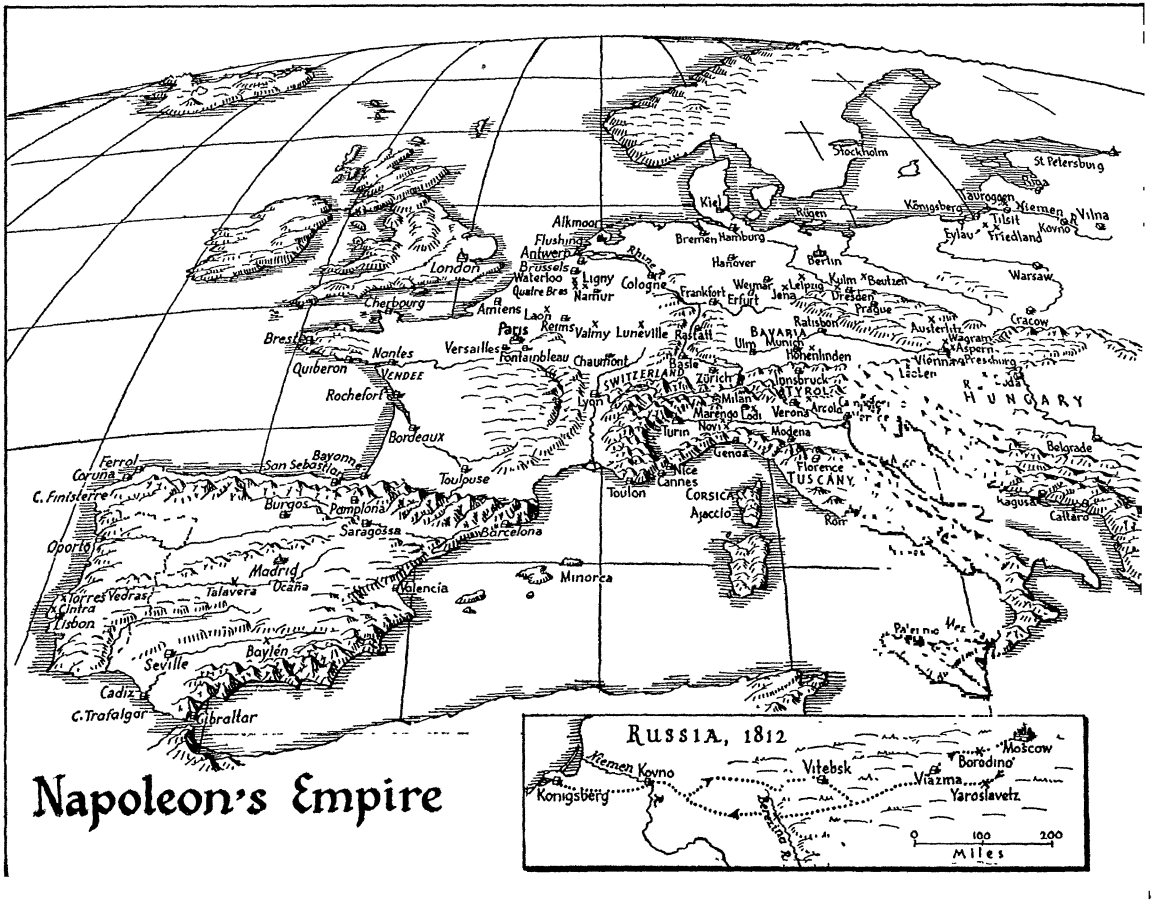
the Concordat of 1801, high-handed action of Napoleon in depriving the pope of some of his territories Pius steadfastly refused to join in the Continental system, as directed, so that on Feb 2, 1808, the French, under Gen Miollis, occupied Rome On May 17, 1809, the **Papal States were declared incorporated with France.** To this act Pius replied by excommunicating Napoleon (June 10), whereupon the emperor had him arrested (July 6) and taken to Savona, near Genoa, where he was held prisoner. Pius continued his attitude of opposition and in 1812 was removed to Fontainebleau

PORTUGAL AND SPAIN. The English force in Portugal, under Wellesley, was in 1810 threatened by a twofold attack by the French, under Masséna in the north, and under Soult in the south. The French took **Ciudad Rodrigo** (July 10) and the British fell back towards Lisbon, where they held the lines of **Torres Vedras** (Oct). All through the winter the two armies confronted each other, until finally Masséna fell back into Spain. The English pursued and besieged **Almeida** and **Badajoz.** In the **battle of Fuentes de Onoro** (May 5) Masséna was defeated, while another British force, under Gen Beresford, defeated Soult in the south (**battle of Albuera,** May 16). In 1812 (Jan. 19) the British took **Ciudad Rodrigo,** and somewhat later (Apr 6) captured **Badajoz.** On July 22 Wellesley (Wellington) completely defeated the French under Marshal Marmont, at **Salamanca.** Joseph Bonaparte had to abandon Madrid (Aug 12) and fall back to the Ebro River. In the meanwhile, a national assembly (*Córtes*) elected in 1810 in the only part of the country then free, viz Cadiz and vicinity, promulgated a famous **constitution** (May 8, 1812) of an advanced, democratic type (one-chamber parliament, universal suffrage, popular sovereignty, etc)

THE OTTOMAN EMPIRE. War against England and Russia (1806–1812) This was conducted in desultory fashion by both sides 1807 **Revolutions in Constantinople** (p 722) 1809, Jan 5 The English concluded the **Treaty of the Dardanelles** with the Turks and withdrew from the war In the same year the Russians won a victory at **Silistria,** which was followed, in 1810, by the occupation of **Bessarabia, Moldavia,** and **Wallachia.** In 1811 the Russians crossed the Danube and began the advance through Bulgaria These operations had to be broken off in view of the impending invasion of Russia by Napoleon Despite French efforts to induce them to continue the war, the Turks were glad to accept the **Treaty of Bucharest** (May 28, 1812), by which they gave up to Russia the province of Bessarabia.

13. THE FRENCH INVASION OF RUSSIA

Causes: Latent rivalry between Napoleon and Alexander, both eager for leadership in Europe. Dissatisfaction of Alexander, aroused by Napoleon's marriage and alliance with Austria Unwillingness of the Russians to carry through fully the Continental system Irritation of the tsar over Napoleon's unwillingness to grant him free hand in the matter of Constantinople Addition of West Galicia to the Grand Duchy of Warsaw (by the **Treaty of Schonbrunn,** 1809) aroused Alexander's fear that Napoleon was planning the restoration of Poland. Deposition of the Duke of Oldenburg and annexation of his territory to France offended Alexander, who was a near relative of the duke.



Preparations: Alliance of Napoleon with Austria (which agreed to furnish 30,000 men) and **Prussia** (20,000). **Denmark,** however, maintained neutrality throughout the war. **Sweden,** which had been forced by Napoleon to declare war on England (1810), now, under Bernadotte's guidance, shook off the French yoke and secured compensation for the loss of Finland The French having reoccupied Swedish Pomerania and Rugen (Jan 1812), the Swedes concluded with Russia

1812, Apr. The Treaty of St. Petersburg. Russia promised Sweden the annexation of Norway, which belonged to Denmark, the latter to be indemnified elsewhere; Sweden agreed to make a diversion against the French in northern Germany.

May 28. Russia made peace with the Turks at Bucharest (above).

June. England made peace with Russia and Sweden.

Military preparations: The Grand Army of Napoleon, originally about 420,000 men, ultimately, with reinforcements, about 600,000, probably the greatest army ever assembled up to that time. It was only in part French, for there were large contingents of Italians, Poles, Swiss, Dutch, and German (from the Confederation of the Rhine members, as well as Austria and Prussia). The **Austrians,** under Schwarzen-

berg, formed a separate army on the right wing, the **Prussians,** under York, held the left wing

1812, June. Passage of the Niemen River and **occupation of Vilna** The Russians, under Barclay de Tolly, retreated, allowing the French main army to reach Smolensk without offering battle The Prussians meanwhile besieged **Riga** and the Austrians penetrated into **Volhynia.**

Aug. 17-18. Destruction of Smolensk by the French Barclay de Tolly, criticized for his failure to resist the invasion, was replaced by **Gen Kutusov,** who fought the French in the bloody

Sept. 7. BATTLE OF BORODINO, on the Moskova River (terrific losses on both sides). The Russians were obliged to retreat farther, and abandoned Moscow

Sept. 14. The French occupied Moscow, which had been deserted by most of the inhabitants Napoleon established himself in the Kremlin

Sept. 15-19. BURNING OF MOSCOW, evidently a disaster planned and executed by the Russians (**Rostopchin**) to make the place untenable Napoleon offered Alexander a truce, which Alexander rejected After waiting for five weeks in Moscow, Napoleon, frustrated in his hope of bringing the Russians to terms and unable to maintain himself so far from his bases, began the

Oct. 19. RETREAT FROM MOSCOW toward Smolensk Attacks on the invaders by Kutusov's army and by swarms of Cossacks and irregulars Separate corps of the Grand Army fought at **Jaroslavetz** (Oct 24) and at **Viazma** (Nov 3). By the beginning of Nov very severe weather began to set in. Suffering of the troops from hunger and frost, combined with constant attacks by the enemy (e g at **Krasnoi** and **Borissov**).

Nov. 26-28. CROSSING OF THE BERESINA, one of the most horrible episodes in the retreat Ney and Oudinot, with 8500 men, forced the passage against 25,000 Russians From this point on, the remaining fragments of the army became completely disorganized and the retreat became a wild flight Napoleon left the army and hastened to Paris, where he arrived on Dec. 18 At about the same time the remnants of the army (not more than 100,000 men) straggled across the Niemen

14. THE WARS OF LIBERATION

Soon after the catastrophic invasion of Russia, the Prussians deserted the French and joined the tsar in a campaign in Germany. On Dec 30 Gen York, in command of the Prussian contingent of the Grand Army, concluded the **Convention of Tuaroggen** (an agreement of neutrality) with the Russian general, Diebitsch. Great pressure was brought to bear upon Frederick William III by his generals and advisers.

1813, Feb. 3. Appeal of Frederick William III, issued from Breslau and calling upon his people to form volunteer corps Enthusiastic response, especially among the younger men and students

Feb. 28. Treaty of Kalisch, between Prussia and Russia. (1) Offensive and defensive alliance, enumeration of auxiliary armies to be furnished by either side. (2) In the event of victory Prussia to be given as much territory as she possessed in 1806. (3) Invitation extended to Austria and England to join the alliance

Mar. 3. Treaty between England and Sweden: England paid one million rix dollars in subsidies and promised not to oppose the union of Norway with Sweden. Sweden furnished the allies an army of 30,000 men under command of **Crown Prince Bernadotte.**

Mar. 17. Appeal of Frederick William III "To my people," and "to my army" Establishment of the **Landwehr** and the **Landsturm.** Iron Cross

Mar. 18. Outbreak in Hamburg. Tettenborn and a force of Russians occupied the city The Dukes of Mecklenburg withdrew from the Confederation of the Rhine

Great preparations on both sides. The Elbe was the boundary between the combatants, Danzig, Stettin, Kustrin, Glogau, Modlin, and Zamosc, being, however, in the hands of the French

Mar. 27. Occupation of Dresden by Russians and Prussians under Wittgenstein and Blucher, after the withdrawal of Marshal Davout Flight of the King of Saxony.

The French army and the contingents of the Confederation of the Rhine concentrated in Franconia, Thuringia, and on the Elbe Napoleon, after the end of April, was at the head of 180,000 men in

Germany He was unexpectedly attacked by the armies of the allies, numbering 85,000 men

May 2. Battle of Gross-Görschen or Lutzen. Victory remained with the French, in spite of their losses The allies withdrew through Dresden to Lusatia Scharnhorst, severely wounded, died in Prague Napoleon in Dresden, in close alliance with the King of Saxony, who had returned from Prague

May 20 and 21. Battles of Bautzen and Wurschen. Napoleon attacked the allies at Bautzen, forced them to retreat across the Spree, and completed the victory at Wurschen, with great loss to himself. Duroc killed The Allies retreated to Silesia

May 30. Hamburg occupied by Davout, after the withdrawal of the Russians. The combatants, exhausted, waited for reinforcements and strove to secure the alliance of Austria

June 4-July 26. Armistice of Poischwitz, afterward prolonged until Aug 10 (16)

June 15. England concluded a subsidy treaty with Prussia and Russia at Reichenbach.

July 5 (28)-Aug. 11. Congress at Prague. Austria played the part of mediator After futile negotiations (Metternich, Caulaincourt, William von Humboldt), the congress was dissolved

Aug. 12. AUSTRIA DECLARED WAR ON FRANCE.

The Allies, all supported by English subsidies, put three armies into the field: (1) **The Bohemian army,** under **Schwarzenberg** (with Kleist and Wittgenstein), was accompanied by the three monarchs; (2) **the Silesian army,** under **Blücher** (with York, Sacken, and Langeron), (3) **the Northern army,** under **Bernadotte** (with Bulow, Tauenzien, and Winzingerode)

Napoleon began operations by attacking Blucher, who retired behind the Katzbach Meanwhile Schwarzenberg advanced from Bohemia upon Dresden Napoleon left MacDonald to oppose Blucher and hurried to Saxony Oudinot and Reynier were to march on Berlin, with the support of Davout, coming from Hamburg.

Aug. 23. Battle of Grossbeeren. Oudinot and Reynier were defeated by Bulow, the Crown Prince of Saxony having looked on inactive. Berlin was saved by this victory.

Aug. 26. Battle of the Katzbach. MacDonald's army was defeated by Blucher, who was made Prince of Wahlstatt.

Aug. 26-27. BATTLE OF DRESDEN. Napoleon defeated the allied army from Bohemia It was his last major victory on German soil

Aug. 30 Battle of Kulm and Nollendorf. Vandamme, with a French force that attempted to intercept the retreat of the Bohemian army, was defeated by Ostermann and Kleist

Sept. 6. Battle of Dennewitz, in which Marshal Ney, attempting to take Berlin, was defeated by Bulow and Tauenzien

Sept. 9. TREATY OF TEPLITZ, between Russia, Prussia, and Austria (1) Firm union and mutual guaranty for their respective territories. (2) Each party to assist the others with at least 60,000 men. (3) No separate peace or armistice to be concluded with France. **Secret articles** provided for the restoration of the Austrian and Prussian monarchies to their territorial status of 1805.

Oct. 3. Battle of Wartenburg. York forced a passage across the Elbe for the army of Silesia The northern army also crossed the Elbe

Oct. 8. Treaty of Ried, between Austria and Bavaria. Bavaria withdrew from the Confederation of the Rhine and joined the alliance against Napoleon. In return, the king was guaranteed his possessions as of the time of the treaty.

Oct. 16-19. BATTLE OF LEIPZIG (*Battle of the Nations*). Napoleon had left Dresden in order to avoid being cut off from France by the three allied armies, which were attempting to unite in his rear The decisive battle was fought around Leipzig. **Oct. 16:** Inconclusive engagement between Napoleon and the army of Bohemia at **Wachau** (south of Leipzig); victory of Blucher over Marmont at **Möckern,** north of Leipzig **Oct. 17:** The main armies were not engaged; Napoleon sent peace offers to the emperor, who rejected them as too extravagant, toward evening the Allies united, being reinforced with a Russian reserve under Bennigsen (100,000); formed in a huge semicircle, they greatly outnumbered the forces of Napoleon **Oct. 18:** General attack of the Allies, ending in complete victory after nine hours. The French army was driven back to the gates of Leipzig. The Saxon and Wurttemberg corps went over to the Allies. **Oct. 19: Storming of Leipzig** by the Allies; capture of the King of Saxony. The army of Napoleon, having lost 30,000 men, began the retreat, harried by the allied forces (**battle of the Unstrut,** and of **Hanau**).

As a result of the French defeat at **Leipzig,** King Jerome fled from Cassel and the

Kingdom of Westphalia came to an end. The same was true of the **Grand Duchies of Frankfurt and of Berg.** The old rulers were restored in Cassel, Brunswick, Hanover, and Oldenburg The central administrative bureau, which had been created under Freiherr vom Stein at the beginning of the war to govern recovered territories, had only Saxony to concern itself with

THE CAMPAIGN IN SPAIN. The English, unable to take Burgos, had been obliged to fall back again, and King Joseph was able to recover Madrid But in Feb 1813, Soult and a large part of the French army had to be recalled to Germany. Once more Wellington advanced to the northeast, to cut off the communications of King Joseph with France

June 21. Battle of Vittoria. Wellington completely defeated Marshal Jourdan Joseph fled to France and the French abandoned most of the country. The British stormed **San Sebastian** (Aug 21) and besieged **Pampeluna.** In the east, Marshal Suchet was driven out of Valencia into Barcelona Pampeluna fell to the British and Spaniards (Oct. 31). **Wellington crossed the French frontier,** defeated Soult (Nov 10) and invested **Bayonne** (Dec)

Nov. Napoleon crossed the Rhine at Mainz Wurttemberg, Hesse-Darmstadt, Baden, and the remaining members of the Confederation of the Rhine joined the alliance One city after another surrendered to the allied forces. Dresden (Nov 11), Stettin (Nov 21), Lubeck (Dec 5), Zamosc, Modlin, Torgau (Dec 26), Danzig (Dec 30), Wittenberg (Jan 12, 1814), Kustrin (Mar. 7). But Hamburg (Davout), Glogau, Magdeburg, Erfurt, Wurzburg, Wesel, and Mainz remained in French hands until the conclusion of peace

Nov. 8. The allies offered Napoleon peace, leaving France the boundaries of the Alps and the Rhine. When Napoleon failed to accept, the allies (Dec 1) adopted a resolution to prosecute the war vigorously and to pass the Rhine and invade France.

Nov. 15. Revolt of the Dutch, who expelled the French officials. The allied army of Bülow entered Holland, while Bernadotte, with the northern army, invaded Holstein, and in a short winter campaign forced Denmark to accept the

1814, Jan. 14. TREATY OF KIEL: (1) **Denmark** ceded Norway to **Sweden,** with a guaranty to the Norwegians of the maintenance of their rights (2) **Sweden** ceded to Denmark Western Pomerania and Rügen. At the same time peace was made between **England and Denmark,** England restoring all conquests except Heligoland

Meanwhile **the allied armies had crossed the Rhine** (Dec 21–25). The army of Schwarzenberg crossed through Switzerland, whose treaty of neutrality was disregarded. On Jan 1, 1814, Blucher crossed the river at Mannheim and Coblenz. Altogether about 200,000 men invaded France. The main army proceeded through Burgundy, while Blucher advanced through Lorraine Napoleon attempted to prevent their junction by attacking Blucher at Brienne and driving him back (Jan 29) But Blucher united with part of the main army and defeated the emperor in the

Feb. 1 Battle of La Rothière. Napoleon retired behind the Aube River Difficulties of supply forced the allied forces to divide again The main army was to advance on Paris by the Seine River, while Blucher was to follow the course of the Marne Hearing of the division, Napoleon suddenly hurled himself on the various corps of Blucher's army and defeated them in four battles **Champaubert, Montmirail, Chateâu-Thierry, Vauchamps** (Feb 10–15) Then, turning on the main army, he defeated it in engagements at **Nangis** and **Montereau** (Feb 17–18) Blucher was obliged to fall back to Etoges, and Schwarzenberg to Troyes. Meanwhile the Allies met with Napoleon's envoy, **Caulaincourt,** in the

Feb. 5-Mar. 19. Congress of Châtillon (sur-Seine). Napoleon was offered the French frontier of 1792, but, elated by his recent successes, he overplayed his hand and the negotiations failed

Feb. 27. Battle of Bar-sur-Aube. Schwarzenberg defeated Oudinot and MacDonald Blucher, forced to retire across the Marne and Oise, joined the army of the north under Bulow and Winzingerode

Mar. 9. TREATIES OF CHAUMONT, between the Allies These were arranged by **Lord Castlereagh,** the British foreign minister, who had hurried to the Continent to forestall any breakup of the coalition The treaties provided for continuance of the struggle and guarded against a separate peace The alliance to continue for twenty years

Mar. 9-10. Battle of Laon. The allied armies, combined, defeated Napoleon.

Mar. 12. The British, under Wellington, captured **Bordeaux.** The campaign in the south came to an end with

Soult's final defeat in the **battle of Toulouse** (Apr 10)

Mar. 20-21. Battle of Arcis-sur-Aube. Napoleon suffered another reverse He then formed the desperate plan of throwing himself on the rear of the Allies in Lorraine, summoning the garrisons of the fortresses to his aid, and calling the population to arms The Allies, with equal boldness, advanced on Paris, and, in

Mar. 25. The battle of La Fère-Champenoise defeated Marshals Marmont and Mortier The French generals threw themselves upon the capital, which was valiantly defended, but which, after

Mar. 30. The storming of the Montmartre by the Allies, was obliged to capitulate

Mar. 31. VICTORIOUS ENTRY OF THE ALLIES INTO PARIS. The Senate, under Talleyrand's influence, declared that Napoleon and his family had forfeited the throne. The emperor, hastening to the defense of the capital, arrived a few hours too late His marshals refused to join him in a foolhardy assault on the city, so in the end he was obliged to abdicate in favor of his son (Fontainebleau, Apr. 6) The Allies rejected this solution, and on

Apr. 11. Napoleon abdicated unconditionally. The allies granted him the **island of Elba** as a sovereign principality, with an annual income of 2,000,000 francs, to be paid by France His wife, **Marie Louise,** received the Duchies of Parma, Piacenza, and Guastalla, with sovereign power. Both Napoleon and Marie Louise retained the imperial title. On May 4 the emperor arrived at Elba.

15. THE PEACE SETTLEMENTS

1814-1824. LOUIS XVIII, King of France He was the elder of the two surviving brothers of Louis XVI His restoration to the throne was due in part to the failure of other candidacies (notably that of Bernadotte), in part to the clever managing and maneuvering of Talleyrand The British were sympathetic and Alexander I of Russia was easily persuaded Louis was induced by Talleyrand and his other advisers to issue a **constitution,** modeled on that of the English, but with many limitations This was the charter (*Charte constitutionelle*), for which see p 626

May 30 THE FIRST TREATY OF PARIS Leniency of the Allies, due to their desire to strengthen the Bourbon régime (1) **France** retained the boundaries of 1792, which included Avignon, Venaissin, parts of Savoy and parts of the German Empire and Belgium, all of which had not belonged to France in 1789. (2) **France** recognized the independence of the Netherlands, of the German states, the Italian states, and of Switzerland (3) **England** restored the French colonies, excepting Tobago, Ste Lucia and Mauritius (Isle de France) England also retained Malta (4) The Allies abandoned all claims for indemnity, etc. (5) **France** promised to abolish the slave trade

Discussion of the general settlement of the reconquered territories among the Allies at Paris, and during the visit of Alexander I and Frederick William to England (June) In view of the complexity of the problem, it was decided to hold a congress at Vienna.

1814, Sept.—1815, June. THE CONGRESS OF VIENNA, one of the most brilliant international assemblies of modern times Lavish entertainment offered by Emperor Francis Most of the rulers of Europe attended the congress, to say nothing of the host of lesser potentates, ministers, claimants, etc The chief negotiators were for Austria, **Prince Metternich;** for Prussia, **Hardenberg** and **William von Humboldt;** for Great Britain, **Castlereagh** and **Wellington;** for Russia, the tsar himself and his many advisers (**Czartoryski, Stein, Razumovsky, Capodistrias, Nesselrode**); for France, **Talleyrand;** for the papacy, **Card. Consalvi.**

The main decisions were made by the chief representatives of the four major allied powers, the other members of the grand alliance (Spain, Portugal, Sweden) being allowed to participate only in the treatment of fairly obvious or unobjectionable subjects The full congress never met officially. Talleyrand, in order to gain admission to the inner councils, tried to raise the **principle of legitimacy** to support his claim, but he was taken into the inner group only when the dispute between the Allies as to the fate of Poland and Saxony led them (Jan. 1815) to the verge of war and the deadlock between the two opposing groups (Russia and Prussia against Austria and England) had to be broken by enlisting the support of France on the anti-Russian side.

The work of the Congress of Vienna was interrupted by the return of Napoleon from Elba and the reopening of the war (p. 602),

but the various settlements were brought together and signed as

1815, June 8. THE ACT OF THE CONGRESS OF VIENNA. Chief provisions:

(1) **Restoration of the Austrian and Prussian monarchies:** (*a*) **Austria** received, besides her former domain, the Italian provinces of Lombardy and Venetia (to be called the *Lombardo-Venetian Kingdom*), the Illyrian provinces (French Kingdoms of Illyria and Dalmatia), Salzburg and the Tyrol (from Bavaria); Galicia (*b*) **Prussia** received part of the Grand Duchy of Warsaw (Posen) and Danzig, Swedish Pomerania and Rugen, in return for which Denmark was given Lauenburg, the former Prussian possessions in Westphalia, somewhat enlarged, as well as Neuchâtel; the greater part of Saxony, as compensation for the loss of former possessions, like Ansbach and Baireuth (ceded to Bavaria), East Friesland (to Hanover) and part of the Polish territory (to Russia)

(2) **Formation of the Kingdom of the Netherlands,** comprising the former Republic of Holland and the Austrian Netherlands (Belgium), under the former hereditary statthalter as King William I England returned the former Dutch colonies, but not Ceylon or the Cape of Good Hope

(3) **Creation of the Germanic Confederation,** to take the place of the old Holy Roman Empire. Schemes for a unified German state, as advanced by the so-called "patriots," were put aside, and the federal bond was hardly more than a mutual defensive alliance. The confederation comprised 39 states, including four free cities. All other princes remained mediatized. The **Act of Confederation** was signed on June 8, 1815 and was later supplemented by the **Final Act of Vienna** (May 15, 1820).

(4) **The Kingdom of Poland:** Most of the former Grand Duchy of Warsaw was handed over to Russia, and became a Polish kingdom, with the Russian tsar as king Poland received from Alexander a liberal constitution, Polish was the official language and Poland had her own institutions, including a separate army **Cracow** became a free state under the protection of Russia, Austria, and Prussia

(5) **England** retained Malta, Heligoland, some of the French and Dutch colonies (see above), and assumed a protectorate over the Ionian Islands (**Treaty of Nov. 5, 1815**).

(6) **Sweden** retained Norway, which had been acquired by the Treaty of Kiel (p. 600) **Norway** was given a separate constitution **Denmark** was indemnified with Lauenburg

(7) **Switzerland** was re-established as an independent confederation of 22 cantons Geneva, Wallis, and Neuchâtel (a principality belonging to the King of Prussia) were now included in the federation

(8) **Restoration of the legitimate dynasties** in Spain, Sardinia (which received Genoa), Tuscany, Modena and the Papal States The Bourbons were not reinstated in Naples until 1815, since Murat had secured possession of Naples for the time being through his desertion of Napoleon.

16. THE HUNDRED DAYS

News of the discontent in France with the government of the Bourbons, and knowledge of the discord at the Congress of Vienna, to say nothing of the encouragement of his adherents, induced Napoleon to make another effort to recover his throne

1815, Mar. 1. Landing of Napoleon at Cannes, with 1500 men. He marched at once upon Paris Troops sent to oppose him (even Ney's corps), espoused his cause

Mar. 13. Ban against Napoleon, issued by the allied monarchs from Vienna. **Flight of Louis XVIII** to Ghent.

Mar. 20. Napoleon entered Paris and began the short rule generally called the *Hundred Days* (Mar 20–June 29)

Mar. 25. Austria, England, Prussia, and **Russia** concluded a new alliance against Napoleon, each engaged to supply 180,000 men. All European nations were invited to join the coalition, and most of them did, but not Sweden, which was engaged in the conquest of Norway The sum of the contingents furnished against Napoleon amounted to over a million men The **Duke of Wellington** in command

May 3. Murat, who had now declared for Napoleon again, was defeated by an Austrian force at **Tolentino.** Naples was captured (May 22); Murat fled to France. The Bourbon king, **Ferdinand,** restored to the Neapolitan throne

June 14. Napoleon, forced to fight, crossed the frontier into Belgium. Engagement at **Charleroi;** the advanced

guard of the Prussians, under Ziethen, forced back

June 16. Battle of Ligny. Napoleon obliged Blucher to fall back The Prussians marched to Wavre On the same day Marshal Ney defeated the Prince of Orange in the **battle of Quatre Bras.**

Meanwhile the army of Wellington had been concentrating This consisted of English, Hanoverians, Dutch, and Germans from Brunswick and Nassau

June 18. BATTLE OF WATERLOO (*Belle Alliance*). Napoleon hurled himself upon Wellington's army, believing that he had insured against the junction of Blucher and Wellington by ordering **Grouchy** to engage the Prussians But Grouchy had allowed Blucher to get away At Waterloo Wellington's army held its lines all day under terrific assaults from the French The arrival of Blucher toward evening probably saved the day. The French were completely defeated, and the army, pursued by Gneisenau, was soon scattered

June 22. SECOND ABDICATION OF NAPOLEON. The emperor was soon obliged to flee before the victorious Allies He reached Rochefort where, after futile attempts to escape to America, he surrendered himself to the British admiral, **Hotham.** He was conveyed to England on the warship *Bellerophon* By unanimous resolution of the Allies, he was taken, as a prisoner of war, to the island of **St. Helena,** in the South Atlantic Ocean There he arrived in October The remainder of his life he spent under close supervision He died May 5, 1821.

July 7. Second capture of Paris by the Allies Return of Louis XVIII ("in the baggage of the allies"). Arrival of the allied monarchs

1815, Sept. 26. THE HOLY ALLIANCE, a document drawn up by the Tsar Alexander I, signed by the Emperor Francis I and by Frederick William III and ultimately by all European rulers, excepting the King of England, the pope, and the Sultan of Turkey. It was an innocuous declaration of Christian principles, which were to guide the rulers in their relations with their subjects and with each other These vague and unexceptionable principles were probably meant by the tsar merely as a preface to some form of international organization, along the lines recommended by the Abbé de St Pierre a century earlier. The importance of the document lay not in its terms, but in its later confusion in the public mind with the **Quadruple Alliance** and more particularly with the reactionary policy of the three eastern powers, which were regarded as bound by a pact directed against the liberties of the people, camouflaged by religion.

Oct. 13 Murat, who had made a reckless attempt to recover his kingdom by landing in Calabria, was captured, court-martialed, and shot

Nov 20. SECOND PEACE OF PARIS. Terms: (1) France was obliged to give up the fortresses of Philippeville and Marienburg to the Netherlands, and Saarlouis and Saarbrucken to Prussia; Landau became a fortress of the Germanic Confederation; the surrounding region, as far as the Lauter River, was ceded to Bavaria To Sardinia, France was obliged to cede that part of Savoy which she had retained in the First Treaty of Paris In general she was restricted to the boundary of 1790 (2) Seventeen fortresses on the north and east frontiers were to be garrisoned for not more than five years by troops of the Allies (at French expense) (3) France was to pay 700,000,000 francs for the expense of the war In addition, art treasures which the French had taken from all over Europe, were now to be returned to their original owners.

Nov. 20. RENEWAL OF THE QUADRUPLE ALLIANCE, between England, Austria, Prussia, and Russia. The members promised to supply each 60,000 men in the event that a violation of the Treaty of Paris should be attempted. They agreed to hold future meetings to facilitate the execution of the treaty This latter provision laid the basis for the ensuing international congresses and the emergence of a system of "government by conference" (*Confederation of Europe*).

C. WESTERN AND CENTRAL EUROPE

1. THE CONGRESS SYSTEM, 1815-1822

During the **Congress of Vienna** there was general agreement between the powers that some measures should be taken to maintain the peace settlements and to guard against the recurrence of war. But efforts to establish a guaranty of the peace terms came to nothing

1815, Sept. 26 **THE SIGNING OF THE HOLY ALLIANCE.** *See* p 603.

Nov. 20. **THE QUADRUPLE ALLIANCE**, signed by the four victorious powers after the battle of Waterloo and the **Second Treaty of Paris** (p 603). It developed the principles laid down in the **Treaties of Chaumont** (p 600) and was concluded for 20 years It aimed at preventing the return of Napoleon or his dynasty, at preservation of the territorial settlement with France, at the protection of Europe against French aggression through co-operative action by the signatories It was further provided, at the urgent request of Lord Castlereagh, that representatives of the signatory powers should meet periodically to discuss common interests and problems (**government by conference**).

1818, Sept. **Congress of Aix-la-Chapelle,** the first of the meetings This settled the question of the French indemnity payments and arranged the withdrawal of allied troops from France. France was admitted to the newly constituted **Quintuple Alliance** (the old Quadruple Alliance being retained, however) Questions of the slave trade, the status of Jews, etc., were also raised and there was indication that the congress system would develop into an effective international machine

1820-1821. **Congresses of Troppau and Laibach,** called to consider the revolutions in Spain and Italy Metternich induced the three eastern powers to accept the **Troppau Protocol,** directed against revolutions which might disturb the peace. Castlereagh was prevented by English liberal opinion and by British tradition from accepting a policy of interference in the affairs of other states (cf British state paper of May 5, 1820) This difference of view marked the first serious weakening of the congress system

1822, Oct. **Congress of Verona,** last of the congresses, summoned to consider the Spanish and Greek situations Castlereagh had committed suicide on the eve of the meeting. His successor, **George Canning** (1770–1827), was unsympathetic to the "European Areopagus," tended to stress the divergence between the "liberal" and the "conservative" powers, and was, above all, determined to prevent intervention in Spain for fear that the effort might be made to extend it to Spanish colonies in the New World He refused to co-operate with the other powers and, though unable to prevent intervention in Spain, succeeded in destroying the congress system.

2. THE BRITISH ISLES

a. THE END OF THE TORY RÉGIME, 1815-1830

1815-1820. The cessation of the Napoleonic wars brought, not the anticipated prosperity, but widespread distress. A long and severe **economic depression** followed Continental markets failed to absorb the overstocked supplies of English manufacturers; governmental demands for military supplies ceased; prices fell; thousands were thrown out of work. The ranks of the unemployed were swelled by more than 400,000 demobilized men. A complete dislocation of the country's wartime economic organization took place

Remedial legislation took the form of (1) further protection for agriculture (primarily in the interest of the landlords) by the **Corn Law of 1815,** which virtually excluded foreign grain from England until home-grown corn should reach the "famine price" of 80 shillings per quarter, after which it was to be admitted duty free (this measure was in part a blow at the working classes in the form of higher prices for bread); (2) **abolition of the 10 per cent income tax** (1816, Mar), but with the concomitant enactment of duties on many articles (raising prices), (3) **deflation of the**

currency (1821, May) by the resumption of specie payments by the Bank of England. But the meager and unsatisfactory character of these "remedies" gave rise to widespread dissatisfaction.

Radical agitation turned particularly to **demands for parliamentary reform**, viewed as a panacea for social and economic ills by such leaders as the journalist, **William Cobbett** (1763–1835). Clubs were formed, petitions presented to Parliament. As distress became more general the radical movement revealed more extreme elements, violence was resorted to, middle-class moderates were driven more and more into the arms of the reactionary Tory ministry.

1816, Dec. 2. Acts of violence by a crowd gathered in **Spa Fields**, London, to hear an address on parliamentary reform precipitated the

1817, Mar. Coercion Acts: (1) temporarily suspending *habeas corpus* for the first time in English history; (2) extending the act of 1798 against seditious meetings; (3) renewing the act for the prevention and punishment of attempts to seduce soldiers and sailors from their allegiance; (4) extending to the prince regent all the safeguards against treasonable attempts which secured the king himself. The government's repressive policy stimulated the activity of extremists in the radical movement, which reached a climax in the

1819, Aug 16. Peterloo Massacre: a crowd gathered at St. Peter's Fields, Manchester, to hear a speech on parliamentary reform and the repeal of the Corn Laws, was charged by soldiers ordered to arrest the speaker; several were killed and hundreds injured The result was the passage of the repressive code known as the

1819, Dec Six Acts: (1) provided for the speedy trial of "cases of misdemeanor"; (2) increased the penalties for seditious libel, (3) imposed the newspaper stamp duty on all periodical publications containing news (a blow at the radical journalists), (4) once more greatly curtailed public meetings; (5) forbade the training of persons in the use of arms; (6) empowered magistrates to search for and seize arms dangerous to the public peace. The Six Acts rendered the cabinet unpopular, but its prestige was again momentarily revived when a band of twenty extremists plotted the assassination of the whole cabinet (they were to be destroyed by dynamite as they dined together), and the seizure of enough cannon to overawe the populace, occupy the Bank of England, and establish a provisional government. This was the famous

1820, Feb. 23. Cato Street conspiracy. The plot was discovered in time; the conspirators were arrested at their rendezvous This conspiracy stimulated anew fears of radicalism, and the cause of moderate reform was dealt a serious blow

1820, Jan. 29. George III, declared insane and represented by the Prince of Wales as regent since 1811, died. The regent became king as

1820-1830. GEORGE IV, promptly had his cabinet institute **divorce proceedings** against the queen, Caroline of Brunswick, whom he had married (Apr 8, 1795) in accordance with an arrangement of his father, but from whom he had separated shortly after the marriage. With the accession of George IV she returned from the Continent to claim her position as queen, was received with tumultuous demonstrations by the public, which viewed her as wronged by a prince whom it had learned to know as debauched and treacherous The king induced his ministers to institute divorce proceedings, and they brought in

July 5. A Bill of Pains and Penalties, depriving the queen of her royal title and dissolving the marriage. The bill passed the House of Lords by a margin of nine votes, but was dropped by the government (Nov. 10) in face of certain defeat in the Commons The result of the fiasco was a serious decline in the cabinet's prestige.

1822-1830. Following the **death of Castlereagh** (1822, Aug 12), the cabinet received a series of liberal accessions: **George Canning** as foreign minister, **Robert Peel** (1788–1850) as secretary for home affairs — son of a self-made factory owner, Oxford-trained, independent, with a mind open to arguments for reform, **William Huskisson** (1770–1830), liberal financier of wide talent, as president of the board of trade Between 1822 and 1830 the liberal wing of the Tory cabinet was responsible for a number of moderate but important reforms: (1) Peel secured passage of **legislation revising the antiquated criminal code** by which more than 200 offenses had become punishable by death The reforms reduced the number of offenses so punishable by about 100, thus making conviction for many misdemeanors more certain, making the punishment more nearly approximate the offense (reflecting the growing humanitarian sentiment of the nineteenth century). (2) **The first breach in the protectionist mercantile system** was made by Huskisson in the budgets of 1823–1825, which reduced duties on certain imports (silk, wool, iron, wines, coffee,

sugar, cottons, woolens, etc), and lifted the secular prohibition on the exportation of wool. Huskisson's reform was a foretaste of the sweeping movement toward free trade which began in the mid-forties (3) **The repeal of the Combination Acts** was largely the work of **Francis Place** (1777–1854), master tailor who had retained his interest in the workers' cause from less fortunate days Place collected a mass of evidence on the hardships occasioned for labor by the Combination Acts, and interested **Joseph Hume** (1777–1855), radical member of Parliament, in the cause Hume secured appointment of a select committee to investigate conditions, and the evidence produced convinced Peel and Huskisson The acts were repealed (1824, June 21) Phenomenal, though short-lived, **development of trade-unionism.** Many strikes followed, accompanied by violence. **A new law** (1825, July 6) allowed workers to combine to secure regulation of wages and hours of employment, but, in effect, forbade them to strike by prohibiting the use of violence or threats, and introducing summary methods of conviction

The sharp divergences in the cabinet between liberal and right-wing Tories had been smoothed over by the conciliatory **Lord Liverpool,** continuously prime minister from 1812 till 1827, when a stroke of apoplexy obliged him to resign.

1827, Apr. 30. Canning succeeded as prime minister with a cabinet of liberal Tories and moderate Whigs, but died soon after (Aug 8)

1827, Aug.—1828, Jan. Cabinet of the conciliatory but incapable **Lord Goderich** (1782–1859)

1828, Jan.—1830, Nov. Cabinet of the **Duke of Wellington,** from whose great distinction and wide popularity much was hoped But Wellington was sympathetic with the reactionary group in his cabinet and alienated the liberal Tories, who resigned The complete failure of Wellington's policy in the Near-Eastern crisis (p 723) seriously discredited the cabinet.

1828, July 15. The Corn Law. The patent hardships (for consumers) of the Corn Law of 1815 obliged Wellington to introduce a measure permitting grain to be imported at any time and fixing duties on a sliding scale (high when the price of English corn was low and reducing the duty as the English price advanced). The act alienated the landlords, yet won Wellington no credit with the liberals, who remembered that the duke had earlier defeated the law when it was introduced by Canning.

1829. The Wellington cabinet again alienated its own supporters by its **Catholic emancipation policy** When **Daniel O'Connell** (1775–1847), leader of the Catholic emancipation movement, was elected to Parliament in 1828 from the County of Clare in Ireland, the Wellington cabinet was faced by a crisis Under the provisions of the **Test Act** (p 427), no Catholic (or Protestant Nonconformist) could hold public office Wellington and Peel were bitterly opposed to emancipation, but feared that the failure to relieve the Catholics of their disabilities would precipitate civil war in Ireland (the Catholic movement had been gathering strength steadily since the turn of the century).

1828, May 9 The **Test Act was repealed,** and

1829, Mar.-Apr. The **Catholic Emancipation Bill** was driven through Parliament by Wellington in the face of vigorous opposition from the reactionary Tories It granted the Catholics the right of suffrage and the right to sit in Parliament, and declared their eligibility for any public office, save those of lord chancellor of England and lord lieutenant of Ireland — all this in return for an oath denying the pope any power to interfere in the domestic affairs of the realm, recognizing the Protestant succession, and repudiating every intention to upset the Established Church.

The radical and violent **agitation for parliamentary reform** which followed the Napoleonic wars yielded in the twenties to more moderate demands advocated by individual Whigs, notably **Lord John Russell** (1792–1878) The **July Revolution** in France, a triumph for the middle class (p 628), stimulated the movement

1830, June 26. George IV died, and was succeeded by his brother

1830-1837. WILLIAM IV (1765–1837) The accession necessitated a general election (a requirement abolished by the Reform Bill of 1867), and the reform of the House of Commons became a campaign issue There was a turnover of some 50 seats, almost all of them going to proponents of reform. In caucus the Whigs adopted reform as their program Wellington maintained an intransigent attitude, but was forced to resign (Nov. 16), ending a continuous Tory rule (with one brief interval) of nearly half a century.

b. AN ERA OF REFORM, 1830-1846

1830-1834. The Tory cabinet of Wellington was succeeded by the Whig

cabinet of **Earl Grey** (1764–1845), including a membership of distinguished talents, widely representative of liberal opinion and determined on **parliamentary reform.** The existing system of representation reflected gross inequalities, the result of ancient provisions whose effect was greatly exaggerated by the growth and migration of population under the impact of the industrial revolution In *pocket boroughs* the patron enjoyed the absolute right of returning candidates. In *rotten boroughs* the elections were controlled by bribery and influence. On the eve of the reform not more than one-third of the House of Commons was freely chosen. Electoral inequalities constituted a second serious abuse. in various boroughs the right to vote rested on the possession of a forty-shilling freehold or some other financial basis, certain residence qualifications, membership in the governing body of the municipality (*close boroughs*). Even in boroughs of democratic electoral qualification the number of electors was usually small enough to be effectively bribed. Electoral conditions in the counties were better, but abuses were many Grey's ministry undertook to reform this situation by redistributing parliamentary seats and extending the franchise

1831, Mar. 22. The First Reform Bill, the work of Lord Durham and Lord John Russell, was passed on second reading by a majority of one, but defeated by amendment in the committee stage

Apr. 19. Grey secured a **dissolution of Parliament,** followed by a bitterly fought election, with public opinion warmly supporting "The Bill, the whole Bill, and nothing but the Bill" The election was a Whig triumph.

Sept. 21. The Second Reform Bill passed the new House of Commons with a majority of 109, but the House of Lords threw the measure out on second reading (Oct. 8). The ministry prorogued Parliament and prepared a new bill. Extra-parliamentary agitation now became violent, riots broke out, the mob held Bristol for two days

1832. THE THIRD REFORM BILL was passed by the Commons with a larger majority (Mar 23). But the Lords in committee demanded amendments unacceptable to the ministry. They were greeted by a new blast of popular agitation. With the country on the verge of civil war, Grey advised the king to create enough new peers to pass the measure. The king refused, the cabinet resigned, Wellington was unable to form a ministry. The king recalled Grey, promised to appoint the new peers, but instead induced the recalcitrant Tories to withdraw during the final vote in the Lords (June 4)

The act disfranchised 56 *pocket* and *rotten* boroughs (returning 111 members), 32 small boroughs were deprived of one member each The available 143 seats were redistributed 22 large towns received 2 each, 21 towns a single member each, county membership was increased from 94 to 159; 13 remaining members went to Scotland and Ireland. Extension of the franchise took the form of eliminating antiquated forms in the boroughs and giving the vote to all householders paying £10 annual rental. In the counties the area of enfranchisement was enlarged by retaining the 40-shilling freehold qualification for those owning their own land; other cases were covered by a £10 qualification for freeholders, copyholders, leaseholders for 60 years; and a qualification of £50 was fixed for leaseholders of shorter terms and tenants-at-will.

July-Aug. Scotland and Ireland were subjects of separate bills, in which the franchise was remodeled upon lines similar to those adopted in England.

The Reform Bill shifted the balance of power to the industrial and commercial class, revealed that the House of Lords could not defy the popular will, opened an era of reform. It failed to concede the secret ballot and left the bulk of the population still disfranchised

1831. Tithe War in Ireland. The Irish, overwhelmingly Catholic, resented the enforced payment of **tithes** to support the Established Episcopal Church and resorted to violence.

1833, Apr. A Coercion Bill gave the lord lieutenant unlimited powers of suppressing public meetings, of subjecting disturbed districts to martial law.

Aug. 2. The Irish Church Temporalities Bill introduced by the government as a counterpoise to coercion. The bill established a graduated tax on clerical incomes to relieve ratepayers from the burden of parish expenses, and provided for the reduction of the Irish episcopate. The bill failed to provide for the application to secular purposes of the savings effected and so outraged O'Connell and his following.

Aug. 23. Abolition of slavery in the colonies. Edward Stanley, Irish secretary, had incurred such unpopularity that he was transferred to the colonial secretaryship where he carried the bill emancipating the slaves in the British colonies. The law was the crowning act in

the long campaign of the abolitionists, led by **William Wilberforce** (1759–1833), agitation dating particularly from the abolition of the slave trade (p. 826). The act provided for the immediate emancipation of children under six, a period of apprenticeship for those over six (eliminated four years later), and compensation of £20,000,000 to slaveowners

Aug. 29. Factory Act. Investigations had revealed the frightful working conditions to which children were often subjected and against which the factory acts of 1802 and 1816 gave quite inadequate protection The result was the Factory Act of 1833, carried in the face of opposition from the Tories and many Whigs (imbued with *laisser-faire* doctrine) It forbade employment of children under 9 years, restricted labor of those between 9 and 13 to 48 hours a week or 9 in a single day, and of those from 13 to 18 years to 69 hours a week or 12 in a day. Children under 13 were to have 2 hours' schooling per day. A system of paid inspectors was set up The law applied only to factories in the textile industries and was in itself inadequate, but it was the forerunner of further remedial legislation

1834. Growth of trade-unionism. The movement had taken a phenomenal but short-lived spurt after the repeal of the Combination Laws in 1825, and was given momentum by the general dissatisfaction of the workers with the Reform Act of 1832. The pioneer was **John Doherty** (1797–1854), at whose instigation the **National Association for the Protection of Labor** (a federation of about 150 unions) had been formed in 1830. As the movement spread after 1832, Doherty and **Robert Owen** (1771–1858) decided to attempt to form a general union of skilled and unskilled laborers

Jan. The Grand National Consolidated Trades Union was organized. Within a few weeks it had over 500,000 members. The avowed policy was to promote a **general strike** for an eight-hour day. But the organization suffered from the confusion of trade-union aims with the co-operative and socialist aspirations of Owen and his disciple, **William Thompson** (1783–1833). The Grand National made one or two small and futile experiments in co-operative production, but spent most of its energies in a series of aggressive and unsuccessful strikes. The government became seriously alarmed and resorted to drastic measures.

Mar. Six Dorchester Laborers, who had formed a lodge of the Grand National, were sentenced to seven years' imprisonment. The Grand National dissolved in Oct, Owen quit the field, and a period of general apathy followed in the labor movement

Apr. 22. Quadruple Alliance with France, Spain, and Portugal (p. 645).

July 9. Grey resigned.

July-Nov. First cabinet of **Lord Melbourne** (1779–1848) a right wing Liberal (the terms *Liberal* and *Conservative* were beginning to replace the older *Whigs* and *Tories*) The king had hoped for a coalition government (with Peel), was disappointed at the reconstitution of the Whig ministry and welcomed an early opportunity to accept the **resignation of Melbourne** (Nov. 15), who felt the strength of his party shaken by the loss of the leader in the House of Commons, **Lord John Althorp,** who became Earl Spencer on the death of his father

Aug. 14. The New Poor Law Earlier relief legislation was fundamentally altered and given coherent form by the new law, which limited payment of charitable doles to sick and aged paupers and established workhouses where able-bodied paupers were put to work The law ended the vicious system of giving the dole to laborers as a supplement to low wages It supplanted the great Poor Law of 1601 and its amendments of 1722, 1782, and 1795

Nov.-1835, Apr. The short-lived first Peel ministry. In the general election of Jan 1835 Peel set forth his conceptions of a new **liberal Conservatism** (*Tamworth Manifesto*): acceptance of the Reform Act of 1832, readiness to proceed further with "judicious reforms" He won wide support from the moderates of both parties, actively undertook the cause of reform, but was defeated shortly thereafter on the Irish question

1835-1839. Second Melbourne cabinet. Melbourne promptly undertook the reform of the internal organization and administration of municipal government — untouched by the Reform Act, generally in the hands of self-elected, irresponsible, and corrupt councils

1835, Sept. 9. The Municipal Corporations Bill provided a uniform plan of government for all boroughs and cities (London and 67 small towns excepted): a town council was to consist of mayor, aldermen, and councilors, the last-named elected for three years by the ratepayers, together with the freemen who had survived the Reform Act (the freemen were a limited number of privileged persons who had formerly chosen the corporations) The mayor was to be chosen annually, the alder-

men every six years by the councilors from among their own number

Further reforms followed in 1836, notably legislation permitting civil marriages, some equalizations of episcopal and clerical incomes, permission to prisoners charged with felony to have full benefit of counsel, etc

William IV died (1837, June 20) and was succeeded by his youthful niece,

1837-1901 VICTORIA (1819–1901), then eighteen Victoria was the daughter of the Duke of Kent (d 1820) and the duchess, a princess of Saxe-Coburg (for the Hanoverian dynasty see p 610), who had brought up Victoria in England, but surrounded her by German influences, notably that of her brother Leopold (King of the Belgians, 1831, p 623) Victoria's education had been solid and sensible, and she brought to her heavy duties graciousness and poise rarely associated with one of her age She was self-willed on occasion, "rebuked" her ministers, but made no serious attempt to invade their rights under the parliamentary system despite the influence of her German adviser, **Baron von Stockmar** (1787–1863), who urged her to take a stand of greater independence

The Melbourne government favored a conciliatory Irish policy (opposed by the Conservatives), it was faced by three Irish problems — poor relief, municipal reform, and the settlement of tithes

1838, July 31. The **Poor Law Bill** extended provisions similar to those in the **New Poor Law** to Ireland It was opposed by the Irish members of the House of Commons on the ground that the poor were too numerous to be provided for in workhouses A second bill **converted the tithes** into a fixed rent charge, 75% of their nominal value and payable by the landlord The municipal corporations in Ireland were controlled by self-appointed Protestant councils **A new municipal act** (1840) conferred the right to vote on all persons paying £10 rent a year

Weakened by attack on its policy in England, Ireland, and Canada (p. 793) the Melbourne government was in no position to survive the disaffection occasioned by the settlement of the

1839, Apr. 9. Jamaica problem. Following emancipation of the slaves, economic conditions had grown rapidly worse for the planters, who were guilty of great brutality toward their former slaves. The upshot was the suspension for five years of the **Jamaica Constitution**, a drastic measure carried by only five votes in the Commons. Melbourne felt his position seriously shaken, resigned soon after (May 7)

May Cabinet crisis. The queen turned regretfully to Wellington, then to Peel The latter refused to form a ministry unless certain of the queen's lady attendants (all members of Whig families) were changed (the **Bedchamber Question**). The queen was indignant and turned again to Melbourne, who formed

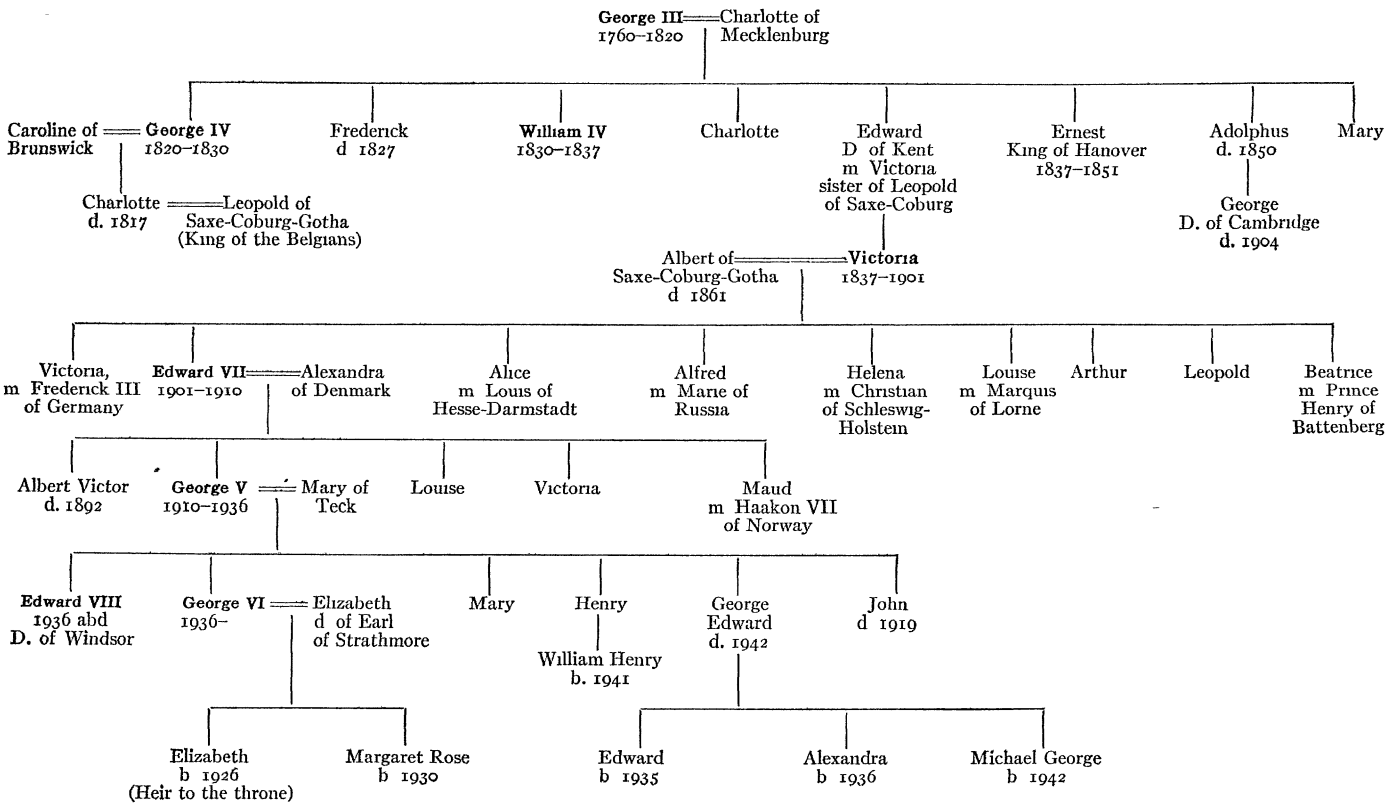
1839, May—1841, Aug. The third Melbourne ministry

1839. CHARTIST AGITATION. The Chartist movement was a direct outcome of dissatisfaction with the reforms of the Whigs among the laboring classes and of the failure of the trade-union movement. It had its origin when (1836) a **Workingmen's Association** in London set forth its program in a petition or **charter** to Parliament. This demanded: (1) manhood suffrage; (2) vote by ballot; (3) abolition of property qualification for members of Parliament, (4) payment of members, (5) equal electoral districts, (6) annual Parliaments. The working public was rapidly converted to this program by missionaries who toured the country, held huge meetings and organized torchlight processions Gradually more radical elements emerged, notably **Feargus O'Connor** (1794-1855) who headed a **party of physical force** opposed by **William Lovett's party of moral force,** both within the larger movement

Feb. The first **National Convention of Chartists** met in London

May 13 The charter was presented to Parliament, which rejected it. The convention adjourned to Birmingham, issued a radical manifesto appealing to members to defend liberty by use of arms.

July Serious riots in Birmingham and elsewhere.



Nov 4. In a riot at Newport (Wales) the crowd was fired on by the constables and 20 were killed **John Frost,** the leader, and others were sentenced to death, but ultimately transported to the penal colonies The movement then turned back to more moderate channels.

Nov. 3. Outbreak of the Opium War with China (p 878)

1840, Jan 10. A pamphlet by **Rowland Hill** (1795–1879) on postal reform led to the institution of **uniform penny postage** (for letters under half an ounce to any point in the United Kingdom), a substitute for the previous exorbitant rates and the cumbersome system of charges varying with size, weight, and shape of letters — a revolution in communication.

Feb. 10. The queen married her first cousin, **Albert of Saxe-Coburg-Gotha,** a sober and sensible prince, to whom

The British Royal House (Hanover; Saxe-Coburg; Windsor)

she became profoundly devoted The marriage was generally condemned by Conservative leaders, and Albert suffered from rumors that he was a "papist" (although all his family were Lutheran), from the demands of the queen that he be named *King Consort* (he was made *Prince Consort* by royal letters patent only in 1857), and that he be voted a civil list of £50,000 (reduced to £30,000), etc Albert succeeded Melbourne as royal private secretary, and in time became, with the queen, joint ruler of the nation, in fact if not in name

In the spring of 1841 Melbourne's government was twice defeated on a tariff measure in the Commons, appealed to the country, and was again defeated by the Conservatives

1841, Aug. 28. Melbourne finally resigned following a vote of censure, and was succeeded by

1841, Sept.—1846, June. The second Peel cabinet, which included a number of men of distinction and young men of promise, notably **William Ewart Gladstone** (1809–1898) as vice-president of the board of trade Peel turned first to the deficit, the most pressing problem He **modified the sliding scale of 1828 on corn imports** (1842, Apr. 29) to encourage importation, **removed prohibitory duties** and drastically reduced duties on a vast number of imports, especially raw materials and prime foodstuffs; **revived the income tax** to provide against possible losses from lower tariffs, **abolished import and export duties on wool.** Peel, a protectionist, was already moving in the direction of free trade

1842, Apr 12-May 12 Second National Convention of Chartists in London. A second petition to Parliament was again rejected (May 3) and a "turn-out" followed in August In Lancashire the strike spread rapidly and the moderates were again outmaneuvered by the radicals Nevertheless the movement gradually collapsed. It remained in eclipse until 1848, when a last national convention was held, a huge demonstration arranged, and the charter once more presented to Parliament

Aug. 9. Webster-Ashburton Treaty with the United States (p 773)

1844. The Bank Charter Act, designed to meet the problem presented by the rapid growth of joint-stock banks These issued great quantities of paper money at a time when British gold reserves were being depleted by shipments abroad, largely to the United States. The Bank Charter Act separated the banking department from the note-issuing department of the Bank of England; required that note issues of the Bank should be covered by coin or bullion, except for £14,000,000 covered by government securities, prohibited new banks from issuing notes and limited old banks to the existing amount The tendency of the act was to eliminate by degrees all notes except those of the Bank of England

1845. Peel's second free-trade budget eliminated export duties entirely, and also duties on cotton, glass, etc

June 15. Oregon Boundary Treaty with the United States (p 773)

1845. Formation of the **National Association of the United Traders for the Protection of Labor,** marking the revival of the trade-union movement The new organization undertook to deal with disputes between master and men, look after the interests of labor in Parliament. The program showed that the movement had discarded the aggressive policy and ambitious aims of the years 1830–1834. Strikes were deprecated and the idea of the general strike abandoned in favor of conciliation and arbitration

1845-1846. Anti-Corn Law agitation. This gradually absorbed much of the interest of the working classes It centered in Manchester and was fostered by the political leaders of the **Manchester School,** notably **Richard Cobden** (1804–1865) and **John Bright** (1811–1889), both manufacturers of middle-class origin. Their interests extended not only to free corn (i.e grain import), but to **free trade** in general, in which they saw a boon both for the workers (cheap food and higher wages) and factory owners (cheap raw materials and the expansion of markets). The **Manchester Anti-Corn Law Association** (1838) was launched in the midst of the economic depression which began in 1837 Similar organizations rapidly appeared elsewhere, and all joined to form the **Anti-Corn Law League** (1839). The widespread propaganda of the league was met by the bitter opposition of Conservative landlords, but was carried to the farmers as well as the workers. The farmers were attracted by the argument that free trade meant low prices for means of subsistence, and cheap food meant low wages, by which England would be able to compete successfully with foreign competition The argument that appealed to the workers was as follows· the abolition of the corn duties would reduce the price of food, which would enable the people to spend more on manufactured goods and so increase the demand for them. This in turn would lead to more employment and higher wages in industry

Peel's support for Corn Law reform finally came as a result of the ruin of the Irish potato crop and the consequent threat of famine in the island unless prompt relief measures were taken

1845, Nov. 22. The Whig leader, **Lord John Russell**, announced his conversion to free trade Unable to forestall a Whig success by the enactment of a repeal measure, **Peel resigned** (Dec 5), but returned to office (Dec 20) when Russell was unable to form a government

1846, Jan. ff. New free-trade proposals met with stiff resistance from a block of Conservatives led by **Benjamin Disraeli** (1804–1881), who denounced Peel for betraying the protectionist principles of his party A struggle of two months was followed by the

1846, June 6. REPEAL OF THE CORN LAWS. After passage of both the Corn and Customs bills by the Commons (May 15), Wellington again induced the Lords to yield The **Corn Law** provided for the immediate repeal of earlier legislation and fixed the duty on corn at a shilling a quarter from 1849, preserving a small protective duty in the intervening years. The **Customs Law** abolished the duties on all live animals and nearly every kind of meat, and reduced the duties on cheese, butter, and other foods. Many duties on manufactured goods were abolished and others greatly reduced

June 29. Peel's government was overthrown by a revolt led by **Benjamin Disraeli**, who objected to a new coercion bill for Ireland

c. PALMERSTON AND RUSSELL, 1846-1868

1846, July—1852, Feb. Cabinet of Lord John Russell.

1847-1848. Young Ireland. The Irish famine of the forties resulted in the growth of a revolutionary movement in the island. Even before the **death of Daniel O'Connell** (1847), the leadership of the Irish nationalists had passed to the **Young Ireland Party** (founded 1840), under **William Smith O'Brien** (1803–1864). This radical group rejected O'Connell's peaceful methods to secure repeal of the union. A series of agrarian crimes in the autumn of 1847 was followed by the suspension of the *Habeas Corpus Act* for Ireland. This measure, together with news of the revolutions on the Continent, precipitated an **insurrection in Tipperary** (1848, July 29), O'Brien hoping that the peasantry would support it. The rising proved abortive, as the rebels fled before a squad of constabulary

1850. The Don Pacifico affair. Don Pacifico was a Moorish Jew, but a British subject. He held large claims against the Greek government which he pressed with vigor until an anti-Semitic mob burned his house in Athens (1849, Dec). Palmerston ordered a British squadron to the Piraeus to force a settlement of this and other claims on the Greek government. The Greeks proving obstinate, the British laid an **embargo on all Greek vessels** in the Piraeus and finally seized them (1850, Jan) After abortive mediation by the French, the Greeks were eventually forced to comply (Apr 26) Palmerston defended his action in his greatest parliamentary speech (June 29), in which he appealed to British pride and nationalism (*civis Romanus sum*)

1850-1851. Formation of the **Amalgamated Society of Engineers,** a new type of labor organization based on high contributions and provision of benefits as well as direct action and collective bargaining A number of further "amalgamated societies" were organized and their leaders gradually assumed control of the trade-union movement

The Oxford Movement centered at Oxford, and had as its chief **J. H. (later Cardinal) Newman** (1801–1890) It endeavored to prove that the doctrines of the Anglican Church were identical with those of the Roman Catholic Church, therefore that every Catholic doctrine might be held by Anglicans In 1845 Newman and many of his associates seceded to the Church of Rome, whereupon the English people, thoroughly Protestant, became alarmed, fearing that the real object of the *Tractarians* (so-called from the tracts they published) was to reconcile England with Rome Popular apprehension of "papal aggression" was stirred by a papal bull (1850, Sept 30) setting up a hierarchy of bishops in England who were to derive their titles from English sees created by the bull The sympathies of the Whig ministry, and especially of Lord John Russell, the prime minister, were with the people

1851, Feb The Ecclesiastical Titles Bill, which forbade the assumption by priests and bishops of the Roman Catholic Church of titles taken from any territory or place within the United Kingdom, and declared null and void all acts of possessors of such titles The law remained a dead letter and was repealed in 1871

May 1-Oct. 15. The Great Exhibition of 1851 in Hyde Park, for which Prince Albert was largely responsible, in-

cluded exhibits from all nations, and was the first of its kind *Prosperity* was the note it sounded, and it was confidently expected that the exhibition would inaugurate an era of international peace.

Dec. Conflict between the queen and Lord Palmerston. Victoria had long been dissatisfied by the foreign minister's indiscretions and boisterous nationalistic policy, to say nothing of his tendency to ignore royal suggestions and advice. After the Don Pacifico incident, the queen, assisted by Prince Albert and Baron Stockmar, drew up a famous memorandum demanding that the queen be kept informed and that, once she had approved a measure, it should not be arbitrarily altered Palmerston promised to mend his ways, but in the following months a new crisis occurred Palmerston at once approved of the *coup d'état* of Louis Napoleon in France (Dec 2), but the cabinet, adopting the queen's attitude, on Dec 5 instructed the ambassador at Paris to carry on as though nothing had occurred, passing no judgment The resulting embarrassment enabled the queen to force **Palmerston's dismissal** (Dec 19)

1852, Feb. 20. Lord John Russell's cabinet was defeated on a militia bill

Feb. 27-Dec. 17. Cabinet of Lord Derby (Conservative)

1852, Dec. 28—1855, Jan. 20. Lord Aberdeen's ministry, with a coalition of Whigs and Peelites

1854, Mar. 28. Outbreak of the Crimean War (p 727).

1855, Feb. 5—1858, Feb. 22. First Palmerston cabinet, resulting from popular dissatisfaction with Aberdeen's policy in the war

1857. The Indian Mutiny (p 870)

1857-1858. War with China (p 879)

1858, Feb. 25—1859, June 11. Second Derby ministry, after Palmerston's government was defeated on a bill to increase the penalty for conspiracy to murder (following French representations after the **Orsini bomb affair,** p 643)

1858, June. An act brought to an end the property qualifications for members of Parliament

July 23. Removal of disabilities on Jews.

Aug. 2. India Bill, by which the British East India Company's political powers were brought to an end and the government of India was assumed by the crown (p 870)

1859, June 18—1865, Nov. 6. Second Palmerston ministry, after the defeat of Lord Derby's reform bill

1860, Jan. 23. The famous **commercial treaty signed with France** (*Cobden-Chevalier Treaty*) marking a great advance toward free trade on the part of France

1861, Nov.-Dec. The Trent affair. Crisis in Anglo-American relations resulting from the Civil War (p 776).

Dec. 23. Death of the Prince Consort. For a period of many years Queen Victoria withdrew more and more from all public functions and thereby suffered a period of marked unpopularity

1864, Apr. 28. Great Britain abandoned the protectorate over the **Ionian Islands** (assumed in 1815) and made over the islands to Greece, in order to stabilize the new Danish dynasty (p 710)

1865, Oct 18. Death of Lord Palmerston.

1865, Nov. 6—1866, June. Second ministry of Lord John Russell. On the death of Palmerston, Russell succeeded as prime minister. He was faced by urgent demands for further electoral reform, which he had previously sponsored in a perfunctory way Only one man in six possessed the vote, and workers were virtually excluded Repeated measures for franchise extension had been defeated in the Commons, while industrial growth had exaggerated electoral anomalies left by the Act of 1832

1866, Mar. Russell introduced an anodyne measure which was defeated as the result of the defection of a section of the Liberals Russell resigned in June

1866, July 6—1868, Feb. 25. The third Derby ministry, in which the dominant figure was to be **Disraeli,** once more leader of the House of Commons Workers' demands for suffrage reform spread rapidly, and Disraeli was literally obliged to adopt the Liberal program of electoral reform, which in the end he had to extend radically, despite the opposition of many Conservatives

1867, Aug. 15. THE SECOND REFORM BILL extended the suffrage in *boroughs* to all householders paying the poor rates and all lodgers of one year's residence paying an annual rent of £10; in the *counties*, to owners of land of £5 annual value, to occupying tenants paying £12 annual rental All boroughs of fewer than 10,000 population lost the right of sending two members to the Commons, Manchester, Birmingham, Liverpool, Leeds were given each a third member, two other large towns, Salford and Merthyr, received a second member, nine *new boroughs* were created; 25 additional members were allotted to the counties The **Scotch Reform Bill** of 1868

(July 13) founded generally upon the same principles as the English bill, gave Scotland seven new seats The **Irish Reform Bill** of 1868 (July 13) reduced the borough franchise requirement, left the county franchise unaltered, and left the Irish representation unchanged A radically democratic step had been taken· the electorate was increased from roughly 1,000,000 to 2,000,000 Disraeli had "dished the Whigs," but had violated his party pledges and had taken a step bitterly opposed by many Conservatives and described even by Derby as a "leap in the dark "

1867-1868. Abyssinian expedition (p 834).

d. DISRAELI AND GLADSTONE 1868-1894

1868, Feb. 29—Dec 2. First Disraeli ministry, which came to an end after the sweeping Liberal victory in the elections of Nov 1868

1868, Dec. 9—1874, Feb. 17. First Gladstone ministry. Gladstone (1809–1898) was the son of a Liverpool merchant, a product of the aristocratic influences of Eton and Christ Church, Oxford He was widely learned, profoundly devout, possessed of typical Scotch industry He had entered politics as a Tory, seceded with the Peelites, ended as a Liberal He possessed a vast knowledge of internal problems, especially of financial questions In the field of foreign relations he was hampered in an age of imperialist expansion by humanitarian principles and sympathies with minorities abroad

1868-1869. The Irish Question. Prior to taking office Gladstone had declared: "My mission is to pacify Ireland " The **Fenian Brotherhood,** formed in 1858 in New York, collected funds among the American Irish, aimed to overthrow British rule in Ireland **O'Donovan Rossa** and **James Stephens** were arrested (Sept Nov 1865) and supplies of arms were taken. A Fenian invasion of Canada (1866) failed (p 796) A general rising in Ireland miscarried (1867, Mar.). Further "outrages" followed, notably the attempt to deliver two prisoners from Clerkenwell, London (Dec 13), when a blast in the wall caused the death of 12, the injury of 120 more Gladstone attacked what he considered the causes of the discontent —, disestablishment and land tenure (neither of which had figured among Fenian aims)

1869, July 26. The Disestablishment Act provided that the Irish (Episcopal) Church should cease to exist as of Jan. 1, 1871 The Church's endowments were to be taken away with compensation for interests affected, church buildings, etc., were to be reserved to a new voluntary organization, the tithe rent-charge on estates, the Church's chief source of revenue, was to be purchased by the landlords for some £8,212,500, provision was made for the care of Episcopal clergymen during their lifetime Irish Catholics were no longer to be obliged to support a state church of which they were not communicants. Despite the opposition of the Episcopal clergy, the Conservatives in general and the House of Lords in particular (again threatened with the creation of new peers), the bill passed

1870, Aug. 1. Irish Land Act. The sufferings of the Irish were in considerable measure due to the prevalent system of **land tenure.** There was a vast difference between the rural landlord in England and his Irish counterpart — the former putting money into the land and making improvements for the tenants, the latter merely drawing rack-rent which he often spent in England, leaving the tenants to do everything for themselves, and often evicting them wholesale without compensation for improvements In 1850 a **Tenant-Right League** was founded to obtain for the tenant the "three F's" — a **fair rent, fixity of tenure,** and **free sale.** The movement spread rapidly In 1870 Gladstone introduced an Irish Land Bill. It contained no recognition of the "three F's," but it gave the tenant the right to compensation for disturbance (that is, eviction) and for improvements (if, without fault on his side, he was evicted, but not where the ejection was for non-payment of rent) The **Bright clauses** of the bill facilitated the creation of a peasant proprietorship by allowing government loans to be granted to tenants who wished to buy their holdings from their landlords The act did not extinguish the evils with which it was designed to deal. It interfered with the landlord's right of disposing of his land on the absolute basis of free contract, but it did not protect the tenant against increased rent, nor did it give him security of tenure. The Act of 1870 was important chiefly as the first of a great series of Irish agrarian laws It did not allay Irish agitation. Even while the bill was in progress, in the spring of 1870, agrarian outrages occurred in County Mayo. By the **Peace Preservation Act** (Apr 4), the government increased its powers of repression

1870, Aug. 9. An important **Education Bill** aimed to remedy the existing chaotic situation: nearly half of the 4,000,000 children of school age were unprovided

for, about 1,000,000 attended schools attached to the Church of England, government inspected and supported by voluntary subscriptions supplemented by government grants, another million attended schools unsupported by the government and uninspected On the whole English education was far inferior to that in Prussia, Switzerland, the United States The Education Bill, brought in by **W. E. Forster** (1818–1886), provided for two types of schools: (1) those voluntary schools doing good work were to be retained, government grants were to be increased, but they were to receive no aid from local rates, (2) elsewhere *board schools* (under the control of locally elected boards) were to be set up and maintained by government grants, parents' fees, local rates (the question of compulsory attendance was to be passed on by each local board) The question of religious education was crucial: the voluntary schools were permitted to continue religious instruction, all denominational religious instruction was prohibited in the board schools — a compromise satisfying neither of the extreme groups

1870, June 4. Order in council reforming the civil service, by providing that candidates for ordinary posts should, in the discretion of department heads, be given competitive examinations. The new order was speedily adopted by almost all the chief departments, the foreign office remaining a notable exception

1871, June. The University Tests Act conferred on Cambridge and Oxford students the right to obtain university degrees and to hold lay offices in colleges and universities without subscribing to any religious tests

The Army Regulation Bill virtually reorganized the British army, a reform associated with the name of **Edward Cardwell** (1813–1886), the secretary of war. The system of purchasing commissions was abolished, short service was introduced, which made possible a well-trained reserve (six years with the colors and six in the reserves, instead of twelve years' service); etc

1872. The Ballot Act made voting secret for the first time.

Sept. 14 Settlement of the Alabama Claims (p 781)

The prestige of the Gladstone ministry rapidly declined· the Education Act alienated nonconformists and high churchmen alike; reduction in the number of dockyard workers caused dissatisfaction; the elimination of the purchase of army commissions irritated the upper classes When Gladstone introduced a bill to unite Irish colleges in a single university open to Catholics and Protestants alike, he was defeated and resigned (1873, Feb) Disraeli was reluctant to take office as yet. Gladstone returned, sponsored a notable reform of the law courts in

1873. The Judicature Act, which, along with supplementary acts, consolidated the three common law courts, chancery, and various other tribunals into one **supreme court of judicature,** to consist of two principal divisions (1) The *high court of justice* — (*a*) queen's bench, (*b*) chancery, (*c*) probate, divorce, and admiralty; (2) the *court of appeal*, from which appellate jurisdiction lay to the House of Lords, strengthened in 1876 by the addition of three (later four) law lords of life tenure

1874, Feb. Gladstone appealed to the country in a **general election,** was overwhelmed by the Conservatives, who succeeded to power with Disraeli as prime minister

1874, Feb. 21—1880, Apr. 22. The second Disraeli ministry came to power with the expressed purpose of "giving the country a rest" at home and pursuing a foreign policy more in accord with the demands of British prestige and interests Certain measures of a domestic character were passed, notably a

1875. Public Health Act, a codification of earlier legislation which remains even today the backbone of English sanitary law, an

1875. Artisans' Dwelling Act, the first serious attempt by the government to grapple with the problem of the housing of the poor.

1876. The Merchant Shipping Act, aimed to prevent overloading ships or permitting use of unseaworthy vessels (the act a result of persistent efforts of **Samuel Plimsoll** [1824–1898], the "sailors' friend").

But the country's attention was riveted on foreign and colonial affairs.

1875, Nov. 25. Purchase of the Suez Canal shares. The completion of the Suez Canal under the direction of a Frenchman, Ferdinand de Lesseps (1805–1894), and under the auspices of an international company, greatly shortened the distance to India and the east and heightened English interest in Egypt **Khedive Ismail** of Egypt, who held 44% of the shares, was in perennial financial difficulties, and finally considered mortgaging his shares in Paris. This information came to Disraeli's attention, he sprang a *coup* by negotiating purchase of the shares on his own responsibility. A grateful Parliament subsequently ratified the act. This marked the beginning

of British penetration and presently occupation of Egypt (p 832)

1876, Apr. **The Royal Titles Bill** declared the queen *Empress of India*, deeply flattered Her Majesty, was the occasion of great enthusiasm in India, caused considerable opposition among educated Englishmen — the title was "un-English" and in disrepute through the fall of Emperor Napoleon III and the tragedy of Emperor Maximilian of Mexico (the opposition was allayed by the promise that she would not use it in England)

Aug. **Disraeli** was elevated to the peerage as the **Earl of Beaconsfield**

During the remainder of its term of office the government was absorbed by the crisis of 1875–1876 in the Near East, culminating in the **Russo-Turkish War** and the **Congress of Berlin** (p 735), by the **Afghan War** of 1878–1879 (p. 867), and by the war with the **Zulus** in South Africa (p 853) Beaconsfield's popularity had reached its zenith when he returned from the Congress of Berlin

1879. A severe **agricultural depression** with the worst harvest of the century accompanied by a decline in trade, strikes, the unpopular Afghan and Zulu wars, obstruction by the new **Irish Home Rule Party** in the House of Commons

Nov. **Gladstone** roundly denounced the government, alike for its imperialism and its domestic policy, in a series of speeches to his **Midlothian** constituents

1880, Mar. 8. Beaconsfield appealed to the country in a general election, his party was defeated, and he resigned (Apr 18), to be succeeded by Gladstone

1880, Apr. 28-1885, June 8. **Second Gladstone ministry.** Much of the session of 1880 was occupied by the famous case of **Charles Bradlaugh,** newly elected to the Commons, who as an atheist refused to take the oath (including the words "So help me God") and insisted on an affirmation instead **An Affirmation Bill** was twice defeated (1881, 1883), Bradlaugh changed his mind, offered to take the oath, was refused the right (as a freethinker). Subsequently he was involved in eight lawsuits, was unseated and re-elected repeatedly, was finally permitted to take the oath (1886, Jan) Bradlaugh secured passage of a bill (1888) legalizing affirmation both in the Commons and the courts, removing the last religious disability for membership in the House

1880, Sept. 13. **First Employers' Liability Act,** granting compensation to workers for injuries not their own fault.

1881-1882. **The Irish Question.** Foundation (1871) of the parliamentary **Home Rule for Ireland Party** by **Isaac Butt,** who aimed at securing by peaceful means a separate legislature for Ireland. The dominant figure soon became **Charles Stewart Parnell** (1846–1891), descendant of English Protestant settlers in Ireland, but consumed by hatred for England, brilliant orator, elected to Parliament in 1875 Parnell hoped to unite all elements of Irish opposition and to force the grant of Home Rule by the use of obstruction in Parliament. The Peace Preservation Act of 1875 expired in 1880 and the government, unable to maintain order under ordinary law, was obliged to resort to new **coercive measures.**

1881, Aug. Gladstone then passed the **Land Act,** which aimed to correct the defects in his Act of 1870 and to meet the Irish demand for the three "F's " The act recognized a dual ownership of land and provided for the creation of a court to mediate between landlord and tenant and fix a "fair" rent for a period of 15 years, it gave increased fixity of tenure to tenants who paid those rents, with the right to sell their interest in the holdings to the highest bidder While it established a land court, with authority to cut down excessive rents, the act made no provision for dealing with accumulated arrears It pleased neither landlords nor tenants

Oct. 13. Parnell and others were sent to Kilmainham Prison for inciting Irishmen to intimidate tenants taking advantage of the act They were released (1882, May 2) when they agreed in the "Kilmainham Treaty" to cease "boycotting" and co-operate with the Liberal Party.

1882, May 6. **Lord Frederick Cavendish,** new chief secretary for Ireland, and **Thomas Burke,** permanent undersecretary, were murdered in broad daylight by Fenians in **Phoenix Park,** Dublin. Parnell repudiated all connection with the crime and offered to resign his leadership of the Home Rule Party

July. The government put through the draconian **Prevention of Crimes Bill** (limited to three years) suspending trial by jury and giving the police unlimited power to search and arrest on suspicion Irish extremists, with whom Parnell denied all connection, resorted to a **campaign of terrorism,** punctuated by dynamiting of public buildings in England

1883, Aug. **The Corrupt and Illegal Practices Act** in effect limited the total amounts which might be spent (all parties) in a general election to £800,000 (£2,500,-

000 had been spent in the general election of 1880); no candidate might spend more than a fixed sum for election purposes; penalties for corrupt practices were greatly increased

1884. Gladstone's Franchise Bill aimed to extend the rights enjoyed by the borough voters to the rural classes and to unify substantially the franchise throughout the United Kingdom. The measure virtually provided manhood suffrage — only domestic servants, bachelors living with their families, and those of no fixed abode being excluded. Some 2,000,000 voters were to be added, nearly four times the number added in 1832, nearly twice that added in 1867 The bill passed the Commons, was rejected by the Lords, the Conservatives insisting on the importance of a concomitant redistribution of seats Negotiations followed, Gladstone yielded in the matter of redistribution; the Franchise Bill itself passed easily (Dec)

1885, June. A Redistribution Bill followed — London received 37 additional members, Liverpool 6, Birmingham 4, Glasgow 4, Yorkshire 16, Lancashire 15, single-member constituencies became the rule, except in the City of London and in cities and boroughs with a population between 50,000 and 165,000, boroughs of fewer than 15,000 population were merged with their counties By this legislation the historic counties and boroughs ceased to be, as such, the basis of the House of Commons The individual for the first time became the unit, and numerical equality ("one vote, one value") the master principle.

Despite his resistance to the imperialist policy of Disraeli, his withdrawal from Afghanistan (p 868), his concessions to the Boers in South Africa (p 853), Gladstone was fated to play an active rôle in the field of colonial expansion

1882. Britain was obliged to intervene in Egypt (p 832), and the prestige of the cabinet was seriously damaged when it failed to rescue General Gordon, isolated in the Sudan (p 832)

1884-1885. Russian encroachments in Afghanistan nearly led to war, and the pacific policy of the foreign minister, Lord Granville, led to Conservative accusations of truckling to the Russians (pp 739, 868)

1885, June 9. A hostile amendment to his budget led to **Gladstone's resignation.**

1885, June 24—1886, Jan. 27 First Salisbury ministry. Salisbury had become head of the Conservative Party on the death of Beaconsfield (1881, Apr 19)

1885, Aug. Ashbourne Act. The Conservatives had previously been the party of Irish coercion, but Salisbury reached an understanding with Parnell that this policy should be reversed in return for Irish Nationalist support A fund of £5,000,000 was provided by the Ashbourne Act for loans with which Irish tenants could purchase their holdings on an easy-interest, long-term basis (extending a feature of the Liberal Land Act of 1881) **Further Land Purchase Acts** were adopted in 1887, 1891, 1896, and 1903 (the last named providing an eventual sum of £100,000,000).

1886, Feb. 12—July 20. Third Gladstone ministry. Gladstone's support for Home Rule had been secured (1885, Dec), and during his third ministry he introduced his

1886, Apr. 8. First Home Rule Bill, providing for a separate Irish legislature of two orders (one of 28 representative peers, with 75 other members elected by and from the propertied classes, the other of 204 elected members) The Irish legislature was to have important powers, but legislation relating to the crown, the army and navy, trade and navigation, etc , were still to be dealt with by the British Parliament in which Irish members were no longer to sit The measure was bitterly attacked by the Conservatives, caused a secession from the Liberal Party of the **"Liberal Unionists"** (Hartington, Joseph Chamberlain), and was finally defeated (July) A general election was called and produced a new defeat for the Liberals

1886, July 26—1892, Aug. 13. Second Salisbury ministry. Arthur Balfour (1848–1930), the prime minister's nephew, was made chief secretary for Ireland and carried a new **Crimes Bill** (1887) whose passage was facilitated by the publication of a notorious series of articles by the *Times* on "Parnellism and Crime," including an alleged letter of Parnell's declaring he had condemned the Phoenix Park murders only as a matter of policy Parnell denied authorship of this and other letters, was cleared (1890) by a governmental commission (the author was Richard Piggott, broken-down Irish journalist and subsequent suicide) Soon thereafter Parnell's position was ruined when he was named co-respondent in a divorce suit brought by Captain O'Shea, one of his followers Gladstone dropped him, a schism followed among the Nationalists, **Justin McCarthy** became leader of the majority When Parnell died (1891, Oct 6), **John Redmond** (1856–1918) succeeded him as leader of the minority

1889, May 31. Naval Defense Act, designed to meet growing sea-power of France and Russia It provided that the British fleet should always be as strong as the fleets of the two next strongest powers combined (**two-power standard**).

1889, Aug. 15—Sept. 16. Great London dock strike, in which almost all riverside workers joined This great strike and the formation of the **Miners' Federation of Great Britain** (1888) marked the extension of trade-unionism from the skilled classes (represented in the Amalgamated Societies) to the less skilled

1892. In the **general election** Gladstone made Home Rule the principal issue of the campaign, advocating also a series of additional reforms (**Newcastle Program**): disestablishment of the Church of England in Wales, and of the Church of Scotland, local veto on liquor sales, abolition of plural voting, extension of the Employers' Liability Act, restriction of hours of labor. The election gave Gladstone sufficient votes, with the aid of 81 Irish Nationalists, to carry his Home Rule plank

1892, Aug. 18—1894, Mar. 3. Fourth Gladstone cabinet.

1893, Feb. 13. Second Home Rule Bill. Its principal difference from the first bill was the provision that 80 Irish representatives should sit at Westminster It passed the Commons (Sept 1), but was overwhelmed by the Lords (Sept 8) A period of comparative peace followed in Ireland and Home Rule sank in importance, to be revived only two decades later **John Morley** (1838–1923), Irish secretary (1892–1895), ruled with sympathy and wisdom The Conservative régime (1895–1905) continued its traditional tactics of killing Home Rule by kindness (new Land Purchase Acts, 1896, 1903)

1893, Jan. Foundation of the Independent Labor Party, a frankly socialist party. Socialism, which had declined in the forties, had revived in the eighties under the influence of the American Henry George's *Progress and Poverty* (1879) In 1884 **H.M. Hyndman** (1842–1921) founded the **Social Democratic Federation,** a Marxist organization. In 1883 was founded the **Fabian Society,** which became prominent with the publication (1889) of the *Fabian Essays*. Prominent among the Fabians were **Sidney and Beatrice Webb** (1859–1947, 1858–1943) and **George Bernard Shaw** (1856–). They preached practical possibilities — municipal socialism and state control of the conditions of labor — and expected socialism to come as a sequel to the full application of universal suffrage and representative government. In 1892 the first two avowed socialists were elected to Parliament. One of them, **James Keir Hardie** (1856–1915), was mainly responsible for the foundation of the Labor Party

1894, Mar. Gladstone had lost his fight for Home Rule, had shattered the Liberal Party He resigned the premiership and was succeeded by the Liberal imperialist Lord Rosebery (1847–1929).

1894, Mar. 5—1895, June 21. Cabinet of Lord Rosebery. Sir William Harcourt (1827–1904), now leader of the House of Commons, brought in a bill adding £4,000,000 to the budget by equalizing death duties on real and personal property and providing a graduated tax of 1 to 8% — an attempt further to shift the burden of taxation to the wealthy. The cabinet was defeated on a matter of minor importance, and resigned

e. A DECADE OF UNIONISM, 1895-1905

1895, June 25—1902, July 11. Third Salisbury ministry, with Salisbury himself as foreign minister, Balfour as first lord of the treasury and leader of the Commons The cabinet included some of the principal Liberal Unionists, notably Hartington (Duke of Devonshire since 1891) and **Joseph Chamberlain.** The latter's political beginnings had been as a radical, as colonial secretary, he now devoted his great energy and ability to the cause of enhancing British imperial prestige The new government's attention was almost entirely absorbed by events abroad — the **Venezuela Boundary dispute** with the United States (p. 786), the **Armenian Massacres** and the **Greco-Turkish War** (pp 744, 746), the struggle for power in the **Far East** (pp 744–746), the **Hague Conference of 1899** (p 748), the **South African problem** which culminated in the **Boer War** (p 857)

1900, Feb. Formation of the Labor Representation Committee, with J. **Ramsay MacDonald** (1866–1937) as secretary. The committee represented the Independent Labor Party, Trade-Union Congress, and various socialist organizations Its aim was to establish a distinct Labor group in Parliament, but it had a hard struggle for existence Only about 5% of the unions affiliated themselves with it, the Social Democratic Federation soon withdrew, the attitude of the Fabians was cool, and the miners were hostile. At the general

election of 1900 the committee ran 15 candidates, of whom only two were returned But the decision of the Lords in the **Taff Vale case** (1902, July), which declared unions legal entities capable of being sued, consolidated the ranks of labor and created the **Labor Party,** which returned 29 members in the election of 1906

1901, Jan. 22. Death of Queen Victoria, after the longest reign but one (that of Louis XIV) in European history. She was widely mourned, reflecting the respect for her courage, strength of character, and the tact with which she had recognized the constitutional limitations of the crown and yielded to the steadily enlarging powers of her ministries In the last decades Victoria had come to be regarded above all as the symbol of imperial unity, an aspect of the monarchy upon which attention had been brilliantly and effectively focused by the **Jubilee of 1887** (celebrating the fiftieth anniversary of the queen's accession) and by the **Diamond Jubilee of 1897.** The reign had witnessed a period of incredible industrial expansion and increasing material prosperity The population of the United Kingdom had increased from 16,261,183 (1831) to 37,518,052 (1901)

1901-1910. EDWARD VII (b 1841). Edward was nearly sixty, and Victoria had deprived him until recently of serious participation in matters political. He was possessed of great social charm and tact, read little, cared nothing for routine, gathered information largely from personal contact. He was gay and fond of pleasure, a yachting enthusiast, patron of the turf, supporter of philanthropic causes, widely popular with all classes before his accession.

1902, July 11—1905, Dec. 4. Cabinet of Arthur Balfour, following the retirement of Lord Salisbury.

1902, Dec. The Education Act was the most important legislative achievement of the Balfour government For some time it had been felt that the school boards of the Education Act of 1870, although they had worked well in the towns, were on the whole too parochial in personnel and policy. The Act of 1902 abolished the boards, placed elementary and secondary education in the hands of statutory committees of the borough and county councils. The denominational schools, hitherto belonging to and maintained by the Anglicans and Catholics, were brought into the reorganization *pari passu* with the undenominational board schools For the first time in England the provision of secondary education was recognized as the duty of the state and was brought under public control. Educational progress under the act was rapid, in five years the number of secondary schools doubled.

1903, May. Joseph Chamberlain and the **Tariff Reform League** advocated a sweeping tariff reform, with moderate duties on corn, flour, meats, dairy produce, and foreign manufactures The new system was to give Britain a basis for bargaining with the colonies, of preventing foreign dumping in Britain, of increasing the revenue Balfour was unwilling to go so far, and Chamberlain resigned (Sept 18).

1904. Committee of Imperial Defense. The South African War had revealed serious defects in the army. The report of the commission of inquiry was an "unsparing condemnation of war office methods" The upshot was the organization of the Defense Committee with the prime minister as its head; the commander-in-chief was replaced by an army council which included the war secretary, four military members, one civil and one finance member, a board of selection (Duke of Connaught, president) was to control appointments

Foreign relations bulked large in a period when Britain settled her differences with France in the **Entente cordiale** of 1904 (p 752), European peace was threatened in the **Moroccan Crisis of 1905** (p. 753), and the naval rivalry of England and Germany became increasingly embittered (p. 747 *ff*)

Balfour's cabinet steadily lost prestige because of its dilatory tactics regarding the tariff question; opposition to its Education Act of 1902, which roused the ire of Nonconformists because it left in existence state-supported denominational schools largely controlled by Anglicans; etc. Balfour resigned, expecting to be recalled, but was succeeded by

f. THE LIBERAL RÉGIME, 1905-1914

1905, Dec. 5—1908, Apr. 5. Cabinet of Sir Henry Campbell-Bannerman, leader of the Liberals. It included **Herbert Asquith** (1852–1928), chancellor of the exchequer, and **Sir Edward Grey** (1862–1933), foreign minister. The **Liberal program of 1906** included· exclusion of Chinese labor from the Transvaal; change of the Education Act of 1902 in favor of the Nonconformists; reduction in the number of liquor licenses and national control of the liquor trade; sweeping measures aimed at social amelioration.

1906, Jan. The Liberals won an overwhelming victory in the elections

Dec. A Trade Disputes Bill met the demands of the trade-unionists by providing that a union could not be made liable for damages on account of illegal acts committed by its members, legalized peaceful picketing, etc

At the same time a **Workingman's Compensation Act** developed the principle of employers' liability laid down in acts going back to 1880, the employer was now made liable for compensation for accidents to practically all employees receiving less than £250 annually except in case of "serious and willful misconduct."

1908, Apr 5—1916, May 15. Cabinet of Herbert Asquith, following the resignation of Campbell-Bannerman on account of ill-health (d Apr. 22)

1909, Jan. The Old-Age Pension Law, outcome of thirty years of agitation, provided a pension for every British subject over 70 with an income of less than £31 10s

1909. The People's Budget, brought in by **David Lloyd George** (1863–), chancellor of the exchequer, leading spirit of liberal reform. Facing a large deficit (chiefly the result of naval expenditure and social legislation) Lloyd George devised a budget aiming to shift the tax burden from producers to possessors of wealth, in the form of income and inheritance taxes, levies on unearned income, heavy rates on monopolies (such as liquor licenses) and on unearned increments of land. The budget passed the Commons after a hot fight (Nov. 5), but was rejected by the Lords (Nov. 30) until the judgment of the country should have been expressed The House of Lords was the stronghold of opposition to the program of the Liberal majority in the Commons, and had twice thrown out an education bill (1906, 1908) and a licensing bill (1908)

Dec. 2. Asquith denounced the action of the Lords as a breach of the constitution

1910, Jan. General election, fought out on the issues of the budget, the veto power of the Lords, and Home Rule for Ireland (the Irish Nationalists having offered their support on condition that the power of the House of Lords should be so far reduced that it could no longer defeat Home Rule). The Liberals lost considerable strength in the election, but determined to go on with their program

May 6. Death of Edward VII.

1910-1936. GEORGE V (b. 1865), a sound but unimaginative ruler, filled with a sense of responsibility and rigid respect for the constitution

1910, May 10. Three resolutions passed in the House of Commons. (1) that the Lords should have no right to veto a money bill; (2) that any other measure should become law after being passed in three successive sessions of the Commons, even if vetoed by the Lords, providing that two years had elapsed since its first introduction, (3) that the maximum life of Parliament should be five instead of seven years. In the Lords, **Lord Lansdowne** offered an alternative measure for the reconstruction of that body

Nov. 28. Parliament was dissolved and a second general election held (Dec). The Liberals gained only two seats

1911, May 15. The Parliament Bill was again passed in the Commons and ultimately passed the Lords (July 20) with amendments unacceptable to Asquith, who threatened to have enough peers created to carry the bill Thereupon the Lords capitulated (Aug 10)

Aug. 10. The Commons for the first time voted salaries for their members (£400 per year)

1911, Dec. The National Insurance Act provided (1) insurance for the whole working population against loss of health and for the prevention and cure of sickness; (2) insurance against unemployment Wage-earners 16 to 65 years old having less than £26 annual income from property were obliged to take health insurance. The second part of the act applied only to 2,250,000 workers engaged in trades specially liable to fluctuations — large building and engineering trades — and gave a maximum benefit of 15 weeks Both health and unemployment insurance were supported by contributions from employers, employees, and the state

1911-1912. Epidemic of strikes, of which the transport workers' and railwaymen's strikes (1911) and the miners' strike (1912) were outstanding The strikes were the reflection of stationary wages and rising prices, and showed the influence of syndicalist ideas imported from the United States and the Continent The **coal strike** (1912), involving 1,500,000 men, brought government action and

1912, Mar. 29. A Minimum Wage Law, which, however, did little to relieve unrest.

Apr. 11. The government introduced a bill for **Home Rule in Ireland.** It provided for a bicameral Parliament for Ireland, but with continued representation in the House of Commons The bill was

attacked for its injustice to Protestant Ulster, which would be submerged in a united Catholic Ireland Opposition brilliantly led by **Sir Edward Carson** (1854-1935)

1913. The Home Rule Bill was twice passed by the Commons (Jan. 16, July 7) and twice rejected by the Lords (Jan. 30, July 15) Meanwhile Ulster opposition grew steadily hotter A **covenant** was signed at Belfast (1912, Sept 28) pledging resistance to Home Rule and refusal to accept it if it were voted

July 12. A resolution was adopted by a meeting of 150,000 Ulstermen at Craigavon to resist Home Rule by force of arms if necessary By Dec 100,000 **Ulster volunteers** had been raised Civil war appeared imminent if the government persisted in its Home Rule program, which it had pledged to the Irish Nationalists

1914, Feb. 10. When Parliament met, Unionist opposition had reached its peak. Asquith offered a compromise (Mar 9): electors in each of the nine Ulster counties might determine whether their county should be excluded from the new arrangement for six years. The Home Rule Bill was passed for a third time by the Commons (May 26) Under the Parliament Act of 1911 no further action by the Lords was necessary Ireland had now been given a unitary parliamentary system, with no separate position for Ulster.

June 23. Asquith introduced his compromise of Mar 9 on Ulster into the House of Lords, which changed the bill to exclude the whole of Ulster without time limit. A three-cornered struggle of Lords, Commons, and Irish Nationalist leaders was overtaken by the World War.

Sept. 18. The Home Rule Bill received the royal assent and became law, but by a simultaneous act it was not to come into force until after the war, and the government pledged that, before it was put into force, an amending bill dealing with the question of Ulster would be introduced The third Home Rule Bill, which never came into operation, was subsequently replaced by the Home Rule Bill of Dec. 1920 (p 972).

1914, Sept. 18. Welsh disestablishment. The parliamentary course of the Welsh Disestablishment Bill was almost exactly parallel with that of the Home Rule Bill A bill for the disestablishment of the Anglican Church in Wales had failed in 1894–1895, again in 1909 Introduced in 1912 (Apr 12), it passed the Commons twice, but was rejected by the Lords (1913, Feb. 13, July 22) The bill was finally passed by the Commons in 1914 (May 19) and received the royal assent (Sept 18); but along with it was passed a **Suspensory Bill,** postponing its action until the end of the war The bill provided that the four Welsh dioceses should no longer form part of the province of Canterbury, that the Welsh bishop should no longer sit in the House of Lords, that all ecclesiastical jurisdiction should be abolished, and the Welsh Anglicans should be free to set up their own church government.

(*Cont pp.* 912*ff.*, 967.)

3. THE LOW COUNTRIES

a. THE KINGDOM OF THE NETHERLANDS, 1815-1830 (1839)

1814, June 21. Protocol of the Eight Articles, concluded between the Prince of Orange and the representatives of the allied powers after the defeat of Napoleon In order to create a bulwark against France, it was agreed to unite Belgium (the Austrian Netherlands) and Holland to form the **Kingdom of the Netherlands.** This arrangement was confirmed by the Congress of Vienna (1815, June 9).

1815-1844. WILLIAM I, the former Prince of Orange, a well-meaning but rather arbitrary and obstinate ruler. He granted a moderately **liberal constitution** (1815, Aug. 24), but failed to make the union of Belgium and Holland work. Traditions, customs, religion, and interests were different and the Belgians felt throughout that they were put in an inferior position The seat of the government was in Holland, the king a Dutchman and a Calvinist, despite her larger population, Belgium had only equal representation in the lower chamber of the States-General or assembly, the majority of officers and officials were Dutch, the public establishments (banks, schools) were predominantly Dutch, Dutch was made the official language in all except the Walloon districts of Belgium; the public debt was equally divided, though in 1814 that of Holland was many times greater than that of Belgium; the Catholic Church in Belgium resented the equality of religious denominations; the Belgians disliked the Dutch tariff system,

which, being liberal, gave inadequate protection to Belgian industry.

1828, July. The two Belgian parties (Clericals and Liberals) united after the king had estranged the Clericals by concluding a **concordat with the Pope** (1827) giving him the right to veto the election of bishops, and the Liberals by a harsh press law The program of the two parties called for freedom of press, instruction, and worship, and for ministerial responsibility. Increased agitation for the redress of grievances, accompanied by much economic distress

1830, Aug. 25. THE BELGIAN REVOLUTION, stimulated by the **July Revolution in Paris** and by unrest among the lower classes The moderate liberal elements asked only an autonomous administration and were willing to accept the king's son as viceroy

Sept. 23-26. Violent fighting in Brussels between the workers and the troops, who were obliged to evacuate the city A provisional government was set up with **Charles Rogier** as leader.

Oct. 4. Proclamation of independence. A national congress was summoned to draw up a constitution

Oct. 27. Bombardment of Antwerp by the Dutch made the Belgians irreconcilable

Nov. 4. At the suggestion of England, a **conference of the powers** met at London and ordered an armistice

Nov. 10. The Belgian national congress declared the House of Orange deposed, but voted for constitutional hereditary monarchy

Nov. 15. Advent of **Lord Palmerston** to the British foreign office, following the downfall of the Wellington ministry Palmerston was not unsympathetic to the Belgian claims, but was above all eager to check the spread of French influence in Belgium and to prevent war Louis Philippe, confronted with a serious domestic situation in France, followed the British lead and the two powers induced Russia (paralyzed by the Polish insurrection, p 701), Austria, and Prussia to abandon the principle of legitimacy.

Dec. 20. The conference practically recognized the independence of Belgium by declaring the **dissolution of the Kingdom of the Netherlands.**

1831, Jan. 20, Jan. 27. Two protocols set forth the bases of separation. The Dutch accepted the terms, but the Belgians refused.

Feb. 3. The Belgian national congress elected as king the **Duke of Nemours,** second son of Louis Philippe. Energetic warnings and threats of Palmerston induced Louis Philippe to reject the election

Feb. 7. The Belgians set up a regency under **Surlet de Chokier,** and the congress drew up a constitution on the English pattern, one of the most liberal in Europe.

June 4. The Belgians elected as king **Prince Leopold of Saxe-Coburg** (1790–1865), widower of Princess Charlotte of England and uncle of the future Queen Victoria, a cultured and shrewd prince

June 26. The London conference, having approved of Leopold, drew up the **Eighteen Articles,** regulating the separation and more favorable to the Belgians It was accepted by the Belgians, but rejected by King William of Holland

Aug. 2. Breaking off the armistice, **William sent a large army over the frontier,** which quickly defeated an improvised Belgian force. A French army thereupon invaded the country and forced the Dutch to retire.

Oct. 14. The Twenty-Four Articles, drawn up by the London conference and more favorable to Holland Still King William refused to agree or to evacuate Antwerp

1832, Nov.-Dec. A French army and a Franco-British fleet expelled the Dutch from Belgium.

1833, May 21. The Dutch were obliged by the English and French to conclude an armistice of indefinite length on the basis of the *status quo*

1839, Apr. 19. King William finally accepted a settlement much like that of the **Twenty-Four Articles.** He recognized Belgium and accepted substantially the frontier of 1790, except for Luxemburg and Limburg The Belgians had claimed the whole of **Luxemburg,** but only the western part was given them; the rest, including the capital, remained a grand duchy with the King of Holland as grand duke. **Limburg** was also divided, the Belgians receiving about one half The **Scheldt** was declared open to the commerce of both countries and the national debt was divided. Article VII recognized Belgium as an **"independent and perpetually neutral state"** under the collective guaranty of the powers.

b. THE KINGDOM OF BELGIUM, 1831-1914

1831-1865. LEOPOLD I. During the early part of his reign the Clerical-Liberal coalition continued to rule the country, devoting itself to the consolidation of the kingdom, ably guided by the king

1847. The coalition gave way to a party system and ministerial responsibility. Until 1884 the Liberals were generally in control of the government, first under the leadership of **Charles Rogier**, then of **Walther Frère-Orban** (1812–1896)

1848. A new electoral law lowered the franchise and doubled the number of voters. The success of the régime was attested by the fact that Belgium was almost alone among the Continental powers in escaping revolution.

1850. The national bank was founded as part of a general policy devoted to economic development.

1861-1862. Commercial treaties with France and England ushered in a period of free-trade policy

1863. The navigation of the Scheldt was made free

1865-1909. LEOPOLD II, like his father an able, energetic, strong-willed ruler and a man of vision

1867-1870. A period of international uncertainty, arising from the **designs of Napoleon III** upon Belgium (p 635) and culminating in the effort (1869) to secure control of the Belgian railways

1870, Aug. 9, 11. Under British auspices, treaties were concluded between England, Prussia, and France guaranteeing **Belgian neutrality** during the Franco-Prussian War

1879, July 1. Education Act secularizing primary education The public or "neutral" schools were to be supported by the communes with subventions from the government; no public support was to be given to the "free" or Catholic schools This measure, passed by the Liberals, estranged the Clericals.

1880, June. The Clericals won a majority in the elections. They now replaced the Liberals and remained in power until the time of the World War.

1884, Sept. 10. A new Education Law reversed that of 1879 and gave public support for church schools in Catholic districts.

1885, May 2. Establishment of the Congo Free State, with Leopold II as ruler. This great African empire had been built up by Leopold as a personal enterprise Its recognition by the powers was a most unusual achievement (pp 739, 843).

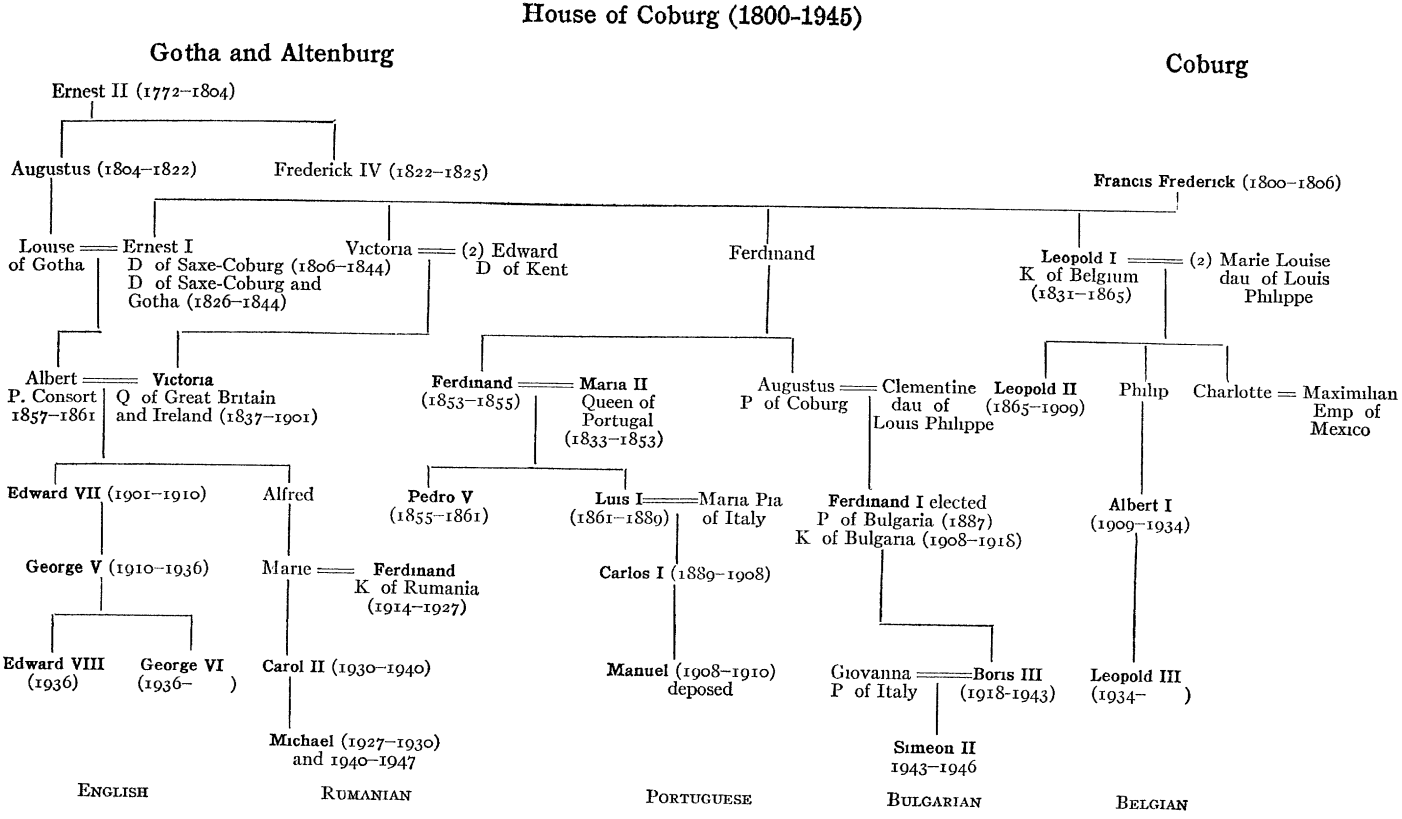
1886-1894. Labor unrest, with a series of major strikes Economic development had been very rapid, with the result that social problems emerged in an acute form With extensive coal mines, Belgium was able to industrialize to the point where it was the fourth manufacturing power in Europe. Under the circumstances socialism made great strides. The **Labor Party** was founded in 1885 and soon took the place of the declining Liberal Party as the chief organ of opposition to the Clericals The Socialists demanded universal manhood suffrage and organized strikes as a method of bringing pressure

1893, Apr. A general strike was proclaimed.

Apr. 27. The government introduced **universal suffrage,** but with a system of **plural voting** which gave two or three votes to about two-fifths of the voters who fulfilled certain requirements as to age, income, education, and family.

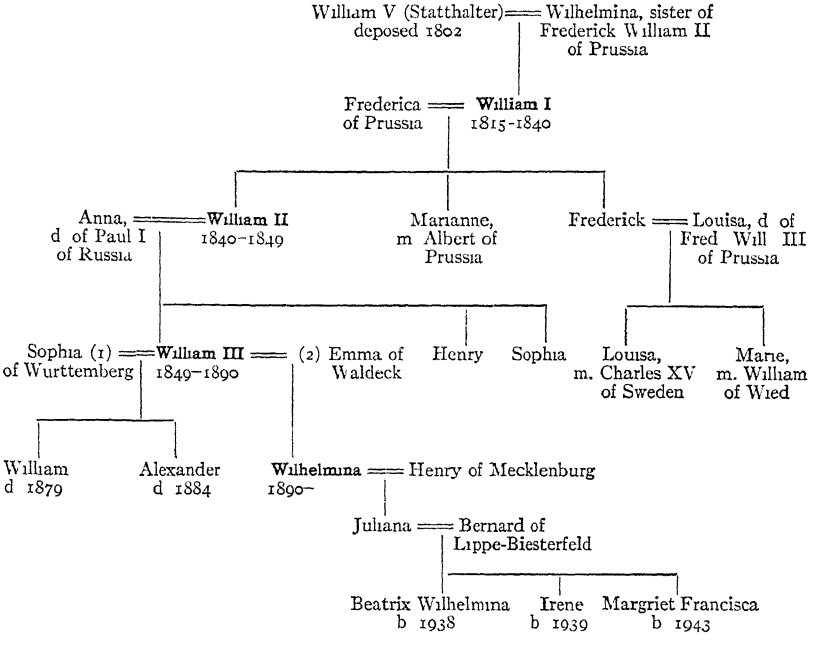
1895, Aug. 30. Instruction in the Catholic religion made compulsory in all public schools

1899, Dec. 24. Adoption of **proportional representation** for the protection of political minorities An alliance was formed between the Liberals and Socialists to demand "one man, one vote"



1901-1905. Another period of **strike activity,** punctuated by anarchist outrages, especially dynamitings.

1903-1904. The Congo scandal, arising from the revelation in England of labor conditions under Leopold's rule. A commission of inquiry was sent out in 1905 The Congo was ceded by the king to the Belgian nation in 1908 and became the Belgian Congo



1909-1934. ALBERT I (b. 1875) succeeded his uncle, Leopold II.

1913, Apr. 14-24 A political general strike ended on the assurance of the government that the electoral system would be revised. The reform was delayed by the World War, but was finally accomplished on May 6, 1919, when universal suffrage without plural voting was established and certain women were given the vote.

Aug. 30. Army Law enacted, with the introduction of universal military service in place of the earlier system by which one son was taken from each family.

(*Cont pp* 912 *ff*, 974)

c. KINGDOM OF THE NETHERLANDS, 1830-1914

1840, Oct. 7. Abdication of William I, who had become very unpopular because of his obstinate opposition to reform. He died in 1843

1840-1849. WILLIAM II (b. 1792)

1848, Oct. The king, moved by the European revolutions of 1848 and pressed by the Liberals, under the distinguished jurist and statesman **Johan Thorbecke** (1798–1872) conceded a **revision of the constitution:** the power of the king was reduced and that of Parliament greatly increased Ministerial responsibility was provided and the upper house (thus far appointed by the king) was to be elected by the provincial assemblies The lower house was still elected by a restricted suffrage.

1849-1890. WILLIAM III (b 1817), an enlightened and benevolent ruler His reign was marked by great **commercial expansion** and much internal development (canals, etc). The political life of the country centered on the struggle of parties over the questions of religious education and the extension of the suffrage The Liberals, largely representative of the trading classes and the towns, demanded a system of free secular schools They were opposed by the Protestant Conservatives, the Calvinist peasantry and the Catholics, all of whom favored religious control of the public schools.

1862. Slavery abolished in the Dutch West Indies.

1867, Mar. The king made a treaty with France for the **sale of Luxemburg.** This gave rise to an international crisis and the dropping of the project (p 686)

1887, June 17. Introduction of **suffrage reform,** after a long period of

agitation The electorate was about doubled. The first Socialist was elected to Parliament.

1889, Dec. 6. A Calvinist-Catholic coalition, following on a period of Liberal rule (1871–1888), passed a law providing financial assistance for all private denominational schools. Non-sectarian public schools continued to be state-supported

1890- . WILHELMINA (b 1880) Until 1898 the queen-mother, **Emma,** acted as regent

1894. A serious revolt broke out in the **Dutch East Indies.** Another rising, in 1896, was put down only with considerable difficulty

1896, June 29. A new electoral law, carried by a Liberal cabinet, again doubled the electorate (from 300,000 to 700,000), but the system was still far removed from universal suffrage and drew fire from the working classes

1897-1901. The **Borgesius ministry** (Liberal), which passed much **social legislation,** such as accident insurance, improvement of housing, compulsory education for children, etc.

1901, Feb. 7. The queen married Duke Henry of Mecklenburg-Schwerin.

1901-1905. Dr. Kuyper ministry (Clerical).

1903, Apr. Great railway and dock strikes, which the government broke up by the use of the military, thus arousing the forces of trade-unionism and socialism

1905. The elections restored the Liberals to power, but the party, never very disciplined, continued to disintegrate

1913, Aug 25. An extra-parliamentary cabinet was formed by Cort van der Linden (Moderate Liberal) and set out to settle the suffrage and education questions In 1917 (Nov) **universal suffrage** and proportional representation were introduced At the same time the Clericals were satisfied by the concession in full of the principle of absolute equality with regard to financial support for public non-denominational schools and private sectarian instruction. (*Cont. p* 975)

4. FRANCE

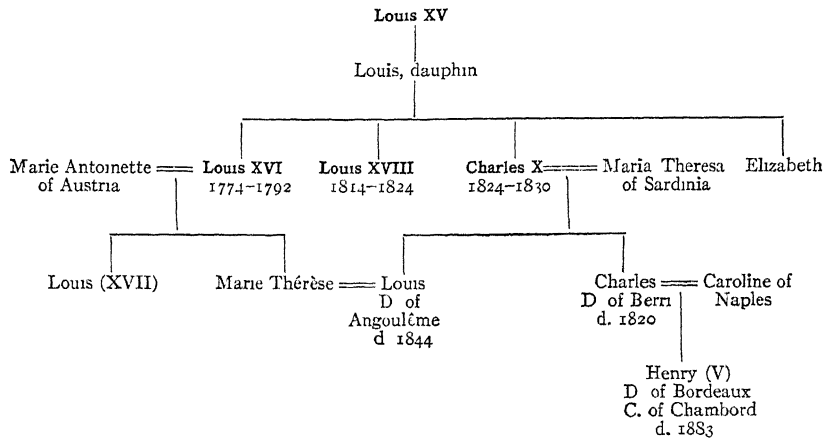
a. THE RESTORATION MONARCHY, 1814-1830

1814-1824. LOUIS XVIII (b 1755), brother of Louis XVI, easy-going, disillusioned, reasonable He was permitted by the allies to return after the defeat of Napoleon, mainly through the influence of Tsar Alexander of Russia

1814, June 14. The king granted the *charte constitutionnelle*, or **constitution,** a reflection of the tsar's liberalism and of Louis' desire to meet the demands of the middle classes. It created a system akin to that of the British, with an hereditary monarch, a chamber of peers nominated by the king, a chamber of deputies elected by a limited suffrage, and various guaranties of civil and religious liberty.

1815, Mar. 20. The sudden **return of Napoleon** from Elba obliged Louis to flee from Paris and remain in exile during the **Hundred Days** (p 602) After Waterloo he made an undignified return to the capital "in the baggage of the allies" (July 8), whereupon the **second restoration** was accomplished The king's influence was much reduced and he was unable to prevent a so-called **White Terror,** carried on by fanatical royalists, especially in the south, against revolutionaries and Bonapartists.

Aug. 22. The first parliamentary elections yielded a large majority for the **Ultra-royalist** group (*chambre introuvable*), whose reactionary policy was opposed by the ministry headed by the Duke of Richelieu (1766–1822). The reaction went to such extremes that the king, under pressure from the allied representatives,



1816, Sept. Dissolved the Chamber and called new elections In the new Chamber a majority of moderates supported the policy of Richelieu and that of his immediate successors, Dessolles (1818–1819), Decazes (1819–1820).

1816-1820. Moderate measures characterized the period of these ministries, among others laws freeing the press (1819, May 1).

1818. The **payment of the French indemnity** and the consequent evacuation of French soil by allied troops, the most notable achievement of Richelieu

1820, Feb. 13. The **murder of the Duke of Berri,** presumed to be the last of the Bourbon line, by an obscure fanatic, Louvel, was providential for the Ultras The ministry of Decazes, favorite of the king, was overthrown and succeeded by a second Richelieu ministry (1820–1821).

The French Bourbons (1715-1883)

1820. To preserve the country from the increasing danger from the Left, a **new electoral law** was passed (the *Law of the Double Vote*), which established a complicated system of election of two degrees, increased the electoral weight of voters in the upper tax brackets, and aimed to increase the influence of landed proprietors (source of Ultra support) at the expense of the middle class This law, together with legislation on the press, personal liberty, etc, marked the beginning of the "reaction," which was to end only in the Revolution of 1830

1823, Apr. Invasion of Spain by French troops, in behalf of Ferdinand VII (p. 644)

1824-1830. CHARLES X (1757–1836)

1821-1827. Under the **Villèle ministry**, a resolute attempt was made to restore, in as large a measure as possible, the position which the monarchy had occupied under the old régime

1825, Apr. A Law of Indemnity compensated the nobles for the losses of their lands during the revolution, at the expense of the holders of government bonds, largely the upper *bourgeoisie* The Church was favored in various ways, notably by the adoption of the notorious

1826. Law of Sacrilege, imposing a death sentence for certain offenses of a "sacrilegious" character The *bourgeoisie* was further alienated by the king's

1827, Apr. 30. Dissolution of the national guard, a preserve of the middle class Secret societies sprang up, notably the Liberal electoral society, *Aide-toi, le ciel t'aidera* Confident of his position, Charles X called a general election to strengthen his majority in the Chamber

1827, Nov. 17, 24. The election returned a Liberal majority, and the king was obliged to part with his Ultra minister, Villèle, and supplant him with

1828, Jan. 3. Martignac, a moderate who, the king hoped, would please neither the Liberals nor the Ultras.

1829, Aug. 6. The dismissal of Martignac was followed by a revolutionary step, when the king appointed

Aug. 8. A ministry dominated by **Prince of Polignac,** "Ultra of the Ultras" which for the first time since 1816 did not possess the confidence of the Chamber, a departure from the principle of ministerial responsibility, not stated in the Constitution of 1814, but now generally accepted

1830, Mar. 18. The king's act was censured in the answer to the address from the throne, signed by 221 Liberal deputies Charles X dissolved the Chamber

May 16. New elections returned a majority unfavorable to the king, who, relying on the effect of the conquest of Algiers (June–July, p 837), replied with the

July 26. FIVE "JULY" ORDINANCES, establishing a rigid governmental control of the press, dissolving the Chamber, changing the electoral system in an attempt to insure an Ultra majority.

July 26. Adolphe Thiers (1797–1877), journalist and Liberal, drew up a protest against the ordinances on behalf of the Parisian journalists The Liberal majority of the Chamber also prepared a protest But the dynamo of the **Revolution of 1830** was radical Paris, in whose ranks a republican movement had been for some years forming

July 28. The insurgents raised barricades, took the Hotel de Ville, and were masters of Paris (July 29) The **Marquis de Lafayette,** patriarch of the republican cause, headed the radical movement, which aimed to make him president of a French republic The Liberal deputies hastily turned to **Louis Philippe,** Duke of Orléans and representative of the younger Bourbon line, as the savior of the cause of constitutional monarchy

July 30. Orléans was offered the lieutenant-generalship of the realm, was accepted by Lafayette on behalf of radical Paris, and was proclaimed *King of the French* by the Liberals sitting as a rump Chamber (Aug 7) under the Charter of 1814, revised to insure the perpetuation of the new constitutional régime

b. THE JULY MONARCHY, 1830-1848

1830-1848. REIGN OF LOUIS PHILIPPE (1773–1850).

1830-1836. Agitation of Republicans and other radicals, who had accepted Louis Philippe as a revolutionary monarch only to discover their mistake too late The radicals were disillusioned by the cautious policy of the

1830, Nov. 2—1831, Mar. 13. Laffitte ministry with respect to the revolutions in Italy and Poland and by the government's opposition to the demands of the workers

1831, Mar. 13—1832, May 16. Ministry of Casimir-Périer, a strong man who managed to restore order, but died in the great cholera epidemic of 1831–1832. Radical agitation and violence continued

1831, Nov. A large-scale **insurrection of workers at Lyons** was put down with difficulty. Rapid spread of secret societies Under a régime of press freedom the king was unsparingly attacked in the radical newspapers and mercilessly caricatured (notably by **Honoré Daumier,** 1808–1879)

1832, Oct. 11—1834, July 15. Ministry of Marshal Soult (1769–1851), which included the Duke of Broglie, Thiers, and Guizot, and represented the more conservative wing of liberalism.

1833, June 28. The Primary Education Law, brought in by Guizot In the interests of safe doctrine it gave the Church (formerly attacked by the Liberals) effective control of the primary schools.

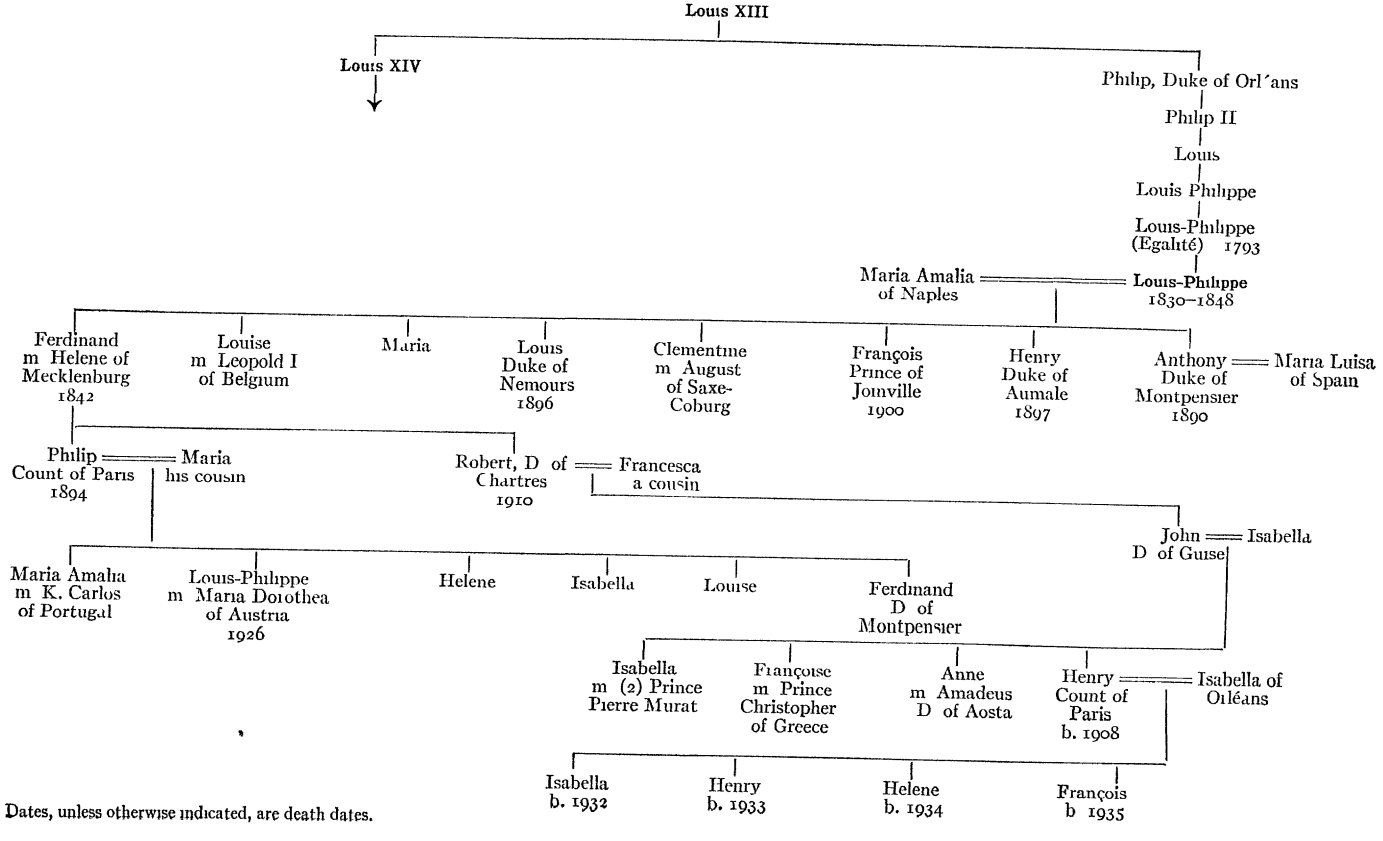
1834, Apr. Climax of the radical movement in the **great revolts in Paris and Lyons,** repressed with great severity

1835, Mar.—1836, Feb. Ministries of the Duke of Broglie.

1835, July 28. Sanguinary attempt on the life of Louis Philippe by the Corsican radical, **Fieschi.**

1835, Sept. The September Laws, including a severe press law and other acts to accelerate the trials of insurgents and assure their conviction. These repressive laws brought the radical movement under control

1836, Feb.-Sept. First Ministry of Adolphe Thiers.



1836-1839. Ministries of Count Molé (1781–1855), the king's personal friend Louis Philippe managed to establish something like personal rule by playing off the strong men in the Liberal movement and by appointing weak men to office But the two groups of the opposition (Right Center· *party of resistance,* led by Guizot; Left Center *party of movement,* led by Thiers) united and overthrew Molé, who was followed by a short-lived Soult ministry 1839, May–1840, Feb.).

1840, Mar.-Oct. Ministry of Thiers, who led France to the brink of war during the acute Near-Eastern crisis (p 725)

1840-1847. Ministry of Soult, in which **François Guizot** (1787–1874) was the commanding figure Guizot became premier in 1847 and remained in power until Feb 1848. He dominated the political scene through political and electoral manipulation and followed the direction of the king in a conservative policy.

1840-1848. Revival of radicalism and emergence of "utopian" socialism. The period was one of rapid industrial development (600 steam engines in France in 1830, 4853 in 1847; consumption of coal increased fivefold) and extension of communications (**Railway Act** of 1842: provided for government construction of roadbeds, bridges, tunnels, etc). All this tended to raise a social question, which was treated by such eminent writers as **St.-Simon, Fourier, Cabet, Louis Blanc** (p 549) The radical movement had been driven under-

House of Bourbon-Orléans

Dates, unless otherwise indicated, are death dates.

ground by the **September Laws**, but continued behind the façade of innocent **friendly societies** and in secret organizations of many kinds Gradual merging of radical, republican, and socialist movements

1846-1847. A severe **agricultural and industrial depression** caused widespread unemployment and suffering among the workers and predisposed them to revolutionary action when opportunity offered

1847-1848. The **parliamentary opposition** to Guizot, led by Thiers and Odilon Barrot, demanding electoral reform (extension of suffrage) and an end of parliamentary corruption (office-holding by members, bribery, etc), embarked upon an extra-parliamentary **campaign of banquets**, culminating in a great banquet in Paris, arranged for Feb. 22, 1848, but prohibited by the government. The unrest engendered by this demonstration led to street disorders and to the revolution of February.

c. THE SECOND REPUBLIC, 1848-1852

1848, Feb. 22. Workers, students, and others gathered to demonstrate in Paris. Barricades went up, and fighting began

Feb. 23 The king replaced Guizot with Molé, satisfying the middle class but not the workers, who continued the struggle, and by the morning of Feb. 24 had become masters of Paris

Feb. 24. LOUIS PHILIPPE ABDICATED in favor of his grandson, the Count of Paris, but the latter was ignored by a rump meeting of the Chamber of Deputies into which the Paris mob had filtered, the latter chose a provisional government, dominated by moderate republicans, which fused in turn at the Hôtel de Ville that evening with a more radical slate. The same evening the **republic was proclaimed** at the insistent demand of the mob (for the second time in France) The Right Wing of the government, dominated by the poet, **Alphonse de Lamartine** (1790–1869), was composed of members of the parliamentary opposition, willing to accept a republic and universal suffrage so long as the republic's program were moderate. The Left Wing, dominated by **Louis Blanc** (1811–1882), viewed the republic as the vestibule to far-reaching economic and social reforms, along the general lines sketched in Blanc's *Organisation du travail* (1839). The Right Wing had perforce to make concessions to the radicals, who had armed control of Paris during the days following the revolution

Feb. 25. The government recognized the right to work (government guaranty of work relief) and implemented this promise with the

Feb. 26. Establishment of the national workshops, a large-scale but inefficient work-relief scheme in Paris. It also permitted Louis Blanc to set up

Feb. 28. The Commission of the Luxembourg, a kind of parliament of workers and employers to discuss questions of common interest, soon, however, deserted by the employers and accomplishing little Meanwhile the Right Wing prepared to regain control of the situation by arranging for elections, by bringing troops to Paris, taking steps to render the National Guard loyal to the "cause of order," etc The workers became alarmed, organized

Mar. 17. A monster radical demonstration which might have overturned the government but for Louis Blanc, who guided it into moderate channels. Conservatives everywhere now became alarmed by the "specter of communism" which was raising its head

Apr. 16. A second demonstration of workers in Paris completely miscarried

Apr. 23. The elections to the National Assembly, which was to give France a new constitution, were a victory for the moderate Republicans (**Lamartine**) with some 500 seats, the Left Wing (**Louis Blanc**) had fewer than a hundred, the Legitimists (seeking the return of the Bourbon line) had about a hundred; the Orléanists (supporters of the fallen dynasty of Louis Philippe), about 200

May 15. In the face of the unfriendly National Assembly, the workers prepared a new protest, organized a huge procession, which marched to the hall of the Assembly, invaded it during a sitting, overturned the government, set up a new provisional government The movement quickly collapsed. But the forces of order were by now terrified They determined to dissolve the national workshops, whose membership had grown to more than a hundred thousand, denounced as "pretorians of revolt" The reply of the Parisian workers was

June 23-26. THE INSURRECTION OF JUNE, which witnessed the bloodiest street-fighting Europe had seen. The executive commission, vacillating successor of the provisional government, was

swept away; **General Louis Cavaignac** (1802–1857) was made dictator *pro tempore* and suppressed the movement.

July-Aug. A reaction followed, punctuated by severe press legislation (aiming to eliminate radical newspapers), the suppression of secret societies, and laws for the rigid control of clubs and political associations

Nov. 4. The Assembly completed the **new constitution,** providing for a single chamber and a strong president (with a separation of powers and direct election under universal suffrage) The moderate Republicans' candidate, General Cavaignac, was opposed by **Prince Louis Napoleon** (1808–1873), nephew of Napoleon I and pretender to the Napoleonic succession Louis Napoleon had profited by the flowering of the "Napoleonic legend", by the publicity attending two personal attempts at a *coup d'état* in France (Strasbourg, 1836, Boulogne, 1840), and by the demand after the June Days for a "strong man" to govern France

Dec. 10. The presidential elections gave Louis Napoleon 5,327,345 votes, his opponents, 1,879,298 He became president, Dec 20

1848, Dec. 20. PRINCE LOUIS NAPOLEON BONAPARTE took the oath as **President of the French Republic,** and promptly gave evidence of his "republicanism" by appointing a ministry dominated by Orléanists, headed by **Odilon Barrot,** despite the fact that the majority of the National Assembly were Republicans The president had the support of five million electors, the Constituent Assembly was already obsolete.

1849, Jan. 29. Under the menace of troops quartered in Paris for that purpose, the Assembly was obliged to vote its own dissolution, after the budget and certain measures completing the constitution should have been passed

The conservative forces in society — such diverse elements as Legitimists, Orléanists, Bonapartists, some moderate Republicans — were united by means of a central committee (*Union électorale*) to win the elections to the new Chamber on a program of "saving society" ("threatened" by the radical elements of 1848) through revival of the influence of the Catholic Church

1849, Apr.-June. The French intervention against the Roman Republic (p. 655) was part of this program, connived at by the president After **General Oudinot's** first defeat (Apr 30), "the honor of the country and of the army" was turned to account as a slogan by the Conservatives, who won a large majority of the seats in the election. Actually the Radical Republicans fared much better in the elections than they had anticipated **Ledru-Rollin** was returned in five departments by two million votes

June 13. He engineered an **abortive revolt in Paris,** which played into the hands of the Conservatives· severe measures were taken against the Radical Republicans — arrests were made in Paris and the provinces, banquets forbidden, mutual benefit societies dissolved The severity of these measures overshot the mark, stimulated Republican propaganda in turn. The history of the new Legislative Assembly (*Corps législatif*) now became that of the struggle between the Catholic majority and the Liberal and popular opposition groups Louis Napoleon was determined to be captured by neither, to use the struggle for his own ends.

Oct. 31. Although French troops had restored Rome to Pius IX, Louis Napoleon opposed reintroduction of an absolutist régime In this he was supported neither by his Catholic majority nor by his own ministry He accordingly dismissed Odilon Barrot and summoned **General d'Hautpoul** as premier, with a cabinet "devoted to his own person," in which the dominating figure was **Eugène Rouher** (1814–1884), minister of justice With a ministry of his own men, the president had in fact established a thinly veiled dictatorship

1850, Jan. 9. The president extended his control through a government bill, placing school teachers under the control of prefects

Mar. 15. A **second education bill,** the so-called *Falloux Law* (prepared by the Catholic Legitimist, Vicomte de Falloux) was grudgingly acquiesced in by the government, a concession to the Catholic majority. Its effect was to extend greatly Catholic influence in education, providing lower standards for Catholic than for state teachers, giving the clergy wide powers of school inspection, permitting the substitution of Catholic for lay schools by communes and departments (seeking to avoid the expense of maintaining state schools)

May 31. A further attack on radicalism was made in an **electoral law** requiring three years' residence in one place for all voters (affecting above all industrial workers, at once migratory and radical)

June 9. Another act **forbade clubs and public meetings,** even for election purposes Republican propaganda was

paralyzed by various other means newspapers overwhelmed with lawsuits and fines, houses of Republicans searched, Republican civil servants dismissed on the slightest suspicion, etc

By now, the empire was on the horizon Was it to be accomplished legitimately or by force? Louis Napoleon turned first to legal methods, the **revision of Article 45 of the constitution,** which forbade two consecutive four-year terms for a president. The president had a clear majority in the Assembly, but a vote of three-quarters was essential to revision.

1851, July 15. The proposal to revise was defeated by nearly 100 votes more than were needed Not without considerable vacillation the president now decided to resort to force to accomplish his objects

Dec. 2. THE COUP D'ÉTAT. Plans were laid in great secrecy late in Nov During the night of Dec. 1–2 (Dec. 2 was the anniversary of the victory of Napoleon I at Austerlitz) **Count Morny,** the president's half-brother, had a proclamation printed, informing the people of the dissolution of the Assembly, the restoration of universal suffrage (Louis Napoleon was here posing as the friend of the people tricked by an unfriendly legislature), convening the electors for a plebiscite concerning fundamental revision of the constitution The people of Paris found themselves confronted by the army which occupied the Palais Bourbon, seat of the Assembly Leading deputies, Republican and Royalist (notably generals), prominent journalists *et al.* were arrested in their beds Two hundred deputies who met and proclaimed the fall of Louis Napoleon were arrested

Dec. 3. A group of Republican deputies organized a **popular rising** (Faubourg St. Antoine), barricades went up

Dec 4 Troops were hurled against the workers by General **Jacques de Saint-Arnaud,** minister of war, the movement promptly collapsed, but not before many insurgents had been killed and unarmed crowds of pedestrians had been fired upon (*Massacre of the Boulevards*). Large numbers of arrests followed in Paris and the provinces, where numerous risings were summarily repressed.

Dec. 21. The plebiscite, feverishly "prepared" by Morny (now minister of the interior), gave to the president (7,500,000 votes to 640,000) the right to draw up a constitution. the great majority of Frenchmen were obviously weary of parliamentary struggles, alarmed by popular risings, and ready to seek security beneath the authority of a second Napoleonic dictatorship Repressive measures continued. nearly 20,000 persons were sentenced — 10,000 of them to transportation to Algeria

1852, Jan. 14 The new **constitution** declared the chief of the state "responsible to the nation," but gave him "free and unfettered authority", he commanded the forces on land and sea, could make war and peace, alone could initiate laws, promulgated laws and issued decrees and regulations necessary to carry them into effect, etc The constitution set up a **Council of State,** chosen by the president, to formulate laws in secret sessions, a **Senate,** with members appointed by the president, sitting in secret, empowered to reject laws judged unconstitutional, and to modify the constitution through its *consulta*, subject to the consent of the president, a **Legislative Assembly** (*Corps législatif*), which could accept or reject legislation, but which had no power to introduce or amend bills Hence effective power rested in the hands of the president, who appointed the members of the Council of State and the Senate, and who exercised wide influence over the election of members of the Legislative Assembly through presentation of "official candidates," openly supported by the prefects The constitution expressly stated "The emperor governs *by means of* the ministers, the Council of State, the Senate, and the Legislative Assembly"

1852, Sept. The president made a **provincial tour.** Under the influence of handpicked prefects, there were frequent cries of **Vive l'Empire!** The empire was the logical and obvious next step

Nov. 2. The *senatus consultum* ratified by plebiscite (Nov. 21) and promulgated by decree (Dec 2), declared the empire re-established

d. THE SECOND EMPIRE: THE AUTHORITARIAN PERIOD, 1852-1860

1852-1870. NAPOLEON III, emperor.

1852, Feb. 17. Repressive measures. The press was kept under strict supervision by the police; newspapers could be established only with government permission and were obliged to deposit a large sum (50,000 francs in Paris) as guaranty of good behavior The minister of the interior discharged and appointed editors, on nomination of the owners; he had power to suspend publication at any time.

Feb. 28. Promotion of material prosperity. The government authorized formation of joint-stock banks issuing long-term credit The government-subsidized *Crédit foncier* (1852) was obliged to make loans at 5% and later (1854) became a state institution The *Crédit mobilier* (founded 1852 by the Pereire Brothers) was a joint-stock bank whose function it was to initiate and support large companies, participate in public loans, etc It played a large rôle in the development of railroads, shipping companies, public utilities Napoleon embarked also upon an active **social policy**. improvement of worker's dwellings, donations to charitable institutions, formation of friendly societies. A huge program of **public works** was initiated, especially the rebuilding of Paris by **Baron Georges Haussmann** (1809–1891), made prefect of the Seine Streets were widened and new boulevards opened Paris soon became a new city, enlarged from 12 to 20 arrondissements by the annexation of the suburbs (1860). Its population grew from 1,297,064 in 1851 to 1,825,274 in 1866

Dec. 25. The **powers of the emperor** were further extended by a *senatus consultum* He was given authority to conclude treaties of commerce, the budget of every ministry was voted by the Legislative Assembly, but the subdivision of sums granted was to be settled by imperial decree.

1853, Jan. 30. Marriage of the emperor to Eugénie de Montijo, Countess of Téba (1826–1920), daughter of a Spanish grandee Beautiful and charming, the empress was simple and dignified in manner, but she was impulsive and ignorant, incapable of grasping affairs of state. Her rigorous religious training made her an enemy of liberalism and a leader of the Clerical Party at the palace

Napoleon III continued the policy of **concessions to the Church** initiated by the Falloux Law Catholic missions were developed, government grants were made to churches and religious bodies of a charitable or educational character, Catholic schools were favored and offered increased competition to state schools. Catholics as a whole welcomed and supported the empire as a "heaven-sent blessing," although the Liberal Catholic wing, notably **Montalembert,** urged the importance of a liberal political régime as the only type under which Catholicism could flourish.

1854, Mar. 28. FRANCE DECLARED WAR ON RUSSIA (*Crimean War*, p 727) The war grew out of a dispute between France and Russia regarding the custody of holy places in Palestine (1850–1853). In part to please the Clericals, in part to assert French claims and maintain French prestige, Napoleon III, mindful of the poor impression made by Louis Philippe's cautious foreign policy, took a strong line and carried England with him.

1855, May-Nov. The Paris International Exposition bore witness to the technological and economic progress of France. Wages were rising rapidly, though costs of living rose even more. General prosperity. Height of Napoleon's popularity

1856, Feb.-Apr. Peace congress at Paris (p 728) France once again the leading power in Europe, enjoying great military prestige

Mar 16. Birth of the Prince Imperial, assuring the succession to the throne.

1857. A Railway Law encouraged railway companies through an elaborate system of state guaranties of bonded interest. Railways developed rapidly from 3627 kilometers in 1851 to 16,207 in 1858.

1858, Jan. 14. Attempt of Felice Orsini to assassinate Napoleon and the empress. Two persons were killed and a hundred wounded This unfortunate episode initiated Napoleon's active participation in the problem of Italy, resting on his interest in oppressed nationalities and national self-determination, as well as the desire to acquire for France her "natural frontiers"

1859, May 12-July 12 WAR OF FRANCE AND PIEDMONT against Austria (p. 657). The war, which took a turn not intended by Napoleon, estranged the Clerical elements in France, but brought France

1860, Mar. 24. The annexation of the Piedmontese provinces of **Savoy** and **Nice.**

1860, Jan. 23. Commercial treaty with England, marking the initiation of a free-trade policy.

e. THE LIBERAL EMPIRE, 1860-1870

1860, Nov. 24. Extension of the powers of the legislature. Napoleon, his popularity shaken by the Italian war and the commercial treaty with England, decided to revive parliamentary life, create parties and exercise his power more indirectly by acting as mediator The decrees of 1860 empowered the Senate and Legislative Assembly to move and discuss freely

a reply to the address from the throne, parliamentary debates were to be fully reported (thus saving governmental prestige in cases of failure by emphasizing the approval of a measure by a parliamentary majority). Both parties seized upon these concessions as an opening wedge to demand wider powers, the eventual revival of parliamentary institutions

1861, Nov. 4. The Financial powers of the legislature were next extended. A grandiose program of public works, an extravagant foreign policy had entailed rapidly mounting expenses The annual deficit was about 100 million francs; by the end of 1861 the floating debt had reached nearly a billion francs Financial policy was unsettled by the emperor's power to redistribute the estimates for the various departments after the budget had been voted *en bloc* and by his power to authorize supplementary loans on his own responsibility To restore the confidence of the business world and to oblige the legislature to share imperial responsibility, Napoleon renounced the right to borrow money while the legislature was not in session and agreed that the budget should be voted by sections But the emperor retained the right to alter the estimates, section by section. This defeated parliamentary control, gave rise to constant demands for an enlargement of the Chamber's financial powers

An opposition coalition rapidly grew up in the country, composed of such diverse elements as Catholics (outraged by the papal policy of Napoleon), Legitimists, Orléanists, Protectionists, and even Republicans — republican opposition had been reborn in the legislature when "the Five" (Emile Ollivier, Darimon, Hénon, Picard, Jules Favre) were returned in the elections of 1857 and by-elections of 1858

Napoleon's position was rapidly undermined during the sixties by a series of failures in foreign policy

1861-1867. THE MEXICAN EXPEDITION (p 822) Owing to the refusal of the revolutionary Juarez government to meet its obligations, France, England, and Spain decided (**Convention of London**, Oct 13, 1861) to force fulfillment of these obligations They all landed troops at Vera Cruz (Dec 1861), but the English and Spanish soon withdrew when they recognized Napoleon's more far-reaching plans, viz to establish a Catholic Latin empire in Mexico while the United States was engaged in the Civil War French troops took Mexico City (June, 1863) and proclaimed Archduke Maximilian (brother of Francis Joseph I of Austria) as emperor. Maximilian was unable to maintain himself without French support By 1866 the United States was vigorously demanding the withdrawal of the French and Napoleon was in dire need of his troops because of European complications He therefore deserted Maximilian, who refused to abdicate (1866, Dec) He was captured and executed by the Mexicans (June 19, 1867)

1862, Sept 25. An attempt to conciliate the papacy by warning the Italian government against a march on Rome, succeeded only in estranging the Italian government.

1863. Napoleon's efforts to intervene against Russia in the **Polish Insurrection** (p 704) broke down through the lukewarm attitude of the English and Austrians and through Prussia's support of Russia The effect of the policy was to estrange Russia, with which power France had been on close terms of friendship since 1857

1864. The September Convention. Reversing his attitude on the Roman question, Napoleon agreed to withdraw his troops from Rome within two years in return for a promise from the Italian government not to attack papal territory. This move outraged French Catholic opinion. The pope issued the encyclical *Quanta cura* and the *Syllabus of Errors* (p 664) which were in part an attack on the French government (e g. condemnation of the supremacy of the nation and of universal suffrage) Napoleon at once forbade publication of the *Syllabus* in France, and thereby further aroused the ire of the clergy.

These failures led to a more outspoken attitude on the part of the parliamentary opposition, which, in the elections of 1863, had polled a vote of almost two million and had returned 35 deputies to the Chamber, of whom 17 were Republicans Thiers denounced the extravagance in Mexico (Jan 11, 1864) and demanded "the indispensable liberties" which became the slogan of his group

1866, Mar. More than 40 members of the government majority in the Chamber broke away and formed a *Third Party* which asked the emperor "to further the natural development of the great Act of 1860"

1866, July 3. Prussian victory over Austria at Sadowa (p 686) The French, who had expected a long war ending with French mediation and compensation, regarded the victory as a national humiliation But the army was not ready and Napoleon's will was crippled by physical suffering occasioned by bladder stones. He

failed to mobilize and acquiesced in the formation of the North German Confederation. His belated attempts to secure compensation from Prussia in the Rhineland, Luxemburg, or Belgium (1866–1867) failed completely and left him badly discredited

1867, Jan. 19. The **right of interpellation** was granted the Chamber, but every interpellation required the previous approval of four committees, so that the majority could prevent undesired questions.

Mar. 12. The Senate demanded and was accorded the **right to examine the projected laws in detail** (instead of merely passing on their constitutionality) and to return them to the Legislative Assembly for further action Thus the Senate became a collaborator in legislation, though a reactionary one

Nov. 3. Napoleon again alienated the Liberals and Republicans by sending troops to crush the Garibaldians before they could attack Rome (Mentana, p 659)

1867-1870. ALLIANCE NEGOTIATIONS WITH AUSTRIA AND ITALY. These were part of the preparation for ultimate conflict with Prussia (regarded as inevitable after the Luxemburg affair of 1867, p. 686) **Napoleon met Francis Joseph at Salzburg** (1867, Aug 18–21) and Francis Joseph paid a visit to Paris (Oct). After the reorganization of the French army had been begun (**Army Law of Jan. 1868** adding 100,000 men and providing for complete rearmament), negotiations were initiated first with Austria, then with Italy, leading in 1869 to a draft treaty and to an exchange of letters between the sovereigns The main obstacles to a firm agreement were the unwillingness of the Austrians to commit themselves to immediate action in a dispute between France and Prussia on a purely German issue, and the insistence of the Italians on the evacuation of Rome by the French Nevertheless the French government mistakenly proceeded on the supposition that in case of war with Prussia, Austria and Italy could be relied upon to participate

By 1868 there had been a marked **revival of republicanism** and **radicalism.** Strikes had been permitted by an Act of May 1864 and trade unions, though still illegal, were connived at after an Act of Mar 25, 1868. The result was a growing epidemic of strikes and a wide spread of trade-unionism, with a corresponding strengthening of the republican sentiment. By 1868 the enemies of the imperial régime could be silenced only by candid concessions.

1868, May 11. A liberal press law made possible establishment of a newspaper by simple declaration; eliminated administrative interference in the form of warning, suspension, and suppression.

June 11. Limited right of public meeting was granted, each meeting to be held, however, in a closed building subject to supervision by a police officer empowered to dissolve it Republican newspapers promptly multiplied; workers met to discuss economic problems, to end in attacking the political régime

1869, May 23, 24. Parliamentary elections gave the government 4,438,000 votes to 3,355,000 for the opposition; the new Chamber included 30 Republicans.

June 28. The Third Party interpellated the government, demanded the creation of a responsible ministry. With the co-operation of 40 deputies of the Left, the "116" of the Third Party had a majority. The emperor had to yield or embark on a struggle with at least one-half of his subjects

July 12 He adopted the program of the 116 By decree of the Senate (Sept. 6), the **new régime** was initiated the Legislative Assembly was given the right to propose laws, criticize and vote the budget, choose its own officers; the Senate became a deliberative body with public sessions, had the right to discuss laws voted by the Assembly and send them back for consideration; ministers were declared responsible but were to "depend on the emperor alone" — an equivocal position casting doubt on how far the new régime could be considered "parliamentary"

Dec. 28. The Third Party pressed Napoleon for clarification of this situation, and he entrusted their chief, **Emile Ollivier,** with the formation of a "homogeneous cabinet, representative of the majority of the Legislative Assembly" Ollivier was faced by divisions within his own party, by growing revolutionary agitation in the country. **Leon Gambetta's** (1838–1882) Republican **Program of Belleville** demanded universal suffrage, freedom of the press, right of meeting, of combination, of trial by jury for all political offenses, separation of Church and State, suppression of the standing army. Labor was rapidly organizing in trade unions, on one hand, and its more radical elements in the Marxist **First International.** This was twice dissolved in France by official action (Mar. 1868; June 1870). France was swept by an epidemic of strikes.

1870, Jan. 10 When the Republican journalist, **Victor Noir,** was shot by Prince Pierre Bonaparte, cousin of the emperor, his funeral was the occasion for a demonstration against the empire of some hundred thousand people Ollivier's problem was no longer that of converting a liberal into a constitutional monarchy, but of saving the empire by concessions. Sweeping constitutional reforms followed

Apr. 20. The Senate was made an **upper house,** sharing legislative power with the Assembly, constituent authority was taken from the Senate and given to the people (no constitutional change was to be made without a plebiscite). The Bonapartists then sought a plebiscite (to strengthen the hand of the emperor). the nation was asked "whether it approved the liberal reforms effected in the constitution since 1860 whether it ratified the *senatus consultum* of April 20, 1870" Battle was joined between empire and republic (Right Republicans, however, as the *Gauche ouverte*, supporting the government)

May 8. The **plebiscite** gave 7,358,786 "ayes," 1,571,939 "noes"; the Napoleonic Empire seemed to have won new strength by this sweeping triumph. Within four months it was to be swept away by the War of 1870 (p 688)

f. THE THIRD REPUBLIC, 1870-1914

1870, Sept. 2. The **capitulation of Napoleon III at Sedan** (p 688) was a blow the empire was unable to survive

Sept 4. When the news became general in Paris, the mob invaded the Palais Bourbon and obliged the reluctant members of the rump of the Legislative Assembly to join in proclaiming the fall of the empire. In accordance with accepted revolutionary ritual, the **republic was proclaimed** at the Hôtel de Ville after a provisional **government of national defense** had been set up, of which **Gambetta** was the outstanding member, **General Trochu** (who had recently sworn to die defending the Napoleonic dynasty) the president The new government seemed faced by a hopeless task — winning a war already lost

Sept. 19. After Sedan two German armies swept on and invested Paris. The government devoted itself to a desperate defense of the country, sent a delegation to Tours to organize resistance in the provinces, presently joined by Gambetta, who escaped from besieged Paris in a balloon and virtually governed France (beyond Paris) in the succeeding months

The populace of Paris was disgusted by the inactivity of Trochu, possessed of a force superior to Moltke's in size; was further outraged by the "treasonable"

Oct. 27. Surrender of General Bazaine at Metz, with 173,000 men

Oct. 31. The discontent crystallized in a Paris *putsch* **of socialists and radicals,** aiming to establish a commune in the tradition of 1792 and carry on the war to the finish The movement collapsed. By Jan the Parisian populace was reduced to a miserable state With only eight days' supply of food remaining,

Jan. 28. Paris capitulated. The armistice agreement yielded the forts to the Germans and an indemnity of 200,000,000 francs, and disarmed the troops of the line in the city. By the armistice Bismarck also agreed to permit election of a representative assembly to determine whether the war should be continued or on what terms peace should be made

1871, Feb. 8. Elections were held.

Feb. 13. The National Assembly met at Bordeaux. From Tours Gambetta had organized armed resistance in the provinces, with the aid of a young mining engineer, **Charles de Freycinet** (1828–1923), the obstinate fighting of these hastily improvised forces amazed the German command But by mid-January this resistance had been substantially crushed, the country was exhausted, the majority of Frenchmen wanted peace Under these conditions only the **Radical Republicans** and **Socialists** wanted to continue the war "to the last ditch" Hence the country elected an assembly two-thirds of whom were conservatives

Feb. 16. The Assembly elected **Adolphe Thiers,** who had won a reputation as the Cassandra of imperial collapse, **chief of the executive power.**

Feb. 28. Thiers introduced the **terms of a peace treaty** negotiated with Bismarck by **Jules Favre** and himself providing for the **cession of Alsace and a part of Lorraine,** an indemnity of five billion francs, an army of occupation to remain until the indemnity should have been paid. The terms were hotly opposed by the representatives of Alsace and Lorraine, by Louis Blanc, Gambetta, Clemenceau, and others; but accepted, 546 to 107 (Mar 1).

May 10. The definitive **treaty of peace was signed at Frankfurt,** embodying the terms accepted Mar. 1, but with certain territorial rectifications, etc. Thiers proclaimed his own neutrality in the face of

party division within the Assembly and urged the necessity of the co-operation of all in the task of national recovery (**Pact of Bordeaux,** Feb 19). The Assembly adjourned (Mar 11) to meet again at Versailles (Mar 20)

1871. Mar.-May. THE PARIS COMMUNE. Mar. 1-3. Radical Paris, which had undergone the fruitless suffering of four months' siege, felt itself further humiliated by the entry of German troops into the capital and by the peace terms accepted by the National Assembly, it was alarmed by the composition of the Assembly, whose majority was obviously unfriendly to the republic Discontent spread rapidly. The National Guard, which the Germans had failed to disarm by the armistice of Jan 28, appointed a central committee, seized cannon belonging to the regular army, prepared for the eventualities of conflict

Mar. 18. Thiers sent troops of the line to seize the cannon; they fraternized with the crowd, refused to fire; the mob seized and executed Gens. **Lecomte** and **Thomas;** the troops retired, leaving Paris in the hands of the radicals. Election of a municipal council (the **Commune of 1871**) was called by the central committee of the National Guard for Mar. 26. The **Commune** included Moderate Republicans, Radical Republicans (of the 1793 Jacobin tradition), followers of Proudhon, followers of Blanqui, members of the **First International.** A body of such diverse tendencies had no clear-cut program, "socialist" or otherwise. It sought to decentralize France by enlarging the powers of municipalities, to substitute the National Guard for the standing army, to separate Church and State (**law of Apr. 2**) But opportunity for carrying through a legislative program was cut short by the armed struggle with the government of the National Assembly at Versailles

Apr. 2. The Versailles troops took the offensive, defeated the troops of the Commune repeatedly, entered Paris, reduced the city in the face of desperate but unorganized resistance behind barricades in the **Bloody Week** (May 21–28) Hostages taken by the Communards, including **Archbishop Darboy** of Paris, had been executed The victors replied by visiting summary and sanguinary punishment through courts-martial on a large but indeterminate number of prisoners; others in large numbers were deported or imprisoned

1871-1873. THE MONARCHIST OFFENSIVE. The Monarchist majority of the National Assembly, summoned to answer the question of war or peace, were determined to settle the question of a new régime for France before separating The Monarchists were divided: of those originally elected, some 200 were **Legitimists** (supporters of the "legitimate" Bourbon line and of its pretender, the **Count of Chambord**), the same number **Orléanists** (supporters of the **Count of Paris,** grandson of Louis Philippe), some thirty **Bonapartists.** Legitimists and Orléanists would hear nothing of a restoration of the "parvenu" Napoleonic dynasty.

1871, July 6. The **Count of Chambord** alienated both the Orléanists and the country by declaring categorically that he must rule under the white flag of the Bourbons. Meanwhile Republicans gained ground in by-elections to the National Assembly

Aug. 31. Thiers' title became *President of the Republic* by the **Law Rivet-Vitet,** which, however, also declared that the Assembly possessed constituent powers Thiers, originally a staunch Orléanist, was rallying to the *conservative republic* as a *pis aller* ("the government which divides us least"). The Monarchist majority permitted him to accomplish the patriotic task of paying the German indemnity (through two government loans, June 21, 1871, July 15, 1872), bringing with it **evacuation of French territory** (the last German soldier crossed the frontier, Sept 16, 1873). They then condemned the government of Thiers as insufficiently "conservative" (vote of 360 to 344)

1873, May 24. Thiers promptly resigned, and **Marshal MacMahon** (1808–1893) was elected president at the same session MacMahon, soldier by profession, monarchist by predilection, neophyte in politics, was to prepare the way for the restoration.

Aug. 5. The Count of Chambord and the Count of Paris became reconciled, and it was agreed that the latter should succeed the former, who was childless

Oct. 27. The plan foundered when the Count of Chambord insisted once again on the white flag

Nov. 20. To give themselves time to re-form their forces, the Monarchist majority conferred the powers of president on MacMahon for seven years (**Law of the Septennate**).

1875. THE CONSTITUTION OF 1875. After prolonged discussion of various constitutional projects, a **Law on the Organization of the Public Powers** was introduced.

Jan. 21. **Henri Wallon** proposed an amendment: "The president of the republic is elected by an absolute majority of the votes of the Senate and the Chamber of Deputies sitting together as the National Assembly He is chosen for seven years He is eligible for re-election" The term *republic* was crucial acceptance of the amendment meant acceptance of the republic The *impasse* caused by the failure of the Monarchists had resulted in some disintegration in their ranks

Jan. 30. **The Wallon amendment was adopted** by one vote — 353 to 352 **The Law on the Organization of the Public Powers** was accepted as a whole (Feb 25), the **Law on the Organization of the Senate** had been accepted (Feb 24) A **Law on the Relation of the Public Powers** (passed July 16) completed the so-called **Constitution of 1875.** The executive was a president (who was not to be a member of the legislative body) elected according to the Wallon amendment, possessed of the usual executive powers (command of the army and navy, right to choose civil officials and military officers, etc.), but requiring a counter-signature for each of his acts by the relevant minister. The ministers were declared responsible, each for his own acts, together for the general policy of the government. The Senate was to have 300 members, 225 chosen for nine years, on the basis of a complicated and indirect system of election, 75 named by the National Assembly (later by the Senate) for life (senators for life were discontinued in 1884). The Senate shared the right to initiate legislation (except finance laws) with the Chamber of Deputies, whose members were elected by universal, direct, manhood suffrage. The Chamber was subject to dissolution only by the president, with the consent of the Senate. The seat of the government was fixed at Versailles, reflecting fear of Republican Paris.

Apr.-May. The famous **war scare** during which the Duc Decazes, French foreign minister, secured the intervention of England and Russia at Berlin (p 733).

1877, May 16. CRISIS OF *SEIZE MAI.* The National Assembly came to an end and the new Senate and Chamber met for the first time (1876, Mar 8). The Senate had a Conservative majority, the Chamber was overwhelmingly Republican In the next quarter-century the new republican institutions were to be repeatedly attacked by their enemies of the Right. The first test came in the affair of the *Seize Mai* when MacMahon, irritated by what he considered inadequate opposition of the premier, **Jules Simon,** to the anti-clerical attitude of the Left, forced Simon to resign. Had the power of dismissal of ministries been conceded to the president, the Chamber's control of ministries would have disappeared, and the president would have been given the powers held by Louis Napoleon, 1848–1851 (p 632)

June 19. A new cabinet, headed by the Orléanist **Duke of Broglie,** was given a vote of "no confidence" by the Chamber, 363 to 158, MacMahon dissolved the Chamber with the consent of the Senate (the only dissolution in the history of the Third Republic)

Oct. 14, 28. In the elections, despite vigorous governmental pressure, the Republicans lost only 36 seats

Nov. 19. The De Broglie ministry was forced to retire by an adverse majority (312 to 205), its successor, the presidential **Rochebouet ministry** (Nov 24) fared the same

Dec. 13. MacMahon was forced to beat a retreat, named **Jules Dufaure** to head a ministry enjoying the confidence of the Chamber The principle of ministerial responsibility had triumphed over that of the personal power of the president

1879, Jan. 5. In the **senatorial election** the Republicans gained 58 seats, faced by a hostile majority in the Senate and Chamber,

Jan. 30. **MacMahon resigned** (although his term of office had more than a year to run), and was succeeded by a Conservative Republican, **Jules Grévy.**

1879-1887. PRESIDENCY OF JULES GRÉVY (1813–1891). The Conservative Republicans (**Opportunists**), in power from 1879 to 1885, proceeded to a series of **anti-clerical laws:**

1880, Mar. 29, 30. Two decrees (1) enjoining all non-authorized **religious associations** to regularize their position within three months, (2) ordering dissolution and **dispersion of the Jesuits** within three months and dissolution of all religious teaching associations within six months (giving effect to the decree of 1762 and later legislation).

July 11. A law providing virtually **full amnesty to the Communards of 1871.**

1881, Mar.-May. French occupation of Tunis (Treaty of Bardo, May 12), largely the work of Jules Ferry (1832–1893); important as marking the emergence of French imperialism and the expansion of the second French Empire (pp. 737, 838).

1882, Mar. 29. Primary education law, making education from 6 to 13 free, obligatory, and "neutral" (i e. public schools were to give no religious education)

1884, July 27. Law re-establishing divorce substantially as it had been permitted under the civil code (divorce had been abolished by the law of May 8, 1816).

Further important legislation included

1884, Mar 21. The Trade-Union Act legalizing unions forbidden by the *Loi Chapelier* (of 1791) and subsequent legislation, but tolerated since 1868 By this time the **labor movement**, temporarily in eclipse after the Commune, had begun to revive and to veer in a Marxian direction In 1876 **Jules Guesde** (1845–1922) had returned from exile and had begun to propagate Marxian ideas At the **third congress of French workers** (Marseilles) in Oct. 1879 the Guesdists had won the day over the more idealistic co-operative socialists and steps were taken to organize a socialist political party, the *Fédération du Parti des Travailleurs Socialistes de France.* In the party the more moderate group (**Possibilists**) were at first dominant. In 1882 the Guesdists withdrew and formed the *Parti Ouvrier Français*, while the Possibilists reorganized the majority as the *Parti Ouvrier Socialiste Révolutionnaire Français*

1884-1885 French advance in Tonkin, resulting in war with China (p 874) and downfall of the second Ferry ministry (1883–1885)

1886-1889. THE BOULANGER CRISIS. This arose from widespread discontent with the Conservative Republican régime The Radical Republicans wished to democratize further the constitution and to separate the Church and State, the workers were suffering from depression and demanding state action in their behalf, the Monarchists continued to hope for an eventual restoration, The **elections of 1885** were a victory for the Right (202 seats as against 80 in 1881), although the various Republican groups still had 372 seats

1886, Jan. 4. General Georges Boulanger (1837–1891) became minister of war in the Freycinet cabinet He was the friend and protégé of **Georges Clemenceau** (1841–1929), dominant figure among the Radical Republicans, who had imposed Boulanger on Freycinet Boulanger won popularity in the army through various reforms (improvement of soldiers' food and living conditions, etc); among the people by frequent and impressive appearances in public, notably on July 14, 1886 He was celebrated in poem and song, became a national figure with the **Schnaebelé incident** (p 740) and the attacks of the German press, and was greeted as the incarnation of the *révanche*

1887, May 18. When **Boulanger** left office (fall of the Goblet cabinet), his popularity only increased The government became alarmed, exiled Boulanger to Clermont-Ferrand as commandant of the 13th Army Corps The **Wilson Scandal** shook the prestige of the republic and offered Boulanger an opportunity to widen his contacts Daniel Wilson, son-in-law of President Grévy, was discovered to have been trafficking in medals of the Legion of Honor Grévy, although not guilty of complicity, was forced to resign the presidency (Dec 2) He was succeeded by **Marie François Sadi-Carnot.**

1887-1894. Presidency of Sadi-Carnot (1837–1894), an honest but undistinguished politician, grandson of Lazare Carnot, "organizer of victory" in 1793

During the Wilson crisis, Boulanger maintained relations with the Radical Republicans and made contact with the Orléanist leaders (*Nuits historiques*, Nov 28–30, 1887) — apparently ready to satisfy his ambitions by whatever path offered Boulanger, although ineligible for the Chamber, permitted his candidacy to be posed repeatedly as a test of his popularity

1888, Mar. 27 The government, alarmed, put him on the retired list; he was now eligible for the Chamber, to which he was promptly elected (Apr 15) He initiated a vigorous **campaign for revision of the constitution** (in what sense was not specified); demanded dissolution of the Chamber as an essential preliminary; resigned from the Chamber (July 12) and was returned in three constituencies simultaneously (Aug 19).

1889, Jan. 27. Boulanger won a striking victory in Paris It was believed he would march on the Elysée Palace that night and make himself master of France But he failed to seize the opportunity to make himself dictator and his popularity rapidly declined The government prepared to have him tried for treason by the Senate, and he fled into exile (Apr 8), where he eventually committed suicide on his mistress's grave in Brussels (1891, Sept. 30).

July 17. Meanwhile a law was adopted forbidding **multiple candidacies.** The general elections of 1889 were a-cri-

umph for the Republicans, a crushing defeat for the Boulangists.

1890 ff. The Ralliement. The Boulangist fiasco was a blow to the monarchists and their ally, the Church **Pope Leo XIII,** discouraged by the failures of the monarchists, turned to a policy of conciliation of the republic

1890, Nov. 12. Charles Cardinal Lavigerie, Primate of Africa, in a famous toast at a banquet to French naval officers at Algiers (**Algiers Toast**), declared it the duty of all citizens to "rally" to the support of the existing form of government, once that form of government had been accepted by the people This so-called *ralliement* to the republic was vigorously combated by Monarchists and Clericals on the one hand, and by Radical Republicans and Socialists on the other But the pope was influenced, notably by the international situation (p 742), to espouse Lavigerie's policy

1891, May 15. The encyclical *Rerum novarum* (on the condition of the workers) attempted to win the support of both Radical and Conservative Republicans through a more liberal (though by no means radical) statement of papal views on the social question, more specific support to the movement came in the encyclical *Inter innumeras* (Feb 16, 1892), which declared that a government once established was legitimate Despite opposition, the *ralliement* introduced a new spirit into the relations of Church and State in France· the period of the **Méline ministry** (1896–1898) has been termed "the Golden Age of Clericalism" Eventually the *ralliement* foundered in the struggle over Dreyfus (p 641).

1891, July. Visit of a French squadron to Cronstadt. Beginning of the **Franco-Russian Alliance** negotiations (p 742).

1892-1893. THE PANAMA SCANDAL. Attracted by the name of **Ferdinand de Lesseps** (1805–1894), builder of the Suez Canal, and president of the Panama Company (*Compagnie du Canal Interocéanique*), French investors, from peasant to capitalist, had contributed to the Panama Canal project to the extent of 1,500,000.000 francs The company collapsed (1889, Feb) as a result of corruption and mismanagement, but despite the uproar, it was nearly four years before legal action was taken against de Lesseps and his associates (1892, Nov. 19) In the course of a parliamentary investigation and two trials, it was revealed that the company had made lavish distributions to the press and to a certain number of deputies and senators (in the interest of securing their support for parliamentary authorization of a stock lottery) The company's intermediary was **Baron Jacques Reinach,** Jewish banker of German origin, who was found dead the day after he was summoned for trial The revelations caused widespread consternation, increased by knowledge that the government had attempted to silence the whole affair

1893, Feb. 9. Ferdinand de Lesseps and some of his associates were condemned by the court of appeal to pay large fines and serve prison sentences, but the decree of the court was set aside by the *cour de cassation* (June 15) on the grounds that the three years under the criminal statute of limitations had expired Of the numerous senators, deputies, and others tried before the court of assizes, only three were found guilty, one (Baihaut) on his own confession that he had received 375,000 francs

Further development **of socialism** and the **labor movement.** **In** 1890 a further split in the ranks of the Possibilists had taken place, precipitated by **Jean Allemane,** who criticized the majority for accepting public office and co-operating with the *bourgeoisie* The new faction took the name *Parti Ouvrier Socialiste Révolutionnaire* With the progress of the industrial revolution and the consequent growth of the proletariat, the social question became ever more acute Collisions between workers and the forces of "order" became more and more frequent In the **Massacre of Fourmies** (1891, May 1) the troops fired on a crowd of demonstrating workers and killed women and children, causing a great sensation. The government of the conservative republicans continued lukewarm in the matter of social reform, with the result that extremist elements in the labor movement became more and more active The **anarchists** (disciples of **Michael Bakunin** and **Prince Peter Kropotkin**) began a long series of outrages (dynamiting and assassination) In Mar. 1892, a number of bombings were carried out by **Ravachol,** an anarchist

1893, Oct. Visit of a Russian squadron to Toulon, followed by the conclusion (1893, Dec–1894, Jan) of the **Franco-Russian Alliance** (p 742).

1893, Dec. 9. Auguste Vaillant, another anarchist, exploded a bomb in the Chamber of Deputies

1894, June 24. President Carnot was stabbed at Lyons by an Italian anarchist, **Santo Caserio.**

Meanwhile, the various socialist parties had begun to concert action. In 1893 they had elected some 50 deputies The trade unions, which had developed rapidly after

the law of 1884, organized nationally in the *Fédération des Syndicats* (by trades) and in the *Fédération des Bourses du Travail* (each representing the different trades in one locality) Under the influence of anarchism

1894. **The Trade-Union Congress at Nantes** adopted the principle of the **general strike.**

1894, June 27—1895, Jan. 17. **Presidency of Jean Casimir-Perier** (1847–1907), who resigned in disgust.

1895 **The Trade-Union Congress** at Limoges organized the *Confédération Générale du Travail* (C G T) with a program of direct action, seeking to destroy the capitalist régime and the state by means of the general strike and to prepare for this eventual catastrophe through local strikes, boycotts, and sabotage (a theory later given classic formulation by **Georges Sorel** in his *Reflections on Violence*, 1908) By the end of the century the workers' organizations — radical revolutionaries harking back to Auguste Blanqui, socialists of various stamps; anarchists, syndicalists — constituted a real power in the country, which was, however, dissipated by divergences of view and mutual antagonism

1895-1899. **Presidency of Félix Faure** (1841–1899), prosperous and conservatively minded business man and politician During his presidency the **ministry of Méline** (1896–1898) marked the last flowering of conservative, protectionist, clerical republicanism

1894-1906. **THE DREYFUS AFFAIR.** Captain Alfred Dreyfus, probationer (*stagiaire*) of the general staff of the army, was arrested (1894, Oct. 15) charged with treason He was tried by a court-martial *in camera*, condemned (Dec 22), degraded, sent to Devil's Island in French Guiana. The evidence was a list of military documents (the *bordereau*), apparently submitted by a treasonable member of the general staff to the German military attaché, later purloined from the latter's mail by a French spy and submitted to the French intelligence service The latter's handwriting experts disagreed as to whether the writing was that of Dreyfus, further "secret" evidence, subsequently shown to be irrelevant or forged, was also introduced and was said to have been considered conclusive. The presence of treason in the general staff had been aired in the press and had excited public opinion; the honor of the army seemed to be engaged; a victim was needed, and Dreyfus was the only one to whom the evidence pointed at all Moreover, the real culprit was a friend of a member of the general staff, **Major Henry,** who sought to protect him Dreyfus was a Jew, intensely disliked by most of his conservative colleagues of the general staff, who were Catholic, royalist, anti-Semitic Dreyfus, wealthy and ambitious, son of an Alsatian patriot who had opted for France after the cession of 1871, apparently had no motive for treason

1896, Mar. **Colonel Georges Picquart,** new chief of the intelligence service, had delivered to him a second document (the *petit bleu*), a card of the type used in the Paris pneumatic postal service. The card was addressed to a former member of the general staff, **Major Count Walsin-Esterhazy,** then stationed at Rouen, French by birth, former officer in the Austrian army, in the papal zouaves, in the foreign legion; *débauché*, gambler, *arriviste*. Picquart compared a specimen of Esterhazy's writing with that of the *bordereau*, concluded they were identical, submitted his evidence to Gen Gonse (second in command of the general staff), was told to say nothing of the matter — that the affair could not be reopened Picquart was transferred to a frontier post in Tunis

1897, Nov. 15. Mathieu Dreyfus, brother of Alfred, discovered independently that the *bordereau* was in Esterhazy's writing, and demanded the latter's trial.

1898, Jan. 11. Esterhazy was tried by a military tribunal, and triumphantly acquitted

Jan. 13. The novelist, **Émile Zola** (1840–1902), promptly published an open letter (*J'accuse*) to the president of the republic, denouncing by name the members of the general staff associated with the condemnation of Dreyfus.

Feb 23 Zola was tried and condemned to one year imprisonment

It was presently discovered that a decisive document in the secret Dreyfus *dossier* had been forged by Col. (formerly Major) **Henry,** now chief of the intelligence service

Aug. 30. When Henry admitted the forgery (only the first of a series to be discovered), Gen **de Boisdeffre,** chief of the general staff, resigned Henry was imprisoned and committed suicide the next day. A rehearing for Dreyfus was promptly sought by his wife (Sept. 3).

1898, Sept.-Nov. **The Fashoda crisis** (p. 748) brought France and England to the brink of war.

By this time France was divided into two camps, and the *Affair* had taken on a profound political complexion: **Dreyfusards** (those interested in preserving the re-

public) ranged themselves against **anti-Dreyfusards** (the army and a large body of Royalists and Catholics—forces interested in a restoration of the monarchy) A violent campaign in the press, both Nationalist and Republican, followed. Street clashes were frequent. The various socialist parties, who had at first considered the *Affair a* mere "*bourgeois* quarrel," now saw the republic threatened.

Oct. 16. In a mass meeting in Paris the socialists concerted forces to defend the republic against its "attackers."

1899, Feb. 16. The sudden **death of President Faure,** opponent of a retrial for Dreyfus, was followed by the election of the colorless **Emile Loubet,** considered a friend of revision

1899-1906. Presidency of Emile Loubet (1838–1929)

1899, June 3. The *cour de cassation* (highest court of appeal) set aside the condemnation of Dreyfus, and summoned a court-martial at Rennes

Sept. 9. Dreyfus was again found guilty, this time with "extenuating circumstances"; he was condemned to ten years' imprisonment.

Sept. 19. By presidential decree, he was pardoned — first act of pacification of the **ministry of René Waldeck-Rousseau** (1846–1904), formed June 22, 1899, to bring internal peace to the country The Dreyfusards painfully accumulated new evidence, and Dreyfus finally asked a rehearing. On July 12, 1906 the *cour de cassation* set aside the judgment of the court-martial at Rennes, declaring it "wrongful" and "erroneous" The government decorated Dreyfus (July 13) and raised him to the rank of major.

1901-1905. SEPARATION OF CHURCH AND STATE. The outcome of the **Dreyfus Affair** was a victory for the republic, a defeat for its enemies (monarchists, the clergy, the army) In matters affecting the Church, Waldeck-Rousseau wished to remain faithful to the Napoleonic **Concordat** (p 588), but was a proponent of stringent regulation (not suppression) of religious associations, many of whose members had intervened on the side of the anti-Dreyfusards

1901, July 1. The result was the **Associations Law,** whose terms relative to religious "congregations" were most important· (1) no congregation could be formed without a law defining its scope and activity; (2) all congregations lacking authorization, or which parliament failed subsequently to authorize, were to be dissolved Since the treatment of congregations was to depend on the will of the legislature, the general elections were all-important The elections were a victory for the Radical Republicans and Socialists

The **Republican bloc** (formed in 1900 to defend the republic against its anti-Dreyfusard opponents) was determined to proceed with vigor against the Church, viewing the Associations Laws as a *pis aller*

1902, June 2. Waldeck-Rousseau, unsympathetic with extreme measures, **resigned,** an unprecedented act for a premier who possessed the confidence of the majority of the Chamber His successor was **Emile Combes** (1835–1921), known for his probity and anti-clerical convictions His ministry proceeded to enforce the Associations Law with vigor: closing some 3000 unauthorized schools until they should apply for, and receive, authorization, preparing 54 bills refusing the applications for authorization of as many male congregations (all 54 bills were passed by parliament, 1903, Mar), etc

1904, July 7. All teaching by congregations was forbidden by a further law, such congregations to be suppressed within ten years

Relations of the French government with the papacy were rapidly embittered.

1904, Mar. President Loubet's visit to the King of Italy, the pope's enemy, irritated the papal government, which sent to the Catholic powers an official protest against this offense to papal dignity

May 21. The French ambassador to the Vatican was recalled.

Nov. Combes, who thus far had wished to preserve the Concordat of 1801, introduced a **bill for the separation of Church and State.** It was not Combes' bill (his ministry came to an end, Jan. 19, 1905), but that ably defended by **Aristide Briand** (1862–1932, reporter of the Chamber's Committee on the Separation of Church and State, that was carried, the law being promulgated Dec. 9, 1905: (1) it guaranteed complete liberty of conscience; (2) it suppressed all connection of the Church with the state — henceforth the state would have no connection with the appointment of Catholic ecclesiastics or with the payment of their salaries, (3) the property of the Church was to be taken over by private corporations formed for that specific purpose Thus ended the relationship of the state to the Catholic Church as established by the Concordat

of 1801, as well as the separate régimes establishing the relation of the state to the Protestant and the Jewish faiths (the Protestant Church had been state-supported and controlled since 1802, under the Organic Articles of Apr 8, the Jews had been under state control since 1808 and had been given state support in 1831).

Apr. 8. **Conclusion of the Entente Cordiale** with England (p 752)

1905. An acute crisis in **Franco-German relations,** arising from the Moroccan question (p. 753). Dramatic downfall of **Théophile Delcassé** (June 6), foreign minister since June, 1898

1906-1913. Presidency of Clément Armand Fallières.

1906-1911. Striking **revival of French nationalism and royalism.** This was an outcome of the conflict over Dreyfus and particularly of the international tension resulting from the Moroccan crisis The new "integral nationalism" assumed a sophisticated form in the writing of **Charles Maurras** (1868–) and **Léon Daudet** (1867–1942) in the newspaper *Action Française* (founded 1899) They sought the restoration of the monarchy, the aggressive development of French power at home and of French prestige abroad **Maurice Barrès** (1862–1923), the eminent novelist, though unsympathetic to the restoration of the monarchy, also sought the promotion of national unity in terms of French "traditional development," with decentralization and harmonizing of the forces of nationalism and socialism, an ideology in some respects foreshadowing National Socialism

1906-1911. Epidemic of strikes and labor troubles. Decline in wine prices caused a crisis in that industry and the organization of vineyard workers in the *Confédération Générale des Vignerons* (1907). There were manifestations on a grand scale in the south, and considerable violence.

1909, Apr.-May. Strike of the Paris postal workers. Civil servants had demanded the right to unionize and affiliate with the *Confédération Générale du Travail.* The former demand had been granted, the latter refused The government of **Georges Clemenceau** (1906–1909) met the strikers with severe measures more than 200 employees were discharged and the right of civil servants to strike was denied Labor agitation was accompanied by violent passages between radicals and socialists notably between Clemenceau and **Jean Jaurès** (1859–1914), the outstanding figure of French socialism

1909-1910. The first ministry of Aristide Briand.

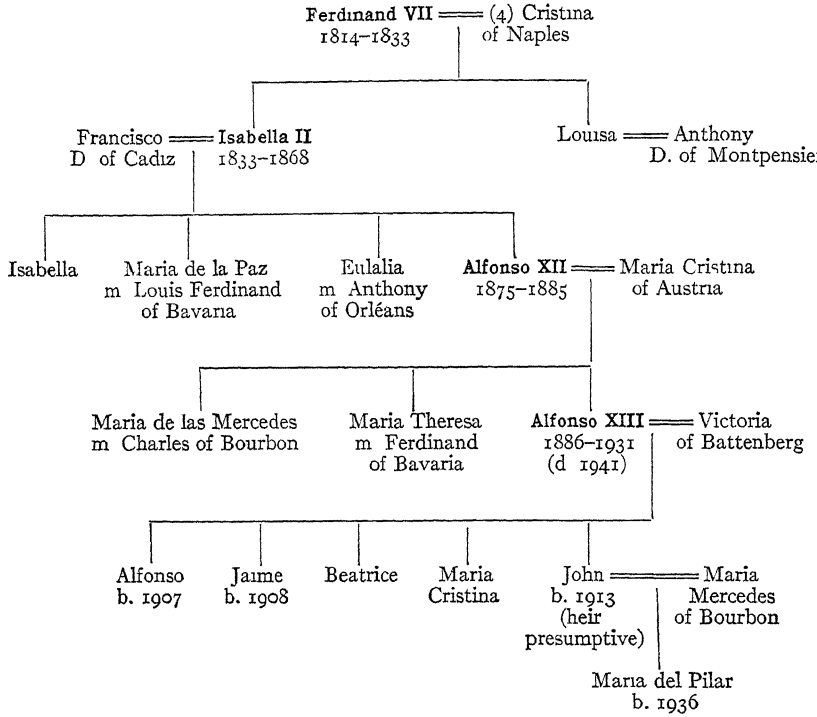
1910, Oct. 10. A strike of railway workers on the Northeastern Railway was answered by Briand (long a socialist) by calling out the troops The National Union of Railway Workers and Employees thereupon called a **general strike,** but when it became clear that the movement was collapsing, the strike committee ordered the resumption of work (Oct. 18). Briand defended the use of force to maintain the functioning of the railroads as essential to the life of the nation and its defense.

1911. New strikes of vineyard workers in Champagne, similar to those in the south in 1907.

1911, June-Nov. The second Moroccan (Agadir) **crisis** (p. 757). The ministries of **Joseph Caillaux** (1911, June 27–1912, Jan 10) and **Raymond Poincaré** (1912, Jan. 14–1913, Jan 18) were taken up largely with the Moroccan problem and other questions of international import, notably those arising from the Tripolitan War (p 758) and from the Balkan Wars (p. 759)

1913, July-Aug. The government of **Louis Barthou** (1862–1934) carried a **law increasing the military service** from two to three years This measure was vigorously opposed by the Radical Socialists and Socialists and its revocation was hotly debated until the very eve of the World War

1913-1920 Presidency of Raymond Poincaré, ardent patriot, one of the most eminent of French statesmen in modern times.



(*Cont pp* 912 *ff*, 976)

5. THE IBERIAN PENINSULA

a. SPAIN

1814-1833. FERDINAND VII, restored to the throne (1814, Mar.) after the conquest of Spain by Wellington in the Peninsula War (p 600). The king had promised to maintain the liberal **Constitution of 1812** (p 596), but refused to keep his promise, knowing the absolutist temper of the country and relying on the support of the Church and the army. Ferocious

The Spanish Bourbons (1814–1931)

persecution of the liberals and the king's capricious and incapable rule caused widespread dissatisfaction, notably in the army The loss of the colonies in America (p 799) deprived the government of one of the chief sources of income and determined Ferdinand (who was encouraged by Russia and France) to undertake their reconquest Forces were concentrated at Cadiz, one of the chief centers of disaffection, where the troops became demoralized

1820, Jan. Mutiny of the troops under Colonel Rafael Riego. They began to march to Madrid Other revolutionary movements broke out in the north and ultimately the garrison in Madrid mutinied Ferdinand yielded and restored the constitution. The revolutionaries held him practically a prisoner until 1823.

1822. The Congress of Verona (p 604), after much previous debate among the powers, gave France a mandate to suppress the movement. England, under Canning, did its utmost to prevent intervention, but in vain. A French army crossed the Pyrenees in the spring of 1823, marched to Madrid to the cheers of the unenlightened peasantry, and drove the revolutionaries south to Cadiz, taking the king with them

1823, Aug 31. The battle of the Trocadero brought the revolution to an end. Ferdinand was restored He ignored the advice of the French to introduce a moderate constitutional régime and delivered the country over to an orgy of repression which lasted until his death

1823, Dec. 2. Monroe's message to Congress (Monroe Doctrine, p. 770). This warned European countries against intervention in South America, and was the outcome of Canning's approaches to the American minister, Richard Rush, for joint action to oppose reconquest of the colonies. The danger of such action was almost nil on account of the attitude and sea-power of England

1833, June 30. To assure the succession of his infant daughter **Isabella,** Ferdinand, under the influence of his

energetic queen, Cristina, set aside the Salic Law, thus depriving his brother, **Don Carlos**, of the throne. The King died Sept 29

1833-1868. ISABELLA II (1830–1904) She was represented by her mother, Maria Cristina, as regent. Realizing that she must depend on the Liberals for support, the latter granted

1834. The Estatuto Real (royal constitution). Spain was divided into 49 administrative provinces, on the model of the French *départements*; a bicameral legislature (*Côrtes*) was given financial powers, but the government retained the right of dissolution and control of the ministry. The constitution was less advanced than that of 1812, and led to a split in the ranks of the Liberals. the *Moderados* accepted the statute; the *Progresistas* demanded restoration of the Constitution of 1812

1834-1839. THE CARLIST WAR. Don Carlos, claiming the throne, was supported by the conservative elements, the Church, and much of the north of the country (Basques, Navarre, Aragon, Catalonia) where regional and autonomous feeling revolted against the centralizing tendencies of the Liberals

1834, Apr. 22. Quadruple Alliance between England, France, Spain, and Portugal, aimed at the support of the constitutionalists against the pretenders. The British government went so far as to suspend the Foreign Enlistment Act and allow the formation of a foreign legion, under **Sir De Lacy Evans.** In 1836–1837 the Carlists were defeated, and the war was concluded by the **Convention of Vergara** (1839, Aug. 31). Don Carlos left the country for France

1836, Aug 10 Progressist insurrection in Andalusia, Aragon, Catalonia, and Madrid Cristina, who had become very unpopular through her secret marriage with **Ferdinand Muñoz** (1833), was obliged to restore the Constitution of 1812 and summon a Progressist ministry, which had the Côrtes adopt the **Constitution of 1837,** a compromise between the Constitution of 1812 and the Statute of 1834

1840, Oct. Revolt of General Espartero, "Duke of the Victory," who had embraced the Progressist cause. Cristina was forced to leave the country and Espartero became practically dictator, acting as regent

1841, Oct. Espartero defeated a Cristina insurrection at Pampeluna.

1842, Nov. Rising in Barcelona, accompanied with much bloodshed. A republic was proclaimed, but was suppressed by Espartero (Dec)

1843, June. A coalition of *Moderados*, *Progresistas*, and republicans declared against Espartero. **General Narvaez took Madrid** (July 15) and Espartero fled the country (Aug) Isabella, though only 13 years old, was declared of age, with Narvaez as lieutenant-general of the kingdom Cristina returned (1844, Mar), but Narvaez remained practically dictator until 1851

1845. A new constitution virtually re-established the Statute of 1834

1846, Oct. 10. Isabella married her cousin, Francis, Duke of Cadiz, while her sister, **Luisa Fernanda,** married the Duke of Montpensier, youngest son of Louis Philippe of France The **affair of the Spanish marriages** caused the breakdown of the *entente* between England and France which originated in their collaboration in the Belgian question (1830–1831) and in the Quadruple Alliance of 1834 In 1843 and 1845 Aberdeen and Guizot had made **agreements at Eu,** according to which the choice of Isabella's husband should be confined to the Spanish and Neapolitan branches of the Bourbon house (i e the descendants of Philip V) This eliminated the two most desirable candidates, the Duke of Montpensier and Prince Leopold of Saxe-Coburg It was further provided that the Infanta Luisa should not be married to a French prince unless her sister, the queen, should have first been married and borne children Ignoring the Eu pacts, Palmerston sent a dispatch to Sir Henry Bulwer, the British ambassador at Madrid (July 19, 1846), mentioning three candidates for Isabella's hand, and Prince Leopold first. The second part of the dispatch discussed the Spanish domestic situation and condemned the French-supported *Moderados* for their violence and arbitrary methods. The French and Spanish governments, united in distrust of Palmerston and fearing British support of the *Progresistas*, precipitated the engagement of Isabella to the Duke of Cadiz and of Luisa to Montpensier When the double marriage had taken place Palmerston was furious and invoked the Treaty of Utrecht with its precautions against the union of France and Spain This was of no effect, but Franco-British relations were seriously compromised

1851, Mar. 16. Concordat with the papacy. It recognized the Catholic religion as the sole authorized faith, gave the Church sweeping control of education and censorship, in return the papacy recognized abo-

lition of ecclesiastical jurisdictions and the sale of confiscated church lands

1852, Dec. A constitutional reform virtually eliminated the powers of the Córtes and established the dictatorship in law. A **camarilla** had complete power in its hands

1854, July. A revolution led by General O'Donnell (a Moderate) and Espartero (Progressive) overthrew the government and forced Cristina to leave the country. O'Donnell then formed a new party, the **Liberal Union,** espousing a program between that of the moderates and progressives When the Córtes adopted a law confiscating church lands, Isabella threatened to abdicate

1856, July 15 Espartero resigned in favor of O'Donnell, who re-established the Constitution of 1845 with an amendment guaranteeing annual assembly of the Córtes and presentation of the budget at the beginning of each session.

1856, Oct. O'Donnell was dismissed and two years of reaction followed, punctuated by numerous insurrections

1858-1863. O'Donnell back in power, governing with the support of the Liberal Union and avoiding thorny questions of domestic policy.

1859-1860. Successful **campaign against the Moors** in Morocco.

1861. Annexation of Santo-Domingo (p. 824) followed by insurrection in the island Relinquishment of the island (1865)

Spain also joined France and England in intervention in Mexico

1864, Sept. Narvaez made premier, supported by the *Moderados* and many of the absolutists Reversion to a Catholic and reactionary policy The Liberal parties united in opposition to the régime, the *Progresistas* boycotting the elections.

1864-1865. Dispute with Peru over the Chincha Islands (p 813).

1865-1866. War with Chile (p 809).

1865. A severe **press law** was accompanied by the dissolution of political clubs.

1866, Jan.-June. An insurrection organized by General Prim failed, but was followed by many executions.

1868, Apr. 23. Death of Narvaez, who had been preceded by O'Donnell (d. 1867, Nov. 5). **Gonzalez Bravo** attempted to continue the absolutist régime, but the army escaped from his control. The Liberal parties united on a revolutionary program. Scandals which gathered about the queen's name were ruthlessly exposed in the newspapers and undermined her position Her latest favorite, **Carlos Marfori,** a cook's son and an actor by profession, was made minister of state.

Sept. 18. Admiral Topete issued a revolutionary proclamation at Cadiz, followed by a manifesto by the Liberal generals By the end of Sept the movement had spread to all Spain

Sept. 28. Royal forces defeated at **Alcolea** by Marshal Serrano The queen fled to France (Sept. 29) and was declared deposed.

Oct. 5. A provisional government was formed, with **Serrano** at the lead and with **Prim** as the moving spirit Reactionary laws were annulled, the Jesuit and other religious orders abolished The government established universal suffrage and a free press

1869, Feb. A constituent Córtes met

May 21. The Córtes voted for the continuance of monarchical government

June 6. The new constitution promulgated.

June 15. Marshal Serrano made regent. Prim head of the ministry. The new régime was bothered by Carlist and republican uprisings and other disturbances, but its chief anxiety was to find a ruler The Duke of Montpensier was passed over out of consideration for Napoleon III; the Duke of Aosta, Prince Ferdinand of Saxe-Coburg; the Duke of Genoa, General Espartero, all these declined the throne when offered. Finally the offer was made to **Prince Leopold of Hohenzollern-Sigmaringen,** who accepted, but then withdrew This candidacy became the occasion for the **war between Germany and France** (p 688)

1870, Dec. 30. The Duke of Aosta, son of Victor Emmanuel II of Piedmont, was prevailed upon to accept Death of Prim, victim of an assassin

1871-1873. AMADEO I (b. 1845). Amadeo ruled for two years — isolated, opposed on every side, greeted as a "foreigner" — and then abdicated (1873, Feb. 12).

1873-1874. THE FIRST SPANISH REPUBLIC, proclaimed (Feb 12) by the radical majority in the Córtes elected in Aug. 1872 (the Carlists having abstained)

1873, May 10. A constituent Córtes, now elected, was divided among partisans of different types of federal republic.

Sept. 8. In the midst of Carlist risings, **Emilio Castelar,** partisan of a cen-

tralized republic, was made head of the government, with the mission of restoring order.

1874, Jan. 2. Castelar retired. A military *coup* promptly followed, with Marshal Serrano as head of a provisional government The Carlist war continued, marked by exceptional brutality.

Nov. 24. Alfonso, son of Isabella, came of age and declared for a constitutional monarchy. A party of Liberal Unionists and Moderates supported him.

Dec. 29-31. A group of generals, disgusted with the republic, **rallied to Alfonso,** who was proclaimed king.

1875-1885. ALFONSO XII. Continuation of the Carlist War, until Feb. 1876, when Don Carlos again fled The pope, who had recognized Carlos as **Carlos VII,** King of Spain, was won over to recognition of the new régime by a governmental increase of the ecclesiastical budget, closing of Protestant schools and churches, abolition of civil marriages, and other concessions.

1876, July. A new constitution, accepted by the Córtes elected in Jan , was a compromise between the constitutions of 1845 and 1869 and established a system midway between Carlist "absolutism" and republican "anarchy" It provided for a bicameral legislature and a responsible ministry, but with a limited suffrage — a parliamentary régime in appearance only The Córtes, as before the revolution, was "ministerial" (i e elected under government auspices and obedient to the ministry) The ministry, in turn, was selected by the king, who thus remained the effective ruler of the state Constitutional forms were, however, observed, and during the succeeding decades there was neither *camarilla* nor insurrection. The ministerial power alternated between two parties, both supporting the régime: the **Conservatives** (led by **Canovas del Castillo**) and the **Liberals** (under **Sagasta**). The country prospered, but the king, though courageous and humane, was indulgent and lost much popularity through scandals at court In foreign policy he followed the lead of the central powers. From 1887 to 1895 Spain was associated with England, Italy, and Austria in the **Mediterranean Agreements** (p 740).

1885-1902. Regency of Maria Cristina, widow of Alfonso, who ruled for her son, born 1886, May 17, after the death of his father. The Conservatives and Liberals continued to alternate in power

1890. Universal suffrage was again introduced The economic development of the country led to increasing labor unrest, especially in centers like Barcelona. **Anarchist outrages** became frequent and resulted in many executions and in much repressive legislation

1895 The Cuban Revolution (p 823) It continued for three years and ended in the loss of both Cuba and the Philippines.

1898. THE SPANISH-AMERICAN WAR (p 787) It left Spain weak and discredited, and resulted in further disintegration of the parliamentary régime. The **Conservatives** divided into an authoritarian wing (led by **La Cierva,** allied to the clergy), and the **Liberal Conservatives** (followers of **Silvela**). The **Liberals** (Progressives) were led by **Moret** after the death of Sagasta. A small **Carlist Party** continued to exist in the mountains of the north. A **Republican Party** had its headquarters in Madrid, Andalusia, and Catalonia. A **Socialist Party** was rapidly winning recruits among the laborers of Catalonia and the miners of the Basque region. Anarchists continued their activities and even made attempts upon the king's life. The centralized character of the government system gave rise to a **regionalist movement** in Catalonia, where the **United Catalans** (*Soldiarios*) demanded an autonomous administration and a separate budget In its literary and linguistic aspects this movement took the form of a cultural revival.

1902-1931. ALFONSO XIII. Though declared of age, he at first allowed his mother to continue the government.

1904. Agreement between Spain and France regarding Morocco (p. 752) This marked the veering of Spanish policy to the side of France and England.

1906, May 31. Marriage of Alfonso to Princess Eugenia of Battenberg, granddaughter of Queen Victoria of England The succeeding period was one of internal conflict Army influence secured the passage of a law (1906) to try press offenses "against the fatherland and the army" by court-martial.

1909. When troops were embarked for Morocco, protests of extremists followed, directed against the inequality of the military service régime, under which obligatory service fell on the poorer classes. A **general strike** was proclaimed at Barcelona and extended to other Catalonian

cities under the direction of a revolutionary committee

July. At Barcelona the insurgents burned convents and massacred priests and monks Vigorous repression followed, and **Señor Ferrer,** propagandist of the anti-clerical opposition, was executed (Oct. 13), with resulting criticism throughout Europe and many repercussions in Spain

Oct. 21. The king called a Liberal ministry. In the succeeding years he even consulted with the Republican leader, **Azcarate,** and declared himself accessible to all parties, even those of anti-dynastic complexion.

1910-1913. The Liberals were in power, supported by the king

1912, Nov. 12. Assassination of the advanced Liberal premier, **José Canalejas,** pledged to an anti-clerical program. He had passed (1910, Dec 23) the **Padlock Law,** forbidding the establishment of more religious houses without the consent of the government The industrial enterprises of the religious orders were taxed, and public worship of non-Catholic bodies was expressly permitted

Nov. 27. Treaty with France, defining their respective spheres in Morocco (p 839).

1913, Oct. 27. The **Conservatives returned to power** after the king's unsuccessful attempts to reconcile the Liberals, who had split up after Canalejas' death.

1914, Aug. 7. Spain declared neutrality in the World War, the king having given France assurances that she might denude her Pyrenees frontier of troops

(*Cont. p* 980)

b. PORTUGAL

1820, Aug. 29. Revolution at Oporto, stimulated by the revolution in Spain. The insurgents drove out the regency, established in Nov. 1807 under British auspices to rule the country during the sojourn of **King John VI** (ruled 1792–1826) in Brazil.

1822. A constitution was adopted similar to the democratic Spanish constitution. Brazil declared independence. King John accepted the invitation to return as constitutional monarch and left the government of Brazil to his eldest son, **Dom Pedro.**

1823, June 5. John revised the constitution in the interest of absolutism. His second son, **Dom Miguel,** in the meanwhile started a civil war (1823–1824) supported by the reactionaries

1826, Mar. 10. Death of King John. He left the throne to Dom Pedro of Brazil, who became **Peter IV.** Peter drew up a charter providing for moderate parliamentary government of the English type But he refused to leave Brazil and eventually handed over the Portuguese throne to his infant daughter, **Maria da Gloria,** with Dom Miguel as regent

1826-1853. MARIA II. Miguel united the reactionaries and clericals in a movement against constitutional government

1827, Jan.—1828, Apr. 28. A British force landed at Lisbon to support the constitutionalists They withdrew when Miguel promised to respect the constitution.

1828, May. ***Coup d'état*** **by Miguel,** who abolished the constitution and had himself proclaimed king (July 4). Maria da Gloria fled to England.

1828-1834. The Miguelite Wars.

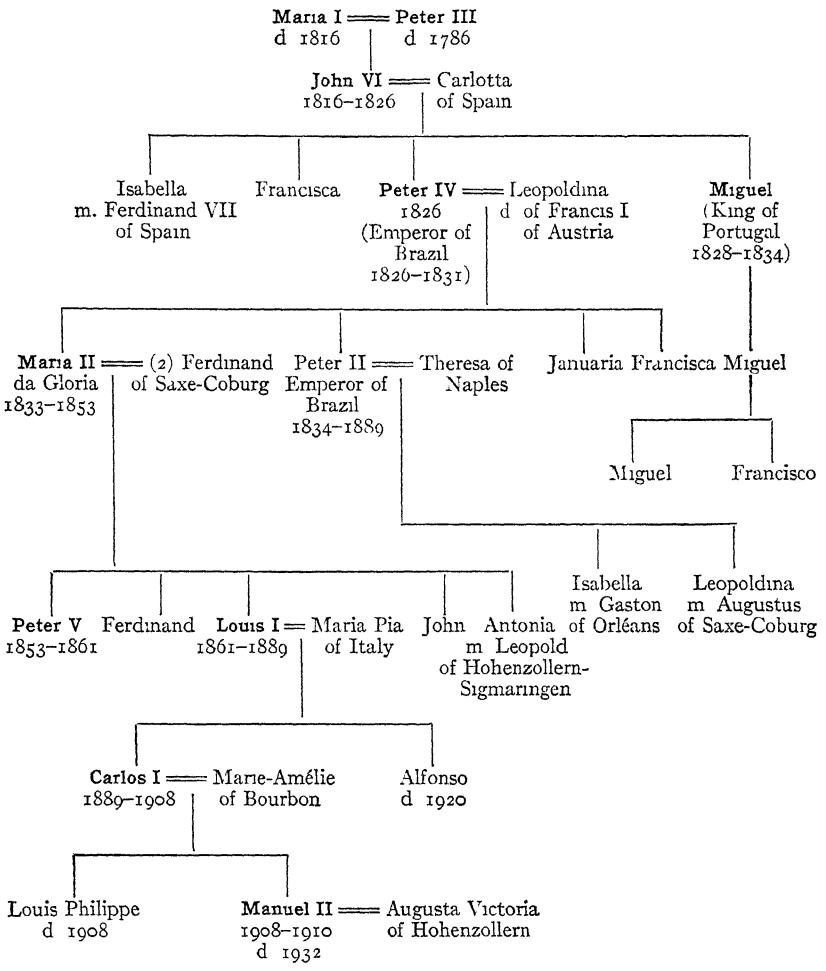
1831, Apr. 7. Dom Pedro abdicated the Brazilian throne and returned to Europe (England), to fight for the restoration of Maria.

1832, July 8. Pedro, with the connivance of England and France, organized an expedition and **took Oporto.** The Miguelists were defeated and

1833, Sept. Maria was restored.

1834, Apr. 22. Quadruple Alliance between England, France, Spain, and Portugal, aimed at the expulsion of Miguel

May 26. Final defeat of Miguel, who left the country.



1834-1853. A period of ministerial instability and chronic insurrection, reflecting the conflict between those championing the radical constitution of 1822 and those supporting the Charter of 1826

1836, Apr. 9. The queen married Duke Ferdinand of Saxe-Coburg

1853-1861. PETER V.

1861-1889. LOUIS I. Under these two reigns Portugal had some respite from civil strife, and the country was ruled by two opposing factions of professional politicians, the **Regenerators** (or Conservatives) and the **Progressives** (or Liberals) who adopted the system of *rotavism*: skillful manipulation of the electorate, enabling the two parties to hold office in rotation. This sterile, pseudo-parliamentary system resulted in the formation of a **Republican Party** (1881).

The House of Coburg-Braganza

1889-1908. CARLOS I, who gained notoriety by his extragavance and licentiousness Discontent grew, especially in the cities, and there were sporadic revolts, strikes, and conspiracies

1906, May 19. The king appointed **João Franco** as prime minister, with dictatorial powers. Parliamentary government was suppressed, the press gagged, and all opposition to the government sternly punished

1908, Feb. 1. Assassination of King Carlos and the crown prince in the streets of Lisbon.

1908-1910. MANUEL II. He put an end to Franco's régime and restored constitutional government, but, like his father, was scandalously extravagant

1910, Oct. 3-5 Insurrection in Lisbon. The king was forced to flee to England

1910, Oct. 5. PROCLAMATION OF THE PORTUGUESE REPUBLIC. A provisional government was organized under Dr **Theophilo Braga.** It proceeded to a frontal attack upon the Catholic Church, which was regarded as the backbone of

royalism Religious orders were expelled, their establishments closed and their property confiscated Religious teaching in primary schools was forbidden.

1911, Apr. 20. **Separation of Church and State,** along the lines followed in France

Aug. 20. A constituent assembly adopted a very **liberal constitution.**

Aug. 24. **Dr. Manoel de Arriaga** elected first president He was confronted with royalist plots and with growing unrest among the workers, who were disappointed when the revolution failed to bring them relief

1912, Jan. A serious **general strike** broke out in Lisbon The city was put under military rule and hundreds of syndicalists were arrested But radical outbreaks continued throughout the rest of the period (*Cont. p.* 985)

6. ITALY

a. THE ITALIAN STATES, 1815-1848

With the collapse of the Napoleonic Empire in 1814, the states of the Italian peninsula were reconstituted under the effective domination of Austria, which attempted a thoroughgoing restoration of the old régime The new states were nine in number Kingdom of Sardinia (Piedmont), Modena, Parma, Lucca, Tuscany, Papal States, Kingdom of Naples, the Republic of San Marino, and Monaco Lombardy and Venetia were annexed by Austria The only important territorial changes, as compared with the pre-Napoleonic situation, were the annexation of the former Venetian Republic by Austria, of the former Genoese Republic by Piedmont

1815, May. The Bourbon **Ferdinand I** (1751–1825), restored to the throne of Naples by Austrian arms, despite his promises of political liberty and the maintenance of French reforms (**decrees from Messina,** May 20–24, 1815), quickly descended to a rule of almost unrelieved despotism In the **Papal States, Pope Pius VII** returned from his long exile to reestablish the obscurantist and semi-feudal ecclesiastical rule of the 18th century and to restore the Company of Jesus (suppressed in 1773) **In Modena, Duke Francis IV** entered upon a policy of candid reaction, rigorously concentrating power in his own hands, turning the universities over to the Jesuits In **Parma and Lucca** the return to the old régime was rapid but less violent than in Modena and the south. **Maria Louisa of Parma** (former Empress of the French) and the Infanta **Maria Louisa of Bourbon-Parma,** Duchess of Lucca, owed their thrones to Austria and heeded the wishes of Metternich In **Lombardy and Venetia,** with separate governments, Metternich organized a thoroughly Austrian administration Despite the arbitrary features of the government, Lombardy was in most respects (education, communications, administrative efficiency) the most advanced part of Italy **Victor Emmanuel I of Piedmont** returned in 1814 hoping to restore the old régime intact, even to the return of officials who were holding office in 1798 The Jesuits were cordially welcomed, religious toleration denied, the French Code swept away, old and brutal punishments restored

The Italian conquests of Napoleon and the reorganization of Italy (1) had revealed to Italians the advantages of enlightened laws and administration, (2) had awakened a desire to free themselves from foreign rule. The restorations of 1815 lost for the Italians in large measure the advantages of French rule and substituted the foreign domination of Austria. Hence revolutionary sentiment grew, aiming at first to overthrow existing governments and gradually embracing the idea of unity for all of "Italy" Secret societies multiplied, most famous being the **Carbonari** (*Charcoal-Burners*), inspired by Christian and humanitarian principles, organized on republican lines, borrowing Masonic ritual. The Carbonari prepared to combat "tyranny," to overthrow existing governments They grew rapidly in numbers in the Kingdom of Naples, and spread to other Italian States

1820, July 2. **The Neapolitan Revolution.** Encouraged by news of the success of the revolution in Spain (p. 644), the Carbonari in the army, led by **General Pepe,** precipitated a revolt

July 13. **Ferdinand I granted a constitution** similar to that introduced in Sicily under British auspices in 1812. The representatives of the powers, meeting in Congress at Troppau and Laibach to consider the Spanish situation, were persuaded by Metternich (England dissenting

because of British public opinion, but not opposing) to adopt the principle of intervention (**Troppau Protocol**) against revolutions which might endanger the European peace Austria was given a mandate to restore order in Italy An army was marched to Naples, overthrew the revolutionary government (1821, Mar.) with little difficulty, and restored Ferdinand I to his former position

1821, Mar. 10. Rising in Piedmont, engineered by the Carbonari, who hoped that **Charles Albert,** Prince of Carignan, would place himself at the head of a constitutional government

Mar. 12. Victor Emmanuel I abdicated in favor of his brother, Charles Felix, then absent from Turin Charles Albert was made regent and granted a constitution like that of Spain

Mar. 22. Charles Felix arrived, ordered Charles Albert to flee, which he did.

Apr. 8. The **Piedmontese revolution collapsed** with the defeat of the constitutionalists near **Novara** by a combined force of royalists and Austrians

1831, Feb. Risings in Modena and Parma inspired by the July Revolution in Paris (p 628) and connected with a general movement aiming to free all northern Italy; they were accompanied by widespread revolts in the Papal States

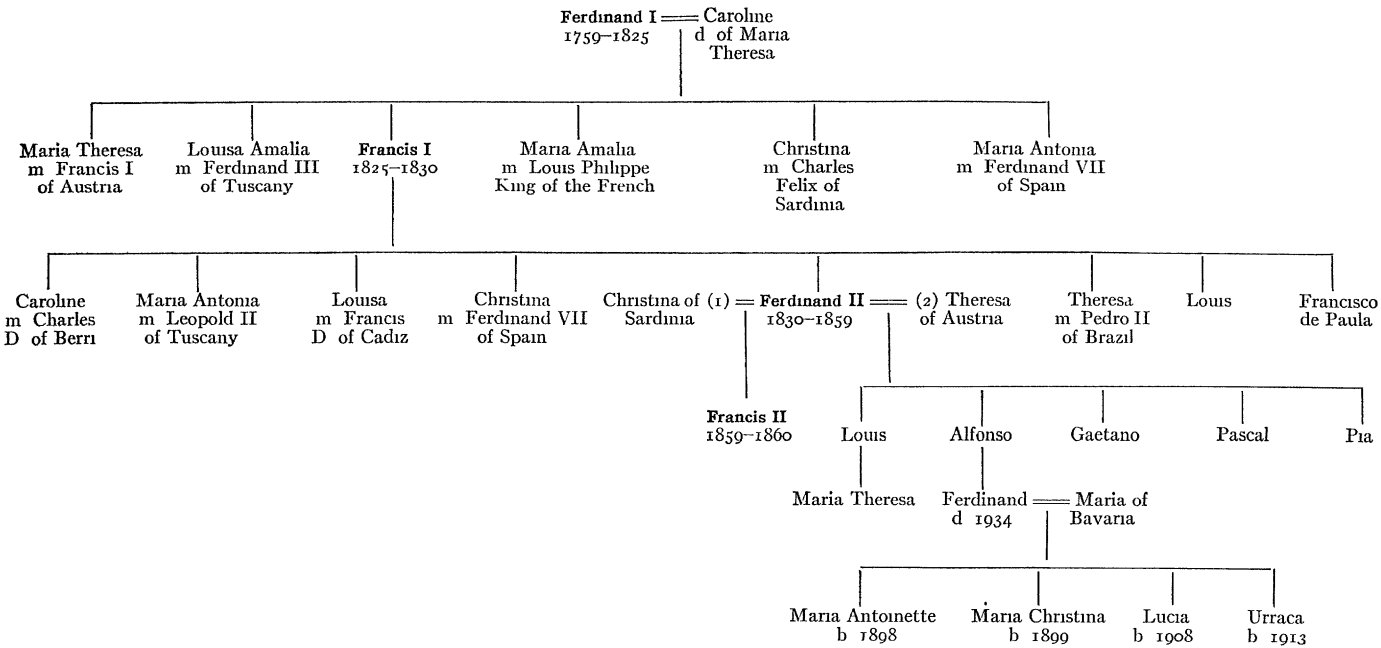
Mar. With the aid of Austrian troops the insurrections were put down

May 21. The ambassadors of the powers demanded certain reforms in the Papal States, but the pope contented himself with an amnesty and a few concessions in the administration and the judiciary Fresh revolts broke out in the Papal States at the end of 1831 Order was again restored by Austria (Jan. 1832), which led to the **occupation of Ancona** by the French (Mar. 1832). It was not until 1838 that the foreign troops were withdrawn

The failure of insurrections indicated the ineffectiveness of secret societies, notably of the Carbonari, and of small-scale, sporadic risings which they promoted The importance of unified effort by Italians everywhere and of careful preparation through propaganda and organization was recognized by **Giuseppe Mazzini** (1805–1872), former Carbonaro, who launched a

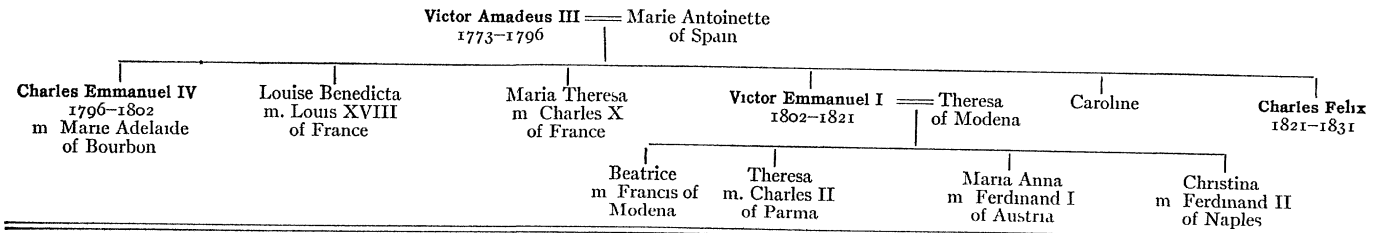
Mar. New revolutionary society (*Young Italy*). From early youth Mazzini had dreamt of freeing Italy from her present rulers and giving her a republican constitution — as a prelude to a free confederation of all Europe dominated by a spirit of Christian brotherhood. Through the widely ramifying channels of Young Italy, Mazzini launched his propaganda from exile in Marseilles Before a general rising in Italy (planned for June, 1832) could take place,

1832, Mar. Piedmontese authorities discovered existence of the plans, arrests followed, the rising collapsed



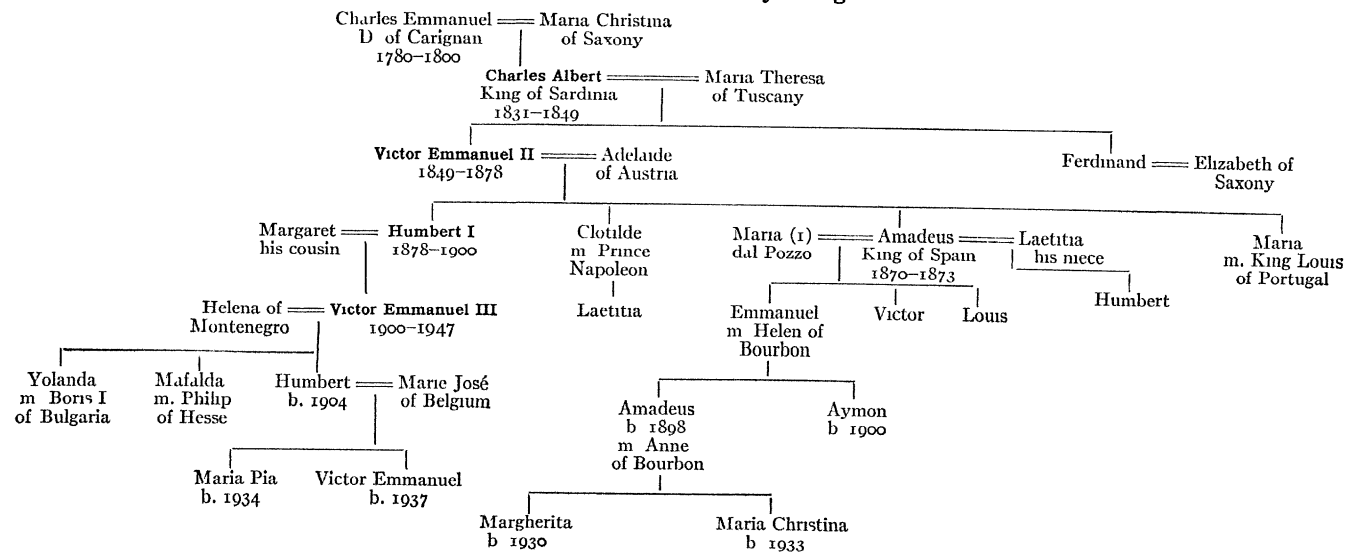
1834, Feb. Another Mazzinian **attack on Savoy** ended in ludicrous failure Mazzini now extended the scope of his activity by organizing the **Young Europe movement,** composed of Young Italy, Young Germany, Young Poland, and kindred organizations. From London he carried on his work of direction and propaganda Abortive risings followed with almost monotonous regularity, but accomplished nothing but the creation of martyrs to the cause

1843. Publication of **Vincenzo Gioberti's** *On the Moral and Civil Primacy of the Italians,* and of **Count Cesare Balbo's** *The Hopes of Italy.* These two books represented the views of the Italian moderate Liberals, especially in northern Italy. They found Mazzini's republicanism offensive and his methods dangerous and impractical The moderates distrusted universal suffrage and advocated constitutional reform and some type of unification for the peninsula Some favored a federation of states under the presidency of the pope. These were the **Neo-Guelphs,** led by Gioberti. Balbo and his followers were intent chiefly on the extrusion of Austria (by peaceful means if possible) and the organization of Italy under Piedmontese leadership



1846, June 15. THE ELECTION OF PIUS IX (Cardinal Mastai-Ferretti) as pope led to an outburst of liberal enthusiasm and to boundless hopes In contrast to his predecessor, Gregory XVI, Pius was democratic in his attitude He proclaimed an amnesty for political prisoners and refugees, relaxed the censorship laws, organized an advisory council composed of laymen, replaced the mercenary army by a civil guard, and established a municipal council for Rome. These reforms were opposed by the reactionaries (Gregorians) at every step, but the pope's popularity grew throughout Italy

1847, July 17. Occupation of Ferrara by Austrian troops (actually exercising a right conferred by the Treaty of Vienna). This step called forth a storm of indignation among Liberals in all Italy and did much to fan the anti-Austrian sentiment.



The Neapolitan Bourbons

House of Savoy

The House of Savoy-Carignan

Oct. Charles Albert of Piedmont (succeeded Charles Felix in 1831), though conservatively inclined, dismissed his reactionary minister, **Solaro della Margarita,** and began to yield to the liberal agitation (*King Wobble, Re Tentenna*). He consented to the revision of the criminal code, mitigation of the censorship, amendment of the law on public meeting.

1848, Jan. 12. A revolutionary movement broke out in Sicily and stimulated the Neapolitan liberals to action

Feb. 10. Ferdinand II (*Bomba*, 1830–1859), unable to secure Austrian aid in the face of the pope's opposition to the crossing of his territory, promulgated a liberal constitution modeled on the French charter of 1830

Feb. 17. Grand Duke Leopold of Tuscany was obliged to grant a constitution

Mar. 4. Charles Albert promulgated a constitution for Piedmont (the *Statuto*, the basis for the later constitution of the Kingdom of Italy)

Mar. 14. The pope followed suit, introducing a constitution establishing an elective council of deputies, but nevertheless reserving a veto power to the pope and college of cardinals.

b. THE ITALIAN WAR OF INDEPENDENCE, 1848-1849

1848, Mar. 18-22. THE FIVE DAYS OF MILAN, marking the culmination of dissatisfaction with Austrian rule and the influence of the news of the revolution in Vienna (Mar 13) Barricades were thrown up in the narrow streets The Austrian general, **Radetzky,** held the entire circle of fortifications, preventing the insurgents from communicating with the outside world The rebels, fighting without plan or organization, but greatly outnumbering the Austrian forces, gradually reduced the garrisons inside the town and, after repeated assaults, took **Porta Tosa** (Mar 22) Radetzky was obliged to order a general retreat to the famous **Quadrilateral** (four fortresses Mantua, Peschiera, Legnano, Verona, between Lombardy and Venetia)

Mar 22. Proclamation of the Venetian Republic, following agitation and some violence after the arrival of the news from Vienna A provisional government was established, with **Daniele Manin** (1804–1857) as president

Mar. 22. PIEDMONT DECLARED WAR ON AUSTRIA, in response to an appeal from the Milanese. Charles Albert was very hesitant about allying with the revolution and very suspicious of possible action by the radical French Republic, but finally yielded for fear of radicalism in his own territory.

Apr. 25. Papal forces under **General Durando** joined the Piedmontese. Contingents also arrived from Naples and other parts of Italy Wild enthusiasm, but little discipline

Apr. 29. A papal encyclical, the result of Austrian protests, disclaimed all intention of making war on the Catholic Austrians This paralyzed all action by the papal troops

May 15 Collapse of the revolution in Naples, after a counter-offensive by the king's Swiss mercenaries Neapolitan troops withdrawn from the north

May 30. The Piedmontese won the **battle of Goito,** but failed to follow up their advantage Acute danger of intervention by the French Republic, which had concentrated 30,000 troops on the Alps Austrian efforts to secure British support (**Hummelauer mission**). Palmerston urged the abandonment of both Lombardy and Venetia

June 15. The Austrian government ordered Radetzky to seek an armistice to permit an offer of independence to Lombardy Radetzky sent **Prince Felix Schwarzenberg** (p 674) to Vienna and induced the government to continue the war

July 24. BATTLE OF CUSTOZZA. Radetzky overwhelmingly defeated the Piedmontese and (Aug 4) drove them out of Lombardy Charles Albert finally appealed to the French for mediation, but after the **June Days** (p 630) the French government was too deeply engrossed in domestic affairs to be willing to embroil itself with Austria and England

Aug 9. Armistice of Salasco (the general who negotiated it) The Piedmontese gave up Lombardy Charles Albert accepted joint Anglo-French mediation, on the understanding that he would get Lombardy later The Austrians accepted mediation after much resistance (Sept 3), but nothing came of it, especially after the formation of the Schwarzenberg ministry (Nov 21), which refused to entertain the suggestion of territorial cessions

Sept 16. The pope appointed **Count Pellegrino Rossi** prime minister, after several ephemeral cabinets and a steady growth of radicalism at Rome Rossi was a disciple of Guizot, a moderate, clear-

headed administrator, whose aim was to restore order His efforts at reform earned him the hatred of all factions.

Nov. 15. Rossi was murdered by a fanatical democrat

Nov. 16 Popular insurrection in Rome. The pope was forced to appoint a democratic ministry under Monsignor **Carlo Muzzarelli**

Nov. 25. Pius, alarmed by radical agitation (clubs), fled from Rome to Gaeta where he enjoyed Neapolitan protection He attempted unsuccessfully to maintain his power in Rome through a commission of regency

1849, Feb. 9. Proclamation of the Roman Republic, after the meeting of a constituent assembly (Feb 5)

Mar. 12. Piedmont denounced the armistice with Austria, the king yielding to radical pressure

Mar. 23. BATTLE OF NOVARA. Radetzky again decisively defeated the Piedmontese Charles Albert abdicated in favor of his son, **Victor Emmanuel II.** Peace negotiations dragged on through the spring and summer, the size of the indemnity being the chief point in dispute Peace was finally signed Aug. 9, Piedmont agreeing to an indemnity of 65,000,000 francs

Mar. 29. On news of the Piedmontese defeat at Novara, the leaders at **Rome set up a triumvirate** (Mazzini, Saffi, Armellini) which introduced a moderate, conciliatory régime and restored order But since Jan there had been discussion of intervention by France or Austria, or both, to restore the pope

Apr. 14. The French Assembly voted funds for an expedition, being led by the government to suppose that the purpose was to forestall the Austrians. In reality the aim of Napoleon was to win the approval of the Catholics

Apr. 24. The French expedition, under **General Oudinot,** landed at Civitâ Vecchia

Apr. 29-30. Oudinot, supposing that Mazzini's followers were a minority in Rome, attacked the city, but was repulsed by improvised forces led by **Giuseppe Garibaldi** (1807–1882), republican patriot and guerrilla leader

May 29. Ferdinand de Lesseps (1805–1894), later builder of the Suez Canal, having been sent by the French government to negotiate, signed a treaty with the Roman Republic by which the city gates were to be opened to the French in return for a promise to respect the rights of the republic and to guarantee it against foreign aggression

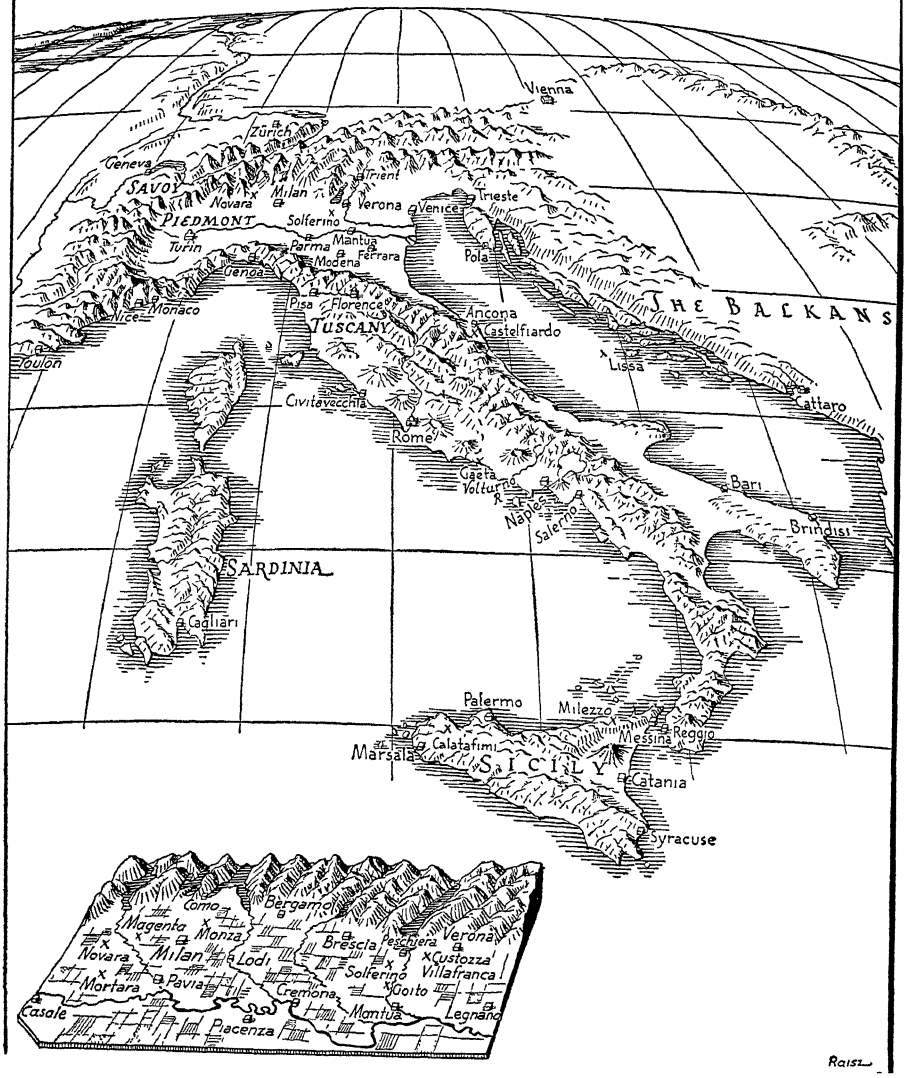
June 1. De Lesseps was abruptly recalled and later disavowed Oudinot was reinforced and ordered to take the city.

June 3. He attacked without warning, but Garibaldi and his men fought so valiantly that the French had to settle down to a siege

June 30. Garibaldi, regarding the situation as hopeless, made terms with the French

July 2. After reviewing his troops, Garibaldi marched forth with some 5000 men on his famous retreat All were presently killed, captured, or dispersed, Garibaldi himself escaping after dramatic adventures

July 20-Aug. 28. Austrian siege and bombardment of Venice. The city surrendered, ravaged by cholera and faced with starvation



By this time the revolutionary movement had been everywhere suppressed Neapolitan troops had reconquered Sicily and entered Palermo (May 15) and the Austrians had entered Florence to support the restored Grand Duke Leopold (May 25).

c. THE UNIFICATION OF ITALY, 1849-1870

The abysmal failure of the revolutionary movements of 1848–1849 revealed the military weakness of the Italian states (hence the need of foreign aid for the extrusion of Austria); demonstrated the unreliability of the pope as a leader of the unity movement; undermined the prestige of the Mazzinians and republicanism in general, pointed to the steadfastness of Piedmont, only state to retain its liberal constitution Piedmont was henceforth recognized as the hope of liberal Italy In the parliamentary life of Piedmont there rapidly came to the fore a new man,

1851-1861 Count Camillo Benso di Cavour (1810–1861), a liberal who had drawn his ideas from French and especially English sources, believer in the *juste milieu*, profound admirer of British parliamentarism, convinced of the importance of reforms (commercial, industrial, agricultural, political) if Piedmont were to take its place as the leader of the movement for Italian independence Scientific farming on western lines he introduced on his father's estates, and then made it the subject of wider propaganda through the medium of the **Agrarian Society** (founded 1842). He was active in the promotion of banking, railroads; welcomed the repeal of the Corn Laws in England (p 612) He

Unification of Italy

Raisz

entered actively into the necessarily veiled political activity of the forties, founded the first **Whist Club** at Turin, innocuous façade for political discussions. When Charles Albert reformed the censorship (1847), Cavour promptly founded, with Cesare Balbo, *Il Risorgimento*, a newspaper urging the independence of Italy, a league of Italian princes, and moderate reforms Cavour assumed a leading rôle in the demand for a constitution during Jan 1848 The king yielded (Feb 8), published the new constitution (Mar. 4) providing for a system modeled principally after that of Great Britain, with a Senate, whose life-members were to be appointed by the king, a Chamber of Deputies, with members elected on the basis of a limited suffrage (leaving electoral influence in the hands of the nobility and middle class), a ministry responsible to parliament Parliament met for the first time, May 8, 1848. Despite vigorous opposition of democratic elements, suspicious of Cavour as an aristocrat, he played an increasingly important rôle in the period following the disasters of 1848–1849

1850, Mar. On the advice of Cavour, **Giuseppe Siccardi** was made keeper of the seals by Premier Massimo D'Azeglio Siccardi brought in a bill (of which Cavour was the author) seriously curbing the powers of the Catholic Church — abolishing ecclesiastical courts, and all their special jurisdictions; eliminating the right of asylum; limiting the number of holidays, restricting the right of religious bodies to acquire real property Elsewhere these questions had been settled by concordat with the pope, in Piedmont they were settled by unilateral action (Oct 10)

1850-1851. Cavour entered D'Azeglio's government as minister of agriculture and commerce, the portfolio of the navy being shortly added, and later that of finance

1852, Nov. 4. After a short period out of office, **Cavour became premier,** a post he was to hold for seven years uninterruptedly Cavour by now had deserted the Right and governed with the aid of a coalition of the Liberals of the Right Center and Left Center (the *connubio*). His government reorganized finances; negotiated commercial treaties and revised tariffs (first approach to free trade), fostered legislation on co-operative societies, agrarian credit, banks; accelerated railroad construction; reorganized the army.

1855, Jan. 26. Cavour managed to insinuate his country into the **Crimean War** on the side of France and England The Piedmontese troops took part in the victory of the **Chernaia** (Aug 16) and thereby regained morale and prestige Though Piedmont received no reward as a result of her participation (unwillingness of England to estrange Austria), Cavour was given an opportunity at the **Congress of Paris** (p 728) to expound the grievances of Italy. His moderation made a most favorable impression on the English and French

1856. Foundation of the National Society by Giuseppe Farina, Daniele Manin, and Giorgio Pallavicino. The organization, aiming at the unification of Italy under the King of Piedmont, enjoyed the secret encouragement of Cavour, and at the same time was backed by many Mazzinian republicans, like Garibaldi.

1858, Jan 14. The attempt of Felice Orsini to assassinate Napoleon III and the empress (p 633) From prison Orsini appealed to Napoleon to help free Italy. The effect of the episode was to prick Napoleon (himself originally an Italian conspirator) into action

July 20. SECRET MEETING OF NAPOLEON III AND CAVOUR AT PLOMBIÈRES. Agreement. Napoleon to join Piedmont in war on Austria provided it could be provoked in a manner to justify it in the eyes of French and European opinion; after expulsion of the Austrians, Italy to be organized as a federation of four states, under presidency of the pope — (*a*) An **Upper Italian Kingdom** of Piedmont, Lombardy, Venetia, Parma, Modena, and the Papal Legations, (*b*) A **Kingdom of Central Italy,** Tuscany with Umbria and the Marches, (*c*) **Rome** and the surrounding territory, to which the temporal power of the pope was to be restricted, (*d*) the **Kingdom of Naples;** France was to be compensated by Savoy and Nice, Princess Clotilde, 15-year-old daughter of Victor Emmanuel, was to marry Prince Jerome Bonaparte, cousin of the emperor

Dec. 10. The formal treaty signed by France and Piedmont, after Napoleon had assured himself of the good-will of Russia (mission of Prince Jerome to Warsaw, Sept.)

1859, Jan. 1. Napoleon's warning remarks to the Austrian ambassador let the secret out Strong protests of Napoleon's ministers and of some sections of French opinion Desperate efforts (Jan – Apr) of the English to prevent a clash. These proved abortive, since there was no will to peace on the French and Italian side.

Mar. 9. Piedmontese reserves called to the colors including volunteers, chiefly fugitives eluding conscription

in Lombardy (a direct provocation to Austria)

Apr. 7. Austria mobilized.

Apr 23. Austrian ultimatum to Piedmont, directing her to demobilize in three days This was a terrible blunder, since it supplied Cavour with the provocation he needed. The ultimatum was rejected

Apr. 29. The Austrians, under General Gyulai, **invaded Piedmont,** but Gyulai delayed action so long that the French had ample opportunity to arrive on the scene

May. Peaceful revolutions in Tuscany, Modena, and Parma, engineered by the National Society The rulers fled the country

May 30. Piedmontese victory at Palestro. The allies crossed the Ticino into Lombardy

June 4. BATTLE OF MAGENTA, a disorganized fight ending in the retirement of the Austrians

June 13-15. Insurrection in the Papal Legations (Ravenna, Ferrara, Bologna)

June 24. BATTLE OF SOLFERINO and San Martino, sanguinary but indecisive The Austrians began to withdraw to the Quadrilateral

Napoleon III had been depressed by the sight of bloodshed on the fields of Magenta and Solferino, was alarmed by the risings in Tuscany and the Papal States with the threat of rapid spread of the unification movement; was faced by the possibility of a Prussian attack on the Rhine and the reality of a prolonged siege of the Quadrilateral fortresses, into which the Austrian army had retired Without preliminary understanding with Victor Emmanuel, Napoleon proposed an armistice to Emperor Francis Joseph, concluded July 8, followed by the

July 11. Meeting of the two emperors at **Villafranca,** with agreement that Lombardy (except Mantua and Peschiera) should be ceded to France and might then be ceded by France to Piedmont, Venetia was to remain Austrian; Italian princes should be restored to their thrones subject to amnesty of their revolting subjects These terms were accepted as preliminaries of peace by Victor Emmanuel, who reserved his liberty, however, respecting the risings in central Italy **Cavour resigned** in a rage The final **Treaty of Zurich** (Nov. 10) embodied substantially the provisions of the preliminaries of Villafranca.

Aug.-Sept. In Parma, Modena, Tuscany and Romagna, representative assemblies decreed the downfall of their late rulers and union with constitutional Piedmont The Piedmontese government dared not accept without the consent of Napoleon

1860, Jan. 20. Cavour returned to power as premier, negotiated the annexations with Napoleon, whose price was the cession of Nice and Savoy.

Mar. 13-15. Plebiscites in Parma, Modena, Romagna, and Tuscany resulted in vote for annexation to Piedmont

Mar 24. Treaty of Turin, by which Piedmont ceded Savoy and Nice to France, after plebiscite

Apr 4. Abortive rising in Sicily against the Bourbons

May 5. Garibaldi and his Thousand Redshirts sailed from Genoa for Sicily They had been preparing an expedition to Nice, Garibaldi's natal city, which he meant to hold against the French He was diverted to Sicily by Cavour, who secretly supported this filibustering expedition

May 11. Garibaldi and his force landed at **Marsala,** in western Sicily He marched inland, gathering recruits as he went

May 15. He defeated the Neapolitans at **Calatafimi** and marched on Palermo

May 27. Garibaldi took Palermo and set up a provisional government.

July 20. He defeated the Neapolitans at **Milazzo,** whereupon they evacuated Sicily, except Messina

Aug 22 Garibaldi crossed the straits, with the connivance of the British government (Lord Palmerston)

Sept 7. He took **Naples** after a triumphal march, during which the Neapolitan army faded before him **Francis II** (succeeded Ferdinand II in May 1859) fled to Gaeta He had made desperate attempts to ward off the danger by forming a Liberal ministry (June 28) and re-establishing the Constitution of 1848 (July 2), but was faced by defection on all sides

Garibaldi's plan was to defeat the remnants of the Neapolitan army, march on Rome, and then proceed to the conquest of Venetia Despite Garibaldi's loyalty to Victor Emmanuel, Cavour became alarmed, fearing French intervention on behalf of the pope and possible action by the Austrians He therefore decided to take a hand and march Piedmontese troops to the scene, a course favored by the British to thwart supposed French schemes for a Muratist restoration in Naples

Sept 8. An uprising in the Papal States gave Cavour an excuse to inter-

vene. He called upon **Cardinal Antonelli**, papal secretary of state, to disband his "adventurers" (the *Zouaves*, an international force of ardent Catholics). The demand was rejected.

Sept. 10. The Piedmontese crossed the papal frontier

Sept. 18. They virtually annihilated the papal forces at **Castelfidaro** and advanced into Neapolitan territory, joining forces with Garibaldi

Oct. 21-22 **Naples and Sicily** voted by plebiscite for union with the north. Similar votes were taken in the **Marches** (Nov. 4) and in **Umbria** (Nov 5)

Oct. 26. Garibaldi defeated the Neapolitans on the **Volturno.**

Nov. 3—1861, Feb. 13. Siege of Gaeta. The operations were much hampered by the French fleet, which made attack by sea impossible until it was withdrawn (Jan 19)

1861, Mar. 17. THE KINGDOM OF ITALY proclaimed by the first Italian parliament, with Victor Emmanuel as first king and a government based on the Piedmontese Constitution of 1848

June 6. Cavour died, at the age of 52

1861-1862. Ministry of Baron Ricasoli, ardent Tuscan patriot, who embarked upon a vast national **agitation for the annexation of Rome,** still garrisoned by French troops Garibaldi left his place of retirement, the island of Caprera, and organized the

1862, Mar. 9. Society for the Emancipation of Italy He organized an abortive conspiracy against Austria, then made a triumphant visit to the scenes of his victories in Sicily Defying the government, he raised the cry *Rome or Death,* crossed to the mainland (Aug. 24) and advanced north

Aug. 29. Battle of Aspromonte, a skirmish in which Garibaldi and his volunteers were defeated Garibaldi wounded and captured. He and his men were amnestied soon after (Oct 5)

1864, Sept. 15. The September Convention, by which Napoleon finally agreed to evacuate Rome within two years (beginning Feb 5, 1865), in return for an Italian promise to move the capital from Turin to Florence. Napoleon regarded this as the renunciation of Rome The agreement raised a storm of protest in Piedmont and was denounced by Garibaldi, but was approved by the parliament.

1866, May 12. Alliance of Italy and Prussia, encouraged by Napoleon (p. 681).

June 20. Italy declared war on Austria.

June 24 Italians defeated at **second battle of Custozza,** by Archduke Albert.

July 3. VENETIA CEDED TO ITALY after its cession to France by Austria

July 20. Resounding **defeat of the Italian** fleet by the Austrians under Admiral Tegethoff, **near Lissa.**

Oct. 12. Treaty of Vienna, bringing the war to a close.

Dec. Last French troops withdrawn from Rome. Garibaldi again placed himself at the head of volunteers and began the invasion of the papal territory, despite disavowals of the government. He was twice captured, but escaped (1867, Sept).

1867, Oct. 27. A plan for an insurrection in Rome failed, but Garibaldi defeated a papal force.

Oct. 28. A French force landed at Civitâ Vecchia and marched to Rome.

Nov. 3. BATTLE OF MENTANA. Garibaldi defeated by papal troops supported by French, who mowed down the enemy with the new breech-loading *chassepots* Garibaldi was captured and sent to Caprera Napoleon tried at first to summon an international congress to discuss the Roman question, but accomplished nothing The Roman question continued to be an open sore in Franco-Italian relations, and did much to prevent the formation of an alliance (p 635)

1870, Aug. 19 Final withdrawal of French troops from Rome, in view of the **Franco-German War** (p 688)

Sept. 20. After a short bombardment **the Italians,** capitalizing the defeat of France at Sedan, **entered Rome** after making a breach at the Porta Pia.

Oct. 2. After a plebiscite, **Rome was annexed** to Italy and became the capital.

d. THE KINGDOM OF ITALY, 1870-1914

1871, May 13. THE LAW OF GUARANTIES, defining the relations between the government and the papacy the person of the pope was to be inviolable; he was granted royal honors and prerogatives and full liberty in the exercise of his religious functions (free intercourse with Catholics throughout the world, liberty to hold conclaves, control of papal seminaries, etc); representatives of foreign powers at the Vatican were conceded diplomatic rights and immunities, the pope was to have an annual income of 3,250,000 lire

from the Italian treasury (the equivalent of his previous income from his territories), he was left in full enjoyment of the Vatican and other palaces, with rights of extra-territoriality This law was not accepted by the pope, who henceforth posed as *the prisoner of the Vatican* Relations between the papacy and the Italian government were not regularized until the **Lateran Treaty of 1929** (p 993).

1873-1876, Ministry of Marco Minghetti (1818–1886) following that of Giovanni Lanza (1869–1873). The outstanding statesman was **Quintino Sella,** minister of finance, whose great aim was to balance the budget and organize the economic life of the new kingdom He exercised "economy to the bone" (cutting down the civil list, salaries of ministers, etc) and passed taxes on cereals, incomes, land, etc The government **reorganized the army** (350,000 men in peacetime) and re-created the navy (Italy the third sea-power by 1885). **Railroads** were pushed to the south (mileage 1758 kilometers in 1860, 7438 in 1876) and the **merchant marine** developed (10,000 tons in 1862, 1,000,000 in 1877, next to England and France).

1876, Mar. 18. FALL OF THE MINGHETTI CABINET and of the Party of the Right (the party of enlightened conservatism following the teaching of Cavour, which had ruled the country since 1849)

Mar. 28. First ministry of the Left, under **Agostino Depretis** (1813–1887) Depretis was an early disciple of Mazzini, but had been converted to monarchism Cold, cynical, disillusioned, he relied for maintenance of his power upon adroit parliamentary tactics, upon corruption and upon political alliances (*trasformismo*). By generous use of government pressure the Right was overwhelmingly defeated in the elections and returned to parliament a mere rump. Depretis remained premier, with two short interruptions, until his death in 1887 The unpopular taxes, against which the Left had protested, were restored and free rein was given to agitation against Austria (*irredentism*), aiming to acquire the **Trentino** and **Trieste** (*Italia Irredenta*), Italian-speaking districts still under Austrian rule. Italian stock in international affairs reached the low point.

1878, Jan. 9. Death of King Victor Emmanuel.

1878-1900. HUMBERT I, king.

1878, Feb. 7. Death of Pius IX.

1878-1903. LEO XIII (Cardinal Pecci, 1810–1903), pope. Various attempts were made to reach an agreement on the Roman question (notably in 1886) but they all foundered on the pope's demand for at least some part of Rome

1881. Extension of the franchise, by reduction of the age limit from 25 to 21 and lowering the tax-paying requirement from 40 to 19 lire The result was an increase of the electorate from about 600,000 to about 2,000,000

1882, May 20. Triple Alliance of Italy, Austria, and Germany (p 738)

1885. An act of parliament **farmed out the state railways** to three private companies for 60 years, with possible termination at the end of 20 or 40 years

Another act introduced **employers' liability for accidents,** but was so poorly administered as to be ineffective, like the act (1877) making elementary education compulsory for children from six to nine years

1885. Italian occupation of Assab and Massowa on the Red Sea, after the French (1881) had frustrated Italian hopes for Tunis (pp 737, 838)

1887, July 29. Death of Depretis.

1887-1891. First ministry of Francesco Crispi, minister of interior under Depretis, former republican and member of Garibaldi's "Thousand," a proud, self-centered, vigorous individual After abortive negotiations with the papacy he turned to a violently **anti-clerical policy:** abolition of ecclesiastical tithes and of compulsory religious instruction in elementary schools The erection of the **statue of Giordano Bruno** confronting the Vatican (1889) brought relations to such a pitch of tension that the pope seriously considered leaving Rome.

In **foreign policy** Crispi took his stand unwaveringly by the alliance with Austria and Germany (p 740) He suppressed radical and irredentist organizations Relations with France became so strained that they almost resulted in a rupture.

1887-1889. The Ethiopian venture. Crispi was a convinced imperialist and was determined to expand the Italian footing on the Red Sea This led to war with Ethiopia and to a serious setback at **Dogali** (Jan 25, 1887) Nevertheless the Italians were able to strengthen their position by backing **Menelek,** King of Shoa, against the Ethiopian king of kings, John

1889, May 2. The Treaty of Ucciali by which, according to the Italian version, Menelek accepted an Italian **protectorate over Ethiopia.** Menelek became king of kings (Nov) on the death of John.

1891, Jan. 31. Fall of Crispi, after a gratuitous outburst against the Right

1891-1892. Ministry of Marquis di Rudini, member of the Right, who gov-

erned with a coalition cabinet and support from the Left. He attempted to balance the budget, notably by reducing the expenditures for army and navy.

1892-1893. First ministry of Giovanni Giolitti (1842–1928) In the midst of a banking crisis, Giolitti made the managing director of the *Banca Romana*, Signor Tanlongo, a senator. The Senate refused to confirm the appointment; an interpellation resulted in the arrest of Tanlongo and other prominent persons. A parliamentary investigation revealed that he had issued large sums in duplicate bank notes, that two preceding cabinets had been aware of his irregularities, that loans had been made by him to deputies, etc. Giolitti was overthrown and left the country for a time.

1893, Dec. 10—1896, Mar. 5. Second Crispi ministry. The cabinet was faced with serious peasant troubles in Sicily (*fasci*), which were ruthlessly put down by the use of the military In similar manner Crispi dealt with anarchist outrages Laws of July 11 and Oct 22, 1894, suppressed anarchist and socialist organizations.

The desperate financial situation was attacked by **Baron Sidney Sonnino** (1847–1922), the minister of finance. The *Bank of Italy* had been established by a law of Aug 10, 1893, to liquidate the insolvent *Banca Romana* The law forbade state banks to make loans on real estate, limited their powers of discount, and reduced the paper money maximum Other measures sought increased economy and larger income. By 1896 Sonnino had practically balanced the budget despite the added expenses of the war in Africa

1895-1896. THE ETHIOPIAN WAR. Menelek had rejected the Italian interpretation of the **Treaty of Ucciali** (1891) and all efforts at compromise had failed. By 1895, after Menelek had secured the necessary munitions, he was ready to take up the Italian challenge

1895, Dec. 7. The Italians, having advanced into northern Ethiopia, were badly defeated at **Amba Alagi** by Ras Makonen, who then besieged the key fortress of **Makallé,** which fell Jan 20, 1896 Crispi now felt that Italian honor and his own position were at stake He insisted that **General Baratieri** make an advance and secure a victory. The general, against his better judgment, obeyed orders

1896, Mar. 1. BATTLE OF ADUA. The Italians (25,000) were completely defeated by some 100,000 Ethiopians under Menelek. Those who were not killed were for the most part captured and held for ransom. One of the worst colonial disasters in modern history. The Italians were obliged to sue for peace and signed **the Treaty of Addis Ababa** (Oct. 26), in which they recognized the independence of Ethiopia and restricted themselves to the colony of Eritrea

Mar. 5. Downfall of Crispi, resulting from a storm of public indignation and unrest.

1896-1898. Second Rudini ministry, based on an understanding with **Felice Cavalotti,** the radical leader There followed a period of acute unrest.

1896, Sept. 30. Agreement between France and Italy with respect to Tunis The Italians gave up many of their claims. First step in the policy of assuaging French hostility

1898, May 3-8. THE "FATTI DI MAGGIO." Serious bread riots in various parts of the country culminated in open conflict with the troops in Milan Martial law was proclaimed, but order was restored only after considerable loss of life Heavy sentences by courts-martial, especially against socialists, ensued Rudini was obliged to resign

1898, June 28—1900, June 18. Ministry of General Luigi Pelloux He presented to parliament a drastic **Public Safety Law,** which was violently opposed by all radical groups An attempt was made to change the Chamber's standing orders, but this was again opposed. Pelloux appealed to the country (1900), but the elections only strengthened the radical elements. Having already granted an amnesty (Dec 30, 1899), Pelloux was forced to resign.

1898, Nov. 21. A commercial treaty signed with France, bringing to an end the tariff war that had been raging since 1886, much to the detriment of Italy.

1900, July 29. King Humbert assassinated by an anarchist at Monza.

1900- VICTOR EMMANUEL III, king He was regarded as more liberal than his father and the government's policy gradually turned more and more to the Left for support.

1900, Dec. 14. Franco-Italian agreement exchanging a free hand in Morocco (for France) for a free hand in Tripoli (for Italy) An important stage in the Franco-Italian rapprochement (p 750).

1901. Development of a **large-scale strike epidemic,** reflecting the growth of socialism, the organization of labor, and the more active spread of radicalism.

1902, Jan.-Feb. Strike of the employees of the Mediterranean Railway, demanding, among other things, recognition of their union. In Feb there was real danger of a general strike, following a strike of gas employees in Turin. The government met the situation by calling up all railway workers who were reservists By mediation a settlement was finally reached in June.

1903, Oct.—1905, Mar. 4. Giolitti prime minister. Strikes and disorders continued unabated

1904, Sept. General strike proclaimed. Much violence in Milan and other large cities

Oct. In the general elections the socialists and radicals lost considerably, evidently a popular protest against the excesses of the labor organizations, but probably influenced also by the attitude of the pope (Pius X since 1903), who gave permission to Catholics to take part in political struggles involving the safety of the social order

1906, May 30—1909, Dec. 2. Ministry of Giolitti, following the short-lived cabinets of Fortis and Sonnino

1908. Giolitti continued his **policy of concession to the Church** by sponsoring a measure to facilitate religious education, such education to be optional with the communal councils, which were, however, obliged to supply such education if parents desired it

Dec. 28. An earthquake of appalling severity shook southern Calabria and eastern Sicily, completely destroyed **Reggio** and **Messina** and many villages, with loss of life estimated at 150,000. At Messina a "tidal wave" added to the destruction

1909, Dec. 2. Giolitti's government was overturned and was followed by the **cabinets of Sonnino** (1909, Dec–1910, Mar) and **Luzzatti** (1910, Mar–1911, Mar.).

1911, Mar. 29—1914, Mar. 10. Giolitti prime minister again

1911, Sept. 29—1912, Oct. 15. THE TRIPOLITAN WAR, with Turkey. By various agreements (with Germany and Austria, 1887, with England, 1890, with France, 1900, with Russia, 1909) Italy had secured approval for eventual action to acquire Tripoli The second Moroccan crisis (p 757) and the prospects of a French protectorate in Morocco induced the Italian government to act before it was too late Its decision was influenced in large measure by the pressure exerted by the **revived nationalist movement** (writings of **Gabriele d'Annunzio, Enrico Corradini,** *et al*) after 1908. The pretext used was Turkish obstruction of Italian peaceful penetration. An ultimatum was sent (Sept 28), but was rejected by the Turks

1911, Oct. 5. The Italians landed a force at Tripoli and occupied the town The other coastal towns were taken in rapid succession

Nov. 5. The Italian government proclaimed the **annexation of Tripoli,** though the country was far from being conquered (valiant opposition of a small Turkish force under **Enver Bey,** supported by the Arabs)

1912, Jan.-Feb. Naval operations in the Red Sea and on the Syrian coast The Italians bombarded several coastal cities, but the general operations were much hampered by Austrian refusal to permit war on the Balkan or Aegean coasts (forbidden by the Triple Alliance and other agreements) All efforts at mediation by the powers were frustrated by the refusal of the Turks to abandon Tripoli

Apr. 16-19. Italian naval demonstration at the Dardanelles. The Turks closed the Straits (till May 4) causing much loss to Russian commerce

May 4-16. The Italians occupied Rhodes and the other Dodecanese Islands. Peace negotiations were finally opened in July, but neither side was ready to yield an iota of its claims and only the threatening Balkan War finally induced the Turks to give in The preliminary **Treaty of Ouchy** (definitive **Treaty of Lausanne,** Oct 18) ended the war the Turks abandoned sovereignty of Tripoli, but the Italians were to recognize a representative of the sultan as caliph (i e. Turkish religious authority), the Italians were to restore the Dodecanese Islands as soon as the Turks evacuated Tripoli.

June 29. Extension of the franchise, increasing the number of voters from about three to about eight and a half million. This amounted to practically universal suffrage The same bill provided for salaries for members of parliament.

1913, Oct. The general election gave the Liberals a majority, but showed a marked increase of various socialist groups (78 seats together in place of the previous 41) and the Catholics (35 instead of 14)

1914, Mar. 9. General strike proclaimed at Rome, largely the outcome of popular resistance to taxation made necessary by the war

Mar. 10. Cabinet of Antonio Salandra, following the resignation of Giolitti. The revolutionary railway union

demanded an increase in wages, but the question was finally compromised

June 7. On the national holiday of the *Statuto*, **riots broke out in Ancona**, where an anti-militarist demonstration had been prohibited. A general strike followed in the town and spread to other parts of the Marches, Romagna, etc The leader was **Enrico Malatesta. Benito Mussolini** (p 986), then editor of the socialist newspaper *Avanti*, took a prominent part. Mobs held a number of towns for a week until nationalists and troops restored order.

Aug. 3. Italy proclaimed neutrality in the World War.

(*Cont. pp.* 923 *ff.*, 986)

7. THE PAPACY, 1815-1914

In the period of the restoration the papacy recaptured much of the ground lost during the chaos of the revolutionary era. Throughout Europe there was a revival of Catholicism, and even in Protestant states sympathy had grown for the Catholic Church as the mainstay of the throne and the most effective force for holding the revolutionary spirit in check. The governing classes regarded as axiomatic this "union of throne and altar" against the disruptive tendencies of liberalism and nationalism. The papacy was also assisted by the Romantic movement, with its idealization of the past, and by the influential writings of men like **René Chateaubriand, Robert de Lamennais,** and **Joseph de Maistre** (*Du Pape*, 1819), which glorified the Catholic Church and the authority of the pope.

1814, May 24. Ultramontanism reigned in Rome upon the return of the gentle and courageous **Pius VII** (1740–1823). The **Jesuit Order** and the **Inquisition** were re-established in Rome (Aug 7), and the **Index** was reconstituted.

1815. Through the efforts of his able secretary of state, **Cardinal Consalvi** (1757–1824), the pope obtained from the Congress of Vienna the **restitution of the States of the Church.** The temporal administration was reorganized, a bureaucracy established on the French model Considerable opposition developed against this highly centralized administration, which excluded laymen from all high offices. Discontent against the "rule of the priests" centered in the **Carbonari,** a Liberal secret society (p 650)

1821, Sept. 13. After the rising in **Naples** (p 650), Consalvi had their leaders prosecuted, and the pope condemned their principles

The chief activity of the papacy in the reign of Pius VII was concerned with efforts to recover its international influence in Europe. Toward the accomplishment of this program, Consalvi negotiated a series of valuable **concordats** with all the Roman Catholic powers save Austria

1823-1829. LEO XII (Annibale della Genga, 1760–1829) continued the policy of Pius VII and secured further advantageous concordats, extending the policy to the South American republics. His **extreme reactionary policy** in domestic affairs strengthened the underlying current of liberalism He persecuted the Jews, harshly supervised morals, condemned the Protestant Bible societies and all dissenters (1824, 1826), and made vigorous efforts to root out the Carbonari. **On the constructive side,** Leo promoted missions, encouraged scholars, improved the educational system in Rome, reduced taxes, made justice less costly, and found money for public improvements. Of noble character, Leo lacked insight into, and sympathy with, the temporal developments of his period

1829-1830. PIUS VIII (Francesco Castiglione, 1761–1830) — a short, reactionary reign noteworthy for the **Catholic Emancipation Act in England** (p 606)

1831-1846. GREGORY XVI (Mauro Capellari, 1765–1846) Apogee of the reaction The new pope was greeted by revolts which had broken out under his predecessor and which were promptly suppressed (p 651)

1832, Aug. 15. The encyclical *Mirari vos* condemned complete and unrestrained liberty of conscience, liberty of the press, and revolt for any reason against an established government Though Gregory did much to promote **public welfare** (establishment of a decimal coinage and a bureau of statistics, and of a steamship service at Ostia, foundation of public baths, hospitals, and orphanages, lightening of various imposts), he would not concede the demand for separation of the ecclesiastical and the civil administration The secretary of state, **Cardinal Lambruschini** (1776–1854), suppressed all aspirations for political liberty with extreme severity The last three years were again occupied with rebellions in the Papal States. The embarrassing financial condition in which Gregory

left his dominions was due to his lavish expenditure on architectural and engineering works, and to his liberal patronage of learning

1846-1878. PIUS IX (Giovanni Mastai-Ferretti, 1792–1878), widely greeted in Italy as the "pope of progress" (p 651).

1848, Apr. 29. Placing the universal significance of the papacy above national aspirations, Pius proclaimed his neutrality in the national war against Austria For this he was denounced as a traitor, and forced to flee (for details on Pius IX and the Revolution of 1848, see p. 655)

1850, Apr. 12. Pius returned to Rome, embittered, and henceforth stubbornly hostile to liberalism in all its forms The Constitution of 1848 was not restored, though half-hearted efforts were made to modernize the state through the grant of self-government, with participation of laymen In the reactionary policy which prevailed, **Cardinal Antonelli** (1806–1876), secretary of state, with mediaeval views and Machiavellian temperament, exerted a paramount influence. In the achievement of Italian unity (1859–1860) the Papal States were lost, to be followed by the taking of Rome in 1870 (p 659). Pius and his successors persistently refused the offer of the Italian government to accord the pope the rights and honors of a sovereign, and an annual endowment (p. 660). Faced by the loss of his temporal sovereignty, Pius sought compensation by strengthening the machinery of the Church and the spiritual influence of the papacy. The political reaction following the stormy years 1848–1849 offered promising soil for the pope's efforts to conclude advantageous concordats, and in several countries, notably Spain (1851) and Austria (1855), he was able to regulate Church-State relations to the advantage of the Curia Pius also re-established Roman Catholic hierarchies in England (1850) and Holland (1853) Seeking popularity, the pope, unaided by an oecumenical council, promulgated a new dogma, the first since the Council of Trent

1854, Dec. 8. Dogma of the Immaculate Conception of the Virgin, which made a belief long widely held in the Church an article of faith The "infallibility" of the pope implied in this act was openly acknowledged in 1870 by the Vatican Council.

1864, Dec. 8. When the temporal power of the papacy was tottering to its fall, Pius flung down the gauntlet of defiance to the new social and political order in the encyclical *Quanta cura*, with the appended *Syllabus errorum* The pope censured the "errors" of pantheism, naturalism, nationalism, indifferentism, socialism, communism, freemasonry, and various other 19th-century views He claimed for the Church the control of all culture and science, and of the whole educational system, rejected the liberty of conscience and worship enjoyed by other creeds, and the idea of tolerance; claimed the complete independence of the Church from state control, upheld the necessity of a continuance of the temporal power of the Roman See, and declared that "It is an error to believe that the Roman Pontiff can and ought to reconcile himself to, and agree with, progress, liberalism, and contemporary civilization" The Ultramontane party was loud in its praise of the *Syllabus*, but the Liberals were amazed, and treated it as a declaration of war by the Church on modern civilization. It was also a blow aimed at the **Liberal Catholics,** who were reconciled to religious liberty and democratic government

1869, Dec. 8—1870, Oct. 20. THE VATICAN COUNCIL. The zenith of Pius' pontificate was attained when the Vatican Council (the first general council since that of Trent, three centuries earlier) proclaimed (1870, July 18) the **dogma of papal infallibility** — the dogma that the pope, when speaking *ex cathedra*, possesses infallibility in decisions regarding faith or morals, in virtue of his supreme apostolic power The new dogma was attended by important results It marked the final triumph of the papacy over the episcopal and conciliar tendencies of the Church It attempted to exalt the papacy above all secular states and to extend "faith and morals" to the political domain

1870, July 30. Austria immediately annulled the **Concordat of 1855.** In Prussia the *Kulturkampf* broke out (p 688), and in France the council so accentuated the power of ultramontanism that the state took steps to curb it At his death in 1878, Pius left the Church shaken to its foundations and in feud with almost every secular government

1878-1903. LEO XIII (Joachim Pecci, 1810–1903), a gifted diplomat, marked a change Leo possessed a more liberal and tolerant spirit than his predecessor He narrowed the intellectual gulf between the Church and modern society by encouraging a renewed study of Thomas Aquinas in all Catholic seminaries (the result of which was to spread the doctrine that between true science and true religion there was no conflict), by fostering the

study of Church history (on the theory that it would augment the prestige of the Church by showing its contributions to the progress of civilization); by supporting experimental science among eminent Catholics.

1885. Leo was appointed arbitrator in a dispute between **Germany and Spain** over the possession of the Caroline Islands He also acted as arbitrator in a number of other cases As his reign wore on, Leo perceived that democracy might prove fully as useful as monarchy for preserving and strengthening Catholic principles He therefore encouraged Catholic political parties, with distinctly liberal tendencies, in Germany and Belgium, and adopted a friendly attitude toward the government of the French Republic Instructions were given to French Catholics to break with monarchical principles, and to support the republic

1890. However, the policy of the *Ralliement* in France (p 640) was also motivated by the pope's desire to secure French aid for the **solution of the Roman question,** the mainspring of his whole policy. Relations with the Italian government had grown steadily worse, and in an encyclical addressed to the Italian clergy (1898, Aug 5) Leo insisted on the duty of Italian Catholics to abstain from political life while the pope remained in his "intolerable position"

1891, May 15. The encyclical on labor questions, *Rerum novarum,* aimed to apply Christian principles to the relations between capital and labor, and won for Leo the title of "the workingman's pope" It pointed out that the possessing classes, including the employers, have important moral duties to fulfill; that it is one of the first duties of society (State and Church collaborating) to improve the position of the workers.

Of the political principles of Pius IX, Leo altered little He expressed in his encyclicals the same condemnation of many phases of liberalism and nationalism, and reiterated the view that the Church should superintend and direct every form of secular life But, unlike his predecessor, Leo never appeared as a violent partisan of any particular form of government It was his object to bring about harmonious collaboration between Church and State. In the *Kulturkampf* he adopted a moderate and conciliatory attitude, and succeeded in obtaining the repeal of the legislation against the Church.

1903-1914. PIUS X (Giuseppe Sarto, 1835-1914), known as the "pope of the poor and the humble," applied himself with determination to the task of fortifying the inner life of the Church He carried out (1908) an extensive reorganization of the Curia in order to modernize its machinery. Another important reform, the codification of canon law (1904), was undertaken (completed under Benedict XV, promulgated June 28, 1917).

Encouraged by the liberal tendencies in Leo's reign, a group of Catholics known as **Modernists** (notably **Father George Tyrrell,** in England, the **Abbé Loisy** in France, and **Antonio Fogazzaro** in Italy) had begun to agitate for a revision of the dogmas and policies of the Church to bring them in line with the findings of scientific scholarship and the modern spirit. Pius had only bitter scorn for the Modernists.

1907, Sept. 8. The encyclical *Pascendi gregis* expounded and condemned the Modernist system, and set up a new and effective censorship to combat it.

Pius was not greatly interested in political affairs Relations with the Italian government improved, and the pope qualified the absolute prohibition imposed by his predecessors against the participation of Catholics in political elections (p 662) But the pope experienced great bitterness in his relations with France, which adopted legislation for the separation of Church and State (p. 642)

1914, Aug. 2. Pius' last circular was an appeal for peace addressed to the Catholics of the world on the eve of the World War

1914-1922. BENEDICT XV (Giacomo della Chiesa), whose reign was taken up by efforts to maintain an even balance between the warring nations, many of them essentially Catholic The pope twice (1915, July 30; 1917, Aug 1) appealed to the belligerents to make peace, but these appeals earned him nothing but a reputation for pro-Germanism.

With the victory of the Allies and Italy, the pope began to give up opposition to the Italian government. He definitely revoked (1919) the decree forbidding Catholics to participate in politics, and authorized (1920) Catholic sovereigns to visit the king in Rome Negotiations were opened which led ultimately to the Lateran Treaty of 1929 (p 993). (*Cont. p* 992.)

8. SWITZERLAND

1815, Mar. 20, 29. Two acts of the **Congress of Vienna** regulated the Swiss problem. They laid down the principle of the **perpetual neutrality** of Switzerland, restored the old frontiers, with two exceptions, and smoothed over the internal difficulties of the country. A constitutional convention drew up a new **federal pact** which restored the old institutions, and gave very wide autonomy to the 22 cantons The Diet had very restricted powers, being little more than a congress of ambassadors representing the cantons Racial and religious differences, and differences in political ideals still existed among the cantons, which made for division and disunion.

1815-1828 The early part of the restoration period was characterized by a serious economic crisis, due to the war. Swiss industry, no longer protected by the Continental blockade, found itself unable to compete with English industry, especially in the textile trade The cantons were unable to agree upon a common customs policy. In the political sphere most of the cantons followed reactionary policies. Under the pressure of the Holy Alliance, Switzerland was obliged to persecute the liberal refugees from neighboring countries, and in 1823 was compelled to restrict the freedom of the press

1828-1848. The so-called **"Era of Regeneration,"** in which revision of the constitutions of several cantons was undertaken

1828-1829. The cantonal governments were wise enough to grant the concessions demanded, such as universal suffrage, freedom of the press, and equality before the law. The movement was strengthened by the July Revolution in Paris Between 1830 and 1833 some ten cantons liberalized their constitutions

1832, Mar. 17. The Siebener Concordat The liberal cantons joined together to guarantee their new liberal constitutions

July 17. The question of revising the federal pact in the direction of a stronger central government was brought before the Diet by a large majority of the cantons, whereupon the conservative cantons concluded an alliance (**League of Sarnen**) to maintain the Pact of 1815.

1834, Jan. 20. The struggle for the revision of the constitution was transformed into a **religious quarrel** when the liberal cantons adopted the *Articles of Baden*, which contained a program of ecclesiastical reform The Liberal party stood for freedom of worship, secular education, a lay state, and was especially irritated by the paramount position in the Catholic cantons of the **Jesuits**, who had returned after 1814 By increasing the power of the central government, the Liberals hoped to be able to impose their views upon the whole confederation. Religious and political passions gradually rose to fever pitch

1845, Dec. 11. THE *SONDERBUND*. The seven Catholic cantons — Lucerne, Uri, Schwyz, Unterwalden, Zug, Freiburg, and Valois — replied to the organized armed bands of the Liberal cantons by concluding a league (the *Sonderbund*) for the purpose of protecting their interests

1847, July 20 The Liberals were able to get a vote through the Diet ordering the **dissolution of the *Sonderbund*** as being contrary to the constitution. The seven cantons refused, and war resulted.

Nov. 10-29. The federal general **G. H. Dufour** quickly defeated the forces of the *Sonderbund* Lord Palmerston's policy of masterly inactivity and Dufour's rapid victory averted an intervention being planned by Metternich and Guizot The *Sonderbund* was dissolved, the Jesuits were expelled, and the victors proceeded to strengthen the federal government.

1848, Sept. 12. THE NEW CONSTITUTION, replacing the **Pact of 1815.** It organized Switzerland as a federal union closely modeled on that of the United States. While preserving the historic local government of the cantons, it established a strong central government Legislative authority resided in two chambers. The **Council of State** (*Standerat*) consisting of two members from each canton, the **National Council** (*Nationalrat*), members of which were elected by universal suffrage in numbers proportional to the population of each canton The executive was a **Federal Council** (*Bundesrat*) of seven members, elected by the two chambers Its annual chairman was given the title *President of the Confederation*, but he enjoyed no wider powers than his colleagues.

1848-1857. The Neufchâtel problem. The canton of Neufchâtel (part of the confederation, but under the sovereignty of the King of Prussia) had proclaimed a republic (Mar 1848), the constitution of which was guaranteed by the Federal Diet. In 1856 a conservative revolution aimed at

the restoration of the king War with Prussia was narrowly averted by the mediation of Napoleon III In May 1857 the king renounced his rights, in return for a money payment, which he later renounced He kept his title, but this was discontinued by William I

Swiss internal history in the ensuing period was dominated by economic problems and by a general trend toward **government centralization.** The public services (telegraph and postal systems, customs, currency, weights and measures) had been brought under federal control, and were reorganized

1874, Apr. 19. A revision of the constitution further enlarged the powers of the federal government, especially in military affairs Free elementary schools under federal supervision were authorized and the principle of referendum was introduced for national legislation Thereafter, by means of the initiative and referendum, federal authority was extended to many fields

1874, Oct. The International Postal Congress met at Berne Switzerland became a favorite meeting-place for international conventions and headquarters for many international organizations.

1882, May 20. Opening of the St. Gothard Railway; first of the great railroad tunnels through the Alps

1887, May. The federal government was given a **monopoly of sale of spirits.**

1889. Acute tension in relations with Germany, resulting from the expulsion of a police officer on the trail of political offenders Switzerland had long been a haven for political refugees and for radicals and conspirators of all hues The asylum extended to them caused constant friction with neighboring powers

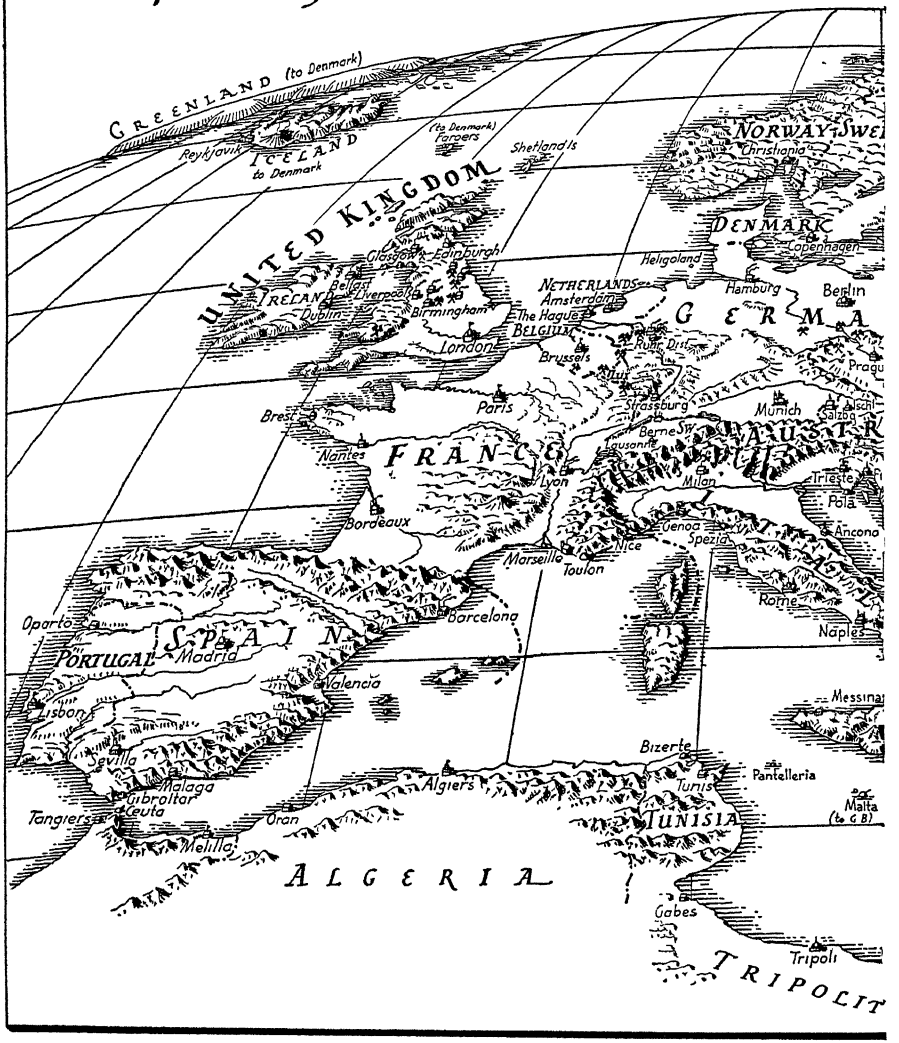
1890, June The federal government was empowered to enact measures of **social insurance.**

1898, Feb. The federal government was authorized to **purchase privately owned railways.**

Nov. The federal government was empowered to unify and enforce the **civil and penal codes.**

1907, Apr. 12. A new army bill reorganized the forces Although Swiss neutrality was guaranteed by the powers in 1815, growing international tension necessitated precautions A unique military system was built up (1847, revised 1907)· the army was a type of standing militia, with short periods of required training biennially

Switzerland made steady progress in the economic sphere, but despite growing prosperity and the expansion of federal power, democracy remained. In six of the smallest cantons the people continued to exercise their local powers through mass meetings (*Landesgemeinden*) without the intervention of any assembly In the larger cantons representative systems were used, but they were based on universal suffrage and in most of them the initiative and referendum were employed (*Cont. p* 994)



9. CENTRAL EUROPE

a. GERMANY, 1815-1848

1815. THE "METTERNICH SYSTEM" After the Napoleonic wars central Europe (the German states and the Austrian Empire) was subjected to the "Metternich System" Through rigid censorship, elaborate espionage, supervision of the universities, etc, Metternich opposed constitutional and nationalist aspirations awakened during the Napoleonic wars In the German states he made his will felt through the **Germanic Confederation** (called into being by the Congress of Vienna) It was composed of 38 sovereign powers, its object was to guarantee external and internal peace of Germany, and the independence of the member states (Austria brought only its German states into the confederation), its organ was a diet sitting at Frankfurt-on-the-Main, organized on a complicated basis into two "assemblies," over both of which the Austrian representative presided The diet was a diplomatic congress, not a parliament its members were instructed delegates of the various governments. In Metternich's view, it was a loose confederation (*Staatenbund*) to protect German monarchs against their foreign foes (Russia and France) and their domestic enemy (liberalism).

In 1815 **Prussia** had been the great hope of the Liberals, but with the decay of the influence of the king's principal minister, Hardenberg, reactionary influences came to the fore, capitalizing the growing fear of radical activity and the fact of fundamental disunity (territorial and moral) in Prussia The constitutional movement was a disappointment elsewhere, except in Bavaria, Baden, and Saxe-Weimar.

Central Europe, 1815-1866

1815-1819. The **Burschenschaften** Universities became the centers of the liberal movement, students were organized in Liberal societies (*Burschenschaften*) The center of the agitation was the University of Jena, where an extremist group followed the lead of **Karl Follen.**

1817, Oct. 18. The **Wartburg Festival** (organized by Jena students as a joint celebration of the Reformation and the battle of Leipzig), at which emblems of reaction were burned.

1819, Mar. 23. **August von Kotzebue,** poetaster, reactionary journalist, formerly in the tsar's service, was murdered at Mannheim by a Jena student, **Karl Sand,** as an enemy of liberalism Metternich was alarmed by this Liberal activity, won King Frederick William of Prussia over to repressive measures, embodied in the

1819, July. **CARLSBAD DECREES,** sanctioned by the Diet of the Germanic Confederation (Sept 20), binding sovereigns to control of universities through commissioners, providing a strict censorship of all publications, establishing at Mainz an inquisition into secret societies — an act held to have "fettered opinion and postponed constitutional liberty in Germany for a generation."

1819-1844. **THE GERMAN *ZOLLVEREIN.*** A more serious threat to Austrian hegemony in Germany now had its unostentatious beginnings in the movement for a *Zollverein* (customs union). The multiple tariff systems existing in Germany imposed irksome and hampering restrictions on a steadily growing commerce. Prussia took the lead in ending this situation by establishing a uniform tariff for all her territories and signing an initial tariff treaty with Schwarzburg-Sondershausen (1819, Oct). Prussia was feared for her power and hated for her reaction by the smaller states, which combated her leadership and attempted to set up rival customs unions

1829, May Prussia won over the League of Bavaria and Wurttemberg and gradually added other states By 1844 the *Zollverein* included practically the whole of Germany, except German Austria, Hanover, Oldenburg, Mecklenburg, and the three Hanse cities By forming a close economic union of the great majority of the states in the Germanic Confederation, Prussia had won a political victory over Austria

1830. The **July Revolution in Paris** (p. 628) not unnaturally had repercussions in Germany, where the revolutionary movement had revived in the hands of the reorganized university movement (1827), in secret clubs, etc The rulers were forced to abdicate in Brunswick, Saxony, and Hesse-Cassel (Sept), in these states and in Hanover (1833) new constitutions were introduced Prussia escaped revolution, due to respect for the king, and especially to administrative reforms which had removed the worst evils of misgovernment.

Metternich saw in the revolutions the working of international radicalism, seeking to undermine the bases of existing society

1832, May The new movement was typified for Metternich in the **Hambach Festival,** where a gathering of 25,000 drank to Lafayette, demanded a republic and German unity, resolved to adopt not only peaceful methods of press and platform, but of armed revolt.

June 28. Metternich's answer was the adoption by the Germanic Confederation of **six articles:** imposing on every German sovereign the duty of rejecting petitions of his estates impairing his sovereignty, repudiating the right of estates to refuse supplies or to use this method to secure constitutional changes, providing against legislation by the states prejudicial to the Germanic Confederation, etc.

July. Additional repressive measures included prohibition of all public meetings; surveillance of suspicious political characters, renewal of edicts against universities The reply of the revolutionists was a crazy plot engineered by international conspirators (probably connected with Mazzinian secret societies), aiming to seize Frankfurt, dissolve the Diet, unify the German states on liberal principles.

1833, Apr. 3. The **attempt on Frankfurt** was made and promptly collapsed The Diet's reply (June) was to appoint, at Metternich's instance, a central commission to co-ordinate preventive measures and supervise prosecutions in the various states

1837. The Metternichian reactionist policy was next extended to **Hanover,** where, on the death of William IV of England, the kingdom passed (in accordance with the Salic Law) to **Ernest Augustus, Duke of Cumberland,** eldest surviving son of George III. The latter set aside the Liberal constitution granted by William IV (1833). (Dismissal of seven eminent professors for refusal to take the oath) A new constitution, cloak for the king's absolutism, was vigorously opposed in Hanover; the opposition was supported in the diet by

Bavaria and other states, but Metternich secured the support of Prussia for the principles of monarchical absolutism, and the Diet decided that the Constitution of 1833 was invalid, the king justified in overthrowing it

1840, Aug. Ernest Augustus then imposed a constitution of his own, reducing the legislature to a nullity and recognizing the state domains as the king's private property Constitutionalists in Germany were outraged by this act, even Conservatives were stirred, Liberals declared the Germanic Confederation a national disgrace

The long reign of Frederick William III of Prussia came to an end, June 7, 1840, and he was succeeded by his son,

1840-1861. FREDERICK WILLIAM IV (b. 1795), a romanticist, deeply imbued with poetic and mystical conceptions, his ideas often far removed from reality. Like the Liberals, he aimed at greater political freedom and stronger national unity. But he sought to attain these ends, not through constitutionalism, but through the rule of the estates, reviving the position of the nobles and corporations, reflecting the "mystic glories of a divinely consecrated and patriarchial monarchy" In place of the Germanic Confederation, he dreamt of reviving the Holy Roman Empire, in which Prussia would play a glorious rôle, but secondary to that of the Hapsburgs

1841-1842. The reign began auspiciously The censorship was made much less stringent, but abuses of the new system resulted in its prompt withdrawal, causing mutual recrimination between government and public opinion

1841. Provincial diets, established in 1823, were given the right to elect committees to meet in Berlin and discuss legislation for all Prussia

1842. At the first meeting of the committees, the king explained that they were not to regard themselves as a popular assembly, an irritating and ambiguous statement They separated after accomplishing but little The king was impelled to move forward also by financial difficulties which he hoped to ease by some sort of popular representation.

1847. The eventual result was the order summoning the **United *Landtag*** (combined provincial diets) The king, who affected to despise the formalism of "Liberal constitutions," now presented to the *Landtag* an incredibly complicated and unreal scheme which gave the *Landtag* no effective power over legislation or the budget, made no provision for regular meetings. Opposition developed at once, demanding above all periodicity of meetings Two government bills were introduced at this session (dealing with financial matters); both were rejected The session came to an end amid great discontent of the Liberals.

Having failed in the *Landtag*, the king sought to recover his prestige through a scheme for reform of the Germanic Confederation, giving the Diet new powers and transforming the system in the direction of a federal state The plan was presented at Vienna (end 1847) by **Joseph Maria von Radowitz**, but no decision had been reached when the scheme was overtaken by the stormy events of 1848.

b. THE HAPSBURG MONARCHY 1815-1848

(1) *Austria*

The Austrian Empire was an anomalous congeries of territories and peoples, united by common obedience to the house of Hapsburg-Lorraine, as provided by the Pragmatic Sanction (p 463) and by such common institutions as the capital (Vienna), the Austrian court, the army, the bureaucracy, diplomacy, the Austrian Church Held together by the centripetal forces of these institutions, Austria was a monarchical machine She was increasingly weakened by the centrifugal forces of nationalism and the discords of inharmonious peoples gathered within her heterogeneous territories The empire embraced (1) the hereditary lands (principally Austria proper and the territories inhabited by the Slovenes to the south); (2) the lands of the Bohemian crown; (3) the province of Galicia, acquired in the partitions of Poland; (4) the Kingdom of Italy, Venetia, and Lombardy; (5) the lands of the crown of St Stephen — Hungary, Transylvania, Croatia

Among these peoples **nationalist movements** took root and flourished, e g.: (1) the **Illyrian renaissance,** beginning as a literary movement among the Croats and their neighbors and eventuating in resistance to the rule of the Magyars, dominant racial group in the lands of the crown of St. Stephen; (2) the **Czech renaissance,** beginning also as a literary movement and turning in the forties to demands for the restitution of constitutional rights for Bohemia; (3) most important of all, the rise of a nationalist movement **among the Magyars** (p 671).

1806-1835. FRANCIS I (b. 1768) He was, until the dissolution of the

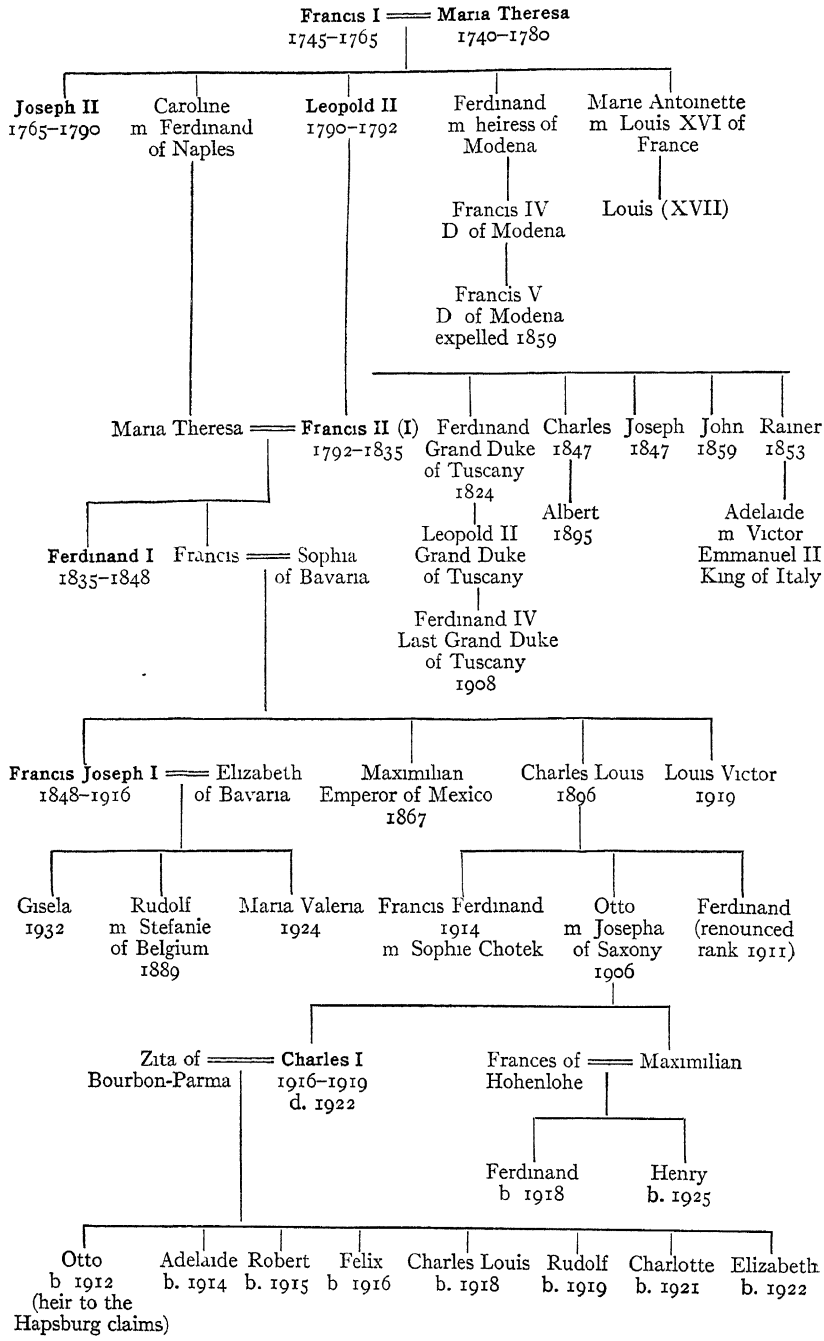
Holy Roman Empire (1806), Holy Roman Emperor as Francis II. Until 1805 he had been assisted by a cabinet minister (in effect a prime minister) who was in direct control of the various elements in the government Thereafter Francis acted as his own minister, permitting **Metternich** wide powers in foreign affairs, but holding the threads of domestic government in his own hands The governmental machine was extremely complicated, the emperor alone representing any synthesis of the various administrative departments "Austria was administered, but not ruled," remarked Metternich The infrequent meetings of the various provincial estates were mere form The police were supreme, spies were everywhere, letters were opened, censorship was extremely severe, instruction was made to conform with conservative principles. The emperor's alarm at popular movements increased

1832. He combated Metternich's suggestion of a new constitution to reconcile the "opposition between the monarchist principle and the democratic." His will warned his successor to "displace none of the foundations of the edifice of state Rule, and change nothing"

1835-1848 **FERDINAND I** (1793–1875), the weak-minded and incapable son of Francis I He followed his father's advice in leaving Metternich in control of foreign affairs But he permitted court circles to induce him to create, as supreme governmental organ,

1836. The **State Conference** (*Staatskonferenz*), composed of Archdukes Ludwig and Francis Charles, **Count Kolowrat,** Metternich In fact the State Conference met less and less often, and the dominant influence in the state was exercised by individual ministers over their several departments, notably by Metternich over foreign affairs, Kolowrat over finance

Publications within Austria were still subjected to a strict censorship, but Liberal pamphlets, newspapers, etc, were freely introduced from abroad University professors were (in fact) allowed considerable latitude Western European Liberal ideas rapidly took root among the educated classes of Austria In Austria proper these ideas found expression in agitation for constitutional changes This agitation was least important in the Alpine districts, most significant in Lower Austria and especially Vienna The assembly of estates in Lower Austria had during the past century lost its political significance, but now began to press for legislative and tax reforms, more effective parliamentary representation for the cities, etc The movement for constitutional reform was stimulated by the industrial progress of Austria, giving Vienna and other cities an increasingly large middle class, cultivated, self-confident, eager to take its place in the political life of the country Industry also brought a city proletariat with more radical views and destined to play an important rôle in the Revolution of 1848 The masses were goaded by severe economic depression, riots of workers became more frequent This was the setting for the events of March, 1848.



(2) *Hungary*

1813-1825. In Hungary, whose constitution remained unchanged, the reactionary Emperor Francis I (p 670) attempted to rule without summoning the Diet, demanding troops and subsidies directly from the counties When the latter refused compliance, he was obliged once again to summon the Diet (1825), promise triennial meetings and the exclusive right to grant taxes and recruits The Hungarian Diet represented exclusively the still semi-feudal nobility. The upper house (*Table of Magnates*) had as members the great nobles (some 130 in number) and certain ecclesiastical dignitaries and high office-holders. The lower house (*Table of Deputies*) was recruited from members of the gentry (about 700,000), with representatives elected by the county assemblies (two each), it included also two members representing all the cities, and delegates from the Diet of the Kingdom of Croatia.

A movement, at once liberal and national, made rapid progress in Hungary, in the thirties and forties Its moderate wing, inspired by **Count Stephen Széchenyi** (1791–1860), aimed primarily at a cultural renaissance and the economic development of the country along western European lines. The radicals, led by **Louis Kossuth** (1802–1894), sought independence from Austria and parliamentary government for Hungary. Between these two groups, but much nearer Széchenyi, **Francis Deák** (1803–1876) urged a middle course to assure Hungary at once her rightful position of autonomy within the Empire and a modern parliamentary régime All groups were interested in extending the use of the Magyar language, all favored maintenance of the dominant position of Magyars over other peoples within Hungary

1836-1844. The Diet won its first victory when Magyar was substituted for Latin as the official language in Hungary. Agitation for reform gathered vigor in the

The House of Hapsburg-Lorraine

All single dates, except where otherwise indicated, are death-dates.

forties. As editor of a newly founded (1841) organ of the radicals, the *Pesti Hirlap* (*Pest Journal*), Kossuth extended the influence of his revolutionary propaganda, attacking Austria violently, fostering Magyar chauvinism by denying the rights of Slavic minorities in Hungary.

1847. The elections of 1847 returned a large majority of Liberals to the Table of Deputies Deák now united the various Liberal groups on a compromise program of reform, the so-called **Ten Points,** afterward known as the *March Laws*: responsible government; popular representation; larger liberty for the press, incorporation of Transylvania; right of public assembly; complete religious liberty, universal equality before the law, universal taxation, abolition of serfdom with compensation to the landlords, abolition of the *avitictas*, the rigid system of entail dating from 1351 Deák's program was accepted by the Table of Deputies, but was combated by the conservative Table of Magnates The deputies negotiated with the imperial government and had reached a deadlock when news of the February Revolution in Paris reached Budapest and precipitated the revolutionary movement there.

c. THE REVOLUTION OF 1848-1849 IN THE HAPSBURG DOMINIONS

1848, Mar. 3. The news of the February Revolution in Paris (p 630) aroused much excitement in Vienna and Budapest In a daring speech **Kossuth** denounced the Vienna System and demanded responsible government for Hungary.

Mar. 12. Stimulated by the boldness of the Hungarians, the Viennese began to demonstrate and draw up petitions to the emperor. Through mismanagement the popular commotion led (Mar 13) to clashes between the troops and the demonstrators (largely students)

Mar. 13 METTERNICH RESIGNED and left the country

Mar 15. An imperial manifesto abolished the censorship and promised the convocation of a constitutional assembly. On the same day the Hungarian Table of Deputies adopted the entire Ten Points of Deák, which thus became the **March Laws,** equivalent to a constitution The Table of Magnates opposed the program vigorously, but the king-emperor accepted it (Mar 31) as well as further demands (Apr) which made **Hungary** all but independent, joined to the rest of the Hapsburg possessions only through a personal union On the same day also the **Croats** organized a national committee which sought autonomous government, i.e. separation from Hungary.

Mar. 18-23. The **glorious Five Days in Milan,** initiating the revolution in Lombardy (p. 654).

Apr. 8. The **Czechs** obliged the Vienna government to promise a constituent assembly for the Kingdom of Bohemia Other revolutionary movements took place in Moravia, Galicia, Dalmatia, and Transylvania

Apr 25. The emperor promulgated a **constitution for Austria** instead of awaiting the work of the assembly promised in March. The constitution set up a constitutional régime with a responsible ministry

May 15. Dissatisfaction with the constitution and the dissolution of a committee of students and national guard led to a popular demonstration. The government was forced to reconstitute the committee and to promise revision of the constitution in a democratic sense

May 17. The emperor and his family fled from radical Vienna to Innsbruck.

May 26. An attempt to dissolve the Academic Legion resulted in another demonstration, the raising of barricades and the creation of a **committee of safety,** which controlled Vienna during the following months.

June. The **first Pan-Slav Congress** (composed, however, almost entirely of Czech delegates) met at Prague under the presidency of **Francis Palácky** (1798–1876), the eminent Bohemian historian and national leader. It proclaimed the solidarity of the Slavic peoples (as against the Germans), but stressed also the equality of all peoples, and proposed a European congress to deal with outstanding international problems

June 12. The Princess Windischgratz, wife of the commander of the forces at Prague, was accidentally shot and killed during a demonstration **Prince Windischgratz,** throughout an advocate of strong repressive measures, seized this opportunity to bring up reinforcements

June 17. He bombarded **Prague,** crushed the Czech revolutionary movement and established a military dictatorship in Bohemia First step in the recovery of the governmental power.

July 22. The general diet or constituent assembly (*Reichstag*) met in Vienna It discarded the constitution

previously promulgated by the government and drew up a new document, pronouncedly democratic. Its only act of lasting importance was the **emancipation of the peasants** from feudal burdens (law of Sept 7).

July 24. **General Radetzky** overwhelmingly defeated the Piedmontese-Italian army in the **battle of Custozza** and re-established control of Lombardy (p 654)

Sept. 17. **Baron Jellachich,** governor (ban) of Croatia, began an invasion of Hungary He had been appointed on Mar 23, in reply to the demand of the Croatians for autonomy Under his leadership the Croatian-Slavonic Diet had rejected the authority of Hungary (June 5), an action which led to the suspension of Jellachich by the emperor After Custozza the court party urged the emperor to take vigorous action against the Hungarians, who made no secret of their sympathy with the revolutionary movement in Germany and Italy, which aimed at the breakup of the Hapsburg Empire The emperor therefore reinstated Jellachich (Sept. 4) and countenanced his attack on Hungary.

Oct. 3. Jellachich was made commander-in-chief of the forces operating against Hungary. He was driven back by the Hungarians, who invaded Austria and came within sight of Vienna.

Oct. 6. Barricades went up in Vienna when it was learned that the court was moving to suppress the Hungarian revolutionary movement **Count Latour,** the minister of war, was murdered and a radical rump of the constituent assembly declared itself in permanent session

Oct. 31. Windischgratz, aided by Jellachich, bombarded **Vienna** into submission. The radical leaders (including **Robert Blum,** delegate from the Frankfurt Parliament, p. 675) were ruthlessly executed The assembly had already (Oct 22) been adjourned to the little Moravian town of **Kremsier,** where it attracted less attention.

Dec. 2. **Abdication of the Emperor Ferdinand.** This was engineered by **Prince Felix Schwarzenberg** (1800–1852), diplomatic adjunct of Radetzky, iron-willed adherent of the restoration and even extension of the imperial power. He induced the heir to the throne, Archduke Francis Charles, to forego his rights in favor of his eighteen-year-old son,

1848-1916. **FRANCIS JOSEPH I** (b. 1830), who ascended the throne, according to Schwarzenberg, unbound by any of the promises of his predecessor to the Hungarians and others The efforts of the government were now concentrated on the campaign against Hungary

1849, Jan. 5. Windischgratz, in command of the invading armies, won an initial success by occupying **Budapest,** which surrendered without offering resistance

Feb. 26-27. He defeated General Dembinski at **Kapolna,** but was then obliged by General Gorgei to evacuate nearly all of Hungary (Apr)

Mar. 1. The Austrian *Reichstag* completed its constitutional work. The **Kremsier Constitution** provided for a decentralized, federal form of government and is regarded by many as having offered the last chance for a healthy reorganization of the monarchy.

Mar. 4. Having dissolved the *Reichstag,* **Schwarzenberg** promulgated a constitution of his own, designed to apply to all the Hapsburg possessions, including Hungary It provided for a highly centralized system, with a representative diet and a responsible ministry. "Provisionally" the emperor governed autocratically

Apr. 13. Goaded into resistance by the new constitution and rapidly drifting into more radical channels, the Hungarian Diet, meeting temporarily at Debreczen, proclaimed **the Hungarian Republic.**

Apr. 14. **Kossuth** was elected *"responsible governor-president"* by the Hungarian Diet

June. Francis Joseph accepted the offer of Tsar Nicholas of Russia to aid in the suppression of the Hungarian revolution

June 17-18. The Russian general **Paskievich** invaded Hungary from the north while the Austrian general **Haynau** led the invasion from the west At the same time the Hungarians were faced with serious revolutionary movements among the Serbs in the south and the Rumanians in Transylvania **Görgei** put up a vigorous resistance, but the Hungarians were unable to face such odds for long

Aug. 9 The Hungarians were decisively defeated in the **battle of Temesvar.**

Aug. 11. **Kossuth** abandoned his position in favor of Gorgei and fled (with many other leaders) across the frontier into Turkey.

Aug. 13. **GÖRGEI SURRENDERED** to the Russian commander **at Vilagos.** Despite promises of clemency, General Haynau visited sanguine vengeance on the

Hungarians at the **bloody assizes of Arad.** Nine generals were hanged and four shot.

d. THE REVOLUTION OF 1848-1849 IN GERMANY

The **February Revolution in Paris** (p. 630) acted as a catalytic agent to precipitate widespread discontent in Germany First in the south and west, then in the central states and Prussia, there were popular demonstrations and demands for constitutional changes and reform As in the Hapsburg Monarchy, the movement was both national and liberal But whereas in Austria the revolution aimed at the wrecking or dismemberment of one sovereign state, in Germany its objective was the unification of numerous sovereign states into one new empire In the excitement of the first days, the German rulers, taken off their guard, yielded everywhere Ministries were refashioned along liberal lines and profuse promises of reform were made Revolutionary changes were effected rapidly and almost without bloodshed

1848, Mar. 15. Beginning of the **March Days** in Berlin. The raising of barricades led to efforts of the soldiers to clear the streets, and to some bloodshed (Mar 16). King Frederick William, convinced that the whole trouble was due to the machinations of foreign agitators and unwilling to slaughter his beloved subjects, determined to make concessions.

Mar. 18. The censorship was abolished and a patent was issued summoning the **United *Landtag*.** The king announced his readiness to collaborate in giving Germany as a whole a constitution. The crowd, milling about the palace, was greeted by accidental shots from the troops No one was hurt, but barricades went up again and the insurrection became general in Berlin

Mar. 19. The king, extremely agitated, issued a proclamation "to his beloved Berliners" urging them to quit the barricades and promising them that the troops would then be withdrawn Before the evacuation of the barricades was at all complete, the king ordered the withdrawal of the military The palace was unprotected, the king was obliged to grant the popular demand for arms, and had to face the humiliation of saluting the corpses of insurgents as the mob carried them by.

Mar. 21. The king issued a second proclamation "to my people and the German nation," promising that he would assume the leadership of the German people and that Prussia would henceforth be "merged in Germany." On the same day the king suffered a second humiliation when he paraded through the streets wearing the tricolor of black, red, and gold (recently adopted by the Diet as the flag of the new Germany) and making liberal addresses to the students

Mar. 31. **The Frankfurt *Vorparlament*** met. On Mar 5 a self-constituted committee of 53 Liberals from various states had met at Heidelberg and had decided to arrange for a constituent body for all Germany The *Vorparlament* (preliminary parliament) ordered the holding of elections by direct, manhood suffrage

May 18. **THE FRANKFURT NATIONAL ASSEMBLY** (*Nationalversammlung*) or parliament met for the first time in the Church of St. Paul at Frankfurt-on-the-Main. Its membership was about 830 Many of the conservatives who had been elected refused to take their seats in a revolutionary assembly, but the parliament nevertheless was weighted heavily in favor of rank, office, property, and education It was preponderantly a middle-class body, composed of some 200 lawyers, about 100 professors, many physicians, judges, officials, plus about 140 businessmen. "The most distinguished constituent body in history." Its debates, though often of exasperating length and technicality, were of a surprisingly high order

May 19. The parliament chose **Heinrich von Gagern** as president and devoted itself to the work of organization

May 22. **Meeting of the Prussian constituent assembly.** It continued its debates throughout the summer, becoming gradually more and more radical

June 28. The **Frankfurt Parliament,** having suspended the Diet of the Germanic Confederation, appointed **Archduke John of Austria** (uncle of Emperor Ferdinand) imperial regent (*Reichsverweser*) as head of a provisional executive power He was recognized by the various state governments and appointed a ministry in which Anton Schmerling (an Austrian) was minister for foreign affairs and the interior and Peucker (a Prussian) and Heckscher (from Hamburg) ministers of war and justice respectively The provisional government, lacking all material power (army), never established its authority firmly, and the attention of the Parliament itself was riveted during the summer of 1848 on the **Schleswig-Holstein question,** a test case of the solidarity of German national feeling

and of the power of the Parliament over the state governments.

The two provinces of **Schleswig** and **Holstein** (the former half German, the latter almost wholly so) were possessions of the King of Denmark Holstein was a member state of the Germanic Confederation In Jan. 1848 Frederick VII succeeded to the Danish throne He was wholly under the influence of the Danish nationalists (**Eider Danes**) whose object was to integrate Schleswig with the rest of the monarchy The duchies refused to recognize descent in the female line and supported the claim of the Duke of Augustenburg to succession in the duchies When Danish troops began to occupy Schleswig, the **duchies rose in revolt** and established a provisional government at Kiel (Mar 24) The Frankfurt Parliament thereupon decided to intervene and commissioned Prussia to send federal troops, which the Prussians did, despite warnings from both England and Russia, which powers were interested in keeping Prussia from the North Sea coast, and in maintaining Denmark at the entrance to the Baltic Various British efforts at mediation (June, July) failed, but Frederick William, whose heart had never been in the intervention,

Aug. 28. Concluded the **Armistice of Malmö** for seven months Danes and Prussians both to evacuate the duchies, which were to be provisionally administered by a joint commission of Danes and representatives of the Germanic Confederation. This arrangement, so favorable to Denmark, raised a storm of protest in the duchies and in the Frankfurt Parliament. The Parliament rejected the armistice at first, but, after a change of ministry,

Sept. 16. The Frankfurt Parliament yielded Ultimately it accepted a proposal of Palmerston (Feb 3, 1849) for a separate constitution for Schleswig, but soon afterward (Feb 26) the Danes denounced the armistice The war was resumed Mar. 31, the Germans invading Jutland On July 10 a new armistice was concluded and long-drawn negotiations were initiated They finally led to the conclusion of **peace between Prussia and Denmark** (July 2, 1850), in which both sides reserved their rights The **London Protocol** (May 8, 1852), between England, Russia, France, Austria, Prussia, Sweden, and Denmark (not signed by the duchies or by the Germanic Confederation) fixed the succession, the Duke of Augustenburg's claims being settled by a money payment

By the time the Parliament was ready to devote itself to the constitutional problem, loose parties had emerged from the ranks of deputies The **Right** (Radowitz, Vincke, Prince Lichnowsky) held to the idea of an imperial constitution in harmony with the separate state governments, the **Left** (Vogt, Ruge, Blum) proclaimed the sovereignty of the people and endeavored to establish a republican, strongly centralized, federal government; the **Right Center** (Gagern, Dahlmann, Gervinus, Arndt, Bassermann, J Grimm) hoped to persuade the governments to recognize a constitutional monarchy for all Germany; the **Left Center** (Romer, Fallmerayer) insisted on the subordination of the states to the central monarchy. As the various groups debated, the chief governments recovered their authority

Oct. 31. Windischgratz took Vienna (p 674).

Nov 9. King Frederick William of Prussia, encouraged by the success of the Austrian court and prodded by his generals, exiled the Prussian constituent assembly to Brandenburg-on-the-Havel, as a reply to its action in striking the phrase "by the grace of God" from the royal title, and other radical measures

Dec. 5. The Prussian constituent assembly was dissolved and the government promulgated a constitution (based upon the work of the assembly, but maintaining the ultimate authority of the king) As elaborated in the succeeding years, the constitution came to provide for an upper house (*Herrenhaus*), bulwark of the privileged orders, and a lower house (*Landtag*), chosen by universal suffrage but under a three-class system of voting based on taxpaying ability, so that 83% of the electorate controlled only one-third of the seats. Though the *Landtag* was given power to vote *new* laws and taxes, there was no ministerial responsibility, and when parliament was not in session, ordinances, with the force of law, could be issued by royal fiat This constitution remained in force from 1850 to 1918

The conservatives and the radicals in the Frankfurt Parliament had become seriously divided on the question of what territory should be included in the projected German national state The radicals were in favor of bringing in the German provinces of Austria (in which they included Bohemia), though this would have involved the disruption of the Hapsburg Monarchy This group was known as the Big-German (*Grossdeutsch*) party, while the Little-German (*Kleindeutsch*) group thought it wiser to leave Austrian territory out of account The question became more and more academic as the Austrian government recovered its position and made known its

hostility to any infringement of its unity. The whole matter was finally compromised (Oct) by a decision to include all German territory, but with the proviso that no part of the new state should be connected with non-German territory. In effect this meant the victory of the *Kleindeutsch* group, which looked to Prussia and Frederick William for aid in the constitution of a German national state

1849, Mar. 27. THE FRANKFURT CONSTITUTION. This followed upon the Austrian Constitution of Mar 4 which reasserted the unity of the Hapsburg dominions and ended all talk of including part of Austria The Frankfurt Constitution created a federal state under an hereditary "Emperor of the Germans," who was to have a suspensive veto over legislation passed by a national parliament. Ministers were to be responsible to the parliament, which was to consist of two houses an upper house (*Staatenhaus*) the members of which were to be chosen, one-half by the state governments, one-half by the lower houses of the state legislatures The members of the lower house (*Volkshaus*) were to be elected on the basis of universal, direct, secret, equal ballot, with single-member constituencies Over the courts of the various states was set a supreme court for the *Reich*, with final jurisdiction. The federal government was to have complete control of foreign policy, the army, regulation of economic questions The constitution was never put in force, but exercised important influence on the later constitution of the North German Confederation (p 686) and the constitution of the German Republic (p 996)

Mar. 28. The Frankfurt Parliament elected **Frederick William of Prussia as Emperor.**

Apr. 3. The king told the Parliament's deputation that he could agree only after the princes and free cities had accepted the constitution

Apr. 21. When the small states had already accepted, the king torpedoed the movement through a declaration that Prussia could not accept the constitution as it stood — a King by "divine right" could not receive a crown at the hands of a popularly elected assembly. The majority of the governments now withdrew their representatives from Frankfurt.

June 18. A "rump parliament" removed to **Stuttgart,** where government troops finally dispersed its members The attempt to unite Germany under a parliamentary system had failed.

1849-1850. The Prussian Union Scheme. Though unwilling to accept the crown from an elected assembly, Frederick William still hoped to achieve German unity in accordance with his own ideas and with the consent of his fellow princes His friend, **Von Radowitz,** produced a plan for a larger confederation to include the German states and the whole of the Austrian dominions, German and non-German, thus creating a great **Middle European bloc** with a population of 60,000,000, with immense economic possibilities This great empire was to be divided for administration into two parts (1) an **inner confederation** comprising roughly present-day Germany, under the leadership of Prussia, (2) the **Hapsburg Monarchy,** which would thus remain intact.

1849, May 26. A draft constitution for the inner confederation (**Prussian Union**) not substantially different from that of the later North German Confederation was accepted by Prussia, Saxony, and Hanover, Saxony and Hanover, however, reserving the right to withdraw if it were not accepted by the other German governments, apart from Austria. Nearly all the petty governments, fearing Prussia, promptly joined the new union.

Oct. 19. A **national assembly** was summoned to meet at **Erfurt.** Saxony and Hanover now withdrew, leaving the union substantially a combination of Prussia and the smaller states (Wurttemberg and Bavaria refusing to join).

1850, Mar. 20. The **Erfurt Parliament** met, the constitution as proposed by Prussia was accepted, and the Parliament was soon afterward prorogued.

Apr. 29. Frederick William told the princes that he left them free to adhere to the union, but gave them the impression that it was in fact suspended until more auspicious times With the Hungarian Revolution crushed, **Schwarzenberg** was now prepared for an active policy in Germany

May 16. At his invitation, representatives of a number of the petty states and Austria met at Frankfurt and reconstituted the old **Diet of the Germanic Confederation.** If Prussia insisted on the perpetuation of the Erfurt Union, war with Austria appeared inevitable When a dispute arose from an appeal of the Elector of Hesse to the Frankfurt Diet for support against his parliament, the Austrians sent federal troops into the district, while the Prussians, arguing a right to intervene in view of the fact that Hesse was a member of the Prussian Union, did likewise Both

powers mobilized and war seemed imminent Tsar Nicholas of Russia, irritated by the pseudo-liberalism of the Prussian ruler, sided with Austria, and Frederick William, who had been averse from war from the very outset, decided to beat a retreat. He sent his new minister, **Otto van Manteuffel,** to negotiate with Schwarzenberg at Olmutz.

Nov. 29. THE PUNCTATION OF OLMÜTZ. The Prussians abandoned the Prussian Union and recognized the re-established Germanic Diet at Frankfurt. It was decided that the future constitution of Germany should be discussed in "open conferences" of all the German states This was merely a screen to conceal the Prussian retreat, and the whole affair is generally spoken of by Prussian historians as the *Humiliation of Olmutz.*

1850, Dec.-1851, Mar. Conference of the German states at Dresden This proved fruitless and the old Germanic Confederation was re-established in the original form

e. THE AUSTRIAN EMPIRE, 1849-1867

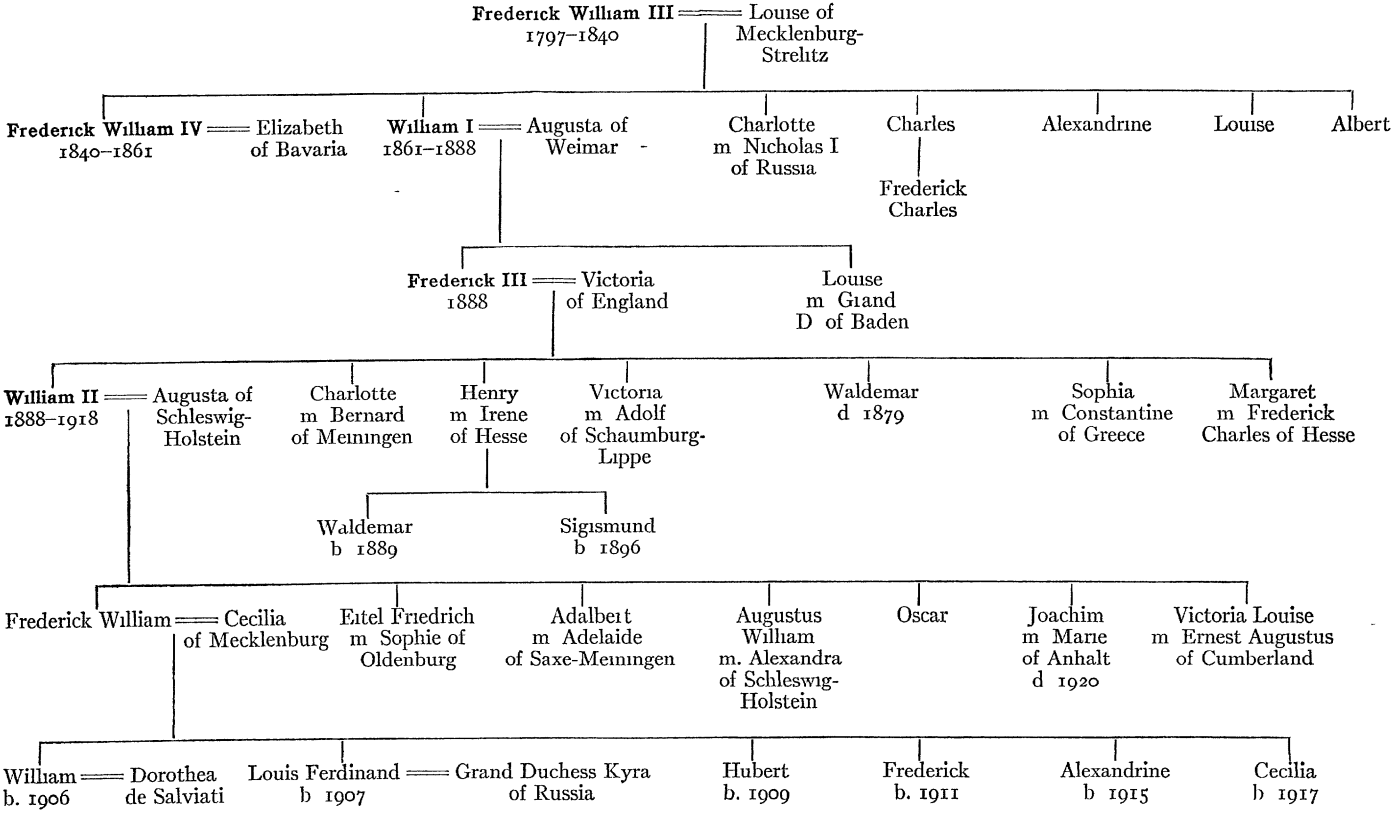
1849-1860. The Bach system. The constitution of Mar 4, 1849, having been suspended (1851), the empire was ruled from Vienna by bureaucratic methods and a concerted effort was made to undermine the national movements by a policy of vigorous **Germanization.** This policy was associated especially with the name of **Alexander Bach,** minister of the interior. Hungary lost its historic identity and was divided into five administrative "governments," ruled by German officials and by gendarmerie directed from Vienna Croatia, Transylvania, and southern Hungary became separate provinces, and the Slavs and Rumanians in these territories (who had been loyal in 1848) suffered the same fate as the Hungarians.

1855. A concordat with the Catholic Church gave the Church extensive power, especially in matters of education, thus breaking with the tradition of Joseph II, in the interests of counteracting the revolutionary spirit.

1856-1859. The Austrian government felt acutely the results of the **Crimean War** (p. 727), which undermined Austria's international position and ruined the finances through prolonged mobilization.

1859. WAR WITH FRANCE AND PIEDMONT (p. 658), brought to an abrupt end in part because of financial stringency, in part because of the danger of revolt in Hungary The government felt impelled to scrap the Bach system and come to an agreement with the national groups.

1860, Oct. 20. The October Diploma, issued by the emperor, set up a federal constitution which recognized wide autonomy for the various "Lands," with an imperial diet of limited powers, to be elected by the provincial *Landtage* The Hungarians opposed this settlement and demanded the restoration of their own constitution



1861, Feb. The February Patent, "interpreting" the October Diploma, but really a new constitution which set up a bicameral parliament with an electoral system designed to give the German *bourgeoisie* (the mainstay of the empire) an influence wholly disproportionate to their numbers. Negotiations with the Hungarians failed; Hungary was again ruled administratively and autocratically. The emperor resumed negotiations with the Hungarians in 1865 They were facilitated by the overwhelming defeat of Austrian arms at Koniggrätz (p 686) and by the loyal participation of the Hungarians in the war against the Germans. The result was the

1867, Oct. COMPROMISE OF 1867 (largely the work of **Francis Deák,** seconded by **Julius Andrássy**), which established a political organism *sui generis*; **In Hungary** (the ancient *lands of the crown of St. Stephen*) the Magyars were permitted to dominate the subject peoples through the constitutional system of 1848. **In Austria** (the remaining seventeen provinces of the empire) the Germans were to dominate the other peoples through a constitution, based on the February Patent, extended and made perpetual. The two states were joined in personal union in the monarch; in common ministries of foreign affairs, war, and finance (merely an administrator of the common treasury which received the funds contributed by both states for common purposes); in the annual *delegations*, composed of sixty members of each of the two parliaments, empowered to decide matters of common interest; in a decennial treaty regulating tariffs, currency, the military system, etc The "autocrat of the fifties" now ruled through responsible ministries in both parts of the empire

f. THE UNIFICATION OF GERMANY

1850-1853. Despite the extent of the humiliation of Prussia by Austria at Olmutz (above), she was able to thwart

The House of Hohenzollern

Austria's effort to enter the *Zollverein* Tariff duties were reduced to a point too low for Austrian industry to bear Thwarted, Austria attempted to break up the *Zollverein* by inducing South German states not to renew their tariff treaties with Prussia, expiring 1852 The latter were well satisfied with North Germany as a market, however, and declined to change their arrangements. **Hanover, Brunswick, and Oldenburg** also joined the *Zollverein* (1853), bringing the whole of non-Austrian Germany into the customs union. This victory over Austria was a prelude to the great events of the next decade

In domestic policy the period was one of reaction, with persecution of Liberals in general, favors to nobility and *Junkers*, the latter filling the court posts, high military and official positions — in fact, directing the state The Conservatives had as their organ the *Kreuzzeitung* (founded 1848) from which the party took its name It was opposed not only by the Liberals, but by an important group of Moderates to which the heir to the throne, Prince William, adhered and which published its views in the *Preussische Wochenblatt*, which gave its name to the group

1852, Jan. The liberal **municipal system** (established 1850), putting an end to the privileged position of the nobility in village communities, was repealed by ministerial decree, and the magisterial power of the landed proprietors was re-established

1854, Oct. 12. The upper house of the Prussian legislature was reorganized, the number of elected members being diminished and the great landowners regaining the preponderance The democratic electors abstained from voting in the election of 1852, hence only Conservatives and some moderate Liberals like **Georg von Vincke** were elected When the latter were for the most part excluded (elections of 1855), the majority of the members left were officials of the government The press was stifled (although the constitution declared it free), the right of holding public meetings was suspended, political clubs were dissolved, arbitrary arrest and imprisonment became frequent.

1858 (1861)-1888. WILLIAM I (b 1796) who succeeded Frederick William IV as regent when the latter was adjudged insane, and then as king He was the brother of Frederick William, a man of limited intellect but much common sense, great industry and complete loyalty Though an arch-conservative in 1848, he had come to see the need for living up to the constitution as granted Many restrictive measures were abrogated and a new era was introduced The success of the Italians in 1859–1860 (p 658) aroused a storm of liberal and nationalist sentiment in Prussia and all Germany

1859, Dec. 5. The regent appointed Gen **Albert von Roon** (1803–1879) minister of war to reform the army in view of the international tension (general fear of the designs of Napoleon III on the Rhine) Gen **Helmuth von Moltke** (1800–1891), friend of Roon, became chief of the general staff

The demand for new credits for army reform precipitated a long struggle between the king and his parliament, the Liberal majority (since 1859) opposing militarism and challenging the king's prerogative The opposition claimed the constitutional right to vote credits, the king the right, as head of the army, to make military reforms and secure the necessary funds The issue at stake was responsible government versus autocracy, with the rights of neither side indicated clearly either in the constitution or the Hohenzollern tradition The king contemplated abdication; then, on the advice of Roon, summoned Otto von Bismarck (1815–1898), ambassador to Paris, to carry on the struggle against the *Landtag*.

1862, Sept.—1890, Mar. OTTO VON BISMARCK (Count 1866, Prince 1871), minister-president of Prussia, later chancellor. Bismarck — Junker, avowed enemy of parliamentary institutions — had made a reputation for ultra-conservatism through his staunch advocacy of the king's cause in the United Landtag of 1847 and the assembly of 1848, had subsequently served as Prussian representative to the Frankfurt Diet (1851–1859), ambassador to Russia (1859–1862), ambassador to France (1862). He was already known for his strength and boldness, was detested by Liberals for his conservatism and for what was believed to be his insular Prussian outlook on the German problem, and was feared by the king for the breadth and audacity of his views Bismarck was made minister without portfolio, then minister-president He carried on the constitutional struggle with the Landtag for four years.

1863, Feb. 8. At the time of the Polish insurrection (p 704) Bismarck sent **Count Alvensleben** to assure the tsar that he had Prussia's co-operation against the rebels; four Prussian corps (half the army) were dispatched to the Polish frontier This action made it possible for Russia to resist the attempted intervention by Austria, Britain, and France on behalf

of the Poles; it won the tsar's trust and friendship during the three wars necessary to German unification.

Agitation for the unification of "Germany" had revived rapidly after 1859 Austria and the South German states favored reform of the Germanic Confederation. German Liberals generally favored a parliamentary *Kleindeutschland* after the Frankfurt tradition of 1848 Bismarck had learned at the Frankfurt Diet to distrust Austria, was convinced she must be extruded from Germany, preliminary to German union under the leadership and domination of Prussia

1863, Aug. A congress of princes, summoned by Emperor Francis Joseph to reform the Germanic Confederation, but really meant as a bait to German Liberalism, miscarried when Bismarck induced King William to refuse to attend Bismarck's next opportunity came in connection with the highly complicated **Schleswig-Holstein question.** A royal proclamation of King Frederick VII of Denmark (1863, Mar 30) in substance announced the annexation to Denmark of the Duchy of Schleswig. This act was a breach of the **London Protocol** (1852) by which the powers had guaranteed at once the inseparability of the duchies and their personal union with Denmark under the king, and also of an engagement given by Denmark to Austria and Prussia (Dec 1851) not to incorporate Schleswig or treat it separately Frederick's act also thrust a new charter on the Duchy of Holstein (which retained its independence), without consulting its representatives This was to fly in the face of the Germanic Confederation, of which Holstein was a member. Expectation of English and Swedish support was an important factor in shaping Danish policy during 1863 and early 1864

July. The Diet of the Germanic Confederation demanded that the two duchies should be taken forcibly from Denmark and submitted to the rule of the German Duke of Augustenburg (son of one of the claimants to the succession)

Oct 1. The Diet voted federal execution (i e action against Denmark) and instructed Hanover and Saxony to furnish troops

Nov. 15. Frederick VII died, and was succeeded by

Nov. 18. Christian IX, who promptly signed a newly drafted constitution (of Nov 13), not formally incorporating Schleswig, but clearly tending to that end.

Dec. 24. Federal troops entered Holstein. The Diet was still supporting the Duke of Augustenburg, whose claims had been discarded by the London Protocol. Hence Bismarck could now separate Prussia from the action of the Diet and declare Prussia the upholder of the Protocol.

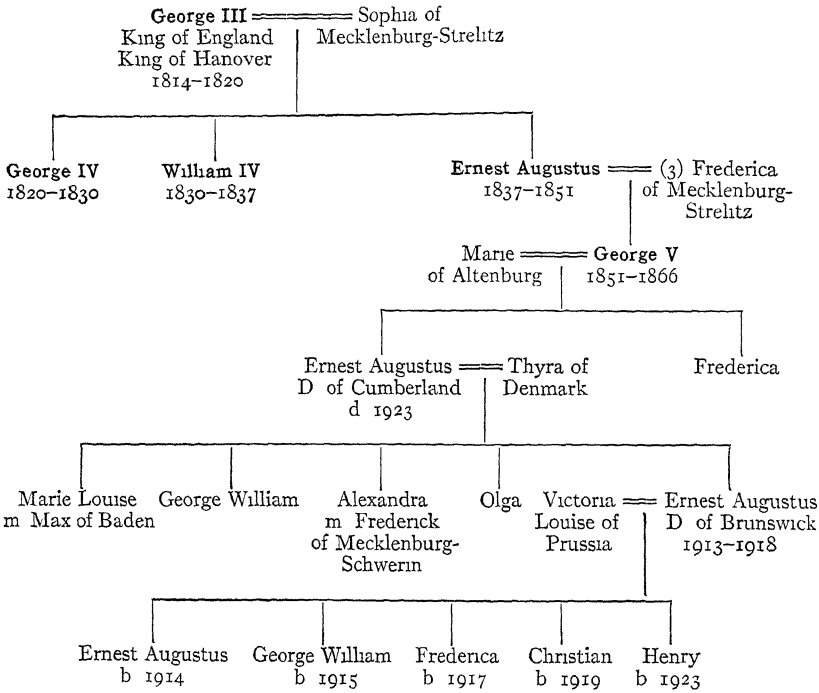
1864, Jan. 16. Austria joined Prussia in an alliance, and the two powers agreed to send an ultimatum to Denmark demanding repeal of the constitution (otherwise they would invade), to settle the future course of the duchies only "by mutual agreement."

Feb. 1. Austrian and Prussian troops invaded Schleswig, the new Prussian army of Roon and Moltke receiving its baptism of fire.

Feb. 5. The Danes quickly abandoned the defense of the *Dannewirke*; all Schleswig except Duppel and the island of Alsen were in the enemy's hands The Duppel forts were not taken until April 18, the Germans were now invading Denmark.

Apr. 25-June. The **London Conference,** engineered by the British to save the Danes, miscarried, due to the cleverness of Bismarck and the stubbornness of the Danes

June 26. The war was renewed, resulted in a crushing defeat for the Danes, the **surrender of the Duchies of Schleswig, Holstein, and Lauenburg** to Austria and Prussia (definitive **Peace of Vienna,** Oct. 30)



What was to become of the duchies, now the joint possession of Austria and Prussia? After prolonged negotiations, Bismarck maneuvered Austria, seriously embarrassed at home by political demands of the Magyars (p 678), into

1865, Aug. 14. The Convention of Gastein: joint sovereignty was to be maintained, but Austria was to administer Holstein, Prussia to administer Schleswig (Lauenburg going to Prussia in return for a money payment to Austria) An impossible situation was created Austrian Holstein became a virtual enclave in unfriendly Prussia Under the skillful hand of Bismarck, Austro-Prussian relations rapidly worsened. Prussian relations with Russia were excellent

Oct. At Biarritz **Bismarck met Napoleon III,** and appears to have dropped vague hints of compensation for France in the Rhineland, in return for which he won a promise of French neutrality from the emperor, convinced that Austria would be victor in the coming war.

1866, Apr. 8. Bismarck, aided by Napoleon, concluded an offensive and defensive **alliance with Italy:** Italy to join

Kings of Hanover

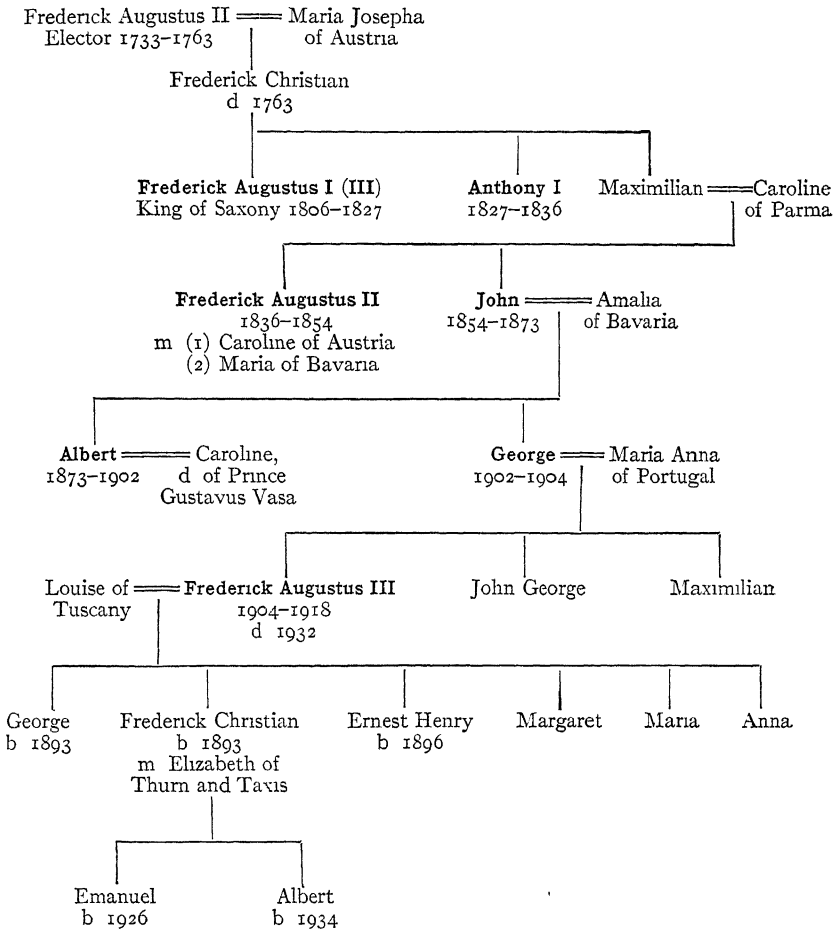
Prussia if war broke out between Austria and Prussia within three months, with Venetia as a reward.

Apr. 9. Bismarck introduced a motion for **federal reform** into the Frankfurt Diet, evidently with the idea that Austria would reject it and precipitate a conflict. Both parties began to mobilize. Last-minute efforts to compromise (**Gablenz mission**) proved fruitless.

June 6. The Austrian governor of Holstein summoned the Holstein Diet in order to discuss the future of the duchy Bismarck denounced this as a violation of the Gastein Convention and ordered Prussian troops into the duchy

June 12. Austria, realizing that conflict was inevitable, signed a **secret treaty with Napoleon III.** In return for French neutrality, Austria promised to cede Venetia to Napoleon (who was to retrocede it to Italy), whether Austria won or lost the war. In the event of Austrian victory, Austria was to be free to make what changes she wished in Germany, but if these changes disturbed the European balance of power (as they were bound to do), Austria was to consult with Napoleon before making them Verbally the Austrians agreed in this case not to oppose the erection of a **neutral buffer state** (client of France) **along the Rhine.**

June 14. On Austria's motion, the Frankfurt Diet voted **federal execution against Prussia** for violating federal (Holstein) territory Most of the German states, including the larger ones like Bavaria, Saxony, and Hanover, sided with Austria against Prussia The Prussian government declared the federal constitution violated and the **confederation at an end.** The war began.



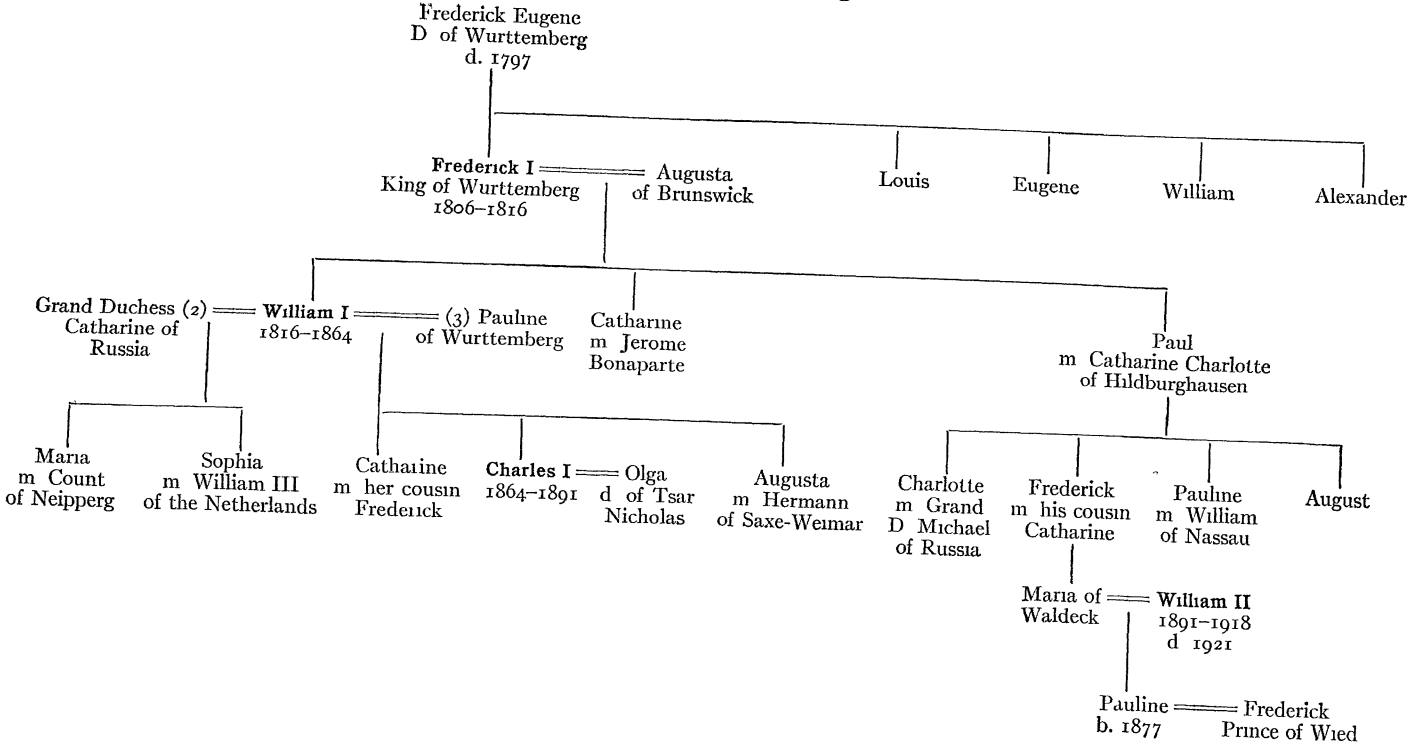
1866, June-Aug. The SEVEN WEEKS' WAR. The war was fought in three theaters

(1) **Italy:** the Italians were defeated on both land and sea (p 659)

(2) **Germany:**

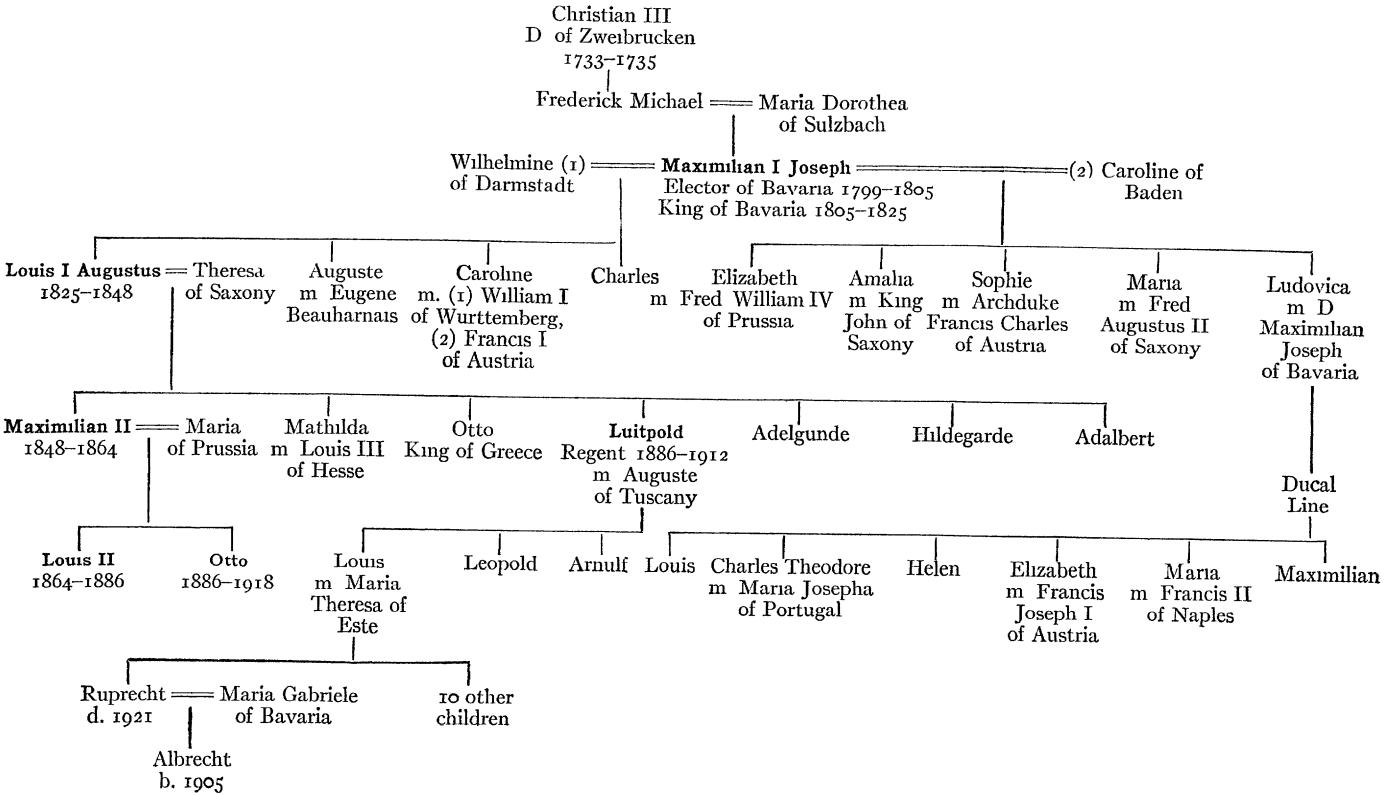
June 27-29. General Vogel von Falkenstein, with an army of some 50,000 men, defeated the Hanoverians at **Langensalza,** and forced them to capitulate. He turned to the South German allies of

Kings of Saxony



Austria, but before he could reach them the die had been cast in

(3) **Bohemia:** Moltke had learned golden lessons from the American Civil War on the uses of the telegraph and railroad. To accelerate concentration of his forces near Gitschin (Bohemia), he formed three armies, advanced them separately in order to make greatest use of existing railways, co-ordinating their movements from headquarters in Berlin by telegraph.



June 22-23. The First Army (**Prince Frederick Charles**) and the Army of the Elbe (**General Herwarth von Bittenfeld**) entered Bohemia through passes in the Erzgebirge and Riesengebirge The Second Army (**Crown Prince Frederick**) moved south through Silesia. The experience of the Austrian commander in chief, **Field Marshal Benedek**, had been limited to Italy, and he had never been called upon to command large numbers of troops. He was summoned to Bohemia so that an Austrian archduke, Albert, might be assured a victory in Italy Benedek was, as it turned out, a sacrifice to the prestige of the house of Hapsburg.

July 2. Benedek's army was discovered to be within striking distance of the Prussian First Army and Army of the Elbe At this critical moment the telegraph broke down. Late at night Moltke took

Kings of Württemberg

Kings of Bavaria

the fateful decision: instructed the First Army and Army of the Elbe to attack at dawn while he sent a courier twenty miles to fetch the crown prince's Second Army

July 3. Battle of Koniggrätz (Sadowa) The Austrians had the better of the battle until early afternoon, when the crown prince came up on the left and decided the issue in favor of the Prussians, who were much advantaged by the breech-loading "needle-gun," enabling the infantry to fire from prone positions at the standing Austrians (using muzzle-loaders)

The sudden and complete victory of the Prussians at Koniggratz was a stunning defeat for the policy of Napoleon, who had expected a long war, exhausting both belligerents

July 5 Napoleon offered mediation, which Bismarck accepted only on condition that the terms of peace should be determined before an armistice was concluded Napoleon — ill, his will crippled, unwilling to envisage the use of force — yielded, accepted Prussian terms imposed in the

July 26. Preliminary Peace at Nikolsburg· Hanover, Electoral Hesse, Nassau, Frankfurt were to be incorporated in Prussia; Austria was to be excluded from Germany (the Germanic Confederation came to an end); German states north of the Main River were to form a North German Confederation under Prussian leadership, the South German states were to remain independent and to be permitted to form a separate confederation · King William insisted on taking Austrian Silesia, territory from the South German states and Saxony. Bismarck had seen the importance of not provoking Napoleon for the moment, of not alienating Prussia's potential allies for the future. He resisted and won his point

Aug. 5. Napoleon advanced his **claims for compensation:** the frontiers of 1814 (Saarbrucken, Landau) and possibly the Bavarian Palatinate or Rhenish Hesse (with Mainz), or Luxemburg Bismarck brusquely rejected these claims as an offense to German national feeling

Aug. 16. Napoleon instructed his ambassador, Count Vincent Benedetti, to ask for Luxemburg and for Prussian support for the **acquisition of Belgium** by France. Benedetti was induced by Bismarck to put these demands in writing, along with the French offer to sanction the union of North and South Germany in return (the **Benedetti Treaty**). Bismarck then took advantage of illness (Sept.–Dec.) to evade a definite reply. The draft treaty was communicated to the English in 1870 and influenced British opinion in favor of Prussia during the war with France

Aug 9-22 Bismarck took advantage of the French demands to push his peace negotiations with the **South German states** (Baden, Wurttemberg, Bavaria). They were let off on very generous terms, but were induced, in return, to conclude with Prussia **military alliances** for the event of French attack

Aug. 23 The Definitive Treaty of Prague brought the war to a close.

Sept. 8 Bill of Indemnity, by which Bismarck concluded the struggle with the Prussian parliament An election during the war had strengthened the Conservatives at the expense of the Liberals. Many of the latter had come over to Bismarck in view of the fact that he was accomplishing their program of national unification The bill of indemnity gave retroactive assent to previous expenditures of the government without the consent of the *Landtag* It caused an important split in the ranks of liberalism, the majority of the Liberals rallying to Bismarck as the new **National Liberal Party** (leader, **Rudolf von Bennigsen**).

1867. THE NORTH GERMAN CONFEDERATION, formed through treaties between Prussia and the other states north of the river Main The constitution was primarily the work of Bismarck himself The new confederation was one in which the component states retained their own governments, but in which the military forces were controlled by the federal government (the King of Prussia, commander in chief). The **presidency** (*praesidium*) was held by the King of Prussia, represented by a **chancellor** (Bismarck), responsible to him alone The **federal council** (*Bundesrat*) was composed of instructed delegates of the various states, among whom 43 votes were divided, Prussia having 17 and unofficially controlling the votes of several small North German states The *Bundesrat* had constituent powers, but a two-thirds vote was required for constitutional changes The **lower house** (*Reichstag*) shared equally with the *Bundesrat* in legislation. It was composed of deputies elected from single-member constituencies on the basis of universal suffrage Bismarck had thus achieved two objects· the predominancy of Prussia in the new state, and the maintenance of the royal power against Liberal demands for responsible government

1867, Apr. The Luxemburg crisis. This grew out of Napoleon's efforts

(winter 1866–1867) to acquire the Duchy of Luxemburg from the King of the Netherlands, who was suzerain. Bismarck had promised not to oppose the deal, provided it were so engineered that German national feeling should not be aroused. The French mismanaged the affair, the news leaked out, Bismarck was interpellated in the new North German *Reichstag*, and the King of the Netherlands drew back from the arrangements he had made There followed a period of acute crisis, which was closed by a compromise.

May 7-11. An International conference at London, which finally signed the **Treaty of London** (Sept 9) Prussia abandoned her previous right to garrison the fortress of the town of Luxemburg. The duchy ceased to be a member of the Germanic Confederation Its neutrality and independence were guaranteed by the powers. This settlement was a profound humiliation for Napoleon, who henceforth looked upon a final reckoning with Prussia as inevitable, reorganized his army and initiated negotiations for an alliance with Austria and Italy (p. 635).

July 8. Bismarck brought the four South German states into the *Zollverein* and established a *Zollparlament* (customs parliament) consisting of the North German Reichstag plus representatives of the South German states This was effectively a parliament for all Germany, though still empowered to deal only with customs questions. In South Germany there was still much opposition to union with Prussia, due to cultural and religious differences and general suspicion, as well as attachment to states' rights It became increasingly evident to Bismarck that only war with France and the specter of French domination in the Rhineland would drive the South German states into the union War he regarded as inevitable, convinced as he was that France would not peaceably permit the inclusion of the South German states in the Confederation The sudden appearance of the greatly strengthened neighbor alarmed the French and led to the demand of revenge for Sadowa and to much loose talk about the need of chastising overbearing Prussia.

1868-1870. The Hohenzollern candidacy for the Spanish throne. After the Spanish revolution (Sept 1868) and the expulsion of Queen Isabella (p 646), the provisional government of Marshal Serrano and General Prim made several attempts to secure one of the Portuguese Coburgs or one of the Italian princes as king. From the outset there had been talk of offering the throne to Prince Leopold of Hohenzollern-Sigmaringen, distant relative of both King William of Prussia and of Napoleon III. The part played by both French and Prussian diplomacy in the various candidacies is still quite obscure, but the Hohenzollern candidacy was taken up by Bismarck at least as early as Mar 15, 1870 (**mission of Salazar** with letters from Prim, **Hohenzollern "family" council**). Prince Leopold refused to accept unless ordered by the king, but William, averse to the whole business, refused to take an active part. Bismarck, possibly seeking a reply to the French alliance project with Austria and Italy and desiring a connection with Spain which would oblige French troops to guard the frontier of Spain in the event of a Franco-Prussian war, sent special emissaries to Spain who returned (May) with glowing accounts.

1870, June 19. Leopold was induced to change his decision and accept the offer King William gave a grudging consent, on condition that Leopold should be elected by a substantial vote of the Spanish Córtes.

July 2. Through misunderstanding, the Spanish Córtes was adjourned before a vote was taken The secret leaked out and created a wave of consternation in France, fanned by the French foreign minister, Duke of Gramont.

July 6. Gramont made a famous speech in the French Chamber indicating war unless the Prussian government withdrew the candidacy. The Prussian government, however, disclaimed all knowledge of the affair, which it insisted on describing as a family matter.

July 9, 11. The French ambassador, **Count Benedetti,** having followed King William to Ems, where he was taking a cure, asked that he order Leopold to withdraw The king refused, but sent a secret emissary to advise Leopold to that effect.

July 12. Prince Charles Anthony, father of Leopold, withdrew the candidacy in behalf of his son, who was absent in the Alps. Not content with this diplomatic victory, Gramont and the French government now proceeded to demand satisfaction and guaranties from King William (he was to write Napoleon a letter of apology, officially disavow the candidacy, and promise that it would never be renewed).

July 13. At a famous **interview at Ems,** the king rejected Benedetti's demands and repulsed all efforts of the ambassador to continue the discussion. On the same day Bismarck met with Roon and

Moltke in Berlin On receiving a report of the happening at Ems, he revised it for publication, giving it a brusque quality and conveying the impression that the negotiations at Ems had ended in what was tantamount to the rupture of relations. The importance of the **Ems telegram** has probably been exaggerated, for it is now clear that the French court (with the possible exception of Napoleon himself) was determined on a humiliation of Prussia, even at the cost of war

July 15. The French took the decision for war, relying on the preparedness of the army and on the support of Austria and Italy

July 19. France declared war on Prussia.

1870-1871. THE FRANCO-GERMAN WAR. Bismarck had at once the armed support of the South German states and the benevolent neutrality of Russia The war party in Vienna was a threat which would become serious in case of Prussian defeats In England Gladstone was interested only in the preservation of **Belgian neutrality,** reassured in new treaties with France and Prussia (Aug 9)

Three German armies invaded France **General Steinmetz** from the Moselle, **Prince Frederick Charles** from the Palatinate on Metz, **Crown Prince Frederick** from the upper Rhine on Strasbourg A French army advanced into the Saar, won a minor victory at Saarbrucken Then the German avalanche began

Aug. 4, 6. The crown prince won victories over Marshal MacMahon at **Worth** and **Weissenburg,** forced him to evacuate Alsace, invested Strasbourg, advanced on Nancy **Marshal Bazaine** was soon shut up in Metz by the other two German armies

Aug. 16, 18. In bloody battles at **Mars-la-Tour** and **Gravelotte** Bazaine's attempts to break through the Prussian lines were repulsed Metz was besieged, the advance on Châlons begun. When MacMahon attempted to relieve Bazaine at Metz, he found the road closed, and was decisively defeated in the

Sept. 1. Battle of Sedan. The army, with the Emperor Napoleon himself, capitulated the following day. (For the siege of Paris and remaining events of the war, see p. 636)

1871, Jan. 18. FOUNDATION OF THE GERMAN EMPIRE. During the war German public opinion demanded the union of North and South Germany. Bismarck negotiated separately with each state, making essential concessions. By the end of November treaties had been signed with all. On Dec. 2, King Ludwig II of Bavaria addressed a letter to King William (drafted by Bismarck at Ludwig's invitation) inviting him to assume the imperial title The king was averse to having the Prussian title subordinated to that of the empire, but yielded to the general wish

1871, Jan. 18. William I was proclaimed German Emperor in the Hall of Mirrors at Versailles The constitution of the North German Confederation was then remodeled in terms of the agreements reached with the various states and was adopted (Apr 14) by a freshly elected *Reichstag*, representative of the new empire. The new *Reich* included 25 states — four kingdoms (Prussia, Bavaria, Saxony, Wurttemberg), five grand duchies, 13 duchies and principalities; three free cities (Hamburg, Bremen, Lubeck) **Alsace-Lorraine** (annexed as a result of the war) was designated *Reichsland*, given an imperial governor (*Statthalter*), and made the common property of all the German states

g. THE GERMAN EMPIRE, 1871-1914

1871-1883. The *Kulturkampf* As chancellor of the new German Empire, Bismarck's first struggle was with the Catholic Church in the so-called *Kulturkampf*, from the words used by Rudolf Virchow in the Prussian Diet (1873, Jan 17) "The contest has taken on the character of a great cultural struggle (*Kulturkampf*)" The conflict grew out of the coincident expansion of papal pretensions and German power the promulgation of the **dogma of papal infallibility** (p 664), implying the extension of papal pretensions to defend the Church against encroachments of the state, came just at the time of the creation of the German Empire, determined to subordinate all groups within the state to its sovereign power

German bishops and the vast majority of lay Catholics promptly accepted the dogma of papal infallibility, despite the resistance of the liberal group (*Old Catholics*)

1871, Mar. Heterogeneous Catholic elements organized the **Center Party** during the first elections to the imperial *Reichstag* to defend Catholic interests — leader, **Ludwig Windthorst** (1812–1891) In general, the Center Party represented particularist Catholic interests in opposition to the pretensions of Protestant Prussia hence it was anti-imperial When, of all parties in the *Reichstag*, only the National Liberals supported the new state, the anti-imperial attitude of the Center irritated and

alarmed Bismarck Hence the Prussian government supported Catholic teachers in state schools who refused to accept the dogma of papal infallibility, and

July 8. Abolished the Roman Catholic **department for spiritual affairs** (recognized by the constitution of 1850) "Have no fear — to Canossa we shall not go, either in body or spirit," declared Bismarck to the *Reichstag* (1872, May 14).

1872, June 25. An imperial law permitted the **expulsion of the Jesuits;** the Jesuit organization was dissolved, the Jesuits expelled from Germany

1873, May. The May Laws or Falk Laws. Dr Adalbert Falk, Prussian minister of public worship, was responsible for four drastic measures (1) making it a punishable offense for servants of the Church to impose penalties in matters not of a religious character, (2) placing education of the clergy under state supervision and giving the Government a right of veto on all clerical appointments, (3) facilitating secession from the Church for those who wished to leave it, (4) subjecting ecclesiastical discipline of the Catholic clergy to state control The struggle rapidly became embittered

1875, Feb. 6 Civil **marriage was made obligatory** for the empire A papal letter to Prussian bishops at the same time declared null and void all Prussian laws which denied and sought to undermine the divine sanction and authority of the Church Publication of this letter was forbidden by the Prussian government

Apr. 6. The Prussian Diet passed the **Breadbasket Bill,** suspending all grants to the Church in sees whose clergy refused obedience to Prussian laws

May 8 Religious **orders** and congregations, with the exception of those engaged in nursing the sick, were dissolved

May. The **war scare,** an acute crisis in the relations of Germany and France (p 733)

May. SOCIALIST CONGRESS AT GOTHA. Adoption of the Gotha program and formation of the **Socialist Workingmen's Party** The growth of socialism was the result of the rapid industrial development of Germany and the conversion of the working classes to political action **Ferdinand Lassalle** (1825–1864), son of a prosperous merchant, was the founder of German social democracy In lectures on the "Workers' Program" (1862) he insisted on the importance of universal suffrage as a means of obtaining state help for producers' co-operative societies He opposed all violence. In May 1863 he organized the **Universal German Workingmen's Association,** of which he became president, with almost dictatorial power It numbered fewer than 5000 members at the time of Lassalle's death in a duel (Aug. 31, 1864) Leadership soon passed to the **Marxian Socialists.** After the organization of the International Workingmen's Association (the **First International**) at London in 1864, Karl Marx (p 550) sent **Wilhelm Liebknecht** (1826–1900) to Germany to organize labor along Marxian lines Expelled from Prussia, Liebknecht took refuge in Saxony, where he met **August Bebel** (1840–1913), a woodturner of Catholic family and originally of monarchist sympathies Liebknecht won Bebel to the cause and he became the outstanding parliamentary leader of the movement At the **Eisenach Congress** of representatives of workingmen's associations (Aug 1869) the Marxians had a majority and formed the **Social Democratic Workingmen's Party,** devoted to political action Liebknecht and Bebel, the only two Socialist members of the North German *Reichstag,* withheld their votes when war credits were granted in July 1870 and joined the Lassalleans in voting (Sept 1870) against the continuation of a war which they regarded as no longer defensive Bismarck's attacks upon both groups drove them into union At the **Gotha Congress** (1875) they united on an essentially Lassallean program, which Marx bitterly criticized

1876, Jan Opening of the Imperial Bank (*Reichsbank*), an institution which was to play a major part in the economic development of the country

1878, May 11. Attempt on the life of the emperor by **Emil Hodel,** a deranged radical Bismarck's proposal for repressive legislation rejected by the *Reichstag* (May 24)

June 27. Another attempt on the emperor's life by **Dr. Karl Nobiling,** an educated radical The emperor was badly wounded.

June 13-July 13. The Congress of Berlin (p 736)

July 30. In the elections for the *Reichstag* the Conservatives made substantial gains at the expense of the National Liberals

Oct. 18. PASSAGE OF THE ANTI-SOCIALIST LAW, renewed at intervals until 1890 The electoral campaign was waged largely on the question of repressing socialism, though neither of the would-be assassins of the emperor was

a socialist The law prohibited meetings, publications, and collections of money which by "means of social democratic, socialistic or communistic designs, aim at the overthrow of the existing order of state or society" Rigorous measures were provided for its execution, though the Reichstag steadfastly refused (Mar 7, 1879) to gag debate in parliament or to interfere with the Socialist deputies In the next 12 years socialism was driven underground

1878-1879. Negotiations with the papacy for the cessation of the *Kulturkampf* By this time half the bishops in Germany had been displaced and many of them had fled abroad Hundreds of clerics had been removed and many imprisoned, yet the fight continued as obstinately as ever In 1878 Pius IX died and was succeeded by Leo XIII, a much more diplomatic pope, who at once opened negotiations with the German government He demanded the abrogation of the May Laws, but Bismarck would agree to nothing more than administrative dilution of the laws, and only with the proviso that the pope would guarantee pre-notification of clerical appointments to the government (carrying the right of the government to object) This proposal was rejected by Rome.

1879, June 30 Resignation of Falk, the minister officially connected with the policy. Bismarck, satisfied by this time that he had overrated the danger from organized Catholicism and requiring the support of the Center Party for his new tariff program, began to introduce ameliorative measures on his own initiative Repressive laws were abrogated or neglected over a period of years until by 1883 the *Kulturkampf* may be said to have come to an end

July 13 The new (protective) **TARIFF LAW.** Thus far Germany had been following a policy of free trade, which was supported by the National Liberals, though opposed by the landholding Conservative groups But German industry was hard hit by the **financial crisis of 1873** and the ensuing depression, as well as by the **crisis in agriculture** produced by foreign competition Both the industrialists and the landowners began to inveigh against free trade The government itself was influenced to return to protection because, depending upon customs and excise duties for its income, it found itself in perennial need of funds. The new tariff gave protection to both industry and agriculture. It was supported by the Conservatives, who gave up their earlier opposition to the empire and became supporters of the government, by the Catholic Center and by part of the National Liberals, representing industry The Liberal Party split for a second time, the dissidents going over to the Progressive Party

In the decades following the introduction of protection, German industry underwent a phenomenal development comparable to that of the United States Possessed of vast supplies of coal and very extensive iron deposits, German industry was able to meet competitors Between 1860 and 1913 pig-iron production grew from 529,000 metric tons to 19,309,000: Germany passed France and England as producers and was second only to the United States on the eve of the war She occupied the same position as a producer of steel Railway mileage grew from 18,887 kilometers (1870) to 61,749 (1914), the merchant marine from 980,000 tons (1870) to 5,450,000 (1914), placing the Germans third after Great Britain and the United States Foreign trade grew with similar rapidity, doubled between 1902 and 1913, at the latter date Germany was close on the heels of England for first place With the development of industry, the German social scene rapidly changed from 1882 to 1907 the number of persons employed in and dependent upon industry rose from 16,058,080 to 26,386,537, while the total number dependent on agriculture decreased more than a million and a half. Urbanization was equally striking 8,600,000 persons lived in cities of 20,000 or more (1885), representing 18 4% of the population, by 1910 this number had increased to 22,400,000, 34 5% of the population

1879, Oct. 7. Signature of the alliance between **Germany and Austria,** the foundation of the **Bismarckian alliance system** (p 736)

1881, June 18. Conclusion of the **Three Emperors' League** (Germany, Austria, and Russia, p 737) Renewed, 1884, for three years

1882, May 20. Conclusion of the Triple Alliance (Germany, Austria, Italy, p 738)

1883, May. Sickness Insurance Law, the first of Bismarck's great measures of "state socialism" by which he hoped to wean the workers from socialism The law insured workers during sickness, the costs to be paid two-thirds by the workers, one-third by employers This measure was followed by the **Accident Insurance Law** (June 1884), paid for entirely by the employers and extended to practically all wage-earning groups; the **Old-Age and Invalidity Insurance Law** (May 1889), of which the costs were divided between the

employers and workers, with state contributions to pensions

1883-1885. Foundation of the German colonial empire. Friction with England (p 738).

1886, Dec.—1887, Mar. Parliamentary conflict over an **army bill**, the Liberal parties making an effort to secure control over appropriations After elections the government, through the intervention of the pope, secured the support of the Center Party and won its point.

1887, Apr. The Schnaebele affair, marking the height of tension in Franco-German relations and in European affairs generally. Renewal of the Triple Alliance, conclusion of the **Reinsurance Treaty** with Russia, formation of the **Mediterranean Coalition** (p 740).

1888, Mar. 9-June 15. FREDERICK III (b. 1831) who succeeded on the death of William I.

1888-1918. WILLIAM II (1859–1941), who followed on the death of his father, Frederick III, of cancer of the throat. The young emperor, intelligent, charming, idealistic, but impulsive and headstrong, soon evinced the desire to rule the state himself. He showed sympathy for the workers and was called the *Labor Emperor*

1890, Jan. After two readings of a bill to prolong the anti-socialist law it was rumored that the emperor had changed his mind and favored a policy of mildness. The bill was lost, but it opened a rift between the chancellor and the emperor, which was widened when the latter proposed (Feb) an international conference on labor questions, opposed by Bismarck as a further weak concession to the Socialists. The emperor wished to set aside the right of the chancellor to be present at interviews of the emperor and ministers. On Russo-German policy the two differed basically (p. 741). The fundamental question was who should rule the empire — the emperor or Bismarck? After further irritating incidents, Bismarck was ordered to "ask permission to resign," but refused

Mar. 18. RESIGNATION OF BISMARCK, on imperial command. He was made Duke of Lauenburg, but unceremoniously "ejected" from the chancery palace

1890-1894 Chancellorship of General Georg Leo von Caprivi (1831–1899), able soldier, sober and capable administrator, but without political experience, chosen to carry out the emperor's wishes. The emperor hoped through social legislation to win the workers from socialism

July 29. Industrial courts were set up to adjust wage disputes Weekday employment of women and children was restricted, Sunday rest made obligatory for all workers

1891, June 1 Factory inspection was made more efficient Workers were given the right to form committees to negotiate with employers on conditions of employment.

1892, Mar 26. A labor department was formed in the imperial statistical office, to bring the whole province of labor under more complete survey But the emperor's hopes of winning the workers from socialism were disappointed Socialism spread rapidly after the repeal of the anti-socialist legislation and attracted much non-socialist, liberal support In the elections of 1890 the Socialists returned 35 deputies to the *Reichstag* At the **Erfurt Congress** (1891) the party adopted a more strictly Marxian program

1892-1894. The Caprivi commercial treaties, with Austria, Italy, Switzerland, Spain, Serbia, Rumania, Belgium, and ultimately Russia (1894). They substantially reduced agricultural duties, thereby relieving the prices on foods (seriously high in 1891–1892) and laying the basis for the expansion of German trade in industrial products in the treaty countries These treaties recognized the preponderance of German industry over agriculture and drew upon Caprivi's head the wrath of the landowners, who organized (1894) the **Agrarian League** (*Bund der Landwirte*), with which the older German **Peasants' League** (*Deutscher Bauernbund*) amalgamated The Agrarian League wrung numerous concessions to agriculture from the government and came more and more to serve as a spearhead for conservatism in the political sense

1894, Oct. 26. Resignation of Caprivi, who had estranged not only the agrarians, but the Center (through his failure to carry the **Prussian School Bill** in 1890), the colonialists (through the **East Africa Agreement** with England, 1890, p. 741), and the militarists (through the **reduction of the term of service in the infantry** from three to two years, 1893). Caprivi was also harassed by the independence and unexpected initiatives of the emperor, with whom he found it increasingly difficult to work.

1894-1900. Chancellorship of Prince Chlodwig zu Hohenlohe-Schillingsfurst (1819–1901), former Bavarian statesman, diplomat, governor of Alsace-Lorraine, *grand seigneur*, now in his old age

and little inclined to oppose openly the will and vagaries of the emperor.

1895, June. Opening of the **Kiel Canal** from the North Sea to the Baltic.

1896, Jan. 3. The **Kruger telegram** episode, marking the first violent outbreak of popular hostility between Germany and England (p. 744).

July 1. The **Civil Code** (in process of elaboration since 1871) was enacted, to come into effect Jan 1, 1900.

1897, Nov. German occupation of **Kiao-Chow**, on the Chinese coast (pp 746, 882).

1898, Mar. 28 Passage of the **first German Navy Law**, through the efforts of **Admiral Alfred von Tirpitz**, minister of marine since 1897 It marked the beginning of German naval expansion and the gradual emergence of friction with England on this score.

Nov. 27. Preliminary concession for the **Baghdad Railway** secured by the *Deutsche Bank*, marking active German expansion in the Near East and the development of friction with England and Russia (p 749)

1899, Dec. 7. A law permitting the **federation of societies** of all kinds This was Hohenlohe's reply to Liberal and Socialist agitation for broadening of the association laws.

1900, Oct. 16. **Hohenlohe resigned.**

1900-1909. **Chancellorship of Count** (later Prince) **Bernhard von Bulow**, diplomat, who had been foreign minister and intimate adviser of the emperor since June 1897 Bulow was a man of brilliant parts, an accomplished *causeur* and orator and a finished manipulator of men, but he lacked Bismarck's seriousness of purpose, strength of character and breadth of view. His tenure of office was marked primarily by major issues in foreign and colonial policy (p. 746) In domestic policy the chief developments were the extension of social insurance.

1900. **Accident insurance** was extended to new occupations. The **Old-Age and Invalidity Law** had already been amended (June 1899) to increase old age and invalid pensions and extend compulsory insurance to various new groups.

June 11. Prussia enacted a law empowering local authorities to remove children from their homes if they were in danger of demoralization and place them in institutions — a law much criticized as invading parental rights.

June 12. **The second German Naval Law**, providing for a 17-year building program and the construction of a high-seas fleet which would be second only to that of England. Tirpitz' idea of risk — Germany to have a navy so strong that even the strongest naval power would hesitate before attacking it

1902, Dec. 14. **The new Tariff Law**, enacted on the expiration of the Caprivi treaties. It restored the higher duty of agricultural products and was the reflection of the power of the Agrarian League. The Conservatives supported the naval policy (advocated especially by big business interests) in return for adequate protection in their own lines

1903, Apr. 30. **The Sickness Insurance Law** amended to give longer and more generous help to workers in ill health (26 weeks instead of 13)

1905-1906. **The first Moroccan crisis** (p 753).

1906, Dec. **Parliamentary crisis.** The Center Party, which had held the balance since 1890 and had extracted many favors from the government, turned against the administration, defeated a bill for the reorganization of the colonial office and refused funds for military operations against the Hereros in Southwest Africa (in revolt since 1904) The Reichstag was dissolved and Bulow called on the Conservatives, National Liberals, and Progressives to subordinate party to national interests, to combat the Center and the Socialists In the elections the Socialists suffered heavily and the government was able to form a coalition of parties in its support

1906-1910. **Dr. Bernhard Dernburg**, minister for the colonies He studied British methods of administration, revolutionized the German system and made sweeping changes in favor of the natives

1908, Dec. 9. **A law restricted hours of factory work** by young people and women (no children under 13 to be employed, 6-hour day for children 13–14, 10-hour day for those 14–16, etc)

Nov. ***The Daily Telegraph* episode**, resulting from the publication in an English paper of an interview with the emperor on Anglo-German relations The emperor pictured the German people as hostile to England, while he was friendly. The affair created a furor in the *Reichstag* and a widespread demand for some check on the emperor's power. Bulow, who was responsible, directly or indirectly, for the publication of the interview, defended the emperor but weakly.

1909, July 14. **Bülow resigned.**

1909-1917. **Chancellorship of Dr. Theobald von Bethmann-Hollweg.** Beth-

mann had won a high reputation as minister for the interior He was a typical bureaucrat of the best type, sound, industrious, honest, well-intentioned, but lacking in imagination and brilliance

1910. Religious affairs A violent controversy had developed from the papal encyclical *De pascendi dominici gregis* (1907, Sept 18), directed against "modernist" heresies and requiring priests and teachers of the Church to take an oath against modernism This seemed to threaten again an invasion of the state province of education But the pope promised (in a letter to the German prelacy, 1910, Feb 1) that the oath would be restricted to priest-professors and would not be required of professors engaged in purely lay functions Protestant sentiment had also been aroused by the encyclical *Editio saepe* (1910, May 26) which referred in scathing terms to the Reformation and association of certain German princes with it. In reply to a tactful remonstrance from the Prussian government, the pope denied (June 11) any intention of wounding Protestant susceptibilities and decided that the encyclical should not be circulated in Germany

1910, Nov.—1911, Aug. The Potsdam Agreement between Germany and Russia concerning their interests in the Near East (p 757)

1911, May 26. A law was passed organizing **Alsace and Lorraine as a state,** with a two-chamber legislature and a large measure of autonomy

May 30. The Imperial Insurance Code consolidated all previous workers' insurance laws and amended and extended their provisions Certain groups of white-collar workers were insured against sickness, old age, and death, by a separate and simultaneous law

July 1. Mission of the gunboat *Panther* to Agadir, thereby precipitating the **second Moroccan crisis** (p 757).

1912, Jan. Elections to the Reichstag. The Socialists polled 4,250,000 votes and, with 110 deputies, became the strongest party in the Reichstag By this time the movement had become much modified through the "revisionist" tendency introduced by **Eduard Bernstein** (1850–1932). The revisionists sought to divert interest from the "ultimate goal" of socialism and to fasten attention on the importance of gradual advancement, through parliamentary reforms, toward a new social world This theory was denounced as a heresy at the **Lubeck Congress** (1901, especially by **Karl Kautsky** and **Rosa Luxemburg**), but it nevertheless colored the outlook of the party, which was further influenced by the rapid progress of the trade-union movement, dominated by moderate views After the serious setback of the Socialists in the election of 1907, revisionism became more and more generally accepted The party began to take an active part in work for social reform and collaborated with the Progressives in organizing the *Reichstag* in 1912 In 1914 the Social Democrats voted for the war credits, defending their action as necessary for the defense of the fatherland against autocratic Russia

Feb. Visit of Lord Haldane to Berlin. Abortive attempt to effect a naval agreement between England and Germany (p 758).

1913, June 30. The Army and Finance Bills. In the midst of the tension which preceded the outbreak of the World War, the government had little difficulty in securing the passage of its army bills. But all previous bills were eclipsed by the bill of 1913, providing for the addition of 4000 officers, 15,000 non-commissioned officers, 117,000 men, as part of a program to increase the peacetime strength of the army from 544,000 to 870,000 men. The Socialists, Poles, and Alsatians voted against it, but all other parties supported the government, and the bill passed. The cost of the measure was estimated at one billion marks, of which 435,000,000 was to fall due in 1913. In the **Finance Law** there was provision for a special national defense tax (*Wehrsteuer*), to be levied only once on real and personal property and income. The incidence was to be on the well-to-do classes, as a concession to the Socialists and other radicals the Socialists therefore voted the funds, though they had voted against the military measures for which the funds were intended

1913, Dec. The Zabern affair, resulting from the action of a German officer in striking and wounding a lame cobbler with his sword and insulting Alsatian recruits The incident created much excitement and embittered Franco-German relations (*Cont. pp* 912 *ff*, 995)

h. AUSTRIA-HUNGARY, 1867-1914

The task of the Emperor Francis Joseph was to make the dualist system work. In law he ruled through responsible ministries in both Austria and Hungary, but in fact little could be done in either state without affecting "common concerns" and in these

the emperor-king was able to make his will felt. In foreign affairs and military questions he enjoyed far-reaching powers The foreign minister was offically responsible to the delegations, but in practice it was almost impossible not to endorse his policy so long as he enjoyed the confidence of the emperor.

(1) *Austria*, 1867-1914

1867, Dec. 21. Four **fundamental laws** of a liberal character reformed the February Patent (p 678) and became the **Constitution of 1867.** This was a concession aimed to win the approval of the German Liberals for the compromise with Hungary

1867, Dec.—1870, Jan. Ministry of Count Auersperg, representing the German Liberals, who were a minority of all the Germans (these in turn constituting hardly more than a third of the total population) The Liberals were determined to maintain administrative centralization and oppose the federalist pretensions of the Slavs Once in power they passed a number of anti-clerical measures

1868, May 25 Civil marriage was restored

1870, July 30. The concordat with the papacy (of 1855) was suspended as a reply to the promulgation of the dogma of papal infallibility

1871, Feb.-Oct. 25. Ministry of Count Hohenwart, representing the federalist groups. The Czechs and other Slavs had protested vigorously against the compromise, had boycotted the parliament and had demanded local autonomy When hopes of recovery of the Austrian position in Germany had disappeared, the emperor, who distrusted the anti-clericalism of the German Liberals, turned to these opposition groups Hohenwart prepared a scheme to meet the demands of the Czechs, to whom far-reaching promises were made

Sept. 12. The Bohemian Diet went further, and demanded a position in Austria similar to that of Hungary in the Dual Monarchy. This was opposed by the Hungarians as endangering the "unity" of the empire, and was rejected by the emperor. Hohenwart was obliged to resign.

1871, Nov.—1878. Second ministry of Count Auersperg and the German Liberals The position of the ministry was unstable after the financial crisis of 1873, when a number of leading Liberals and even ministers were discredited by speculation. The Liberal group rapidly dissolved into conflicting factions.

1875-1878. Acute Near-Eastern crisis, arising from the insurrection in Bosnia-Herzegovina and the war of Russia against Turkey (p. 734)

1878, June-July. The Austrian government, by European mandate, was given the right to occupy **Bosnia and Herzegovina,** which were put under the administration of the ministry of common finance The step aroused much opposition among both Germans and Magyars, who disliked the annexation of more Slavs In the provinces a serious revolt broke out (1882), which was not suppressed until Oct

1879, Aug.—1893, Oct. 29. Ministry of Count Taaffe, a boyhood friend of the emperor. Faced by the opposition of the German Liberals, Taaffe was obliged to rule with a coalition of Czechs, Poles, and German Conservatives and Clericals (the *Iron Ring*), which in turn extracted from him numerous concessions (language rights, etc)

In the face of a rising **labor movement,** Taaffe adopted a policy much like that of Bismarck Socialism was repressed with great severity, but the government passed legislation providing protection for workers, shortening of the working day, measures of insurance, etc

1879, Oct. 7. Signature of the **Austrian Alliance with Germany** (p 736).

1881, June 18. Austria-Hungary joined Germany and Russia in the **Three Emperors' Alliance** (p 737)

1882, May 20. Austria joined Germany and Italy in the **Triple Alliance** (p 738)

1885-1888. Acute tension between Austria and Russia resulting from the development of the **Bulgarian problem.** Non-renewal of the Three Emperors' Alliance (1887), renewal of the Triple Alliance (1887), and conclusion of the Mediterranean Agreements with England and Italy (Feb., Dec. 1887, see p 740).

1889, Jan. 30. Suicide of Archduke Rudolf, only son of Francis Joseph and heir to the throne, at Mayerling The Archduke Francis Ferdinand (1863-1914), nephew of the emperor, became heir.

1893, Oct. 29. Resignation of Count Taaffe, due to the breakdown of his governing coalition The opposition of the Germans, who had formed a nationalist group, and the rise of the **Young Czechs** (more radical than their predecessors) had rendered his policy of muddling along impossible. Taaffe had tried to solve the problem by introducing a bill providing for **universal manhood suffrage** (1893, Oct 10),

hoping thereby to counteract the nationalist agitation with the weight of socialism The bill was rejected by Conservatives and Liberals of all stamps.

1895, Sept.—1897, Nov. Ministry of Count Casimir Badeni, a Polish landlord He attempted to solve the nationality problem by conciliating the Czechs.

1897, Apr 5 The Badeni Language Ordinances, establishing parity between German and the local language in a given district

1897, Apr. Austro-Russian Agreement to maintain the *status quo* in the Balkans (p 728)

Nov. 28. Badeni was forced to resign as a result of violent German agitation against his language ordinances and hot debate on the decennial renewal of the economic arrangements with Hungary There followed a period of acute constitutional crisis, which brought the monarchy to the verge of dissolution and made parliamentary government utterly impossible

1898, Mar. New laws divided Bohemia into a Czech, a German, and a mixed linguistic district, but this effort at compromise satisfied no one On Oct 14, 1899, the original arrangements were restored, despite objection and obstruction from the Czechs, who engaged in widespread disorders

1898, Sept. 10. Assassination of the Empress Elizabeth at Geneva, by the Italian anarchist, Luigi Luccheni

1900, Jan.—1904, Dec. Ministry of Ernst von Korber, an able bureaucrat, who governed with a ministry of officials, chiefly by decree His efforts to effect a compromise on the language question proved as fruitless as those of his predecessors

1907, Jan. 26. Law introducing **universal, equal, and direct suffrage** for parliamentary elections. This subject had been hotly debated for years and was vigorously demanded by the Socialists. The effect of it was to stress social stratification and interests, though the nationality problem remained an open sore

The ministries from 1907 to 1914 were for the most part non-parliamentary (i e. lacked a parliamentary majority), ruling by decree and making concessions to particular groups to secure support for particular measures.

1908, Oct. 6. Annexation of Bosnia and Herzegovina by decree This ushered in the acute **Bosnian annexation crisis** and a period of tension in Austro-Russian relations that lasted until the World War (p. 756)

1912-1913. The Balkan wars (p 759 *f*) The victories of Serbia and Austrian efforts to block Serbian expansion led to a marked growth of Yugoslav agitation and to a revival of Slavic activity within the monarchy.

1914, June 28 Assassination of the Archduke Francis Ferdinand at Sarajevo He was known to be hostile to the Magyar pretensions and favorably disposed toward a reorganization of the monarchy along "trialistic" lines, i e. giving the Slavic elements a position on a par with that of Germans and Magyars.

(*Cont. pp.* 914 *ff*, 1005)

(2) *Hungary*, 1867-1914

1867, Feb. 17. The Constitution of 1848 was restored in Hungary A ministry was formed under **Count Julius Andrássy,** remaining in power until Nov., 1871.

June 8. Francis Joseph crowned King of Hungary at Budapest

1868, May 4. In face of opposition from the Independence party, Andrássy's government agreed to the establishment of a common army for the Dual Monarchy, with German the language of command.

Sept. The king agreed to the **reunion of Croatia** with Hungary (separated since 1848) Despite opposition from military circles, the king also permitted **abolition of the military frontier province** (*Militargrenze*), adjacent to the southern boundary of Hungary, which had been administered for two centuries by the Austrian war office as a safety zone against the Turks It was now incorporated with Croatia

1875, Feb. Formation of the Liberal Party by Kálmán Tisza (1830–1902). It was composed of the larger part of the Independence Party, which had fought the Compromise of 1867, and the larger part of the Deák Party, which had disintegrated

Aug The elections gave the new party a great majority

1875, Oct. 20—1890, Mar. 7. Ministry of Kálmán Tisza. Accepting the compromise, Tisza devoted his energies to strengthening the Magyar position in Hungary, notably by various school and language regulations designed to Magyarize the new generation among the subject nationalities.

1876, Jan. 28. Death of Francis Deák.

1894, Mar. 20. Death of Louis Kossuth, at Turin. In the previous decade there had been a marked revival of the Independence Party, the leadership of which was assumed by Kossuth's son, Francis. This party kept stressing the weaknesses of the compromise and demanding fuller independence for Hungary. Economic differences between industrial Austria and agrarian Hungary served to sharpen the tension, as demonstrated in the heated arguments over the renewal of the economic compromise in 1897

1903. The dispute reached the acute phase in the **struggle over the army,** the Magyars resenting the unified system An increase in the number of recruits was vigorously opposed by the Independence Party, which insisted on the use of Magyar insignia in the Hungarian regiments and the substitution of Magyar for German as the language of command This the king flatly refused to consider

Sept 16. In a proclamation to the army, Francis Joseph declared that he would "never yield the rights and duties guaranteed to its supreme commander," and that he would maintain the army, common and unified, at all costs This declaration raised a storm in Hungary

Oct. 26—1905, Feb. 1. Ministry of Count Stephen Tisza (1861–1918), son of Kálmán Tisza

1904. Mar. 11. Tisza secured the passage of the recruits bill after he had threatened drastic measures (*guillotine bill*) to deal with parliamentary obstruction.

1905, Jan. In the elections Tisza and the Liberal Party, having refused to make use of the customary corruption, were completely defeated The Independents had 163 seats as against the Liberals' 152. Kossuth formed a coalition with several of the smaller parties and renewed the demand for the Magyar language of command, refusing to recognize the non-parliamentary government set up by Baron Géza Fejerváry. The crisis, which continued despite innumerable efforts to reach a compromise, dragged on until broken by the king's threat to introduce universal suffrage. This was designed to break the preponderance of the Magyars and was hotly resisted by all parties.

1906, July. The Universal Suffrage Bill was actually brought before the Hungarian parliament This brought the Independence Party to its senses The military demands were abandoned

1906-1910 Parliamentary government of Dr. Alexander Wekerlé, governing with the support of the coalition parties

1910-1913. Ministry of Count Khuen-Héderváry, in which Tisza was the dominating figure Tisza was convinced of the importance of ending the internecine struggles in Hungary and of strengthening the common army in face of European danger of war. By expending large sums of money he reorganized the old Liberal Party as the **National Party of Work,** and won an overwhelming victory in the elections of 1910 Nevertheless the Independents, again in opposition, continued obstructive tactics.

1912. Tisza, as president of the lower house, succeeded in modifying parliamentary procedure and forced through the army bill, after ejecting the opposition by force

1913, June 15—1917, May 23. Tisza prime minister, exercising far-reaching authority not only in Hungary, but in the councils of the Dual Monarchy

In Hungary, as in Austria, though to a less extent, the disintegrating forces of nationalism made themselves felt. There was constant friction with the **Croatians** (especially in 1903) which the government tried to meet by encouraging the Serb elements against the Croats In Transylvania the **Rumanian irredentist agitation** developed rapidly. The government suppressed it to the best of its ability, but thereby created much ill-feeling in Rumania proper Tisza was eager for an understanding, especially with the Rumanians, but like all Magyar statesmen, he rejected the idea of universal suffrage, which would have given the subject nationalities a voice in political affairs (they were 52% of the total population) and would at the same time have enabled the lower classes (both agrarian and industrial proletarians) to challenge the domination of the upper classes In 1914 Hungary was still essentially a feudal state, ruled by a Magyar aristocracy. (*Cont pp* 914*ff*, 1013)

D. NORTHERN AND EASTERN EUROPE

1. SCANDINAVIA

a. DENMARK

During the Napoleonic period Denmark sided with France, thereby becoming involved in war with England and Sweden (p 593) By the **Treaties of Vienna** (1815) **Denmark** abandoned **Norway** to Sweden and **Pomerania** to Prussia, receiving as compensation the little Duchy of **Lauenburg.**

1806-1839. FREDERICK VI, king The reign was devoted primarily to the work of reconstruction and recovery, especially in finance. Marked growth of **liberal and nationalist feeling,** stimulated by the Paris Revolution of 1830

1831-1834. Institution of representative government: four provincial diets established for (1) the islands, (2) Jutland; (3) Schleswig; (4) Holstein But these bodies had only deliberative and advisory powers

1839-1848. CHRISTIAN VIII (nephew of Frederick VI). Continuation of reform; improvement of the finances; development of communal self-government, prison reform, constitution granted to Iceland

1848-1863. FREDERICK VII. His reign began with a **war with the German states** resulting from the efforts of the Danish nationalists to incorporate Schleswig and Holstein with the monarchy (p 676).

1849, June 5. Promulgation of a new constitution: Denmark proper became a limited monarchy in which the king shared legislative power with a bicameral national assembly, civil liberties guaranteed Schleswig and Holstein continued to be governed in the old fashion, since an effort made in 1855 to include Schleswig in the Danish constitutional system resulted in further friction with the German powers

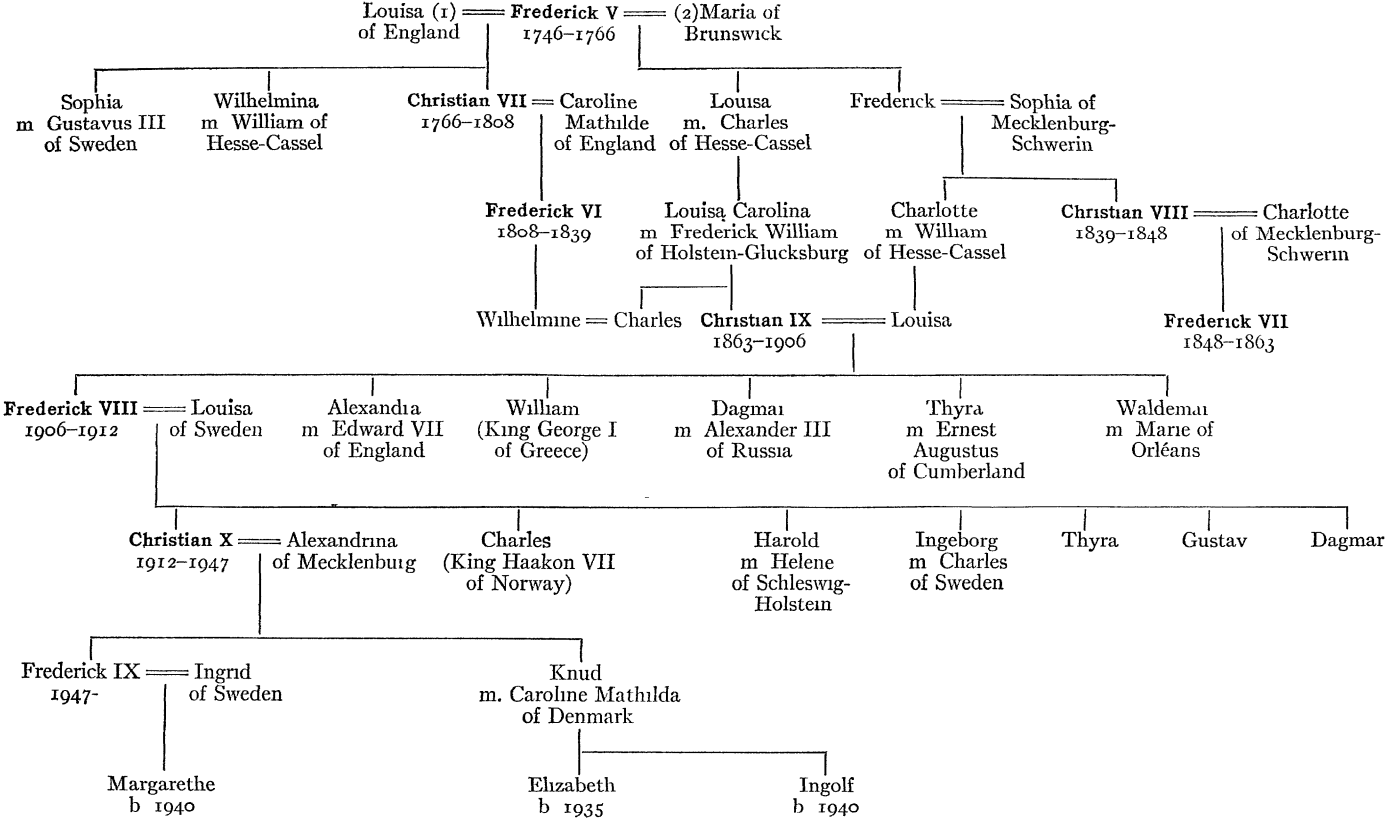
1857. Abolition of the historic Sound dues, in return for compensation

1863-1906. CHRISTIAN IX, of a collateral branch of the family.

1864. WAR AGAINST PRUSSIA AND AUSTRIA, over the two disputed duchies. The Danes had tried, by the Constitution of Nov. 13, 1863, to settle the Schleswig problem by violating promises given to Prussia and Austria in 1851 When these two powers demanded the abolition of the objectionable constitution, the Danes, relying on the support of England, Sweden, and possibly France, accepted the challenge No aid from others having been offered, the Danes were bound to lose in so unequal a struggle. By the peace settlement they had to **cede Schleswig, Holstein, and Lauenburg** to the victors, thus losing some 200,000 Danes resident in northern Schleswig

1866, July 28. Revision of the Constitution of 1849. The upper chamber (*Landsthing*) was to consist in part of members named by the king, in part of members chosen by indirect vote The upper chamber was given more extensive power at the expense of the lower (*Folkething*) ministers could govern with support of the upper chamber even in defiance of the lower This arrangement led to an acute struggle between the **Liberal Party,** aiming at parliamentary government, and the **Conservative Party,** defending the existing political order. After 1875 the Conservatives were in control for nearly two decades, under the leadership of **Jacob Estrup** (1825-1913)

The last decades of the 19th century were marked by unusual **economic and cultural development** in Denmark *Society for the Cultivation of Heaths* (1866), improvement of agriculture, expansion of dairy-farming (English market); growth of co-operative enterprise, development of industry and commerce



1891-1892. Social legislation: the **Old-Age Pension Law** and the **Health Insurance Law** passed At the same time the peasants were aided in transforming their leasehold tenancies into freeholds (by 1905 about 94% of the farms were freeholds) Continued vigorous growth of co-operatives, which greatly increased the economic well-being of the rural population.

Liberal agitation for a democratic constitution was supported (after 1880) by the new **Social Democratic Party.**

1901. Formation of a Liberal government, without, however, any constitutional change

1906-1912. FREDERICK VIII, king.

Kings of Denmark since 1746

1912- . CHRISTIAN X, king.

1914-1915. Constitutional amendments passed The suffrage was extended to all men and most women, and the age limit reduced from 30 to 25 years. The appointive seats in the upper house were abolished, and its former predominance broken. **Establishment of regular parliamentary government.** (*Cont p* 1045)

b. SWEDEN AND NORWAY

Sweden, by participating in the **War of the Third Coalition** against France (p. 591), for a time lost Pomerania, which, however, was restored in 1810 **Finland was lost** in the war with Russia (p 595) Following the deposition of Gustavus IV in 1809,

1809-1818 CHARLES XIII ascended the throne and was obliged to accept **a new constitution.** In 1810 the French marshal, **Bernadotte,** was elected crown prince under the name of Charles John. Under his lead

1812. Sweden joined Russia in the coalition against France, as a result of which

1814. Sweden acquired Norway from Denmark in return for Pomerania. Under pressure from the Norwegians, the Danes had, in 1807, granted Norway a national administration and a national university On taking over the country, the Swedes had to agree to

May 17. A new constitution for Norway, providing for a single-chamber national assembly (*Storting*) and denying the king an absolute veto or the right of dissolving parliament The Norwegians attempted to elect as their king the Danish prince, **Christian Frederick,** but after an invasion of the country by Bernadotte, they were obliged to accept him.

Nov. 4 At a meeting at Christiania, the Norway assembly declared **Norway** a free, independent, and indivisible kingdom, united with **Sweden** under one king.

1815. A special act of union was ratified by both Sweden and Norway.

1818-1844. CHARLES XIV (Bernadotte), king and founder of a new dynasty. He was a firm defender of the royal prerogative and tended to lean toward a reactionary policy. This led to a chronic **conflict between the king and the estates,** which tried to check royal absolutism.

1832. Opening of the Gota Canal, connecting the North Sea with the Baltic

1842. An elementary-school statute provided for the maintenance of at least one school in every parish.

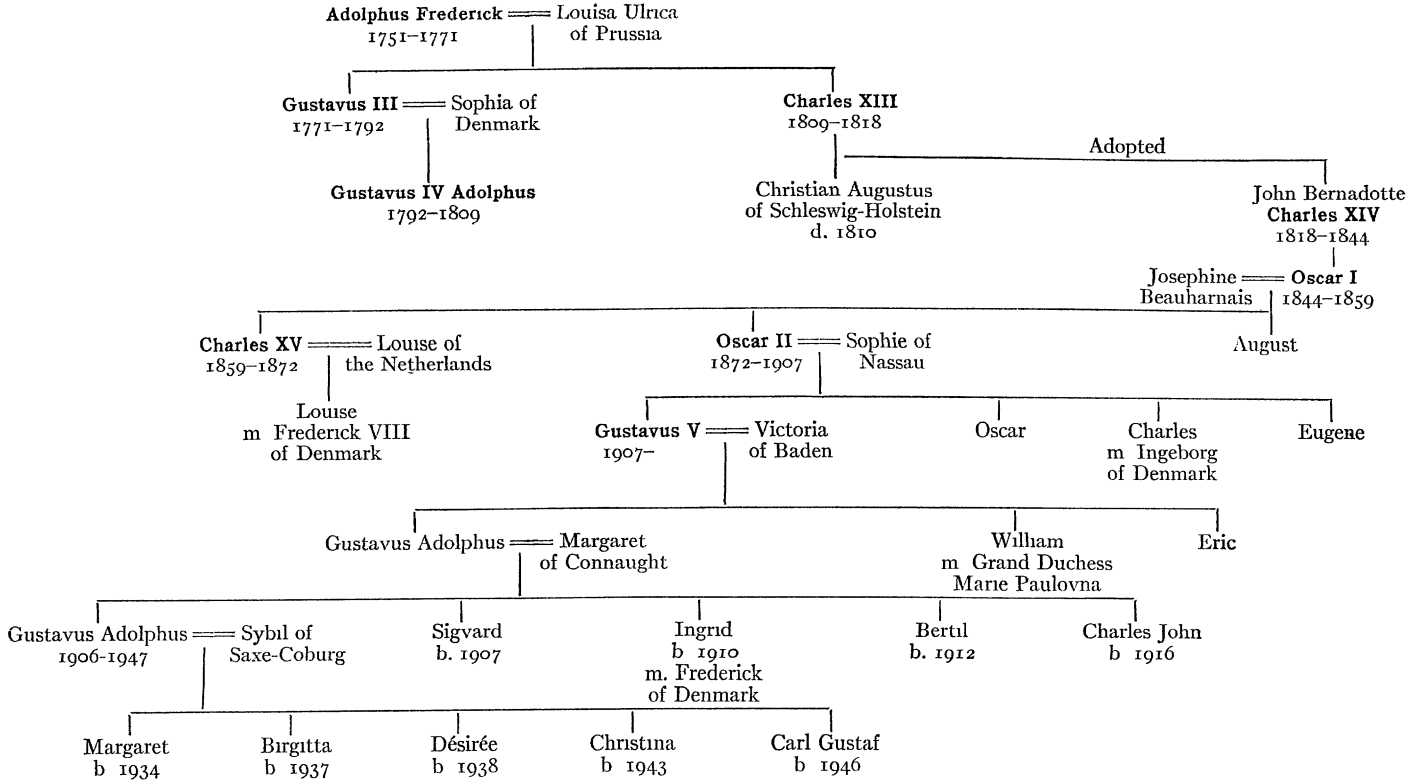
1844-1859. OSCAR I. Continued growth of Liberal opposition.

1845. The government was obliged to grant some liberal concessions (right to abrogate periodical publications abolished).

1859. Complete religious freedom established

1859-1872. CHARLES XV. Insistence of the Liberals on electoral reform finally led to

1864, Dec. 8. THE ESTABLISHMENT OF A NEW CONSTITUTION, framed by **Louis de Geer** (1818–1896), the Liberal prime minister The traditional division of the *Riksdag* into four estates was given up and a modern **bicameral parliament** was established members of the upper chamber to be elected by provincial assemblies and for a nine-year term; the lower chamber to be elected by direct popular vote, for a three-year term The franchise was still subject to property qualifications, but was wide enough to include a large part of the peasantry



GROWTH OF NORWEGIAN NATIONALISM in this period formation of the **Young Norway Party** by **Henrik Wergeland** (1808–1845), cultural and intellectual activity: **Magnus Landstad** (1802–1880) published his *Norwegian Folksongs* (1853), while **Peter Andreas Munch** (1810–1863) brought out his *History of the Norwegian Nation* (1852–1863) **Ivar Aasen** (1813–1896) wrote a Norwegian grammar and a dictionary of the folk language (1848, 1850). The great figures of the Norwegian **literary revival: Henrik Ibsen** (1828–1906), **Björnstjerne Bjornson** (1832–1910), **Jonas Lie** (1833–1908), **Alexander Kielland** (1849–1906).

1872-1907. OSCAR II (brother of Charles XV). During his long reign Sweden underwent an **economic and social transformation.** The first twenty years of the new constitutional régime were a period of agrarian domination in politics, but after 1880 the commercial and industrial classes began to come to the fore The conflict between free-traders and protectionists ended in

1888 The introduction of a protective tariff.

1889. Passage of the first factory laws (extended in 1900). In the meanwhile the industrial workers organized the **Social Democratic Party** (under **Hjalmar Branting,** 1860–1925). Development of trade-unionism and the co-operative movement Extensive **emigration to America** (between 1870 and 1914 Sweden lost about 1,500,000 inhabitants).

Kings of Sweden since 1751

1898. **Universal manhood suffrage** was introduced in Norway, where the democratic elements, led by **Johan Sverdrup** (1816–1892), dominated the *Storting* after 1884 Rapid growth of the movement for complete independence in Norway This led to a conflict with Sweden about Norway's foreign representation. The Norwegians, a great trading people, demanded a national flag and a consular service of their own These concessions the Swedish king refused to make

1905, June 7. **THE NORWEGIAN *STORTING* DECLARED THE UNION WITH SWEDEN DISSOLVED.** The decision was ratified by a popular plebiscite (Aug. 13) Finally

Sept. 24. **The Swedish *Riksdag* acquiesced,** and

Oct. 26. **The treaty of separation was signed.** Oscar II laid down the Norwegian crown and the Norwegians elected as their king Prince Charles of Denmark, who ascended the throne as

1905- **HAAKON VII,** King of Norway His reign was marked by further democratic reforms: suffrage extended to women (1907), royal veto (suspensive) abolished.

1907. **Parliamentary government** and almost universal suffrage were introduced in **Sweden.**

1907- **GUSTAVUS V,** King of Sweden Further constitutional amendments based the elections to the lower house upon real universal suffrage, combined with proportional representation. Property qualifications for election to the upper house were considerably reduced Conflict between the government and parliament over expenses for national defense led to the growth of radical opposition In the elections of 1914 the Socialists won about one-third of the seats in the lower Chamber. (*Cont. p.* 1046)

2. RUSSIA

1801-1825. **ALEXANDER I.** He had been educated by the Swiss rationalist **Laharpe,** and began his reign by granting an amnesty to political prisoners and exiles, abolishing torture, repealing the prohibition of foreign books, etc. With a group of intimate friends (the *Informal Committee*: **Czartoryski, Kochubei, Novosiltsov, Stroganov**) Alexander discussed various reforms and the project of a constitution for Russia Though the constitution was not introduced, the central government was reorganized, **modern ministries** replacing the old "colleges."

1803. A law was passed regulating the **liberation of the peasant serfs** of owners who desired to make the change This was important chiefly as the first move of the government toward abolition of serfdom. Further reforms were postponed because of the many wars in which Alexander became involved.

1804-1813. **War with Persia,** resulting from Russian annexation of the **Kingdom of Georgia.** The Russians were victorious and Persia recognized the annexation, besides ceding to Russia **Daghestan** and **Shemakha.**

1805-1812. **Russian expansion in North America.** Forts were built in Alaska (occupied by Russian pioneers in the late 18th century) and even in northern California.

1805-1807. **WAR OF THE THIRD COALITION** against France (p 591) This ended in Russia's defeat and the conclusion of the **Treaty of Tilsit,** by which Alexander and Napoleon became allies.

1806-1812. **War against Turkey** (p 592) This was hurriedly concluded in 1812 by the **Treaty of Bucharest,** which gave Russia not only **Bessarabia,** but rather extensive rights in the Danubian principalities.

1808-1809. **War with Sweden,** through which Russia acquired **Finland.** Finland was organized as an autonomous grand duchy, with the Russian tsar as grand duke Constitutional government was guaranteed the Finns by a special act.

After these wars, Alexander resumed his reform schemes, with **Michael Speransky** (1772–1839) as his chief counselor.

1810. **A council of state** was established to draft new laws and watch over the legality of administration The ministries were also reorganized and a regular system of state budgets introduced. Speransky presented a **plan for a constitution,** but it too remained unrealized Opposition of the conservatives and personal disagreement with the tsar led to Speransky's downfall and temporary exile (1812).

1812. **INVASION OF RUSSIA** by Napoleon (p. 596). Formation of the

Grand Alliance and the campaigns in Germany and France led Alexander to devote himself almost entirely to foreign affairs For his participation in the **Congress of Vienna** and his project of a **Holy Alliance**, see pp. 601, 603.

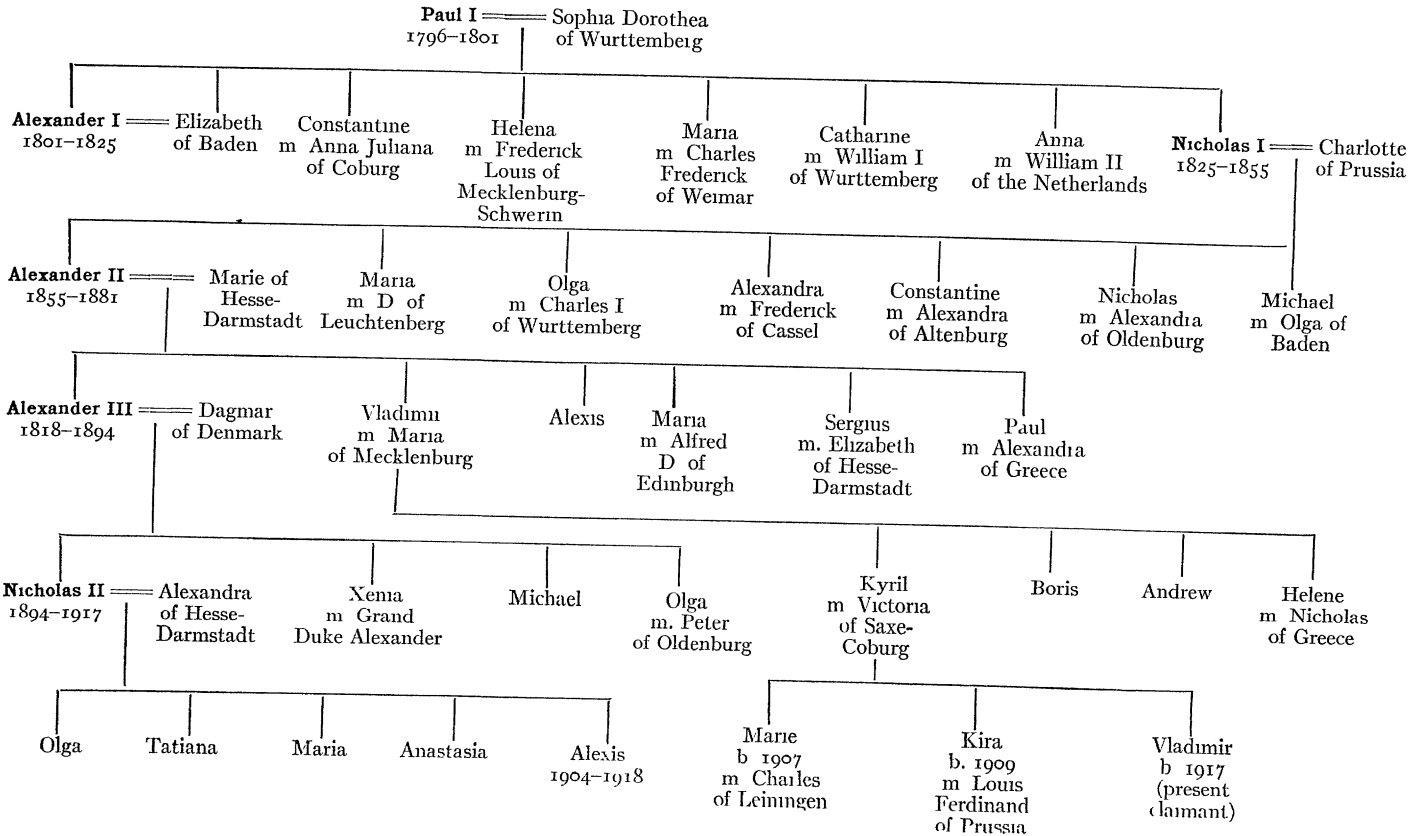
1815. By the Treaty of Vienna, Russia acquired most of the **Grand Duchy of Warsaw**, which Alexander organized as an autonomous **Kingdom of Poland**, in permanent union with the Russian Empire. The **constitution of Poland** provided for a diet, a separate administration and army, official use of the Polish language, etc Gen Zaionczek was made viceroy, and the Grand Duke Constantine became commander of the Polish army After 1820 relations of Alexander with the Poles became ever more strained, partly because of Alexander's unwillingness to abide by the constitution (failure to summon the diet), partly because the Polish nationalists advanced claims to White Russia, Lithuania, and the western Ukraine.

In **domestic affairs**, Alexander continued to discuss constitutional projects, but in practice he became more and more reactionary, as was shown by his selection of Gen. **Alexis Arakcheiev** (1769–1834) as his chief adviser This new departure led to the **growth of opposition**, more particularly among the younger army officers who had imbibed liberalism in the west After 1817 **secret societies** were formed in the army These finally took the shape of a **Northern Society** at St Petersburg (favored constitutional monarchy, abolition of serfdom, etc.), and a **Southern Society** at Kiev (republican, advocating division of land among the peasants, etc.) under the leadership of **Paul Pestel** (1793–1826)

1825, Dec. 13. Death of Alexander I in the Crimea. As he had no children the succession would normally have passed to his brother **Constantine**, but the latter had, in 1822, renounced his claims in favor of the younger brother, **Nicholas** This arrangement, however, had been kept secret and Nicholas refused to believe in it until he had secured a further renunciation from Constantine (at Warsaw) The interregnum and the general uncertainty gave an opportunity for

Dec. 26. THE DECEMBRIST RISING, a military revolt started by the Northern Society The whole affair was ill-planned and half-hearted Nicholas suppressed it the same day. Of the leaders several were executed and the rest sent into exile An attempted uprising in the south was also frustrated.

1825-1855. NICHOLAS I, a firm believer in autocracy and a determined enemy of liberalism both at home and abroad. In foreign policy he combined defense of legitimism with an attempt to secure Russia's commercial interests, especially in the east.



1826-1828. War with Persia, resulting from a Persian attack on Russian possessions in Transcaucasia. The war ended in a Russian victory and in the **Treaty of Turkmanchai**: Russia secured part of **Armenia** with Erivan, Persia recognized Russia's exclusive right to have a navy on the Caspian Sea, and granted Russia important commercial concessions

1828-1829. War against Turkey, growing out of the Greek Revolution and conflict between Russia and Turkey over the terms of the Treaty of Bucharest For the campaigns see p. 723 By the **Treaty of Adrianople** (1829) Russia secured the mouth of the Danube and the eastern coast of the Black Sea

1830-1831. THE POLISH REVOLUTION, long prepared by the Polish nationalists, but provoked by the Paris Revolution and the tsar's proposal to use the Polish army to suppress the new government in Belgium and France The Russian garrison was expelled from Poland, a revolutionary government proclaimed, the Romanov dynasty declared deposed and the union with Lithuania celebrated The Russian army, commanded first by Gen. Dibich (Diebitsch) and then by Paskievich, defeated the Poles (divided by internal dissensions between moderates and radicals) at **Ostrolenka** (May 26, 1831) and finally took Warsaw (Sept 8) The revolution collapsed and most of the Polish leaders escaped to the west, where they formed a powerful revolutionary faction, especially in Paris. **The Polish constitution was abrogated** and replaced by an **organic statute**: Poland lost its political rights and retained only a small measure of administrative autonomy Beginning of the policy of Russification in Poland.

DOMESTIC POLICY. Nicholas, while recognizing the need for reform, was sternly opposed to all independent public activity. **Growth of bureaucracy** and of the tsar's personal government Publication of a **new code of law** (1832), edited by Speransky This, with some modification, remained in force until the Revolution of 1917. Partial measures to alleviate the condition of the serfs and to limit the power of the landlords. Progress of technical education. **First Russian railroad** (St. Petersburg to Tsarskoe Selo, 1838). At the same time drastic **repression of all liberal manifestations** and tendencies, activity of the secret police (**third section** of "His

Russian Tsars (1796–1917)

Majesty's Own Chancery"); strict **censorship**; control of the universities, official championship of **orthodoxy, autocracy, and nationalism.** Despite all the repressive measures, public opinion nevertheless developed. Formation of two schools of thought: the *Westerners*, who held that Russia must follow the lead of western countries in political and social development, and the *Slavophils*, who insisted on the peculiarities of Russian culture and historical evolution, and on the need for independent development. But both groups opposed bureaucratic rule and demanded freedom of thought, abolition of serfdom, etc Beginnings of **Russian socialism** (under the influence of the Utopian socialists in France): **Alexander Herzen** (1812–1870), **Michael Bakunin** (1814–1876) The revolutions of 1848–1849 simply resulted in more thoroughgoing repression in Russia, but opposition broke through as soon as Russia began to meet with defeats in the Crimean War

1833. **The Near-Eastern crisis,** resulting from Mohammed Ali's victory over the sultan Interference of Russia and **Treaty of Unkiar Skelessi** (p. 714)

1839-1840. **Second Mohammed Ali crisis.** Russian co-operation with England. **Straits Convention,** etc. (p. 725).

1848-1849. Revolutions in central and western Europe Intervention of Russia to suppress the Hungarian revolutionary movement (p. 674).

Advance in Asia. The Russians were pressing on steadily. During the reign of Nicholas they conquered the Khirghiz Steppe and prepared for the **advance into Turkestan.** In the Far East **Nicholas Muraviev** (1809–1881) became governor-general of Siberia in 1847

1850. The Russians established a settlement at the mouth of the Amur River

1853-1856. **THE CRIMEAN WAR,** the outcome of the dispute between Russia and France over the holy places in Palestine and of Russian claims to a protectorate over the Christians in the Ottoman Empire For details of the war see p 726 *f* By the **Treaty of Paris** (1856) Russia lost control of the Danube mouth and ceded to Turkey the southern part of **Bessarabia.** Russia was obliged to accept **neutralization of the Black Sea** and to agree to build no fortifications and to keep no navy in that sea.

1855-1881. **ALEXANDER II** (the *Tsar Liberator*), whose reign was distinguished by a number of fundamental reforms, of which the most important was the liquidation of the serf problem.

1858-1860. **Advance of Russia in the Far East.** By the **Treaty of Aigun** (1858) China ceded to Russia the left bank of the Amur River, and by the **Treaty of Peking,** the Ussuri region **Foundation of Vladivostok** (1860)

1861, Mar. 3. **THE EMANCIPATION EDICT,** liberating the serfs. The subject had been discussed for years by a special committee, which collected huge masses of material from provincial bodies Temporary freedom of discussion in the press had also produced much information and difference of viewpoint. The landowners were, on the whole, ready to give the serfs freedom, but not ready to give up much of their land. At the other extreme were the radicals and socialists, who insisted that the land belonged to those who worked it. The final solution was a compromise imposed by the tsar

Terms All serfs were given **personal freedom,** together with **allotments of land** for which the owners were paid by the state in treasury bonds. The peasants in turn were to refund the treasury by installments (**redemption payments**) spread over a period of 49 years. The land was not given to individuals, but to the **village communes** (*mir*), which distributed it among the village members according to the size of the peasant family To assure equality of treatment the land was to be redistributed every 10 or 12 years The members of the commune were held jointly responsible for the redemption payments.

1863-1864 **THE SECOND POLISH REVOLUTION.** Attempts of Alexander to win the support of the Poles by a mild and liberal policy the arrangements of 1815–1830 substantially restored in 1862 This policy met with support from the Polish moderates (**Marquis Alexander Wielopolski**), but was not enough to satisfy the extreme nationalists (*reds*), who aimed at complete independence After considerable disorder the government decided to draft the malcontents (especially students) into the army This provoked the insurrection of Jan. 1863, which spread rapidly to Lithuania and White Russia The Poles having no army, most of the fighting was done by guerrilla bands. **Diplomatic intervention by England, France, and Austria** (similar but not identic protests of Apr, June, and Aug.) produced a strong **nationalist reaction in Russia,** led by the former radical journalist, **Michael Katkov** (1818–1887) The Russian government was able to ignore the protests of the western powers

because of the support and co-operation of the Prussian government (**Alvensleben Convention**, Feb. 8, 1863). But the insurrection was not finally suppressed until May, 1864, and then with great severity Polish autonomy was again abolished and Russian administration re-established, Russian language made obligatory in Polish schools; proceedings of the government against the Roman Catholic clergy; rupture of relations with the Vatican.

1864. ZEMSTVO LAW, one of the most important features of the great reforms. By the law a system of local self-government was organized local boards (*zemstvos*), on which the nobility, the townsmen, and the peasants were represented (no one class to have a majority of the seats), were empowered to levy taxes for local economic and cultural requirements (roads, bridges, schools, hospitals, etc)

1864. Reform of the judiciary: the old system of class courts was abolished and a new hierarchy of courts, on the French model, was set up, with thoroughly modernized procedure and jury trial for criminal offenses. **Justices of the peace** were provided to deal with minor civil suits, and the old **peasant courts** were retained for those who wished to use them

1867. Cession of Alaska to the United States (p 798). The Russian settlements in California had been abandoned in 1844 and the Russian government now sold Alaska itself to the American government.

1865-1876. Russian advance in central Asia. Conquest of the khanates of **Kokand, Bokhara, and Khiva,** followed by the annexation of the entire Transcaspian region in 1881. This forward policy created much friction between Russia and England, which was fearful for India.

1870. Reform of municipal government, the last of the great reform measures. The old patrician system was abolished and the towns were given self-government, under councils elected by the propertied classes.

1871, Mar. 13. Abrogation of the Black Sea clauses of the Treaty of Paris The Russian government had taken advantage of the Franco-German War (p. 688) to denounce its obligations. British protests led to the convocation of a **conference at London,** which accepted the fact, but reaffirmed the principle that international obligations cannot be abrogated without consent of all signatory powers

1874. Army reform, introducing the principle of **universal military liability** in place of the former system of taking recruits only from among the lower classes.

1875. Cession of the Kurile Islands to Japan, in exchange for the southern part of the island of **Sakhalin.**

1875-1878. THE NEAR EASTERN CRISIS, the Russian-Turkish War, and the **Treaties of San Stefano** and **Berlin** (p 735 *f*) As a result of the war the Russians received **Bessarabia** (which had been lost in 1856), **Kars and Batum.**

Growth of opposition to the tsarist régime, due to the incompleteness of the government reforms The liberal elements demanded a constitution, while the radicals and socialists aimed at the complete overturn of the social order and a resettlement of the land question The radicals soon became avowedly revolutionary Under the leadership of **Herzen, Bakunin, Peter Lavrov** (1823–1900), and **Nicholas Chernyshevsky** (1828–1889) they organized

1876. A **secret society** under the name *Land and Liberty.* This became the spearhead of the so-called **Populist movement** (the *Going among the People*). The movement met with a qualified reception from the suspicious peasants and was soon persecuted by the police

In the meanwhile the unsatisfactory outcome of the war with Turkey broadened the base of popular discontent. The liberals were further estranged by the grant of a constitution to the Bulgarians, while the adherents of the new **Panslav movement** (foundation of the *Slavonic Welfare Society* at Moscow, 1857, Panslav congress at Moscow, 1867) became extremely critical of the government for failure to complete the work of liberating the Balkan Slavs. After 1878, therefore, the revolutionary movement secured more popular support.

1879. Organization of the society *Will of the People,* composed of the most radical wing of the older Populist group. The new society was out-and-out terrorist and carefully planned attempts on the lives of prominent officials, finally of the tsar himself.

1880. Appointment of Gen. Loris-Melikov as minister of the interior. After two abortive attempts to assassinate him, the tsar had decided on a policy of concessions, accompanied, however, with ever more stringent police measures against the terrorists Loris-Melikov propounded a scheme for summoning representatives of the zemstvos to co-operate with the council of state in the discussion of new laws. This compromise plan was approved by Alexander on

1881, Mar. 13 But on the very same day he fell a victim to the bombs of the terrorists

1881-1894. ALEXANDER III. He was determined to suppress the revolutionary movement and throughout his reign followed the advice of his former teacher and close friend, **Constantine Pobiedonostsev** (1827–1907), who was made procurator of the Holy Synod After some debate, Loris-Melikov's plan was dropped and the **autocratic system reaffirmed.** Drastic repression of revolutionary activity and silencing of all liberal opposition. Curtailment of the reforms of the preceding reign and restoration of the pre-eminence of the nobility. **Persecution of religious dissenters,** Roman Catholics, Protestants, and especially Jews (beginning of the pogroms in the Ukraine). **Discrimination against national minorities** and attempts at Russification in the border provinces

1881, June 18. Conclusion of the **Alliance of the Three Emperors** between Germany, Russia, and Austria (p 737). This was renewed in 1884, but in 1887 was replaced by a separate pact between Russia and Germany (the **Reinsurance Treaty,** p 741). For the rest, Russian policy was concerned primarily with Balkan affairs, and more particularly with the abortive effort to maintain a predominant position in Bulgarian affairs (p 739)

1884-1887. Continued advance in central Asia (conquest of Merv, 1884) brought the Russians to the frontier of Afghanistan, where a clash of Russian and Afghan troops in 1885 brought Russia to the very verge of war with England (pp 739, 868) The matter was finally disposed of by agreement on a Russian-Afghan frontier

BEGINNING OF THE INDUSTRIALIZATION OF RUSSIA. The government inaugurated a high protective tariff and began to give extensive support to native industry. The rapid expansion of railroads and the opening of the coal and iron fields of southern Russia served as an important stimulus The guiding spirit in the whole process was **Sergei Witte** (1849–1915), first minister of communications and later minister of finance. Heavy borrowing abroad, especially in France, in the hope that the increased productive power of Russia would make repayment easy. But the growth of industry involved also the emergence of an **industrial proletariat,** living in misery and most inadequately protected by the first factory laws (1882–1886). Unrest in the cities was accompanied by growing disorder in the country, where the plight of the peasants was such (**great famine** of 1891–1892) that the government was obliged to abolish the poll-tax and reduce the redemption payments.

1891-1894. Conclusion of the **Franco-Russian Alliance,** which was to become one of the main features of pre-war international relations (p 742).

1894-1917. NICHOLAS II, an intelligent but weak-willed ruler, deeply devoted to the memory and to the system of his father. During the first decade of his reign the reaction continued unabated and at the same time the policy of economic development was maintained (**introduction of the gold standard** by Witte in 1897). Liberal tendencies of the zemstvos were vigorously combated and the policy of Russification was extended to Finland, hitherto practically autonomous. But as time went on it became more and more difficult for the government to uphold the policy of Alexander III. Opposition revived in various forms

1898. Formation of the Social Democratic Party among the industrial workers Marxism had been introduced into Russia by **George Plekhanov** (1857–1918), whose fairly moderate program was, however, soon to be challenged by the more radical wing under the leadership of **Nikolai Lenin** (Vladimir Ulianov, 1870–1924) Lenin was the son of a school inspector and the brother of a prominent terrorist who was executed in 1887 for plotting against the life of the tsar Lenin himself spent several years in exile in Siberia, but after his escape became one of the most energetic and uncompromising champions of the worker. The socialists were obliged to operate from abroad (especially from Switzerland) **Split in the Social Democratic Party** (1903) at the party congress in London *Mensheviks* (moderates) and *Bolsheviks* (extremists)

1901. Organization of the Social Revolutionary Party, which took its inspiration from the earlier Populist movement. This party, to which many of the students adhered, was concerned chiefly with the peasant problem and advocated the nationalization of the land Its methods were those of **terrorism** and the years following its birth were marked by an increasing number of assassinations

1903. Formation of the Union of Liberation, the third of the opposition parties and at the time the most important. This group consisted largely of intellectuals, members of the liberal professions, and zemstvo workers. Its program called for a liberal constitution.

The development of popular opposition to the government was greatly facilitated by the outbreak and course of the

1904-1905. RUSSIAN-JAPANESE WAR. This was the direct result of the Russian forward policy in the Far East. construction of the **Trans-Siberian Railway** (1891–1903), intervention after the **Sino-Japanese War** (1895); **treaty with China** (1896) and penetration of northern **Manchuria**; interference in **Korea**; lease of **Port Arthur** (1898); occupation of **Manchuria** after the Boxer Insurrection (1900–1903), activity of Russian interests in **northern Korea**, etc. (see pp 744*f*, 882). Repeated efforts of the Japanese to reach an agreement were treated with disdain by the Russians, so that long-drawn negotiations ended in the outbreak of hostilities (Feb 8, 1904) The Russians were consistently defeated (**battles of Liao-Yang**, Aug.; **Sha-ho**, Oct , **fall of Port Arthur**, Jan 1905, **battle of Mukden**, Feb 23–Mar 10, **naval disaster at Tsushima**, May 27). The government was wholly discredited and popular pressure became ever greater

1904, July 28. Assassination of Viacheslav Plehve, the ruthless but able minister of the interior This event induced the government to attempt a policy of conciliation, represented by **Prince Sviatopolk-Mirsky**, but it proved to be too late for halfway measures and the relaxation of repression only gave the opposition better opportunities for organization and expression

Nov. A great zemstvo congress met at St. Petersburg and demanded the convocation of a representative assembly and the granting of civil liberties Similar demands were advanced by numerous other groups and by the professional classes

1905, Jan. 22. Bloody Sunday, marked by the first bloodshed and by the emergence of the workers as a factor in the movement. A procession of workers, led by **Father Gapon**, while proceeding to the palace to lay its demands before the tsar, was fired on by the troops 70 killed and 240 wounded. Growing indignation and unrest, epidemic of strikes

Mar. 3. The tsar announced his intention to convoke a **"consultative" assembly**. Further concessions edict of religious toleration, permission to use the Polish language in Polish schools, relief for the Jews, cancellation of part of the redemption payments.

May 8. Organization of the **Union of Unions**, under the chairmanship of **Prof. Paul Miliukov**. This brought together all the liberal groups in a renewed demand for parliamentary government and the institution of universal suffrage.

June-Aug. Increasing unrest and disorder throughout the country· strikes, agrarian outbreaks, national movements in the border provinces, mutinies in the army and navy (Potemkin episode)

Yielding to the popular pressure,

Aug. 19. The tsar published a **manifesto creating the Imperial Duma**, or assembly, to be elected by a limited franchise and with deliberative powers only This concession was far too modest to meet the popular demand and the revolutionary movement became ever more widely spread until it culminated in

Oct. 20-30. THE GREAT GENERAL STRIKE, a spontaneous movement in which the whole country joined

Oct 26. The St Petersburg workers formed **the first soviet** (council) to direct the strike This was essentially a moderate socialist organization and had relatively little influence on the course of events. The strike soon paralyzed the government and forced the tsar to yield Pobiedonostsev and other reactionary ministers were obliged to resign, and Nicholas, advised by Witte (who had been disgraced in 1903, but had been restored to favor after the conclusion of the **Treaty of Portsmouth** with Japan), issued the

Oct. 30. OCTOBER MANIFESTO, granting Russia a constitution the projected duma was to have real legislative power, the franchise was to be greatly extended, civil liberties were guaranteed, etc **Witte was appointed prime minister.**

The manifesto satisfied all the more moderate liberal groups, but appeared inadequate to those who had called for a constituent assembly. The immediate effect of the government's capitulation was, therefore, to split the liberal group, the moderates became known as the **Octobrist Party**, while the progressives took the name **Constitutional Democratic Party** (abbreviated to K D = *Cadet*) The Social Democrats rejected the whole program of the government and the St Petersburg soviet (with branches opened in many cities) attempted several times to organize another strike. The sole effect of this policy was to drive more of the liberals into the government ranks. At the same time Witte made every effort to bring back the troops from the Far East. When he felt sufficiently strong,

Dec. 16. The members of the St. Petersburg soviet (about 190) were arrested This move led to

Dec. 22.-Jan. 1. INSURRECTION OF THE WORKERS IN MOSCOW. Severe street fighting, and much bloodshed.

But the troops remained loyal to the government and the uprising was finally suppressed. Vigorous action by the army during the winter to restore order in the provinces (**Black Hundreds** — punitive raids, etc). Meanwhile Witte arranged to float a huge loan ($400,000,000) in France and England, so that, when the Duma met, the government might not be dependent on the representatives of the people for funds

1906, May 2. Dismissal of Witte, who was never popular with Nicholas and who was no longer needed. In his place the tsar appointed **Goremykin,** a conservative bureaucrat of the old school

May 6. Promulgation of the Fundamental Laws, issued on the very eve of the meeting of the Duma These extensive regulations decided in advance many of the questions left open by the October Manifesto. The tsar was proclaimed autocrat, and retained complete control over the executive, the armed forces, and foreign policy Changes in the fundamental laws could be made only with his consent The legislative power was to be divided between the Duma and an upper chamber, the Imperial Council, half the members of which were to be appointed by the tsar, the other half to be elected by various privileged bodies throughout the country. The government reserved the right to legislate by decree when the Duma was not in session The budgetary powers of the Duma were closely restricted

May 10. MEETING OF THE FIRST DUMA, elected by what amounted to universal suffrage But the radical parties had, for the most part, boycotted the elections and the Cadets formed the largest party. Profoundly disappointed by the fundamental laws, the Cadets criticized the government violently and this first representative assembly ended in a deadlock.

July 21. Dissolution of the first Duma. The Cadet leaders adjourned to Viborg and issued thence the **Viborg Manifesto,** calling upon the country to refuse taxes The manifesto found but little response in the country, where the revolution was already a thing of the past.

Nov. Agrarian Reform Act of Peter Stolypin (1862–1911), who had become prime minister in June. Though a conservative, Stolypin was far from being a reactionary. He was eager to maintain the constitutional system, and hoped gradually to wean the country from revolutionary sentiment by well-planned reforms. The Agrarian Law put an end to the communal (mir) system of landholding and enabled each peasant to withdraw from the commune at will, receiving his own share of the land in private ownership. Any commune was able to end the old system by majority vote. This law was later approved by the third Duma

1907, Mar. 5-June 16. THE SECOND DUMA, more radical than the first because of the active part taken in the elections by the revolutionary parties The Cadets were now anxious to co-operate with the government to save the constitutional system (though they refused Stolypin's invitation to some of the leaders to join the ministry) But these efforts were frustrated by the radicals. The reactionary groups at court, constantly pressing for a return to the simple autocratic system, finally forced the dissolution of the Duma and

June 16. The promulgation of a **new electoral law,** which greatly increased the representation of the propertied classes to the detriment of peasants and workers. At the same time it reduced the representation of the national minorities.

1907-1912. THE THIRD DUMA, elected on the new basis, returned a conservative majority. Stern suppression of all revolutionary outbreaks and disorders (*Union of True Russian Men; League of the Russian Nobility;* drumhead courts-martial, etc) At the same time Stolypin, with co-operation of the Duma, continued his **reform activities:** social insurance, zemstvo reform, education, police reorganization, land banks, encouragement of emigration to Siberia, etc. With the restoration of order came the resumption of economic expansion, industrialization, etc.

1907, Aug. 30. Conclusion of the Anglo-Russian Entente (p 752), an important milestone in Russian foreign policy, which definitely aligned Russia with England and France against the Central Powers

1908-1909. Tension between Russia and Austria over the annexation of Bosnia and Herzegovina (p. 756) Marked **revival of Pan-Slav or Neo-Slav agitation.**

1911, Sept. 14. Stolypin was assassinated by a revolutionary, at Kiev. He was succeeded by **Kokovtsev,** an able financier and a statesman of moderate type, lacking, however, the prestige and will-power of his predecessor.

1912-1916. THE FOURTH DUMA, similar to the third in character and purpose. This period was taken up largely

with major questions of foreign policy, notably by the crisis of the

1912-1913. Balkan Wars (p. 759 *f*), in which Russia played a very prominent rôle

In the meanwhile the reforms inaugurated by the government proved insufficient to quiet the political and social unrest. The national minorities, too, were antagonized by the policy of the government (especially in Poland and Finland) On the eve of the World War there was growing dissatisfaction, which spread even into more moderate circles. The latter were irritated particularly by the state of affairs at court, where the tsarina, a deeply religious person, had become the center of a group of mystics and magic healers, originally called in to cure the only son of the imperial couple of an incurable disease. Of this group **Rasputin** was the most remarkable and powerful, and he was to play a most important rôle in the history of Russia during the war.

1914, Aug. 1. GERMANY DECLARED WAR ON RUSSIA. For the details of the July crisis and Russia's policy in international affairs see p 762

(*Cont pp.* 914*f*, 1027.)

E. THE BALKANS AND THE NEAR EAST

1. THE BALKAN STATES

a. GREECE

1821-1831. Greek War of Independence (p. 722).

1832-1862. OTTO I, king. Otto was a Bavarian prince, 17 years of age. During the first three years the country was governed by a regency of three Bavarian advisers, which attempted to establish a centralized, bureaucratic system, wholly unsuited to the conditions of the country The entire reign was marked by unpopularity, internal dissension, continued brigandage, and economic want.

1843, Sept. 14. Popular rising in favor of a constitution. Otto yielded and agreed to a fundamental law establishing a bicameral parliamentary régime. This, however, worked but little better than the preceding system.

1850, Jan.-Mar. British blockade arising out of friction over the unsatisfied claims of British subjects (**Don Pacifico affair,** p. 612).

1854, Jan.-Feb. Greek bands invaded Thessaly and **Epirus,** to take advantage of the war of Russia against Turkey (p 726). Relations between Greece and Turkey were severed (Mar. 28), but the Greeks were prevented from making war by the **occupation of the Piraeus** by the British and French (this lasted until Feb 1857).

1862, Feb. 13. A military revolt was successful. **Otto deposed** (Oct. 23); he left the country (Oct. 27).

1863, Feb. 3. The Greek Assembly proclaimed Prince Alfred of England king, after a plebiscite The election was rejected by the British government.

1863-1913. GEORGE I, a Danish prince (17 years old), who was finally chosen with the consent of the powers.

1863, June 5. England turned over to Greece **the Ionian Islands** (under British protectorate since 1815).

Nov. 28. A new democratic constitution was introduced, providing for manhood suffrage and a single-chamber parliament (*Boulé*).

1866-1868. Cretan revolt; excitement in Greece; rupture of relations with Turkey (Dec. 1868, resumed Feb. 1869)

1878, Jan. 28. Rising in Thessaly, part of the general upheaval in the Balkans resulting from the war of Russia against Turkey (p. 734). The Greek government declared war on Turkey (Feb. 2), but was constrained by the powers from larger hostilities.

1881, July 2. By a convention with Turkey the **Greeks finally acquired Thessaly** and part of Epirus, promised them at the Congress of Berlin (p. 736).

1886, Apr. 26. Ultimatum of the powers to Greece, to prevent Greek action in harmony with the revolution in Eastern Roumelia (p 739). The Greeks refused to disarm, whereupon **the powers blockaded Greece** (May 8–June 7) forcing compliance.

1893, Aug. 6. Opening of the **Canal of Corinth.**

1896, Apr. Revival of the **Olympic Games.**

1896-1897. Cretan Insurrection. Intervention of Greece (Feb. 1896) and resultant **war with Turkey** (Apr. 17, 1897). The Greeks were utterly defeated, but were saved by the powers from the fruits of their folly (p 745)

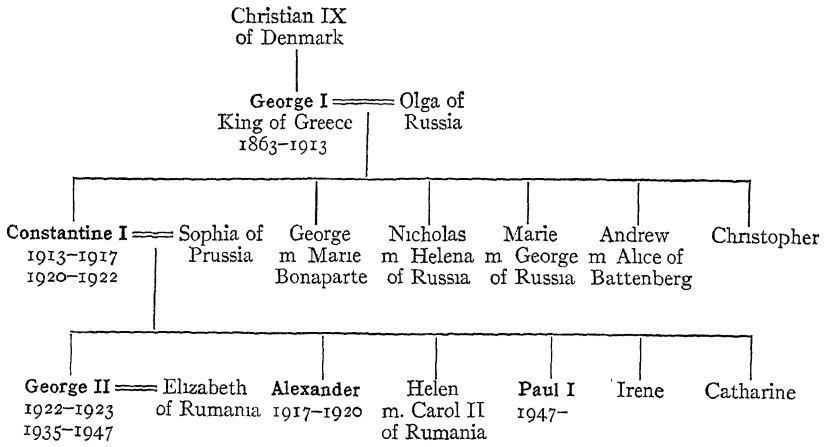
1898, Feb. International commission set up to control Greek finance, after the Greek government had defaulted on its obligations.

Nov. Forced evacuation of Crete by Turkish troops, after attacks on British forces Contingents of England, France, Russia, and Italy remained in occupation of the island

Nov. 26. Prince George of Greece named high commissioner for Crete.

1905, Mar. 30. Insurrection in Crete, after the powers had repeatedly rejected appeals for union with Greece The Assembly (leadership of **Venizelos**) decreed union, but the powers, despite attacks upon their troops, remained adamant

1906, Sept. 25. Prince George resigned as high commissioner for Crete, and was succeeded by **M. Zaimis.**



1908, Oct. 7. The Cretans proclaimed union with Greece, following the annexation of Bosnia and Herzegovina and the declaration of Bulgarian independence (p. 756).

1909, July. England, France, Russia, and Italy withdrew their forces from Crete.

The Balkans, 1914

Kings of Greece (Danish House)

1910, Jan The Military League, an association of officers, forced the Greek Assembly to agree to revision of the constitution. Thereupon the league voluntarily dissolved itself (Mar.).

Oct. 18. Venizelos became prime minister. He at once undertook the work of military and financial reform.

1911, June 11. Completion of the revision of the constitution.

1912, May 29. Treaty of Alliance with Bulgaria (p. 759).

Oct. 14. Cretan representatives were finally admitted to the Greek Assembly.

Oct. 17. THE FIRST BALKAN WAR (p. 759).

1913, Mar. 18. Assassination of King George.

1913-1917. CONSTANTINE I, king.

June. SECOND BALKAN WAR (p. 760)

Dec. 10. Crete officially taken over by Greece.

1914. Crisis arising from Greek claims in southern Albania and from the question of the Aegean Islands (p. 761).

July-Aug. Outbreak of the World War. Constantine rejected appeals from Germany to join in the conflict.

Sept. 7. Resignation of Venizelos (p. 931), marking the beginning of the crisis of Greek neutrality in the World War (*Cont pp.* 920*f.*, 1020.)

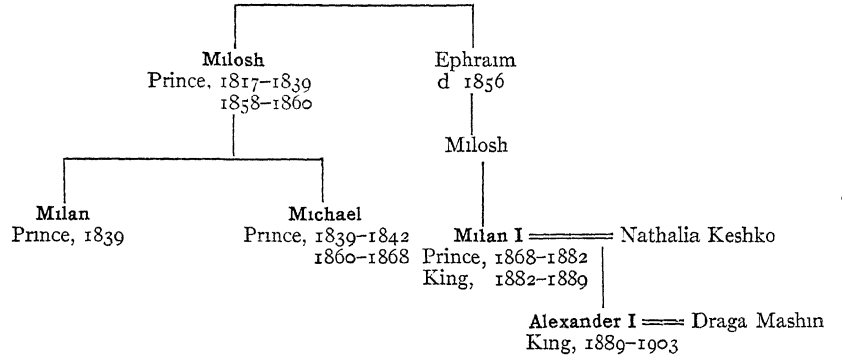
b. SERBIA

1804-1813. First Serbian Insurrection, under Kara George (p. 721)

1815-1817. Second Serbian Insurrection, under Milosh Obrenovich (p. 722)

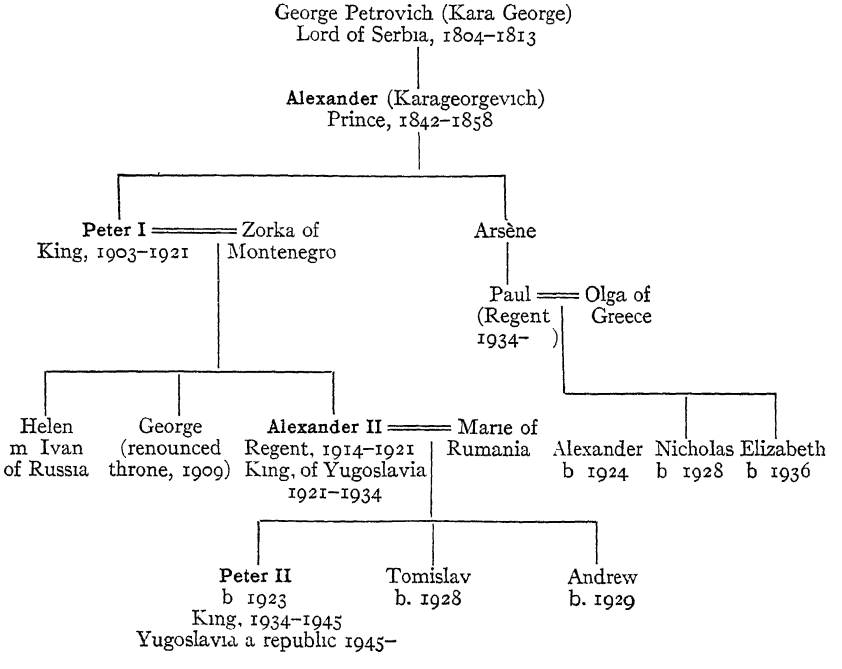
1817. Milosh recognized by the sultan as Prince of Serbia (the Pashalik of Belgrade), which was given a measure of self-government. Cautious policy of Milosh, who, through bribery, gradually secured larger powers from the Porte. During the Greek War, he managed to play a canny game between Russia and Turkey

1829. The Treaty of Adrianople guaranteed the autonomy of Serbia, religious liberty, etc.



1830. The sultan recognized Milosh as hereditary prince, added some territory to his jurisdiction, obliged the Turkish landlords to sell their holdings, and confined the Turkish troops to a few garrison towns.

1835. Opposition of the notables to Milosh's autocratic and oppressive rule (use of bastinado on his opponents, appropriation of forests, control of the pork business, etc.) forced Milosh to grant a constitution providing for a senate of elders with legislative, executive, and judicial powers, and a popular assembly (*Skupshtina*) with control of the budget.



1838. The sultan, supported by Russia, forced the abrogation of the constitution and the appointment of a senate of notables with almost complete power

Rulers of Serbia (Yugoslavia)

(1) Obrenovich

(2) Karageorgevich

1839, June 13. Milosh abdicated, in protest against the oligarchic system

1839. Milan, son of Milosh. He died after a rule of only a few weeks.

1839-1842. MICHAEL, another son of Milosh, only 17 years old His short rule was marked by constant intriguing on the part of the Karageorgevich faction (*Defenders of the Constitution*) who demanded the convocation of the *Skupshtina* Michael was finally forced to flee

1842-1858. ALEXANDER KARAGEORGEVICH, elected by the *Skupshtina* Loud protests of Russia, which forced the banishment of the popular leaders. Alexander's reign was the quietest in Serbian history, marked by a cautious foreign policy, spread of western influence, growth of trade (especially with Austria), and development of education (**Academy of Sciences,** 1841, **University of Belgrade,** 1844) Politically it was a period of factional trouble and corruption, the Senate being in complete control

1856 By the **Treaty of Paris** (p 728), Serbia was placed under the **collective guaranty of the powers.**

1858, Dec. 23 Alexander forced to abdicate by an opposition faction, supported by the Obrenovichs and by Turkey and Russia

1858-1860. Restoration of Milosh Obrenovich, now 79 years old He died after wreaking vengeance on his enemies.

1860-1868. MICHAEL, son of Milosh, reascended the throne. He was a well-educated and intelligent prince, whose great aim was to unite the Balkans in a crusade against the Turks Introduction of compulsory service in the army and gradual development of an efficient administration.

1862, June 15. Bombardment of Belgrade by Turkish troops, after clashes between the garrison and the populace. Michael appealed to the powers and the sultan was induced to concentrate his forces in three or four places

1866. Michael appealed again for the **withdrawal of Turkish troops.** The powers induced the sultan to yield, and the last troops left Serbian territory in Apr. 1867

1866, Sept. 23. Secret offensive and defensive **alliance between Serbia and Montenegro.**

1867, May 26. Secret Serbian-Rumanian treaty, with the object of securing independence.

1867, Aug. 26. Secret treaty between Serbia and Greece (Treaty of Voeslau) Serbia was to get Bosnia and Herzegovina, Greece Thessaly and Epirus. Action was to be taken against Turkey in 1868. A **Balkan confederation** was envisaged as the ultimate goal. Michael organized a far-reaching propaganda in Bosnia and Macedonia, and established close contact with the Bulgarian revolutionary leaders Widespread nationalist agitation (**United Serbian Youth** or *Omladina*, founded 1867).

1868, June 10 Michael assassinated by conspirators aiming at the restoration of Alexander Karageorgevich But Michael's chief adviser, **Garashanin,** anticipated them, roused the garrison and had the assassins arrested

1868-1889. MILAN, grand-nephew of Michael, appointed prince, with a regency which undertook the **revision of the constitution** (1869) in a liberal sense, to meet the growing demands of the nationalist organizations.

1876, July Declaration of war on Turkey, following the insurrection in Bosnia and Herzegovina Rampant nationalism of the government (**Ristich**) and of the country **Complete defeat of the Serbs** (p. 734)

1877, Dec. 14. Serbia re-entered the war against Turkey, on Russia's side

1878, July 13. THE TREATY OF BERLIN made Serbia completely independent, but Serbia received but slight increase of territory and the coveted provinces of Bosnia and Herzegovina were occupied by Austria (p 736)

1881, June 28 Secret treaty with Austria, giving the latter practically a protectorate over Serbia (p. 737).

1882, Mar 6. MILAN proclaimed himself king, with Austrian support.

1883, Nov. Serious revolt against the government by the newly formed **Radical party** (**Nicholas Pashich,** leader), a violently nationalist group.

1885, Nov 13. War with Bulgaria, after the union of Eastern Roumelia The Serbs completely defeated at **Slivnitza** (Nov 17), but saved from invasion by the intervention of Austria (p 718).

1888, Aug. Milan divorced his Russian wife, **Nathalia,** who left the country Growing split between the Austrian party and the pro-Russian, nationalist factions

Dec. 16 The Radicals won a victory in the elections.

1889, Jan 3. Despite warnings from Milan, the Assembly passed a **revision of the constitution** in a liberal sense.

1889, Mar. 6. Abdication of Milan.

1889-1903. ALEXANDER I, son of Milan, 13 years old at the time of his accession A regency under Ristich was established

1893, Apr. 14. *Coup d'état* of Alexander, who abolished the regency.

1894, May 21. Restoration of the constitution of 1869.

1899, Aug. 5. Alexander married Draga Mashin, a lady of questionable position This and his ruthless persecution of the Radicals led to increased opposition to him

1901, Feb. 11. Death of Milan, who had spent the last ten years of his life intriguing behind the throne and further discrediting the rule of his house

1903, June 10. Alexander, Draga, and some 20 members of the court, **murdered** by a group of conspirators, mostly military men.

June 15 The Assembly elected Peter Karageorgevich to the throne, and restored the Constitution of 1889

1903-1921. PETER I, a well-intentioned ruler who was, however, wholly at the mercy of the conspirators

1904, Dec. 10—1905, May 22. First ministry of Nicholas Pashich. Serbian policy became outspokenly nationalist and anti-Austrian.

1905-1907. "Pig War" with Austria, a tariff conflict which did much to embitter relations.

1906, May 1—1908, July 6. Second ministry of Pashich.

1908-1909. Bosnian annexation crisis (p 756) Acute danger of war between Serbia and Austria Serbia was obliged to back down, but the crisis left a legacy of hate Foundation of propagandist societies (*Narodna Odbrana*, 1908, *Union or Death* [Black Hand], 1911).

1912, Mar. 13. Treaty of Alliance with Bulgaria (p 758)

Sept. 12. Pashich again premier.

Oct. 17. Outbreak of the **First Balkan War** (p 759).

1913, June 1. Offensive and defensive **treaty of alliance with Greece,** concluded for ten years (p 760)

June 29. Outbreak of the **Second Balkan War** (p 760).

1914, June 24. Prince Alexander, heir to the throne, proclaimed regent for the deranged king.

June 28. Assassination of the Archduke **Francis Ferdinand** at Sarajevo

July 28. Declaration of war on Serbia by Austria-Hungary (p 762)

(*Cont. pp.* 916*f*, 1016.)

c. MONTENEGRO

1782-1830. PETER I, vladika (i e. *prince-bishop*). He was a regular ally of Russia in the wars against the Turks.

1799. Selim III recognized the complete **independence of Montenegro.**

1830-1851. PETER II, a national poet of the southern Slavs

1851-1860. DANILO I. He abolished the office of prince-bishop and established himself as a secular ruler His efforts to reform and modernize the state led to opposition which ended in **Danilo's murder** (Aug 12, 1860).

1852-1853. One of the numerous clashes between the Montenegrins and the Turks threatened to lead to disaster for the former when **Omar Pasha** invaded the little state The Turks were obliged to withdraw (Feb. 1853) under threats from Austria **(Leiningen mission).**

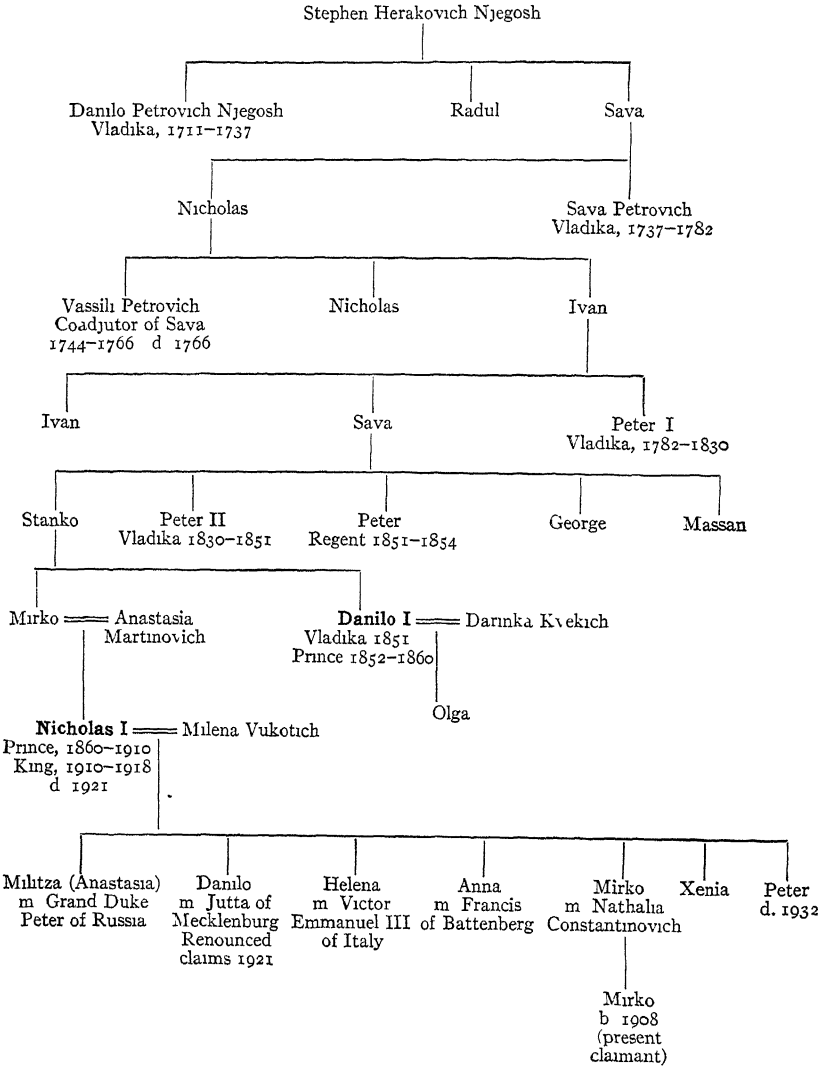
1860-1918. NICHOLAS I, who, during his long reign, effected many military, administrative, and educational reforms and modernized the state Montenegro definitely assumed a position among the lesser European powers.

1861. Following a **revolt in Herzegovina,** supported by the Montenegrins, the country was again invaded by Omar Pasha, who forced the **recognition of Turkish supremacy.**

1876, July 2. War against Turkey, resulting from the great insurrection in Bosnia and Herzegovina. Successes of the Montenegrins (p 734).

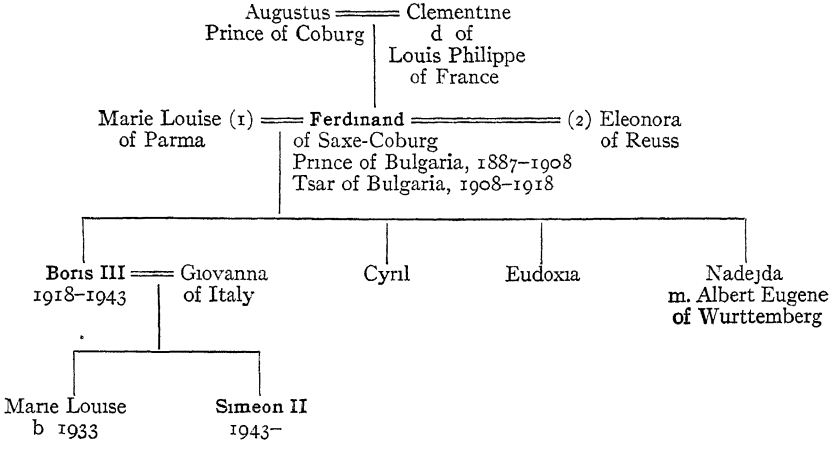
1878, July 13. TREATY OF BERLIN, recognizing the **complete independence of Montenegro,** which received some increase of territory.

1905, Dec. 19 Nicholas finally granted a constitution, with an assembly elected by universal suffrage. Since the advent of the Karageorgevich dynasty in Serbia (1903) there was growing rivalry for leadership of the Southern Slavs, resulting in conspiracy against the life of Nicholas



1910, Aug. 28. NICHOLAS proclaimed himself king

1912, Oct. 8. First Balkan War. Montenegro, though not bound to the other states by formal alliance, was the first power to declare war (p. 759).



1913, Apr. 10 Blockade of the Montenegrin coast by the powers, to raise the **siege of Scutari.** Nicholas took Scutari (Apr. 22), but was forced by Austrian threats to evacuate it (May 5).

1914, Aug. 5. Montenegro declared war on Austria. (*Cont pp* 926, 1016)

Rulers of Montenegro
(Petrovich-Njegosh Dynasty)

Rulers of Bulgaria

d. BULGARIA

1762. The monk **Paisi** wrote his *History of the Bulgarian People*, generally taken to mark the beginning of the Bulgarian national renaissance

1840. **Translation of the Bible** into Bulgarian by the monk **Neophytos,** aided by the American missionary, **Elias Riggs.**

1858. Opening of the **first American mission** (1861, **Samokov Seminary** founded by **J. F. Clarke**). Rapid growth of Bulgarian national movement, with revolutionary committees at Bucharest and Odessa. Connection of the revolutionaries (**Rakovski** and **Botev**) with Prince Michael of Serbia.

1870. Establishment of the **Bulgarian Exarchate,** a national branch of the Greek Orthodox Church. The exarch was given jurisdiction over large parts of Macedonia and Thrace, as well as Bulgaria.

1875, Sept. **Abortive rising** of the Bulgarians against Turkish rule.

1876, Apr.-Aug. **Great insurrection in Bulgaria,** put down by Turkish irregulars (*Bulgarian Horrors*).

1878, Mar. 3. **TREATY OF SAN STEFANO,** with provision for a large Bulgarian state to include most of Macedonia (p 735)

July 13. **TREATY OF BERLIN** (p. 736) establishing a small Bulgarian principality north of the Balkan Mountains and an Eastern Roumelia, south of the mountains. Macedonia left under Turkish rule, with promises (Art. XXIII) of reform.

1879, Feb. 22. **A constitution** granted the new Bulgarian state, under Russian auspices.

Apr. 29. **Alexander of Battenberg** elected prince He was a favorite nephew of the tsar and was intended to serve as a satrap. He soon became involved in conflict with the national assembly (*Sobranye*), of which the Liberal members opposed dictation by Russia

1879-1886. **ALEXANDER I,** prince.

1881, July 13. With Russian consent **the prince changed the constitution** to give himself greater power. He appointed a ministry headed by Russian officers.

1883, Sept. 30. **Alexander,** hounded by Russian concession-hunters (demands for a Rustchuk-Kustendil railway) and confronted with the hostility of the liberal, nationalist elements, **restored the Constitution of 1879,** thereby winning the enmity of the Russians.

1883-1884. **Alexander's projected marriage** with Princess Victoria, granddaughter of the German Emperor. This was vigorously opposed by Bismarck, fearful of estranging Russia, but ardently championed by Queen Victoria of England.

1885, Sept. 18. **REVOLUTION AT PHILIPPOPOLIS,** in favor of union of Eastern Roumelia with Bulgaria. Alexander, under nationalist pressure, was obliged to assume leadership of the movement, despite violent protests of Russia.

Nov. 13. DECLARATION OF WAR BY SERBIA, demanding compensation. Defeat of the Serbs at **Slivnitza** (Nov 17–19). The Bulgarians invaded Serbia and took **Pirot** (Nov. 27), but were forced to withdraw as a result of intervention by Austria. Peace made Mar. 3, 1886, on the basis of the *status quo*.

1886, Apr 5. The sultan agreed to appoint **Alexander governor of Eastern Roumelia** for five years, to which the powers consented

Aug. 21. Kidnaping of Alexander by a band of officers, inspired by the Russians. Provisional government of **Stephen Stambulov,** energetic nationalist leader, who arrested the conspirators and recalled Alexander

Aug. 29. Return of Alexander. His appeal to the tsar, who replied coldly

Sept. 4. Abdication of Prince Alexander. Regency, led by Stambulov

Sept. 25. Mission of the Russian general, **Kaulbars,** who tried to win over the country to the Russian side, but failed. Acute danger of Russian military intervention, frustrated by opposition of the powers (especially Austria and England)

Nov. 10. Prince Waldemar of Denmark elected prince, but refused the offer.

Nov. 20. Departure of the Kaulbars mission

1887, July 4. The Bulgarian Assembly elected **Prince Ferdinand** of Saxe-Coburg, who accepted and arrived Aug. 14. Protests of Russia. Ferdinand was not recognized by any of the powers, but, with the aid of Stambulov and the nationalists, managed to maintain himself, though the first ten years of his reign were punctuated by plots against him, assassinations of ministers, etc.

1887-1918. FERDINAND I.

1890, July. The Turkish government appointed three Bulgarian bishops to Macedonian dioceses

1892, Aug. Visit of Stambulov to Constantinople. His policy throughout was one of friendship with Turkey and the extraction of concessions in regard to Macedonia. Suggestions by **Tricoupis,** the Greek statesman, for formation of a **Balkan League,** were rejected (1891)

1893. Formation of the **Internal Macedonian Revolutionary Organization** (*I.M.R.O.*) to work for an autonomous Macedonia.

1894, June 12. Dismissal of Stambulov, due in part to Prince Ferdinand's desire to pave the way for reconciliation with Russia, partly to pressure of Macedonian elements, dissatisfied with Stambulov's cautious policy

1895. Formation of the **External Macedonian Revolutionary Organization,** with headquarters in Sofia.

June. Beginning of **raids into Macedonia,** from Bulgaria (**Boris Sarafov,** leader)

July 15. Brutal murder of Stambulov by Macedonian revolutionaries

1896, Feb. Reconciliation of Russia and Bulgaria, on the occasion of the conversion of the crown prince, **Boris,** to the Orthodox faith.

Feb. 19. Prince Ferdinand recognized by Russia and the other powers.

1901. Arrest of Macedonian leaders, after the assassination of certain Rumanians and acute tension between Bulgaria and Rumania They were tried, but acquitted.

1902-1903. Great insurrection in Macedonia, accompanied by raids from Bulgaria. Danger of war between Bulgaria and Turkey Bulgarian government helpless in the face of the Macedonian agitation and revolutionary bands. The situation was cleared by the introduction of the **Murzsteg reform program** by the powers (p. 752).

1908, Oct. 5. DECLARATION OF INDEPENDENCE by Ferdinand, who assumed the title of *tsar* Beginning of the Bosnian annexation crisis, which overshadowed the action of Bulgaria (p. 756)

1909, Feb. 21. Visit of Ferdinand to St. Petersburg, where he was received with royal honors

Apr. 19. Convention with Turkey, which recognized Bulgarian independence Agreement with Russia, which assumed responsibility for the financial settlement.

Nov. Draft treaty of alliance between Russia and Bulgaria. Ferdinand avoided committing himself, preferring to balance between Russia and Austria Efforts of the Serbs to effect an alliance were evaded, because of Ferdinand's unwillingness to abandon claim to all of Macedonia

1911, Mar. 22. Gueshov cabinet. Beginning of negotiations with Serbia (Oct) as a result of the Tripolitan War (p. 662).

1912, Mar. 13. CONCLUSION OF THE ALLIANCE WITH SERBIA (p. 758)

Mar. 29. TREATY OF ALLIANCE WITH GREECE (p 759).

Oct. 17. **OUTBREAK OF THE FIRST BALKAN WAR.** Bulgarian victories (p 759).

1913, May 7. Bulgaria agreed to cede Silistria to Rumania in compensation for Bulgarian gains elsewhere

June 14 Danev cabinet Effort to arbitrate the conflict with Serbia regarding division of the spoils (p 760).

June 29. OUTBREAK OF THE SECOND BALKAN WAR, following the attack of Gen Savov and the Bulgarians on the Serbian and Greek positions (p 760)

July 15 Formation of the Radoslavov cabinet.

Aug. 10 Disastrous Treaty of Bucharest, following Bulgaria's defeat (p 760)

Sept. 29 Treaty of Constantinople, concluding peace between Turkey and Bulgaria.

1914, July 29 Bulgaria declared **neutrality in First World War**

1915, Oct. 14 BULGARIA ENTERED FIRST WORLD WAR.

(*Cont. pp.* 925*f.*, 1022)

e. RUMANIA

1774. By the Treaty of Kuchuk Kainarji (p 484) **Russia** was given certain rights of intervention in behalf of the Danubian principalities (**Moldavia** and **Wallachia**), which were still ruled by *hospodars* (usually phanariot Greeks) appointed by the sultan

1802. Russia forced the sultan to promise to appoint the **hospodars for seven years** and not to remove them without Russian consent

1812. By the **Treaty of Bucharest** (p 596), **Bessarabia** was detached from Moldavia and ceded to Russia

1829, Sept. By the **Treaty of Adrianople** Russia strengthened her protectorate and secured for the principalities **complete autonomy** (p 724)

1829-1834. Continued **Russian occupation.** Enlightened rule of the Russian governor, **Count Kisselev,** who took precautions against the plague, organized a militia, reformed the finances and abolished trade restrictions

1832. THE ORGANIC STATUTE, worked out by a group of *boyars* (landed gentry) under Russian auspices an **assembly of boyars** was to elect the prince from among their own numbers He was to be elected for life and irremovable without Russia's consent. The result was an oligarchic system, which continued until 1856

1832-1856. Period of great **economic expansion** (demands of western Europe for Rumanian grain, development of steamboat traffic on the Danube) and the rapid spread of **French influence** (many Rumanian students in France, influence of the Polish emigration). Progressive rule of **Prince Michael Sturdza** in Moldavia, but both principalities continued under strong Russian influence

1848, June. REVOLUTION IN WALLACHIA, demanding a liberal régime (leaders **Constantine Rossetti, Ion** and **Dmitri Bratianu**). The hospodar accepted a liberal constitution and then fled

Sept. By agreement with Turkey, **Russia invaded the principalities** and put down the revolution

1849, May 1 Convention of Balta Liman between Russia and Turkey· the hospodars were to be appointed for only seven years, assemblies of boyars abolished and replaced by *divans*, appointed by the hospodars. Russia and Turkey were to occupy the country jointly. The Russians stayed until 1851

1853, July 2. Occupation of the principalities by Russia, following the dispute with Turkey which led to the Crimean War (p. 726)

1854, Aug. 8. Evacuation of the country by the Russians and **occupation by the Austrians** (till Mar 1857) in agreement with Turkey (p 727)

1856, Feb.-Mar. CONGRESS OF PARIS (p. 728) **Napoleon III** favored union of the principalities (influence of **Mme Cornu** and of **Ion Bratianu**). This was opposed by Turkey and Austria, gradually supported by England Russia sided with France. It was finally decided that the sultan should summon popularly elected divans to ascertain the wishes of the population At the same time an **international commission** was to investigate and suggest an organization.

1857, Mar. Evacuation by Austria. In the elections every kind of pressure and corruption was employed to debar the unionists, who were consequently defeated France at once demanded annulment, which the sultan refused

Aug. France, Russia, Prussia, and Sardinia broke off relations with Turkey. Acute danger of war between France and England, the latter supporting Turkey.

Aug. 9. Visit of Napoleon III to Osborne and **Osborne Pact** between France and England England agreed to annulment

of the elections and approved of a system of common institutions under separate princes (*broad administrative union*).

Sept. New elections; a great victory for the unionists.

1858, Aug. 19. A conference of the powers at Paris decided to establish the **United Principalities of Moldavia and Wallachia,** with separate but identical administrations, delegates from each of the two assemblies to form a central commission for legislation

1859, Jan. 17. **Col Alexander Cuza,** a relatively unknown officer, elected prince in Moldavia.

Feb. 5. The Wallachians also elected Cuza Napoleon recognized him at once and the other powers followed more or less grudgingly

1862, Feb. 5. The sultan allowed the **fusion of the two legislatures** and the union of the principalities was recognized, with the new name of *Rumania*

June 20. Assassination of Catargiu, the Conservative leader and prime minister. Thereafter Cuza, whose sympathy was with the peasant class, appointed a Liberal ministry under **Kogalniceanu** and proceeded to a policy of Liberal reform **expropriation of the monasteries,** etc

1864, Mar. 28. ***Coup d'état*** **of Cuza,** designed to break the Conservative opposition A plebiscite approved his proposal to strengthen the prince's power by establishing an appointed senate, etc.

Aug. Cuza introduced a great **land reform** by decree abolition of serfdom and feudal dues, with compensation to the landlords; the peasants were given a small share of the land

1866, Feb. 23. Cuza kidnaped and forced to abdicate by a conspiracy of Conservatives and Liberals who desired a foreign prince The Assembly at once offered the position to the **Count of Flanders,** son of Leopold II of Belgium, who declined

Apr. 14. The provisional government (with the secret approval of Napoleon III and Bismarck) proclaimed Prince **Charles of Hohenzollern-Sigmaringen.** A plebiscite approved of the action.

May 22 Charles arrived at Bucharest, having crossed Austria in disguise.

July. Introduction of a new constitution, based upon the Belgian Charter of 1831 (liberal, but not democratic).

Oct. 24 The sultan recognized Charles and the powers followed suit.

1866-1914. CHARLES I (Carol) His reign was characterized by rapid economic development (especially petroleum)

1877, Apr. 24. Invasion of Rumania by the Russians during the war with Turkey, after a convention had been forced upon the government

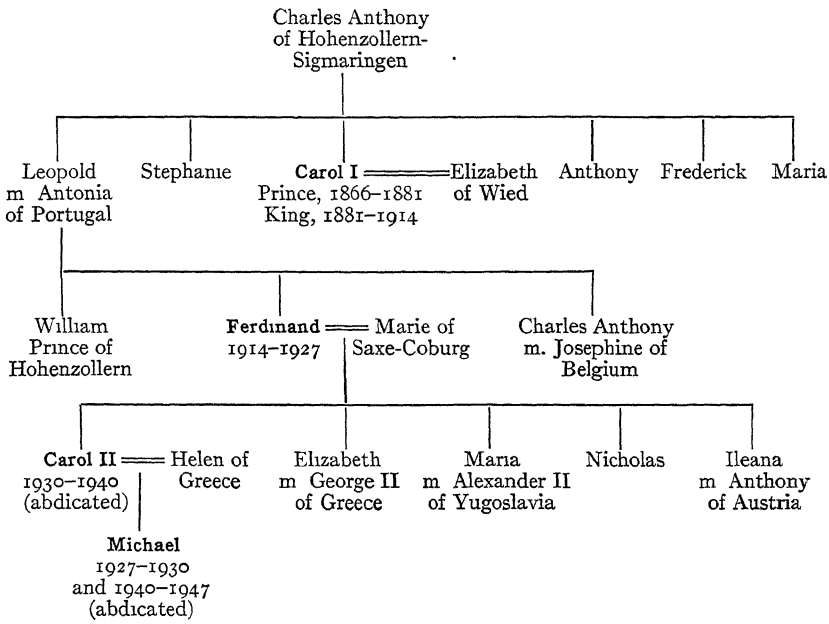
May 21. Rumania entered the war on Russia's side and **proclaimed independence.** The Russians rejected active help until they were hard pressed at the **siege of Plevna** (p 735)

1878, July 13 THE TREATY OF BERLIN recognized the **full independence of Rumania,** but the Rumanians were obliged to cede **Bessarabia** to Russia in return for the much less desirable **Dobrudja** (p 736) By Art XLIV of the Berlin Treaty the Rumanian government was obliged to promise **protection to the Jews,** of whom there were many in Moldavia Actually nothing was done and anti-Semitism became rampant in the country, protests of the powers achieved but little.

1881, May 23. PRINCE CHARLES proclaimed king

1883, Oct. 30. ALLIANCE BETWEEN RUMANIA AND AUSTRIA, acceded to by Germany and Italy This continued in effect until 1914, but was kept a strict secret by the king, so that only a few chosen ministers were ever initiated The alliance was the result of Rumanian fear of Russia, but it failed to overcome the basic antagonism between Rumania and Hungary over Transylvania.

1888, Apr. Serious agrarian insurrection, due to the failure of the government to face the vital land question.



1893, Jan. 10. Marriage of Prince Ferdinand and Princess **Marie of Edinburgh.**

1900-1901. Tension in relations with Bulgaria, arising from conflicting aspirations in Macedonia and the murder of several Rumanians by Macedonian revolutionaries

1905-1911. Rupture of relations with Greece as the result of friction over the treatment of Kutzo-Vlachs in Macedonia by Greek comitadjis Large numbers of Greeks were expelled from Rumania.

1907, Mar.-Apr. Great insurrection of peasants in Moldavia, which had to be put down by military forces Martial law proclaimed throughout the country.

Kings of Rumania

1913, May 7. Agreement with Bulgaria by which the latter was to cede Silistria as compensation for gains made in the Balkan Wars. The Rumanian government demanded more

July 10. DECLARATION OF WAR ON BULGARIA, Rumania joining with Serbia and Greece in the Second Balkan War (p. 760).

1914, June 14. Visit of Tsar Nicholas of Russia and Sazonov to Constantza, taken as evidence of Rumania's veering to the side of the Entente powers (p. 761).

Aug. 4. Rumania proclaimed neutrality in the First World War.

Oct. 10. Death of King Charles, heartbroken over the failure of the government to honor the treaty of alliance with Austria

1914-1927. FERDINAND I, nephew of Charles.

1916, Aug. 27. RUMANIA DECLARED WAR ON AUSTRIA.

(*Cont pp.* 934, 1024)

2. THE OTTOMAN EMPIRE

1793. The New Regulations, providing for the complete reorganization of the military system and the establishment of a corps modeled on European lines, revision of commercial arrangements (to get rid of the abuse of *berats* or licenses by foreign representatives), revision of the tax system, etc. These reforms of Selim III met with vigorous opposition from the Janissaries and from the religious leaders. Nothing much came of them, though Selim built up a small and effective military force of a few thousand men, trained on European lines.

1798. Napoleon's Egyptian Expedition (p 586)

1804, Feb. RISING OF THE SERBS, under George Petrovich (Kara George), a well-to-do trader in pork. The Serbs had been aroused to national self-consciousness by the writings of Rajich and Obradovich, but the movement was directed less against Turkish rule than against the oppression of the Janissary garrison at Bel-

grade. The Janissaries were driven out in Dec. 1806 and in 1808 the supreme command was made hereditary in the family of Karageorge. Encouraged by Russia the movement took on a much larger aspect.

1806-1812. War with Russia (p. 592).

1807, July. Selim III dethroned as a result of a rising of the Janissaries, who put **Mustapha IV** on the throne **Bairakdar,** the pasha of Rustchuk, led a strong force to Constantinople in the hope of seizing control He took the city (1808), but his opponents had Selim strangled before he could be restored Bairakdar thereupon put upon the throne **Mahmud II,** the nephew and pupil of Selim. Having made the mistake of sending most of his troops to the Danube, Bairakdar was soon faced with a new revolt, in which he lost his life. Mahmud was left on the throne only because he was the last of the Ottoman house

1808-1839. MAHMUD II, a proud and obstinate ruler, whose great object was to put down the rebellious pashas in the provinces and to re-establish the absolute power of the sultan In the first ten years of his reign he succeeded in displacing most of the Derebeys in Anatolia

1815-1817. Second rising of the Serbs, under Milosh Obrenovich. The Serbs had been shamefully deserted by the Russians in the Treaty of Bucharest and the first insurrection had been suppressed (1813) Kara George returned from exile in Austria in 1817, but was murdered by his Obrenovich opponents. Beginning of the blood feud between the Obrenovich and Karageorgevich families Milosh was recognized by the Turks in 1817 as hereditary Prince of Serbia, which at that time was only a very small part of present-day Serbia.

1821-1830. GREEK WAR OF INDEPENDENCE. This was the result of growing prosperity of the Greeks in the later 18th century (Black Sea grain trade), the cultural renaissance (Korais, Rhigas), the encouragement of Russia (Catherine's *Greek Scheme*, revolt of 1769–1776, and the influence of the French Revolution and the intrigues of Napoleon A secret revolutionary society, the *Hetairia Philiké*, was founded at Odessa in 1814 and was in close touch with the Russian government (**Count Capo d'Istria,** close friend of Tsar Alexander I). At the head of the movement was **Alexander Hypsilanti,** member of a powerful Greek Phanariot family from Moldavia and an officer in the Russian army.

1821, Feb. Outbreak of an **insurrection in Wallachia** against Turkish-Greek rule. This precipitated action by the Greeks.

Mar. 6. Hypsilanti proclaimed the revolt in Moldavia and appealed to the tsar for aid Tsar Alexander, under Metternich's influence, disavowed him and refused to countenance a revolutionary movement. Hypsilanti lost courage, and was defeated by a Turkish force at **Dragashan** (June 26) He fled, but was captured and imprisoned by the Austrians

At the same time a more imposing insurrection took place in the **Morea,** which was joined by some of the more prosperous islands The Turks, a small minority, were ruthlessly slaughtered and the movement spread rapidly to the rest of Greece The Turks retaliated by hanging the Greek patriarch and massacring Greeks in Constantinople. This, in turn, led to protests from Russia and acute danger of war

July 27. Russian ultimatum to Turkey, demanding restoration of Christian churches, protection of the Christian religion, etc The Turks rejected this and relations were severed War was prevented only through the efforts of Metternich and Castlereagh, who reminded the tsar of the dangers of supporting revolution

Oct. 5. The Greeks took Tripolitsa, the main Turkish fortress in the Morea. Massacre of 10,000 Turks

1822, Jan. 13. A Greek assembly at Epidauros declared **Greek independence** and drew up an organic statute (constitution) providing for a liberal parliamentary system and an executive directory of five.

Feb. 5. A Turkish army finally **took Janina** and brought to an end the career of **Ali of Janina,** one of the most powerful of the pashas. The Turks were now free to press the campaign against the Greeks

Apr. A Turkish fleet, under Kara Ali, **took the island of Chios** and either massacred or sold into slavery most of the population

June 19. The Turkish fleet was destroyed by the Greeks under Kanaris.

July Invasion of Greece by an army of 30,000, which overran the whole peninsula north of the Gulf of Corinth The Greek government fled to the islands

1823, Jan. The Turks were obliged to fall back, having been unable to take the key fortress of **Missolonghi,** at the entrance to the Gulf of Corinth The Greeks failed to take advantage of this respite, but devoted themselves to personal

rivalries (**Kolokotronis** against **Kondouriottis**; conflict between the executive power and the legislature).

1824. First civil war. Kolokotronis was defeated The government was established at Nauplia. Meanwhile the sultan had appealed for help to his powerful vassal, **Mohammed** (Mehemet) **Ali**, of Egypt, who possessed a strong army and navy The Egyptians had already conquered **Crete** (1822–1824)

1825, Feb. Ibrahim, the son of Mohammed, effected a landing in the Morea and quickly subdued the whole peninsula At the same time the Turks, under Reshid Pasha, invaded from the north and renewed the **siege of Missolonghi** (finally taken by the Turks, Apr 23, 1826).

The Turkish-Egyptian successes aroused sentiment in Europe, where the Greeks were regarded as descendants of the heroes of old, renewing the struggle against the barbarians Rapid spread of **Philhellenism** in Germany, Switzerland, France, and England. The governments were obliged to do something and an ambassadorial **conference at St. Petersburg** (1824–1825) discussed projects of establishing Greece as a group of three self-governing but tributary states, but Austria and England were unwilling to follow Russia in action against the Turks

July 26. The Greeks put themselves under British protection and after the fall of Missolonghi appealed for British mediation

1826, Apr. 4. St. Petersburg Protocol, signed by England (**Wellington mission** to St. Petersburg) and Russia. The two powers agreed to mediate between the Turks and Greeks on the basis of complete autonomy for Greece under Turkish suzerainty. Canning, who was chiefly concerned with preventing separate action by Russia, tried hard to associate other powers.

Apr. 5. Russian ultimatum to Turkey: demanded return to the *status quo* in the Danubian principalities and dispatch of a special envoy to discuss outstanding questions between Russia and Turkey. The Turks yielded, on the advice of Austria and France.

June 15-16. DESTRUCTION OF THE JANISSARIES. This had been planned by Mahmud ever since his accession The hopeless inefficiency of the troops gave him an opening and he succeeded in winning over the religious leaders. In May he decreed the formation of a new corps, admission being opened to the Janissaries But the latter rose in revolt. The small loyal corps of the sultan bombarded the barracks and the mob did the rest. From 6000 to 10,000 Janissaries are said to have been massacred

1827, Apr. 11. The Greek factions, whose rivalries paralyzed all plans of action, united to elect **Count Capo d'Istria** president for 7 years

May 17. Constitution of Trozene, which practically deprived the executive of all power and vested it in a single chamber, the Senate Despite the efforts of the Englishmen, **Cochrane** and **Church**, united action proved illusory.

June 5. The Acropolis capitulated to the Turks.

July 6. TREATY OF LONDON. France joined Russia and England, and it was provided that if the Turks refused an armistice the three powers would threaten to support the Greeks and use their naval forces In the interval the British made desperate efforts to induce Mohammed Ali to withdraw from the conflict (**Cradock mission**).

Aug. 16. Note of the three powers to the Porte, demanding an armistice The Turks refused, whereupon the admirals were instructed to stop all reinforcements and supplies from reaching the forces in Greece

Sept. 8. A large Egyptian fleet with transports landed at **Navarino,** but Ibrahim was induced, by Admiral **Codrington,** to await instructions from Alexandria before continuing operations. When Ibrahim learned that the Greeks were continuing the fighting at Patras, he disregarded the engagement.

Oct. 20. BATTLE OF NAVARINO. The British, French, and Russian squadrons entered the harbor, where the Egyptian fleet was crowded together. The battle was an artillery fight at short range and resulted in the sinking or blowing up of most of the Egyptian fleet. Wild enthusiasm in Europe, indignation of the Turks, who demanded reparation.

Dec. 28. The allied ambassadors left Constantinople.

1828, Apr. 26. Russia declared war on Turkey. The British disapproved (Wellington ministry, Jan. 1828), but the French were friendly to Russia and Austria did not dare raise too many objections

June 8. The Russians crossed the Danube, but were held up by the garrisons of the fortresses on the south bank (Shumla, Silistria, Varna).

Aug. 9. Anglo-French convention with Mohammed Ali, providing for the evacuation of the Egyptian forces from

Greece. This was carried out by a **French expeditionary force** under Gen. Maison (winter 1828–1829).

Oct. 12. The Russians took Varna, but were too exhausted to continue the campaign that winter.

1829, Mar. 22. LONDON PROTOCOL, drawn up by an ambassadorial conference Greece, south of a line from the Gulf of Volo to the Gulf of Arta, with Negroponte (Euboea) and the Cyclades (but without Crete) to be an autonomous, tributary state, under a prince (*not* to be chosen from the ruling families of England, France, or Russia).

June 11. Battle of Kulevcha. The Russians, under Gen. Diebitsch, opened the road to the Balkan Mountains.

July 15. Diebitsch crossed the mountains (first time a Russian army advanced so far).

Aug. 20. The Russians took Adrianople. In the meanwhile Gen. Paskievich took **Kars** and **Erzerum** on the Asiatic front The Turkish Empire on the verge of collapse (**scheme of Prince Polignac,** the French prime minister, for the partition of the empire and a complete revamping of the map of Europe).

Sept. 14. TREATY OF ADRIANOPLE, concluded through the mediation of the Prussian officer, Major von Müffling The Russians, decimated by disease, were hardly in a position to take Constantinople and decided not to try (fear of foreign intervention) The terms were lenient: Russia abandoned her conquests in Europe, but the frontier on the Pruth was extended from the northern to the southern mouth of the Danube; Russia was to occupy the Danubian principalities pending the payment of an indemnity of 15,000,000 ducats in 10 years; the hospodars of Moldavia and Wallachia were to be appointed for life and the Turks were to withdraw all Moslems and raze all fortresses in the two provinces; with regard to Greece the Turks agreed to accept the London Protocol.

Nov. 30. The London Conference decided that Greece should be given complete independence, but the frontier was moved back to the line Aspropotamo–Gulf of Lamia, i e. almost to the Gulf of Corinth. This decision was embodied in a **new London Protocol** (Feb. 3, 1830), which the Greeks rejected as inadequate. The powers chose **Leopold of Saxe-Coburg** as prince, but he declined the offer on the grounds that the frontiers of the new state were too restricted. For the time being Capo d'Istria ruled the state in dictatorial fashion.

1831, Oct. Assassination of Capo d'Istria. Civil war between his brother, Agostino, and Kolettis.

1832, Mar. The powers chose for the throne the Bavarian prince, **Otto,** and extended the frontiers of the state to the Volo–Arta line.

1832-1833. CONFLICT BETWEEN THE SULTAN AND MOHAMMED ALI of Egypt, who demanded all Syria as a reward for his aid in Greece When the sultan refused to yield, Mohammed picked a quarrel with the Pasha of Acre and sent Ibrahim with an army to occupy the country **Ibrahim took Acre** (May 27, 1832), **Damascus** (June 15), and **Aleppo** (July 16). He defeated a Turkish army near **Alexandretta** (July 29) and began the invasion of Anatolia The sultan appealed to England for aid, but Palmerston was preoccupied with the Belgian situation and did not as yet recognize the threat involved in Mohammed Ali's designs.

1832, Dec. 21. BATTLE OF KONIAH. Ibrahim completely defeated the grand vizier and the main Turkish army. With no further opposition, he pressed the advance to near Brusa and was on the point of overthrowing the Ottoman house. The Russians, however, intervened, offered the sultan aid and warned Mohammed Ali (**Muraviev mission** to Constantinople and Alexandria, Dec–Feb)

1833, Feb. 20. A Russian squadron arrived at Constantinople. Alarm of England and France, which began to mediate.

Apr. 8. Convention of Kutahia. France induced the sultan to grant Mohammed Ali all of **Syria** and **Adana.** But the sultan tried to hold out on Adana and the Russians began to land troops on the Asiatic side of the Bosporus. Great tension. British and French fleets at Smyrna. The sultan finally yielded (May 4).

July 8. TREATY OF UNKIAR SKELESSI, between Russia and Turkey, concluded for 8 years· each party to come to the other's aid in case of attack, a secret article relieved the Turks of this obligation in return for an engagement to keep the Dardanelles closed to all foreign warships The Russians then withdrew from Constantinople (July 10) Vigorous protests of France and England, which took the treaty to mean that the Bosporus was to remain open to Russian warships and that Turkey was to be henceforth at the mercy of Russia.

Sept. 18. Münchengrätz Agreement, between Russia and Austria. The tsar declared for the maintenance of the Ottoman Empire and agreed that if par-

tition became inevitable he would act only in agreement with Austria. But the meeting was taken in England merely as a **reaffirmation of the Holy Alliance.**

1835. Exploration, by **Capt. Francis Chesney,** of a possible line of communication from the Syrian coast down the Euphrates to the Persian Gulf. This reflected growing British interest in the routes to the east Growing tension in relations with Mohammed Ali, who obstructed the British schemes and rejected a proposal for a railway from Cairo to the Red Sea. Mohammed, on the contrary, pushed his conquests in Arabia as far as the Persian Gulf (1838) and the Indian Ocean, while the **British occupied Aden** (Jan 1839) Palmerston became more and more convinced of the necessity of defending the Ottoman Empire against both Egypt and Russia (violent anti-Russian propaganda of **David Urquhart**), aided the sultan in the construction of a fleet and concluded an advantageous tariff treaty (1838) The French, on the other hand, became increasingly favorable to the Egyptian pasha and encouraged him in plans for a vast Arabo-Egyptian Empire.

1838, Dec.—1839, Apr. Mission of Reshid Pasha to London. In view of Mohammed Ali's threat to declare himself independent, the sultan proposed to the British an offensive and defensive alliance. Palmerston flatly refused anything beyond a defensive pact.

1839, Apr. A Turkish army began the **invasion of Syria** from the Euphrates.

June 24. BATTLE OF NESIB. Ibrahim completely defeated the Turkish forces.

July 1. The Turkish fleet, having gone to Alexandria, **voluntarily surrendered** to Mohammed Ali, either through treachery or through fear of the admiral that the grand vizier, Chosrew Pasha, was planning to abandon it to the Russians.

July 1. Death of Mahmud II. The new sultan, **Abdul Mejid** (1839–1861), a mere boy, was ready to yield and make Mohammed Ali hereditary pasha of Egypt and Ibrahim pasha of Syria.

July 27. Collective note of the five great powers to Constantinople: they reserved the right to settle with Mohammed Ali. Palmerston from the outset insisted that Mohammed must give up Syria, while the French were sympathetic to him and refused to consider pressure.

Sept., Dec. Missions of Baron Brunnow to London. In order to effect a break between England and France, the tsar agreed to pressure on Mohammed Ali to force him to abandon Syria, and promised that Russia would not enter the Bosporus without similar action by the British at the Dardanelles.

Nov. 3. HATT-I-SHERIF OF GULHANÉ, a reform decree issued by the sultan under the influence of **Reshid Pasha,** who favored reform on western lines and hoped to increase the popularity of the Turks in England. The Hatt was chiefly a declaration of principles, guaranteeing the life, liberty, and property of all subjects and promising military and taxational reform. It was followed, in the next decade, by numerous specific measures resulting in the establishment of a modern, centralized administration, an assembly of notables, provincial councils, mixed tribunals, technical schools, etc.

1840, Feb.-Oct. Ministry of Thiers in France. He resolutely rejected all proposals to coerce Mohammed and attempted to mediate between the Turks and Egyptians without intervention by the other powers. This disloyal policy enabled Palmerston to carry a reluctant cabinet for a policy of action with Russia and without France.

July 15. TREATY OF LONDON: England, Austria, Prussia, and Russia agreed to force a settlement on Mohammed Ali and to support the sultan if necessary. Mohammed was to be offered Egypt as an hereditary possession and southern Syria for life, but was to give up Crete, northern Syria, Mecca, and Medina, and return the Turkish fleet. Failure to accept these terms in 10 days was to mean the withdrawal of the offer of southern Syria; failure to accept the revised offer in 10 days would mean the withdrawal of the whole offer and freedom for the sultan to make other arrangements. Mohammed rejected these terms, relying on France. The British induced the sultan to depose him. Panic in Paris when the treaty became known. Violent bellicosity of Thiers and of the press, **danger of war on the Rhine.**

Sept. 9. The British admiral, **Stopford, bombarded Beyrut,** and Gen. **Napier** landed troops. Revolt against the Egyptians in Syria. **Capture of Beyrut** (Oct. 10); bombardment and **capture of Acre** (Nov. 3); Ibrahim forced to evacuate all Syria.

Oct. 20. Resignation of Thiers, reflecting Louis Philippe's decision against war

Nov. 27. Convention of Alexandria, concluded by Napier: Mohammed Ali agreed to return the Turkish fleet and to abandon claims to Syria, in return for he-

reditary rule of Egypt. The sultan was finally induced to accept (firman of Feb 13, 1841)

1841, July 13. STRAITS CONVENTION, signed by the five great powers and marking France's return to the European concert· the Straits (Bosporus and Dardanelles) were to be closed to all foreign warships in time of peace

1844. Visit of Tsar Nicholas to London Discussions with **Lord Aberdeen** about the precarious condition of the Ottoman Empire The tsar proposed that, in case of Turkish collapse, Russia and England should consult as to what should be done. **Gentlemen's agreement** to this effect

1848, Sept. Rising in the Danubian principalities, directed chiefly against the Russian influence. In agreement with the Turks, the Russians invaded the provinces and occupied them until 1851.

1849, Oct International crisis, resulting from the Russian and Austrian demand on Turkey that the **Hungarian refugees** be extradited. The Turks appealed to England for aid, and Palmerston promised it. France supported England and both powers made a naval demonstration at Besika Bay On Nov 1 the British squadron actually entered the Straits, to escape bad weather. It was withdrawn after Russian protests

1851. Dispute between France and Turkey regarding the privileges of the Roman Catholic monks at the **Holy Places** in Palestine These had fallen under the control of the Greek Orthodox monks, supported by Russia Pressure of clerical circles in France induced Napoleon to press the claims of France, traditional protector of the Roman Catholics In Feb 1852 the sultan yielded and granted certain privileges to the Latins; these were extended in Dec Indignation of the tsar, enhanced by his dislike of the upstart French emperor

1853, Jan.-Feb. Nicholas' talks with Lord Seymour, the British ambassador The tsar envisaged the demise of the "sick man" and made a bid for an agreement with England concerning the ultimate disposition of the heritage Russia did not desire Constantinople, but would not allow any other power to take it, Serbia and Bulgaria might be made independent states, England might take Crete and Egypt, etc. Aberdeen apprehensive of French plans toward England, was not unfavorably disposed toward the Russian advances.

Feb.-May. Mission of Prince Menshikov to Constantinople, to secure concessions in the matter of the Holy Places and, in return for a promise of support against a western power (France), to secure a treaty recognizing a **Russian protectorate over Orthodox churches** in Constantinople "and elsewhere." These demands Menshikov tried to obtain by intrigue, cajolery, and threats.

Apr. 5. Arrival of Lord Stratford de Redcliffe (British ambassador to Turkey, 1842–1858 — the *great Elchi*) at Constantinople, with instructions to arrange a settlement of the question of the Holy Places in Russia's interest. This he did, only to learn (May 5) of the wider demands of Menshikov. He advised rejection of these and the Turkish grand council voted them down (May 17) Menshikov left (May 21) after many unfulfilled threats

May 31. The tsar decided to occupy the Danubian principalities as a method of pressure on the sultan; on the same day the British and French governments decided to send their squadrons to Besika Bay Stratford was empowered to call the fleet to Constantinople, if necessary Division of the British cabinet **Aberdeen** pro-Russian; **Palmerston** for strong action, **Clarendon,** the foreign minister, attempting to mediate Strong public feeling in England against autocratic Russia.

June 13. The British and French fleets at Besika Bay.

July 2. Occupation of the principalities by Russian forces. The powers protested, but restrained the Turks in their desire to declare war

July 28. THE VIENNA NOTE, drawn up by the French ambassador and submitted to Russia by Austria. This was a formula vaguely worded and designed to give the Russians satisfaction in principle without offending the Turks. The tsar accepted it (Aug. 5), but the Turks insisted (Aug. 19) on an amendment making it clear that the protection of the Christians should depend on the sultan, not on the "active solicitude" of the tsar. The Russians rejected this (Sept. 7), and in a circular revealed the fact that they had intended to derive a virtual protectorate from the original vague phraseology After a **meeting of Nicholas and Francis Joseph at Olmütz,** the Austrians continued to work for acceptance of the note, but the British and French refused to follow suit.

Sept. 23. After demonstrations and disorders at Constantinople, the **British fleet was ordered to Constantinople.**

Oct. 4. The Turks enthusiastically declared war on Russia.

Oct. 23. The Turks, under **Omar Pasha, crossed the Danube** and in an engagement at **Oltenitza** (Nov 4) held their own against the Russians

Nov. 30. A Turkish squadron and transports on the way to the Asiatic front, was caught and destroyed by the Russians off **Sinope.** Great indignation in England

1854, Jan. 3. At Napoleon's suggestion the **British and French fleets entered the Black Sea,** to protect the Turkish coasts and transports.

Feb. 6 Russia broke off relations with England and France.

Feb. 27. Anglo-French ultimatum to Russia, demanding evacuation of the principalities by April 30. The tsar did not even reply to this.

Mar. 12. Alliance of England and France with Turkey.

Mar. 20. The Russians crossed the Danube

Mar. 28. England and France declared war on Russia and concluded an alliance with each other (Apr 10)

Apr. 20. Defensive alliance between Austria and Prussia, each guaranteeing the other's territory for the duration of the war, and agreeing to oppose Russia if the latter made an effort to incorporate the principalities or attempt an advance beyond the Balkan Mountains. Austria began to mass troops in Galicia and Transylvania

June 3. Austrian ultimatum to Russia: Russia must not carry the war across the Balkans and must state a date for evacuation of the principalities.

June 14. Austrian treaty with Turkey: Austria to occupy the principalities until the end of the war and to intervene in Bosnia, Albania, or Montenegro in case disturbances broke out there

Aug. 8. The Russians evacuated the principalities, which were occupied by the Austrians (Aug 22). Beginning of the sharp antagonism between Russia and Austria, which outlasted the century

Aug. 8. THE VIENNA FOUR POINTS, agreed to by England and France conditions of peace to be (1) collective guaranty of the position of the principalities and Serbia; (2) free passage of the mouths of the Danube; (3) revision of the Straits Convention in the interests of the European balance of power; (4) abandonment of the Russian claim to a protectorate over the sultan's subjects and agreement by the five great powers to secure privileges for the Christians without impairing the independence of Turkey The Russians indignantly rejected these terms

Sept 14. Landing of the allied troops at Eupatoria in the Crimea, the campaign in the Balkans (from Varna) having been cut short by the Russian evacuation of the principalities. The English were commanded by Lord **Raglan,** the French by Gen. St. **Arnaud.** The objective was the strong Russian fortress of **Sebastopol.**

Sept. 20. BATTLE OF THE ALMA RIVER, in which the allies, marching south, defeated an inferior Russian force. St. Arnaud died of cholera and was succeeded by Gen Canrobert.

Oct. 17-19. First bombardment of Sebastopol. The allies, lacking heavy artillery, were unable to make much impression and had to settle down to a siege

Oct. 25. BATTLE OF BALACLAVA, another allied victory (*charge of the Light Brigade*).

Nov. 5. BATTLE OF INKERMAN, in which the Russians again failed to break through the enveloping forces. In the interval Sebastopol was strengthened through the efforts of Col. **Todleben,** famous military engineer Horrible sufferings of the allied forces during the winter (lack of fuel, clothing, and supplies), relief work and nursing organized by **Florence Nightingale.**

Dec. 2. Offensive and defensive alliance of Austria with England and France; the latter powers guaranteed Austria's possessions in Italy for the duration of the war and promised support against an attack by Russia; Austria promised to defend the principalities and give the allies free hand there Austria mobilized all her forces, but still abstained from hostilities.

1855, Jan. 26. Sardinia (Piedmont) **entered the war** on the allied side and sent a force of 10 000 men under Gen. La Marmora, to the Crimea

Mar. 2. Death of Nicholas I. His successor, **Alexander II,** was more disposed to make peace and engaged in abortive negotiations at Vienna (Mar–June)

Apr., June. Violent attacks on Sebastopol failed to break the resistance of the Russians.

Sept. 8. The French forces finally succeeded in taking the **Malakov tower,** a key position, the British took the **Redan,** but were driven out again.

Sept. 11. The Russians abandoned Sebastopol, sinking their ships and blowing up the forts.

Nov. 21. Sweden concluded a treaty with the allies: Sweden to make no cessions or exchanges of territory with Russia and the allies to support Sweden against such demands.

Nov. 28. On the Asiatic front **the Russians captured Kars.**

Dec. 28. Austrian ultimatum to Russia, threatening war if Russia refused to accept the Vienna Four Points, plus the neutralization of the Black Sea and the cession of Bessarabia. Russia finally yielded and agreed to preliminary peace conditions at Vienna (Feb 1, 1856)

1856, Feb. 18. THE HATT-I HUMAYUN, the most important Turkish reform edict of the 19th century, guaranteeing Christian subjects security of life, honor, and property and abolishing the civil power of the heads of the Christian churches These churches in future were to be governed by a synod of the clergy and a national council of laymen Full liberty of conscience was guaranteed and all civil offices thrown open to all subjects of the sultan. Christians were technically eligible for military service, but were allowed to buy themselves off. Torture was abolished and prisons reformed Acquisition of property by foreigners allowed under certain circumstances, etc These arrangements were opposed by the Turks as too far-reaching, and met with opposition from the Christian communities, but the whole program was worked out by the British, French, and Austrian ambassadors and forced on the Turkish government in order to effect a settlement before Russia could intervene

Feb. 25-Mar. 30. CONGRESS OF PARIS (**Walewski,** French foreign minister, president; for England, **Clarendon** and **Cowley;** for Austria, **Buol** and **Hübner;** for Russia, **Orlov** and **Brunnow;** for Turkey, **Ali Pasha** and **Mehmed Jemel;** for Sardinia, **Cavour**) Napoleon had high hopes of using the occasion to effect a general revision of the treaties of 1815, with special reference to Italy and Poland. These schemes were frustrated by England, which drew closer to Austria in a policy of preserving the *status quo*; France thereupon began to court Russia. By the **Treaty of Paris** (Mar 30) the powers admitted **Turkey** to the European concert and promised to respect the independence and integrity of the empire; **Russia** ceded the mouths of the Danube and a small part of Bessarabia; in Asia Russia returned Kars; Russia gave up claims to a protectorate over the Christians in Turkey and the powers "recognized the high value" of the Hatt-i Humayun; the **Danubian principalities** were placed under the joint guaranty of the powers and the status of the provinces was to be determined later, no change was made in the Straits Convention, but Russia agreed to the **neutralization of the Black Sea;** an **international commission** was established to assure safe navigation of the Danube. Adoption of **four rules of international law:** (1) **Privateering** remained abolished, (2) the **neutral flag covers enemy goods,** except contraband, (3) **neutral goods,** except contraband, were **not liable to capture** under an enemy flag, (4) **blockade,** to be binding, must be effective.

Apr. 15. Anglo-French-Austrian Treaty: the three powers agreed to regard any infringement of Turkish independence and integrity as a *casus belli* and to concert measures to meet it.

1856-1858. Settlement of the problem of the principalities (p. 719).

1858. Definitive abolition of feudal holdings in the Ottoman Empire.

1860. Founding of Robert College, crowning achievement of American missionaries in Turkey (since 1820, **Bebek Seminary** founded by **Cyrus Hamlin,** 1840; **Home School for Girls,** later **Constantinople Women's College,** 1871).

1860-1861. Insurrection in Syria and conflict between the Moslem **Druses** and Christian **Maronites,** many of whom were massacred. The powers gave France a mandate to intervene (1860, Aug. 2) and a French expeditionary force restored order. Evacuation of the French (June, 1861); special constitution for the Lebanon region.

1861-1876. ABDUL AZIZ. His reign was distinguished by a rapid **spread of western influence,** resulting from the association with England and France during the Crimean War (first loans to Turkey; construction of railroads from the Black Sea to the Danube, etc), and by striking **development of liberalism** (**literary revival,** throwing off of the old Persian manner; **Namik Kemal,** radical dramatist and political writer, his history of the Ottomans and translations of Rousseau, Montesquieu, etc.; phenomenal growth of Turkish journalism). The leading statesmen of the period were **Ali** and **Fuad,** both followers of Reshid Pasha and committed to liberal reform. Encouragement of education: **Lycée of Galata Serai** (1868), **University of Constantinople** (1869), **School of Law** (1870).

1863. Foundation of the Banque Impériale Ottomane.

1864. **Vilayet Law,** establishing larger provinces under governors-general and subdivision into sanjaks, each with mixed councils and tribunals

1865. **Establishment of the Ottoman National Debt Administration.**

1866-1868. **Cretan insurrection.** The islanders proclaimed their independence and union with Greece (1866, Sept 2), but after years of fighting the revolt was put down. The sultan then proclaimed the **Organic Statute,** providing for Christian assessors to assist Turkish officials and for an elective assembly

1867. Abdul Aziz attended the great exposition at Paris, the first sultan to travel abroad, visiting also London and Vienna

1868. Concession granted for a **railroad to connect Constantinople with the Hungarian lines** (work begun 1872).

1868-1876. **Elaboration of the Code Civil Ottoman.**

1869. **OPENING OF THE SUEZ CANAL** (p 830), the effect of which was to put the Ottoman Empire once more on the main trade route to the Far East

1869. **New law of citizenship.**

1870. **Establishment of the Bulgarian Exarchate,** a separate branch of the Greek Orthodox Church, an important stage in the development of the Bulgarian national movement (p. 717)

Oct. 31. **Repudiation of the Black Sea clauses** of the Treaty of Paris by Russia, taking advantage of the Franco-German War. England and Austria protested, but Germany supported Russia. A **conference at London** finally (Mar. 13, 1871) accepted the Russian action while declaring against unilateral breaches of international agreements.

1872. A scheme, put forward by Ali Pasha, for the complete **reorganization of the empire.** The Balkan nationalities were to be given a self-governing status like that of Bavaria in the German Empire This plan was ruined by the opposition of the nationalities and the protests of Russia

1874. **Financial collapse of the empire,** due to heavy borrowing abroad and poor management Half the interest on the debt was repudiated

1875, July. **INSURRECTION IN HERZEGOVINA AND BOSNIA,** then in Bulgaria; war with Serbia and Montenegro, Russo-Turkish War of 1877–1878; **Congress and Treaty of Berlin** (p 736)

1876, May 10. **Midhat Pasha,** dominant figure of a new ministry. Midhat (1822–1884) was the successor of Reshid, Ali, and Fuad, and an ardent reformer His brilliant administration of Bulgaria (1861–1869) and of Baghdad (1869–1873). His plans for the establishment of a national state, including the Christians in the **new Ottoman nationality.**

May 30. Midhat and his associates **deposed Abdul Aziz** and proclaimed his nephew, **Murad V,** as sultan. Abdul Aziz died soon after, either by suicide or murder.

June 15. Assassination of several members of the government by a Circassian officer **Midhat supreme leader** of the victorious reforming party.

Aug. 31 **Deposition of Murad V** on the plea of insanity

1876-1909. **ABDUL HAMID II.**

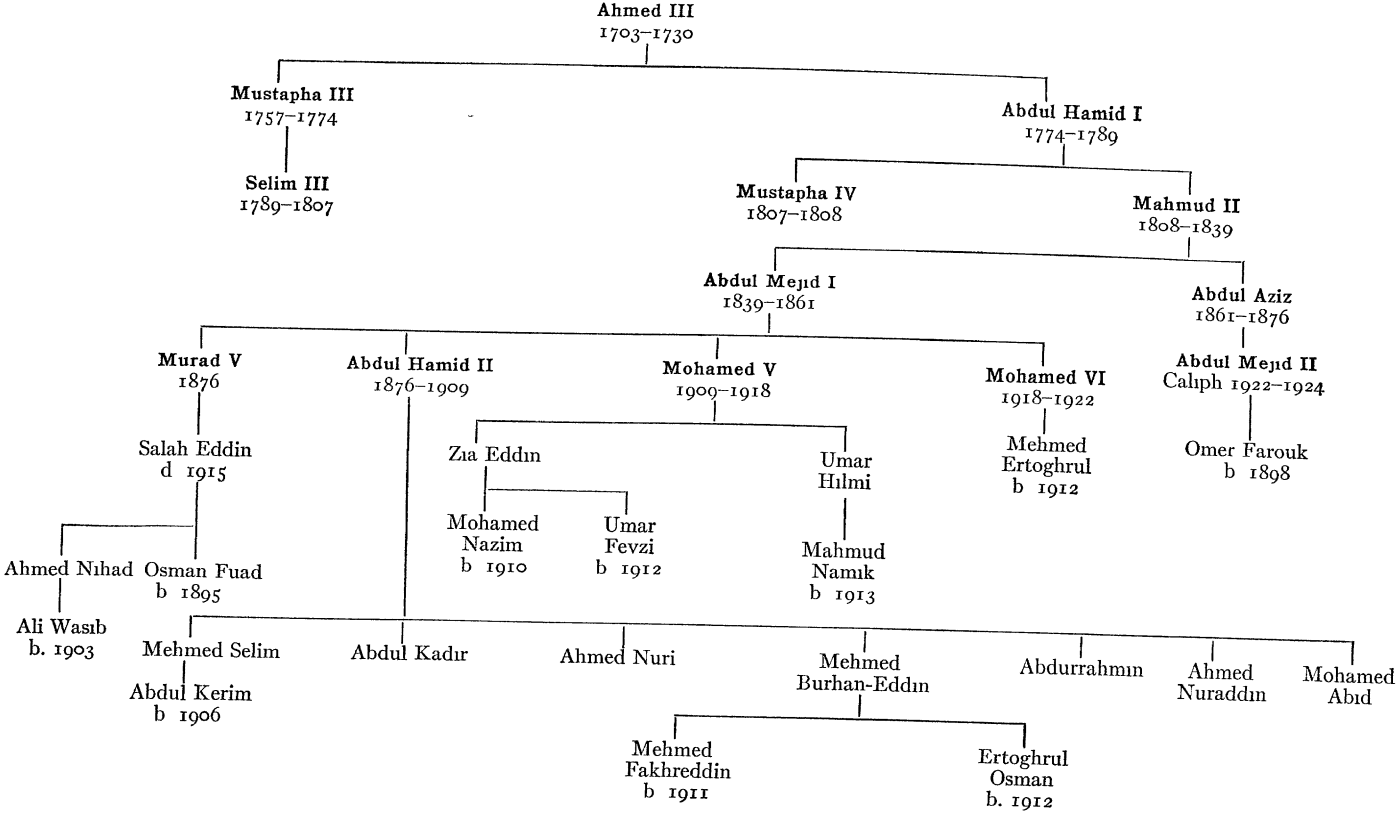
1876, Dec. 23 **PROCLAMATION OF THE CONSTITUTION** by **Midhat Pasha:** it declared the indivisibility of the Ottoman Empire, liberty of the individual, freedom of conscience, the press, and education, equality of taxation, irremovability of judges, parliamentary government based on general representation

1877, Feb. 5. **Dismissal of Midhat Pasha,** who was banished.

Mar. 19. **Opening of the first Turkish parliament.** It made a serious effort to fulfill its mission, but was soon prorogued by the sultan, who allowed the constitution to lapse and devoted himself to the re-establishment of his absolute power Midhat and others were tried for the murder of Abdul Aziz in 1881 and convicted Only intervention by the British government saved them from execution.

1878. **Insurrection in Crete.** After its suppression the sultan granted (Oct) the **Pact of Halepa,** giving the Christians a majority in the general assembly and allowing the island practical self-government.

1881. **French occupation of Tunis** (pp. 737, 740)



1882. **British occupation of Egypt** (pp. 738, 832)

1885-1888 **INSURRECTION IN EASTERN ROUMELIA** and resultant eastern crisis (pp 717, 739).

1888, Aug. 12. **Opening of the railroad from Hungary to Constantinople.**

Oct 6. **Concession to German interests for a railroad to Angora** (Ankara), the first stage in the **Baghdad Railway project** (p. 749).

Ottoman Sultans (1703-1922)

1889. **Insurrection in Crete,** encouraged by Greece The powers showed little interest and the rising was put down The sultan thereupon curtailed the Pact of Halepa, reducing the power of the assembly and increasing that of the governor.

1890-1897. **ARMENIAN REVOLUTIONARY MOVEMENT** and subsequent Armenian massacres, resulting from the growth of a national movement since 1840 and the failure of the powers (1879-1883) to secure reforms for the Anatolian provinces (p 743*f*)

1895. **Raids of Bulgar revolutionaries into Macedonia** and beginning of the systematic activity of Bulgarian, Greek, and Serbian *komitadjis* (members of revolutionary committees) in that region (p 718).

1896-1897. **CRETAN INSURRECTION,** fomented and supported by Greeks and resulting in the Turco-Greek War of 1897 (p 745)

1896-1908 **REVIVAL AND DEVELOPMENT OF THE YOUNG TURK MOVEMENT,** harking back to the Constitution of 1876 The Young Turks (mostly exiles in France, Switzerland, and England) hoped to capitalize the discredit of the sultan, their chief aim was to prevent the disruption of the empire and to reconstitute it on a liberal, national basis To some extent they arranged co-operation with the Armenian, Macedonian, and other revolutionary organizations (1903), but the movement throughout was hampered by dissensions between factions and by the drastic repressive measures of Abdul Hamid, which made all activity within Turkey impossible

1900-1908. **Construction of the Hejaz Railway** to the Holy Places in Arabia. The line was built by popular subscription and was intended as a Pan-Islamic project

1902-1903 **Insurrection in Macedonia.** Intervention of the powers. **Murzsteg program** of reforms (p. 752).

1905, Nov, Dec. After prolonged argument between the Turkish government and the powers regarding the number of officers to be employed in the Macedonian gendarmerie, the terms of international control of Macedonian finance, etc., the powers made a naval demonstration and occupied Lemnos, forcing the sultan to yield.

1906, May. **Dispute with England** regarding the frontier between Palestine and Egypt (**Tabah, Akaba**). The sultan yielded to a British ultimatum.

1907, Dec. **Meeting of various Young Turk** and revolutionary groups at Paris. They concerted plans for action in common, and established contact with groups of discontented army officers (**Committee of Liberty,** founded 1905-1906) and **Masonic lodges** at Saloniki and in other towns of the empire.

1908, June 9 **Royal meeting** between King Edward and Tsar Nicholas The Russians agreed to a much more extensive British plan of Macedonian reform Fear that the three Macedonian provinces would be lost to the empire precipitated action by the Young Turk organization, the **Committee of Union and Progress.**

July 5. **Niazi Bey,** chief organizer of the revolutionary movement in Turkey, raised the standard of revolt at **Resna,** in Macedonia. When the sultan had a number of officers arrested at Saloniki, others, notably **Enver Bey,** joined Niazi (July 8) The Committee of Union and Progress adopted the insurrection (July 13), which was supported also by the Albanians. Government troops sent against the rebels deserted to the movement

July 24. **RESTORATION OF THE CONSTITUTION OF 1876** by Abdul Hamid, after several days of debate in the council of ministers The sultan now posed as a good father who had been misled by his ministers The revolutionaries gave up all thought of deposing him Several weeks of frantic joy and fraternization throughout the empire, all nationalities joining with the Turks in the common celebration

Oct. 5, 6. **Proclamation of Bulgarian independence** and annexation of **Bosnia and Herzegovina** by Austria (p. 756)

Dec. 17. **First meeting of Parliament,** which had a large Young Turk majority. Growing rift between the representatives of the subject nationalities (**Liberal Union**) and the Turkish nationalists, who dominated the Committee of Union and Progress. main issue that of decentralization in favor of the nationalities, and introduction of Turkish as the only official language

1909, Feb. 13. **Fall of Kiamil Pasha,** the grand vizier. He was a liberal, sympathetic to reform and to the program of the moderates The committee forced his resignation and had one of its sympathizers, **Hilmi Pasha,** appointed grand vizier.

Apr. 13. **REVOLT OF THE FIRST ARMY CORPS,** chiefly Albanian, at Constantinople, after violent attacks upon committee rule by the **Mohammedan**

Union and other conservative forces. The insurgents took the parliament house and telegraph offices and forced Hilmi Pasha to resign. The committee thereupon appealed to the troops in Macedonia

Apr 24. **Mahmud Shevket Pasha,** with an **Army of Liberation** numbering some 25,000, reached Constantinople and after five hours of fighting took the city The leaders of the mutiny were executed and the control of the committee reestablished

Apr. 26. **ABDUL HAMID DEPOSED** by unanimous vote of the parliament, because of his approval of the counter-revolution He was sent into exile at Saloniki (d Feb 10, 1918)

1909-1915. MOHAMMED V, brother of Abdul Hamid, a weak and helpless ruler

1909, Apr. Massacre of Armenians at Adana and other places of Little Armenia These were provoked by Armenian demonstrations which aroused the Moslems

Aug. **Revision of the constitution:** the sultan was henceforth to name only the grand vizier, who was to appoint the other ministers, the sultan was deprived of the power to dissolve parliament, the cabinet was made responsible to parliament, which was given equal right to initiate legislation

1910, Apr.-June Insurrection in Albania, the result of Albanian demands for autonomy and the repressive policy of the Turkish nationalists The revolt was put down with much bloodshed by a large Turkish army In **Arabia,** too, there was constant disorder

1911, Sept. 29. Outbreak of the **WAR WITH ITALY** (pp 662, 758)

1912, Jan. 18. The sultan dissolved the first parliament, after a phenomenal growth of criticism of government by the committee

Apr. The elections turned out a great victory for the committee, which appears to have used every form of pressure on the electorate.

June 25. Discontented officers at Monastir (**Saviors of the Nation**) joined the Albanians in a new insurrection against the government.

July 21. **Cabinet of Ghazi Ahmed Muktar Pasha,** a non-committee government representing the victory of the moderate groups over the extreme nationalists. The new government dissolved parliament by force (Aug 5) and proclaimed martial law

Oct. 8, 17. **OUTBREAK OF THE BALKAN WAR** (p 759)

Nov. 28. **Proclamation of Albanian independence,** by an assembly at Valona which rejected the grant of autonomy made by the Turkish government on Aug. 20

1913, Jan. 23 COUP D'ÉTAT OF THE YOUNG TURKS (especially **Enver Bey**) against the government, which was prepared to cede Adrianople to the victorious Balkan states. **Mahmud Shevket Pasha** became grand vizier

May 30 **Treaty of London,** closing the First Balkan War (p 760).

June 11. **Assassination of Mahmud Shevket Pasha.** This led to a period of Young Turk terrorism, which lasted until the World War The country was, to all intents and purposes, ruled by **Enver, Talaat,** and **Jemal,** a triumvirate which ruthlessly suppressed all opposition.

July 20. **The Turks took Adrianople,** in the course of the Second Balkan War (p. 760) This was retained by the **Treaty of Constantinople** (Sept 29)

Dec. **The Liman von Sanders crisis** (p 761)

1914, Feb. 8. The Turkish government accepted a program of **reform for the Armenian provinces,** worked out by the powers under the leadership of Russia

Aug. 2. **Secret treaty of alliance with Germany** (p 919)

Oct. 30. **RUSSIA DECLARED WAR ON TURKEY** (p 919)

(*Cont. pp. 919 f.,* 1094)

F. INTERNATIONAL RELATIONS, 1870-1914

The period was characterized at first by the power of Germany, the weakness of France, and the indifference of England. In the first decade Bismarck, whose figure dominated the scene, attempted to follow a policy of the free hand, but the constant friction between Austria and Russia with regard to the Near East made it necessary for him to make a choice between them Thereby he embarked upon the policy of alliances, which ultimately involved most of the European powers in one group or another The effect of technical and industrial advance on warfare resulted in growing anxiety for security on all sides, and consequently to alignments for the event of war which, in fact, tended to make war more likely At the same time the expansion of European powers in Africa and Asia greatly extended the field of possible friction

1871, Aug., Sept. Meeting of Emperor William and Francis Joseph, with their foreign ministers, at Ischl, Gastein, and Salzburg The Austrians, their hopes of revenge for 1866 blasted by the defeat of France, were ready for better relations with the powerful German Empire. This policy was represented especially by the Magyars (**Count Julius Andrássy,** foreign minister, Nov 13, 1871)

1872, Sept. 6-12. Meeting of the three emperors in Berlin (William, Francis Joseph, Alexander II of Russia) Alexander invited himself, for fear lest Austria and Germany should become too intimate No political agreements were made at the meeting, but Andrássy and Gorchakov, the Russian chancellor, discussed the Near-Eastern situation and agreed to work for the *status quo*

1873, May 6. Military convention between Germany and Russia, concluded during the visit of the Emperor William, Bismarck, and Moltke to St Petersburg. If either party were attacked by another European power, the other was to come to its assistance with 200,000 men

June 6 Agreement between Russia and Austria (Schonbrunn Convention) providing for consultation and eventual cooperation in case of attack on either. These agreements were not concluded for a definite period, and were loose in nature Together they formed the **Three Emperors' League,** the main aim of which was to emphasize monarchical solidarity against subversive movements and to secure for Germany support in the event of trouble with France (May, 1873, overthrow of Thiers by the French monarchists).

Sept. Visit of King Victor Emmanuel II to Vienna and Berlin. Italy loosely associated with the Three Emperors' League, in order to obtain assurance against action by France in behalf of the pope.

Sept. Completion of the evacuation of French territory by German troops Activity of the French royalists and clericals Efforts at alliance with Russia Friction with Italy and Germany over the question of the papacy and the *Kulturkampf* (p 688)

1875, Feb. Mission of Von Radowitz to St Petersburg, reflecting Bismarck's anxiety to hold Russia, in view of tension in relations with France

Apr. 8. The article "Is War in Sight?" published in the Berlin *Post.* This referred to the new French army law and concluded that war was in sight Panic in France, where the article was regarded as an inspired one. The **Duc Decazes,** French foreign minister, appealed to England and Russia for support, with the aim of discrediting Bismarck

May 10. Visit of Tsar Alexander and Gorchakov to Berlin. Warnings of Gorchakov, supported by similar action by the British ambassador, Lord Odo Russell Acrimonious discussion between Bismarck and Gorchakov The latter's telegram "Peace is now assured" Results Bismarck realized the weakness of the Three Emperors' League and the suspicious jealousy of the other powers France strengthened by the "moral coalition" that had been formed against Germany and by the knowledge that neither England nor Russia would stand idly by if France were attacked by Germany in a preventive war.

July. Outbreak of the insurrection against Turkish rule in Herzegovina and then Bosnia (p 729) This initiated three years of acute Near-Eastern tension, which profoundly modified the relations of the powers to each other The **Serbs** at once supported the insurgents, in the hope of acquiring the two provinces for themselves **Russia** was extremely sympathetic (religious affinity, racial relationship to the southern Slavs, Pan-Slav movement and ambitions, secular aims for the destruction of Turkey, opening of the Straits to Russian warships, etc)

Nov 25. Purchase of the Khedive of Egypt's shares in the Suez Canal, a master-stroke of British policy (**Benjamin Disraeli**) which indicated England's growing interest in the Near East.

Dec. 12. Efforts at mediation by the powers having led to nothing, the sultan, in order to forestall more energetic action, promulgated reforms for the whole Ottoman Empire which were to meet the demands made by the insurgents

Dec 30. The Andrássy Note, communicated to all powers signatory of the Treaty of Paris of 1856 It called for complete religious freedom in Bosnia and Herzegovina, abolition of tax-farming, use of local revenue for local needs, and establishment of a mixed Christian-Moslem commission to supervise these reforms This program was adopted by the powers and by the sultan (Jan 31, 1876), but failed of its purpose because it was rejected by the insurgents

1876, Jan.-Feb. Bismarck's advances to England, in the hope of meeting a possible Austrian-Russian rupture This move was ruined by the suspicion of **Lord Derby,** the English foreign minister

May 13 The Berlin Memorandum, drawn up by Andrássy, Gorchakov, and Bismarck after a conference at Berlin It reflected Andrássy's aversion to any policy of annexations (suggested by Bismarck and Gorchakov) and was an expansion of the Andrássy Note. It called for a two months' armistice, resettlement of the insurgents, concentration of the Turkish troops in a few localities, retention of arms by the insurgents, supervision of reforms by the consuls of the powers The memorandum was accepted by France and Italy, but was rejected by England, partly for technical reasons, but chiefly because of Disraeli's resentment of the failure to consult England in the drafting of the program

May-Sept. Insurrection in Bulgaria, suppressed with great severity by Turkish irregular troops (*Bulgarian horrors*), thousands slaughtered

June 30. Serbia declared war on Turkey, trusting in Russian support and hoping for the eventual acquisition of the insurgent provinces

July 2. Montenegro joined Serbia in the war.

July-Aug. The Serbs, commanded by the Russian general, Chernaiev, defeated in a series of engagements Serbia invaded

July 8. Meeting at Reichstadt of Andrássy and Gorchakov. **Reichstadt Agreement:** the two powers to insist on the *status quo ante bellum* in the event of the defeat of Serbia and Montenegro, and on the reforms for Bosnia and Herzegovina laid down in the Berlin Memorandum In the event of Serbian-Montenegrin victory, these two powers to be given parts of Bosnia and Herzegovina, but the larger part of these provinces to be awarded to Austria. Russia to obtain Bessarabia (lost in 1856) In the event of Turkey's collapse, Bulgaria and Roumelia to be autonomous states or independent principalities, Greece to acquire some territory, Constantinople to be a free city

Sept. 1. Complete defeat of the Serbs at Alexinatz. They appealed to the powers for mediation The Turks rejected proposals for an armistice, except on very hard terms Great excitement in Russia and demand for war Efforts of the Russians to secure assurance of German support in the event of war developing between Russia and Austria Bismarck's reply Germany would intervene only to prevent either Russia or Austria being mortally wounded or seriously weakened by the other

Sept. 6. Gladstone's pamphlet: *The Bulgarian Horrors and the Question of the East* Tremendous agitation in England against Turkish misrule This greatly hampered the government in a policy of supporting Turkey against Russia

Oct. 31. Turkey agreed to a six-week armistice, as a result of a **Russian ultimatum** to check the continued successes of the Turks

Nov. Russian preparations for war against Turkey Bellicose attitude of Disraeli, determined to frustrate the Russian designs

Dec. 12. First meeting of the **Constantinople Conference,** convoked at the instance of England Negotiations between **Lord Salisbury,** the British plenipotentiary, and **Count Ignatiev,** the Russian ambassador *Agreement:* Serbia to lose no territory, Montenegro to secure parts of Herzegovina and Albania conquered from the Turks; Bulgaria (i e the regions under the Bulgarian Exarchate, extending over most of Macedonia) to be divided into an eastern and a western province, Bosnia and Herzegovina to be united as a province, and this, as well as the two Bulgarias, to have a governor-general appointed by the powers with approval of the Turkish government, and a provincial assembly; reforms to be supervised by the powers

Dec. 23. Midhat Pasha, the grand vizier and leader of the Turkish liberals and nationalists, published the famous **constitution,** introducing a liberal régime for the whole empire and making reforms in special provinces ostensibly unnecessary.

1877, Jan. 18 An assembly of notables in Constantinople rejected all demands of the powers Failure of the Constantinople Conference, which closed Jan 20

Jan. 15. January Convention (Budapest Convention) between Russia and Austria, to settle disputes as to the terms of the Reichstadt Convention Austria to remain neutral in an eventual Russian-Turkish war, Austria to occupy Bosnia and Herzegovina when she saw fit, Serbia, Montenegro, and Herzegovina to form a neutral zone An **additional convention,** signed Mar 18 but antedated to Jan 15, reaffirmed the terms of the Reichstadt Convention with regard to the disposition of Turkish territory, no large state, Slavic or otherwise, to be erected in the Balkans

Feb.-Mar. Ignatiev mission to western capitals Efforts of the English to arrange disarmament of both Russia and Turkey

Apr. 24. RUSSIA DECLARED WAR ON TURKEY, the government yielding to the pressure of the Pan-Slav circles

May 6. British note to Russia, warning against an attempted blockade of the Suez Canal or occupation of Egypt and reaffirming England's traditional stand with regard to Constantinople and the Straits. Bismarck's suggestions to the British to take Egypt and other parts of the Ottoman Empire rather than provoke war Evasive reply of the Russians to the British note (June 8)

July 26, Aug. 14. Loose and negative **agreement between England and Austria,** listing seven points to which they would not agree in the event of a Russian victory The British cabinet had decided (July 21) to declare war on Russia if the latter occupied Constantinople and did not make arrangements for immediate retirement The reverses of the Russians at Plevna (July 20 ff) eased the situation

Dec. 10 Fall of Plevna, resumption of the Russian advance

Dec. 12. The Turks appealed to the powers for mediation. This was rejected by Bismarck Disraeli anxious to act, but his schemes were frustrated by members of his own cabinet (especially Derby) Andrássy contented himself with warning the Russians that Austria and the powers would demand a voice in the peace settlement

1878, Jan. 9 The Turks appealed to the Russians for an armistice

Jan. 23. The British cabinet decided to send the fleet to Constantinople, at the sultan's request Resignation of Lord Derby The fleet was recalled after reassuring reports had arrived from Constantinople. Derby rejoined the cabinet

Jan. 28. Andrássy proposed the convocation of a European conference.

Jan. 31 Armistice concluded, the Russians to occupy the lines just outside Constantinople War fever in England (*"We don't want to fight, but by jingo, if we do, we've got the men, we've got the ships we've got the money too"*)

Feb 8. Second British decision to send up the fleet. Other powers invited to join The fleet started to enter the Straits, but returned when the sultan, under pressure from the Russians, failed to give permission

Feb. 15. The British fleet finally arrived at Constantinople, having been ordered to proceed even without permission

Mar. 3. THE TREATY OF SAN STEFANO between Russia and Turkey (ratified Mar 23) **Montenegro** to be enlarged and given the port of Antivari, both **Montenegro and Serbia to be independent,** the latter also receiving some territory, **Rumania to be independent,** Russia reserving the right to give Rumania the Dobrudja in return for Bessarabia, **Bosnia and Herzegovina** to be granted reforms, **Bulgaria** to be an autonomous state under an elected prince and to be occupied for two years by Russian troops, it was to include most of Macedonia and to have a seaboard on the Aegean, **Russia** to receive **Ardahan, Kars, Batum,** and **Bayazid** on the Asiatic front, **Turkey** to pay a huge indemnity

Mar. 6. Andrássy issued invitations to a congress of the powers to meet at Berlin Long disputes between England and Russia as to what subjects might be discussed at the congress

Mar. 25. Mission of Ignatiev to Vienna; he failed to reconcile the Austrians to the Russian peace settlement.

Mar. 27. The British cabinet agreed to call out the reserves and to bring troops from India to occupy one or two stations in the eastern Mediterranean **Second resignation of Lord Derby. Lord Salisbury became foreign minister.**

Apr. 1. Salisbury's circular, restating the British position in strong and effective fashion. British efforts to establish common action with Austria. These were met by evasion.

May 8. Mission of Count Peter Shuvalov, Russian ambassador to London, to St Petersburg He there imposed a policy of agreement with England. He returned May 23 with the offer to push

Bulgaria back from the Aegean, pare it down in the west, and divide it into a north and south part.

May 30. Secret Anglo-Russian agreement, as arranged by Shuvalov

June 4. Secret Anglo-Turkish agreement, reluctantly accepted by the sultan. To meet the Russian advance in Asia Minor, the British promised to defend Turkey against any further attack on the sultan's Asiatic possessions. In return they were to be allowed to occupy **Cyprus.** The sultan promised to introduce reforms in his Asiatic territories

June 6. Anglo-Austrian Agreement, following the failure of the Ignatiev mission The agreement dealt with the future organization of Bulgaria and the length of Russian occupation

June 13-July 13. THE BERLIN CONGRESS: Bismarck, the "honest broker", **Gorchakov** and **Shuvalov** for Russia, **Andrássy** for Austria, **Disraeli** and **Salisbury** for England, **Waddington** for France, **Count Corti** for Italy; **Caratheodory** (a Greek) for Turkey The main decisions had been made in the preceding secret agreements, but there was much trouble and friction about details, especially after the Anglo-Russian agreement leaked out **Bulgaria was divided** into three parts· (1) Bulgaria proper, north of the Balkan Mountains, to be tributary and autonomous, (2) Eastern Roumelia, south of the mountains, to have a special organization under the Turkish government, (3) Macedonia, which was to have certain reforms **Austria** was given a mandate (June 28) to occupy Bosnia and Herzegovina and to garrison the Sanjak of Novi Bazar, a strip lying between Serbia and Montenegro The territory given to Serbia and Montenegro was reduced The **Greeks** were put off with promises for the future. **Rumania** was given the Dobrudja, but had to hand over southern Bessarabia to Russia **Serbia, Rumania,** and **Montenegro** became independent states **Russia** received Batum, Kars, and Ardahan Reforms were promised for the sultan's Asiatic provinces The British occupied Cyprus under the **Cyprus Convention** (above) Objections of the **French** were met by promising them permission to occupy **Tunis.** The **Italians** were put off with suggestions of expansion in Albania The upshot of the treaty was that it left Russian nationalists and Pan-Slavs profoundly dissatisfied and left the aspirations of Serbia, Bulgaria, and Greece unfulfilled. The Ottoman Empire, wholly at the mercy of the powers, was left with a few fragments of territory in Europe which were a constant bait for covetous neighbors. The promise of reforms in Macedonia and Asia Minor led to far-reaching agitation and trouble on the part of the Macedonians and Armenians

Oct 11. Agreement between Germany and Austria abrogating the provision of the Treaty of Prague (1866) requiring a plebiscite in North Schleswig. This agreement had really been reached on Feb 13, 1878, but was post-dated. Its publication (Feb. 4, 1879) was taken to reflect a German rapprochement with Austria

Nov. 20. Outbreak of war between England and Afghanistan, the result of the Russian advance in central Asia and the determination of the British to secure their frontier in India (p 867) The British drove out the Amir, **Sher Ali,** and put **Yakub Khan** on the throne In Sept 1879 the British agent, **Maj. Cavagnari,** was murdered and the war flared up anew **Abdurrahman** entered Afghanistan with Russian support, but made an agreement with the British (July 20, 1880) the British recognized him and gave him a pension

1879, Sept. 4 Establishment of the **Dual Control** (England and France) **in Egypt** (p 831) This grew out of the heavy investments of Europeans in Egypt and the financial difficulties resulting from the construction of the Suez Canal and many other public works by the **Khedive Ismail.** The Dual Control was first established in Nov. 1876, but had been suspended in Dec. 1878 when the khedive initiated ministerial government and gave the British and French controllers of finance seats in the cabinet This plan had not worked, because of the policy of the khedive of retaining power. England and France thereupon forced the **abdication of Ismail** (1879, June 26) and the succession of **Tewfik,** who restored the Dual Control

Oct. 7. ALLIANCE TREATY BETWEEN GERMANY AND AUSTRIA, concluded for five years, but regularly renewed; it remained in force until 1918 and was the foundation stone of Bismarck's alliance system *Provisions:* If either party were attacked by Russia, the other should come to its assistance with all forces, if either should be attacked by some other power, the other should preserve at least neutrality, if some other power should be supported by Russia, then each ally was obliged to aid the other The alliance was the result of a period of tension between Germany and Russia following the Berlin Congress, the Russian nationalists blaming Bismarck for Russia's diplomatic

defeat There had been months of newspaper recrimination culminating in a threatening letter of Tsar Alexander II to William I Bismarck, always fearful of a coalition built up by Russia against Germany and suspecting that Andrássy would soon be displaced by the pro-Russian party in Vienna, decided on the alliance, which Andrássy welcomed The negotiations were held up by the obstinate resistance of Emperor William, who yielded only when Bismarck threatened to resign There was some thought of bringing **England** into the combination, Disraeli was friendly, but the German ambassador, Count Munster, misrepresented the projected alliance as one directed chiefly against France and Bismarck allowed the matter to drop The immediate result of the negotiation was the **mission of Saburov** to Berlin, in the effort to effect a Russian-German alliance or the revival of the Three Emperors' League (Sept -Oct 1879) At the moment Bismarck evaded these advances

1880, June-Nov. Montenegrin troubles. The Albanian League, a union of tribes supported by the sultan, vigorously and successfully resisted the efforts of the Montenegrins to take over the Albanian territory assigned them by the Treaty of Berlin A conference of the powers at Berlin (June) decided that Montenegro should receive Dulcigno in lieu of some of the disputed territory The Turks resisted A naval demonstration of the powers at **Dulcigno** (Sept 28) had no effect The British government (under Gladstone since Apr) took a strong line and threatened to occupy the customs house at Smyrna The Turks finally yielded (Nov 25)

1881, May 12 Treaty of Bardo, establishing a **French protectorate over Tunis** This went back to the assurances of Salisbury and Bismarck during the Congress of Berlin, but the French government had not acted because of the indifference of French public opinion in matters of colonial expansion and because of distrust of Bismarck's motives The question was precipitated by the activity of the Italians, determined to make good their failure to secure gains at the Berlin Congress at Austria's expense The French prime minister, **Jules Ferry,** an ardent imperialist, took advantage of raids by Krumir tribes into Algeria (Mar 1881) to secure credits from the Chamber After the invasion of Tunis the bey gave in without much resistance The affair initiated a long period of **Franco-Italian tension** and modified the Mediterranean situation to England's disadvantage Gladstone protested, but the British government was committed by Salisbury's assurances

May 24. The Turks were obliged to cede to Greece a considerable part of **Thessaly** and part of **Epirus.** These territories had been promised Greece at the Berlin Congress, but the Turks had temporized In the autumn of 1880 there was acute danger of war In the end the Greeks had to content themselves with much less than had originally been envisaged

June 18. THE ALLIANCE OF THE THREE EMPERORS: Term three years, renewed in 1884 for three more years *Provisions·* If one of the contracting powers found itself at war with a fourth power (except Turkey), the other two were to maintain friendly neutrality Modifications of the territorial *status quo* in Turkey should take place only after agreement between the three powers, if any one of them should feel compelled to go to war with Turkey, it should consult its allies in advance as to the eventual results; the principle of the closure of the Straits was recognized, if this principle were infringed by Turkey, the three powers should warn Turkey that they would regard her as having put herself in a state of war with the aggrieved power; Austria reserved the right to annex Bosnia and Herzegovina when she saw fit, the three powers agreed not to oppose the eventual union of Bulgaria and Eastern Roumelia This treaty, kept rigorously secret, was the outcome of long negotiations between Bismarck and Saburov, the Russians being anxious for an alliance with Germany as protection against Austrian policy in the Balkans, and equally anxious for recognition of the closure of the Straits against possible English action Bismarck refused an agreement that would not include Austria and the Austrians were hostile to the idea until after the advent of the Gladstone government in England, which was unfriendly to Austria The final conclusion of the agreement was delayed by the assassination of the tsar (Mar 13, 1881)

June 28. Secret treaty between Austria and Serbia, the result of Prince Milan's resentment at being deserted by Russia in 1878 and of his chronic need for Austrian financial support Term ten years Serbia promised not to tolerate intrigues against Austria Austria promised to recognize Milan as king By Art IV Serbia engaged not to conclude any political agreement with another power without consulting Austria In case of war with other powers, each promised the other neutrality Austria promised that in favorable circumstances she would support Serbia in making acquisitions toward the south The treaty established more or less of a protectorate over Serbia and roused protests

from the Serbian ministers But Milan assumed personal responsibility

1882, May 20. TRIPLE ALLIANCE, between Germany, Austria, and Italy, concluded for five years and renewed at intervals until 1915 *Terms* If Italy were attacked by France without provocation, Germany and Austria were to come to Italy's aid, Italy to come to Germany's aid if the latter were attacked by France, if one or two of the contracting parties were attacked or involved in war with two or more great powers, the non-attacked member or members of the alliance should come to the aid of the other or others, if one of the allies should be forced to make war on some other great power, the others were to preserve benevolent neutrality The treaty was the result of Italy's isolation after the French occupation of Tunis and also a reflection of popular demand for security against radicalism and the prospect of intervention by other powers in behalf of the pope The Italians wanted above all a treaty of guaranty, assuring them of the possession of Rome This neither Austria nor Germany was willing to consider, though Austria was anxious for an agreement that would put an end to **irredentist agitation** (very active since 1876), and Germany was uneasy about the renewed Pan-Slav agitation (speech of Gen **Skobelev** in Paris, Feb 1882) and the possibility of a Franco-Russian alliance The Italians secured no specific guaranty of Rome, but received assurances against attack by France

July 11. Bombardment of Alexandria by the British fleet.

Sept. 13. Defeat of the Egyptians by the British in the **battle of Tel-el-Kebir British occupation of Egypt** (p 832) This was the outcome of a long development and the reflection of Britain's paramount interest in Egypt and the Suez Canal The re-establishment of the Anglo-French condominium and the reorganization of the government in the interests of foreign bondholders had resulted in the growth of a nationalist, anti-foreign movement, inspired by the Pan-Islamic leader, **Jamal ud-Din,** and led by army officers like **Arabi Pasha.** An Anglo-French note, inspired by Gambetta (Jan 8, 1882), was designed to strengthen the khedive, but was not followed up by action and only discredited the ruler as a puppet in foreign hands The British proposal to have the Sultan of Turkey intervene was wrecked by the opposition of the French On June 12 anti-foreign riots broke out at Alexandria and fortifications were constructed The French refused at the last moment to take part in the action, as did the Italians The British bombarded Alexandria and then landed forces to protect the Suez Canal After the battle of Tel-el-Kebir, Cairo was occupied Arabi was sent into exile and the nationalist movement collapsed During the entire crisis the English had enjoyed the support and encouragement of Bismarck, who thenceforth used the Egyptian question as a lever to bring pressure on Britain in other matters The affair led to the estrangement between England and France which lasted until 1904 and was therefore a development of prime importance in European diplomacy

1883, Feb -Apr. Establishment of the Germans, under Luderitz, at Angra Pequeña (Southwest Africa), marking the **beginning of German colonialism** (growing agitation from 1875 onward — *German Colonial Society*, 1882) and Bismarck's conversion to imperialism The German establishment was opposed by the British, more through confusion than through interest, but the German government took the settlement under its protection (Apr 24) There followed two years of growing **tension between England and Germany,** the dispute extending to East African territory, the Cameroons, etc Bismarck managed to establish a loose **entente with the French** (Jules Ferry), especially in the question of Egypt (financial conference at London, June–Aug 1884), and thereby to oblige the British to accept Germany as a colonial power

Oct. 30. Alliance of Rumania and Austria, to which Germany adhered This was due to Rumanian dissatisfaction with the settlement of 1878 and fear of violation of Rumanian territory in the event of another advance of the Russians into the Balkans The Rumanians, by the alliance, shelved their irredentist aspirations in Transylvania, but the agreement was kept exceedingly secret and had little effect on public opinion *Terms* Austria to come to the assistance of Rumania in case the latter were attacked without provocation, Rumania to come to Austria's aid if the latter were attacked in a portion of its states bordering on Rumania (i e by Russia) The treaty was concluded for five years, but was periodically renewed and remained in force until 1916

Nov. Battle of El Obeid. Gen. **Hicks** and an Egyptian force defeated by the **Mahdi,** religious leader of a movement directed against Egyptian rule in the Sudan. The British thereupon obliged the very reluctant Egyptian government to decide on the **evacuation of the Sudan.** Gen **Charles Gordon** was sent out (Jan. 1884) to evacuate the garrisons. Gordon, more or less following ideas of his own, was

surrounded and besieged in **Khartum** The British government belatedly sent out a relief expedition under Gen **Wolseley** (Aug), but it was unable to save Gordon Khartum was taken and Gordon killed (Jan 26, 1885)

1884, Feb. 26 British agreement with Portugal, recognizing the latter's rights to territory at the mouth of the Congo This was intended to frustrate the designs of King Leopold of Belgium (head of the Congo Association) and of France France and Germany together protested so vigorously that the British abandoned the treaty (June 26)

1884, Nov. 15—1885, Feb 26. The Berlin Conference on African Affairs, arranged by Bismarck and Ferry Fourteen nations, including the United States, agreed to work for the suppression of slavery and the slave trade and declared complete liberty of commerce in the basin of the Congo and its affluents and on the adjacent coasts Freedom of navigation on the Congo and Niger and their affluents was also declared The Congo Basin was declared neutral The principle of effective occupation to establish a claim on the coasts was set up At the same time the various powers recognized the **Congo Free State,** which had developed under Leopold of Belgium from the **International Association for the Exploration and Civilization of Central Africa** (1876), and later the **International Association of the Congo** (1878), financed by Leopold and exploiting the discoveries of **Henry M. Stanley**

1885, Mar. 31. Fall of Jules Ferry from power, after a minor French reverse at Langson in the course of the **war with China** (p 880) over Annam and Tonquin (July 12, 1884–June 9, 1885) **End of the Franco-German entente;** gradual reconciliation of the English and Germans, with recognition of the German acquisitions in Africa and the Pacific

Apr. Acute Anglo-Russian crisis, resulting from an attack by Russian troops on the Afghan forces at **Penjdeh** (Mar 30) The Russians had gradually absorbed the central Asian khanates (**occupation of Merv,** Feb 1884) and reached the territory supposedly under the Amir of Afghanistan Efforts to delimit the frontier had been unsuccessful, due largely to the temporizing of the Russians News of the Penjdeh clash brought the two countries to the verge of war The British occupied **Port Hamilton,** on the Korean coast (Apr 26), in view of probable operations against Vladivostok But the British government ultimately drew back, apparently after abortive efforts to secure the consent of the powers for the passage of British warships through the Straits into the Black Sea The question was adjusted by compromise (Sept 10, 1885).

Sept. 18. Revolution in Eastern Roumelia, initiating another period of tension in the Near East The movement was directed at union with Bulgaria **Prince Alexander of Battenberg** (elected Prince of Bulgaria in Apr 1879) was obliged to assume leadership or else abandon his position The Russian tsar at once (Sept 23) recalled all Russian officers from the Bulgarian army, an expression of the dislike and even hatred for Prince Alexander that had been developing during the preceding years Bulgaria was saved through the unwillingness of the sultan to send troops, and through the warm sympathy of England, which reversed its attitude on the question of union in order to meet the change in Russian policy Austria was sympathetic to the union, but embarrassed by the clamor of the Serbs, who, like the Greeks, feared the movement might spread to Macedonia, where they too had claims

Nov. 13. Serbia declared war on Bulgaria, after it had become clear that an ambassadorial conference at Constantinople would not rescind the union of Bulgaria and Eastern Roumelia.

Nov. 19. Complete defeat of the Serbians in the battle of Slivnitza.

Nov. 27. Serb defeat at Pirot **Bulgarian invasion.** This was stopped only through Austrian intervention to save Serbia (**Khevenhüller mission**).

1886, Jan. 4. Greek note to Turkey demanding the territorial promises of 1878 by way of compensation for Bulgarian claims.

Jan. 24. Note of the powers to Greece warning against attack on Turkey The Greeks ignored these warnings and prepared for war

Feb. 1. Agreement between Bulgaria and Turkey. Prince Alexander appointed governor-general of Eastern Roumelia for five years Russia insisted that Alexander should not be specifically named The powers accepted this compromise and the agreement was signed on Apr 5

Mar. 3. Treaty of Bucharest: "Peace is restored between Bulgaria and Serbia"

May 10-June 7. Pacific blockade of the Greek coast by an international naval force The Greeks were obliged to disarm

Aug. 20. Kidnaping and **abdication of Alexander of Battenberg** by a

group of officers, supported by Russia A counter-movement in Eastern Roumelia, led by **Stephen Stambulov**, overthrew the Russian faction and recalled Alexander

Aug. 28. Arrival of Alexander. He appealed to the tsar for mercy, but received a cold reply

Sept. 7. Definitive abdication of Alexander of Battenberg. Indignation in Europe generally, but especially in England

Oct. 27. Bulgarian national assembly at Tirnovo Despite pressure from Russia (**Kaulbars mission**) the Bulgarians elected as prince **Waldemar of Denmark**, who declined the offer Kaulbars and other Russian agents left the country (Nov 17). Danger of Russian occupation of Bulgaria

Nov. 13. Speech of Count Kalnóky, the Austrian foreign minister, warning against Russian action **Growing Austro-Russian tension**, much deplored by Bismarck, who was constantly urging an agreement based on the division of the Balkans into an Austrian (western) and a Russian (eastern) sphere of influence. Bismarck reminded the Austrians that the alliance of 1879 did not oblige Germany to support a forward policy of Austria in the Balkans, but the Austrians enjoyed the sympathetic support of England

1886-1887. Rapid development of **nationalist and revenge agitation in France**, the reaction to Ferry's policy of understanding with Germany in colonial expansion. Activity of **Paul Déroulède** and his *League of Patriots* (founded 1882) in behalf of an alliance with Russia Appointment of Gen. **Georges Boulanger** as minister of war (Jan. 1886) He quickly became the darling of the country and the symbol of revenge on Germany (Longchamps review, July 14, 1886) Corresponding anti-German, pro-French agitation of the Russian nationalists (**Michael Katkov** and the *Moscow Gazette*)

1887, Jan. 11. Great speech of Bismarck, reviewing the international situation, warning the nations against war, redefining the German attitude, and advocating a large increase in the German army

Feb. 12 FIRST MEDITERRANEAN AGREEMENT, between England and Italy, adhered to by Austria (Mar 24) and Spain (May 4) The agreement took the form of an exchange of notes (Anglo-Italian; Anglo-Austrian; Italian-Spanish, acceded to by Germany and Austria, May 21). Bismarck had encouraged the combination, exploiting the acute Anglo-French tension (over Egypt) and the Italian-French tension (tariff war, etc). The notes provided for the maintenance of the *status quo* in the Mediterranean, including the Adriatic, Aegean, and Black Seas If the *status quo* could not be maintained, the contracting parties were to agree beforehand as to changes Italy was to support the British policy in Egypt and England the Italian policy in North Africa. The Anglo-Austrian note stressed rather the community of interest of the two powers in the Near East Spain promised not to make an agreement with France regarding North Africa which should be aimed at Italy, Austria, or Germany England refused to bind herself to any specific action, but the effect of the agreements was to provide a basis for common action in the event of disturbance in the Mediterranean by France or Russia

Feb. 20. RENEWAL OF THE TRIPLE ALLIANCE for five years Negotiations had been carried on since Nov 1886, the Italians demanding more far-reaching support of their interests in North Africa This Bismarck was willing to concede, in order to be assured of Italy's friendship in case of a clash with France But Austria objected, her attention being focused on the Balkans In the end the old alliance was renewed and additional German-Italian and Austro-Italian agreements made. Germany promised that in the event of French efforts to expand in North Africa, if Italy were obliged to take action or even make war on France, Germany would come to the aid of Italy If France were defeated, Germany would not object to Italy's taking "territorial guaranties for the security of the frontiers and of her maritime position" The Austro-Italian agreement provided for the maintenance of the *status quo* in the Orient If this became impossible, neither party should occupy territory except in agreement with the other on the principle of reciprocal compensation This was not to apply to the eventual annexation of Bosnia and Herzegovina by Austria.

Apr. 20. Arrest of Schnaebelé, a French frontier official who had been condemned by a German court for espionage It was never determined whether he was arrested by the German police on the German or French side of the border He was released a week later, when it was shown that he had been invited to a conference by his German colleagues The affair roused great popular excitement, but was of much less significance than previously supposed.

May 16. Fall of the French cabinet in which Boulanger was minister of war. He was excluded from the new

cabinet of Rouvier Beginning of the reaction against him in French government circles

May 22. The Drummond-Wolff Convention, by which England agreed to evacuate Egypt within three years, but reserved the right to reoccupy in case of disorder This convention was wrecked by the opposition of France and Russia — the first striking case of Franco-Russian collaboration against England.

June 18. Signature of a secret **RUSSIAN-GERMAN TREATY** (the *Reinsurance Treaty*) to replace the expiring Alliance of the Three Emperors, which Russia refused to renew The two powers promised each other neutrality in the event of either becoming involved in war with a third power, but this was not to apply in case of aggressive war of Germany against France, or of Russia against Austria They were to work for the maintenance of the *status quo* in the Balkans and Germany was to recognize Russia's preponderant influence in Bulgaria The principle of the closure of the Straits was once more reaffirmed An additional and very secret protocol promised German assistance in re-establishing a regular government in Bulgaria and in opposing the restoration of Battenberg It also promised moral and diplomatic support "to the measures which His Majesty [the tsar] may deem it necessary to take to control the key of his empire" (i e the entrance to the Black Sea) This famous treaty represented Bismarck's effort to keep Russia from France and to buy her friendship by signing away things that he knew Russia could never get on account of English and Austrian opposition On the Russian side the treaty reflected the victory of the foreign minister, Giers, over the extreme nationalist groups

July 7. The Bulgarian Assembly elected Prince Ferdinand of Saxe-Coburg-Kohary as prince, despite the opposition of the Russians He was not recognized by the powers Continuance of the Bulgarian crisis and of the danger of Russian intervention

Dec. 12. SECOND MEDITERRANEAN AGREEMENT (better *Near-Eastern Entente*) between England, Austria, and Italy (Bismarck having refused to participate — Bismarck-Salisbury correspondence, Nov) It restated the principle of the *status quo* in the Near East and the importance of keeping Turkey free of all foreign domination. Turkey must not cede her rights in Bulgaria to any other power or allow occupation of Bulgaria by any other power Neither must she give up any rights in the Straits or in Asia Minor If she resists efforts at encroachment, the three contracting powers will agree as to measures to support her If she fails to resist, the three powers will consider themselves justified, jointly or separately, in the provisional occupation of such Turkish territory as may be deemed necessary to secure respect for the treaties

1888, Jan. 28. Military agreement between Germany and Italy, providing for the use of Italian troops against France in the event of a Franco-German war

Feb. 3. Publication of the German-Austrian Alliance of 1879. This was intended as a warning to Russia, where nationalist agitation against Germany and Austria continued. Bismarck vetoed plans of German and Austrian military circles for a "prophylactic" war against Russia

Feb. 6. Bismarck's great Reichstag speech, dealing largely with the Russian situation and ending, "We Germans fear God, and nothing else in the world" The main terms of the Triple Alliance and of the Mediterranean Agreements were allowed to leak out at the same time. Taken together they served as a cold *douche* on the hopes and aspirations of both France and Russia

Feb. Acute crisis in Franco-Italian relations, Crispi fearing a sudden attack by the French fleet on Spezzia

May 15. Italy adhered to the alliance of Germany and Austria with Rumania (p 738).

1889, Mar. Naval Defense Act, setting up the two-power standard for the British fleet and establishing an extensive building program.

July. Crisis in the relations of Italy and the papacy The pope was on the verge of leaving Rome The Italians again feared an attack by France, and induced the Germans and British to issue warnings

1890, Mar. 18. DISMISSAL OF BISMARCK (p 691), resulting at least in part from the dissatisfaction of the young Emperor William II with Bismarck's policy toward Russia and his desire for closer relations with Austria and England.

Mar. 23. A German ministerial conference decided, on the advice of **Baron Fritz von Holstein** (long a collaborator of Bismarck, who had recently drifted from him), not to renew the Reinsurance Treaty with Russia It lapsed on June 18, despite numerous Russian attempts to reopen the question of renewal.

July 1. Anglo-German Colonial Agreement (*Heligoland Treaty*), by

which Germany gave up large claims in East Africa and received in return the island of Heligoland, which England had obtained from Denmark in 1815 Since the island at that time was regarded as practically useless, the whole treaty was looked upon as a striking demonstration of German readiness to purchase the friendship of England

Aug. 17-22. Visit of the Emperor William to the Tsar at Narva Last efforts of the Russians to secure some agreement with Germany, evaded by the Germans

1891, Feb 18-27. Visit of the Empress Frederick, mother of William II, to Paris Anti-German demonstrations and Franco-German tension Russia supported France, but avoided any definite commitment

May 6. Premature renewal of the Triple Alliance, the three documents being merged in one and Germany assuming somewhat larger obligations to support the Italian claims in North Africa The renewal of the treaty was due to German fears lest France might force Italy into her orbit The contracting parties were to do their utmost to associate England in support of Italian aspirations

July 4 Great state visit **of Emperor William to London** Much talk of England's association with the Triple Alliance

July 24. Visit of a French squadron under **Admiral Gervais, to Cronstadt.** Frantic demonstrations of Franco-Russian friendship The tsar listened to the *Marseillaise* played on one of the French warships The **Franco-Russian Agreement,** which had been prepared by French loans, etc., began to loom on the horizon, the result primarily of German rejection of the Reinsurance Treaty, the hasty renewal of the Triple Alliance, and the demonstrations of Anglo-German solidarity

Aug. 21, 27. THE AUGUST CONVENTION between France and Russia, first fruit of the negotiations The French desired a hard-and-fast agreement, but this was watered down by the Russians until it was hardly more than an agreement to consult as to what measures should be taken by the two powers in case the maintenance of peace were threatened or one of the parties menaced by aggression All efforts of the French to arrange for mobilization, etc (especially during Giers' visit to Paris, Nov), proved abortive.

1892, Aug. 1. Mission of General Boisdeffre to St. Petersburg, with a draft military convention He found the Russian military men hesitant, and the draft was subjected to many changes It was finally accepted "in principle," but as such had no force Further development of the Franco-Russian alliance was delayed by the outbreak of the **Panama Scandal** (p 640), which upset the French political scene for a year, and by the great **famine in Russia,** which paralyzed the government for an even longer period

1893, July 13 French ultimatum to Siam, resulting in a short but severe crisis in Anglo-French relations The French took a strong stand and generally won their point, thereby making a good impression on Russia The Germans, who were half prepared to back the English, were disgusted by the backdown

July 15 Passage of the German military bill, reducing service in the infantry to two years and increasing the forces This created much uneasiness in both France and Russia and reminded the Russians of the value of the connection with France

Oct. 13 Visit of a Russian squadron under **Admiral Avellan to Toulon.** Wild demonstrations of affection for Russia throughout France Alarm of the British for their position in the Mediterranean

1893, Dec 27, 1894, Jan. 4. Exchange of notes between the **Russian and French governments,** formally accepting the military convention worked out 18 months before The agreement was really political as much as military, but was classed as a military convention in order to circumvent the French constitution, which required submission of treaties to the Chamber of Deputies The convention was to remain in force as long as the Triple Alliance It provided (1) that if France were attacked by Germany, or by Italy supported by Germany, Russia would employ all available forces against Germany, if Russia were attacked by Germany, or by Austria supported by Germany, France would employ all available forces against Germany (2) In case the forces of the Triple Alliance, or of any one power a member of it, mobilized, France and Russia should mobilize without delay Other articles provided for the number of troops to be employed, for specific plans of the general staffs, for secrecy, etc

1894, Mar. Resignation of Gladstone and succession of **Lord Rosebery** as British prime minister Passage of the **Spencer naval program,** providing for a great increase of forces in the next five years This was the culmination of a severe naval scare and widespread agitation during the winter, the reflection of English anxiety about the Franco-Russian

combination as it affected the Mediterranean situation

Mar. 16. Conclusion of the Russian-German tariff treaty, after years of tariff war and negotiations This agreement demonstrated the Russian desire not to be drawn into hostilities with Germany

June Breakdown of efforts by Rosebery and Kalnóky to revitalize the connection between England and the Triple Alliance Negotiations had extended over six months and finally failed because of Germany's unwillingness to assume responsibility for any English interest Beginning of the Anglo-German estrangement

May 12. Treaty between the British government and the Congo Free State by which the British leased to King Leopold for the duration of his life a large tract on the left bank of the Upper Nile, and to Leopold and his successors a much larger tract lying to the west of the first In return Leopold leased to the British a corridor 25 kilometers in width between Lakes Tanganyika and Albert Edward, which was to serve as a connecting link for the **Cape-to-Cairo telegraph and railway system,** under discussion since 1888 The treaty was a modified version of an earlier one (**MacKinnon Treaty** of May 24, 1890), which the British government had later disavowed The British, having become aware of the importance of the Sudan for the assurance of Egypt's water supply, were confronted by encroachments of other powers The penetration of the Germans into Uganda was checked by the Heligoland Treaty of July 1, 1890 (p 741) and Uganda was ultimately taken over from the *Imperial British East Africa Company* (Apr 12, 1894) But Leopold was constantly sending expeditions into the Nile country from the Congo, and the French, who disputed the Congo claims, were also penetrating into the Sudan (**Monteil mission,** May 1893) Efforts of the British to block the French by assigning the crucial area to Germany (agreement of Nov 1893) were frustrated when the Germans in turn signed away the region to France (agreement of Mar 15, 1894) The British therefore thought best to lease the territory along the Nile to Leopold, as the least dangerous competitor The French at once protested, on the basis of their treaties with the Congo The Germans joined in the protest on account of the corridor, which ran along the frontier of German East Africa In order to conciliate the Germans, the British abandoned the corridor (June 1894), but in the end they were obliged to allow the whole treaty to lapse Under pressure from Paris, Leopold (Aug 14, 1894) was forced to shelve his claims The whole episode was of vital importance in the **British struggle to control the Nile.** From the European angle it demonstrated once more the rift between England and Germany and the renewed tendency of Germany and France to collaborate in colonial affairs against England

Aug 1. Outbreak of war between China and Japan, over Korea (below, and p 881)

Aug.-Sept Armenian massacres. These were the result of the failure of the powers (1878–1882) to secure for the Asiatic provinces of Turkey the reforms envisaged by the Treaty of Berlin Armenian nationalists, inspired by the example of Russian Pan-Slavs and terrorists, had organized secret revolutionary groups (leader **Avetis Nazarbek**), which, operating from Geneva, Tiflis, Paris, and other places, followed a policy of provoking troubles in Armenia in the hope of calling forth reprisals by the Turks and so bringing about European intervention From 1890 on there were constant disturbances, culminating in the Armenian rising of Aug 1894 in the vicinity of **Sassun** This was put down with ferocity by the Kurdish irregular cavalry (Hamidié regiments) The result was a great outcry in Europe, particularly in England, where ill-informed humanitarians called on the Liberal government to intervene Ultimately the sultan appointed a **commission of investigation,** which was joined by British, French, and Russian delegates Lord Rosebery hoped to develop further this **Near-Eastern Triplice,** but Russia, threatened in her own territory by the prospect of an Armenian state, was adverse to any action The commission produced a fairly innocuous program of reform (Apr 1895) The sultan, as usual, temporized Suggestions of the British for the use of pressure were flatly rejected by Russia and nothing was done

Oct 6. The British government invited Germany, France, Russia, and the United States to join in **intervention in the Far East,** the Chinese having been regularly defeated in battle with the Japanese The projected intervention failed because of the unwillingness of the United States and Germany to take part

1895, Apr. 17. Treaty of Shimonoseki between China and Japan China and Japan recognized the full independence of **Korea;** China ceded to Japan **Formosa,** the **Pescadores Islands,** and the whole of the **Liaotung Peninsula,** with Port Arthur; China was to pay a huge indemnity, China was to conclude a treaty of commerce,

opening seven new ports *Reaction of the powers:* **England** reasonably well satisfied, especially with the commercial clauses, and ready to abandon defeated China for the rising power of Japan, **Russia** most directly affected since the beginning of Russian activity in the Far East (*Trans-Siberian Railway* begun 1891) and the development of interest in Manchuria and Korea (important because of its excellent open harbors) The Russians were long undecided whether to oppose the Japanese or to seek an agreement with them The Tokyo government was quite prepared for a territorial deal, but ultimately the Russians rejected these advances in view of the readiness of the **Germans** to join in action to check Japan (growing German commercial interests in the Far East, above all German anxiety to re-establish close relations with Russia and to divert Russia to the Far East, thus emasculating the Franco-Russian Alliance) **France,** though she had extensive interests and aspirations in southwestern China, followed the Russian lead rather reluctantly, simply in order not to be left out of the picture

Apr. 23. INTERVENTION OF RUSSIA, GERMANY, AND FRANCE at Tokyo England refused at the last moment to join in the action The Japanese were "advised" to retrocede the Liaotung Peninsula in return for an increased indemnity. After some hesitation the Japanese government yielded Beginning of the acute antagonism between Russia and Japan in the Far East Formation of the **Far-Eastern Triplice** (Russia, Germany, and France) which, in the following years, exploited the weakness of China

June 25. Formation of the **Salisbury cabinet** in England, with **Joseph Chamberlain** at the colonial office Beginning of the most active phase of British imperialism In view of Britain's isolation and the situation in the Near East, Africa, and the Far East, Salisbury tried at first to throw off the danger of French and Russian advance by reconstituting close relations with Germany and the Triple Alliance

Aug. 5. FAMOUS INTERVIEW BETWEEN WILLIAM II AND SALISBURY AT THE COWES YACHT RACES. Salisbury hinted broadly at the advisability of partitioning the Ottoman Empire as the best solution of the chronic Near-Eastern troubles His idea was clearly that the Russians should be allowed to take Constantinople, but the Germans misunderstood the premier's design and interpreted it as a move to embroil the Continental powers in the Near East and smash the reviving friendship between Germany and Russia The emperor therefore rejected all suggestions. When he discovered his mistake, he tried to arrange a further interview with Salisbury, but this came to naught through further misunderstanding The result was profound distrust between Salisbury and the emperor (encouraged by Baron von Holstein), which only served to aggravate relations between the two countries

Oct. 1. First Armenian massacres in Constantinople following a great and provocative Armenian demonstration

Oct. 17. Under pressure from the powers, the sultan finally accepted the **program of reforms for Armenia.** Nevertheless, the massacres continued, taking place in various cities all over Anatolia A British squadron was assembled outside the Dardanelles and British action was deferred solely because of apprehension as to what France and Russia might do The Italians supported the English and **Count Goluchowski** (Austrian foreign minister since June) actually ignored German advice and took the lead in recommending international naval action at Constantinople. During the crisis (Nov.) the Russians planned to send an expeditionary force to the Bosporus **(Nelidov scheme)** and to seize the Turkish capital before the British and their allies could get there The execution of the scheme was deferred in part because of inadequate preparation, in part because of the unwillingness of the French to become embroiled in war

1896, Jan. 3. THE KRUGER TELEGRAM, sent by Emperor William to **President Kruger** of the South African Republic **(Transvaal)** congratulating him on the defeat of the raiders led by Dr. Jameson The raid was the culmination of a long development and of acute tension in the relations between England and the Transvaal (p. 856) The Kruger telegram reflected German policy in this whole question. German interests in the Transvaal were considerable, but not decisive The Germans made themselves the advocates of the Transvaal because they hoped (this was Holstein's plan) to demonstrate the value of German friendship to England by annoying the British into better relations When news of the Jameson raid reached Berlin, the emperor, assuming that the British government was privy to the scheme, demanded strong measures and even military intervention on behalf of Kruger. His advisers did their utmost to cool his ardor, but in the end agreed to the telegram of congratulations to Kruger

This created a storm of indignation and recrimination in England, especially when it became known that the real purpose of the German government was to beat the British into friendship The governments indeed remained calm, but public opinion on both sides was so stirred up that for the future a policy of friendship became almost impossible. Loud demands for an agreement with France and Russia were met by the British government by an agreement with France (Jan. 15) in which the British abandoned many of their claims in Siam, and by approaches to Russia which, however, led to nothing.

Feb. Reconciliation between Russia and Bulgaria, the new tsar, Nicholas II (1894–1917), desiring to bring the feud to an end, and Prince Ferdinand having expressed his readiness to baptize the Crown Prince Boris in the Orthodox faith Russia took the initiative in securing the **recognition of Ferdinand by the powers,** but refused to encourage the Bulgarian agitation in Macedonia, which had become very active since the **dismissal of Stambulov** (May 1894) Stambulov was murdered by Macedonian revolutionaries (July 17, 1895) and the revolutionary committees (founded Apr 1895) were attempting to start an insurrection in the province, in order to exploit the Armenian crisis Russia was anxious to keep the Near East quiet while following her designs in the Far East

Feb. Outbreak of the insurrection in Crete, fomented by Greeks who were intent on the annexation of the island Under pressure from the powers the sultan eventually agreed (July 3) to the restoration of the **Pact of Halepa** (1878), which had introduced a large measure of self-government in the island and which had been curtailed after the suppression of a rising in 1889 Greek support of the insurgents continued The Austrian government proposed a blockade of Crete (July 25) This was rejected (July 29) by England, where anti-Turkish feeling ran high The sultan accepted a **new reform scheme** (Aug 25) drawn up by the ambassadors of the powers (Crete to have a Christian governor, named by the sultan with the approval of the powers, the Cretan Christians to have two-thirds of all offices and the Cretan assembly to have wide powers; a European commission was to reorganize the gendarmerie, courts, and finances) This program was accepted by the insurgents (Sept 12)

Mar. 1. Battle of Adua. Disastrous defeat of the Italians by the Ethiopians By the **Treaty of Uccialli** (May 2, 1889) the Italians had hoped to establish a **protectorate over Ethiopia.** This was recognized by the British (agreements of Mar. 24 and Apr 15, 1891) on condition that the frontier remain 100 miles from the Nile and that the Italians promise not to interfere in any way with the Nile water. Thus the British hoped to use the Italians as a bulwark to protect the Nile. This plan was frustrated by the French (established on the Red Sea at Obock, 1862), who were anxious to get to the Nile and connect their western and eastern African holdings in a great belt **Menelek,** Emperor of Ethiopia, denounced the Treaty of Uccialli (1891) and encouraged the French (**Jibuti-Addis Ababa Railway** concession, 1893), who in turn supplied him with munitions War broke out between Italy and Ethiopia in the autumn of 1895 and led to a series of reverses of the Italians Pressed by demands from Crispi, Gen Baratieri decided on a march to Auda. In the mountains his forces became divided, after which they were overwhelmed by much greater numbers of Ethiopians

Mar. 12. British decision to begin the **reconquest of the Sudan** by an advance on Dongola This decision was taken less because of the frantic appeals of Italy and Germany for aid, or because of the reports of dervish misrule, than because of the fact that the Italian collapse in Ethiopia meant the collapse of the British system of protecting the Nile on the east. Danger of French advance in that region, as well as from the west (second **Monteil mission,** July 1895; **Marchand mission,** Feb 1896), despite the famous **Grey declaration** (Mar 28, 1895) stating that England would regard such action as "unfriendly," obliged the government to re-establish control of the Sudan itself The French and Russian governments refused their consent to the use of Egyptian funds, but the British circumvented this difficulty by making Egypt a loan

June 3 Treaty of alliance between Russia and China, signed by **Li Hung Chang** during his attendance at the coronation of the tsar at Moscow The treaty was the outcome of long negotiations through which the Russians strove to secure a reward for the intervention against Japan in 1895 Its term was 15 years During this period each party was to aid the other in the event of aggression by Japan against Russian territory in the Far East, China, or Korea Russia was given permission to run the Trans-Siberian Railway across northern Manchuria to Vladivostok, thus cutting off a large detour to the north and making possible the economic penetration of Manchuria.

June 9. Lobanov-Yamagata Agreement between Russia and Japan, regarding Korea Russian influence had been predominant there since Feb , when the king, in dire dread of the Japanese, who had engineered the murder of the queen, fled to the Russian legation The Russians rejected a Japanese offer to divide the country into a northern (Russian) and a southern (Japanese) sphere By the agreement of June 9 both parties promised to withdraw their forces and co-operate in the work of reform In case of disorder they were to consult before sending troops. The agreement established what amounted to a condominium

Aug. 26. Attack on the Ottoman Bank by Armenian revolutionaries They seized the building and threatened to blow it up unless their demands were met Eventually they were induced to withdraw, but other outbreaks occurred in the capital This led to the greatest of the **Armenian massacres,** lasting three days and resulting in the slaughter of thousands of humble Armenians The horror was stopped by the vigorous intervention of the ambassadors Repetition of the crisis of 1895 as regards the European powers England was anxious to intervene and an effort was made to persuade the tsar (who visited the queen at Balmoral in Sept) to join in the action, but Nicholas was held back by his advisers (**death of Lobanov,** Aug 30, ascendancy of Nelidov, ambassador at Constantinople). The Russian government adopted **Nelidov's scheme** for the seizure of Constantinople and the Straits in the event of action by the British (Nov). But, as in the preceding year, nothing came of the plan, not so much because of the opposition of Witte, the powerful finance minister, as because of inadequate preparation and the lukewarmness of France. With respect to Armenia the powers were unable to agree on any course of action The disorders continued more or less until June 1897, after which the revolutionary movement, having attained nothing but the massacre of thousands of Armenians, gradually collapsed

1897, Feb. 2. Cretan insurrection resumed, supported by the Greek *Cretan Committee* and the *Ethniké Hetairia,* an organization designed for the realization of Greek aspirations in Macedonia. The Greek government was forced by public opinion to send ships and troops to Crete (Feb. 10, following the proclamation of union with Greece, Feb. 6). The powers, in dread of a rising in Macedonia, were eager to check the movement, despite popular sympathy with the Greeks At the suggestion of **Muraviev,** the new Russian foreign minister, the powers (Feb 15) landed troops in Crete, to hold the island in "deposit" for the time being But England (Feb 17) rejected a Russian-Austrian proposal that the Piraeus be blockaded The powers handed in notes to Greece and Turkey (Mar 2) promising **autonomy for Crete** and demanding withdrawal of the troops on pain of "measures of constraint" The Greek government rejected the note and on Mar 18 the **blockade of Crete** was proclaimed The war in Crete went on

Apr. 17. WAR BETWEEN GREECE AND TURKEY, the result of the massing of Greek troops on the Macedonian frontier and attacks by the bands of the *Ethniké Hetairia* The British had refused to take part in a blockade of Volo, which would have made these preparations impossible Serbia and Bulgaria were eager to join in the assault on Turkey, but were deterred by strong warnings from Russia

Apr. 30. Russian-Austrian Agreement, concluded during a visit of Francis Joseph and Goluchowski to St Petersburg The two powers agreed to maintain the *status quo* in the Balkans, and, if partition became inevitable, to work for the division of the area among the Balkan states, to which was to be added an Albanian state The joint action of the two powers prevented Serbia and Bulgaria from associating themselves with Greece

May 10. The Greeks appealed to the powers, after a series of decisive defeats by the Turks They had first been obliged to recall their troops from Crete and to accept in advance the decisions of the powers An armistice was arranged (May 19) and a peace settlement reached (Sept 18). Turkey was allowed only a small rectification of the frontier in her favor, and an indemnity. The Cretan question remained open until Nov 1898, when the powers finally agreed to name **Prince George of Greece** as governor of the island, and withdrew their forces.

Nov. 14. Landing of German forces at Kiao-chow Bay, and occupation of Tsingtao, following the murder of two German missionaries (Nov. 1) Ever since 1895 the Germans were determined to secure a port on the Chinese coast as reward for their intervention against Japan But they had been unable, until 1897, to decide which port was most desirable Kiao-chow had finally been settled on Despite the fact that the tsar had given his approval (visit of William II to St Petersburg, Aug 1897), the Russian foreign minister raised

objections and claimed prior rights There was a period of acute uncertainty, but the Russians gave up their opposition The Chinese refused the German demands until Mar 6, 1898, when an agreement was signed giving Germany a lease of the bay for 99 years and permission to construct two railways in Shantung Province and to operate mines

Dec. 14. The Russian fleet ordered to proceed to Port Arthur. This was the first step in the acquisition of the port, as recommended by Muraviev and approved by the tsar, though opposed by Witte and all the other ministers (council of Nov. 25)

Dec.—1898, Mar. Conflict between Russia and England over a loan required by China Both sides put forward extremely hard conditions Russia demanded a monopoly of railroad-building in Manchuria and the right to build a railroad from the Trans-Siberian south to the Yellow Sea, where she was to be permitted to construct a port, England demanded a concession for a railroad from the Burmese frontier to the Yangtze Basin and a promise not to alienate territory in the Yangtze Valley, as well as other commercial concessions

1898, Jan. 25. Salisbury's note to Russia, aiming at a compromise The British premier in effect proposed that all Asia should be divided by a line from Alexandretta to Peking into a northern (Russian) sphere and a southern (British) sphere The Russians evaded these advances, feeling no need for abandoning half of Asia (the better half) to England Instead, the Russians pressed on the Chinese a demand for the lease of **Talienwan and Port Arthur** (Mar 3). This brought the Anglo-Russian crisis to a head

Mar. 8. Britain sounded the United States government regarding possible collaboration in the Far East, but received no encouragement.

Mar. 17. Chamberlain's advances to the Japanese, which were also abortive, as the Japanese did not yet feel ready to act against Russia and were negotiating with Russia an agreement regarding Korea.

Mar. 27. The Chinese yielded to Russian pressure and leased to Russia Port Arthur and Talienwan for 25 years. The British government had decided (Mar 25) that the question was not worth a war with Russia and that the best course would be to lease Weihaiwei as a counterweight. The Chinese agreed to this on Mar. 27.

Apr. 10. The French extorted from China an agreement not to alienate the three provinces of Yunnan, Kuangtung, and Kuangsi, and to permit the construction of a railroad to Yunnan-fu. France was given a **lease of Kuangchowwan** for 99 years. Numerous other concessions were extorted from the Chinese government in the following months, initiating the partition of China.

Apr. 25 The Nishi-Rosen Agreement between Russia and Japan This had been under negotiation since Feb and was meant by the Russians to circumvent Japanese opposition to the advance in Manchuria The Russians rejected a Japanese offer of a free hand in Manchuria in return for a free hand in Korea, but recognized Japan's preponderant economic interests in Korea and promised not to obstruct them.

Mar. 28. Passage of the first naval law by the German Reichstag This was the work of Adm. **Alfred von Tirpitz,** minister of marine, and laid the basis for the naval expansion of Germany The arguments for a larger fleet were the need for protecting colonies and commerce and the necessity for a fleet if Germany was to make her weight felt in international affairs (especially against England). It was therefore decided to build a battle fleet (influence of the teaching of Mahan) so strong that even the strongest naval power would hesitate before attacking Tirpitz also hoped that the possession of a fleet would heighten Germany's alliance value in the eyes of Russia and France

Mar. 29. Beginning of the discussions between **Joseph Chamberlain and the German ambassador,** the object of which was to enlist German support against further Russian encroachments in the Far East. Bulow (German foreign minister since June, 1897) treated the matter evasively, being unwilling to antagonize Russia In England there was little official or public sentiment for Chamberlain's project The discussions were complicated by the over-eagerness of **Baron von Eckardstein,** who misled his own government as well as the English. Lord Salisbury, on his return from a vacation, showed little enthusiasm and took the Far Eastern situation less seriously than Chamberlain

May 13. Chamberlain's great speech at Birmingham, extremely anti-Russian and a bid for the friendship of the United States and Germany This made an unfavorable impression both in England and in the world at large. Neither the

United States nor Germany did anything to encourage the colonial secretary.

Aug. 30. Anglo-German Agreement regarding the future of the **Portuguese colonies** The Portuguese government was bankrupt and in urgent need of a loan. This the British government was ready to grant, in return for the cession or lease of **Delagoa Bay,** long coveted as the key to the Transvaal and now of prime importance because of the growing tension in relations between England and the Transvaal The Germans demanded a hand in the matter and the English reluctantly agreed, for fear of German collaboration with France (advances of June 1898) The two powers agreed to share in a loan to Portugal, with the colonies as security The northern half of **Mozambique** and all but a central strip of **Angola** was assigned to Germany as the area of which the revenues should serve for the German share of the loan; the southern half of Mozambique and the rest of Angola were assigned to Britain. In the event of default of the Portuguese government these territories were to pass to the contracting powers. The Germans expected the agreement to bear early fruit. The British did all they could to prevent its coming into effect, and regarded the whole agreement as a piece of blackmail.

Sept. 18. Beginning of the **Fashoda crises,** between England and France. Since Mar. 1896 the Egyptian forces, under Gen **Kitchener,** had been advancing up the Nile. The dervishes were decisively defeated on the **Atbara River** (Apr 8, 1898) and at **Omdurman** (Sept 2) During the same period British expeditions were trying to reach the Nile from Uganda, all with the object of heading off the French, with whom the Congo government cooperated The **Marchand mission,** sent out in Feb. 1896, succeeded, after countless delays and hardships, in reaching the Nile at Fashoda (now Kodok) on July 10, 1898, and establishing itself there Just before that, in June, a force of Ethiopians, accompanied by a few Frenchmen, had pushed down the Sobat River and reached the Nile just above Fashoda, this being part of a plan to push Ethiopian claims to the right bank of the Nile, while the French established themselves on the left bank. After the battle of Omdurman, Kitchener at once proceeded up the Nile, where he found Marchand. The latter refused to evacuate without orders of his government. There ensued the most acute crisis in Anglo-French relations during the whole pre-war period. The British refused to discuss the *pros* and *cons* of the French claims until Marchand had evacuated territory which the British claimed for Egypt by right of conquest The French government, harried by the Dreyfus affair (p 641), finding itself unprepared for war at sea and securing no support from Russia (visit of Muraviev to Paris, Oct), yielded to a poorly veiled threat of war On Nov 3 the **evacuation of Fashoda** was ordered The French claims were not settled until Mar. 21, 1899, when they were obliged to renounce all territory along the Nile, in return for worthless districts in the Sahara. The episode left a legacy of hatred for England in France and made more difficult the pursuit of a policy of friendship with England, as advocated by **Théophile Delcassé,** French foreign minister from June, 1898, to June, 1905

Nov. 21. Commercial treaty between France and Italy, bringing to an end a long and disastrous tariff war The treaty marked the beginning of the reconciliation of France and Italy and the gradual **defection of Italy from the Triple Alliance** (tacitly renewed for six years in 1896). This policy was necessitated by the collapse of the Italian colonial policy and the instability of the domestic situation (p. 661)

1899, May 18-July 29. FIRST HAGUE PEACE CONFERENCE, which met at the invitation of the Russian tsar (Aug. 24, 1898) It is now known that the Russian proposal was due chiefly to financial stringency and inability to keep up with the armaments of Austria and other powers. The suggestion was regarded with distrust and dislike by most of the powers, not least by France Twenty-six states were represented, but little more was achieved than the signature of conventions for the pacific settlement of international disputes and the definition of the laws of war (prohibition for 5 years of the use of projectiles thrown from balloons, prohibition of gas warfare and dumdum bullets, provision for better treatment of war prisoners and wounded, etc). Nothing was done about disarmament or limitation of armament, compulsory arbitration was rejected, but a **permanent court of arbitration** was provided for

Aug. 9. Extension of the Franco-Russian Alliance, during Delcassé's visit to St. Petersburg. In view of the Austrian constitutional crisis (p 694) and the possibility of the dissolution of the Hapsburg monarchy, the alliance was extended to provide for the maintenance of the balance of power as well as the maintenance of peace, and the term of the military convention was made indefinite.

Sept. 6. Open Door Note of the American secretary of state, **John Hay.** In view of the division of China into spheres of influence, it proposed that England, Germany, and Russia should not interfere with treaty ports and should not levy higher harbor or railroad dues on foreign goods than on their own within their spheres This was agreed to by all powers interested, but by Russia only with vague reservations The note had little immediate importance, but set up an ideal policy often referred to later

Oct. 9. Outbreak of the Boer War (p 857) Almost from the beginning there were rumors of the possibility of **Franco-Russian-German intervention** against England, and Count Muraviev appears to have made some efforts in that direction, but neither the French nor the Germans showed much desire to become embroiled

Oct. 14. The so-called Windsor Treaty between England and Portugal The secret agreement renewed older treaties of 1642 and 1661, involving a guaranty of Portuguese territory, and included a promise by Portugal not to let munitions pass through **Delagoa Bay** to the Transvaal, or to declare neutrality The agreement was a negation of the spirit of the German-British Agreement of Aug 1898

Nov. 1. Agreement between England and Germany regarding the **Samoan Islands.** The disorders in Samoa (p 911) and the desire of the Germans to acquire the British share of the group had embittered relations between the two countries for almost a year In view of the war in South Africa the British government finally gave in, though with poor grace Germany got the islands of **Upolu** and **Savaii,** the British taking in return the **Tonga Islands, Savage Islands,** and lesser islands of the Solomon group, as well as a disputed strip of **Togoland.**

Nov. 25. Baghdad Railway concession granted to a German syndicate This was the fruit of a decade of German economic activity in the Near East There had been innumerable schemes for railways in Anatolia, especially from the Syrian coast to Baghdad and the Persian Gulf The sultan, anxious to increase the income from the more remote provinces and to bind the empire together strategically, had (Oct 4, 1888) given a German company a concession to build a railroad from opposite **Constantinople to Angora** (Ankara) with the idea of going on through northern Anatolia to Baghdad This line was completed in 1892, after which there was a scramble for a new concession. The British were obliged to withdraw when the Germans threatened to discontinue support of their policy in Egypt. On Feb. 15, 1893, the German company received a concession to continue the line from **Angora to Kaisarieh** (this was not built) and for another line, through the more promising southern districts, from **Eskishehr to Konia.** This was finished in 1896 and therewith the question of continuing to Baghdad became an immediate one Countless projects and applications (British, French, Russian) were put forward, but the Germans remained in the ascendant, especially after the **visit of Emperor William II to Constantinople and the Holy Land** (Oct 1898) and his proclamation of friendship for the 300,000,000 Moslems in the world The French ultimately gave up their opposition and agreed to co-operate with German interests The British were taken up with other affairs and had protected their interests in the Persian Gulf by an agreement with the **Sheikh of Kuwait** (he promised to cede no territory without British consent) on Jan 23, 1899 The Russians remained vigorously hostile to the German project, but the Germans obtained a preliminary concession for a line from Konia to Baghdad on Nov. 25, 1899 Though primarily an economic enterprise, the Baghdad Railway project quickly became a vital factor in the relations of Germany with Russia and England.

Nov. 20-28. Visit of William II and Bulow to England (the first since 1895) Conversations between Bulow, Chamberlain, and Balfour Discussion of a possible Anglo-German-American agreement. Bulow suggested that Chamberlain say something publicly of the common interests which bound the two countries In his **Leicester speech** (Nov 30) Chamberlain went much further and thereby raised a storm of ill-will in both England and Germany, where pro-Boer sentiments were very pronounced Bulow, in a Reichstag speech (Dec 11), rejected the advances and even stressed the need of Germany for a stronger fleet. Marked cooling in Anglo-German relations

1900, Jan. Acute tension in Anglo-German relations resulting from the stopping of the German ship *Bundesrath* on very inadequate suspicion that she was carrying contraband The British government eventually gave in (Jan 16)

Feb. 28, Mar. 3. Muraviev suggested to the French and German governments the possibility of joint "amicable" pressure on England to bring about peace in South Africa The Germans rejected the suggestion unless action were preceded by

a mutual guaranty of territory between the three powers There was no serious effort made to intervene against England, though the Russians took advantage of England's plight to advance their interests in **Persia, Afghanistan,** and **Tibet,** and the French in **Morocco.**

Mar. Russian squadron at Chemulpo Efforts made to secure a naval base on the southern coast of Korea (**Masampo**) These attempts were frustrated by the vigorous opposition of Japan

June 12. Passage of the **second German naval law,** providing for a fleet of 38 battleships, to be built in 20 years. This was the basic building program, carried through the Reichstag on a wave of ill-feeling toward England, which the government exploited through the Navy League and other organized propaganda

June 13-Aug 14. Boxer rising and **siege of the Peking Legations** The rising was the direct outcome of the encroachments of the European powers in China and the division of the empire into spheres of influence The Boxers were volunteer militiamen, organized and encouraged by the government to block the designs of the foreigners The legations were finally relieved by an international expeditionary force The Chinese government was obliged (Sept 1901) to agree to punish the officials most directly responsible and to pay a huge indemnity But the whole episode had given the Russian military men (opposed by Witte and the new foreign minister, **Count Lamsdorff**) an opportunity to occupy Manchuria with 100,000 troops The question of evacuation soon became the key to the whole Far-Eastern problem

Oct. 16. Anglo-German Yangtze Agreement, the result of British anxiety because of Russian designs It provided for the maintenance of the "Open Door" in "all Chinese territory as far as they [the contracting powers] can exercise influence," and disclaimed all territorial designs Other powers acceded to it

Nov. 9. The Alexeiev-Tseng Agreement, between Russia and the Chinese governor of Manchuria The Chinese civil administration was to be restored and Russian troops concentrated at Mukden and other points along the railroad This was disavowed by both the Russian and Chinese authorities

Dec. 14. Franco-Italian Agreement, by which Italy gave France a free hand in **Morocco** in return for a free hand in **Tripoli** This marked the full development of the Franco-Italian entente.

1901, Feb. 8. Russian proposals to China for the evacuation of Manchuria In return for evacuation, the Chinese government was to agree not to keep more than a police force in Manchuria and to give Russia a monopoly of concessions in Manchuria, Mongolia, and Chinese Central Asia, as well as a concession for a railroad running toward Peking Appeals of China to the powers Strong stand of Japan, backed by England and, more cautiously, by Germany

Mar. 15. Bulow's speech in the *Reichstag,* declaring that the Yangtze Agreement did not apply to Manchuria This brought to an end the first discussions in London on the possibility of an Anglo-German-Japanese bloc directed against Russia The Germans were unwilling to go beyond a promise of neutrality in a Russian-Japanese or Anglo-Russian war

Apr. 6. Following new and stronger protests from Japan and England, the Russian government dropped the draft convention with China and denied that it had been authentic.

May 29. Lord Salisbury's memorandum on British policy, a confidential document defending a policy of isolation This rang the death-knell of the Anglo-German alliance discussions, carried on since March by **Baron von Eckardstein,** secretary of the German embassy in London Eckardstein reported the British much more anxious for alliance than they were, which induced the German government to insist on an alliance with the whole Triple Alliance To this the British would not agree, being lukewarm about the whole matter in general

June. Moroccan missions to Paris, London, and Berlin Discussion of an Anglo-German pact on Morocco This the Germans rejected except as part of a larger alliance

July-Aug. Beginning of the negotiations for an **Anglo-Japanese Alliance.**

Oct.-Nov Renewed discussions between Russia and China regarding the conditions for the evacuation of Manchuria.

Oct. 16. Resumption of **Anglo-Japanese discussions** by **Baron Hayashi,** the minister in London. Hayashi made it clear that for Japan Korea was the crux and that Japan was interested in Manchuria only as the approach to Korea. The negotiations hinged on the definition of Japan's interests in Korea and on the question whether the alliance should be extended to include Siam and India

Nov. 25-Dec. 4. Visit of Prince Ito to St Petersburg. Contrary to expectation he found Witte and Lamsdorff eager for an agreement and willing to make far-reaching concessions to Japan in Korea Ito was thereby induced to exceed his instructions and draft an agreement with Russia

Dec. 7. The Japanese government, feeling committed to England, decided to drop the negotiations with Russia and conclude the alliance with England

1902, Jan 30. THE ANGLO-JAPANESE ALLIANCE, marking the end of Britain's "splendid isolation." It had been decided, in the later negotiations, to drop the idea of inviting Germany to join. The alliance was concluded for five years and provided for the independence of China and Korea and the recognition of Japan's special interests in Korea, if either party became involved in war with a third party, its ally was bound to maintain neutrality, but if another power or powers should join in the war, the allied power was bound to join in the conflict, neither party was to enter into separate agreements with another power (Russia) without consulting its ally. The treaty was published on Feb. 11.

Mar. 20. Franco-Russian declaration in favor of the principles enunciated in the Anglo-Japanese Alliance and reserving the right to take counsel to safeguard their interests This was generally taken as a counterblast to the new combination and an extension of the Franco-Russian Alliance to the Far East, but this was probably an exaggeration

Apr. 8 Russian-Chinese Agreement, providing for the evacuation of Manchuria within 18 months

May 31. Treaty of Vereeniging (p 857) bringing to an end the South African War and restoring to England greater liberty of action

June 28 Renewal of the Triple Alliance for six years The demands of the Italians for greater concessions were evaded, but they were given assurances with regard to Tripoli

Nov. 1. Italian note to France assuring her that in the event of her being attacked, Italy would remain neutral, "the same shall hold good in case France, as the result of a direct provocation should find herself compelled, in defense of her honor or of her security, to take the initiative of a declaration of war." Italy also gave assurance that she was not a party and would not be a party to any military agreement in conflict with this declaration **Completion of the Italian-French Entente,** the work largely of M. Camille Barrère, the French ambassador **Nadir of the Triple Alliance,** the relations between Italy and Austria being badly strained by irredentist agitation

Nov. 8. Failure of the **French agreement with Spain** on Morocco The French had offered the Spaniards a substantial part of northern Morocco as a sphere, but the Spanish government drew back for fear of antagonizing England.

1903, Feb. Russian-Austrian program of reform for **Macedonia.** The country had for years been the prey of rival Bulgarian, Serbian, and Greek bands and had broken out in insurrection in 1902. Mild reforms introduced by the sultan (Nov. 1902) had failed to pacify the region The Russian-Austrian program called for a gendarmerie composed of Moslems and Christians according to population, appointment of foreign officers, and reorganization of the financial system It was accepted by the other powers

Apr. Baghdad Railway crisis. The German company had obtained a definitive concession for the road from Konia to Basra (Jan 17, 1902) and had done its utmost to secure the co-operation of the British and French governments in arranging the financing of the scheme. The British government was favorably disposed, but the bankers were finally scared off by an organized press campaign against participation Thereupon the British and French governments refused to become associated The Russian government, as before, was irreconcilably opposed to the whole project

May 1-4 Visit of King Edward VII to Paris. This first move toward reconciliation ended as a great success

May 15. Lord Lansdowne's declaration of British interests in the **Persian Gulf:** England "would regard the establishment of a naval base or a fortified port in the Persian Gulf as a very grave menace to British interests, and would certainly resist it by all means at her disposal" This was intended primarily as a warning against Russian plans for a railroad across Persia to Bunder Abbas

July 6-9. Visit of President Loubet and Delcassé to London. Beginning of the conversations that were to lead to the Anglo-French Entente.

Aug. 12. First Japanese note to Russia, following the failure of the Russians to carry through the evacuation of Manchuria. Earlier conversations had failed

through the unwillingness of the Russians to abandon their claims in northern Korea (**Yalu concession,** in which even Tsar Nicholas was interested financially).

Aug. 29. Dismissal of Count Witte, the Russian finance minister This was tantamount to the victory of the group favoring Russian expansion in Manchuria and Korea (notably **Bezobrazov**). The **Viceroyalty of the Far East** was established to deal with Asiatic affairs independently of the foreign office. The Russians refused to take the Japanese policy seriously They did not believe that Japan would go the limit and were confident that if she did, Russia would easily defeat her. The notes from Tokyo were treated with disdain and delay.

Oct. 2. The Murzsteg Program of reform for Macedonia, worked out by Russia and Austria and approved by the powers This program was to replace the February program, which had been proved inadequate. Austrian and Russian inspectors were to be attached to the inspector-general and a foreign general was to command the gendarmerie Further administrative and judicial reforms were provided for

Nov. Anglo-Russian conversations looking toward an understanding. These broke down because of Russia's unwillingness to agree to a partition of Persia into spheres of influence

1904, Feb. 4. OUTBREAK OF THE RUSSIAN-JAPANESE WAR, following the failure of the Russians to give the Japanese any satisfaction (p 892).

Apr. 8. THE ANGLO-FRENCH ENTENTE concluded This had been under negotiation since July and especially since Oct The outbreak of the Russian-Japanese War undoubtedly served to hasten the conclusion. The agreement represented a complete settlement of colonial differences, particularly with regard to Egypt and Morocco· France recognized the British **occupation of Egypt,** but was given guaranties regarding the Egyptian debt; England was to make effective the Treaty of 1888 providing for the free navigation of the **Suez Canal;** England recognized French interests in **Morocco** and promised diplomatic support in realizing them; secret articles envisaged the eventual breakdown of Moroccan independence and the partition of the country between France and Spain; France surrendered ancient rights on the shores of **Newfoundland,** but retained the right to fish; in return France was given territory near **French Gambia** and east of the **Niger;** British and French spheres of influence were delimited on the frontiers of **Siam** and disputes regarding **Madagascar** and the **New Hebrides** were adjusted

Apr. 24-29. Visit of President Loubet and Delcassé to Rome. Acute crisis in the relations of France and the papacy (p. 642) and much ill-feeling between Germany and Austria and Italy, because of the failure of Victor Emmanuel III to make mention of the Triple Alliance in the toasts and speeches

Sept 7. British treaty with Tibet, signed by Col **F E Younghusband** after an expedition to Lhasa The Tibetan Lama agreed not to cede or lease territory to any foreign power or to allow foreign intervention Thus Britain took advantage of the Russian-Japanese War to destroy the Russian advance in Tibet

Oct. 3. Franco-Spanish Treaty regarding Morocco The public clauses reaffirmed the independence and integrity of Morocco, but a secret convention provided for eventual partition Spain was to have the Mediterranean coast of Morocco (but less of the hinterland than was offered her in 1902). Spain was to take no action without the consent of France, and was not to erect any fortifications

Oct. 21 The Dogger Bank episode. The Russian fleet, under Admiral Rodjestvensky, passing through the North Sea on its way to the Far East, fired upon British trawlers, supposed to be Japanese destroyers One trawler was sunk and several lives lost The Russian fleet continued on its way and the Russian government evaded giving satisfaction. Acute crisis in Anglo-Russian relations. The British fleet was ordered to stop the Russian fleet off Gibraltar, even by force. The situation was finally saved through the efforts of Delcassé, and the matter was adjusted by an international commission (Feb. 25, 1905).

Oct. 27-Nov. 23. German-Russian negotiations for an alliance. These arose from the tension between Russia and England and from British protests against the coaling of the Russian fleet by German companies The tsar accepted a German draft treaty (Oct 30) providing for mutual aid in case of attack by another European power The plan broke down because of Russia's unwillingness to sign before consulting France, which was expected to be drawn in. Ultimately the two powers agreed merely (Dec 12) to aid each other in the event of complications arising from the coaling of the fleet.

Dec.—1905, Feb. Mission of St. René Taillandier to Fez. He carried to the sultan a program of reforms (police, state bank, communications) which would have given France practically a protectorate over Morocco.

1905, Feb. 3. Speech of Mr Lee, first lord of the British admiralty, directed against German naval armaments. This reflected the growing anxiety of the British regarding the German naval plans

Mar. 31. VISIT OF THE GERMAN EMPEROR TO TANGIER, initiating the **first Moroccan crisis.** Delcassé had wantonly excluded the Germans from the Moroccan negotiations and had not officially communicated the agreement with England The Germans were uncertain about the Anglo-French Entente, but had declared their disinterestedness in Morocco except for the Open Door, regarding which Delcassé had given assurances The French had thereupon proceeded to capitalize the free hand secured in the agreements with Italy, England, and Spain After the failure of the German-Russian negotiations, Bulow and Holstein decided to make the Moroccan affair a test of the strength of the Anglo-French Entente and carried the unwilling emperor along on this course. At Tangier he proclaimed Germany's adherence to the principles of independence and integrity and declared in favor of the policy of equal opportunity for all His visit at once created a panic in Paris and led to a loud outcry against Delcassé's policy. Delcassé at once offered to make good his mistake and to buy off the German opposition, but the Germans turned a deaf ear

Apr. 6. The Germans accepted the invitation of the Sultan of Morocco to an international conference

May 1-5. Efforts of **Rouvier,** the French prime minister, to reach an adjustment with the Germans He was even ready to concede them a port on the coast of Morocco, but the Germans insisted on a conference

May 17, 25. British correspondence with France The British, apprehensive about German designs on the Moroccan coast, proposed "full and confidential discussion . . in anticipation of any complications" Delcassé took this as the first step toward an alliance and tried to develop the British advance, but Rouvier objected

June 6. FALL OF DELCASSÉ, who urged the French cabinet to accept the British offers He argued that the Germans were only bluffing and that a Franco-British front would be invincible. The cabinet voted unanimously against him, fearing that France was poorly prepared for war, that an agreement with England would precipitate war at a time when Russia was rendered helpless by her defeat in the Far East, and that France would bear the burden of German hostility Rouvier took over the foreign office and renewed his efforts to strike a bargain The Germans stood by their previous attitude

July 8. The French government, assured of American support against unreasonable demands, accepted the idea of a conference

July 24. BJÖRKÖ TREATY, signed by the Emperor William and the tsar during a visit to each other's yachts The treaty was essentially a return to the draft of Oct 1904, excepting that it was to be confined to Europe and was to take effect only after the conclusion of peace between Russia and Japan Bulow objected to its restriction to Europe and threatened to resign, but was persuaded to remain after a pathetic appeal from the emperor The treaty was warmly opposed by the Russian foreign office and was ultimately wrecked by the refusal of the French government, estranged by the Moroccan crisis, even to consider joining in such a pact (Oct)

Aug. 12. Renewal of the Anglo-Japanese Alliance for 10 years. The treaty was modified to provide for mutual support in the event of attack by *one* other power, and was extended to include India

Sept. 5. Treaty of Portsmouth, ending the Russian-Japanese War (p 892). This was effected through the mediation of President Theodore Roosevelt. Russia ceded to Japan the northern part of **Saghalin,** but paid no indemnity, Russia recognized Japan's predominant interests in **Korea** and agreed not to oppose any steps Japan might take in Korea, Russia's lease of the **Liaotung Peninsula** was transferred to Japan

Sept. 28. France and Germany finally reached an agreement on the agenda for the **Moroccan Conference,** which was to meet in Jan 1906 Most of the French demands were met, in the hope that France would be disposed to accede to the Bjorko Treaty

Oct. Beginning of Anglo-Russian discussions regarding an eventual entente.

1906, Jan. 10. Beginning of Anglo-French military and naval conversations, which had been unofficially initiated in Dec.

The new Liberal government (**Sir Edward Grey, foreign secretary** since Dec 1905) refused to promise support to France in the event of German attack, but agreed to non-binding discussions of the modalities of co-operation in case such co-operation should be decided on Creation of the "moral obligation" of England to France The cabinet as a whole was not informed of these conversations until 1911.

Jan. 16-Apr. 7. Algeciras Conference on Morocco France was supported throughout by all the powers except Austria, which sided with Germany There were countless disputes regarding details, and some danger of war, which was apparently favored by Baron von Holstein until his dismissal on Apr. 5 The **Act of Algeciras** reaffirmed the independence and integrity of Morocco and "economic liberty without inequality" The French were entrusted with the police on the Moroccan-Algerian frontier In the rest of the country the police was to be under French and Spanish control A state bank was to be organized, on which France was to have a larger measure of control than the other powers

Feb. 10. Launching of the *Dreadnought*, the first all-big-gun battleship (ten 12-inch guns), which revolutionized the world naval situation.

May. The German government decided to increase the tonnage of battleships in the naval program, to add six cruisers to the program, and to widen the Kiel Canal to allow the passage of projected ships of the *Dreadnought* type.

Aug. 15. Visit of King Edward to Emperor William at Cronberg; futile discussion of the naval situation

Dec. 13. Agreement between Great Britain, France, and Italy regarding **Ethiopia.** It provided for the independence and integrity of Ethiopia and respect for earlier agreements, but divided the country into spheres of influence for the event of Ethiopia's collapse.

1907, May 16. Pact of Cartagena between Great Britain, France, and Spain It provided for the maintenance of the *status quo* in the Mediterranean and that part of the Atlantic which washes the shores of Europe and Africa The agreement was directed chiefly at supposed German designs on the **Balearic Islands** and the **Canaries.**

June 10. Franco-Japanese Agreement, providing for the independence and integrity of China and equality of treatment there

June 15-Oct. 18. SECOND HAGUE PEACE CONFERENCE, called at the suggestion of President Theodore Roosevelt (Oct 21, 1904), but postponed because of the war in the Far East All efforts of the British to secure some limitation of armaments were wrecked by the opposition of other powers, for which Germany, fearing a British attempt to check the growth of the German fleet, acted as spokesman. Germany also rejected all proposals for compulsory arbitration But the conference enlarged the machinery for voluntary arbitration and concluded conventions regulating action to collect debts, rules of war, rights and obligations of neutrals, etc

July 30. Russian-Japanese Agreement, similar to the Franco-Japanese Agreement (above)

July. Renewal of the Triple Alliance for 6 years, despite the complete lack of faith on the part of Germany and Austria in Italy's loyalty

Aug. 3-5. Meeting of Emperor William and Tsar Nicholas and their foreign ministers **at Swinemunde.** Discussion of the Baghdad Railway; assurances of the Russians that any agreement they made with England would not be directed against Germany

Aug. 31. THE ANGLO-RUSSIAN ENTENTE. This had been discussed at various times since the conclusion of the Russian-Japanese War, and was encouraged by the French. Negotiations had lagged because of opposition in Russian court circles, because of the confusion created by the Russian revolutionary movement (p 707), and because of the fears of **Alexander Izvolski** (Russian foreign minister since May, 1906) lest Germany take offense. The agreement was much less extensive than that between France and England **Persia,** the root of the Russian-English antagonism, was divided into three spheres of influence· a large Russian sphere in the north, covering the most valuable part of the country; a neutral sphere in the center, and a smaller British sphere in the south-east. Russia agreed that **Afghanistan** should be outside her sphere of influence and that she would deal with the Amir only through England, England promised not to change the status of the country or to interfere with its domestic affairs. Both governments recognized the suzerainty of China over **Tibet** and promised to respect its territorial integrity In a separate note (Apr 1907) the British government had expressed itself as well disposed toward a change in the **Straits Agreements** favor-

able to Russia In another separate note (Aug. 29) the Russian government recognized Britain's preponderant position in the **Persian Gulf.**

Sept. 5. Meeting of King Edward and Izvolski at Marienbad, followed by a meeting of Izvolski and **Count Alois Aehrenthal** (Austrian foreign minister since Oct 24, 1906) Izvolski gave the most explicit assurances regarding the entente with England and sounded out Austria with regard to an eventual revision of the Straits Convention

1908, Jan. 27 Count Aehrenthal announced the intention of the Austrian government to build a **railway through the Sanjak of Novi Bazar** toward Saloniki. The purpose of this was to drive a wedge between Serbia and Montenegro, where anti-Austrian agitation had grown rapidly since the advent of the Karageorgevich dynasty (1903, **Serbian-Austrian tariff war,** 1906–1911). The Austrian move was much resented by Izvolski, who claimed it was a violation of the spirit of the Austro-Russian Entente of 1897 He brought forward a rival scheme for a railroad from the Danube to the Adriatic. The British were also much wrought up by the Austrian step, which they regarded as a bribe by Turkey to Austria to induce the latter to oppose further reforms in Macedonia

Mar. Sir Edward Grey put forward a scheme of **reform for Macedonia** which would have given the three provinces practical autonomy

Apr. 23. The Baltic and North Sea Conventions, the first between Germany, Sweden, Denmark, and Russia, the second between Great Britain, Germany, Denmark, France, the Netherlands, and Sweden. They provided for the maintenance of the *status quo* on the shores of the two seas and for consultation between the signatories in case the *status quo* was threatened.

June 9. Reval meeting, between King Edward and Sir Charles Hardinge on the one hand and Tsar Nicholas and Izvolski on the other The British secured **Russian approval for the Macedonian reform scheme** and discussed the problems presented by German armaments

June 23 Counter-revolution in Persia, where the shah, **Mohammed Ali,** overthrew the constitution which had been granted (Dec 30, 1906) as a result of the liberal-nationalist movement of that year The Russians supported the shah, and the British, bound by the agreement with Russia, were obliged to desert the liberal cause.

July. Mulay Hafid, having defeated his brother, **Abdul Aziz,** Sultan of Morocco, in a long civil war, took Fez The Germans supported Mulay Hafid and the Moroccan question drifted toward another crisis

July 24. Victory of the Young Turk Revolution (began July 6 in Macedonia). The sultan was obliged to restore the Constitution of 1876 (p. 731). The whole movement was a reflection of Turkish excitement about the Reval interview (above) and resulted in the collapse of German influence in Turkey and a period of frantic Anglophilism

Aug. 11. Meeting of King Edward and Sir Charles Hardinge with Emperor William at Friedrichshof. Acrimonious discussion of the naval situation The emperor flatly refused all suggestions of reduction of the German program, which had been indirectly enlarged by the reduction of the service-term of warships and by the acceleration of German building operations

Aug. 13. King Edward and Francis Joseph met at Ischl. Reputed efforts of the English to enlist Austrian pressure on Germany

Aug. 27. Austrian reply to a note of Izvolski proposing an agreement regarding Bosnia and Herzegovina on the one hand and the Straits question on the other.

Sept. 16. BUCHLAU CONFERENCE between Aehrenthal and Izvolski After long discussion an informal agreement was reached Russia was not to oppose the annexation of Bosnia and Herzegovina by Austria and Austria was not to oppose the opening of the Straits to Russian warships, under certain conditions An international conference was to put the stamp upon these arrangements and other minor modifications of the Berlin Treaty

Sept. 23. Visit of Prince Ferdinand of Bulgaria to Budapest. Aehrenthal evidently gave his approval to eventual declaration of Bulgarian independence Both Austria and Bulgaria felt threatened by the determination of the Young Turk régime to summon delegates from Bosnia and Herzegovina and from Bulgaria to the new parliament.

Sept. 25 Casablanca affair. Three German deserters from the French foreign legion were taken by force from a German consular official Acute tension in Franco-German relations

Sept. 26. Meeting of Izvolski and Baron Schön (German foreign minister)

at Berchtesgaden Schon agreed to the Russian Straits program on the understanding that Germany should receive compensation (probably in the Baghdad Railway question)

Sept. 28. Meeting of Izvolski and Tommaso Tittoni (Italian foreign minister) at Desio The Italian minister evidently accepted the Russian program in return for promises of support in Tripoli and Albania

Oct. 4. Arrival of Izvolski at Paris, where he received a letter from Aehrenthal announcing the coming annexation decree

Oct. 5. Proclamation of Bulgarian independence.

Oct. 6. PROCLAMATION OF THE ANNEXATION OF BOSNIA AND HERZEGOVINA BY AUSTRIA, who gave up the right to occupy the Sanjak militarily Excitement in Turkey, where a boycott against Austrian goods was instituted Frenzy and rage in **Serbia** and **Montenegro,** where the two annexed provinces had long since been looked upon as a future legacy Military preparations were at once begun and negotiations were initiated looking toward a Turkish-Serbian-Montenegrin-Greek alliance against Austria In **Russia** the event caused hardly less consternation in nationalist circles, where nothing was known of Izvolski's bargain with Aehrenthal The prime minister, Stolypin, at once wrote Izvolski instructing him to oppose the Austrian action and it was this primarily that obliged Izvolski to repudiate his agreement, declare that he had been duped, and take the lead in championing the Serbian claims **The Germans,** though rather outraged by Austria's failure to give advance notice, supported Austria loyally in order to uphold the alliance **The French and British,** though they resented Izvolski's underhanded negotiation with Austria, supported Russia and demanded the convocation of an **international conference** to consider the Austrian action

Oct 7 Crete proclaimed union with Greece, thereby adding to the crisis

Oct. 9-14. Izvolski's visit to London, to secure support for his Straits program The British, unwilling to sacrifice the newly found friendship of the Turks and having sounded and found them ill-disposed to any concession to Russia, made their consent to the opening of the Straits conditional on previous Turkish consent Russian efforts to secure that consent naturally failed Complete collapse of Izvolski's scheme. He now became virulent in his denunciation of Aehrenthal and his demand for a conference Aehrenthal, on his part, would agree only to a conference to register (not discuss) the Austrian action Negotiations on this question continued through the autumn

Oct 27. Izvolski in Berlin. The Germans, recognizing his difficulties, made no objection to his Straits program, provided they were given compensation

Oct 28. ***The Daily Telegraph*** **affair** (p 692) The publication of the indiscreet utterances of Emperor William to an English nobleman served to create a crisis in Germany and at the same time to accentuate the Anglo-German antagonism

Nov 10. Germany and France agreed to submit the **Casablanca affair** to an arbitral board, which rendered a report on May 22, 1909

Dec. 4 LONDON NAVAL CONFERENCE, attended by 10 naval powers The conference agreed on certain regulations of naval warfare (blockade, contraband, prizes, convoy, etc), but the convention was never ratified

Dec 25. Izvolski's Christmas speech advocating a league of the Balkan states and Turkey to resist further encroachments This program was also supported by England, but came to nothing because of the difficulty of adjusting the Serbian and Bulgarian claims in Macedonia, and because of Turkey's insistence on an offensive as well as defensive alliance.

1909, Jan. 12. Austro-Turkish Agreement (final form Feb 26), by which Turkey recognized the annexation and was paid compensation This agreement greatly strengthened Aehrenthal's position, since Turkey was the power chiefly concerned

Feb. 8. German-French Agreement on Morocco It reaffirmed the independence and integrity of the country, but Germany recognized France's "special political interests" in return for recognition of Germany's economic interests and a promise to associate German nationals in future concessions

Mar. 2. The powers intervened to prevent a war between Serbia and Austria The Serbs had continued to arm and were becoming less and less ready to surrender their claims The Austrians had also armed and the military party in Vienna (**Conrad von Hötzendorff,** chief of staff) was urging a war in order to clear the situation The powers advised the Serbs to yield, but the Serbian note to Vienna (Mar. 10) avoided any recognition of the an-

nexation and was generally regarded as unsatisfactory

Mar. 12. New British naval appropriations, the result of a panic called forth by dubious statements by the first lord of the admiralty regarding German strength

Mar. 18. Russian-Bulgarian Agreement, by which Russian financial claims on Turkey (unpaid since 1878) were cancelled to meet the compensation demanded by Turkey from Bulgaria

Mar 21. German note to Russia, calling upon her to abandon support of the Serbs and to recognize the annexation The Germans asked for a definite reply, failing which they would allow matters to take their course Izvolski seems to have been glad for a chance to get out of a hopeless *impasse* (Russia being quite unprepared for war) He yielded, but thereafter set afloat the legend of a German "ultimatum" to Russia The British were indignant at Russia's "climb-down," which left them in a most embarrassing position

Mar. 31. Serbian note to Austria, recognizing the annexation, declaring that it did not infringe on Serbian interests and promising to check anti-Austrian propaganda and maintain good neighborly relations in the future

Apr 9. Turkey recognized the independence of Bulgaria.

Apr 13. Turkish counter-revolution. This was put down and Abdul Hamid was deposed (Apr 27) Gradual revival of German influence

May. Mission of Baron Stumm to London He was instructed to offer an agreement on naval affairs in return for a defensive alliance, a neutrality agreement or at least a general settlement of colonial questions These suggestions were coolly received in London, where there was no desire to estrange France and Russia or to weaken the entente The British view was that the naval agreement must come first

July 14 Resignation of Prince Bulow (German chancellor since 1900) Bulow had come more and more to disapprove of the uncompromising naval policy of the emperor and Tirpitz and his position had been hopelessly weakened by the *Daily Telegraph* episode His successor, **Theobald von Bethmann-Hollweg,** was, if anything, more conciliatory and eager for an agreement with England

Oct. 24. Racconigi Agreement between Russia and Italy Both powers promised to work for the *status quo* in the Balkans Italy agreed to support Russian aspirations in the **Straits,** while Russia agreed not to oppose the Italian designs in **Tripoli.**

Nov.-Dec. Anglo-German negotiations (Gwinner and Cassel) looking toward a general settlement, but dealing chiefly with the **Baghdad Railway.** The Germans were prepared to give up all claims to control the railway from Baghdad to the Persian Gulf, but the British demanded full control (not international) of that section, and were unwilling to act without Russia and France

1910, Feb Official Russian-Austrian reconciliation based on agreement to maintain the *status quo* in the Balkans, the Russians being in constant dread of a further move by the Austrians

Nov. 4-5. Visit of Tsar Nicholas and the new foreign minister, **Sergei Sazonov,** to Emperor William **at Potsdam** Tentative agreement on the Near East. The Germans gave the Russians a free hand in **northern Persia,** while the Russians promised no longer to oppose the **Baghdad Railway** and to arrange for the connection of this line with the Persian railways Disappointment of the British, who had always refused to negotiate without Russia and who were now deprived of their chief support in the Baghdad Railway matter

1911, Apr.-May. French advance in Morocco, following anti-foreign disturbances The French entered Fez on May 21, despite warnings from the Germans that they were violating the Algeciras Act

June-Nov. SECOND MOROCCAN CRISIS, resulting from the forward movement of the French and the general dissatisfaction of the Germans with the working of the 1909 agreement The French government was not unwilling to make compensation to the Germans, and M **Jules Cambon,** the ambassador at Berlin, engaged in conversations with the German foreign secretary, **Kiderlen-Wächter,** at Kissingen (June 20–21) But the Germans refused to advance demands and took the stand that the French should make an offer Kiderlen was genuinely anxious to liquidate the Moroccan affair and pave the way to better relations with France and England Negotiations on the French side were hampered by a cabinet change the result of which was the formation of **a ministry under Joseph Caillaux** (June 28)

July 1. The German gunboat *Panther* arrived at Agadir on the coast of Morocco, ostensibly to protect German interests, but in reality to frighten the

French into action The French foreign minister, **M. de. Selves,** appealed to England to join in sending ships This action was disavowed by Caillaux and rejected by the English (July 4)

July 15. After much fencing, the Germans admitted to the French that they would require the whole of the **French Congo** as compensation for the abandonment of their rights and interests in Morocco This was regarded by the French as out of the question, but discussions continued, carried on to a large extent irregularly by Caillaux

July 21. Mansion House speech of Lloyd George, in which he declaimed against England's being ignored in the matter and used threatening language Since Lloyd George had been regarded as pacifically minded, the speech caused a great stir and led to much recrimination between the German ambassador and Grey The crisis now came to a head and elaborate preparations were made on the British side for eventual war Nevertheless negotiations continued between the Germans and French and by October substantial agreement was reached By the **Convention of Nov. 4,** Germany agreed to leave France a free hand in Morocco and not to object even to the erection of a protectorate, in return France ceded part of the French Congo, with two strips of territory connecting the German Cameroons with the Congo and Ubangi Rivers

Sept. 28. OUTBREAK OF THE TRIPOLITAN WAR between Italy and Turkey (p 662) This was due in large measure to the desire of the Italians to realize on the agreements with France and to counterbalance the French gains in Morocco In one way or another all the great powers were bound not to oppose the Italian action, though they all disapproved of it The Austrians, however, objected from the outset to all operations which would disturb the *status quo* in the Balkans and thereby prevented attacks upon the Adriatic or Aegean coast Numerous attempts at mediation by the powers broke down through the hasty **annexation of Tripoli** by the Italians, which the Turks stoutly refused to recognize

Oct. 14-Dec 6. The Charykov Kite. Charykov, the Russian ambassador at Constantinople and the chief proponent of a Balkan League which would include Turkey and would serve as a bulwark against the dreaded advance of Austria in the Balkans, took matters more or less into his own hands and offered the Turks a guaranty of their territory in Europe in return for accession to such a league and opening of the Straits to Russian warships The Turks treated the matter in dilatory fashion and, when pressed, appealed to the other powers Charykov's action was disavowed by Sazonov after a visit to Paris (Dec. 6).

Nov. 11. Russian ultimatum to Persia, followed by an invasion of northern Persia and Russian control of the Russian sphere The Persian Liberals were trying hard to reform the country (appointment of **Morgan Shuster,** an American, as treasurer-general, with wide powers, Feb 1911) and the Russians determined to frustrate these efforts With their connivance the reactionary shah returned to the country (July 18) and began a civil war He was defeated, but the Russians invaded the country and suppressed the Liberal movement Despite English protests the Russians forced the dismissal of Shuster and other foreign advisers and made themselves at home in northern Persia British action was hampered by fear of rupturing the entente with Russia at a time when the Moroccan crisis and the Tripolitan War raised the spectei of a general conflagration

1912, Feb. 8. Haldane mission to Berlin On the English side this was the outgrowth of dissatisfaction with Grey's policy in the Agadir crisis and discontent with the policy of Russia in Persia, reflected in a demand of the Radicals for better relations with Germany On the German side Tirpitz and the emperor were determined to increase the fleet beyond the previous program, but Bethmann and Kiderlen were anxious for an agreement with England that would weaken the entente At Berlin Haldane suggested that England would be willing to support German colonial aspirations in Africa in return for abstention from increase of the fleet The Germans were unwilling to make naval concessions without a political agreement Bethmann demanded a promise of neutrality under certain conditions, while Grey refused more than an assurance not to attack or take part in a hostile combination against Germany.

Mar. 8. Publication of the **new German naval bill,** providing for an increase in the number of ships, an increase in personnel, and the establishment of a third squadron in commission. With this the Anglo-German discussions came to an end, though conversations regarding the Baghdad Railway and colonial affairs continued and an effort was made on both sides to put relations on a better footing.

Mar. 13. Treaty of alliance between Bulgaria and Serbia. This had

been under discussion since 1908 and had been warmly supported by the Russians (especially Hartwig, the minister at Belgrade). Serious negotiations were initiated in Oct 1911, in view of the Tripolitan War, but were delayed by the insistence of the Bulgarians that the alliance be directed against Turkey rather than Austria and that Macedonia should receive autonomy The secret *annexe* of the treaty provided for a possible war against Turkey In the event of victory Serbia was to receive the Sanjak of Novi Bazar and the territory north of the Shar Mountains, the territory south and east of the Rhodope Mountains was to go to Bulgaria, the rest of Macedonia was to be autonomous, but if partition was decided on later, most of it was to fall to Bulgaria, a disputed area being left to the arbitration of the Tsar of Russia The treaty was supplemented by a **military convention** (May 12) Its general tenor became known to most of the powers at an early date, but it was not taken very seriously The Russians, who had sponsored it, regarded it chiefly as a defensive bulwark against Austria and relied on their ability to hold back the Balkan states from aggression against Turkey

Apr. 18. The Italians bombarded the Dardanelles, which were thereupon closed by the Turks After vigorous protests from Russia and other powers, they were reopened on May 4

May 4-16. The Italians conquered Rhodes and other islands of the Dodecanese, thereby establishing a footing in the eastern Mediterranean and causing much uneasiness in England and France

May 29. Treaty of alliance between Bulgaria and Greece. This had been proposed by Venizelos a year before, but had been evaded by the Bulgarians for fear of becoming involved in a war concerning Crete Such a war was not provided for in the treaty, and the definition of claims in Macedonia was postponed A **military convention** was concluded on Oct 5.

July 16. Naval convention between France and Russia, to supplement the military convention of 1893 This was part of Poincaré's (French premier since Jan 14, 1912) policy of strengthening the alliance with Russia.

July 22. Decision of the British admiralty to withdraw battleships from the Mediterranean and concentrate them in the North Sea, in view of the growing naval strength of Germany. The French soon afterward reversed the process and withdrew their battleships from Brest to the Mediterranean, chiefly to face the growing power of Italy and Austria

Aug. Visit of Poincaré to St Petersburg, where he was first shown the text of the Serbian-Bulgarian Alliance He saw the import of it and warned Sazonov, but at the same time discussed the need for the strengthening of Russian military preparations in Poland.

Aug. 14. Bulgarian note to Turkey, demanding establishment of autonomy for Macedonia, where outbreaks had become more frequent

Aug. 14. Note of Berchtold (Austrian foreign minister since Feb 1912) to the powers suggesting pressure on the Balkan states to keep the peace and pressure on the Turks to institute far-reaching reforms in Macedonia This was accepted by the powers, which commissioned Austria and Russia to act for them

Sept. 18. Bulgaria and Serbia decided for war against Turkey, using the demand for reform merely as a blind The two powers were anxious to take advantage of the Tripolitan War, which was coming to a close

Sept. 25. The Turks announced maneuvers, to be held at Adrianople

Sept. 30. Mobilization of the Balkan states. Russia announced a trial mobilization in Poland

Oct. 8. Austrian-Russian note to the Balkan states, demanding respect for the *status quo* and promising reforms for Macedonia

Oct. 8. Montenegro declared war on Turkey.

Oct. 18. OUTBREAK OF THE FIRST BALKAN WAR, between Bulgaria, Serbia, and Greece on the one hand, and Turkey on the other

Oct. 18. Treaty of Lausanne, between Turkey and Italy This had been under discussion since July and had been forced by an Italian ultimatum (Oct 12) Turkey promised to withdraw her forces from Tripoli and the Italians promised to withdraw from the Aegean Islands as soon as the Turkish withdrawal from Tripoli was complete, the Turks were allowed to keep in Tripoli a representative of the sultan as caliph

Oct. 22. Bulgarian victory at Kirk Kilissé, in Thrace, where the Turks had rashly taken the offensive

Oct. 24-26. Serbian victory at Kumanovo.

Oct. 28-Nov. 3. Great Bulgarian victory at Lulé Burgas. Advance of the Bulgarians to the Chatalja lines, last line of defense before Constantinople.

Nov 3-5. Russian warnings to the Bulgarians against the occupation of Constantinople, which the Russians would resist by the use of their fleet

Nov. 10. The Serbs reached the Adriatic, after overrunning northern Albania

Nov. 15-18. Serb victory at Monastir

Nov. 17-18. Bulgarian attack on the Chatalja lines, which failed

Nov. 21-22 Grey-Cambon correspondence, in which England and France agreed to consult in the event of either one being threatened by attack

Nov. 24. The Austrians announced their unalterable opposition to territorial access to the Adriatic for Serbia and came out for an independent Albania Acute international crisis The Serbs remained steadfast and were at first supported by Russia, which was given assurances by France of support in the event of war with Germany Austria was supported by Italy, which also opposed the appearance of the Serbs on the Adriatic The Germans, after some hesitation, promised Austria support if she were attacked while defending her interests England was sympathetic to the Austrian position and tried to work with Germany for an adjustment without jeopardizing relations to France and Russia The crisis was most acute in late November and early December, when both Austria and Russia began to mobilize. It was overcome when the Russians, unprepared for war, abandoned the Serb territorial claims

Dec. 3. Armistice between Turkey, Bulgaria, and Serbia Greece did not join in it Operations were to continue around **Scutari** (besieged by the Montenegrins), **Janina** (invested by the Greeks), and **Adrianople.**

Dec. 5. Last renewal of the Triple Alliance, for 6 years from July, 1914 This reflected the closer relations between Italy and Austria and the friction between Italy and England and France growing out of the occupation of the Dodecanese

Dec. 17 Opening of the London Peace Conference. At the same time an ambassadorial conference at London discussed the status and boundaries of Albania, the fate of the Aegean Islands, etc.

1913, Jan 6. Breakdown of the London Conference, because of the refusal of the Turks to give up Adrianople, the Aegean Islands, and Crete.

Jan. 22. The powers finally induced the Turks to abandon Adrianople

Jan. 23. ***Coup d'état*** **at Constantinople;** downfall of Kiamil Pasha and victory of the extreme nationalists led by **Enver Bey.**

Feb. 3. Resumption of the war.

Mar. 5. The Greeks took Janina.

Mar. 26. The Bulgarians took Adrianople.

Apr. 16. The Bulgarians and Turks concluded an armistice, which was accepted by other belligerents

Apr. 22. The Montenegrins took Scutari, despite protests of the powers, who had assigned it to Albania

May 3. Under threat of war from Austria, the **Montenegrins gave up Scutari** and the **Serbs evacuated Durazzo** (May 5).

May 7. An ambassadorial conference at St Petersburg awarded to **Rumania the town of Silistria,** without the fortifications, as compensation for the gains of Bulgaria

May 20. Reopening of the London Peace Conference. The victorious allies were obliged by an ultimatum from Sir Edward Grey to accept the settlement agreed to by the great powers

May 30. TREATY OF LONDON, ending the First Balkan War Turkey ceded all territory west of a line between Enos and Midia and abandoned all claim to **Crete;** the status of **Albania** and of the **Aegean Islands** was left to the decision of the powers.

June 1. Treaty of alliance between Serbia and Greece against Bulgaria This was the result of Serbia's failure to make good her claims on the Adriatic and the unwillingness of Bulgaria to grant Serbia more of Macedonia than had been envisaged in the Treaty of Mar 13, 1912 The Bulgarians were willing to leave the matter to the arbitration of the tsar, which the Serbs tried to evade

June 29-July 30 SECOND BALKAN WAR. The Bulgarian commander, Gen Savov, ordered an attack on the Serbian-Greek positions without informing the prime minister, Daney, who was just leaving for St Petersburg The government disavowed the action, but the Serbs and Greeks took advantage of the situation to carry out the attack they had long planned. Rumania and Turkey entered the war against Bulgaria, which was rapidly defeated.

Aug. 10. TREATY OF BUCHAREST. The Rumanians were given the northern **Dobrudja,** from Turtukaia on the

Danube to Ekrene on the Black Sea, the Serbs and Greeks retained those parts of **Macedonia** which they had occupied. Bulgaria retained only a small part of Macedonia, having lost **Monastir** and **Ochrid** to Serbia and **Saloniki** and **Kavalla** to Greece. On the Aegean seaboard the Bulgarians kept only the stretch between the Mesta and Maritza rivers, with the second-rate port of **Dedeagatch.**

Sept. 23. Invasion of Albania by the Serbs, following Albanian raids into areas assigned to Serbia by the Treaty of London

Sept. 29. TREATY OF CONSTANTINOPLE between Bulgaria and Turkey, the Turks recovered **Adrianople** and the line of the **Maritza River.**

Oct. 18. Austrian ultimatum to Serbia, demanding the evacuation of Albania within eight days. The Serbs yielded.

Oct. 30. Austro-Italian note to Greece, demanding the evacuation of southern Albania by Dec 31.

Nov.-Dec. THE LIMAN VON SANDERS CRISIS. Liman had been appointed by the Turkish government to reorganize the army He was to have command of the First Army Corps, at Constantinople, and other far-reaching powers The Russians, who had at first raised no objection, protested when they learned how extensive the authority of the German mission was to be They demanded that Liman be given a command elsewhere than at Constantinople The French vigorously supported the Russian stand, but the English were lukewarm Ultimately a note was sent to the Turkish government (Dec 13) warning it against too great concessions The affair was closed (Jan 1914) when the Germans agreed that Liman should give up the Constantinople command and become inspector-general of the army The incident left the Russians suspicious of German designs on the Turkish capital and led to much recrimination

Dec. 13. Grey proposed to the powers the division of disputed southern Albania between Greece and Albania, with compensation to Greece in the Aegean Islands This was finally accepted, but the Greeks did not evacuate until Apr 27, 1914, after which the dispute continued with regard to the Aegean Islands By June 1914 there was an acute danger of war between Greece and Turkey.

1914, Feb. 21. A famous **Russian crown council** discussed the question of the Straits and concluded that Russian aims there could be attained only in case of a European war.

Apr. 22-24. Visit of King George and Grey to Paris The French, at the request of the Russians, urged the conclusion of an **Anglo-Russian naval convention** (the English refusing to consider an alliance) Discussions were carried on throughout the remaining months of the pre-war period

June 14. Visit of Tsar Nicholas and Sazonov to Constantza and **Bucharest.** The Russians and Rumanians agreed to co-operate in the event of the closure of the Straits in a Turkish-Greek war, but the Rumanians refused to commit themselves to intervene in the event of an Austrian attack upon Serbia

June 15. An Anglo-German Agreement initialed This settled the **Baghdad Railway** problem, the Germans promising not to construct the line south of Basra and recognizing England's preponderant interests in the shipping on the Euphrates The agreement reflected a real desire on both sides to remove many outstanding colonial difficulties.

June 24. Austrian memorandum for Germany, discussing the Balkan situation as it emerged after the Treaty of Bucharest The Vienna government favored an alliance with Bulgaria and Turkey to make impossible a reconstitution of the Balkan League under Russian and French auspices The Germans had, on the other hand, been urging on Vienna a reconciliation with Serbia and Rumania and Greece On this basic question the two allies had drifted far apart.

June 28. ASSASSINATION OF THE ARCHDUKE FRANCIS FERDINAND at Sarajevo. The assassin was **Gavrilo Princip.** He and other young Bosnian revolutionaries acted as agents of the Serbian society **Union or Death** (*The Black Hand*), a terrorist organization founded in 1911 for agitation against Austria in behalf of Serbian aspirations The Serbian government was cognizant of the plot, but did little to prevent its consummation or to warn the Austrian government. The Vienna government, though convinced of the complicity of Serbia, was intent on making out a tight case and sent a legal expert to Sarajevo to collect evidence. The world generally was outraged by the assassination and sympathetic toward Austrian claims for satisfaction

July 5. Mission of Count Hoyos to Berlin. He took the memorandum of June 24 on the Balkan situation, to which had been added some remarks on the need for settling, once and for all, the intolerable

activity of the Serbs Both the emperor and Bethmann recognized the justice of the Austrian stand, promised support (the *Blank Check*) and urged that steps be taken while world opinion was favorable The Germans evidently regarded a localized settlement as possible, and believed the Russians too unprepared to take an extreme stand

July 7. Austrian crown council Most of the members favored war against Serbia, but this course was opposed by the Hungarian premier **Count Tisza,** who insisted on diplomatic action to avoid larger European complications

July 13. Baron von Wiesner, sent to collect evidence, reported that he had been unable to find conclusive evidence of Serbian complicity, though the part played by members of the Black Hand Society was clear

July 14. Austrian crown council Tisza was won over to a policy of warlike action, on condition that no Serbian territory should be annexed by Austria

July 20-23. Visit of President Poincaré and Premier Viviani of France to St. Petersburg. Agreement to invite England to join with France and Russia in pressure on Vienna, though the Austrian demands on Serbia were not yet known, except in a vague way. The French apparently disregarded the merits of the case and took the whole matter as a test of the solidarity of the entente in face of action by the Triple Alliance

July 23. Austrian ultimatum to Belgrade (48 hours) This had been ready on July 20, but had been held back until Poincaré should have left St. Petersburg It demanded suppression of publications hostile to Austria, dissolution of patriotic organizations engaged in anti-Austrian propaganda; cessation of propaganda in the schools, dismissal of officials accused by Austria of propaganda; collaboration of Austrian with Serbian officials in the inquiry regarding responsibility for the assassination, judicial proceedings against those accessory to the plot, arrest of two Serbian officials known to be involved, explanations and apologies

July 24 First formulation of **Russian policy:** Serbia must not be attacked and devoured by Austria.

July 25. Austrian assurances to Russia that no Serbian territory would be annexed A Russian crown council decided on first military measures against Austria, to be followed by war if Serbia were attacked **French assurances of support** given to Russia.

The **Serbian reply** to the Austrian ultimatum, generally favorable at first sight, was actually evasive The crucial point VI was rejected The Serbian reply may have been due to reports from St Petersburg of Russia's decision to support Serbia On reception of the Serb reply the Austrian minister at once left Belgrade Serbia had ordered mobilization against Austria even before making the reply Austria at once mobilized against Serbia.

July 26 Sir Edward Grey proposed a conference to deal with the Austro-Serb issue France accepted, Austria refused to submit a question of national honor to the decision of others, Germany also refused an international discussion of the Austrian claims, though ready for a conference to deal with the Austro-Russian tension, Russia accepted the Grey proposal in principle, though preferring direct conversations with Vienna, which had been initiated

July 27. First French preparatory measures. The British fleet ordered not to disband after maneuvers Grey promised Russia diplomatic support and did nothing to hold Russia back from further steps

July 28. AUSTRIA DECLARED WAR ON SERBIA. Belgrade was bombarded the next day, though Austria was not ready for real operations until about Aug 12 The declaration of war was meant to create a *fait accompli* Rupture of the Austro-Russian pourparlers Germany urged the **occupation of Belgrade** as a pawn, to be followed by negotiations with Russia regarding the Serbian reply This course was also favored by Grey, but was ignored by Berchtold France renewed assurances of support to Russia.

July 29. Bethmann, resisting pressure from Gen von Moltke, chief of staff, urged the resumption of Austro-Russian negotiations and began to bring **pressure on Vienna.** At the same time he made a bid for **British neutrality:** Germany ready to promise not to take French territory in Europe, or Belgian territory, if England promised neutrality This was rejected

The Russian tsar yielded to pressure from Sazonov and the military men and agreed to **general mobilization.** The order was recalled and mobilization against Austria alone decided on when the tsar received a telegram from Berlin telling of the Emperor William's efforts to bring the Austrians into line

July 30. Austro-Russian conversations resumed. Due to technical difficulties the Russian government reversed

its action of July 29 and decided for **general mobilization,** despite numerous German warnings

July 31. Germany proclaimed "state of threatening danger of war" and sent a **12-hour ultimatum to Russia** demanding cessation of preparations on the German frontier

German inquiry in Paris as to what attitude France would take in a Russian-German conflict

Germany refused a British request that the neutrality of Belgium be respected.

5.00 p.m. Austria decreed general mobilization.

Aug. 1. French reply to Germany: France would be guided by her own interests

3.55 p.m. French mobilization.

4.00 p.m. German mobilization Germany offered England a promise not to attack France if England would guarantee French neutrality

7 00 p.m. GERMAN DECLARATION OF WAR ON RUSSIA, no reply having been received to the German ultimatum

Aug 2. The British cabinet, after many meetings and much disagreement regarding support of France, **voted to give France assurances** to protect the coast against German attack (the "moral obligation" arising from previous naval arrangements).

The Germans began the invasion of Luxemburg and submitted to Belgium a demand for permission to cross Belgian territory, in return for a promise to uphold Belgian integrity This was rejected

Aug. 3. GERMANY DECLARED WAR ON FRANCE, on the flimsy pretext of frontier violations In reality the German action was due to military considerations and to the conviction that France would come to Russia's support in any case

Beginning of the invasion of Belgium.

Aug. 4. ENGLAND DECLARED WAR ON GERMANY, the invasion of Belgium giving Sir Edward Grey a welcome argument in the cabinet and in Parliament

Aug. 6. AUSTRIA DECLARED WAR ON RUSSIA.

G. NORTH AMERICA

1. THE UNITED STATES

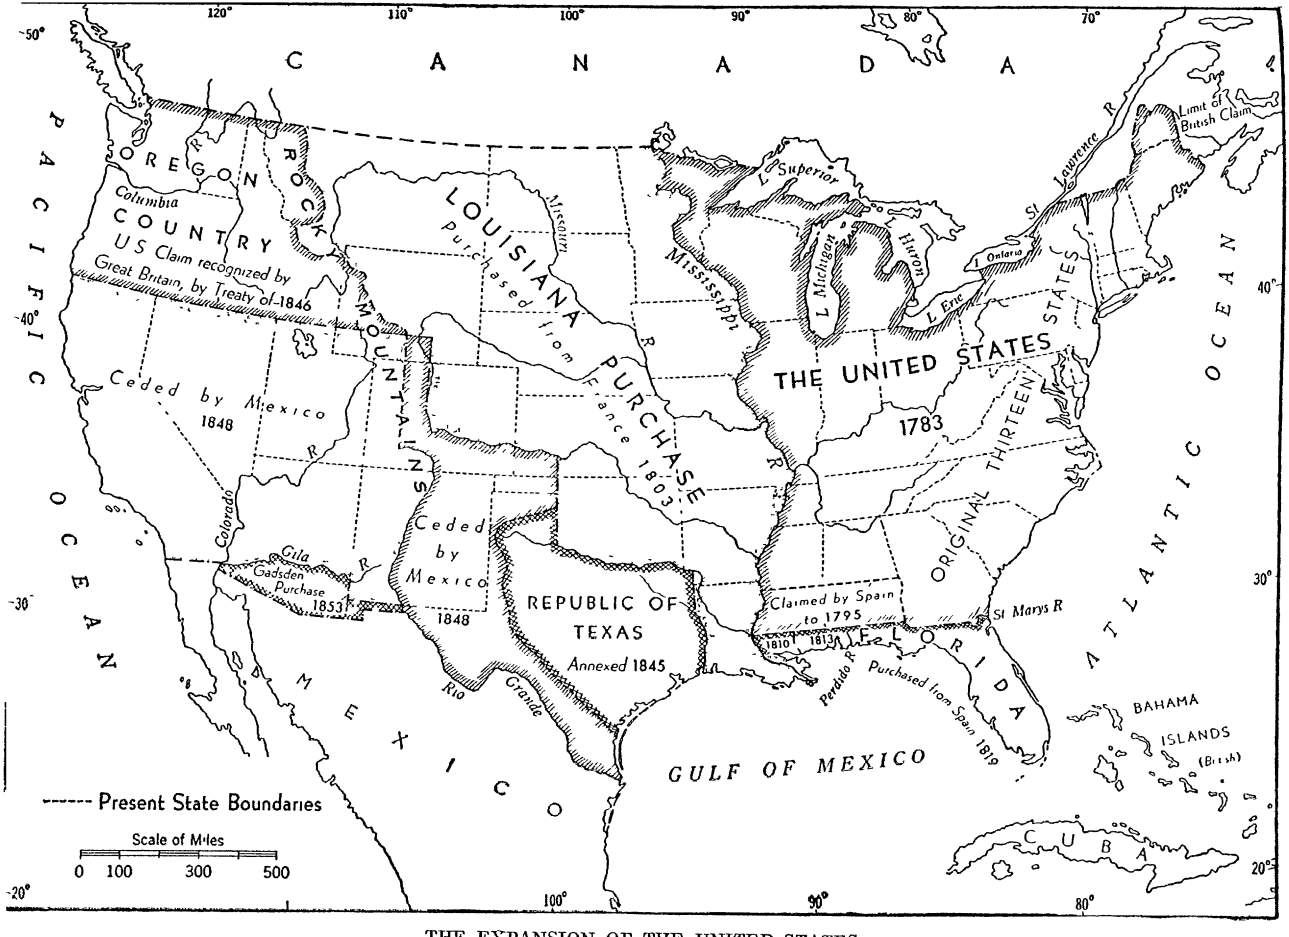
a. THE UNITED STATES, 1789-1861

1789, Mar. 4. First Congress met at New York.

Apr. 30. WASHINGTON INAUGURATED AS PRESIDENT Creation by Congress of three executive departments state, war, and treasury The **Judiciary Act** of 1789 provided for a system of federal district and circuit courts The first ten amendments to the constitution, the so-called *Bill of Rights*, were adopted by Congress and sent to the states

1790, Jan.—1791, Dec. Formulation of **Alexander Hamilton's** fiscal policies These included the **Funding Bill,** authorizing the treasury to accept old securities at par in payment for new bonds, bearing interest, the **Assumption Bill,** providing for federal assumption of the debts of the states, the **Bank of the United States;** and an excise tax In his *Report on Manufactures* Hamilton argued cogently for tariff protection, but the tariff, first imposed in 1789, remained primarily a revenue measure

1791-1814. Economic developments. In 1791 **Samuel Slater** and **Moses Brown** successfully applied power-driven machinery to the spinning of cotton yarn at Pawtucket, R I. This is commonly taken to date the introduction of the factory system and the beginning of the industrial revolution in the United States In 1792 **Eli Whitney** introduced the **cotton gin,** which, by rendering profitable the cultivation of short staple cotton in the uplands of the south, had a revolutionizing influence on the south and on the slavery problem. In 1797 **Charles Newbold** took out a patent for an **iron plow.** In 1798 Eli Whitney announced his plan for manufacturing guns on a "new principle," that of standardized, interchangeable parts. In 1814 **Francis Cabot Lowell** and his associates at Waltham (Mass.) combined in one establishment all the processes of cotton manufacture.



1792. Political parties made their appearance, largely because of differences of opinion with respect to Hamilton's policies **Jefferson,** who became the leader of the **Republican** (later the Democratic) **Party,** felt that Hamilton's policies were designed in the interest of financial and commercial groups and were inimical to the agrarian elements **Hamilton** and **John Adams** became the leaders of the **Federalist Party.**

1793. Washington and Adams re-elected With the outbreak of war in Europe between England and France, the latter sent **Genet** as minister to the United States His efforts to commit the United States to the support of France, even to the point of appealing from the president to the people, forced Washington to ask for his recall Determined to maintain neutrality in spite of the efforts of Hamilton and Jefferson to influence him in favor of England and France respectively, Washington issued his proclamation of neutrality (Apr 22) The following year (1794) the **Neutrality Act** was passed

1794. Whiskey insurrection in western Pennsylvania, resulting from opposition to the excise tax on domestic spirits, put down by militia of Pennsylvania and other states

The **eleventh amendment** proposed by Congress as a result of the decision of the supreme court in *Chisholm v Georgia* The amendment closed the federal courts to suits instituted against a state by citizens of another state or citizens or subjects of a foreign state

Since the Treaty of 1783 relations between England and the United States had been far from satisfactory England refused to enter into a commercial treaty and refused to evacuate the posts on the Great Lakes (ostensibly because of failure of the United States to observe the treaty provision with respect to collection of debts owed to British creditors, really in order to obtain control of fur trade and build up an Indian buffer state in the northwest) England was charged with inciting the Indians to hostility, with imprisonment of American seamen, and with capture of American merchant ships To adjust these differences **John Jay** was sent to England and

THE EXPANSION OF THE UNITED STATES

Nov 19. **Jay's Treaty** was concluded It provided for the evacuation of the border posts in 1796, permitted trade with the British East Indies, placed trade between the United States and Great Britain on a basis of "reciprocal and perfect liberty," and admitted American boats of not more than 70 tons burden to the West Indies Joint commissions were provided for settling the questions of the debt and the northeast boundary Claims on behalf of loyalists were dropped, balanced by claims for slaves carried away by the British armies Claims arising from alleged illegal seizures of ships were referred to commissions The Senate grudgingly ratified, after striking out the clause with respect to the West Indies

1795, Oct. 27. **Treaty of San Lorenzo** or **Pinckney's Treaty.** Since 1783 there had been constant friction with Spain over the southern boundary of the United States (England having retroceded Florida to Spain), over the navigation of the Mississippi, over Spain's machinations with the Indians of the southwest, and over her intrigues with the frontiersmen In 1786 negotiations between Jay and Gardoqui came to naught Finally in 1795 Thomas Pinckney succeeded in negotiating a treaty establishing the southern boundary at the 31st parallel, giving to Americans the right to navigate the Mississippi to its mouth, and granting to them the *right of deposit* at New Orleans for three years

1796, Sept. 18. **Washington's Farewell Address.**

1797, Mar. 4. **JOHN ADAMS,** president, with Jefferson as vice-president

The conclusion of Jay's Treaty with England involved the United States in difficulties with France, who regarded the treaty as evidence of a pro-British policy by the United States. The difficulty culminated in the attempt of the French Directory to extort money from the three American commissioners, Pinckney, Marshall, and Gerry This is the so-called **X.Y.Z. Affair.** Fighting on the sea occurred, a navy department was created, Washington was named commander of the army, and until Sept 30, 1800, a naval war was carried on. By the **Treaty of 1800** the treaty of alliance of 1778 with France was abrogated

1798. Stung by the criticisms of its opponents (many of them French citizens), the Adams administration enacted a series of repressive measures against them the **Naturalization Act** extending the required time of residence to fourteen years, the **Alien Act; the Alien Enemies Act,** and the **Sedition Act.** The last act especially represented an attempt to make a crime of political opposition These acts led to

1798-1799. The **Kentucky** and **Virginian Resolutions,** penned by Jefferson and Madison respectively, which, in effect, asserted that a state might nullify the force of an act of Congress within its confines, if it regarded such act as contrary to the constitution

1800 In the election, commonly referred to as the **Revolution of 1800,** Adams was defeated, but, because Jefferson and Burr had the same number of votes, the election was decided by the House of Representatives in favor of Jefferson The tie led to the movement culminating in the **twelfth amendment** (1804), which altered the method of electing the president and vice-president by requiring that separate ballots be cast for each

1801. **John Marshall,** chief justice of the supreme court

Mar. 4. **THOMAS JEFFERSON,** the first president to be inaugurated in Washington, the new capital

1801-1802. Repeal of the internal revenue taxes and of the Judiciary Act of the Adams administration

1802. **Ohio admitted** as the 17th state, and the first state to be carved out of the Old Northwest It had been preceded into the union by Vermont (1790), Kentucky (1792), and Tennessee (1796). The first authorized settlement of Americans north of the Ohio was made by the **Ohio Company** at Marietta (1788) A short time later the **Symmes Company** established a settlement in southwestern Ohio, while in 1796 Connecticut settlers established **Cleveland** in the Connecticut Western Reserve The planting of these settlements aroused the Indians to opposition In 1791 Gen. Arthur St Clair was decisively beaten by them, but in 1794 at **Fallen Timbers** Gen Anthony Wayne defeated them By the **Treaty of Greenville** (1795), the Indians ceded all but the northwest quarter of Ohio, thereby paving the way for the increased settlement leading to the admission to statehood

1803. **Marbury v. Madison,** the case in which John Marshall established the principle of judicial review of acts of Congress by declaring a section of the Judiciary Act of 1789 unconstitutional

Apr. 30. **THE LOUISIANA PURCHASE.** In 1800 Spain had retroceded Louisiana to France. Napoleon was then interested in Louisiana because of his ambition to re-establish a French colonial empire in America This alarmed

THE UNITED STATES DURING THE CONFEDERATION PERIOD

Jefferson, who feared a strong power at the mouth of the Mississippi. To reassure the west, alarmed at the possible closing of the river to its trade, Jefferson instructed **Livingston**, the American minister to France, to open negotiation for the purchase of a sufficient area at the mouth of the river to guarantee freedom of navigation and transshipment of goods. Monroe was sent to assist Livingston Meanwhile the failure of Napoleon's army to reconquer Santo Domingo, combined with the ominous turn of events in Europe, caused Napoleon to lose interest in a colonial empire He therefore sold Louisiana to the United States for 80,000,000 francs, thereby doubling the size of the country Louisiana included the area between the Mississippi and the Rocky Mountains, plus the island on which New Orleans stands Uncertainty as to the southern boundary of Louisiana led to prolonged controversy with Spain as to whether it included Texas and West Florida, which was not finally settled until the Treaty of 1819

1803-1804. New England Federalists, believing the accession of Louisiana would so strengthen the agrarian states as to lead to a decline in New England influence, planned the formation of a **northeastern confederacy,** composed of New England and New York. To carry New York with them they approached **Aaron Burr,** vice-president, who was disgruntled with Jefferson, and proposed that he run for the governorship, with Federalist support The opposition of Hamilton to this plan was followed by the duel between Burr and Hamilton (July, 1804), in which Hamilton was killed

1804-1806. Lewis and Clark Expedition. Meriwether Lewis and William Clark were selected by Jefferson to explore the trans-Mississippi country. Leaving St Louis, they ascended the Missouri to its source, crossed to the head-waters of the Snake River, thence down the Columbia River to the Pacific. The mouth of the Columbia had first been entered in 1793 by Capt. Robert Gray of Boston Explorations of Lewis and Clark gave the United States another claim to the "Oregon country."

1805. The **Tripolitan War,** which had begun in 1801, brought to a close by a treaty.

Mar. 4. Thomas Jefferson began his second term as president, with George Clinton as vice-president

Decision in the *Essex* case, reversing the decision in the case of the *Polly* (1800), and declaring the American re-export trade a violation of the Rule of 1756.

1806, May 16. Fox's order declared the coast of Europe from Brest to the Elbe River to be in a state of blockade, except between Ostend and the mouth of the Seine, where neutral vessels were admitted if not coming from or bound to an enemy port Napoleon retaliated (Nov. 21) with his **Berlin Decree** declaring a paper blockade of the British Isles A British order in council of Jan. 7, 1807, closed to neutrals the coasting trade between French ports On Nov 11, 1807, an order in council blockaded the coast from Copenhagen to Trieste against neutrals unless they had first entered or cleared from a British port and paid duties there In Dec Napoleon replied with his **Milan Decree** which declared that ships lost their neutral character if they obeyed the British order in council of Nov 11, or if they submitted to search on the high seas by British officers

1807, June. The *Chesapeake-Leopard* affair. The American ship *Chesapeake* was fired on by the British ship *Leopard* and four deserters taken from her Although Federalists and Republicans forgot their differences in the face of this national insult, Jefferson, opposed to war, merely ordered British ships of war to leave American waters, and demanded reparation and the abandonment of impressment

Aug. 17. Robert Fulton's steamboat, the *Clermont*, steamed up the Hudson from New York to Albany in 32 hours

Dec. 22 The Embargo Act Jefferson, still averse to war, resolved on commercial coercion as a means of forcing France and England to withdraw their restrictions on American trade. The act forbade the departure of ships for foreign ports, except foreign vessels in port at time the act was passed Coasting vessels were required to give bond to land their cargoes at American ports

Aaron Burr tried for treason and acquitted The trial was the outgrowth of Burr's activities in the west after his duel with Hamilton He planned the creation of an independent state, either at the expense of the United States or Spain, more probably the latter

1808. African slave trade prohibited after Jan. 1.

1809, Mar. 4—1817, Mar. 4. JAMES MADISON the fourth president.

Mar. 15. The repeal **of the Embargo Act** became effective. It had not brought England and France to terms, but had fallen with great weight upon American shipping. New England opposition to the

policy was reflected in Federalist gains in the election of 1808.

May 20. The **Non-Intercourse Law** permitted commerce with all countries except France and England.

1810, Mar. 23. Napoleon's **Rambouillet Decree** ordered the sale of all American ships which had been seized for violation of French decrees

May 1. **Macon's Bill No 2** repealed all restrictions on trade with the warring powers and provided that if either should remove its restrictions on American trade, the president should renew non-intercourse with the other. Napoleon announced revocation of the Berlin and Milan Decrees, effective Nov 1, whereupon Madison, on Nov 2, proclaimed the renewal of non-intercourse with England within 90 days Napoleon continued to seize American ships

1810-1811. **Rise of the war party.** The election of 1810 resulted in the defeat of many of the old members of pacific views and the choice of younger men, especially from the west, who were impatient with the peace policy These men, commonly known as the *War Hawks*, were especially aroused by the opposition of the Indians, led by **Tecumseh,** to the advance of white settlement in the northwest In Nov. 1811 occurred the **battle of Tippecanoe,** which made **William Henry Harrison** a hero in the eyes of the frontiersmen More and more the west became convinced that British aid and encouragement from Canada stiffened the Indian opposition The result was a growing demand for war with England and the conquest of Canada Reading the lesson of the election of 1810 aright, Madison adopted a firmer tone toward England

1812, Apr. **Ninety-Day Embargo** to insure that American ships would be safely in port when war with England began By this time England, fighting the Peninsular War in Spain, needed American supplies She therefore would have gladly revoked the orders in council if she could have been certain that Napoleon would absolutely withdraw his decrees against American shipping A new order in council announced that whenever the Berlin and Milan Decrees were unconditionally revoked, the British decrees would automatically cease. The French foreign minister thereupon produced a decree, dated a year earlier, which declared that the decrees were non-existent, so far as the United States was concerned, after Nov. 1, 1810 The document was drawn up in 1812 and antedated, but the British accepted it and revoked the orders in council, June 23 Meanwhile,

June 18 **War was declared on England,** on the ground of impressment, violation of the three-mile limit, paper blockade, and orders in council

1812-1814. **WAR OF 1812.** (See also p 793) In the naval warfare of the first year the Americans were surprisingly successful, the *Essex* capturing the *Alert;* the *Constitution*, the *Guerrière* and the *Java;* the *Wasp*, the *Frolic;* the *United States*, the *Macedonian* Later in the war, however, the American ships were one by one captured or bottled up. Except for the effect on the morale of the people, the victories on the high seas were without influence on the course of the war. On land the campaign of 1812 called for a triple invasion of Canada, which came to naught when **Hull surrendered Detroit** (Aug 16) In 1813 **Oliver Hazard Perry** won the **naval battle of Lake Erie.** In 1814 the Americans were successful at the engagements of **Chippewa** and **Lundy's Lane** in Canada, which decided nothing, while Capt **Thomas Macdonough** won the **naval battle of Plattsburg** on Lake Champlain. In the same year the British captured and **burned Washington,** but were repulsed at Baltimore (Sept. 13), whereupon they launched attacks on the Maine coast and on New Orleans In the southwest **Andrew Jackson** broke the military power of the Creek Indians and dismembered their territory (Aug 9, 1814), whereupon he proceeded to New Orleans to defend it against the British attack. On Jan. 8, 1815, he won the **battle of New Orleans.**

1814, Dec. 24. The **Treaty of Ghent** brought the war to a close The treaty was silent on the questions which had been the chief cause of controversy before the war It restored the *status quo ante*, and provided for joint commissions to determine disputed boundary questions between the two countries

Dec. **The Hartford Convention.** The New England states, disgruntled since the time of the embargo, had refused the call for militia during the war and had talked freely in terms of state rights When the federal government stationed no troops in the section and the British invaded the Maine coast in 1814, Massachusetts asked her sister states to join her in a convention to be held at Hartford. The fact that moderates obtained control prevented any possibility of secession, for which the bulk of the New England people were not prepared. The convention contented itself, therefore, with drawing up some proposed

amendments to the constitution, designed to safeguard more adequately New England interests With the conclusion of peace at Ghent the New England states soon forgot their grievances

1816. The Second **Bank of the United States** chartered The **Tariff of 1816** provided increased protection The conclusion of the War of 1812 was marked by an outburst of national feeling hitherto unknown within the country While the Madison administration had been unwilling to recharter the First Bank in 1811, it now regarded such an institution as necessary to a uniform circulating medium The Second Bank, chartered for 20 years, was to have a capital of $35,000,000, one-fifth to be subscribed by the government, which should name a like proportion of the directors. The Tariff of 1816 was enacted in response to the demand of young manufactures to be protected from the dumping of English goods, long held back by embargo and war

1817, Mar. 4—1825, Mar. 4. JAMES MONROE, the fifth president An era of good feeling, in which party strife seemed about to disappear, as indicated by the re-election of Monroe in 1820 with but one dissenting electoral vote

1817, Apr. 28. The **Rush-Bagot Agreement** between Great Britain and the United States, limiting naval forces on the Great Lakes

1818, Oct. 20. A convention between Great Britain and the United States established the 49th parallel as the boundary from the Lake of the Woods to the Rocky Mountains Being unable to agree on a division of the Oregon country, north of the 42d parallel and west of the mountains, the convention provided for joint occupation for a period of 10 years This was renewed in 1827.

1819. The *Savannah* crossed the ocean from Savannah to Liverpool, mostly under steam

Feb. 22 Treaty with Spain. Since 1803 Florida had been a source of difficulty between the United States and Spain In 1810 Madison took advantage of an insurrection in West Florida to annex that province. After 1815 Amelia Island was a base for smugglers and freebooters. Fugitive slaves escaped to Florida, and raids against settlements in Georgia and Alabama led to trouble. In 1817–1818, in the so-called **Seminole War,** Jackson invaded Florida and executed two British subjects **John Quincy Adams,** secretary of state, demanded that Spain maintain order in Florida or cede it to the United States. Spain chose the latter because of inability to comply with the former demand The United States agreed to pay an indemnity of $5,000,000 to its citizens for their claims against Spain. The treaty also delimited the western boundary of the Louisiana Purchase, and provided for Spain's relinquishment of all claims to territory on the Pacific north of the 42d parallel

1819-1824. The nationalism of the post-war period was emphasized by a series of notable supreme court decisions by John Marshall In **McCulloch v. Maryland** (1819), **Cohens v. Virginia** (1821), and **Gibbons v. Ogden** (1824) he gave judicial sanction to the doctrine of centralization of power at the expense of the states In **Dartmouth College v. Woodward** (1819), as in the earlier case of **Fletcher v. Peck** (1810), the court provided judicial barriers against democratic attacks upon property rights.

1820, Mar. 3. The Missouri Compromise. The admission to statehood of **Louisiana** (1812), **Indiana** (1816), **Mississippi** (1817), **Illinois** (1818), and **Alabama** (1819) had not raised the question of slavery After the Revolution many southerners had agreed with northerners as to the desirability of the abolition of slavery. Southerners had been prominent in the organization of the **American Colonization Society** (1816) for the purpose of colonizing free blacks in Liberia. With the spread of cotton culture into the interior of the south, following the invention of the cotton gin by Eli Whitney (1792), southern sentiment gradually changed Meanwhile increasing feeling in the north against the spread of slavery resulted in strong opposition to the admission of **Missouri** as a slave state The attempt to balance the admission of Missouri as a slave state by admitting **Maine** as a free state having failed, a compromise was arranged whereby Missouri was to be admitted without restriction as to slavery, while in all the remaining portions of the Louisiana Purchase north of 36° 30′ slavery was to be forever prohibited **Maine** was admitted (1820) and **Missouri,** after careful scrutiny of its constitution by Congress, was finally admitted as a slave state (Aug 10, 1821)

Apr. 24. A **Land Law** was passed abolishing the credit system, established by the Law of 1800, which had encouraged overpurchase of land with resulting distress, especially in the period of declining prices following the close of the war in 1815. The Act of 1820 established the minimum price of public lands at $1.25 per acre

1823, Dec. 2. THE MONROE DOCTRINE enunciated by the president in his annual message to Congress. The

background of the doctrine is to be found in the threat of intervention by the **Holy Alliance** to restore Spain's revolting American colonies and in the aggressive attitude of Russia on the northwest coast of America It was, at the same time, an expression of American national sentiment and of distrust of England, whose foreign minister, George Canning, had proposed a joint declaration The message stated that "*the American continents, by the free and independent condition which they have assumed and maintained, are henceforth not to be considered as subjects for future colonization by any European powers*," and that European intervention in this hemisphere could not be viewed "*in any other light than as the manifestation of an unfriendly disposition toward the United States*" It also disclaimed any intention of the United States to take any part "*in the wars of the European powers*" or "*in matters relating to themselves*," i e the European powers

1824. **Robert Owen** founded *New Harmony* in Indiana, the first of a large number of communistic experiments in the United States

Presidential election, in which none of the four candidates, J Q Adams, Jackson, Clay, and W. H Crawford, obtained an electoral majority, although Jackson received a plurality. In the House of Representatives Adams was elected president

1825, Mar. 4—1829, Mar. 4. JOHN QUINCY ADAMS, sixth president

1825. COMPLETION OF THE ERIE CANAL

1826. The abortive **Panama Congress** planned by Bolívar and others to present a united American front against Spain and Europe The Senate reluctantly approved the appointment of an American mission to the congress One delegate died *en route* while the other arrived after the congress had adjourned

1828, May 19. The Tariff of Abominations, framed by Jackson men for defeat, to discredit J. Q Adams and bring about the election of Jackson. To their surprise it passed Congress, was signed by Adams, and promptly aroused strong opposition, especially in South Carolina, where Calhoun penned his *South Carolina Exposition* (1828), which gave the classic statement of the nullification doctrine

The American Peace Society founded in New York by **William Ladd. Elihu Burritt** became the chief leader of the American peace movement.

July 4. The Baltimore and Ohio Railroad begun, the first public railroad in the United States.

1829, Mar. 4—1837, Mar. 4. ANDREW JACKSON, who defeated Adams in the election of 1828, seventh president The election of Jackson was a triumph of the frontier democracy of the west.

The spoils system, the practice of basing appointments on party service, was nationalized by Jackson. The system was already well-established in certain states of the north and west

1829-1850. Rise of the common man and era of reform. By 1829 the principle of **white manhood suffrage** was established in most states Between 1810 and 1826 Maryland, South Carolina, and New York had adopted it Massachusetts reduced her former suffrage requirement to mere tax payment The Virginia convention of 1830 removed the chief restrictions on the suffrage Opposition to reform was strongest in Rhode Island

1829. The Workingmen's Party organized in New York, following the example set in Philadelphia the preceding year. The movement spread to other seaboard states in the north The program of the movement included social reform, free public schools, banking legislation, abolition of imprisonment for debt, etc

1830. Organization of the Mormon Church at Fayette, N Y, by **Joseph Smith.** *Book of Mormon* first printed

Great debate between **Webster** and **Hayne** on the nature of the union The debate was really begun by Benton, who protested against New England attempts to limit the sale of western lands

Jackson's veto of the **Maysville Road Bill.**

1831. William Lloyd Garrison established the *Liberator* at Boston to advocate unconditional emancipation of the slaves. This marks the beginning of the abolitionist movement The **New England Anti-Slavery Society** (1832) and the **American Anti-Slavery Society** (1833) **Oberlin College** opened its doors to Negroes as well as to women (1833)

1830-1834. Controversy between Georgia and the Cherokee Indians and development of Jackson's **Indian policy** An act of March 10, 1830, authorized the president to locate on lands west of the Mississippi all Indians who surrendered their holdings east of the river. This act was prompted largely by the controversy between the state of Georgia and the Cherokee Indians It led to the creation of an area west of Arkansas as the final home for the southern Indians. A commissioner of Indian affairs was created

1831, July 4. Treaty by which France agreed to pay $5,000,000 in satisfaction of spoliation claims

1832, July. Tariff Act of 1832, an improvement over the *Tariff of Abominations*, but retaining the protective principle which was unsatisfactory to South Carolina and led to

1832-1833. The nullification episode in that state, in which a state convention declared the tariff laws of 1828 and 1832 unconstitutional and void within the state On Dec 10 Jackson issued his proclamation against the nullifiers, and on Jan 16, 1833, he asked Congress for additional legislation to enable him to enforce the tariff law On Mar 1, Congress enacted the **Force Bill.** Meanwhile **Henry Clay** brought forward (Feb. 12) his compromise tariff, providing for gradual reduction of the tariff until July 1, 1842, when it should reach the 20% level

1832. The Bank controversy. The Second Bank of the United States, although capably managed after 1819, had committed certain political indiscretions which, in combination with Jackson's prejudice against the alleged monopolistic tendencies of the bank, aroused his opposition When Clay and Webster urged the bank to apply for a renewal of the charter in order to embarrass Jackson in the campaign of 1832, Jackson was aroused to the point where he vetoed the measure. Jackson construed his election over Clay as popular approval of his veto of the Bank Bill, and he resolved to crush the institution In 1833 there began the **removal of the deposits,** or the transfer of government funds to certain state banks known as the *pet banks*

1833. The General Trades' Union linked all the trade societies of New York in one organization Trade unionism began to supersede the workingmen's parties as the characteristic form of labor activity, until the collapse of the movement in the panic of 1837

1833-1837. The Whig Party. Southern particularists who were angered by Jackson's handling of the nullification episode, those who feared the leveling tendencies of Jacksonian Democracy, the supporters of the bank, and the industrial and financial groups generally formed the Whig Party, largely lacking in constructive principles, but held together by a common hatred for and distrust of Jackson

1834-1839. Inventions. Cyrus McCormick took out a patent on a reaping machine. **Obed Hussy** had invented a reaper, but lacked the means to make it a commercial success like McCormick's. In 1836 **Samuel Colt** patented his revolving pistol, commonly known as the *six-shooter* This new weapon was of great importance in the conquest of the Mounted Plains Indians In 1837 the **John Deere** steel plow was introduced, which, by virtue of its scouring quality, greatly facilitated the conquest of the prairies In 1839 **Charles Goodyear** accidentally discovered the process for the vulcanization of rubber He took out his first patent in 1844

1836. Texan independence. The American colonization of Texas had begun in 1821 when **Stephen Austin** obtained a grant of land on condition that he settle a certain number of families thereon This was followed by similar grants to other *empresarios* who introduced a substantial number of American settlers This movement, largely of southerners, was part of the normal westward movement of the American people Beginning about 1830 difficulties developed In 1836 the **Republic of Texas** was established The decisive battle was that of **San Jacinto** (Apr 21, 1836)

1836. Act for distribution of surplus revenue among the states, theoretically as a loan

1837, Mar. 4—1841, Mar. 4. MARTIN VAN BUREN, eighth president.

1837 Panic of 1837. Fundamentally this crash was due to the wave of speculation and reckless expansion which swept the country in the years of 1833–1837 The situation was complicated by the failure of certain great business houses in England which had invested heavily in American securities, by poor crops in the west in 1835 and 1837, and by Jackson's **Special Circular** (July 11, 1836) which required that public lands be paid for in "hard" money

1837-1840. Struggle between Van Buren and the Whigs over the **independent treasury** proposed by Van Buren for the deposit of government funds. The Whig leaders favored the establishment of a third United States Bank Independent treasury plan adopted (1840).

1837. Mt. Holyoke Seminary, first women's institution of college rank, opened by **Mary Lyon.**

1837-1842. Difficulties between the United States and Canada. The *Caroline* affair (Dec 1837) in which an American steamer in the service of Canadian rebels was seized by Canadian militia on the American side of Niagara River, and in which an American citizen was killed One **Alexander McLeod,** a Canadian, boasting that he had killed the American, was arrested and tried in New York courts His

acquittal averted the possibility of serious difficulties between the United States and Great Britain.

Difficulty over the northeastern boundary led to the **Aroostook County War** (1838–1839) The boundary was finally adjusted in the **Webster-Ashburton Treaty** (Aug 9, 1842).

1838 **The Underground Railroad** organized

1838-1839. Congress adopted **gag resolutions** against anti-slavery petitions

1841. **The Pre-emption-Distribution Act.** Benton had long advocated the pre-emption policy with respect to public lands, while Clay had advocated the distribution of the proceeds of the sale of public lands among the states By a compromise the two measures were now combined, with a proviso, insisted upon by the south, which required that distribution should cease if the tariff should rise above the 20% level

1841, Mar. 4—1845, Mar. 4. **WILLIAM HENRY HARRISON** and **JOHN TYLER,** the ninth and tenth presidents. Harrison died Apr 4, 1841

1842. **The Dorr Rebellion** in Rhode Island, occasioned by refusal of conservatives to liberalize the suffrage and to reform representation. It swept away the Charter of 1663, which had served as the constitution of the state of Rhode Island, 1776–1842

The Whig Tariff restored protective features on the expiration of the Compromise Tariff of 1833

1844, Apr. 12. **Calhoun's treaty** for annexation of Texas signed Defeated in the Senate June 8, 1844

Dr. Horace Wills, a dentist of Hartford, demonstrated that nitrous oxide might be used as an **anaesthetic.** In 1846 **Dr. W. T. G. Morton,** a Boston dentist, applied **ether** as an anaesthetic.

S. F. B. Morse transmitted the **first telegraph message** over a line from Baltimore to Washington

Presidential campaign. The Democrats nominated **James K. Polk** on the platform declaring for reannexation of Texas and the reoccupation of Oregon The Whigs nominated **Henry Clay.** The Liberty Party nominated **James G. Birney** and took enough popular votes from Clay to enable Polk to carry New York and win the election.

1845, Mar. 1. Tyler brought about **annexation of Texas** by joint resolution of Congress.

1845, Mar. 4—1849, Mar. 4. **JAMES K. POLK,** eleventh president

1846, June 15. **Oregon Treaty** with Great Britain The two countries had long claimed the Oregon country, between 42° and 54° 40′, although the region really in dispute was that between the Columbia River and the 49th parallel **The Treaty of Joint Occupation** of 1818 was renewed in 1827, with provision that it might be terminated by either party upon a year's notice. British interest in the Oregon country centered in the fur trade, dominated, after 1821, by the **Hudson's Bay Company.** American traders had visited the Oregon coast at an early day Capt Gray had discovered the mouth of the Columbia River (1793), Lewis and Clark had explored the region, and John Jacob Astor had established the post of **Astoria** (1811) A Methodist mission was established in the Willamette Valley (1834) and was followed by others By the early forties a substantial migration of American farmers to the Willamette Valley was under way, so the Anglo-American rivalry became one of fur trader versus settler The treaty established the 49th parallel as the boundary on the mainland, and then the middle of the channel to the ocean

Elias Howe patented his **sewing machine.**

The **Walker Tariff** enlarged the free list and established a rate of 26 5% on dutiable imports

Re-enactment of the **Independent Treasury Act** which the Whigs had repealed in 1841

1846-1848. **WAR WITH MEXICO** The United States had many grievances against Mexico, while Mexico could not forgive the United States for the annexation of Texas Polk was determined to have New Mexico, preferably by peaceful means, but when **Slidell's mission** to Mexico for the purpose of purchasing that territory failed (Nov. 1845–Mar. 1846), Polk was prepared for war By sending American troops into the disputed area between the Nueces and Rio Grande Rivers, he brought about a skirmish which enabled him to say that Mexico had "shed American blood on American soil" An army under Zachary Taylor invaded Mexico and won the **battles of Palo Alto** and **Resaca de la Palma** (May 8 and 9), took **Monterey** (May 24), and won a victory at **Buena Vista** (Feb. 22 and 23, 1847) Col S W. Kearny occupied **Santa Fé** (Aug 18, 1846) Marching inland from Vera Cruz, **Winfield Scott** fought the battles of **Cerro Gordo** (Apr 17 and 18, 1847), **Churubusco** (Aug. 20), **Chapultepec** (Sept. 12 and 13), and captured **Mexico City** (Sept. 14) On the Pacific an American squadron seized the California ports.

1846, Aug. 8. The **Wilmot Proviso** introduced into the House of Representatives, when Polk asked for an appropriation to enable him to treat with Mexico for territorial cessions It provided that in any territory acquired from Mexico, slavery should be excluded Although it never passed the Senate, it raised the slavery issue and aroused the fears of the south

1848, Jan. 24. **Discovery of gold** at Coloma, 60 miles east of Sutter's Fort, California. Beginning of the great gold rush

Feb. 2. The **Treaty of Guadalupe Hidalgo** closed the war with Mexico Mexico gave up claims to Texas, recognized the Rio Grande as the boundary, and ceded New Mexico and California to the United States in return for $15,000,000 and the assumption of American claims against Mexico

July 19. **First Women's Rights Convention,** the first in world history, held at Seneca Falls, New York The movement had started with the visit of **Frances Wright** to America in 1827 Her example aroused to action **Sarah** and **Angelina Grimke, Lucretia Mott,** and **Elizabeth Cady Stanton.**

Presidential campaign, in which the Whig candidate was **Zachary Taylor,** hero of the recent war The Democrats nominated **Lewis Cass,** who had recently proposed squatter sovereignty as a solution of the problem of slavery in the territories, raised by the Wilmot Proviso The **Free Soil Party,** favoring homestead and the exclusion of slavery from the territories, nominated **Van Buren,** who, by splitting the Democratic vote in New York, enabled Taylor to carry the state and win the election

1849, Mar. 4—1853, Mar. 4. **ZACHARY TAYLOR** and **MILLARD FILLMORE,** twelfth and thirteenth presidents Taylor died July 9, 1850

1850. **The COMPROMISE OF 1850** On Jan. 29, 1850, Clay introduced his compromise resolutions providing that California should be admitted as a free state, that territorial governments should be established in the remainder of the Mexican cession without any action by Congress with respect to slavery; Texas should yield her claims in the boundary dispute with New Mexico, in return for which the United States would assume the Texan debt; the slave trade should be abolished in the District of Columbia; and Congress should enact a more drastic fugitive slave law Great debate in which Calhoun spoke (Mar. 4) against the compromise; Webster (Mar. 7) for the compromise; Douglas for, Jefferson Davis, Seward, and Chase against. On Apr 18 the resolutions were referred to a Senate committee of 13, with Clay as chairman Between Sept 9 and 20 the separate measures, known collectively as the **Compromise of 1850,** were passed California to be admitted as a free state, the remainder of the Mexican cession to be divided at the 37th parallel into the territories of New Mexico and Utah, to be admitted to the union ultimately as states, with or without slavery as their constitutions might provide at the time of admission; the claims of Texas to a portion of New Mexico to be satisfied by payment of $10,000,000, the slave trade in the District of Columbia to be abolished and a more effective fugitive slave law enacted

Land grants to railways adopted by Congress A grant was made to the state of Illinois to help the **Illinois Central Railroad** and another to Mississippi and Alabama in support of the **Mobile and Ohio** line

Apr. 19. The **Clayton-Bulwer Treaty** between the United States and Great Britain with respect to British encroachments in Central America and a future interoceanic canal

June 3. **Nashville Convention** of nine southern states Dominated by moderates, it demanded merely the extension of the 36° 30′ line.

1851. **Maine prohibition law,** sponsored by Neal Dow It became the model for all similar legislation of the period

June 2. **The Erie Railroad** reached Dunkirk, on Lake Erie, being the first railway to make connections with the Lakes

1852. The Democratic Party, committed to finality of the Compromise of 1850 as a solution of the problem of slavery in the territories, elected

1853, Mar. 4—1857, Mar. 4. **FRANKLIN PIERCE,** fourteenth president

1853. **Rail connection established between New York and Chicago.** By 1860 the region north of the Ohio River and east of the Mississippi had been firmly attached commercially to the North Atlantic seaboard The movement of internal trade, originally north and south along the Mississippi, now became predominantly a west-east movement, the shift proving of great economic and political significance.

Dec. 30. The **Gadsden Purchase** rounded out our possessions in the Far West.

1854, May 30. THE KANSAS-NEBRASKA ACT, which repealed the Missouri Compromise of 1820, opened the Nebraska country to settlement on the basis of **popular sovereignty,** and provided for the organization of two territories, Kansas and Nebraska Douglas was the author of the measure, and he was largely motivated by his desire to pave the way for a Pacific railway The act undid the sectional truce of 1850 and proved the death-blow to the Whig Party

Mar. 31. Commodore Perry negotiated a **treaty with Japan,** opening the country to commercial intercourse with the United States

Oct. 18 The **Ostend Manifesto** The American ministers to England, France, and Spain, instructed to confer on the best means of acquiring **Cuba,** met at Ostend and drew up the manifesto saying that, if Spain refused to sell Cuba, the United States would be justified in taking it by force. This caused great excitement in free states

The **Know Nothing** and **Republican Parties** appeared, the former as a protest against the Kansas-Nebraska Act

1854-1858 War for "Bleeding Kansas." The opening of Kansas to settlement under the Douglas doctrine of popular sovereignty precipitated a mad scramble for control between pro-slavery and free-soil elements In Apr. 1854 the **New England Emigrant Aid Society** was formed to colonize free-soilers in Kansas This aroused the pro-slavery people **Border Ruffians** from Missouri interfered in elections in Kansas A pro-slavery element attacked the town of Lawrence, and in return **John Brown** staged the massacre at **Pottawatomie Creek** (May 24, 1856) The **Lecompton Constitution** was formed by pro-slavery forces, but was denounced by Douglas as a fraud upon the people of Kansas and a violation of the popular sovereignty doctrine This led to a break between Douglas and Buchanan The Senate accepted the Lecompton Constitution, but the House rejected it The deadlock was broken by the **English Bill,** enacted May 4, 1858, providing for resubmission of the constitution to popular vote in Kansas If accepted, the state would receive a grant of land, if rejected, statehood must await further growth of population It was rejected, and Kansas did not become a state until Jan 1861.

1857, Mar. 4—1861, Mar. 4. JAMES BUCHANAN, fifteenth president.

Mar. 7. The **Dred Scott decision,** declaring that the Missouri Compromise was unconstitutional because Congress had no right to enact a law which deprived persons of their property in the territories of the United States Dred Scott, therefore, had not acquired his freedom by being taken into a territory where slavery had been prohibited by the compromise The decision caused bitter criticism of the court in the north

Tariff of 1857; reduced duties

Panic of 1857, following a period of over-expansion and speculation

1858, Aug. 5. The transatlantic cable completed It operated only for a short time

Aug. Lincoln-Douglas debates, seven in number, in the campaign for election to the Senate. Douglas was elected, but Lincoln, by asking Douglas to reconcile his doctrine of popular sovereignty with the Dred Scott decision, forced him to enunciate his **Freeport heresy,** which was deeply distasteful to the southern wing of the party

Abandonment of the government **ship subsidy policy** (introduced 1845), because of opposition of the southern states.

1859, Oct. 19. John Brown's raid on Harper's Ferry still further aroused sectional passions

Drake's petroleum well, near Titusville, Penn , marked the beginning of the modern oil industry

1860. The Davis Resolutions, introduced by Jefferson Davis, demanded a Federal slave code for the protection of property in slaves in the territories

Presidential campaign. The Republicans nominated **Abraham Lincoln** on a platform opposing further extension of slavery in the territories and supporting homestead and tariff The Democrats split at Charleston on the question of slavery in the territories Two platforms were drawn up, one demanding a federal slave code, the other endorsing the Freeport doctrine of Douglas Subsequently the northern Democrats nominated **Douglas,** while the southern Democrats named **John C. Breckinridge.** The Union party nominated **John Bell.** Lincoln was elected, in a purely sectional contest He received no electoral support in the slave states

Dec. 20. South Carolina adopted the **Ordinance of Secession,** as a protest against the election of Lincoln.

1860, Dec.—1861, Feb 4. Futile efforts to save the union The **Crittenden Compromise Resolutions,** proposing the extension of the Missouri Compromise line to the Pacific; conference of governors of northern states; the **Peace Convention** at Washington, Feb. 4, 1861.

1861, Jan.-May. Mississippi, Florida, Alabama, Georgia, Louisiana, Texas, Virginia, Tennessee, Arkansas, and North Carolina seceded from the union

Jan. 9. The ship *Star of the West* was fired upon by a battery at Charleston

Feb. 4 Delegates of the seven seceding states met at Montgomery, Ala., and formed a provisional government, taking the name **Confederate States of America.**

Feb. 8. Jefferson Davis elected president and **Alexander H. Stephens** vice-president of the Confederacy

1861, Mar. 4—1865, Apr. 15. Abraham Lincoln, sixteenth president

b. THE CIVIL WAR, 1861-1865

MILITARY EVENTS. The Confederates, having seized Federal funds and property in the south, proceeded (Apr 10) to demand the evacuation of the Federal **Fort Sumter** in Charleston Harbor Major Anderson, in command, having refused unconditional surrender, Gen Beauregard bombarded it Apr. 12–13, just as a relief expedition of the Unionists approached

Apr. 15. Lincoln called for 75,000 volunteers to serve three months, and summoned Congress to meet July 4 May 3 he appealed for 42,000 men to serve three years or for the duration of the war General expectancy of a short conflict Immense advantages of the north, 23 states with almost 23,000,000 population against 11 states with 5,000,000 white population; financial strength of the north, manufacturing facilities, more extensive railway communications, etc South largely dependent on cotton-growing and badly hampered by the blockade of the Confederate ports (proclaimed Apr 19), from the beginning the south was on the defensive

May 13. Great Britain recognized the Confederate States as belligerents.

July 21. FIRST BATTLE OF BULL RUN. By July there were some 30,000 raw troops in and around Washington, under command of Gen. **Winfield Scott.** Across the Potomac lay 25,000 Confederates under **Beauregard** near the Manassas railway junction Another force, under Gen **Joseph E. Johnston,** lay in the Shenandoah Valley, near Harper's Ferry. Congress, meeting July 4, demanded action. Gen **Patterson** was sent to contain this latter force, while Gen. **Irvin MacDowell** reluctantly advanced on Beauregard. But part of Johnston's army, under Col **T. J. (Stonewall) Jackson,** got away and joined Beauregard At Bull Run the Federal army was routed It streamed back to Washington in a state of dissolution The effect of the battle was to open the eyes of the Unionists and to introduce a period of more extensive and systematic preparation

Nov 1. Gen **George B McClellan** appointed to succeed Scott in command of the Federal forces McClellan's policy one of cautious, careful preparation and reliance on numbers He spent the winter training some 200,000 men (Army of the Potomac) for a march on the Confederate capital, Richmond

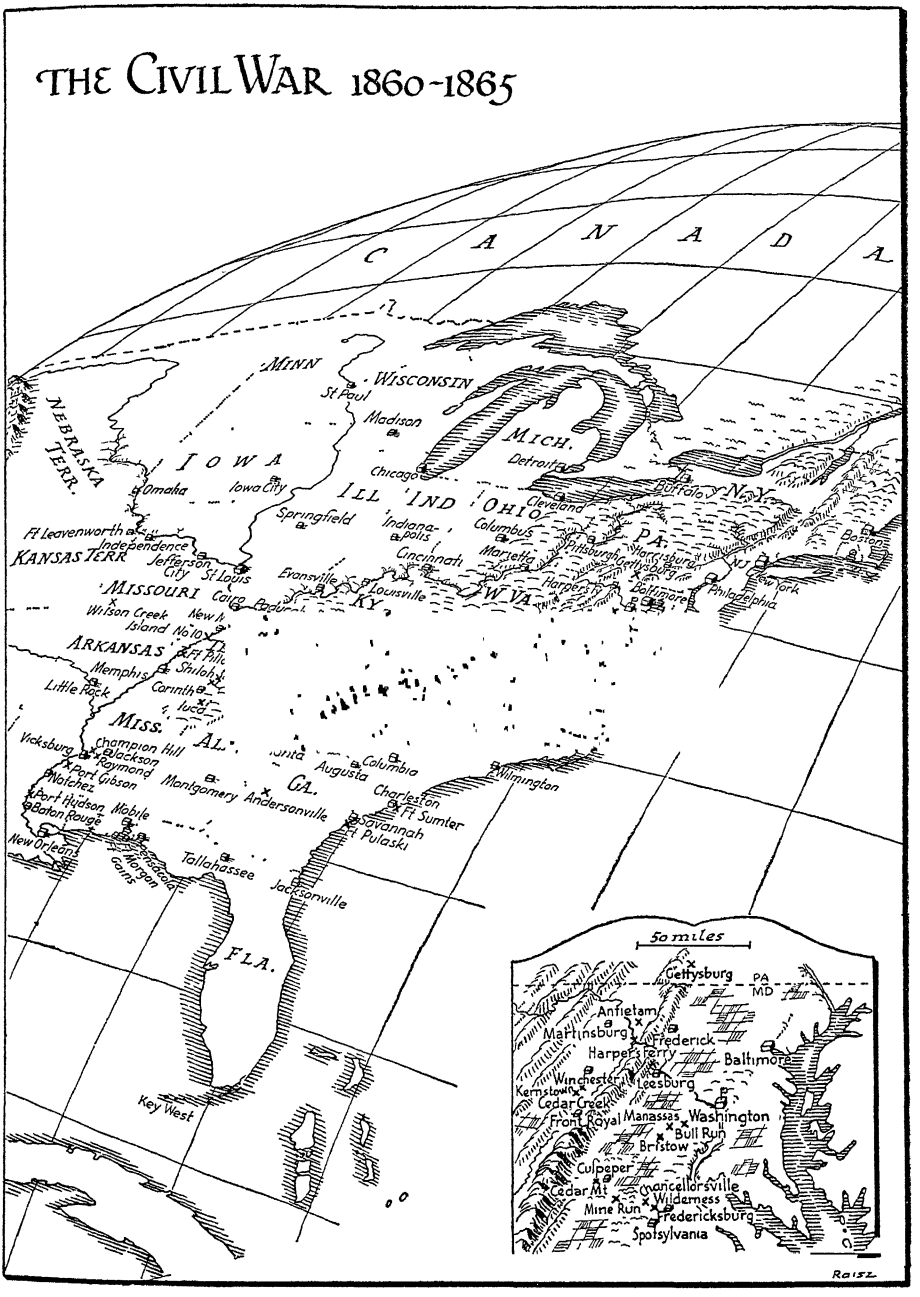
Nov. 8 Mason and Slidell, commissioners of the Confederate States to Great Britain and France, were taken off the British steamer *Trent* by the Federal steamer *San Jacinto* Sharp protests of Great Britain and danger of war War averted by the prudence and skill of **William H Seward,** secretary of state The commissioners were given up, in accordance with a principle of international law for which the United States had invariably contended

1861-1862. NAVAL OPERATIONS. To make the blockade of the southern coasts effective and to prevent privateering, a joint naval and military expedition was sent out in Aug 1861 to take key positions on the coast

1861, Aug. 28-29. Attack and capture of **Forts Clark and Hatteras** on the North Carolina coast

1862, Feb. 8. Capture of **Roanoke Island** and **Elizabeth City** (Feb 10)

Mar. 3-4. Amelia Island, on the Florida coast, taken



Mar 8. The Confederate frigate *Merrimac,* made over as an ironclad, appeared in Hampton Roads and sank the *Cumberland.*

Mar. 9. The Federal ironclad *Monitor* (revolving gun-turret) engaged the *Merrimac* and finally obliged her to withdraw Epoch-making development in naval warfare.

Mar 12. Jacksonville, Florida, occupied by Federal forces

Mar. 14. Capture of New Berne, North Carolina This gave the Federal forces a base from which to threaten Richmond, and obliged the Confederates to keep an army near the capital

Apr. 24-25. A Federal force (27 ships and 15,000 troops), under command of Flag-officer (later Admiral) **D. G. Farragut** and Gen. **Benjamin F. Butler,** ran the forts

below New Orleans and bombarded the city. After the landing of troops, the city was taken (May 1)

1862 THE PENINSULA CAMPAIGN. After endless delay, McClellan decided to advance on Richmond, not overland through territory cut by many rivers, but by water to the mouth of the James River, whence he could proceed up the peninsula between the James and the York The advance began in April The Confederates, under Johnston and **Robert E Lee** (b 1807, d 1870, Confederate commander in chief after June 1, 1862), were greatly outnumbered and fell back They were saved in part by McClellan's vacillation and by the operations of Jackson, who managed to draw a considerable Federal force into the Shenandoah Valley and ultimately succeeded in joining Lee with substantial reinforcements Heavy fighting around Richmond **battle of Fair Oaks** (May 31), **Seven Days' battle** (June 25–July 1 **Mechanicsville, Gaines' Mill, White Oak Swamp, Malvern Hill**), resulting in the withdrawal of the Federal forces from the peninsula

Campaign in Maryland In the autumn of 1862 Lee began to push on toward Washington Confederate forces under Jackson defeated the Union forces under Banks at **Cedar Mountain** (Aug 9), while the Union army under Gen Pope was defeated by Jackson in the **Second Battle of Bull Run** (Aug 30) The Confederates crossed the Potomac (Sept 4) and invaded Maryland

Sept. 17. BATTLE OF ANTIETAM, indecisive, but Lee began to fall back into Virginia McClellan, as usual unable to take advantage of his opportunities, did little to pursue him and did not cross the Potomac until Oct 26

Nov. 7. Gen **Ambrose E Burnside** was appointed to succeed McClellan He pushed the advance in Virginia, but was badly defeated by Lee in the **battle of Fredericksburg** (Dec 13) Jan 25, 1863, he was succeeded by Gen **Joseph Hooker.**

CAMPAIGNS IN THE WEST. In western Kentucky and Tennessee there was active campaigning throughout the year 1862 Brig.-Gen. **Ulysses S. Grant** (b. 1822, d 1885), serving under Gen. **H. W. Halleck,** in command of the Union troops, on Feb. 6 forced the **surrender of Fort Henry** on the Tennessee River, and on Feb 16 he secured the **surrender of Fort Donelson** on the Cumberland The Confederates abandoned **Nashville** and fell back on the line Memphis–Chattanooga

Apr. 6-7. Battle of Shiloh. The Confederates, under Gen. **Albert S. Johnston,** attacked Grant's lines at **Pittsburg Landing** After an initial success the Confederates (Johnston killed, Beauregard in command) were driven back They evacuated **Corinth** (May 30) and surrendered **Memphis** (June 6) The Federal forces commanded the Mississippi as far south as Vicksburg

Oct. 8. Battle of Perryville, Ky A Confederate force under Gen **Bragg** had advanced into Kentucky in the hope of compelling the withdrawal of the Union forces to the north Bragg threatened Cincinnati, but the Kentuckians failed to support him He was retreating southward when he met the Federal army of Gen **Rosecrans** in the battle of **Murfreesboro** on **Stone River** (Dec. 31, 1862–Jan 3, 1863)

1863. EASTERN CAMPAIGNS. After several months spent in reorganization, Hooker on May 1 ordered an advance from Chancellorsville, Va

May 1-4. BATTLE OF CHANCELLORSVILLE. The Federal forces were defeated by the Confederates (death of Stonewall Jackson) Gen **George G. Meade** relieved Hooker as commander of the Army of the Potomac (June 28). Meanwhile Lee had begun the invasion of the north by way of the Shenandoah Valley, establishing himself in southern Pennsylvania Meade took up his position at Gettysburg

July 1-3 BATTLE OF GETTYSBURG. In three days of heavy fighting Lee was unable to dislodge the Federal forces and was obliged to fall back to the Potomac. Decisive battle of the war Henceforth the Confederates were obliged to remain on the defensive and the war became a test of endurance

WESTERN CAMPAIGNS. The operations in the west centered first on the taking of **Vicksburg,** key to the control of the Mississippi. On Apr 30 **Grant** crossed the river below the fortress, marched east and took Jackson and then doubled back, hemming in the fortress

July 4. VICKSBURG SURRENDERED, starved out after a short siege. July 8 **Port Hudson,** farther down the river, surrendered, giving the Unionists command of the entire river and cutting off Texas, Arkansas, and Louisiana from the rest of the Confederacy

Sept. 9. The Federal troops, under Rosecrans took **Chattanooga** and pursued the Confederates, under Bragg, into Georgia. Defeated in the **battle of Chickamauga** (Sept. 19–20), Rosecrans was obliged to fall back to Chattanooga, where he was

hard pressed by the Confederates Reinforced by troops from Vicksburg under Gen **William T. Sherman** and from the Potomac under Hooker, Grant, in command of the armies of the west, fought the

Nov. 23-25. BATTLE OF CHATTANOOGA (**Lookout Mountain,** Nov 24, **Missionary Ridge,** Nov 25), driving the Confederates out of Tennessee and opening the road into Georgia

1864, Mar. 9. Grant made lieutenant-general and commander in chief of all the armies; Sherman given command in the west Grant's plan was to defeat Lee's army He crossed the Rapidan (May 3) and began the advance from near Chancellorsville through the Wilderness

May 5-6 BATTLE OF THE WILDERNESS. Grant, attacked by Lee, was unable to defeat him, but maintained his ground and continued the advance towards Spotsylvania Court House

May 8-18. Battles around Spotsylvania Court House, on the **North Anna River** (May 21–31), and at **Cold Harbor** (June 1–3). Grant was unable to defeat Lee, but crossed the James River and assaulted **Petersburg** (June 15–18), 20 miles below Richmond, which he then besieged In order to create a diversion, Lee sent Gen **Early** to threaten Washington. Early carried through raids into Maryland and Pennsylvania, but was defeated by Gen **Philip H Sheridan** in the **battles of Winchester** (Opequan Creek) and **Fisher's Hill** (Sept 19, 21), after which the Confederates were obliged to withdraw from the Shenandoah Valley (**battle of Cedar Creek,** Oct 19). Sheridan laid the whole region waste and then rejoined Grant at Petersburg

SHERMAN'S CAMPAIGN Sherman started from Chattanooga (May 5) with about 100,000 men to march through Georgia to Atlanta He was opposed by one of the ablest Confederate commanders, Gen **Joseph E. Johnston,** with 65,000 men Johnston did what he could to impede Sherman's advance, but wisely refused a general battle Sherman, however, crossed the Chattahoochee River (July 17), as a result of which Johnston was removed from his command His successor, Gen **John B. Hood,** offered battle, but was defeated (**battle of Atlanta,** July 22)

Sept. 2 Evacuation of Atlanta by the Confederates Sherman destroyed the factories and stores and urged upon Grant his plan of a march to the sea Part of the army, under Thomas, was sent north to watch Hood, who was defeated before **Nashville** (Dec 15–16). Sherman himself, with 60,000 men, started for the southeast (Nov 16), ravaging the country as he proceeded. He reached the sea (Dec 12) and the Confederates abandoned **Savannah** (Dec. 20). Sherman then turned north into South Carolina. **Columbia** was taken (Feb 17, 1865) and the advance continued into North Carolina A Federal fleet took **Charleston** (Feb. 18) and Sherman took **Goldsboro** (Mar 19)

1865. LAST CAMPAIGNS. The Confederate armies, caught between Grant in the north and Sherman in the south and deprived of food supply, were no longer able to withstand the pressure Sheridan won the **battle of Five Forks** (Apr 1) and thus forced the **evacuation of Petersburg** (Apr. 2) and the **surrender of Richmond** (Apr 3) Grant with all his forces then pursued and surrounded Lee

Apr. 9. LEE'S CAPITULATION AT APPOMATTOX COURT HOUSE. Johnston, with the southern army, surrendered to Sherman (Apr 26), and the last Confederate army, under Gen Kirby Smith, surrendered at Shreveport, La , on May 26 Jefferson Davis, president of the Confederacy, fled to Georgia, but was captured (May 10) and imprisoned.

POLITICAL AND SOCIAL ASPECTS OF THE WAR PERIOD:

1861, Mar. The Morrill Tariff, marking the beginning of successive tariff increases which by 1864 reached duties of 47%

Aug. Income Tax of 3% on all income in excess of $800

1862, Feb. First of the **Legal Tender Acts,** followed by similar acts in 1862 and 1863

July. The first comprehensive internal revenue act, born of the war.

Sept. 22. The president issued a preliminary proclamation declaring that all slaves in states or parts of states which should still be in rebellion on Jan. 1, 1863, should be free from the latter date on. The formal **Emancipation Proclamation** was issued on Jan. 1, 1863

1863, Feb. 25. National Banking Act passed to create a market for United States bonds, to drive out of circulation the notes of banks chartered by the states, to create a powerful financial support for the government, and to provide for the country a uniform circulating medium. Stockholders obtaining a charter could buy government bonds, deposit them with the treasurer of the United States, and then issue national bank notes up to 90% of the current market value of the bonds The banks having proved slow to take out

charters, state bank notes were driven out of existence by a tax of 10% (1865)

June 20. **West Virginia** (the loyal part of Virginia) admitted to the union as the thirty-fifth state

1864, Nov. 8 **Re-election of Lincoln. Andrew Johnson,** vice-president.

1865, Feb. 1. Resolution in Congress to submit to the states the **thirteenth amendment** to the constitution, prohibiting slavery within the United States The amendment was ratified by two-thirds of the states by Dec 18

1865-1873. Serious and recurring **epidemics** of smallpox, typhus, typhoid, cholera, scarlet fever, and yellow fever in Philadelphia, New York, Boston, Baltimore, Washington, Memphis, and New Orleans led to the realization of the need for improved sanitation In 1866 a municipal **board of health** was created in New York and in 1869 a state board of health was established in Massachusetts

1861-1868. **New territories** In the years just before the war the discovery of precious metals in the Pike's Peak country and in the Washoe Mountains led to mining rushes to those regions, with the result that the territories of **Colorado** and **Nevada** were organized in 1861 Mining rushes elsewhere in the years of the war resulted in the organization of the territories of **Arizona** (1863), **Idaho** (1863), and **Montana** (1864) **Wyoming** was made a territory in 1868

1862-1886 **Taming of the Plains Indians** The constant pressure of white population, combined with broken promises, led to continued outbreaks of the Indians The **Homestead Act** (1862) played a prominent part in the settlement of the west The **Morrill Act** (1862), providing for grants of land to states in order to aid the establishment of agricultural colleges, opened up more areas In 1862 the **Union and Central Pacific Railways** were chartered by Congress and given a large grant of land They formed the first transcontinental railway (completed May 10, 1869).

In 1862 the **Sioux Indians** of Minnesota were defeated by Gen Sibley at **Wood Lake** In 1864 the **Cheyenne** went on the warpath, with the aid of the Arapahoe, Apache, Comanche, and Kiowa tribes Troops under Col Chivington staged a massacre of Indians at **Sand Creek,** Colo (Nov 1864) Efforts of troops to build an emigrant road from Fort Laramie along the Powder River to the mines of Montana and Idaho led to war with the **Plains Sioux** (1866) A commission authorized by Congress persuaded the Apache, Comanche, and Kiowa tribes to locate in **Indian Territory,** and secured the removal of other tribes from the Plains to more remote regions In 1869 Congress created the **Board of Indian Commissioners** to supervise all government expenditures for the Indians Meanwhile the advance of white settlers, slaughter of the buffalo, and the gold rush to the Black Hills caused an outbreak of the Plains Sioux (1876) under **Sitting Bull,** which resulted in the **massacre of Custer** and his men at the **Little Big Horn** (June 25) **Nez Percé Indians** under **Chief Joseph** were defeated (Oct 1877) and removed to Indian Territory The last important Indian uprising came in the years 1882–1886, when the **Apaches** in Arizona and New Mexico, under **Victorio** and **Geronimo,** resisted efforts to confine them to reservations By 1886 the Indians had all been removed to Indian Territory or to reservations

c. THE UNITED STATES, 1865-1917

1865, Apr. 14. **ASSASSINATION OF LINCOLN;** death Apr 15 **Andrew Johnson,** vice-president, succeeded.

Cost of the war. National debt in 1860, $64,842,287, in 1866, $2,773,236,173, which great increase was in addition to the debts incurred by the states and municipalities

May 29. President Johnson issued a **proclamation of amnesty,** granting pardon to all ordinary persons who had participated in the rebellion on taking an oath of allegiance

Dec. **Joint Committee of Fifteen on Reconstruction** appointed by Congress

Dec 18 **Ratification of the thirteenth amendment,** abolishing slavery.

1866, Feb. Johnson vetoed a measure extending the life of the **Freedmen's Bureau,** thereby increasing tension between himself and Congress

April. Congress passed over Johnson's veto the **Civil Rights Bill,** declaring all persons born in the United States to be citizens of the United States and entitled to equality of treatment before the law This was designed to guarantee equal treatment to Negroes in southern states

June 13. **FOURTEENTH AMENDMENT** sent to states for ratification. Declared ratified July 28, 1868. It incorporated in the constitution the principle of the Civil Rights Act; gave the southern states the choice of Negro enfranchisement or reduced representation in the lower House of Congress; barred from

office-holding ex-Confederates who had been federal or state officials before the war, until they should be pardoned by a two-thirds vote of Congress, provided that the war debt of the south should never be paid or that of the union repudiated, and that former masters should never be compensated for their slaves In the light of subsequent events, the most significant provision of the amendment was the clause, **"nor shall any state deprive any person of life, liberty, or property, without due process of law."** It was generally assumed at the time that this clause was designed solely to safeguard the freedmen in the possession of their civil rights and it was so interpreted by the supreme court in the **Slaughter House Cases** (1873) In 1886, however, in the case of **Santa Clara County v. Southern Pacific Railroad**, the supreme court declared that a corporation was a "person" within the meaning of the amendment and thus entitled to its protection. From this time the **due process clause** of the amendment came to have a new significance More and more it was applied by the courts to shield business and corporations against hostile legislative action by the states, and by reading into the clause the doctrine of **liberty of contract** the court made it a formidable barrier against the enactment of much-needed social legislation by the states

July 27. The Atlantic cable brought to Newfoundland by **Cyrus W. Field**, thus establishing telegraphic communication with Great Britain.

1867, Mar 2. THE BASIC RECONSTRUCTION ACT. Johnson having advised the southern states to reject the fourteenth amendment, all except Tennessee promptly did so, the quarrel over Reconstruction thereby becoming the major issue in the congressional election of 1866, in which Johnson was repudiated This act, as supplemented by regulations of March 23 and July 19, 1867, and March 11, 1868, divided the southern states into five military districts To be restored to the union, the states must hold state conventions, whose delegates must be elected with the aid of Negro suffrage, these conventions must frame constitutions, approved by Congress and ratified by the people of the states, and the legislatures elected under the constitution must ratify the fourteenth amendment

Mar. 2. Tenure-of-Office Act. Mar 4 it was passed over Johnson's veto

Mar. 30. Purchase of Alaska for $7,200,000.

1868, Feb. 24-May 26. Impeachment and trial of Andrew Johnson. Johnson and Congress had disagreed over the Reconstruction policy. The immediate occasion for the impeachment proceedings was Johnson's alleged violation of the Tenure-of-Office Act. He was acquitted by a vote of 35 to 19, one short of the necessary two-thirds of the Senate

The Sholes typewriter first put to commercial use

1869, Feb. 26 The fifteenth amendment adopted by Congress The radicals, fearing that southern whites might obtain power in their states and repeal the provisions of their state constitutions granting the suffrage to the Negro, sponsored this amendment, providing that the right to vote shall not be abridged because of "race, color, or previous condition of servitude" It was declared ratified, Mar. 30, 1870 Virginia, Texas, Mississippi, and Georgia were forced to ratify this amendment as a condition of restoration to the union

The Westinghouse airbrake patented. In this same year **James Oliver** invented the **plow with chilled steel moldboard,** and **refrigeration** was introduced in railway transportation In 1875 two carloads of refrigerated meats were shipped from Kansas City to New York and another to Boston

Sept. The National Prohibition Party was organized by a convention in Chicago.

Nov. The National Woman's Suffrage Convention met at Cleveland (**Rev. Henry Ward Beecher**, president) and organized the **American Woman Suffrage Association,** indicating increased activity of women in regard to the ballot.

1869, Mar. 4—1877, Mar. 4. ULYSSES S. GRANT, eighteenth president

1871, May 8. TREATY OF WASHINGTON with Great Britain, providing (1) for the reference to the German Emperor of the dispute as to the northwest boundary (decided in favor of the United States, Oct 21, 1872), (2) for a partial settlement of the fishery dispute (**Halifax award,** 1877, which gave Great Britain $5,500,000) — this part of the treaty was abrogated by the United States, 1883; (3) and for the settlement of the **Alabama claims** by an international commission to sit at Geneva

1872, Aug. 25. The Geneva Award of $15,500,000 to the United States as compensation for direct damages resulting from the depredations of the *Alabama* and other Confederate cruisers

Nov. Re-election of Grant, the Republican candidate, over **Horace Gree-**

ley, the Liberal Republican candidate, who was endorsed by the Democratic Party, which abstained from placing a candidate in the field Increasing dissatisfaction of many Republicans with the Grant administration had led to the organization of the **Liberal Republican Party.** Grant received 286 electoral votes to 62 for Greeley

1873. **Crédit Mobilier scandal,** resulting from the revelation by congressional investigating committees that **Schuyler Colfax,** the outgoing vice-president, and a number of members of Congress, including James A Garfield, held stock, for which they had not paid, in the Crédit Mobilier, the construction company which built the Union Pacific Railway This was merely one of the numerous instances of corruption in the Grant régime In 1874 **W. A. Richardson,** secretary of the treasury, hastily resigned to escape a vote of censure by Congress Grant's private secretary, **O. E. Babcock,** was implicated in the **Whiskey Ring,** while **W. W. Belknap,** secretary of war, resigned in 1876 to escape impeachment for bribe-taking **James G. Blaine,** speaker of the House, was compromised through the **Mulligan letters.**

1873, Sept. **Panic** precipitated by the failure of **Jay Cooke and Company.** Fundamentally the panic was due to inflated currency, unlimited credit, reckless speculation, and over-expansion As much of the business expansion had been financed from abroad, a panic in Vienna (May 1873), which spread to other European money centers, caused the withdrawal of much of the foreign capital from the United States

The Great Bonanza Important discovery of silver in Nevada.

1874. **Washburn** and **Pillsbury** introduced the process of reducing wheat to flour by use of chilled steel rollers

1875, Jan. 14. **The Resumption Act** passed by Congress, providing for the resumption of specie payment (suspended in 1861) Jan 1, 1879

1876. **Johns Hopkins University** opened in Baltimore As the first real graduate school in America, it gave great impetus to advanced study.

Feb. 15. **Patent** for manufacture of **barbed wire.** This was of the utmost significance in the conquest of the Great Plains

Mar. 10. First intelligible sentence transmitted by **telephone** by **Alexander Graham Bell.** The invention was patented Mar 17.

The Granger decisions. These decisions of the supreme court came as a climax to the first important farmers' movement in American history In 1867 there had been formed the **Patrons of Husbandry,** commonly called the *Grange,* a non-political organization of farmers At this time the farmers in the middle western states were incensed because of the unfair practices of railways and grain elevators Organizing farmers' parties, they proceeded (1870–1875) to enact legislation in Illinois, Iowa, Wisconsin, Minnesota, and other states, bringing railways and grain elevators under state control The Granger decisions established the following principles (1) A state under its police power has authority to regulate a business which is clothed with a public interest (2) Until Congress acts in the premises, the states may establish rates for interstate shipments (3) The determination of the reasonableness of rates is a legislative rather than a judicial function The second of these principles was set aside in 1886 in the case of the *Wabash, St Louis and Pacific Railroad v Illinois,* while the third was undermined and set aside by a series of decisions between 1889 and 1898, the last being the case of *Smyth v Ames*

Nov. **The disputed election** In the election, **Tilden,** the Democratic candidate, was assured of 184 electoral votes; **Rutherford B. Hayes,** Republican, had 165 electoral votes with 20 votes in the states of Oregon, Florida, South Carolina, and Louisiana in dispute, with two sets of returns For election 185 electoral votes were necessary Since the constitution made no provision for such an eventuality, Congress created on

1877, Jan. 29 **The Electoral Commission,** composed of five senators, five representatives, and five justices of the supreme court, the fifth justice to be chosen by the four named in the statute The commission was composed of 8 Republicans and 7 Democrats, and, deciding all questions by a strict party vote, awarded the 20 electoral votes to Hayes, giving him the 185 necessary for election

Mar. 3. **The Desert Land Act,** designed to encourage development of irrigation in arid areas by private effort

July 31. **The phonograph** patented by **Thomas A. Edison.**

1877, Mar. 4—1881, Mar. 4. **RUTHERFORD B. HAYES,** nineteenth president

1878, Feb. **The Bland-Allison Act.** In 1873 Congress had omitted the standard silver dollar from the list of authorized domestic coins to be minted in the future. This action synchronized with the demonetization of silver by various Euro-

pean countries, and with a marked increase in silver production, especially in the Comstock Lode in Nevada As a result the commercial price of silver declined sharply, giving rise to a demand by the silver interests for the coinage of silver, which was precluded by the legislation of 1873, commonly referred to as the *Crime of* 1873 The silver producers were supported by the farmers, who believed the free coinage of silver would bring an upturn in the price of farm products In 1877, therefore, **R. P. Bland** of Missouri introduced into the House of Representatives a bill providing for the free coinage of silver Although it passed the House by a sectional vote, it was amended in the Senate, and as the **Bland-Allison Act** it was passed over the veto of Hayes It authorized the secretary of the treasury to purchase from two to four million dollars' worth of silver bullion monthly for coinage

The arc light introduced by **C. F. Brush.**

1879, Jan. 1. Resumption of specie payment. The success of the policy was greatly aided by the unusual demand abroad for American agricultural products, which brought gold into the country in large quantity.

Oct. 21. Thomas Edison invented the **incandescent electric light,** maintaining incandescence for over 40 hours

1881, Mar. 4. JAMES A. GARFIELD, twentieth president. Shot July 2 and died Sept 19, 1881, being succeeded by **Chester A. Arthur,** vice-president

May 21. The **American Red Cross Society** organized, with **Clara Barton** as president

1882, May 6. The Chinese Exclusion Act. The increasing immigration of Chinese, especially in California, led to a race riot as early as 1871 The formation of a workingmen's party in that state in 1877 brought the matter into prominence and to the attention of Congress The Act of 1882 barred Chinese laborers from entrance into the United States for a period of ten years. In 1902 the exclusion was made perpetual and the same act prohibited the immigration of Chinese to the United States from Hawaii and the Philippines In 1885 an act of Congress prohibited the entrance of all laborers under contract

1883, Jan. 16. The Pendleton Act. After more or less continual discussion since 1865, Congress provided in this act for a bipartisan commission to set up and administer a system of **competitive examinations** as a test of fitness for appointment to federal office. It also prohibited the levying of **campaign contributions** upon federal office-holders Although the plan applied immediately only to the executive departments in Washington, to the custom-houses, and to the larger post-offices, the president was authorized, at his discretion, to extend the "classified list."

Tariff Act. Despite a redundant revenue and the recommendation of tariff reductions by a tariff commission, the protective principle, so securely established by the Civil War tariffs, remained intact Although substantial reductions were made in internal revenue duties, the reductions in import duties averaged less than 5%

Sept. 8. The **Northern Pacific Railroad** completed (chartered and endowed with an enormous grant of land in 1864). This was the second transcontinental line The **Southern Pacific** was the third, and by 1893 no less than five were completed Other lines threaded their way across the prairies and plains to the mountains, letting in the tide of population which brought the frontier to an end

1883-1890. The problem of the treasury surplus. Cleveland would deal with the surplus by reducing the tariff duties, which he urged in his message to Congress in 1887 and which he made the leading issue in the campaign of 1888 Republicans attempted to remove the surplus by retirement of Civil War bonds, the building of a new navy, and reckless pension legislation

1884. Presidential campaign between **James G. Blaine** (Republican) and **Grover Cleveland** (Democrat). The **Mugwumps,** the reforming wing of the party, deserted Blaine in favor of Cleveland Cleveland was elected, 219 electoral votes to 182

1885, Mar. 4—1889, Mar. 4. GROVER CLEVELAND, twenty-second president

1885. The linotype invented by **Ottmar Mergenthaler.**

1886. The Presidential Succession Law, providing that in the event of the death of both president and vice-president, members of the cabinet should succeed to the presidency in definite order

Dec. The American Federation of Labor organized. The Civil War years witnessed the formation of a number of national trade unions, which **W. H Sylvis** attempted to federate into a single nation-wide association known as the **National Labor Union** (1866). In 1869 **Uriah Stephens** formed the **Knights of Labor,** which represented an attempt to combine all labor, skilled and

unskilled, organized and unorganized, into one body Between 1879 and 1885 they grew rapidly In 1885–1886 they became involved in a series of strikes on the Gould railway system, in the last of which they were routed and discredited In 1886 there occurred a widespread movement in favor of the 8-hour day May 4, 1886, the **Haymarket Square riot** in Chicago still further discredited the Knights of Labor, who now gave way to the American Federation of Labor as the first permanent national labor movement in American history The germ of the organization dated from 1881, when disgruntled members of the Knights of Labor, led by **Samuel Gompers**, formed the **Federation of Organized Trades and Labor Unions**

1887, Feb. 4. INTERSTATE COMMERCE ACT. As early as 1874 the **McCrary Bill**, looking to federal regulation of the railways, passed the House of Representatives, but failed in the Senate. In 1878 the **Reagan Bill** passed the House, but was defeated in the Senate The growing realization of the shocking practices of the railways led to the appointment by the Senate in 1885 of the **Cullom Committee**, which conducted hearings in the principal cities of the country This was followed by the passage of the **Act of 1887.** It declared that charges of the railways must be reasonable and just, made pooling illegal, contained a long-and-short-haul clause, declared rebates illegal, and created an **Interstate Commerce Commission** with power to inquire into the management of the carriers, summon witnesses, compel the production of papers, and invoke the aid of the federal courts Up to 1903 the commission was largely frustrated by the courts In 1897, in the *Maximum Freight Rate Case*, the supreme court denied the commission's authority to prescribe a maximum rate The long-and-short-haul clause was rendered ineffective and the commission was left with the duty of collecting railway statistics and requiring the publication of rates by the companies

Feb. 8. The Dawes Act, authorizing the president, at his discretion, to terminate tribal government and communal ownership of land among the Indians and to divide the land at the rate of a quarter section for each head of a family, full ownership to be withheld for 25 years In 1906 the **Burke Act** authorized the secretary of the interior to bestow full property title whenever convinced of the Indians' fitness.

1888. Presidential campaign. Cleveland (Democrat) against Harrison (Republican). The tariff was the dominant issue Although Cleveland had a popular plurality, he lost the election, receiving 168 electoral votes to 233 for Harrison Treachery of Tammany in New York cost Cleveland the election

1889, Mar 4—1893, Mar. 4 BENJAMIN HARRISON, twenty-third president.

1889, Apr. 22. Oklahoma opened to settlement. The Territory of Oklahoma was organized in 1890 The movement into the trans-Mississippi country led to the admission of the last states to the union **Nevada** (1864), **Nebraska** (1867), **Colorado** (1876); **North Dakota, South Dakota, Washington,** and **Montana** (1889); **Wyoming** and **Idaho** (1890), **Utah** (1896), **Oklahoma** (1907), **New Mexico** and **Arizona** (1912).

June 14 Samoan Treaty signed. In 1872 the American consul in Samoa obtained harbor privileges for American ships. In 1878 the United States secured the exclusive right to use the harbor of Pago-Pago When in 1886 the American consul proclaimed an American protectorate over Samoa, the state department disavowed the act. By the **Treaty of 1889** the United States, Germany, and Great Britain recognized the independence of Samoa, but placed authority in the hands of a chief justice and the Apian municipal council, the members of which were to be chosen by the three countries By a treaty of Dec 4, 1899, Germany and the United States partitioned the Samoan Islands, the American share being Tutuila, with the harbor of Pago-Pago

Oct 2. First Pan-American Conference convened at Washington The idea of closer relations among the nations of the western hemisphere, with the United States playing the rôle of an elder sister, had long been in the mind of James G Blaine, who as Garfield's secretary of state had planned such a congress in 1881 His successor, Frelinghuysen, cancelled the arrangements As secretary of state in Harrison's cabinet, Blaine carried the idea to fruition. All Latin-American nations except San Domingo were represented The conference rejected Blaine's plan of reciprocity and refused to adopt a convention calling for the promotion of peace by arbitration, but established the **Pan-American Union**, a bureau of information

1890, June 19. The Force Bill, providing for federal control of federal elections, reported in the House of Representatives. It aimed to protect Negro voters in southern states against attempts to disfranchise them It passed the House, but was not adopted by the Senate.

June 27. Disability Pension Act, in reality a service pension act, since it provided pensions for all veterans of 90 days' service who could claim physical or mental disability, regardless of origin, which precluded the gaining of a livelihood by manual labor Pensions were to be granted to widows of soldiers without regard to the cause of the husband's death if the marriage had occurred prior to 1890

July 2. THE SHERMAN ANTI-TRUST LAW enacted After the formation of the Standard Oil Trust in 1879 (revised in 1882), numerous large business combinations made their appearance, thereby raising the specter of monopoly, which led to the demand for legislation by Congress The **Sherman Act** declared illegal "*every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce among the several states or with foreign nations*" The act was loosely drawn and left several important questions unanswered Did it apply to combinations of labor, did it apply to combinations of the railways, and was the word "every" to be construed literally or reasonably? In the case of *Debs* (1895) the supreme court gave an affirmative answer to the first question, while in the *Trans-Missouri Freight Association Case* (1897) it answered the other two in an affirmative manner.

July 14. The Sherman Silver Purchase Act. The continued decline in the commercial price of silver, plus the strengthening of the silver forces in the Senate by the appearance of senators from the newly admitted states of the northwest, led to a demand for further legislation with respect to silver As the price of their support of new tariff legislation desired by the conservative wing of the Republican Party, the silver group obtained the desired legislation. The act authorized the treasury to purchase 4,500,000 ounces of silver monthly for coinage into dollars It provided for the issuance of treasury certificates, to be redeemed in either gold or silver at the discretion of the treasury

Oct. 1. The McKinley Tariff Act. The purpose of the law was such an increase in protective duties as would diminish the revenue from customs duties, thereby relieving the treasury of the surplus By placing sugar on the free list and providing a bounty on domestic sugar, a substantial decline in revenue was certain. The law made provision for limited reciprocity treaties.

1892, Feb. 29. Treaty with Great Britain regarding the Bering Sea seal fisheries. Blaine, as secretary of state, had carried on a long controversy with Great Britain on this question, basing his arguments on faulty law, history, and ethics The treaty submitted the controversy to an arbitral court, which in 1893 denied the right of the United States to prohibit fishing beyond the three-mile limit In 1911 an international convention prohibited pelagic sealing for 15 years.

1892-1895. Labor troubles. A strike of workers in the Homestead Plant of the Carnegie Steel Company was called by the Amalgamated Association of Iron and Steel Workers (June 30, 1892) as a result of disagreement over a wage scale The use of Pinkerton detectives by the Carnegie Company led to violence, which was followed by the use of state troops to protect the Carnegie properties Sympathy of the public, at first with the workers, was alienated later In the end the Amalgamated Association was destroyed May 11, 1894, a strike occurred in the plant of the Pullman Company, in which the American Railway Union, formed the previous year by **Eugene V. Debs,** participated, with resulting obstruction of the mails and destruction of property Without consulting Gov Altgeld, Cleveland sent federal troops to Chicago, and on the advice of Olney, the attorney-general, an injunction was issued ordering the officials of the union to desist from obstruction of the mails or from injuring the property of the railroads Upon disregarding the injunction, Debs was arrested for contempt of court and sent to jail The United States circuit court approved the use of the injunction, sentenced Debs to prison for six months, and approved the use of the Sherman Anti-Trust Act against labor unions where they were engaged in a "conspiracy to hinder and obstruct interstate commerce." The next year the supreme court sustained the judgment of the lower court The use of the injunction gave capital a formidable weapon against labor.

1892, Feb. 22. The People's Party organized at St Louis For a decade there had been a gathering discontent of the farmers, resulting from the depressed condition of agriculture Organizations of farmers, known as the *Southern Alliance* and the *Northwestern Alliance,* had appeared, and held meetings at St Louis (Dec 1889), Ocala, Fla (Dec 1890), and Cincinnati (May, 1891). They now formed the **People's** or **Populist Party.** In July, 1892, at their Omaha convention, they nominated **James B. Weaver,** a veteran inflationist, as their candidate for the presidency and drew up a platform declaring for a national currency without the use of banking corpo-

rations, free and unlimited coinage of silver, a graduated income tax, postal savings banks, and government ownership of railways and telephone and telegraph lines

Harrison defeated for re-election by **Cleveland,** who denounced the McKinley Tariff and the Force Bill Cleveland received 277 electoral votes; Harrison, 145, and Weaver, the Populist candidate, 22

1893-1898. Hawaii became of increasing concern to the United States. Jan 17, 1893, a provisional government, established with the connivance of the American minister, supplanted the Hawaiian monarchy Feb. 14 there was signed a treaty annexing Hawaii to the United States When the Senate failed to ratify before Cleveland came into office, he promptly withdrew the treaty and sent a commissioner to the islands to investigate Failing in his efforts to bring about a restoration of the monarchy, Cleveland recognized the republic which had in the meantime been established In June, 1897, McKinley arranged a new treaty of annexation, which was defeated in the Senate July 7, 1898, Hawaii was annexed by joint resolution of the two houses of Congress

1893, Mar. 4—1897, Mar. 4. GROVER CLEVELAND president for the second time.

1893. Panic of 1893. Depression had begun to spread over the western world in 1890 when the banking house of Baring collapsed as a result of unfortunate investments in the Argentine. British investors in American securities began to sell, which was largely responsible for the movement of gold from the country Over-expansion in rails, due to the import of British capital, had created a boom which collapsed when the railways were unable to meet their charges The situation was complicated by the dissipation of the treasury surplus through reckless pension legislation and the Tariff of 1890, which sharply reduced revenue To Cleveland there was just one cause of the panic the world-wide fear of our inability to maintain a gold standard was draining off the supply of the precious metal For this fear, he alleged, the Sherman Silver Purchase Act was responsible. He therefore asked the special session of Congress to repeal the act After bitter debate, on

Oct. 30. The Sherman Silver Purchase Act was repealed.

The Anti-Saloon League founded, a milestone in the development of the prohibition movement. It inaugurated a nation-wide campaign in 1895.

1894-1896. Sale of government bonds in an effort to maintain the gold reserve Finding that repeal of the Silver Purchase Act did not stop the outflow of gold, the treasury, to obtain gold, arranged for sale of bonds by banks in Jan and Nov 1894 In Feb 1895 the Morgan-Belmont syndicate sold $60,000,000 bonds at a profit of $7,000,000, causing much criticism In Jan 1896 bonds were offered at public subscription

1894, Aug 18. The Carey Act, granting 1,000,000 acres of land to each of the states of Colorado, Idaho, Montana, Nevada, Oregon, Utah, Washington, and Wyoming to encourage irrigation by state action In 1908 they each received another million acres

Aug. 27. The Wilson-Gorman Tariff Act, a violation of the Democratic platform, became a law without Cleveland's signature As a result of Senate amendments to the original bill, the act retained the protective principle, although duties were lowered to about 40% It contained a provision for a 2% tax on incomes above $4000 On

1895, May 20. The income tax was declared unconstitutional in the case of *Pollock v Farmers Loan and Trust Co*, causing much criticism An income tax declared a direct tax which, in accordance with the constitution, must be apportioned among the states in proportion to population

The Venezuela boundary dispute Upon the refusal of Great Britain to submit to arbitration the disputed boundary between Venezuela and British Guiana, Secretary of State **Olney,** on July 20, 1895, sent a note to Great Britain, asserting that a forcible rectification of the boundary by Great Britain would violate the Monroe Doctrine, and declaring that the one way to settle the dispute was by arbitration He then stated that "*today the United States is practically sovereign on this continent, and its fiat is law upon the subjects to which it confines its interposition.*" **Lord Salisbury** replied (Nov 26), rejecting arbitration and denying the applicability of the Monroe Doctrine to this dispute. Dec 17, Cleveland asked Congress to authorize a commission to ascertain the facts in the dispute, and asserted the duty of the United States to support the findings. The commission was authorized and appointed, Jan. 4, 1896. Feb 2, 1897, Great Britain and Venezuela signed a treaty, submitting the dispute to arbitration. The awards made in 1899 largely supported the British position.

1896. Election of William McKinley, running on a single gold standard

platform, over **William Jennings Bryan,** Democratic candidate, supporting free silver. Because of the Democratic espousal of free silver, the Populists supported Bryan Silver Republicans supported Bryan. McKinley elected, 271 electoral votes to 176 for Bryan

1897, Mar. 4—1901, Sept. 14 WILLIAM McKINLEY, twenty-fifth president.

1897-1901. Return of prosperity, to which the increased gold production of the world and the unusual demand abroad for American agricultural products were important contributing factors Great increase in the gold reserve A period of great activity in the formation of large combinations in the field of business, despite the Sherman Anti-Trust Act This movement culminated in the organization of the **United States Steel Corporation** (1901), the first billion-dollar corporation Great concentration of control by banking interests in the business world

1897, July 24. The Dingley Tariff Act, which, despite McKinley's purpose, was primarily designed to increase protection rather than revenue It greatly increased the duties and provided for reciprocity treaties with a view to the extension of foreign trade

1898. THE SPANISH-AMERICAN WAR. The insurrection in Cuba, which broke out in 1895 and toward which Cleveland had maintained an entirely correct attitude, was increasingly attended by inhuman treatment of the rebels which aroused the sympathy of various elements in the United States and afforded an opportunity for the new "yellow press" of the United States to influence American sentiment against Spain Feb. 15, 1898, the *U S S Maine* was mysteriously blown up in Havana Harbor, producing strong feeling against Spain in the United States In the face of the belligerent attitude of the press and various groups in the country, McKinley finally yielded to the war clamor, despite the fact that Spain had agreed to every condition laid down by his ultimatum with respect to Cuba. On

Apr. 11. McKinley sent his war message to Congress asking authority for forcible intervention On

Apr. 20. Congress adopted a resolution authorizing intervention, but disclaiming any intention of annexing Cuba.

Apr. 24, 25. War formally declared The war consisted of five operations: (1) Defeat of the Spanish fleet at Manila by **Dewey** (May 1), (2) the blockade of Cuba; (3) the search for the main Spanish fleet; (4) the land and sea battles (**battles of El Caney** and **San Juan Hill,** July, and the **naval battle of Santiago,** July 3), and (5) the invasion of Puerto Rico (July 25). Aug. 12 the **Peace Protocol** was signed and Aug. 13 Manila was captured

1898, Dec. 10. TREATY OF PEACE SIGNED AT PARIS. Spain withdrew from **Cuba** and ceded to the United States **Puerto Rico, Guam,** and the **Philippines** (for the loss of the latter she was paid $20,000,000) The larger effect of the war was to establish the United States as a world power and to extend the sphere of her political interests and contacts

1899-1902. Philippine insurrection. Although the Filipinos under **Aguinaldo** aided the Americans against the Spaniards, and had conquered the island of Luzon, they were deeply disappointed when the conditions of the peace treaty were made known Hostilities broke out in Feb 1899 For the next three years an American army of 60,000 was engaged in the islands Guerrilla warfare, with all its attendant horrors, developed. Although Aguinaldo was captured (Mar 1901) it was not until Apr 1902 that the insurrection was finally brought to an end

1899, Sept. 6. John Hay, secretary of state, sent his **Open Door** note to London, Paris, Berlin, and St Petersburg, asking that the powers claiming spheres of interest in China should pledge themselves to keep the treaty ports open and not interfere with any "vested interest" already in their spheres; that the powers allow the application of the Chinese treaty tariff to the ports under their control without discrimination against nationals of other countries, and that they should not levy higher harbor charges on other nationals calling at their ports

1900, Mar. 14. Currency Act, declaring other forms of money redeemable in gold on demand, and providing for a gold reserve of $150,000,000 This extended the issue of national bank notes from 90% to full face value of the bonds upon which they were issued and reduced capital requirements of banks in small communities

Boxer uprising in China. In June the United States participated in the relief expedition against Peking. Hay made this the occasion for reaffirming the Open-Door policy July 3 he sent a circular note to the powers asking them to preserve the territorial and administrative integrity of China and to safeguard the principle of equal and impartial trade

Nov. 6. Bryan, running on a platform of free silver and anti-imperialism, defeated by **McKinley,** who re-

ceived 292 electoral votes, to 155 for Bryan.

1901, Mar. 2. The Platt amendment respecting Cuba, added to the Army Appropriation Bill for 1901–1902. The Cuban constitutional convention incorporated the amendment in the Cuban constitution (June 12) as a condition of American withdrawal from the island Cuba agreed not to impair her independence by treaty with foreign powers, not to assume public debt beyond the ability of her ordinary revenues to liquidate, to permit American intervention for the protection of Cuban independence, to sell or lease to the United States land necessary for naval or coaling stations.

The Insular Cases decided. The supreme court held that territory might be subject to the jurisdiction of the United States without being incorporated into the country. The constitution was not applicable, in every particular, to all lands over which the country exercised sovereignty This enabled the United States to develop a distinctive colonial policy and to enact legislation for the government of backward peoples, where a degree of paternalism was necessary

Sept. 14. McKinley died from an assassin's bullet

1901, Sept. 14—1909, Mar. 4. THEODORE ROOSEVELT, twenty-sixth president

1901-1903. Isthmian Canal diplomacy. The **Clayton-Bulwer Treaty of 1850** had provided that any Isthmian canal which might be constructed should be jointly controlled, should not be fortified and should be neutralized for the service of all nations In later years of the century the United States sought the abrogation of this treaty In Feb 1900 the **First Hay-Pauncefote Treaty** was negotiated, only to be rejected by Great Britain Dec 16, 1901, the Senate ratified the **Second Hay-Pauncefote Treaty,** which abrogated the Clayton-Bulwer Treaty, provided for American construction and control of a canal, its neutrality to be maintained under the supervision of the United States After much debate as to the route of the canal, Congress, June 28, 1902, authorized the president to construct a canal across Panama, provided he could obtain the New Panama Canal Company's rights for $40,000,000 and the acquisition from Colombia of perpetual control over a canal zone Should he fail in this, he was to construct the canal by the Nicaragua route, provided for in the earlier Spooner Bill Jan 22, 1903, the **Hay-Herran Convention** was signed with Colombia, providing for a canal zone Although ratified by the United States Senate, the Colombian Senate adjourned (Oct 31) without ratifying Nov 3 Panama revolted and declared her independence of Colombia United States ships prevented the landing of Colombian troops in Panama and Nov 6 the United States recognized the independence of Panama Nov 18 the **Hay-Bunau-Varilla Treaty** between the United States and Panama granted to the United States the use of a canal zone ten miles wide, transferred to the United States the properties of the New Panama Canal Company and the Panama Railroad Company, provided for the payment of $10,000,000 in gold to Panama and an annuity of $250,000 The United States guaranteed the neutrality of the canal and in return was accorded the right to fortify it

1902, May 12-Oct. 13. Strike of anthracite coal miners, demanding union recognition, a 9-hour day, and wage increase In the face of a threatened coal famine, Roosevelt intervened and threatened to work the mines with federal troops, whereupon the owners accepted his suggestion of a commission to investigate The miners returned to work, but when the commission made its award, union recognition was withheld Not until 1916 did the miners receive union recognition, with an 8-hour day

June 17. The Newlands Act providing for the irrigation of the arid lands of the west

Maryland enacted the first **state workmen's compensation law.** By 1920 all but five states had enacted such laws

Oregon adopted the thoroughgoing use of the **initiative and referendum.**

1902-1908. Roosevelt and foreign affairs In 1902, because of the refusal of Venezuela to meet her debt obligations, Great Britain, Germany, and Italy blockaded five of her ports Dec 19, upon the urging of the state department and the expressed willingness of **Castro,** the Venezuelan dictator, to submit the European claims to a mediator, the European powers agreed to arbitrate In Feb 1903 the blockade was lifted and a mixed commission was set up by the Hague Tribunal to pass upon the claims

Dec 2, 1904, Roosevelt enunciated the **Roosevelt corollary of the Monroe Doctrine.** This was occasioned by the debt situation of the Dominican Republic and the pressure of European countries to compel payment. He said that chronic wrongdoing by powers in the western hemisphere might compel the United States under the Monroe Doctrine to the exercise of an inter-

national police power as the only means of forestalling European intervention Under this doctrine the **United States intervened in Santo Domingo** and unofficially collected the customs July 31, 1907, the American administration left Santo Domingo

In the summer of 1905 Roosevelt offered his services as **mediator between Russia and Japan** and Aug 9 the peace conference at **Portsmouth** (N H), opened

In Europe, Roosevelt was instrumental in bringing about the **Algeciras Conference,** Jan 16, 1906

In Oct 1906 the **segregation of Japanese school-children** in San Francisco schools led to strained relations with Japan, which were adjusted by the intervention of Roosevelt. This school controversy, however, proved to be merely one aspect of the general opposition on the Pacific coast to Japanese immigration Japan declared it was not her practice to issue passports to laborers to come to the United States, though passports were issued for Hawaii, Canada, and Mexico, the holders of which in most cases came to the United States Japan expressed her intention of continuing this policy, and, relying on this **gentlemen's agreement,** Congress inserted in the Immigration Act of 1907 a clause authorizing the president to exclude from the continental territory of the United States holders of passports issued by any foreign government to its citizens to go to any country other than the United States By the **Root-Takahira Agreement** of Nov 1908 Japan confirmed "*the principle of equal opportunity for commerce and industry in China*" and agreed to support the "*independence and integrity*" of that empire

1903, Jan. 24. Alaskan boundary question referred to a commission of three Americans, two Canadians, and one British When **Lord Alverstone,** the British member, voted against the Canadians, the dispute was decided in favor of the American contention

Dec. 17. Wilbur and Orville Wright demonstrated the first motor-driven aeroplane at **Kitty Hawk** (N.C.). Their machine, carrying a man, made four sustained free flights, the longest 59 seconds at 30 miles per hour

Beginning of effective **state legislation limiting hours of labor of children** and establishing state departments of labor or industrial boards By 1930, 37 states had established the 48-hour week for children in factories.

Wisconsin enacted the first **direct primary** law.

1903-1913. Railroad legislation In 1903 the **Elkins Act** was passed to strengthen the Interstate Commerce Act of 1887, which had proved so ineffective. The Elkins Act forbade railroads to deviate from published schedules of rates and made railway officers as well as the companies liable in cases of rebating The **Hepburn Act** of 1906 extended the control of the commission to express companies, sleeping-car companies, pipeline, ferries, and terminal facilities The commission was given power to reduce a rate found to be unreasonable Passes were abolished and a commodity clause included The **Mann-Elkins Act** (1910) extended the commission's jurisdiction to telephone and telegraph lines, cable and wireless companies The long-and-short-haul clause was made effective. Mar 1, 1913, Taft signed the **Physical Valuation Act,** requiring the commission to evaluate the properties of the railways as the basis for the fixing of rates which would enable the companies to earn a fair return on their investments.

1904, Mar. 14. The Northern Securities Case decided The efforts of Harriman to gain control, first of the Burlington system and then of the Northern Pacific, had led to the struggle between Harriman and Hill, in which Northern Pacific stock was bid up to fabulous prices, producing the so-called *Northern Pacific Panic* (1901) This was followed by an agreement between the rival groups for the merging of the Northern Pacific, Great Northern, and Burlington systems through the Northern Securities Company This the supreme court declared to be a violation of the Anti-Trust Act and its dissolution was ordered

Nov. 8. Roosevelt elected president over **Alton B. Parker,** the Democratic candidate, 335 electoral votes to 133

1906, June 30. The Pure Food and Drug Act, prohibiting the misbranding and adulteration of foods

Lee De Forest invented the **oscillating audion,** of great importance in the development of radio

1908. Oregon adopted the principle of the **recall** of all elective officials

The supreme court in the case of *Muller v Oregon*, upheld the Oregon 10-hour law for women in industry By 1930 all but five states had laws limiting hours of work of women

Nov. 3. William H Taft (Republican) elected president over **William Jennings Bryan,** by 321 electoral votes to 162

1909, Mar. 4—1913, Mar. 4. WILLIAM HOWARD TAFT, twenty-seventh president.

1909-1912. Foreign relations of the United States. In 1909 Taft and **Philander C. Knox,** his secretary of state, interceded with China to secure the participation of New York bankers with British, French, and German capitalists in the loan for the construction of the Hukuang Railways in China This gave rise to the charge of **dollar diplomacy.** In May 1910 the American bankers were admitted into the consortium. When in 1912 American bankers were invited to participate in the currency loan to China, Taft gave his approval, but when Wilson in 1913 refused the formal encouragement of the American government, the bankers withdrew.

Sept. 7, 1910, the **Newfoundland fisheries question** was settled by the international court of arbitration at The Hague. American privileges were affirmed and extended

The unsettled condition of affairs in **Nicaragua** and **Honduras** in 1911 caused Knox to attempt to emulate the example of Roosevelt in Santo Domingo. He negotiated conventions with the two countries providing for loans from American bankers, with an American receiver of customs and with the customs pledged as security for the loans When the Senate withheld ratification, **American marines** were landed **in Nicaragua** (Aug 1912), fiscal affairs were turned over to an American collector, the Nicaraguan Bank was controlled by New York bankers, and the Nicaraguan government placed on a monthly allowance. Knox negotiated a **treaty with Nicaragua** giving the United States the right of way for an interoceanic canal, a naval base on the Gulf of Fonseca, and long-term leases over the Great and Little Corn Islands The Senate refused to ratify, but in 1916 the Wilson administration secured the ratification of a similar treaty During 1912 troops were concentrated on the Mexican border and the revolutionary Madero government of Mexico was warned that it would be held accountable for loss of life and property

In 1911 the proposed **reciprocity agreement with Canada** came to naught as a result of the Dominion election

1909, Aug. 5. Payne-Aldrich Tariff, which disregarded party pledges and maintained protection unimpaired. Strongly opposed by the insurgent Republicans from the west. The first step in the downfall of Taft's administration.

The announcement by **Henry Ford** that thereafter his company would manufacture only the **Model T** chassis heralded the advent of the automobile as a universal method of individual transportation by bringing it within the reach of the average man.

1910, Jan. Taft removed **Gifford Pinchot** from the forestry service as a result of the **Ballinger-Pinchot controversy.**

Mar. 19. Insurgent Republicans in the House moved to shear the speaker of his power by supporting a resolution providing for the election of the rules committee and the exclusion of the speaker from its membership In 1911 the speaker was deprived of the right of appointing other standing committees of the House

Aug. 31. Theodore Roosevelt's speech at **Ossawatomie,** Kan , in which he enunciated his doctrine of the **New Nationalism.** This augured ill for Taft

1911, Jan. 21. National Progressive Republican League organized. Another step in the break in the Republican party. La Follette the leader of the league

May 1. The supreme court, under the Sherman Anti-Trust Act, ordered the **dissolution of the Standard Oil Company** and the **American Tobacco Company.** In the Standard Oil case the court enunciated the *rule-of-reason doctrine*, indicating its belief that the government should not attempt to outlaw "every" combination in restraint of trade, but should confine action to those contracts which resulted in an "unreasonable" restraint of trade The enunciation of this doctrine marked a turning-point in the court's attitude toward the so-called "trusts."

Illinois adopted the first state-wide law for **assistance to mothers with dependent children.** In 1912 Colorado took action, while in 1913 18 other states enacted similar laws.

1912. Massachusetts set up a commission to establish **minimum-wage schedules** for women and children By 1923 14 other states and the District of Columbia had taken similar action, setting up either a statutory minimum or giving commissions mandatory powers All such laws were dealt a severe blow by the supreme court decision of 1923, in the **Adkins case,** in which the court declared unconstitutional the District of Columbia law because it deprived the individual of liberty of contract

Feb. 24. Theodore Roosevelt announced he would accept the Republican nomination for president He carried the preferential primaries over Taft in six states, and was successful in four state conventions In spite of this the Republican machine brought about

June 22. Taft's renomination. Roose-

velt delegates withdrew and Aug. 7 nominated Roosevelt as the candidate of the Progressive Party.

July 2. Woodrow Wilson nominated by the Democratic convention on the 46th ballot

Nov. 5. Wilson elected with 435 electoral votes, with 88 for Roosevelt and 8 for Taft.

1913, Feb 25. Sixteenth amendment to the constitution, empowering Congress to levy income taxes without apportionment among the states and without regard to any census or enumeration, declared in effect

Mar. 4. Department of Labor created with a seat in the cabinet.

1913, Mar 4—1921, Mar. 4. WOODROW WILSON, twenty-eighth president

1913, May 31. The seventeenth amendment to the constitution, providing for direct election of senators by the people, declared in effect.

Oct. 3. The Underwood Tariff Act reduced the average rate of duty to 26 67% Based on *ad valorem* rather than specific duties Reductions covered largely those commodities on which protection had served its purpose or where American goods controlled the markets Graduated surtax on incomes above $20,000.

Dec. 23. THE FEDERAL RESERVE BANK ACT. The panic of 1907 had emphasized the weakness of the national banking system. The Aldrich-Vreeland Act was passed in 1908 as an emergency measure, and provided for the appointment of a national monetary commission to study the problem Report of the commission submitted (1912) Wilson asked for legislation which would provide an elastic currency, based on commercial assets rather than bonded indebtedness, mobilization of bank reserves, public control of the banking system, and decentralization rather than centralization These features were embodied in the Act of 1913. The country was divided into 12 districts, each with a federal reserve bank

1914, Apr. 21—1921. Relations with Mexico. Wilson's refusal to recognize the Huerta régime in Mexico led to the seizure of the port of Vera Cruz by American marines (Apr 21, 1914) Wilson then accepted the mediation of the A.B.C. powers, and at the Niagara Conference a protocol was signed (June 24), which availed little because Huerta fled the country. In Oct 1915 an inter-American conference decided to recognize Carranza, which prompted Villa to raid Columbus, N M. (Mar. 1916). Punitive expedition against Villa under command of Pershing, 1916 (see p 822).

Article 27 of the Mexican Constitution of 1917 led to the demand by American business interests for intervention which Wilson successfully resisted.

1914, June 15. Panama Tolls Bill signed, repealing the Act of 1912, exempting American coastwise vessels from the canal tolls

Aug. 15. Panama Canal formally opened.

Sept. 26. Federal Trade Commission Act, abolishing the Bureau of Corporations (1903) and establishing a bipartisan commission of five members, with investigative and regulatory powers in regard to business and corporate practices.

Oct. 15. Clayton Anti-Trust Act, an amendment of the Sherman Act (1890), prohibiting price discrimination, exclusive selling or leasing contracts, intercorporate stockholdings and interlocking directorates in large corporations It sought to restrict the use of the injunction in labor difficulties, and exempted labor, agricultural, and horticultural organizations from the operation of the anti-trust laws.

Arizona adopted an old-age pension system which was declared unconstitutional by the state supreme court In the 1920's, however, under the intelligent propaganda of the American Association for Old-Age Security, many states took up the principle of public responsibility for the aged, and began enactment of old-age pension laws.

1915, Feb. 15—1916, Dec. 18. American neutrality. Feb. 15, the American government protested against the German war-zone proclamation. May 7, the sinking of the *Lusitania*, with loss of American life, led to Wilson's warning to Germany of May 13. He dispatched a second note June 9 and a third July 21. Feb. 1916 the McLemore Resolution to warn Americans to refrain from traveling on armed merchant ships defeated. Apr 1916 Wilson delivered an ultimatum to Germany as a result of the sinking of the *Sussex* Mar 24. German concession May 4, with respect to submarine warfare Dec 18, 1916, Wilson called upon the belligerent powers to state their war aims. (See p. 935)

1915-1917. Wilson's policies in the Caribbean. Local disorders in Haiti led to the landing of American marines (July 1915) and proclaiming of martial law In Sept a treaty was signed by which the Haitian administration was put in American hands The treaty, proclaimed May 3, 1916, was to run for ten years Marines continued in occupation. Dec. 29, 1916, an

American naval administration was set up in Santo Domingo Local parliament suspended Military occupation continued

In Nicaragua the **Bryan-Chamorro Treaty of 1916** gave to the United States the right-of-way for a canal, a lease of the Corn Islands, and a naval base on the Gulf of Fonseca.

Jan 17, 1917, the purchase of the **Virgin Islands** from Denmark was ratified.

1916, July 17. Federal Farm Loan Bank Act passed to improve the agricultural credit situation, established a federal land bank to conduct the lending business, provided for farm loan associations of borrowing farmers, and a federal farm loan board for administrative purposes

Aug 29. The Jones Act granting to the Philippines what was practically a territorial status Declared purpose of the United States to grant independence "as soon as a stable government can be established therein"

Sept 3. The Adamson Act establishing the 8-hour day on interstate railways

Sept. 7. The United States Shipping Board formed to acquire merchant vessels for sale or charter to United States citizens. A corporation formed with capital up to $50,000,000 to purchase, lease, or operate the vessels

1917, Jan. 18. Wilson before the Senate made a plea for termination of the war and outlined the principles necessary thereto

Jan. 31. Unrestricted submarine warfare renewed by Germany, in violation of the agreement of May 4, 1916

Feb. 3. Diplomatic relations with Germany severed.

Mar. 1. State department released the **Zimmerman note** showing German efforts to enlist Mexico in support of Germany

Mar. 12. Presidential order authorizing the arming of merchantmen

Mar. 16 and 17. Three American ships, homeward bound, attacked without warning and sunk by German submarines

Mar 21. Wilson called Congress to meet in special session, Apr 2

Apr. 2. Wilson asked Congress to recognize the existence of a state of war between the United States and Germany.

Apr. 6. WAR DECLARED ON GERMANY. (*Cont p 935f, 1049*)

2. BRITISH NORTH AMERICA, 1783-1914

a. THE DOMINION OF CANADA

1783-1787. Settlement of the loyalists from the United States. Thousands of these established themselves in New Brunswick (separated from Nova Scotia, Aug. 16, 1784) and in Upper Canada The British government assigned lands to them (100 acres to each head of a family and 50 acres to each member) and spent some $30,000,000 in equipping them. Effect of the immigration to give Canada a more English composition, and to arouse sentiment of the English settlers against the Quebec Act

1791, June 10. PASSAGE OF THE CANADA ACT through the British Parliament. It went into effect Dec. 26. Canada divided at the Ottawa River into Upper Canada (chiefly English) and Lower Canada (predominantly French). Each part had a governor, a legislative council appointed by him, and an elected assembly. Colonial laws could be disallowed by the home government within two years of passage One-seventh of all land granted to be reserved for the maintenance of the Protestant clergy. All rights of the Catholic Church reaffirmed.

1783— EXPLORATION OF THE WEST. In 1783 the **Northwest Company** was organized in competition with the **Hudson's Bay Company.** In 1788 **Captain John Meares** sailed along the Pacific coast and established a fur post at Nootka. In 1789 a Spanish expedition from Mexico took possession of the northwest coast on the basis of discovery in 1775. Several British ships were seized, but in 1790 Spain made reparation for them and abandoned claims to the region (**Treaty of Oct 28**). In 1792 **Captain George Vancouver** explored the Pacific coast and circumnavigated Vancouver Island In 1793 **Alexander Mackenzie** reached the coast after the first overland journey from the east In the meanwhile (1785–1795) **David Thompson** had traversed much of the territory along the coast of Hudson Bay north to Fort Churchill, as well as the regions about Lake

Winnipeg and along the Saskatchewan and Athabasca Rivers **Jay's Treaty** between the United States and Great Britain (Nov. 19, 1794) provided for a boundary commission to determine the frontier west of the Lake of the Woods In 1797 Thompson, in the service of the Northwest Company, pushed west along the 49th parallel and to the upper Missouri, in 1798 he explored the region about the headwaters of the Mississippi During the following years he continued his travels in what are now Manitoba, Saskatchewan, and Alberta, and in 1807 founded **Fort Kootenay,** the first post on the Columbia River At the same time (1805–1807) **Simon Fraser** and **James Stuart** explored the Fraser River region to the ocean Thompson continued his work on the Columbia By 1810 much of the southern half of present-day Canada had been gone over by various explorers and traders In 1811 **Lord Selkirk** bought from the Hudson's Bay Company 116,000 square miles for settlement in Manitoba. Minnesota, and North Dakota Scotch settlers arrived there on the Red River in 1812. In 1815 an attack was launched on the colony by agents of the rival Northwest Company, colonists were driven out in 1815 and 1816 An investigation in 1817 upheld the claims of Lord Selkirk and the colony was re-established

1812, June 18. UNITED STATES DECLARED WAR ON GREAT BRITAIN. Among the causes of conflict was the continued trouble with the Indians, supposedly instigated and equipped by the British in Canada, and the American desire to conquer Canada, which was regarded as easy A triple attack was planned on Montreal, on the region opposite Niagara, and on the region opposite Detroit On the Montreal front and at Niagara the offensive failed to materialize. At Detroit a short advance was made, followed by retreat The British, under Gen Isaac Brock, secured the **surrender of Detroit** (Aug 16, 1812) Brock then turned to Niagara and fought the successful engagement of **Queenston Heights** (Oct 13) in which he was killed

1813. The Americans captured **York** (Toronto) Apr 27, but abandoned it soon afterward (May 2) In Ohio the Americans were vigorously attacked by the British, supported by the Indians (**Tecumseh**). Sept 10 Lieutenant **Oliver Hazard Perry** with an improvised fleet won the naval **battle of Lake Erie** and forced the British to abandon Detroit The Americans, under Gen **William Henry Harrison,** crossed into Ontario and fought the successful engagement on the **Thames River** (Oct. 5), but were unable to follow up the advantage The campaign against Montreal was begun Oct 17, but the Americans were defeated by a greatly inferior force (**battle of Crysler's Farm,** Nov 11) and the advance abandoned. Dec 10 an American force burned **Newark,** in retaliation for which the British and Canadians, after taking **Fort Niagara** (Dec 18), burned **Buffalo** (Dec 29–31)

1814, July 5. The Americans, advancing from Niagara, took **Fort Erie** and won the engagement at **Chippewa Plains.** They advanced to Queenston, but then fell back again.

July 25. Battle of Lundy's Lane, which was indecisive, but the Americans blew up Fort Erie and recrossed the river (Nov 5)

In the meanwhile 16,000 British troops had been sent to Canada and an invasion was begun by way of Lake Champlain.

Sept. 11. An American naval force under **Lieutenant** (later Captain) **Thomas Macdonough** won the **battle of Plattsburg** and forced the retirement of the British

Sept. 21. The British, having invaded Maine, declared all territory east of the Penobscot annexed to New Brunswick

Dec. 24. The Treaty of Ghent brought the war to a close All captured territory was returned and a commission to delimit the northeastern frontier provided for

1817, Apr. 28. Exchange of notes between the United States and Great Britain, by which they agreed to **restrict naval forces on the Lakes** to one each on Lake Champlain and Lake Ontario and two on the upper lakes

1818, Oct 20. Treaty between the United States and Great Britain giving Americans the right to fish on the coasts of Newfoundland and Labrador and dry fish in unsettled bays Boundary between the United States and Canada west of the Lake of the Woods fixed on the 49th parallel to the Rocky Mountains Territory west of the Rockies to be jointly occupied for 10 years

1821, Mar. 26 The Northwest Company merged with the Hudson's Bay Company under the latter's name. Rights of exclusive trade to the company in the territory allotted to it renewed for 21 years

1836, July 21. First Canadian railroad opened, from Laprairie on the St. Lawrence to St. Johns on the Richelieu.

American naval administration was set up in Santo Domingo Local parliament suspended Military occupation continued.

In Nicaragua the **Bryan-Chamorro Treaty of 1916** gave to the United States the right-of-way for a canal, a lease of the Corn Islands, and a naval base on the Gulf of Fonseca.

Jan 17, 1917, the purchase of the **Virgin Islands** from Denmark was ratified

1916, July 17. Federal Farm Loan Bank Act passed to improve the agricultural credit situation, established a federal land bank to conduct the lending business, provided for farm loan associations of borrowing farmers, and a federal farm loan board for administrative purposes.

Aug. 29. The Jones Act granting to the Philippines what was practically a territorial status Declared purpose of the United States to grant independence "as soon as a stable government can be established therein"

Sept. 3. The Adamson Act establishing the 8-hour day on interstate railways

Sept. 7. The United States Shipping Board formed to acquire merchant vessels for sale or charter to United States citizens. A corporation formed with capital up to $50,000,000 to purchase, lease, or operate the vessels

1917, Jan. 18. Wilson before the Senate made a plea for termination of the war and outlined the principles necessary thereto

Jan. 31. Unrestricted submarine warfare renewed by Germany, in violation of the agreement of May 4, 1916

Feb. 3. Diplomatic relations with Germany severed.

Mar 1. State department released the **Zimmerman note** showing German efforts to enlist Mexico in support of Germany

Mar. 12. Presidential order authorizing the arming of merchantmen

Mar. 16 and 17. Three American ships, homeward bound, attacked without warning and sunk by German submarines

Mar. 21. Wilson called Congress to meet in special session, Apr 2.

Apr. 2 Wilson asked Congress to recognize the existence of a state of war between the United States and Germany.

Apr. 6. WAR DECLARED ON GERMANY. (*Cont p 935 f*, 1049.)

1837. REBELLION IN UPPER AND LOWER CANADA. This had been brewing ever since 1815 and was the result of constitutional conflict between the governors and the appointed legislative councils, representing bureaucratic and vested interests (*family compact* in Upper Canada, *château clique* in Lower Canada) on the one hand and the popularly elected assemblies on the other Popular leaders in Upper Canada, **Robert Gourlay** (expelled 1818), **William Lyon Mackenzie, Egerton Ryerson;** in Lower Canada, **Louis Joseph Papineau.** *Grievances:* control of judiciary, control of revenue, supply bills, clergy reserves, established churches, executive council The situation was worst in Lower Canada, where the British minority, represented by the governor and the council, was opposed by the French majority in the Assembly In 1822 it had been proposed to reunite Upper and Lower Canada, but the project roused a storm of protest in Lower Canada A British parliamentary investigation was made in 1828 and led to various administrative reform proposals, but nothing came of them In 1834 the Assembly of Lower Canada adopted the 92 resolutions, a declaration of rights By 1837 affairs had reached a deadlock and the popular leaders decided to resort to force

In Lower Canada the rebellion was confined to an area around Montreal There were a number of riots and some fighting at **St. Denis** and **St. Charles.** Most of the population remained passive, the rebels were easily defeated, and the leaders fled to the United States In Upper Canada the rebels, under Mackenzie, attacked **Toronto** (Dec 5), but were driven off Mackenzie fled across the border and Dec 13 seized **Navy Island** in the Niagara River, where he proclaimed a provisional government

Dec. 29. A Canadian government force crossed the river and burned the American steamer *Caroline*, which had been supplying the rebels, a famous case in international law.

1838, Jan 13. Mackenzie abandoned Navy Island and was arrested in the United States

During the year 1838 the rebels, supported by American sympathizers (*Hunters' Lodges*), staged several invasions from the United States, but none of these assumed large proportions

May 29. Lord Durham arrived at Quebec as governor-in-chief of all the British North American provinces. His lenient treatment of the rebels led to disavowal by the home government. Oct. 9 he resigned.

1839, Feb. 11. Durham's famous *Report on the Affairs of British North America* He proposed the union of Upper and Lower Canada and the grant of responsible government The imperial government was to retain control only of foreign relations, regulation of trade, disposal of public lands, and determination of the colonial constitution

June 20. Lord John Russell introduced in the British Parliament a resolution based on the *Durham Report*

Oct. 19. Poulett Thomson (Lord Sydenham) arrived at Quebec as governor-in-chief, to prepare the provinces for union.

1840, July 23 THE BRITISH PARLIAMENT PASSED THE UNION ACT. This united Upper and Lower Canada into one government, with one governor, one appointed legislative council, and one popularly elected assembly, in which the former two provinces had equal representation Various administrative reforms were carried through The issue of responsible government was evaded, and the principle was not firmly established in practice until the time of **Lord Elgin's governorship** (1847–1854), in the course of the crisis arising from the **Rebellion Losses Bill** (1849)

1842, Aug. 9. Ashburton Treaty between the United States and Great Britain Great Britain abandoned more than half of the territory claimed on the northeast frontier

1846, June 15. Oregon Boundary Treaty between the United States and Great Britain, following a period of acute tension

Aug. 28. British Possessions Act gave Canada the right to fix tariffs

1849, June 26. Abolition of the British **Navigation Acts,** removing restrictions on foreign shipping This, following on the abolition of the Corn Laws in 1846, led to an acute economic depression in Canada and to a short-lived agitation for annexation to the United States (**Annexation Manifesto,** Oct 10, 1849)

1854, June 5. Elgin Treaty, establishing reciprocity between Canada and the United States This was abrogated by the United States in 1866

Sept.-Dec. Law converting **clergy reserves** into a special fund to be distributed to counties and cities for secular purposes Another law abolished **seignorial tenure,** feudal dues being converted into cash rents

1856, June 24. The legislative council, hitherto appointive, was made elective

1858, Aug. 2. **British Columbia,** having been withdrawn from the jurisdiction of the Hudson's Bay Company, was given separate administration

1866. Beginning of the **Fenian** (Irish-American) **raids,** designed to bring pressure on the British government in favor of Ireland Fenians from Buffalo seized **Fort Erie** (June 1), but were driven out Other raids took place from Vermont and Fenian troubles continued to some extent until 1871

1867, Mar. 29. **BRITISH NORTH AMERICA ACT** united Ontario, Quebec, New Brunswick, and Nova Scotia in the **Dominion of Canada** (effective July 1). The movement for confederation was the result of growing difficulty in the government of United Canada (religious and racial differences, problems of representation), as well as of economic (especially railway) considerations and military (defense) problems in the Civil War period. The movement began in the Maritime Provinces (**Charlottetown Conference,** Sept. 1864), but expanded almost at once (**Quebec Convention,** Oct 10–28, 1864, in which all provinces were represented) The 72 **Quebec Resolutions** became the basis for the Act of Confederation They provided for a federal government and provincial governments, a federal parliament of two houses (Senate consisting of 24 members each from Ontario, Quebec, and a third division comprising Nova Scotia and New Brunswick, and an elected lower House). Representatives of the provinces conferred with imperial authorities in London (Dec. 1866) and drew up the **London Resolutions,** which were transformed into the final act

1867-1868 **Lord Monck,** first governor-general (Sir) **John A. Macdonald** first premier of the Dominion

1868, Dec. 29. **Sir John Young** (Lord Lisgar) appointed governor-general (1868–1872)

1869, Nov. 19. **PURCHASE OF NORTH-WEST TERRITORIES** from the old Hudson's Bay Company for $1,500,000, the company retaining one-twentieth of the land Taken over, 1870

1869-1870. **RED RIVER REBELLION.** Half-breeds, led by **Louis Riel** about Fort Garry (Winnipeg), irritated chiefly by the belief that surveys being made were to rob them of their land, set up a provisional government (Nov 1869) with Riel president, expedition from Portage Laprairie defeated and captured (Feb 1870); **Thomas Scott** (Orangeman) executed (Mar.) and great indignation aroused in Ontario. The rebels dispersed without a blow before the advance of an expedition under Col **Garnet** (later Lord) **Wolseley.**

1870, July 15. **Manitoba** constituted a province of the Dominion

1871, July 1. **British Columbia** joined the Dominion, a transcontinental railroad to be commenced within 2 and completed within 10 years

1871. **Sir John Macdonald** a member of the British commission to Washington to settle outstanding difficulties with the United States

1872, May 22. **Earl Dufferin** appointed governor-general (1872–1878)

1872. General elections, government victory

1873, June 1. Death of **Joseph Howe;** Howe had opposed Nova Scotia's entrance to union, but later accepted it rather than agree to radical proposals of annexation to the United States

July 1. **Prince Edward Island** joined the Dominion, the Dominion to assume railway debt

Nov. 7. Resignation of Sir John Macdonald owing to pressure of public opinion following **transcontinental railway scandal** and charges of corruption in last elections. Alexander Mackenzie formed a Liberal cabinet, overwhelming victory at general elections

1874. Introduction of **ballot voting;** elections on a single day

1876. Opening of the **Intercolonial Railway** connecting Ontario with the Maritime Provinces; government-owned and operated.

1878, Oct. 5. **Marquess of Lorne,** governor-general (1878–1883)

Oct. General elections on **tariff issue.** Conservatives victorious in support of protection, Sir John Macdonald premier (Oct 17), and protective tariff instituted

1881. Charter given to newly formed **CANADIAN PACIFIC RAILWAY COMPANY** for construction of a transcontinental railroad following financial difficulties of old companies Government grant of $25,000,000 with 25,000,000 acres of land and 670 miles of track already laid, loan of $20,000,000 in 1884 (repaid 1887). Last spike driven, Nov 7, 1885, and formally opened May, 1887, with 2905 miles of rail joining coast to coast Marked results in Canadian development; steamship lines established, flow of immigrants to the west accelerated

1883, Aug. 18. **Marquess of Lansdowne,** governor-general (1883–1888).

1885, Mar. 26. Outbreak of the North-west Rebellion; quickly suppressed by the Dominion government with troops from all the provinces transported over the new Canadian Pacific Railway. Riel surrendered (May 15), executed (Nov. 16)

1886 Canadian and Bering Sea fisheries dispute with the United States

1888, May 1. Lord Stanley (Earl of Derby), governor-general (1888–1893)

1890. Liberals urged policy of "unrestricted reciprocity" to remedy the depression following the United States McKinley Tariff. **Continental Union Association** formed **The Imperial Federation League** (formed 1885) urged preferential trade with the mother country

1891, June 6. Death of **Sir John A. Macdonald;** succeeded by **Sir John J. C Abbott** (June 16)

1892, Nov Resignation of Sir John Abbott, succeeded by **Sir John S. D. Thompson** (Dec 5)

1892-1893 Bering Sea Arbitration (p 785).

1893, May 22. Earl of Aberdeen appointed governor-general (1893–1898).

1894, June 28-July 10. Second Colonial Conference held at Ottawa.

Dec. 12. Death of **Sir John Thompson.** Mr (later Sir) **Mackenzie Bowell** succeeded (Dec 21)

1896 The offer of Newfoundland to enter the Dominion was refused through financial disagreement.

Apr. 27. Resignation of **Sir Mackenzie Bowell; Sir Chas. Tupper,** premier (Jan 15, 1895)

July 11. Mr (later Sir) **Wilfrid Laurier** became premier (1896–1911) as a result of a Liberal victory in the general elections (June)

1897. British preferential tariff instituted. In 1898 the preference was increased to 25% and in 1900 to 33⅓% Germany retaliated (July 7, 1899) by depriving Canada of most-favored-nation treatment

1898 Canadian Northern Railway chartered

July 30. Lord Minto appointed governor-general (1898–1904)

1899, Oct. 29. The first Canadian contingent sent to South Africa A second contingent sent in 1900, but the official contingents were withdrawn before the end of the war owing to dissatisfaction in Quebec

1902, Oct. 31. Cable from Vancouver to Brisbane completed

1903. Alaskan Boundary Arbitration with the United States (p 789) High dissatisfaction with the award

1904, Sept. 26. Earl Grey appointed governor-general (1904–1911)

1905, Sept. 1. Formation of the provinces of **Alberta** and **Saskatchewan**

1908. Civil Service Commission appointed for the selection of civil officials

1910. Formation of a small Canadian navy.

1911, Jan. 26. Publication of a **Reciprocity Agreement** with the United States, ratified by the United States Senate (July 22) But in the general elections (Sept 21) the Liberals were defeated on the issue and reciprocity was dropped Mr (later Sir) **Robert L. Borden** formed a Conservative ministry (Oct. 10)

Mar. 21. Duke of Connaught appointed governor-general (1911–1916)

1913, May 30. Defeat in the Senate of a navy bill providing for the contribution of three dreadnoughts to the imperial navy

1914, Apr. 7. Completion of the **Grand Trunk Pacific Railway.**

May 21 *S S. Komagatu Maru* in Vancouver Harbor, 300 Hindus refused entrance to British Columbia and sent back to India

May 29. *S S. Empress of Ireland* sunk in collision in the Gulf of St. Lawrence, 1023 lives lost

Aug. 4. Entrance of Great Britain into **World War.** (*Cont p* 1057)

b. NEWFOUNDLAND

1855. Responsible government granted; bicameral legislature, legislative council (15), appointed by the governor-in-council, House of Assembly (36), elective, and a responsible cabinet

1864. Copper discovered in the north and mining operations begun.

1873. Direct steam communication with England and America established

1880. Government loan of £1,000,000 to a railway **from St. John's to Hall's Bay;** completed to Harbor Grace (1884), after financial difficulties, construction was taken over by Mr R. G. Reid (1893) and built to Port-aux-Basques.

1888. Bait Act took effect, after considerable controversy and protests of the French government, prohibiting capture in Newfoundland waters, for exportation or sale, of bait fish except under special license French retaliations followed until a *modus vivendi* was enacted (1890). Finally settled in the Anglo-French Convention of 1904.

1894-1895. Bank failures and insolvency; Canadian banks replaced former government institutions, followed by renewed prosperity.

1895-1896. Severe financial depression Delegation to Ottawa regarding union with Canada Canada objected to assuming all of the $16,000,000 debt and negotiations were broken off

1900. Resignation of **Sir James Winter;** succeeded by Mr (later Sir) **Robert Bond.**

1906, Oct. *Modus vivendi* with the United States following difficulties with fishing rights under the Treaty of 1818 Referred to the Hague Tribunal and award (Sept 1910) allowed Great Britain (Newfoundland) the right to make regulations subject to the Treaty of 1818, and defining the "three-mile limit" in bays as from a line across the bay at a point where distance of 10 miles is not exceeded

1909. Resignation of premier **Sir Robert Bond;** succeeded by **Sir Edward P. Morris.** (*Cont. p.* 1060)

3. ALASKA

1728. Vitus Bering, a Russian, sailed through the straits now bearing his name

1741. Bering explored the Alaskan coast. From this time on the Russians were active in the region, establishing sealing and fishing stations

1776. Captain James Cook made the first English explorations on the coast. He was followed by **Vancouver.**

1793. Alexander Mackenzie crossed the continent from the east to the Pacific coast, and returned

1799. The Russian-American Fur Company organized by the Russian government and given a trade monopoly for 20 years (later renewed) A most active period of Russian enterprise under the governorship of **Alexander Baranov** (1790–1819)

1804. Baranov founded **Sitka.**

1821. Russian decree claiming the coast south to lat 51 and forbidding all foreign ships approaching within 100 miles of the coast Protests of the United States and Great Britain The matter was settled by treaties between Russia and the United States (Apr 17, 1824) and between Russia and Great Britain (Feb 28, 1825), by which Russia was given the territory north of 54° 40′ and west of 141°

1867, Mar. 30. The United States purchased Alaska from Russia for $7,200,000 The formal transfer was made Oct 18

1884, May 17. The Organic Act applied the laws of Oregon to Alaska, after a period of government by the war department.

1903. Passage of a **homestead law** for Alaska

Oct. 20. Settlement of the boundary dispute between the United States and Canada by a board of three American, two Canadian, and one English jurist The Canadian case was lost and Canada was debarred from the ocean inlets

1906. Alaska permitted to elect a delegate to Congress

1912. Alaska given territorial status A bicameral legislature was established under a governor appointed by the President of the United States The legislature was not permitted to pass laws dealing with excise, game, or fur, and the American Congress reserved the right to veto Alaskan legislation

The population of Alaska increased from 30,000 in 1867 to 55,000 in 1920 The population is engaged chiefly in fishing (halibut, cod, herring) and in the fur trade A treaty between the United States, England, Russia, and Japan in 1911 prohibited pelagic killing of seals, and the killing on the Pribilov Islands is done only by United States government agents The value of the furs taken between 1867 and 1925 was over $100,000,000 Mining (especially gold — **Klondike gold rush,** Aug 1896) is also an important industry, the value of the product between 1880 and 1927 having been almost $600,000,000.

H. LATIN AMERICA

1. THE WARS OF INDEPENDENCE

a. CAUSES

Political, economic, and social factors inherent in the Spanish colonial system were the fundamental causes which led to the separation of the American colonies from the mother country The creoles (Spaniards born in America) and *mestizos* (mixed Spanish and Indian) increasingly desired participation in government The virtual exclusion from more important civil and ecclesiastical offices, the economic policy of Spain, and the exploitation of the colonies, fully revealed by the reforms of Charles III (p. 450), and certain aspects of religious policy created discontent The freedom enjoyed during the long periods when Spain was at war, and the successful revolution of the North American colonies of Great Britain (p 517), engendered a desire for independence The doctrines of the French philosophers and the French Revolution created a demand for reform among intellectuals Geographical influences, lack of communications, the administrative division of the colonies, and traditional Spanish separation and individualism aided in creating sentiment for independence.

In **South America** the movement for separation was fundamentally liberal From the first it was led by creoles and originated in the *cabildos*, later expanding to national proportions In **Mexico** the earliest and unsuccessful phases, led by certain creoles, developed into a servile revolt as well as a movement for independence Separation was finally achieved by a reactionary movement after the Revolution of 1820 in Spain (p. 644)

The **Wars of Liberation** were also civil conflicts within New World administrative districts The royal government and the Church, until the Spanish Revolution of 1820, constituted the basis of Spanish resistance. The ignorant masses frequently became a source of manpower for the Spanish régime as well as for the creole movement In the region of the Rio de la Plata and New Granada provincial separatist tendencies led to internecine strife among proponents of independence from Spain.

The **immediate cause** of the movement which led to the independence of the South American colonies was the domination of Spain by **Napoleon Bonaparte** and his establishment of his brother **Joseph** on the throne (p 593). The American colonies opposed French control and refused to recognize Joseph, proclaiming allegiance to the deposed **Ferdinand VII.** Certain areas declared their independence when it appeared that Napoleon had established complete control over Spain The restoration of the absolute rule of Ferdinand in 1814 and his determination to restore the old system (despite the liberal policies which had been adopted by the Spanish agencies representing his authority during the Napoleonic period) turned the movements into a definitely separatist channel Internal strife and disturbed political conditions in Spain after 1814 contributed to the success of the colonists.

The **Wars of Independence** passed through two phases, that between 1809 and 1816, during which movements for separation failed everywhere except in the area of the Rio de la Plata, and that between 1816 and 1825, during which independence was achieved

b. EARLIER INSURRECTIONS, 1721-1806

The first serious insurrectionary movements occurred in the eighteenth century, the gravest taking place in **Paraguay** (1721–1735), **Peru** (1780–1782), and **Colombia** (1781)

1721-1735. The Comuneros of Paraguay. **José de Antequera,** appointed by the *audiencia* of Charcas to resolve a controversy between the *cabildo* of Asunción and the governor of Paraguay, supported the *cabildo* and was chosen governor (1721) An autonomous commune was created, and Antequera, speaking of the sovereignty of the people, refused to relinquish office on demand of the higher Spanish authorities Open warfare between the forces of the commune and royal forces ensued After maintaining their cause for a considerable period, Antequera and the Paraguayans were overcome (1731). Antequera was

executed, but a follower, **Fernando Mompó de Zayas,** revived the organization with forced labor under the *mita* and *repartimiento* and with administration caused the natives of the Peruvian highlands to revolt under leadership of **Tupac Amarú,** descendant of the Inca rulers, who proclaimed himself liberator of his people Two attacks were made on Cuzco by Tupac Amarú at the head of a horde of ill-armed Indians, but the Spaniards crushed the native forces and executed the leader The revolt was continued and La Paz was twice subjected to siege before the movement was definitely crushed.

1781. The comuneros of New Granada. Attempts to increase royal revenues in New Granada led to a widespread revolt under the leadership of two creoles, **Berbeo** and **José Antonio Galán.** Moving on Bogotá, the insurrectory forces compelled the authorities to consent to their conditions, whereupon they dispersed The viceroy, receiving reinforcements, suppressed the movement, although later (1784) representatives of New Granada, declaring themselves allies of Tupac Amarú, fruitlessly sought England and French aid for the liberation of South America.

1790-1806. The early efforts of Francisco de Miranda. The greatest of the early leaders who planned the independence of the Spanish colonies was **Francisco de Miranda** (1756–1816). A Venezuelan creole, Miranda served in the Spanish army and became a general in the French revolutionary forces He early formulated plans for liberation and long but fruitlessly sought the aid of the English, French, and United States governments Organizing a filibustering expedition in the United States, Miranda captured **Coro,** but Venezuela was not prepared for revolt and the movement failed (1806) Support of the English government was at length secured and an expedition for the liberation of northern South America was being organized under command of Wellington when developments in the Iberian Peninsula caused abandonment of the project.

c. THE RÍO DE LA PLATA

The period of independence in the region of the Río de la Plata was introduced by a British attempt to gain possession of at least a portion of the area.

1806. On his return from the occupation of Cape Colony (p. 851), **Sir Home Popham,** acquainted with the projects of Miranda, on his own initiative **occupied Buenos Aires.** The viceroy fled and **Jacques de Liniers,** at the head of the colonial militia, forced the British to capitulate Upon his return the viceroy was deposed by a *cabildo abierto* and Liniers was elected to the office, an act of sovereignty which the crown approved

1806-1807. Although the action of Popham had not been authorized, the British government dispatched an expedition of 10,000 men under **Gen. John Whitelocke.** This force occupied **Montevideo** and moved against Buenos Aires, the defenders of which, under Liniers, forced Whitelocke to capitulate and withdraw from the area of the Río de la Plata. These events stimulated national feeling in the region

1809-1810. Liniers was replaced by a viceroy appointed by the central *junta* of Spain, but in view of the apparent success of Napoleon he was removed by the *cabildo* of Buenos Aires and a provisional *junta* of the **provinces of the Río de la Plata** was established in the name of Ferdinand VII (1810, May 25) Direct Spanish authority was never restored

1810-1811. The provisional *junta,* dominated by **Mariano Moreno** (1778–1811), soon rejected the authority of the provisional government of Spain representing Ferdinand VII and sought to extend control over the **Banda Oriental** (Uruguay) and **Paraguay.** An army was dispatched to liberate upper Peru (Bolivia), but was disastrously defeated Paraguay refused to adhere to the provinces of the Río de la Plata Forces were sent against the province by Buenos Aires, but were defeated by the royal governor, supported by the majority of Paraguayans (1811). Moreno was forced from office and a triumvirate replaced the provisional *junta*

1812-1813. Manuel Belgrano, placed in command of the northern forces, defeated the royalists near **Tucumán** and at **Salta,** and prevented the invasion of the southern portion of the region of the Río de la Plata A second attempt to invade upper Peru failed.

1813. Authority was vested in a *director,* the former viceroyalty was divided into provinces, and a congress was convened at Tucumán (1816).

1816, July 9. JUAN MARTIN DE PUEYRREDON was named *supreme director* and **the congress declared the independence of the United Provinces.** Meanwhile **José de San Martín** (1778–1850), one of the two great figures of the period of independence, who was born in

the Misiones territory while his father was governor of the province and who had served in the Spanish army in Africa, Portugal, and Spain, was given command of the army of the north (1814)

1814-1817. Comprehending the geographical difficulties of a campaign in upper Peru, San Martín formulated a plan to organize an army in western Argentina, liberate Chile, and move by sea to attack Peru, the center of Spanish authority San Martín established himself at **Mendoza** and prepared to carry his plans into effect.

d. PARAGUAY

1811. After the defeat of the forces of Buenos Aires, the **Paraguayans** overthrew the royal governor, and a revolutionary *junta* was established at Asunción.

1811, Aug. 14. PARAGUAY PROCLAIMED INDEPENDENCE FROM SPAIN, and later from Buenos Aires (1813). A republican government with two consuls at its head was created (1813)

1814. The *First Consul* **José Rodríguez de Francia** (1756–1840) was declared *Dictator*, and was soon made *Perpetual Dictator* (1816).

e. THE BANDA ORIENTAL (URUGUAY)

1811-1814. Spanish control in the Banda Oriental, territory claimed by the Portuguese crown and the provinces of the Río de la Plata, was brought to an end by forces of Buenos Aires and by Uruguayan revolutionaries led by **José Artigas** (1746–1826) Artigas, who favored a federal system of government, at first maintained allegiance to Buenos Aires, but controversy concerning federal and unitary forms led to conflict and he advocated independence

1816-1820. After establishing control over an extensive area, Artigas was driven from Uruguay by Brazilian troops, who occupied the province (1816–1820).

1821. The Banda Oriental was incorporated into Brazil

f. CHILE

1810. Upon the apparent triumph of Napoleon in Spain the captain-general of Chile was deposed and a *junta* assumed authority in the name of Ferdinand VII A general congress convened at **Santiago,** from which, after controversy concerning reforms and separation from Spain, the radical elements withdrew. The remaining groups constituted themselves into an *executive power.*

1811-1812. **José Miguel Carrera** overthrew the government and sanctioned a republican organization, at the same time acknowledging the sovereignty of the king. A constitution was framed which assigned supreme authority to a *junta* of three under the control of Carrera, whose rule aroused strong opposition headed by **Bernardo O'Higgins** (1778–1842).

1814. This dissension enabled the viceroy of Peru to crush the Chilean armies, despite the ultimate co-operation of O'Higgins and Carrera Santiago was taken and royal government was re-established

1817. **San Martín,** having completed his preparations at Mendoza (above), crossed the Andes with some 5200 men, defeated a Spanish army at **Chacabuco** (Feb 12) and occupied **Santiago. O'Higgins** was made *supreme director* after San Martín had refused the post

1818, Feb 12. THE INDEPENDENCE OF CHILE WAS PROCLAIMED. A royal army from Peru was defeated by San Martín at **Maipú** (Apr 5) With these events the independence of Chile was definitely achieved

1818-1820. San Martín prepared for the liberation of Peru, receiving support from Buenos Aires and aid from O'Higgins. A navy was organized under **Admiral Thomas Lord Cochrane** (1775–1860), an able British naval officer, and an army of 4000 men was formed

g. PERU AND BOLIVIA

1809. The inhabitants of **Chuquisaca** deposed the president and established a *junta*, while those of **La Paz** deposed the intendant and also created a *junta*, declaring loyalty to Ferdinand VII Royal troops soon crushed the movements Another unsuccessful revolutionary movement occurred at **Cuzco** (1813). Peru long remained a bulwark of royal authority

1820. After completing preparations in Chile, **San Martín** transported his forces to Peru by sea, where he resorted to propaganda rather than immediate military action on a large scale, and opened negotiations with the viceroy. Negotiations failed, but efforts to influence opinion met with success The viceroy abandoned Lima, and San Martín, invited by the people, entered the capital.

1821, July 22. He proclaimed the INDEPENDENCE OF PERU, and assumed supreme authority as *protector.*

1823. A factional quarrel among the proponents of independence in Lima led to the establishment of a new government, which invited **Bolívar** to Peru A force under **Andrés Santa Cruz** was dispatched into Charcas (Bolivia), but was defeated by the royalists **Sucre** moved to Lima with Colombian troops and Bolívar followed, being proclaimed *dictator.*

1824. Carrying the war to the royalists, under the viceroy, **José de la Serna,** and **José Canterac,** Bolívar and Sucre moved into the highlands and defeated the Spaniards at **Junín** (Aug 24). Bolívar returned to Lima to assume the government Sucre continued the campaign, and with some 5800 men defeated la Serna and Canterac, with 9300 men, in the decisive **battle of Ayacucho** (Dec 9) The Spanish leaders were forced to sign a capitulation which included the withdrawal of the 23,000 royal troops which remained in Peru. With these events the independence of Peru was achieved Invading Charcas, Sucre liberated the presidency and convened a **congress at Chuquisaca.**

1825, Aug. 6. CONGRESS PROCLAIMED INDEPENDENCE and designated the new state the **Republic of Bolívar** (Bolivia).

h. VENEZUELA

1808. Upon the intervention of Napoleon in Spain the *cabildo* of **Caracas,** proclaiming Ferdinand VII King of Spain and the Indies, proposed the establishment of a *junta* Two years later an extraordinary *cabildo* deposed the captain-general and created a *junta* in the name of the sovereign (1810)

1811. The *junta* soon disavowed the Spanish regency and claimed for Venezuela a place among free states, inviting other colonies to take similar action. A commission, which included **Simón Bolívar** (cf below), was sent to England to secure aid **Miranda** returned to Venezuela to assume leadership

July 7. A general congress proclaimed VENEZUELAN INDEPENDENCE and a constitution was adopted Miranda was given command of the revolutionary forces and Bolívar became one of his lieutenants. **Simón Bolívar** (1783–1830), born in Caracas of distinguished creole parents, educated in his native city and widely traveled in Europe, deeply read in the French philosophers and strongly influenced by his republican tutor, Simón Rodríquez, had dedicated himself to the liberation of the Spanish colonies, and became one of the two greatest figures of the independence movement.

1811-1812 Spanish forces under **Juan Domingo Monteverde** achieved marked success in a campaign of reconquest, and internal strife developed

1812, Mar 26 An earthquake wrought great destruction and created demoralization in the area controlled by the revolutionists, but spared that held by the royalists The clergy proclaimed the catastrophe to be divine retribution for disloyalty, with detrimental effect upon the revolutionary cause

July 25. Miranda was made dictator to organize further resistance, but the royal forces made rapid progress and he was forced to capitulate by the **Treaty of San Mateo,** which provided clemency for the revolutionists Monteverde, notwithstanding, dealt with Venezuela as a conquered province Bolívar and other leaders, indignant at the capitulation, permitted Miranda to fall into Spanish hands, and he was sent a prisoner to Cadiz, where he died (1816)

i. GREAT COLOMBIA (NEW GRANADA, VENEZUELA, AND QUITO)

1808. Ferdinand VII was proclaimed king at Bogotá upon the invasion of Spain by Napoleon, and in the following year the president of Quito was driven from office A *junta,* in the name of Ferdinand VII, and a senate, vested with the powers of the *audiencia,* as well as secretaries for war and foreign affairs were created The viceroy of New Granada was compelled to call an advisory *junta* to consider action with respect to the movement in Quito. This body displayed dissatisfaction with Spanish rule and with its authority a memorial of grievances was drawn up, to be sent to the *central junta* of Spain An extraordinary *cabildo* at Bogotá, in the name of the king, established a *junta* for the viceroyalty and named the viceroy its president. The *junta* soon expelled the viceroy and broke with the Spanish regency, but again proclaimed loyalty to Ferdinand VII. Principal towns of New Granada, while affirming loyalty to the sovereign, also overthrew the Spanish officials and created provincial *juntas,* certain of which drew up constitutions Meanwhile the movement in Quito was crushed by the Spanish authorities (1809).

1811, Nov. 11. **Cartagena later declared its independence,** and was followed by Cundinamarca (1813) A congress drew up an *Act of Federation of the United Provinces of New Granada,* but the provinces displayed marked separatist tendencies and conflict between them weakened the revolutionary cause **Bolívar** took service with Cartagena and drove the Spanish forces from the lower Magdalena Valley

1813. Commissioned by the congress of New Granada to carry the war into Venezuela, **Bolívar** regained Caracas and **became virtual dictator** under authority of the *cabildo* of the capital

1814. A savage *war to the death* ensued in which the royalists, under **José Tomás Boves,** triumphed and re-established Spanish control throughout Venezuela

Returning to New Granada, Bolívar under authority of the congress of New Granada undertook to conquer the separatist provinces of Cundinamarca, Cartagena, and Santa Marta. He brought Cundinamarca under control of the central government, which then established itself in Bogotá, and besieged Cartagena, preparatory to a campaign against Santa Marta.

1815. While the siege of Cartagéna was progressing, an army of 10,000 Spanish veterans under **Pablo Morillo** landed in Venezuela, the close of the Napoleonic wars having made the dispatch of troops possible. Morillo, leaving a portion of his forces in Venezuela, moved into New Granada and everywhere defeated the revolutionary armies. Bolívar, recognizing the hopelessness of the situation, departed for Jamaica Acting ruthlessly, Morillo restored royal authority virtually throughout New Granada.

1816. After dispatching a commissioner to England to secure support, **Bolívar returned** to the area of Orinoco

1818-1819. With the aid of **José Páez** (1790–1873), Bolívar secured control over the lower basin of the Orinoco and established headquarters at Angostura. A congress convened at Angostura elected **Bolívar president** and he presented a constitution to that body

1819. Leaving Páez to contain Morillo, Bolívar, his army augmented by British volunteers, moved up the valley of the Orinoco, crossed the Andes, defeated a superior royalist army at the **Boyacá River** (Aug 7), and **occupied Bogotá** (Aug. 10). **New Granada was definitely liberated by** this campaign.

Dec. 17. The **Congress of Angostura,** including representatives of New Granada, proclaimed **Great Colombia,** to be constituted of New Granada, Venezuela, and Quito. A constitution was adopted and Bolívar was made president and military dictator.

1820. The **Spanish Revolution of 1820** caused Ferdinand VII to adopt a conciliatory policy and Morillo was instructed to conclude peace on condition that the revolutionists accept the *Constitution* of 1812, which accorded the colonies representation in the Córtes A six months' truce was concluded (Nov 25) and Bolívar dispatched emissaries to Spain under instructions to uphold the independence of Colombia As the crown refused to acknowledge Colombian independence, war was soon resumed Morillo meanwhile departed, placing **Miguel de la Torre** in command

1821. Bolívar dispatched his able lieutenant, **Antonio José de Sucre** (1793–1830), to liberate Quito, moved into Venezuela, uniting with Páez, defeated the royalist army at **Carabobo** (June 24), and occupied Caracas (June 29) The battle of Carabobo assured Venezuelan independence

Aug. 30. A **congress at Cucutá** framed a republican constitution and named **Bolívar president.** Bolívar placed Páez in command of the army in Venezuela

1821-1822. Moving by sea to Guayaquil, **Sucre,** aided by forces sent by San Martín, achieved the liberation of Quito through the decisive **battle of Pichincha** (1822, May 24) Bolívar meanwhile, placing authority in the hands of the vice-president, **Francisco de Paula Santander,** moved to aid Sucre He persuaded the provinces of Quito to unite with Great Colombia (May 29)

1822, July 26-27. **San Martín,** who had been advancing on Quito, **and Bolívar met at Guayaquil** to consider prosecution of plans for liberation Comprehending the ambitions of Bolívar, realizing the impossibility of co-operation, and fearing detriment to the cause of independence, San Martín withdrew in favor of Bolívar.

j. NEW SPAIN (MEXICO)

1808. Events in Spain following the intervention of Napoleon caused creole elements to desire a greater share in government With support from the viceroy, **José de Iturrigaray,** who hoped to advance his own interests, a general *junta* was convened, despite opposition of the *audiencia,* which,

composed of Spaniards, mistrusted the creole elements Within a short time a group of Spaniards, instigated by the *audiencia*, expelled the viceroy Four viceroys followed in rapid succession (1808–1813)

The first direct action against Spanish rule was led by **Miguel Hidalgo y Costilla** (1753–1811), a creole priest steeped in French philosophy and interested in the welfare of the native masses

1810. **Hidalgo,** his object being separation and social reform, initiated a revolt in the province of **Guanajuato** with the support of certain creoles (Sept 16). Joined by Indians, *mestizos*, and an increasing number of creoles, Hidalgo captured Guanajuato, Guadalajara, and Valladolid and reached the vicinity of the capital, from which his ill-armed horde of 80,000 was forced to retreat by a small Spanish force under **Felix Calleja** (Nov 6) The movement headed by Hidalgo rapidly assumed the character of a servile revolt, with resultant alienation of the upper classes of the creoles

1811. Assuming the offensive, **Calleja,** with 6000 men, crushed the revolutionary forces at the **Bridge of Calderón,** near Guadalajara (Jan. 17) Hidalgo and a small remnant fled northward, but the leader fell into Spanish hands, was tried and executed (July 31).

The revolt was continued by **José María Morelos** (1765–1815), a *mestizo* priest, who, as a lieutenant of Hidalgo, had been operating west of Mexico City.

1812. Moving southeast, Morelos secured control of a wide area and captured **Oaxaca** (Nov 25) Turning westward, he took **Acapulco** (1813, Apr. 12)

1813. **A congress was convened at Chilpancingo** (Sept. 14), Morelos was made head of the government, **independence was declared** (Nov 6), and administrative, social, and fiscal reforms were adopted

1814, Oct. 22. The **Constitution of Apatzingan** was promulgated.

Morelos failed in an attempt to take Valladolid and was forced to retreat by **Agustín de Iturbide** (1783–1824), a creole in Spanish service. The revolutionary cause became increasingly hopeless, reinforcements reached the royalists from Spain, and the government was forced to move frequently

1815. Morelos, having relinquished executive authority though retaining military command, was captured while escorting the government to Tehuacán and was shortly thereafter executed (Dec. 22) The revolutionary congress was dissolved

1816-1821. The viceroy, **Juan Ruíz de Apodaca,** instituted a conciliatory policy and secured the surrender of the majority of the revolutionary leaders Spanish authority was again firmly established, and only certain guerrilla leaders among them **Vicente Guerrero** (1782–1831), continued resistance

1817. An expedition raised in England and the United States under **Francisco Xavier Mina** landed on the Gulf Coast and penetrated to Guanajuato, but was defeated Xavier Mina was executed (Nov 11)

1821. **The Revolution of 1820 in Spain** and the restoration of the Constitution of 1812 menaced the position of the clergy and the upper classes, and reactionary and conservative elements determined upon separation These groups found an instrument in **Iturbide,** who concluded with Guerrero the *Plan of Iguala*

Feb. 24. This **PROCLAIMED THE INDEPENDENCE OF MEXICO,** declared that the government should be a constitutional monarchy under Ferdinand VII or another European prince, guaranteed maintenance of the Roman Catholic religion and the preservation of the position and property of the Church, and urged the union of all classes to support the instrument The royalists, higher clergy, and prominent creoles supported the movement, an army was formed, and the viceroy Apodaca was deposed

Aug. 24. The newly arrived viceroy, **Juan O'Donojú,** accepted the Plan of Iguala by the **Convention of Córdoba.** The revolutionary army occupied Mexico City (Sept 27) A **regency under Iturbide** was formed pending choice of a sovereign. A constituent congress was convened

1822. The Spanish government refused to accept the Convention of Córdoba

May 19. **ITURBIDE** induced a section of the congress to elect him **emperor.** He was crowned **Augustín I** (July 25)

k. GUATEMALA AND CENTRAL AMERICA

1811-1814. Several revolutionary movements occurred in the **captaincy-general of Guatemala** (Guatemala, San Salvador, Honduras, Nicaragua, Costa Rica, and Chiapas), but were speedily suppressed

1821, Sept. 15. Influenced by events in Mexico a *junta* convened by the

captain-general in Guatemala City declared for the independence of the provinces with the royal executive as administrative head. **Iturbide** invited the new state to become a part of Mexico.

1822, Jan. 5. **Guatemala accepted**, but the other provinces, tending toward republicanism, opposed union

1822. After coronation Iturbide demanded that he be proclaimed emperor in the former captaincy-general and dispatched troops under **Vicente Filísola** to force acceptance of his authority In **San Salvador**, where opposition to union was especially strong, a congress proposed incorporation into the United States of America (1822, Dec 2) The other states accepted **inclusion in the Mexican Empire** and coercive action was taken against San Salvador

1823. Upon the abdication of Augustín I (p 821), Filísola convened a general constituent assembly in Guatemala City (Feb 21) in which all provinces except Chiapas, which remained incorporated with Mexico, were represented

July 1. This body declared the provinces of Guatemala, San Salvador, Nicaragua, Honduras, and Costa Rica sovereign as the confederated **United Provinces of Central America.** Mexico recognized the independence of the United Provinces (Aug. 20)

1. BRAZIL

1820-1822. The immediate causes of **Brazilian independence** arose from a complex combination of circumstances in Portugal and Brazil The administrative system of the court, the position accorded the Portuguese, and the spread of republican theories, evidenced by a revolt in Pernambuco (1817), created discontent among Brazilians, while in Portugal there was growing dissatisfaction with the British-dominated regency (p 648), the transfer of government to Brazil, and the opening of Brazil to free trade

1820. Following the example of Spain, the **Portuguese overthrew the regency** and provisionally adopted the Spanish constitution of 1812 The Córtes, convened for the first time in more than a century, summoned the king to return and invited Brazil to send representatives to a constituent assembly

1821, Feb.-Apr. Vacillating and fundamentally an absolutist, **John VI** was forced by a military rising to accept the **Portuguese constitution** yet to be promulgated, and to appoint a liberal ministry Upon the demand of the assembly, convened to select representatives to the Portuguese constituent convention, he later adhered to the provisional Spanish constitution After excesses on the part of the Brazilian assembly, the king dispersed it by military action and reversed his position

Apr. 22-26. Convinced of the ultimate necessity of returning to Portugal, John VI designated his son **Pedro** as prince-regent and departed, thoroughly discredited

1821-1822. Eventual separation of Brazil from Portugal was hastened by the determination of the Córtes to reduce Brazil once again to the status of a dependency That body, over the protest of Brazilian representatives, created in Brazil directly responsible provisional administrative councils, ordered the regent to visit Europe to study constitutional forms, subordinated the tribunal of Rio de Janeiro to the supreme court of Portugal, and finally, in effect, re-established the commercial monopoly of Portugal

1822. Meanwhile **Brazilian national sentiment** crystallized about the regent, who, upon petition of his subjects, declared his determination to remain in Brazil (Jan 9) A design of the Portuguese commander in Rio de Janeiro to carry the regent to Portugal failed and the garrison was later forced to withdraw Dom Pedro formed a new ministry (Jan 16) and decreed that no law of the Córtes be put in effect without his assent (Feb 21) A Portuguese squadron which arrived to convey the regent to Portugal was forced to withdraw

1822. Having gained the support of Minas Geräes (Mar), **Dom Pedro** was declared **Perpetual Defender of Brazil** (May 13) He soon convoked a Brazilian constituent assembly (June 3) A visit to São Paulo secured that province

Sept. 7. **The Grito de Ypiranga** (Cry of Ypiranga) While *en route* to the city of São Paulo, the regent received dispatches from Portugal which offered concessions but made clear the determination of the Córtes to subordinate Brazil He therefore **proclaimed Brazilian independence.**

Oct 12. The regent, upon initiative of the Senate, was proclaimed at Rio de Janeiro **constitutional Emperor of Brazil.** Dom Pedro pledged acceptance of the constitution to be formulated by the already summoned convention His coronation as **Pedro I** followed (Dec 1). Armed resistance by Portuguese garrisons and Brazilian elements opposed to separation in certain northern provinces and the Cisplatine Province was overcome by the close of 1823, due in large part to the Brazilian navy, organized by **Lord Cochrane.**

2. LATIN AMERICA, 1825-1914

The movement for independence in the Spanish colonies produced ephemeral co-operation between the states of South America and between Mexico and Central America, and there existed the ideal of union, which was one of the objectives of Bolívar The individualism of the Spaniard, separatist traditions inherited from Spain, the influence of administrative division during the colonial period (which created rudimentary nationalism and in certain instances cultural entity within the upper classes), geographical and climatic factors, lack of communications, and the personal ambition of individual leaders prevented the achievement of union and co-operation between states

Orderly progress within nations was rendered difficult by these same factors, by ethnic differences, and by class distinctions and vested interests, which independence from Spain did not eliminate The Church was determined to maintain its vast influence, interests, and privileged position, and wealth and political power remained the possessions of a small minority Of the peoples of Spanish America some 19% were whites, 31% *mestizos*, 45% Indians, and 4% Negroes The vast bulk of the population was abjectly ignorant, and large native groups had scarcely been touched by European culture in other than its religious aspects The educated upper classes had no experience in government other than that afforded by the municipal *cabildos* and the governmental agencies created during the period of liberation. Military influence, resulting from the long period of wars, was strong

As there existed no community of interest, political, economic, social, and religious dissension and division into bitterly opposed conservative and liberal reforming groups were inevitable Conditions after independence demanded firm government and capable administrators. San Martín favored monarchical forms and Bolívar, a man of theoretical democratic and republican beliefs, comprehending the problems involved, advocated compromise between monarchy and republicanism The majority of the intellectual leaders of the independence movement were impractical, idealistic, and doctrinaire republicans As a result republican forms, for which the peoples were least prepared, were adopted Republican leaders were divided among themselves on the question of the unitary as opposed to the federal system

The conflict of forces within the newly formed states made inevitable a long period of instability and adjustment

a. ARGENTINA

At the achievement of independence, there existed little feeling of unity in Argentina and a fundamental issue at once arose concerning the adoption of a unitary or federal form of government Buenos Aires favored a unitary system, while the provinces, controlled by local leaders (*caudillos*) and fearing the preponderance of the capital, favored a federal system The Argentine provinces wished to include Paraguay and Uruguay within the nation, and this laid the basis for foreign complications

1825. Hoping to achieve the incorporation of Uruguay, **Argentina** aided in a revolt of that state against **Brazil** and made war on the empire.

1827. Argentine and Uruguayan forces defeated the Brazilians, gaining the decisive **battle of Ituzaingó** (Feb 20)

1828. Through the **mediation of Great Britain** Uruguay was made an independent buffer state.

1829. Almost constant rebellion in the provinces reduced Argentina to anarchy until **Juan Manuel de Rosas** (1793–1877), a provincial leader and a federalist, became governor of Buenos Aires (Dec 8) after a victory over its forces in the field (Apr)

1835 Rosas assumed complete authority in Buenos Aires and twelve provinces recognized him as chief executive. The **Argentine Confederation** thus became a reality Rosas governed with absolute authority He sought to raise Argentine prestige abroad, and desired to bring Uruguay and Paraguay into the confederation.

1831-1841. Controversies arose with the United States and Great Britain concerning the **Falkland Islands,** which England claimed, and with France concerning treatment of French subjects This led to a blockade of the Argentine coast (1838)

1845-1850. Further disputes arose with France and Great Britain concerning **intervention in Uruguay** and the closing

of the Paraná to foreign commerce, and resulted in a **blockade of the Río de la Plata** by English and French naval forces From these controversies Argentina emerged with credit, although the position of Rosas was weakened thereby

1851. The tyrannical rule of Rosas caused internal opposition, led by **Justo José de Urquiza** (1800–1870), and his intervention in Uruguay aroused the enmity of Brazil

1852. In alliance with Uruguay and Brazil, Urquiza overthrew Rosas in the **battle of Caseros** (Feb 3) Despite its drawbacks, the arbitrary régime of Rosas constituted a necessary period of transition between anarchy and constitutional organization Argentine designs on Uruguay were henceforth relinquished

1853. **Urquiza** became chief executive and a **federal constitution**, to which Buenos Aires refused to adhere, was promulgated (May 1) A president with a six-year term, a bicameral congress, and an independent judiciary were provided by the instrument

1854. **Buenos Aires** drew up a separate constitution (Apr 12) Both Buenos Aires and the provinces of the federation progressed materially, but fundamental antagonism led to war between the federation and Buenos Aires (1859)

1859. The latter was speedily defeated (Oct 22) and agreed to union with the federation under constitutional amendments (Nov 10)

1862. Efforts to adjust differences failed and **Bartolomé Mitre** (1821–1906), governor of Buenos Aires, upon the withdrawal of Urquiza from politics after the indecisive engagement of **Pavón** (1861, Sept. 17), became head of the national government (1862, Aug 27).

These events gave Buenos Aires ascendancy over the remainder of the nation, and the city was made the national capital for a period of five years Under Mitre administrative reforms were carried out, material progress continued, and education was promoted Insurrections in several provinces were suppressed

1865, May 1. **Argentina** concluded an **alliance with Uruguay and Brazil.**

1865-1870. **WAR WITH PARAGUAY.** Dictator López declared war after Argentina refused to permit passage of Paraguayan troops across national territory (p. 810) Mitre commanded the allied forces during the first two years of the war

1868-1880. During the administrations of **Domingo Sarmiento** (1868–1874) and **Nicolás Avellaneda** (1874–1880) education, commerce, and immigration were encouraged and the southern frontiers were advanced through subjugation of Indian groups The first census indicated a population of over 1,700,000 (1869)

1880. The ascendancy of Buenos Aires, the province including 30% of the population, created dissatisfaction in the provinces and they formed the **League of Córdoba,** supporting **Julio Roca** for the presidency Buenos Aires resorted to civil war to maintain its position, but was defeated (July 20–21). The city of Buenos Aires was erected into a federal district and made the national capital, and the province was made co-ordinate with the remainder. Roca became president (Sept 21). Thus the problem of the relation of the city and province of Buenos Aires to the remainder of the nation was solved

1880-1886 Under Roca economic progress continued, and the Indian frontiers were pushed forward

1886-1890 Excessive speculation and corruption, for which President **Miguel Juárez Celman** was largely responsible, aroused demands for reform A new party, the *Unión Cívica*, was formed (1890) to achieve this and secure a wider franchise

1890. An unsuccessful revolt occurred (July 26–27), but **Celman resigned** (Aug 5) and the vice-president, **Cárlos Pellegrini,** assumed office.

1890-1904. **Pellegrini** (1890–1892), **Luis Sáenz Peña** (1892–1895), **José Uriburu** (1895–1898), and **Julio Roca** (1898–1904) carried on the task of economic rehabilitation **Boundary disputes** with Brazil (1895) and Chile (1899, 1902), the latter leading the two nations to the verge of war, were adjusted by arbitration

1904-1910. The administrations of **Manuel Quintana** (1904–1906) and **José Figueroa Alcorta** (1906–1910) were characterized by labor difficulties and a demand on the part of Radicals for increased suffrage

1910-1913. **Roque Sáenz Peña,** president. Secret voting and universal suffrage were instituted (1912).

(*Cont. p* 1064)

b. CHILE

1818-1823. Supreme Director **Bernardo O'Higgins** (p. 801) laid the foundations of the Chilean state and established a highly centralized government.

1823-1827. Opposition developed and **Ramón Freire** became chief executive. A federalist form of government was adopted (1826).

1827. In face of discontent Freire resigned in favor of Vice-President **Francisco Antonio Pinto** A second federalistic constitution was promulgated (1828) A Liberal Party, advocating democracy and local autonomy, and a Conservative, supported by the upper classes and clergy, advocating a centralized system with a strong executive authority, developed.

1829-1830. Civil war ensued. The Conservatives, under leadership of **Diego José Victor Portáles** (1793–1837), were victorious (1830, Apr. 17), and entered into a long period of power (to 1861).

1833. A highly centralized constitution, which accorded great powers to the president, was adopted Roman Catholicism remained the state religion.

1836. **Chile** opposed the formation of the preponderant **Peruvian-Bolivian Confederation** by Santa Cruz, and declared war (Nov 11).

1839. Chilean troops under **Manuel Búlnes** (1799–1866) overthrew the confederation through the decisive **battle of Yungay** (Jan 20).

1841-1851. During the two **administrations of Búlnes** great internal development took place and steps were taken to extend Chilean sovereignty over the area of the Straits of Magellan A new Liberal Party, opposed to Conservative oligarchical control and advocating curtailment of presidential powers, developed

1851-1861. Manuel Montt (1809–1880) succeeded Búlnes and served two terms Material progress continued, education was promoted, and certain liberal reforms, which alienated reactionaries, were adopted Two Liberal revolts were suppressed

1861-1871. With the support of Montt, **José Joaquín Pérez**, acceptable to the Liberals, was elected This marked a movement toward greater democracy and a shift of power in favor of the commercial and intellectual elements Pérez held office for two terms, during which internal development increased and Chilean capital was invested in Peru and Bolivia for exploitation of guano and nitrate The lands of the Araucanian Indians were made part of the national domain following their final subjugation.

1865 **Chile united with Peru in war against Spain** (p 813), and Valparaiso was bombarded (1866)

1871-1876. During the administration of the Liberal **Federico Errâzuriz** education was promoted, anti-clerical reforms were adopted, administrative reforms tending toward increased democratization were introduced, and material progress continued

1876-1881. Financial problems and **war with Peru and Bolivia** (pp 812, 813) developed during the term of **Aníbal Pinto** (1876–1881), who was followed by **Domingo Santa María** (1881–1886)

1879-1883. Chile was completely victorious in the **War of the Pacific** because of superior governmental efficiency and military and naval supremacy, and emerged unquestionably the dominant power of western South America.

1883, Oct. 20. By the **Treaty of Ancón**, Peru ceded the province of **Tarapacá**, and Chile was to occupy **Tacna** and **Arica** for ten years, after which a plebiscite was to be held

1884, Apr. 4. By the **Treaty of Valparaiso** Chile retained possession of the **Bolivian littoral.** Chile thus gained rich nitrate territories of vast importance to the national economic structure After termination of the war religious and administrative reforms were adopted, but efforts to separate Church and State failed The reforms of Santa María aroused much Conservative opposition, and the Liberal Party became divided

1886. José Manuel Balmaceda followed in the presidency Parliamentary principles had been evolved (although not envisaged in the constitution) by which a ministry might not remain in office without the support of a majority in Congress. Balmaceda maintained full presidential prerogatives

1891. Civil war ensued (Jan) in which the Congressional forces were victorious and the parliamentary principle was established Balmaceda, driven from office, committed suicide (Sept 19). Congressional elements were incensed by supposed sympathy of the United States for Balmaceda and when an attack on members of the crew of the *U S S Baltimore* occurred (Oct. 16) at Valparaiso an acrimonious controversy arose This was adjusted upon agreement by Chile to pay an indemnity.

1891-1896. Jorge Montt, head of the Congressional Party, was made president, and financial and administrative reforms, including the establishment of

a large degree of local autonomy, were adopted

1896-1901. **Federico Errâzuriz,** son of the former president, succeeded Montt Efforts to solve the territorial question arising out of the War of the Pacific failed. Boundary disputes with Argentina were submitted to arbitration, although war was but narrowly averted

1901. The **Liberal Party,** which had lost prestige as a result of the civil war of 1891, regained strength and secured the election of **Germán Riesco.** The Conservative Party declined thereafter

1906-1920. During the administrations of **Pedro Montt** (1906–1911), **Ramón Barros Lucca** (1911–1915), and **Juan Luis Sanfuentes** (1915–1920) internal progress took place The population reached 3,000,000 by 1907 (*Cont. p.* 1064)

c. PARAGUAY

1816-1840. **José Rodríguez de Francia, Perpetual Dictator** of Paraguay (1816) (p. 801), assumed absolute governmental authority and made himself head of the Paraguayan Church Fearing Argentina, he isolated the country, developed a strong army, and created an intense national feeling. The power of the Church and the influence of the upper classes were broken, and Francia readily established his unlimited control over the docile Guaraní, who constituted the vast bulk of the population Agriculture (into which state socialism was introduced) and industry were encouraged

1844-1862. After the death of Francia the government was reorganized and commercial relations were established with other nations Paraguayan independence was reaffirmed (1842) **Cárlos López** (1790–1862) became president (1844) and remained in office with dictatorial powers for the remainder of his life He asserted Paraguayan territorial claims against Argentina and Brazil and peacefully adjusted **disputes with the United States, France, and Great Britain.** After the fall of Rosas (1852) the danger of incorporation into Argentina disappeared. Commerce, agriculture, and industry were encouraged, and a system of primary schools was established. The first railway was constructed. The population increased to over 1,000,000

1862-1870. **Francisco Solano López** (1827–1870), son of Cárlos López, was made president (1862) and immediately established absolute control. López desired territory and perhaps envisaged a **Greater Paraguay** which would include Uruguay and the Argentine provinces of **Corrientes** and **Entre Ríos** He also feared Argentina and Brazil The army was made the largest and most efficient in South America, and a system of defenses was erected

1865-1870. The ambitions of López, Brazilian intervention in Uruguay in support of the *Colorados* while López supported the *Blancos* (p 811), and unsettled territorial claims led to overt acts by the Paraguayan dictator which brought about **war with Brazil, Argentina, and Uruguay** under the *Colorado* government of Flores (Mar. 18) Brazil, Argentina, and Uruguay concluded an alliance, and a large army, of which the greatest part was Brazilian, supported by a Brazilian fleet, invaded Paraguay. After five years of large-scale operations, the Paraguayan nation, despite its valiant resistance, was virtually annihilated and the war terminated when López was killed (1870, Mar 1) The population was reduced to some 28,000 men and slightly over 200,000 women. After the **occupation of Asunción** by the allies (1868, Dec 31), a provisional government was established, a treaty of peace was concluded (1870, June 20), and a centralized constitution was adopted (Nov 25). Paraguay lost some 55,000 square miles of claimed territory, and was saved from greater losses only by Brazilian support against Argentine claims (1872–1876)

1878. Argentina and Paraguay submitted certain territorial claims to arbitration of President Hayes of the United States, who decided in favor of the latter. Heavy indemnities imposed on Paraguay by the treaty of peace were never paid, and the allies did not press for action

1879. Attempts of Bolivia and Paraguay to adjust territorial claims failed

1872-1912. The close of the Paraguayan War was followed by a long period of political instability The *Colorado* or Radical Party, without clearly defined principles, was in control throughout the greater part of this period.

(*Cont p.* 1065)

d. URUGUAY

1828, Aug. 27. **Uruguay** became a sovereign nation under the treaty which terminated the war between Brazil and Argentina over the status of the **Banda Oriental.** A constitution was framed for the Banda Oriental del Uruguay, and in accord with the treaty this instrument was approved by Brazil and Argentina (1830, May 26).

1836-1843. Factional strife developed and two parties, *Blancos* and *Colorados*, evolved, headed respectively by **Manuel Oribe** and **Fructuoso Rivera** Rosas, dictator of Argentina, with his expansionist policy (p 806), supported Oribe, and Rivera was aided by French forces

1843-1851. Upon withdrawal of the latter, following agreement between the French consul and Rosas, Oribe began an eight years' **siege of Montevideo.** During the period of the blockade of the Río de la Plata, French and British troops occupied Uruguayan territory as a check to Rosas (1845–1849) Efforts to resolve the situation in the Banda Oriental by negotiation were fruitless

1851. After the conclusion of an alliance between Urquiza, the *Colorado* government, and Brazil (May 29), Urquiza forced Oribe to abandon the siege of Montevideo and concluded a treaty which terminated the war and permitted the *Colorado* government to remain in power (Oct 8) The overthrow of Rosas (1852) removed a serious menace to Uruguayan independence

1851. Seeking to expand its influence, **Brazil** secured a portion of the **Misiones** territory from Uruguay and intervened to maintain order at the request of the *Colorado* president, **Venancio Flores** (1854).

1863. Internal disorders continued and evolved into a prolonged civil war between the *Blanco* president, **Anastasio Aguirre,** and **Flores.** Brazil pressed claims for injuries to her nationals and when Aguirre proved intransigent an agreement was reached with Flores Brazilian forces occupied certain Uruguayan frontier towns (1864–1865).

1865. Flores occupied Montevideo and assumed the government (Feb 22)

As **Francisco Solano López,** dictator of Paraguay, had an understanding with Aguirre, these events did much to bring on the **Paraguayan War** (pp 810, 817), in which Uruguay under a *Colorado* government was allied with Brazil and Argentina (1865–1870)

1870-1872. A protracted civil conflict between *Blancos* and *Colorados*, in which the latter were victorious, followed the war

1872-1907. Political instability, with many changes of executive, continued through the first decade of the twentieth century During this entire period the *Colorados* remained in power Despite political instability, great material progress took place agriculture became highly developed, commerce expanded, and an extensive railway system was built. The foundations of a system of public education were laid The population, estimated at 70,000 in 1830, increased to 224,000 by 1860, and almost 1,000,000 by 1900.

(*Cont. p.* 1066)

e. BOLIVIA

1825-1826 **Bolívar** and **Sucre** organized the government of Bolivia and launched the nation on its career as a sovereign state. Peru recognized the independence of Bolivia (1826) and Bolivian claims to territory on the coast from Cape Sama to the Loa River (1828).

1828. **Antonio José Sucre,** president after the departure of Bolívar for Colombia, was forced to withdraw as a result of discontent in Bolivia and an invasion of Peruvian troops

1829. **Andrés Santa Cruz** became president, and, with the collaboration of Orbegosa of Peru, **united Bolivia and Peru** (divided into North and South Peru) into a confederation (1835–1836).

1839. **Argentina and Chile** opposed the creation of a preponderant confederation, and Chilean troops under Búlnes defeated the forces of Santa Cruz at **Yungay** (Jan 20) and brought the union to an end

1841. An attempt of **President Gamarra** of Peru to annex Bolivian territory during the presidency of **José Ballivián** was thwarted when his invading army was defeated at **Ingavi** and he himself was killed (Nov 20)

1841-1847. **Ballivián** sought to promote economic development. He was forced from office by **Manuel Belzu,** who was succeeded by **Jorge Córdova** (1855)

1857. **José María Linares** drove Córdova from the presidency and took office Linares introduced many governmental reforms He was forced to relinquish office and was succeeded by **José de Achá** (1861), who was unable to preserve order and gave way to **Mariano Melgarejo** (1864)

1866. **A treaty was concluded with Chile** by which Bolivia ceded the territory between the Salado River and parallel 24° from the Andes to the Pacific and accorded economic privileges Bolivia also recognized Brazilian claims to a large area on the Madeira and Paraguay Rivers (1867)

1870. Melgarejo was forced from office. **Agustín Morales** became president, but was killed, and **Adolfo Ballivián**

took office (1872) Ballivián sought to reform finances and concluded an alliance with Peru (1873, Feb 6)

1874-1876. During the administration of **Tomás Frías** the **boundary between Bolivia and Chile** was fixed at parallel 24° (1874) Bolivia agreed that Chileans might engage in mining industry for 25 years without additional taxation

1876-1880. Hilarión Daza became president after a *coup d'état* (1876) An additional tax was placed on nitrate exported from the Bolivian littoral (1878) and the **Chilean Nitrate Company** of Antofagasta appealed to the Chilean government Despite negotiations Bolivia decided temporarily to rescind the contract of the nitrate company.

1879, Feb. 14 Chilean troops occupied Antofagasta and Bolivia proclaimed a state of war. Peru refused to guarantee neutrality and Chile declared war on the allies (Apr 5)

1879-1884. WAR OF THE PACIFIC. Chilean troops, everywhere successful, occupied the entire Bolivian littoral, Tarapacá, Tacna, and Arica (1879). **Daza was overthrown** (1880) and **Narciso Campero** took office Hostilities between Bolivia and Chile were terminated by the **Treaty of Valparaiso** (1884, Apr 4), which provided for an indefinite truce, Chilean control of Atacama for the life of the agreement, and tariff concessions by Bolivia. Bolivia thus ceded territory rich in nitrate and lost access to the sea

1888-1892. During the period of office of **Aniceto Arce** a railway was opened between Antofagasta and Oruro, affording Bolivia access to the coast by rail

1892-1896. Mariano Baptista succeeded Arce Two agreements with Chile envisaging the granting to Bolivia of access to the sea were ratified (1895, May 18, Dec 9), but not put in effect.

1898. Following an attempt of Conservatives to erect Sucre into a permanent capital, a **revolt headed by José Pando** occurred in La Paz (Nov 6) which had shared the status of the seat of government with Sucre and other cities **Pando became president** (1899).

1899. Brazilians who had entered the rubber-producing **Arce district** proclaimed a separate state (July)

1903. By the **Treaty of Petropolis** (Nov. 17) Bolivia ceded the territory to Brazil and the latter undertook to provide Bolivia with rail and water outlet eastward through construction of a railway around the cataracts of the Madeira.

1904-1909. During the presidency of **Ismael Montes** education and railway construction were encouraged and finances were improved Public worship of religions other than Roman Catholicism was permitted

1904, Oct. 20. A **treaty between Bolivia and Chile** formally terminated the **War of the Pacific,** recognized Chilean possession of the littoral, and provided for the construction by Chile of a railway to connect Arica and La Paz, the Bolivian portion to be turned over to Bolivia 15 years after completion In a **supplementary protocol** (Nov 15), **Bolivia recognized Chilean sovereignty** over the territory between parallels 23° and 24°.

1909-1913. Eleodoro Villazón promoted economic development. In the administration of Montes, again president (1913–1917), material progress continued

1913. The **boundary between Bolivia and Argentina** was adjusted, and efforts were made to determine the limits with Paraguay

(*Cont p* 1067)

f. PERU

1825-1826. Bolívar as head of the state aided in the governmental organization of Peru and upon completion of his task departed for Colombia

1827. José de Lamar as president adopted an expansionist policy, intervened in the affairs of Bolivia, despite recognition of Bolivian independence, and sought to annex southern Colombian provinces Invading Peruvian troops aided in forcing Sucre to withdraw from Bolivia (1828) A Peruvian fleet took **Guayaquil** (1829, Jan. 21), but the Peruvian army of invasion was defeated by Sucre at **Tarqui** (Feb 27) and Guayaquil was soon retaken (Feb 28) The plans of Lamar for northern expansion were thus thwarted

1835-1839. During civil strife, while **Luis Orbegosa** was president, **Santa Cruz** with the collaboration of Orbegosa established the Peruvian-Bolivian Confederation which was brought to an end by the **battle of Yungay** (p 811)

1841. Expansionist aims caused President **Agustín Gamarra** to invade Bolivia, but he was defeated and killed at **Ingavi** (Nov. 20).

1842-1845. Civil War followed, from which **Ramón Castilla** (1797–1867) emerged as head of the state, remaining virtual dictator for 15 years.

1845-1862. **Castilla** established order, sought to stabilize finances, promoted internal development, including exploitation of guano and nitrate, and adopted administrative, religious, and social reforms

1863-1865. During the administration of **Juan Antonio Pezet** a long-standing controversy with Spain, which had not acknowledged Peruvian independence, came to the fore After unsuccessful negotiations a **Spanish fleet seized the Chincha Islands** (1864, Apr 14) Pezet concluded a treaty (1865, Jan 27) by which Spain virtually recognized the independence of Peru, but which contained provisions which aroused the resentment of his countrymen He was consequently driven from office

1865. **Mariano Prado** became president and **declared war on Spain** (1866, Jan 14) Alliances were concluded with Chile, Bolivia, and Ecuador After blockading allied ports and attacking Valparaiso and Callao, the Spanish fleet abandoned hostilities (May 9) An armistice was later arranged through mediation of the United States (1871), and separate treaties of peace were signed

1868, Jan. 7. While the war with Spain was in progress **Prado was overthrown** and **Pedro Diâz Campero** became president He was followed by **José Balta** (1868–1872), who undertook an extensive program of internal developments, but created a serious financial situation through heavy expenditures and the contracting of large foreign loans

1872. Balta was driven from office and murdered (July 26) and was succeeded by **Manuel Pardo** (1872–1876) Education was promoted and governmental reforms were adopted The financial situation created by Balta led to governmental bankruptcy

1873, Feb. 6 **Peru and Bolivia concluded a secret treaty of alliance,** and when the conflict over Atacama arose between Chile and Bolivia (pp 809, 812), Peru, under the presidency of **Mariano Prado,** unsuccessfully sought to mediate After Peru refused to proclaim neutrality, Chile declared war

1879-1884. **WAR OF THE PACIFIC.** Chile was completely victorious· Tarapacá, Tacna, and Arica were occupied, the navy gained undisputed control of the sea, and **Lima** was taken by an army landed on the coast (1879–1881) The United States sought in vain to mediate between the belligerents

1883, Oct. 20. **Chile** concluded the **Treaty of Ancón** with the government of **Miguel Iglesias.** By this treaty Peru ceded the nitrate province of **Tarapacá** and Chile was to remain in possession of **Tacna** and **Arica** for 10 years, after which a plebiscite was to be held to determine final disposition. The war brought Peru to the verge of national collapse and a long period of attempted readjustment followed.

1885-1890. Under the administration of **Andrés Cáceres** the foreign debt was funded and assumed by the **Peruvian Corporation,** a society of bondholders, in return for the cession of railways and guano deposits for a period of 66 years Attempts to adjust the question of Tacna and Arica failed, and the 10-year period elapsed without a plebiscite

1895-1899. **Nicolâs de Piérola** became president after a period of instability, and during his administration monetary reforms were initiated and unsuccessful attempts were made to determine the question of Tacna and Arica.

1899-1903. Under his successor, **Eduardo de Romaña, boundary disputes with Ecuador and Brazil** developed, and **American interests** began development of the copper deposits of Cerro de Pasco A vigorous stand was taken against possible loss of Tacna and Arica, and this was continued by succeeding presidents

1908-1912. During the administration of **Augusto Leguía** (1863–1932), Chile having adopted an intransigent attitude, diplomatic relations between Peru and Chile were severed (1910, Mar. 21) While Leguía was in office Peru acknowledged Brazilian sovereignty over a portion of the Arce region and concluded a boundary treaty with Bolivia (1911), which established the basis of a permanent adjustment.

(*Cont. p.* 1068)

g. ECUADOR

1822-1830. After the liberation of **Quito** (p 803), the territory, in accord with the plans of Bolívar, was incorporated into Great Colombia A movement for independence developed before the death of Bolívar.

1830, May 13. **The Republic of Ecuador** was created, with **Juan Flores** (1801–1864) as president (1830–1835). Opposition to separation in **Guayaquil** was overcome, and by treaty **Cauca,** which had adhered to Ecuador, was restored to New Granada and the Carchi River was declared the boundary (1832, Dec 8) **Flores** became the leader of the Conservative element and **Vincente Rocafuerte** (1783–1847) of the Liberal

1834, July. After civil war a compromise political arrangement was reached by the two leaders

1835-1843. During the administrations of **Rocafuerte** (1835–1839) and **Flores** (1839–1843) administrative and social reforms were adopted and material progress was fostered Upon the re-election of Flores under a new constitution (1843, Apr. 1), Rocafuerte went into exile

1845, Mar. 6. Flores was overthrown by a Liberal revolt A period of political instability and foreign complications ensued (1845–1860)

1856, July 9. During this period a portion of the **boundary between Ecuador and New Granada** was fixed, and Peruvian naval forces blockaded Guayaquil (1860)

1860 After the revolutionist leader **Franco** had been driven from Guayaquil (Sept 24), **Gabriel García Moreno** (1821–1875), an extreme conservative, who was convinced of the supremacy of the Roman Church over all earthly powers, became president (1861)

1861-1875. He dominated Ecuador until his assassination A new constitution according wide powers to the president was promulgated (1861, Apr 10) Moreno governed with absolute authority. Order was restored and insurrections were ruthlessly suppressed, internal improvements were carried out, and financial, military, and administrative reforms were introduced

1862, Sept. 26. A concordat was concluded with the papacy by which the Church was granted great authority, influence, and wide privileges

1863. President Mosquera of New Granada (p 815) invited Ecuadorians to overthrow Moreno, and **Flores** led an army into New Granada, but was defeated (Dec 6) A treaty restored the *status quo*

1865-1866 Ecuador united with Peru and Chile against Spain (pp 809, 813)

1869. A new constitution granting extensive powers to the executive and assuring the position of the Church was adopted (June 9) Toward the close of his career Moreno became increasingly proclerical and Ecuador became virtually a theocracy

1875-1895. A period of political instability, characterized by strife between Liberals, who sought to restrict the influence of the Church, and Conservatives followed the death of Moreno.

1895-1916. During the administrations of the Liberals **Eloy Alfaro** (1895–1901, 1907–1911) and **Leonidas Plaza Gutiérrez** (1901–1905, 1912–1916) relatively liberal constitutions were adopted (1897, 1906) and the authority, privileges, and influence of the Church were greatly restricted

1904, May 6. Ecuador recognized Brazilian claims over territory between the **Caquetá** and **Amazon,** but efforts to adjust the boundary with Peru were but partially successful

1908. A railway between Guayaquil and Quito was completed

1916-1924. Comparative tranquillity existed during the second term of Plaza Gutiérrez and the **administration of Alfredo Baquerizo Moreno** (1916–1920)

(*Cont p* 1068)

h. COLOMBIA (NEW GRANADA)

Great Colombia as established by Bolívar comprised the viceroyalty of New Granada, the captaincy-general of Venezuela, and the presidency of Quito

1829-1830. Separatist movements in Venezuela (1829–1830) and Quito (1830) brought the confederation to an end despite the efforts of Bolívar, who, the center of controversy, retired to Santa Marta and soon died (1830, Dec 17)

1831, Nov. 17. New Granada was declared a separate state, and a centralized constitution was adopted (1832, Feb 29) Political dissension in New Granada had developed with independence

1832. Colonial traditions caused reactionary tendencies, the Church was powerful, and sectional rivalry and geography made difficult the attainment of unity Two parties, almost equal in strength, arose, the Conservative, favoring a centralized administration, the Church, and class privilege, and the Liberal, advocating federalism, secularization, disestablishment, religious toleration, and extended suffrage.

1832-1837. Francisco de Paula Santander (1792–1840), a Conservative, executive while Bolívar was engaged in the liberation of Quito, Peru, and Bolivia, and president of New Granada after the disruption of Great Colombia, was confronted by forces of disunity which he was unable to control

1837-1842. During the administration of his successor, **José de Mârquez,** a period of **civil wars** began Order was temporarily restored by **Pedro Herrân,** who followed Mârquez, and a new centralized constitution was adopted (1843).

1845-1849. During the administration of **Tomás Mosquera** (1798–1876), a Conservative, a commercial treaty was concluded with the United States by which that government was granted right of transit across the Isthmus of Panama and guaranteed the neutrality of, and New Granadan sovereignty over, that area (1846, Dec 12)

1849-1853. **José López**, a Liberal, succeeded Mosquera Slavery was abolished with compensation for the owners (1851–1852) and Colombian rivers were opened to foreign commerce (1852) A liberal and federalistic constitution was adopted (1853, May 28) during the term of **José María Obando** (1853–1854), a Liberal, and laws were enacted to separate Church and State (June).

1854, Apr. As the result of a conservative movement **Obando was removed** and the vice-president, **Manuel Mallarino**, assumed office **A railway across Panama** was completed (1855)

1855, Feb. 27. **Panama** was given a **federal status** by a constitutional amendment, which also provided that other provinces might establish that form

1858. Certain provinces assumed a federal organization and, during the presidency of **Mariano Ospina** (1857–1861), a federal constitution, which failed to define the powers of the central government, was adopted (Apr 1), the republic being designated the **Granadan Confederation.**

1860. Opposing legislation which assigned the central government certain powers in local affairs, **Mosquera**, who had become a Liberal and governor of Cauca, declared that state independent. Other states took similar action

1861. **Civil war** ensued, and Mosquera occupied **Bogotá** and assumed the presidency (July 18)

1861-1863. Religious reforms were adopted, a congress proclaimed the union of seven sovereign states as the **United States of Colombia,** and a new federal constitution was promulgated (1863, May 8)

1867. Mosquera quarreled with the Liberal Party and his policies became dictatorial He was exiled

1867-1880. The ensuing administrations were characterized by civil war, impotence on the part of the central government, disorganized finances, and increasing opposition of the Conservatives, who became a clerical and traditionalist party.

1878, May 18. A concession for 99 years was granted a French company to construct **a canal across Panama.**

1880-1898 With Liberal support **Rafael Núnez** (1825–1894) became president (1880–1882) and introduced economic reforms After the administration of **F. J. Zaldúa** (1882–1884) **Núnez** again became president (1884) He advocated complete reorganization of the nation and became the head of a new group, the **Nationalists,** composed of Conservatives and Independents A Liberal revolt (1885, Jan –Aug.) was suppressed These events marked a triumph for conservatism, centralized government, and clericalism

1886, Aug. 4 A **centralized constitution** was adopted and a **concordat** was concluded with the papacy (1887, Dec 31) which accorded the Church a privileged position **Núnez** was re-elected (1892), but the vice-president, **Miguel Caro,** actually exercised authority. Upon the death of Núnez (1894), **Caro became president**

1898-1900. During the presidency of **Miguel Sanclemente,** a Liberal revolt occurred (1899–1900) Vice-President **José Marroquín,** a Conservative, forced Sanclemente from office (1900, July 31) and assumed authority.

1900-1903. **A prolonged civil war** ended with a victory of the Conservatives

1902. The **French company,** headed by **Ferdinand de Lesseps,** had begun work on the canal across Panama (1881), but had become bankrupt (1891) and a new company sought to sell the assets (1902).

1903, Jan. 22. Freed from the Clayton-Bulwer Treaty (p 818), the United States and Colombia negotiated the **Hay-Herrán Treaty** according to the former canal rights and lease of territory. Colombia delayed ratification

Nov. 3. The **Panamanian elements,** fearing choice by the United States of the alternate Nicaraguan route and assured of American support, **proclaimed an independent republic.** American warships prevented Colombian forces from landing to quell the movement, and the **United States recognized the independence of Panama** (Nov 6) These events aroused Colombia, which was unsuccessful in an attempt to secure redress Colombia refused to recognize the independence of Panama.

1904-1909. **Rafael Reyes** succeeded Marroquín and governed dictatorially. Efforts were made to reorganize the finances

1907, Apr. 24 **Colombia** relinquished to **Brazil** disputed territory about the

mouth of the **Caquetá River** and the headwaters of the **Río Negro.**

1909, Jan. 9. The conclusion of a **convention with the United States** which involved recognition of Panama and abrogation of the Treaty of 1846 aroused resentment, and **Reyes was forced to resign** (July 8).

1910-1914. During the administration of **Carlos Restrepo** educational and governmental reforms, including minority representation in congress and the cabinet (provided for by a law of 1906), were placed in effect and efforts were made to rehabilitate the finances

1914-1918. **José Concha** succeeded Restrepo

1914, Apr. 6. The Thomson-Urrutia Treaty, by which the United States expressed regret for the differences which had arisen with Colombia, accorded transportation privileges on the Isthmus, and agreed to pay Colombia $25,000,000, and by which Colombia recognized the independence of Panama, was ratified by Colombia, but not by the United States Senate (*Cont p* 1069)

i. VENEZUELA

1830, Sept. 22. Separatist sentiment increased rapidly in Venezuela after the creation of Great Colombia, and under the leadership of **José Páez** the state was made sovereign

1830-1846. As president, Páez maintained order, stimulated internal development and commerce, and promulgated religious and administrative reforms The oligarchic group which controlled Venezuela during the early period became known as the Conservative Party and about 1840 a Liberal opposition made its appearance The Conservatives advocated a centralized system of government and the Liberals a federal

1846-1850. José Tadeo Monagas, a Conservative elected with support of Páez, appointed a Liberal ministry and became involved in difficulties with congress, whereupon Páez led an unsuccessful revolt and was driven into exile (1850)

1851-1855. Under the presidency of **José Gregorio Monagas,** who succeeded his brother José Tadeo, slavery was abolished with recompense to owners (1854).

1855-1858. José Tadeo Monagas again became president. The issue of centralized government as opposed to federal led to civil strife

1861, Mar. Páez, invited to return, became dictator.

1863-1864. The Federalists gained the ascendancy and an agreement was reached under which Páez relinquished office, a Federalist constitution was promulgated, and the leader of the Federalists, **Juan Falcôn,** became president

1870-1888. After a further period of civil war **Antonio Guzmân Blanco,** a Liberal, assumed authority and controlled Venezuela, directly or through delegates, for 18 years During this period he was upon several occasions absent in Europe. Internal development was encouraged, administrative and religious reforms were adopted, and two constitutions were promulgated (1874, 1881), the second of which provided for a president elected for two years by a federal council constituted of state representatives

1889. Reaction against his rule while he was in Europe led to the elimination of Guzmán Blanco from Venezuelan affairs (Oct)

1892. The attempt of president **Raimundo Anduza Palacio** (1890–1892) to prolong his term beyond the constitutional period led to his overthrow by **Joaquín Crespo** (June 17), who became president under a new constitution (1894)

1895-1896. A serious **boundary dispute with Great Britain** concerning the limits of British Guiana caused the United States to protest vigorously to London under the Monroe Doctrine, and, after a serious crisis had arisen, the dispute was submitted to arbitration (p. 786). The award was largely favorable to Great Britain, but Venezuelan sovereignty over territory at mouth of the Orinoco was confirmed (1899, Oct 3).

1899. After a successful revolt (May 23–Oct) against the successor of Crespo, **Cipriano Castro** assumed authority (Oct 23)

1902, Dec. Claims of nationals because of injuries during revolutionary disturbances caused **Great Britain, Germany, and Italy to institute a naval blockade** of Venezuelan ports Pressure upon the European powers by the United States led to submission of the claims to arbitration (1903, Feb 13)

1908. Refusal of Castro to give compensation for injuries to American citizens caused the **United States to suspend diplomatic relations** (June 23) Charges that political refugees were being harbored on the island of Curaçao caused Castro to dismiss the Dutch minister (July 22). The **Netherlands thereupon blockaded** Venezuelan ports (Nov. 7).

1909. While Castro was absent in Europe the vice-president, **Juan Vicente Gómez,** made himself president (Dec 19)
(*Cont p.* 1070)

j. BRAZIL

1822-1831. THE REIGN OF PEDRO I. Dissension and opposition arose in the constituent assembly convoked before the declaration of independence.

1823. Dom Pedro dissolved the assembly and promulgated a constitution (1824, Mar 25)

1824, July 2. Discontent with the acts of the emperor caused the formation of the **Confederation of the Equator** by certain northern provinces, with republican intent, but this movement was suppressed (Sept 17)

1825 Opposition to Brazilian rule had never disappeared from the **Cisplatine Province** (Banda Oriental), and Argentina desired its incorporation

1825-1828. War between Brazil and Argentina resulted from an independence movement in the Banda Oriental (1825) and the desire of Argentina to annex that territory Brazil was decisively defeated in the **battle of Ituzaingo** (1827, Feb 20) Through the mediation of Great Britain the Banda Oriental, or **Uruguay,** became independent (1828, Aug 27)

Opposition to Pedro I arose from his autocratic tendencies, his preference for Portuguese advisers, and, most important, his attempts to secure his daughter **María da Gloria** on the Portuguese throne and his consequent interest in the affairs of Portugal. The loss of the Cisplatine Province increased his unpopularity

1831, Apr 7. In face of this opposition he was forced to abdicate in favor of his five-year-old son, **Pedro de Alcantara, Pedro II** (1825–1891)

1831-1840. The regency. During this period anarchy reigned because of factional quarrels and provincial revolts, the most serious of which was a separatist movement in **Rio Grande do Sul** (1835–1845) To re-establish direct monarchical government Pedro II was proclaimed of age (1840)

1840-1889 THE REIGN OF PEDRO II. The provincial revolts were brought to a close and a period of order and progress was initiated, control alternating constitutionally between the Liberal and Conservative Parties.

Great **material progress** took place after 1850. Agriculture, commerce, and industry expanded, railway construction, encouraged by the government, was carried on (about 650 miles in 1870 and over 6000 miles in 1889). Coffee production greatly increased, stock-raising remained important in the south, and sugar production in the north. Rubber production in the Amazon Basin became important after 1880 In 1850 the estimated population was 8,000,000, including 2,500,000 slaves; in 1872 over 10,000,000, including 1,500,000 slaves, and in 1889 over 14,000,000

In **foreign affairs,** Brazil sought to extend her influence to the west and southwest. She intervened in the affairs of Uruguay, opposed the expansionist policies of Rosas, dictator of Argentina, and aided in his overthrow (1851–1852) (p 808), and, allied with Argentina and Uruguay, conducted a major **war against Paraguay** (1865–1870) (p 810). During this period Brazilian prestige increased greatly

1870-1888. A movement for emancipation of Negro slaves developed rapidly after 1850 After the enactment of a law stipulating that children of slaves should be free (the **Rio Branco Law,** 1871), after the freeing of slaves by the provinces of Ceará and Amazonas, and the freeing of all slaves of over sixty years (1885), a Liberal ministry provided for **complete emancipation** with no recompense for owners (1888, May 13)

1870 Republicanism, originally a movement of intellectuals, at first spread gradually. A republican party was formed (1870) The movement grew rapidly. The monarchy was gradually undermined by a number of forces the dissatisfaction of the army with the peaceful policies of Pedro II after 1870, friction with the clergy, the rapid growth of republicanism, the alienation of the landed aristocracy through the emancipation of the slaves, the virtual extinction of provincial autonomy, and the unpopularity of the French husband of Princess Isabella, Gaston d'Orléans, Comte d'Eu

1889, Nov. 15. The army, headed by General **Manoel Deodoro da Fonseca,** revolted and **deposed the emperor.** A republic was immediately proclaimed and a provisional government was established

1889- THE REPUBLIC. During this period trade, cattle-raising, mining, agriculture, and forestry were greatly expanded and there was some development of manufacturing (cotton textiles) Railway mileage increased greatly Coffee production came by 1925 to comprise four-fifths of the world supply Overproduction of coffee led São Paulo, Rio de Janeiro, and

Minas Geraes in 1906–1907 and the central government somewhat later to establish a valorization system Rubber production reached its height in 1910, after which it declined, because of the introduction of plantation systems in the East Indies The problems of coffee and rubber production played an important part in creating economic difficulties

The **population** in 1920 reached a total of over 30,000,000, and in 1935 of over 47,500,000 During this period there was extensive **immigration,** especially of Spaniards and Italians

The proper functioning of the national government under the republic was, from the very beginning, rendered difficult by the existence of **illiteracy** (estimated at 80% in 1910 and at 75% in 1920), by **political inexperience** and intolerance, by the absence of real political parties, and by the prevalent tendency toward **military rule** The southern states, especially São Paulo and Minas Geraes, sought to control the country Presidential candidates were chosen by caucuses representing controlling political groups of the more important states

1891, Feb. 24. A constitution which provided for a federal republic, the **United States of Brazil,** a president elected for four years, a bicameral legislature, and the separation of Church and State was promulgated, and **Deodoro da Fonseca** was elected president

Nov. 23. The dictatorial policies of the president caused a naval revolt and he was forced from office Vice-President **Floriano Peixoto** assumed authority and governed arbitrarily

1893-1895 A **rebellion** occurred in **Rio Grande do Sul,** and the navy revolted under **Admiral de Mello,** but the movements were suppressed after serious fighting

1894-1910. Presidents **Moraes Barros** (1894–1898), **Manoel de Campos Salles** (1898–1902), **Rodriquez Alves** (1902–1906), **Affonso Penna** (1906–1909), and **Nilo Peçanha** (1909–1910) sought to stabilize finances, secured loans, and adopted fiscal reforms **Boundary controversies** with Argentina (1895), France (1900), Bolivia (1903), England (1904), and Holland (1906) were adjusted by arbitration or direct negotiations

1910-1920. The political campaign of 1910 was of unusual significance because it involved the question of militarism in politics **Hermes da Fonseca,** the candidate of the conservative and army elements, was elected and governed arbitrarily. A financial crisis resulting from a drop in the prices of rubber and coffee and the resultant need of unity caused the withdrawal of the anti-militarist candidate in the campaign of 1914, and **Wenceslau Braz** was elected

(*Cont p* 1070)

k. PANAMA AND THE PANAMA CANAL ZONE

Prior to the revolution of 1903, Panama was part of Colombia The district had long been of interest because of the numerous **projects for an interoceanic canal** which were put forward from time to time from the 16th century onward Schemes of this kind, involving complicated engineering problems, became practicable only in the later 19th century

1850, Apr. 19. CLAYTON-BULWER TREATY, between Great Britain and the United States, by which both powers agreed not to obtain or maintain any exclusive control of a proposed canal, and guaranteed its neutrality

1878, May 18. The Colombian government granted a French company under **Ferdinand de Lesseps** exclusive rights to construct a canal The French **Panama Canal Company** was organized Aug 17, 1879, and began construction of a sea-level canal (Jan 1, 1880) The company failed in 1889 and a second company organized in 1894 Work continued until 1899.

1899, June 10. The United States Congress appointed a **canal commission** to report on possible routes through Panama

1900, Feb. 5. The First Hay-Pauncefote Treaty, between Great Britain and the United States This treaty, by which England renounced the right to joint construction and ownership, was rejected by Great Britain

1901, Nov. 18. SECOND HAY-PAUNCEFOTE TREATY, giving the United States sole right of construction, maintenance, and control

1903, Jan. 22. Hay-Herrán Treaty, between the United States and Colombia, providing for the acquisition by the United States of a canal zone The Senate of Colombia failed to ratify this treaty

Nov. 3 REVOLUTION IN PANAMA; independence from Colombia (p 815)

Nov. 18. HAY-BUNAU-VARILLA TREATY between the United States and the new Panaman government. Panama granted the United States in perpetuity the use of a zone five miles wide on either side of the future canal, with

full jurisdiction The United States paid $10,000,000 and still pays $250,000 annually The treaty was ratified Feb 26, 1904

1904, Feb. 13 Adoption of the Panaman constitution; president, unicameral legislature, etc The constitution also stipulated that if by treaty the United States guaranteed the independence and sovereignty of Panama, that power should also have the right to intervene to maintain order

1904-1908. Manuel Amador Guerrero, first president of the republic

1904, Apr. 23. The United States acquired the property of the French canal company for $40,000,000 At this time American engineering opinion still favored a sea-level canal.

1906, Feb. 5. The Isthmian Canal Commission reported in favor of a lock canal. On June 29 the United States Congress passed an act providing for such a canal

1907, Apr. 1. Lieut.-Col George W Goethals appointed chief engineer.

1914, Aug. 15. THE PANAMA CANAL WAS OPENED Its use during the first years was limited, because of constant landslides The official and formal opening was postponed until July 12, 1920

Sept. 2. The boundaries of the Canal Zone were defined and further rights of protection were conceded to the United States by treaty (*Cont p* 1072)

I. CENTRAL AMERICA

(1) *General*

1824, Nov. 22. After separation from Mexico (p. 805) the assembly of the **United Provinces of Central America** promulgated a federal constitution and **Manuel José Arce** was elected president Guatemala City was made the capital A Conservative Party (Servile), favoring centralized government and the Church, and a Liberal, advocating the existing federalism and reform, developed

1826. Discontent with the preponderance of Guatemala, dissension concerning religious questions, and political discord soon developed, and **civil war** ensued Arce supported the Conservatives and **Francisco Morazán** (1799–1842) became the Liberal leader

1829. Morazán was victorious, occupied Guatemala City (Apr 12), and became dictator, later assuming the presidency (1830)

1829-1835 Anti-clerical reforms were adopted, control of the Church was assumed, religious freedom was established, measures were taken against Spaniards and members of religious orders, and the capital was transferred to Salvador

1837-1838 Political and religious tension led to civil strife, and **Rafael Carrera** (1814–1865), of mixed blood, placed himself at the head of the revolt, gaining clerical support

1839-1840. The Liberals were defeated and Morazán was forced into exile Congress meanwhile had adjourned, and with the defeat of Morazán the confederation dissolved into its component states: **El Salvador, Honduras, Nicaragua,** and **Costa Rica.**

1840-1865. Carrera became **dictator of Guatemala,** in which he established an extremely conservative régime, and dominated a large part of Central America.

1842-1852. Honduras, Nicaragua, and **El Salvador** formed a short-lived union (1842–1844). El Salvador and Guatemala sought to establish co-operation (1845), Honduras, El Salvador, and Nicaragua attempted to form a union (1847), and Honduras, Nicaragua, and El Salvador formed a confederation which was to include Costa Rica and Guatemala (1849–1852), but no permanent results were achieved because of friction or open hostilities

1855-1862. An attempt by **William Walker,** an American, to establish control over Nicaragua (which he achieved for a short period) and perhaps extend his authority over a wider area, produced political and military co-operation between the Central American states As a result of this and the antagonism of **Cornelius Vanderbilt,** who desired control of the transit route across Nicaragua, which became important after acquisition of California by the United States, **Walker was defeated** (1855–1860)

1862 Nicaragua, supported by Honduras and Salvador, sought to form a Central American union, but with no results

1876-1885. Justo Rufino Barrios (c 1834–1885), President of Guatemala, attempted without success to form a union (1876) Later he sought to establish a confederation by force. Honduras alone supported Rufino Barrios, while Costa Rica, Nicaragua, and El Salvador placed forces in the field to oppose him **Barrios invaded Salvador,** but was defeated and killed at **Chalchuapa** (1885, Apr 2)

1886-1887. Upon the initiative of Guatemala the Central American states framed a constitution and concluded a **treaty of peace and amity.**

1888-1889. Under this organization congresses met at **San José, Costa Rica,** and **San Salvador** Definite union was decided upon by the latter congress, but controversy between Guatemala and Salvador prevented consummation

1895-1898. Representatives of Nicaragua, El Salvador, and Honduras at **Amapala** concluded a **treaty of union** which created a governing commission (1895, June 20) A constitution for a confederation, the **Greater Republic of Central America,** was framed and an executive council met, but opposition in El Salvador brought the union to an end (1898, Nov 25)

1893-1909. **President José Santos Zelaya** of Nicaragua appears to have projected the establishment of a confederation by force.

1907. In a **war with Honduras** he placed a president of his choice in power in that country and openly aided a **revolution in El Salvador.** Zelaya prepared to invade El Salvador, which was supported by Guatemala, and a general war threatened In this situation, through the mediation of the United States and Mexico, a **conference of Central American states** to promote peace, unity, and eventual federation was held in Washington (Nov 13–Dec 20) Treaties were concluded providing for unification of currency, communications, tariffs, and similar matters, non-interference in internal affairs, neutralization of Honduras, and the creation of a Central American Court of Justice to determine all disputes Honduras proposed confederation, but without result The court of justice was established at Cartago (1908) When Nicaragua ignored its adverse decisions concerning the conclusion of the Bryan-Chamorro canal treaty between that country and the United States, the court lost influence and provision for its continuance was not made

(2) *Territorial Adjustments*

1823- **Great Britain** maintained a **protectorate over the Mosquito Indians** of Nicaragua and Honduras, acquired during the colonial period, and the British from **Belize** expanded southward. Desiring a weak Central America, Great Britain was opposed to reunion after dissolution of the confederation.

1841. The **Bay Islands,** occupied by British, were placed under jurisdiction of the superintendent of Belize, and claim was laid to the mouth of the San Juan River.

1848. After acquisition of California by the United States, and with the prospect of canal construction, Great Britain took possession of the mouth of the **San Juan River** in the name of the ruler of the Mosquito Indians

1850, Apr. 19. Opposition of the United States to British domination of a canal route across the Isthmus led to the conclusion of the **Clayton-Bulwer Treaty,** by which the United States and Great Britain agreed to neutralization of the proposed canal and pledged not to occupy or exercise sovereignty over any part of Central America Great Britain at first refused to withdraw from the Bay Islands and the Mosquito Coast under this treaty, but eventually agreed to do so upon vigorous American representations

1859, Nov 28. A **treaty between Great Britain and Honduras** gave the latter control of the appropriate portion of the Mosquito Coast and recognized the sovereignty of Honduras over the Bay Islands

1860, Jan. 28. **Great Britain recognized Nicaraguan sovereignty** over the Mosquito territory within its boundaries by a similar treaty, although Nicaragua did not gain full control until the presidency of Zelaya (1894)

1859, Apr. 30. A **treaty between Guatemala and Great Britain** fixed the southern limits of Belize

(3) *Nicaragua*

1909. The **United States opposed President José Santos Zelaya** of Nicaragua because of his bellicose policies and interference in other states (p 790), and American pressure together with a Conservative revolt forced him from office (1909, Dec 16)

1911, June 6. As Nicaraguan finances were unsatisfactory, a treaty was concluded between the **United States and Nicaragua** providing for a loan to be secured by customs, these customs to be collected by a collector-general approved by the United States **President Taft** appointed a commissioner-general and created a claims commission, and loans were extended. The United States Senate refused to ratify the treaty, and loans were thereupon restricted

1912. Upon the outbreak of **civil war** (July) the United States intervened to protect the Conservative government. An election was held under supervision of

American forces and **Adolfo Díaz**, a Conservative, was elected (Nov) A legation guard of American marines was established at Managua. (*Cont. p.* 1073)

(4) *Honduras*

1907, Feb.-Dec. War between Honduras and Nicaragua. The Hondurans were defeated and the capital occupied by President Zelaya of Nicaragua **President Bonilla** of Honduras captured. He was replaced by Gen **Miguel Dávila.**

1909, Dec. Outbreak of a revolt against Davila, led by former President Bonilla The ensuing civil war lasted until 1911

1911, Feb. 8 Armistice: both factions agreed to abide by the forthcoming elections

Oct. 29. Bonilla elected president.

1912, Jan. 9. American marines landed in Honduras to protect American property.

1913, Mar. 21. Death of Bonilla. He was succeeded by the vice-president, **Francisco Bertrand.**

(*Cont p* 1073.)

m. MEXICO

1823, Mar. 19. AGUSTIN I (p. 805), confronted by financial difficulty and political discontent, was forced from the throne by a revolt of which one of the leaders was **Antonio López de Santa Anna** (1797–1876)

1824, Oct. 4. A federal republic was established and **Guadalupe Victoria** was made president Controversy arose between Liberal and Conservative elements, and upon the conclusion of the term of Guadalupe Victoria (1828) a period of disorder was initiated.

1829. During this period, while **Vicente Guerrero** was in office, a Spanish expedition from Cuba took **Tampico** (Aug 18), but was forced to capitulate (Sept 11)

1833, Apr. 1. Santa Anna was elected president by the Liberals and for over twenty years dominated Mexican affairs directly or indirectly Santa Anna alternated in office with Vice-President **Valentín Gómez Farías** (1833–1834), who undertook political and religious reforms Gómez Farías was driven from office by Santa Anna (1834, Apr 24)

1835, Dec. 15. A highly **centralized government** was established

1836, Mar. 2. Americans who had colonized **Texas** opposed direct Mexican control, **proclaimed a republic,** and maintained their independence, defeating and capturing Santa Anna at **San Jacinto** (Apr 21)

1838, Apr 16. In enforcement of claims a **French expedition** occupied **Vera Cruz** and withdrew when Mexico agreed to indemnities (1839, Mar. 9).

1841, Oct. 10. After further civil strife **Santa Anna** again assumed **dictatorial power** and promulgated a highly centralized constitution (1843, June 12)

1844. A revolt forced him into temporary exile (1845)

1846-1848. THE EXPANSIONIST POLICY OF THE UNITED STATES, boundary disputes, the question of Texas, and unsettled claims had created strained relations between the United States and Mexico, and the annexation of Texas by the United States (1845, Mar 1) led to **war between the two nations** (p 773). Mexico was totally defeated, and its capital occupied (1847, Sept. 14)

1848, Feb. 2. By the **Treaty of Guadalupe Hidalgo,** Mexico ceded **Upper California, New Mexico,** and the northern portions of **Sonora, Coahuila,** and **Tamaulipas,** the United States paying $15,000,000 and assuming payment of claims against the Mexican government

1848-1853. Following the war Presidents **José Joaquín de Herrera** and **Mariano Arista** sought unsuccessfully to rehabilitate finances and restore order.

1853 Santa Anna again became president and established a dictatorship which tended toward monarchy. A Liberal revolt drove him from office and ended his control of Mexican affairs (1855, Aug 9).

1855. A program of **religious and political reform** was undertaken by the Liberal government, including an attempt to release from mortmain the great holdings of the Church (**Ley Juarez,** Nov 23), and a federal constitution was adopted (1857, Feb 5).

1857-1860 These reforms led to civil war between Conservatives and Liberals, the **War of the Reform.**

1858. The Liberal government, with **Benito Juárez** (1806–1872) as president, established its capital at **Vera Cruz** (May 4), being recognized by the United States (1859, Apr 6) The Conservative capital was Mexico City Laws providing for separation of Church and State, confiscation of ecclesiastical property except churches, and suppression of religious or-

ders were promulgated by the Liberal government

1860, Dec. 22. **The Liberal forces triumphed** in the field and Juárez placed the reform laws in effect throughout Mexico The war disorganized Mexican finances and created friction with other powers.

1861. Upon suspension of payment on foreign debts by the Mexican government (May 29, July 17), **France, Great Britain, and Spain,** by the **Treaty of London** (Oct 31) undertook joint intervention to protect their interests Napoleon III desired to create in Mexico a Catholic empire under French hegemony, which would provide markets and raw materials and check the expansion of the United States French designs, supported by Mexican reactionaries, became clear after **allied occupation of Vera Cruz** (Dec 17), and Spain and Great Britain withdrew (1862, Apr 8)

1863. French troops occupied Mexico City (June 7), and the **Archduke Maximilian of Austria** (1832–1867) was made **emperor** (1864, Apr 10) The Mexican Liberal government continued resistance and the liberal policies of Maximilian alienated certain conservative elements

1865-1867. After the close of the Civil War the United States (which refused to recognize Maximilian and supported Juárez) insistently demanded withdrawal of French troops, as the Monroe Doctrine was definitely involved In view of the attitude of the United States and the delicate European situation, **Napoleon III withdrew** support from Maximilian (1867, Mar 12)

1867, May 14. The emperor was forced to **capitulate at Querétaro,** and was executed (June 19) **Juárez** restored order, and was re-elected to the presidency (Dec 19)

1872. Upon the death of Juárez **Sebastián Lerdo de Tejada** became president Constitutional amendments were enacted to safeguard the liberal reforms earlier adopted (1873, May 29)

1876. **Porfirio Díaz** (1830–1915) overthrew Lerdo de Tejada (Nov 20) and became president (1877, May 2).

1876-1911. **DÍAZ CONTROLLED MEXICO** with absolute authority until 1911, remaining in office constantly with the exception of the period 1880–1884. Under Díaz order was established, Mexican prestige was raised, finances were stabilized, and vast material progress was achieved Railways were built, public works were promoted, industry was developed, and commerce increased Much foreign capital, especially American, was invested A mining code was promulgated which, contrary to Spanish law, provided that title to land carried ownership of subsoil products (1884, Nov 22) A census of 1895 indicated a population of 12,500,000, and that of 1910 a population of 15,150,000 (1,150,000 white, 8,000,000 *mestizos*, 6,000,000 Indians) The government of Díaz favored the upper classes Lands of the Indians and *mestizos* and communal lands (*ejidos*) were permitted to come into possession of large landowners. Concessions to foreigners acted to the detriment of the Mexican middle class, exploitation of the working classes was general, and peonage developed Education was neglected and Mexicans, with the exception of a small group, were denied participation in government By 1910 all elements of political and social revolt had developed

1911, May 25. **Díaz was overthrown** by a movement begun in 1910 and headed by **Francisco Madero,** who became president (Nov 6), and an era of revolution was initiated Madero, whose objectives were largely political, had an imperfect understanding of the fundamental issues involved and the forces he unleashed soon passed beyond his control

1913, Feb. 18. **Madero was overthrown** by **Victoriano Huerta** and shot (Feb 22). **Venustiano Carranza** (1859–1920) headed a movement against Huerta, whom the United States refused to recognize

1914, Apr. 21. As a result of overt acts, **United States forces occupied Vera Cruz,** and war was narrowly averted

July 15. **Huerta** was forced from office by Carranza Civil war soon broke out between the latter and his lieutenant, **Francisco Villa,** and complete disorder followed

1915, Oct. 19. The United States and eight other American nations recognized Carranza as *de facto* president

1915-1916. Injury to life and property of foreigners created a delicate international situation and a demand for intervention arose in the United States

1916, Mar. 9. A raid by Villa on Columbus, New Mexico, caused the United States to dispatch **punitive expeditions** into Mexico under Gen **John J. Pershing** (Mar. 15) Carranza opposed this action

1917, Feb. 5. **American troops were withdrawn** after having failed in their

objective. These developments greatly stimulated Mexican anti-interventionist sentiment. The Carranza government was sympathetic to Germany during the World War (*Cont p.* 1074)

n. THE WEST INDIES

(1) *Cuba*

During the Wars of Liberation **Cuba** and **Puerto Rico** remained loyal to Spain and served as bases of operations for Spanish forces. Many royalists from revolutionary areas established themselves in Cuba Arbitrary government and an economic policy which reacted detrimentally upon the expanding Cuban sugar industry over a long period created discontent among Cubans

1868-1878. THE TEN YEARS' WAR ensued when reforms were not adopted by the Spanish government after the overthrow of Isabella (p 646) This revolt, in which the Cubans had the sympathy of the United States (which had earlier sought to purchase Cuba for strategic reasons), was terminated by the **Convention of El Zanjón** (1878, Feb 10), by which Spain promised administrative reforms The spirit of the Convention of El Zanjón was not observed by Spain, although slavery was eventually abolished (1880, 1886)

1895-1898 Political and economic unrest and a desire for independence led to a new **revolutionary movement.** The Cubans were supported by American opinion, which was further aroused by the ruthless measures adopted by the Spanish authorities

1897, Nov. 25 The Liberal Spanish premier, **Sagasta,** offered the Cubans a large measure of self-government, but they were determined upon complete independence.

1898. THE SPANISH-AMERICAN WAR. The Cuban situation rapidly became a direct issue between the United States and Spain, which, after the **destruction of the U.S.S. *Maine*** in Havana Harbor (Feb 15), led to war (Apr 25) Spain was decisively defeated (p 787). By the **Treaty of Paris** (Dec 10), which terminated the war, Spain relinquished sovereignty over **Cuba** and ceded **Puerto Rico** to the United States, and the United States undertook to maintain order in Cuba during the period of occupation. The loss of Cuba and Puerto Rico ended Spanish dominion in the Americas.

1899-1900. Upon termination of the Spanish-American War Gen **John R. Brooke** as military governor promulgated administrative reforms Gen. **Leonard Wood** succeeded Brooke (Dec. 13) and under his direction the civil government was organized, steps were taken to establish a Cuban administration, sanitation and public health measures were initiated (notable among them efforts which led to eradication of yellow fever), legal reforms were instituted, schools were standardized, municipal elections were held, and elections for a constituent assembly were called

1901, Feb. 21. The constituent assembly adopted a **constitution,** providing for a president and bicameral congress, into which, at the insistence of the United States, was inserted the **Platt Amendment** (June 12) to the American army appropriation bill This provided that Cuba might not enter into any treaty with a foreign power which impaired her sovereignty, that excessive foreign debts might not be contracted, that the United States might intervene to maintain Cuban independence and a government capable of preserving life, property, and personal liberty, and that lands be leased to the United States as coaling stations

1902-1906. Tomás Estrada Palma was chosen president and continued the policies initiated by Wood American forces were withdrawn A Liberal Party formed in opposition to Estrada Palma, who became leader of conservative elements

1906. A **Liberal revolt** (Feb 24–25) followed the re-election of Estrada Palma and upon his appeal President Theodore Roosevelt dispatched **William H. Taft** and **Robert Bacon** to adjust the situation They were unable to do so and Estrada Palma resigned (Sept. 25). As Congress was unable to agree upon a successor, Taft established a provisional government and American forces occupied the island **Charles E. Magoon** succeeded Taft (Oct. 3) Order was re-established, electoral reforms were adopted, and further public improvements were carried out (1906–1908)

1908, Nov. 14. Elections were held and **José Miguel Gômez,** a Liberal, became president (1909–1913), whereupon Magoon and the occupationary forces were withdrawn (1909, Feb 1) But the Liberal Party divided into factions and disorders occurred which brought threat of American intervention Increasing opposition to the Platt Amendment developed

1913-1917. During the presidency of the Conservative **Mario García Menocal,** a projected revolt was prevented by American pressure and American forces

were landed when a Negro rebellion occurred

1916-1917. The elections of 1916, in which Menocal was opposed by the Liberal **Alfredo Zayas,** were disputed, and the Liberals, led by ex-President Gómez, revolted (1917, Feb. 9) The United States proclaimed that a government established by force would not be recognized and American forces were landed at Santiago (Mar 8). **Gômez** was defeated and **Menocal** took office (May 20) (*Cont p* 1077)

(2) *Puerto Rico*

Puerto Rico was discovered by Columbus on his second voyage (1493) and colonization was begun in 1506 During the period of Spanish rule it was several times attacked (by the English under Lord George Clifford, 1598, by the Dutch, 1625, by the English under Abercromby, 1797) Slavery was abolished in 1873, after which a number of reforms were promulgated In 1897 the Spanish government introduced an autonomous régime

1898, May 12. During the Spanish-American War, Admiral **Sampson** appeared off San Juan and landed troops (July 25). Fighting continued until Aug. 13

Oct. 18. Gen **John R. Brooke** took possession for the United States A military government was established

Dec. 10. By the **treaty of peace** Spain ceded the island to the United States Under the leadership of **Eugenio M de Hostos,** agitation for "self-determination" began at once.

1899, Jan. An insular police force replaced the Spanish civil guard This "state constabulary" constituted the sole police force after 1902 some 800 men preserved order for a population of 1,000,000

Mar. 24. A Puerto Rican regiment was organized to serve as garrison. It was composed entirely of white inhabitants In 1918 it served as part of the garrison of Panama. In 1920 it became the 65th Infantry, U S Army

Aug. 8. San Ciriaco hurricane, the most destructive in the history of the island, 3369 persons killed, coffee plantations destroyed

1900, Apr. 12. Foraker Act, by which Congress established civil government for the island and introduced free trade with the United States

1901, May 27, Dec. 2. The United States supreme court decided (*De Lima* v *Bidwell*) that Puerto Ricans were not, *ipso facto*, United States citizens.

Features and results of civil government: Manhood suffrage was established and proved a stimulant to popular education Duties collected in Puerto Rico on foreign products were devoted to island affairs. The foreign trade increased between 1900 and 1924 from $16,602,004 to $177,650,164. A corresponding increase of population took place, from 952,243 in 1898 to 1,299,809 in 1920, of which 948,709 were whites During the American period there has been a rapid extension of the school system, and a reduction of illiteracy from 90% to less than 50% There has also been much progress in sanitation, the death rate falling from 41 per 1000 in 1898 to 18.6 in 1922. Less commendable was the gradual concentration of wealth in fewer hands Small holdings decreased by more than 30%

1909 Two half-mile tunnels were opened through the mountains, providing irrigation for the south side of the island, which is a trade-wind desert

Growing agitation, under the leadership of **Luis Muñoz Rivera,** for the extension of American citizenship to Puerto Ricans (*Cont p* 1079)

(3) *The Dominican Republic*

1808-1809. A **revolt in Santo Domingo,** aided by English naval forces, established freedom from Haiti and France

1814. Santo Domingo was again assigned to Spain by the Treaty of Paris.

1821, Dec. 1. Santo Domingo proclaimed independence following the action of other Spanish colonies, and unsuccessfully sought incorporation with Colombia

1822. **Haiti** under President Boyer **conquered Santo Domingo,** which remained incorporated until independence was established by a revolution (1844, Feb 27).

1861, Mar. 18. Because of internal disorder and fear of conquest by Haiti, **Santo Domingo** at its own request was **annexed to Spain.**

1865, May 1. A nationalist revolution caused **Spain to relinquish sovereignty.**

1868-1870. An effort to secure **annexation to the United States failed** when the United States Senate refused approval

1882-1899. During the presidency of **Ulises**

Heureaux comparative tranquillity and prosperity existed, although heavy debts were contracted abroad

1899-1904. After a period of turbulence, the government was bankrupt Heavy loans had been contracted abroad and the possibility of intervention by European powers existed

1905. Concerned as to the Monroe Doctrine, President Theodore Roosevelt, after rejection by the Senate of a treaty providing for supervision of Dominican finances, arranged by a *modus vivendi* for administration of Dominican customs and appointed a customs receiver (Mar 31)

1907, Feb. 8. A treaty was later concluded by which the United States was accorded control of customs for fifty years Under American control Dominican finances were rehabilitated Loans were floated in New York to aid stabilization

1916, May. Despite supervision of elections by the United States, disorder developed and **American naval forces were landed** to preserve order As the result of the refusal of the provisional president, **Francisco Henríquez y Carvajal,** to sign a new treaty providing American financial control, the United States withheld customs revenues. (*Cont p* 1078)

(4) *Haiti*

1697. In the 17th century the French gained control of the western extremity of **Española,** Saint-Domingue, or Haiti, and by the **Treaty of Ryswick** Spain ceded the western part of the island to France **Saint-Domingue** became a prosperous plantation colony

1795. In the **Treaty of Basel** Spain ceded the eastern part of Española to France At this time the population of Saint-Domingue consisted of some 40,000 whites, 28,000 freedmen, and 500,000 Negro slaves

1794, May 6. The mulattoes and Negroes, desiring equal rights and independence, during the French Revolution revolted, and under leadership of **Toussaint L'Ouverture, Jean-Jacques Dessalines,** and **Henri Christophe** achieved independence after forcing capitulation of a large French army dispatched by Napoleon (1804, Jan 1) All slaves were freed The whites were either killed or forced to flee during the revolution

1804, Oct. 8. Dessalines made himself emperor, Jacques I, and after his assassination (1806, Oct 17), **Christophe** as **Henri I** and **Alexandre Pétion** established their control in the north and south respectively

1818, Mar. 20. Jean Pierre Boyer became president after the death of Pétion and the suicide of Christophe (1820, Oct 8)

1822. Santo Domingo, which had again come under control of Spain (1814), was conquered by Boyer and the island was united as the **Republic of Haiti,** to which France accorded recognition (1838. Feb 12).

1843, Mar. 13. Boyer was forced from office

1844, Feb. 27. Santo Domingo established its independence through a revolution.

1847. Faustin Soulouque became president and soon proclaimed himself **Faustin I** (1849).

1859, Jan. 15. After oppressive rule he was overthrown and **Fabre Geffrard** assumed power Fabre Geffrard governed for eight years before being forced from office (1867).

1867- . An era of instability followed. Haitian finances became disorganized and obligations were contracted abroad.

1914, June 14. France and Germany demanded control of Haitian customs to secure payment, and the United States, with interests in Haiti, also desired control

1915, July 3. After a series of disorders the **United States landed forces** to restore order. Under American supervision **Philippe Dartiguenave** was named president (Aug 12). A treaty was concluded by which the United States established a political and financial protectorate for 10 years (Sept. 16) This was later renewed for a second 10-year period to end in 1936 (*Cont p* 1078)

I. AFRICA

1. GENERAL: EXPLORATION

1795-1796. MUNGO PARK explored the Gambia and reached the Niger at Segu, finally establishing the fact that the great river flowed east

1798-1799. The Portuguese Francisco de Lacerda traveled from Tete on the Zambezi northward to Lake Mweru.

1801. The Englishmen, Sir John Truter and William Somerville, explored Bechuanaland and penetrated the interior almost as far as Lake Ngami.

1802-1811. The Portuguese, Pedro Baptista and A. José, crossed the continent from Angola to Tete on the Zambezi

1805. MUNGO PARK EXPLORED THE NIGER as far as the Bussa Rapids, where he was drowned

1807, 1811. The British government abolished the slave trade.

1812-1814. A Swiss, J. L. Burckhardt, advanced up the Nile and crossed to the Red Sea

1815. France abolished the slave trade. Other countries (notably Spain and Portugal) followed suit, under British pressure

1818. G. Mollien discovered the sources of the Gambia and Senegal.

1820-1822. Egyptian campaigns on the upper Nile. Khartum founded (1823)

1822-1825. Walter Oudney, Dixon Denham, and Hugh Clapperton journeyed from Tripoli across the desert to Lake Chad and thence westward to the Niger, proving that the river had no connection with the lake.

1825. Alexander G. Laing crossed the desert from Tripoli to Tuat and thence to Timbuktu, the first modern to visit the latter city

1827. René Caillé reached Timbuktu from French Guinea and proceeded thence to Fez

1827. Linant de Bellefonds ascended the Nile to lat. 13° 6′ north

1830-1834. Richard Lander explored the lower Niger from Bussa to the sea

1831-1833. Edouard Ruppell explored northern Ethiopia.

1837-1848. Extensive researches of A. T. d'Abbadie in Ethiopia.

1839. An Egyptian force, accompanied by G. Thibaud, ascended the Nile to lat 6° 30′ north

1840-1843 C. T. Beke mapped much of Ethiopia.

1848-1863. J. Petherick carried on extensive investigations in the Niam-Niam country.

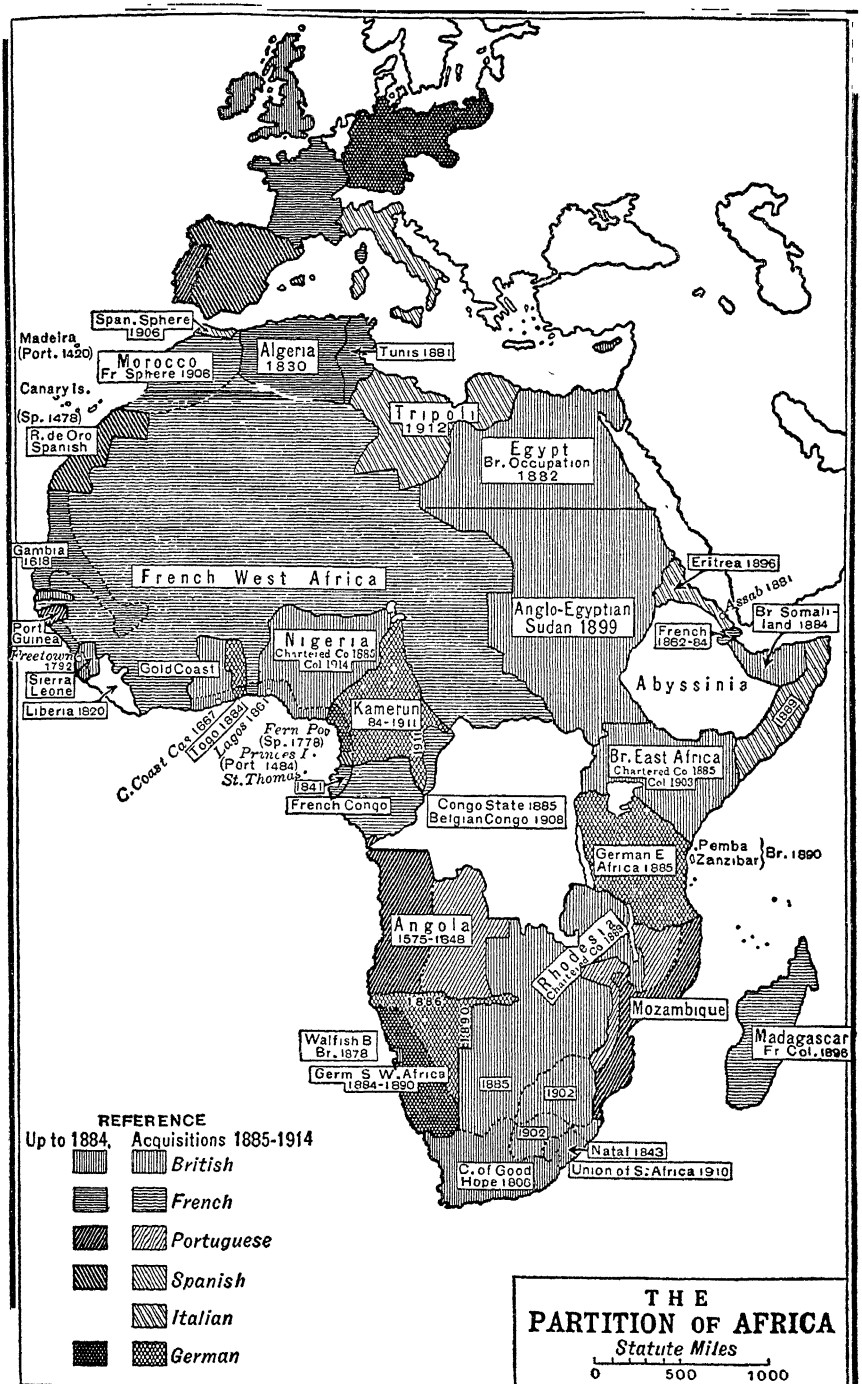
1849. DAVID LIVINGSTONE crossed the Kalahari Desert and advanced to Lake Ngami, returning (1850) to the upper Zambezi

1849-1853 Heinrich Barth and A. Overweg crossed from Tripoli to the Niger and Lake Chad, thoroughly studying the country for the first time

1853-1856. LIVINGSTONE CROSSED THE CONTINENT from the Zambezi to Loanda and return, discovering the Victoria Falls.

1853. The Portuguese, Silva Porto, crossed the continent from Benguella to the mouth of the Rovuma River.

1858-1859. Richard Burton and John Speke discovered Lake Tanganyika and Victoria Nyanza, Speke concluding that Victoria Nyanza was the source of the White Nile.



1858-1861. THIRD EXPEDITION OF LIVINGSTONE, who traveled from the Zambezi to the interior and discovered Lake Nyasa (1859)

1860-1863. SPEKE AND GRANT passed through Uganda, reached the Nile and descended it to Gondokoro, where they met Sir Samuel Baker (1863) who had ascended the river to that point.

1864. Baker, continuing up the Nile, discovered Albert Nyanza, whence he returned to Gondokoro

1865. Extensive exploration of the Benue-Niger region by Gustav Rohlfs.

1866-1871. LIVINGSTONE traveled from the mouth of the Rovuma inland to Lake Nyasa and thence to Lake Tanganyika and Bangweolu, whence he returned to Tanganyika.

GEORGE PHILIP AND SON, LTD.

1868. St. Vincent Erskine explored the region of the **Limpopo River.**

1868-1871. G. SCHWEINFURTH went from Khartum to the Niam-Niam country and discovered the **Welle River,** flowing west

1870. **Gustav Nachtigal** explored the **Chad region** and crossed from there to Egypt

1871. **HENRY M. STANLEY,** searching for Livingstone, found him on Lake Tanganyika Death of Livingstone (May 1, 1871).

1874. **V. L. Cameron crossed the continent** from Lake Tanganyika to Benguella, mapping large territories

1874-1877. **STANLEY CIRCUMNAVIGATED VICTORIA NYANZA,** proceeded thence to Lake Tanganyika, crossed to the **Lualaba,** which he **descended to the Congo,** ultimately reaching the Atlantic coast

1874 **Charles Chaillé-Long** traced the course of the **Somerset Nile** and discovered **Lake Kioga.**

1875. **Savorgnan de Brazza** explored the region of the Ogowe and lower **Congo.**

1876 **Foundation of the International Association for the Exploration and Civilization of Africa,** under the auspices of **Leopold II** of Belgium

1877 The Portuguese, **Serpa Pinto,** crossed from Benguella to Natal

1879-1886. **Wilhelm Junker** demonstrated that the Welle River was part of the Congo system and carried on extensive researches about Lake Albert

1879-1884. **Stanley,** in the service of Leopold, ascended the Congo and established posts in the Basin

1878-1881. **Joseph Thomson** explored the region between Lakes Nyasa and Tanganyika

1880-1886. **HERMANN VON WISSMANN** explored the **Congo Basin** and twice crossed the continent

1882 The Italians, **Matteucci and Massari,** crossed the continent from **Suakin** on the Red Sea to the **Niger River.**

1882. **Wilhelm Junker** explored the **Ubanghi River** system

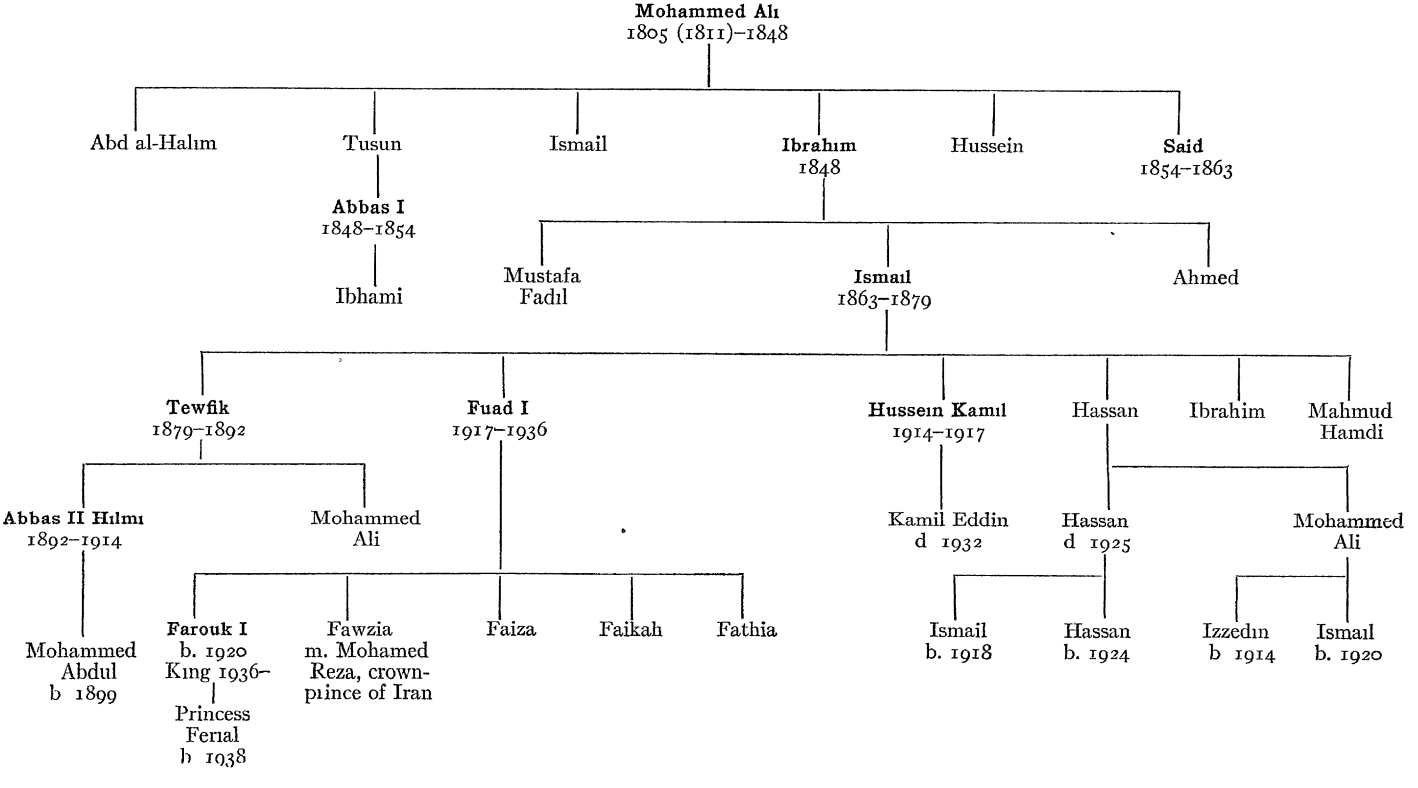
1887-1890. **STANLEY'S EXPEDITION TO RELIEVE EMIN PASHA** (Eduard Schnitzer, Egyptian governor of Equatoria, 1877–1888). Stanley ascended the Congo, crossed to the great lakes, traced the **Semliki River** to **Lake Edward,** which he discovered. He found Emin on the upper Nile and induced him to leave for the east coast

1888. **Count Samuel Teleki,** a Hungarian scientist, discovered **Lakes Rudolf** and **Stephanie.**

1892-1895. **V. Bottego** explored the **Juba River.** Later explorations have been chiefly of a scientific nature with the object of filling out the map and supplementing the work of earlier travelers

2. EGYPT AND THE SUDAN

1805. **Mohammed Ali** appointed **governor of Egypt** by the sultan Mohammed (b. 1769) was a tobacco merchant from Kavalla, who had come to Egypt in 1799 in command of an Albanian contingent. By intervening freely in the intrigues of the Turkish officials and the Mamluks and supporting the latter, he succeeded in driving out the Turkish governor and establishing his own power, which the sultan recognized only with reluctance



1807 **British invasion** and occupation of Alexandria The British failed to make further progress and withdrew (p 593).

1811, Mar. 1. **Massacre of the Mamluks** in the citadel of Cairo They had obviously been intriguing against Mohammed and were probably supported by the sultan. Mohammed invited them to a banquet and had them treacherously slaughtered Only a few escaped to upper Egypt Thereafter **Mohammed was supreme.** Though illiterate, he was a firm believer in western technique and reorganized the country administratively on the French model. In time he built up a powerful army (organized by Col **Sèves,** or Soliman Pasha) and a substantial fleet. In order to secure the necessary funds, he gradually took over most of the land, organized **state monopolies** of trade, introduced the **culture of cotton and hemp,** and developed the **irrigation system** (Delta Barrage)

1815. **Revolt of the Albanian regiments,** which resented Mohammed's efforts at Europeanization Mohammed was forced to flood Cairo, but the revolt was ultimately repressed and the mutinous troops sent to upper Egypt.

1818. Conclusion of seven years of **war against the Wahabis** in Arabia, who had occupied Mecca and Medina and threatened Syria. The campaign was undertaken at the behest of the sultan. The result

Khedives and Kings of Egypt since 1811

was the subjection of the eastern coast of the Red Sea to Egyptian rule.

1820-1822. CONQUEST OF THE SUDAN (Nubia, Senaar, Kordofan) by Egyptian forces under Mohammed's son Hussein The primary object of the campaign was to find gold supplies and slaves **Khartum founded** (1823)

1823-1828. Mohammed Ali's intervention in behalf of the sultan against the insurgents **in Greece.** Campaigns of Mohammed's son **Ibrahim** (b 1789) As a result Mohammed acquired the governorship of **Crete** (p 723)

1832-1833. WAR BETWEEN MOHAMMED AND THE SULTAN (p 724). As a result Mohammed acquired control of all **Syria** and **Adana** In the subsequent years he expanded his influence as far as the Persian Gulf, arousing the distrust and opposition of England

1833. Arrival of a group of **St. Simonians in Egypt.** Their aim was the development of the country on western lines and above all the construction of a **canal at Suez.** This latter project was opposed by Mohammed Ali for fear of its international implications

1839-1841. SECOND WAR BETWEEN MOHAMMED ALI AND THE SULTAN (p 725). Due to the intervention of the powers, **Mohammed lost Crete and Syria,** but secured the **hereditary tenure of Egypt,** paying tribute to the sultan and accepting a reduction of the army to 18,000 men (firmans of Feb. 13 and June 10, 1841)

1847. Regency of Ibrahim, following the mental derangement of Mohammed Ali in his later years In July, 1848, Ibrahim was formally invested as khedive.

1848, Nov. 10. Death of Ibrahim.

1849, Aug. 2. Death of Mohammed Ali.

1848-1854. ABBAS I, khedive He was a grandson of Mohammed Ali and was born in 1816. His reign was characterized by hostility to European and especially French influence and by a more subservient attitude toward the sultan He was assassinated by his opponents at court (July 13, 1854)

1854-1863. MOHAMMED SAID, khedive He was the youngest son of Mohammed Ali (b 1822), an enlightened ruler friendly to western penetration. He took **steps to suppress slavery,** abandoned the state ownership of land, ended the system of monopolies, and reorganized the administration along liberal lines. During his reign the **first foreign loan** was contracted (£3,000,000, floated by British bankers).

1854, Nov. 30. Suez Canal concession granted to **Ferdinand de Lesseps,** a French diplomat and promoter and a friend of Said's of long standing

1857. Completion of the **railroad from Alexandria to Cairo.** This was later extended to Suez

1858. Organization of the Suez Canal Company, which raised a loan of 200 million francs

1859, Apr. 29. Work was begun on the Suez Canal. The project had been vigorously opposed by the British (Lord Palmerston) at every step, because of its French connections and because of the supposed threat to India

1863-1879. ISMAIL, khedive. He was the son of Ibrahim and was born in 1830 Partly educated in France, he had traveled widely in Europe and set himself to complete the **modernization of Egypt.** In his first years the Civil War in America created a great demand for Egyptian cotton and resulted in widespread prosperity Ismail took advantage of this and of the readiness of European interests to lend huge sums of money (at usurious rates of interest) to carry through immense **public works** — Suez Canal, irrigation canals, railroads, telegraphs, harbor works, bridges, etc Most notable was the development of **primary schools,** which increased from 185 to 4685 during his reign On the other hand, Egypt was confronted with a tremendous public debt.

1865. Ismail induced the sultan to put under Egyptian control the ports of **Suakin** and **Massawa** on the Red Sea, the beginning of a systematic expansion in that direction

1869, Nov. 17. OFFICIAL OPENING OF THE SUEZ CANAL; presence of the Empress Eugénie, Emperor Francis Joseph, and many other European celebrities

1870-1873. Sir Samuel Baker, in Egyptian service, completed the **conquest of the upper Nile region,** as far as Unyoro, and initiated the **suppression of the slave trade,** which had seriously depopulated the country

1872-1875. Occupation of the Red Sea coast and Harrar The Egyptian control was extended as far as Cape Guardafui and cut off Ethiopia from access to the sea

1874. Zobeir, a powerful former slave-trader of the Sudan, **conquered Darfur** for the khedive

1874-1879. Gen. Charles Gordon governor-general of the Sudan. He

completed the work of Baker, established posts on the upper Nile and dealt the slave-traders a mortal blow.

1875, Nov. The khedive, in financial stringency, **sold his 176,000 shares in the Suez Canal Company to the British government** for 100,000,000 francs The British government thereupon became the largest single shareholder.

1875-1879. War with Ethiopia. The Egyptians were at first defeated, but won a crushing victory in Feb 1876

1876, Apr. 4. Publication of the **report of Mr. Stephen Cave** on the finances of Egypt The khedive was accused of unwise borrowing and spending and some measure of European supervision was declared indispensable

May 2. Establishment of the Caisse de la Dette to manage the service of the debt

Nov. 18. Appointment of a British and a French controller, following reduction of the debt and of interest. **Anglo-French condominium.**

1878, Aug. 15. Appointment of a **ministry under Nubar Pasha,** with an Englishman (**Sir Rivers Wilson**) as minister of finance, and a Frenchman (**M. de Blignières**) as minister of public works A vigorous effort was made to meet the demands of the European creditors, with resulting hardship on the country and much discontent and hatred of foreigners

1879, Feb. 18 Fall of the Nubar ministry after a demonstration of army officers, possibly encouraged by Ismail, who resented the curtailment of his own power.

June 25. Deposition of Ismail by the sultan, under pressure from the European powers He left Egypt and died in exile at Constantinople (1895)

1879-1892. TEWFIK, khedive.

1879, Sept. 4. The European controllers were reappointed and henceforth were to be irremovable without the consent of England and France

1880, July 17. The Law of Liquidation, promulgated after another international investigation It rearranged the finances and provided that all surplus should go to the service of the debt

1881, Feb. 1. Rising of Egyptian officers, following the dismissal of one of their number. The officers forced the resignation of the Circassian war minister and the appointment of **Mahmud Sami,** a nationalist, in his place. The movement was led by **Ahmed Arabi** and was the first definite expression of the new **nationalist movement,** inspired by **Jamal ud-Din el-Afghani,** famous Moslem teacher (at Cairo after 1871) who preached resistance to the west and adoption of western political methods for purposes of defense. The national movement in Egypt was primarily directed against foreign control and against the Turkish influence, but also centered on a demand for constitutional government

Sept. 9. A second rising, led by Arabi, forced the khedive to revoke the dismissal of Mahmud Sami

1882, Jan. 8. The Gambetta Note, handed to the Egyptian government by France and England It pronounced in favor of the khedive and was intended to strengthen him against nationalist pressure. Its effect was merely to discredit him, since the British refused to follow up the note by any concrete action

Feb. 5. The khedive was obliged to appoint **a nationalist ministry** under Mahmud Sami, in which Arabi became war minister. The ministry began discussion of a constitution

Apr. 12. A conspiracy of Circassian officers against the government was discovered and many were arrested.

May 2. Forty of **the conspirators were condemned to exile** in the Sudan The khedive thereupon appealed to the powers for support and the ministry summoned the Chamber, evidently with the idea of deposing Tewfik.

May 20 British and French squadrons appeared **at Alexandria** as a demonstration in behalf of the khedive

May 25. An ultimatum from England and France forced the resignation of the nationalist government, under protest

May 28. The khedive, unable to find another government, was **obliged to recall Arabi** and the nationalists

June 12. Outbreak of riots at Alexandria, in which some 50 Europeans were killed. These riots have been attributed by some to the khedive, as part of a scheme to force intervention in his behalf.

June 23. Opening of an **ambassadorial conference at Constantinople,** to discuss the modalities of Turkish intervention under the supervision of the powers.

July 11. **BOMBARDMENT OF ALEXANDRIA** by the British under Adm **Sir Beauchamp Seymour.** The ostensible object was to destroy the earthworks which the nationalists were throwing up The French government refused to take part in the action, fearing international complications The British thereupon began to land troops and to send a force to protect the Suez Canal The French and also the Italians refused invitations to participate

Sept. 13. The British under **Sir Garnett Wolseley, defeated the Egyptian forces** of Arabi at **Tel el-Kebir.**

Sept. 15. **THE BRITISH OCCUPIED CAIRO.** Arabi surrendered; he was later tried and banished to Ceylon

Nov. 9. **The dual control** of Britain and France **was abolished.**

1883, Jan. 3. **Granville Circular** to the powers, declaring England's desire to withdraw her forces from Egypt *"as soon as the state of the country and the organization of proper means for the maintenance of the khedivial authority will admit of it"*

Feb. 6. **Dufferin Report,** proposing the reorganization of the Egyptian government

May 1. **THE ORGANIC LAW,** embodying the Dufferin proposals, went into effect in addition to the cabinet there was to be a **legislative council** composed of nominees of the khedive and members elected by the provincial assemblies, a **general assembly** was to include the ministers and legislative council and additional members chosen by the provincial and town governments Neither the council nor the assembly had more than advisory power, the real authority resting with the khedive and through him with the British representative

1883-1907 **SIR EVELYN BARING** (1892 — **Lord Cromer**) **resident** and consul-general Cromer's rule was that of a strong man, who ordered the finances, developed the economic power of the country, revised taxation, abolished the corvée, etc., though doing little for popular education or for the development of self-government British advisers were appointed for all important native officials and exercised an ill-defined but effective control

1883, Nov. 5. **Battle of El Obeid.** Gen **Hicks,** with an Egyptian force, was completely defeated and his army wiped out by the forces of the **Mahdi Mohammed Ahmed** of Dongola, who set himself up as a prophet and organized a great movement throughout the Sudan directed against the baneful Egyptian rule Throughout 1882–1883 he had fought with varying success against the Egyptians until his victory at El Obeid gave him control over Kordofan **Slatin Bey** and **Lupton Bey,** governors of Darfur and Bahr-el-Ghazal respectively, were soon obliged to surrender, only **Emin Pasha** retaining his position in Equatoria **Osman Digna,** ablest of the lieutenants of the Mahdi, carried on a vigorous offensive against the Red Sea ports

1884, Jan. 6. The British obliged the reluctant Egyptian government to decide on the **evacuation and abandonment of the Sudan**

Jan. 18 **Gen Charles Gordon** was sent out to effect the evacuation of the Egyptian garrisons He reached Khartum on Feb 18 and offered remission of taxes, non-interference with the slave trade, and recognition of the Mahdi as sultan of Kordofan, his idea being to re-establish the local chiefs in their positions under Egyptian suzerainty These offers were rejected by the Mahdi, who continued his conquests

June 28-Aug. 2. **International conference** on Egyptian finance at London The British proposed the reduction of interest on the debt and the use of the surplus revenue to meet the heavy charges of the Sudan campaigns The powers rejected these suggestions, Bismarck working closely with Jules Ferry to frustrate the British (p 738)

Sept. 18. **The British suspended the sinking-fund payments,** but were obliged by protests of the powers and a decision of the mixed tribunals to give up this course of action

1885, Jan. 26. **THE MAHDI TOOK KHARTUM,** massacring Gordon and the garrison A relief force, sent out from Wadi Halfa (Aug 1884), reached the city just too late

Mar. 27. **An international conference at Paris** accepted the French proposals regarding the financial problem — reduction of interest and a loan under international guaranty Thus **international control** was in some measure retained, giving France in particular ample opportunity to impede the British policy

June 21. **Death of the Mahdi,** who was succeeded by the **Khalifa Abdullah el Taashi.** On July 30 the dervishes (followers of the Mahdi) took the key position of **Kassala,** completing their control of the whole Sudan except for the Red Sea fortresses In that region and along the new

Egyptian frontier at Wadi Halfa, fighting continued throughout the next ten years.

1887, May 22 Drummond-Wolff Convention between Turkey and Great Britain The British promised to evacuate Egypt within three years provided conditions were favorable, but retained the right to reoccupy the country if it were menaced by invasion or internal disorder Under pressure from France and Russia the sultan refused to ratify this convention and the British became more and more convinced that they must remain in the country for some time

1888, Oct 29 SUEZ CANAL CONVENTION (Treaty of Constantinople) signed by Great Britain, France, Germany, Italy, Austria, Spain, the Netherlands, Russia, and Turkey, after an international conference at Paris in 1885 had failed to establish a régime for the canal The **Convention of 1888** declared the canal free and open to merchant and war vessels of all powers in time of war as in time of peace, the canal was not to be blockaded and no acts of hostility were to be committed within its confines, but the sultan and khedive were to be free to take such measures as they "*might find necessary for securing by their own forces the defense of Egypt and the maintenance of public order*" The British government **reserved the application of the convention** in so far as "*they might fetter the liberty of their government during the occupation of Egypt by their forces*" The treaty therefore did not actually go into effect

1892-1914. ABBAS HILMI II, son of Tewfik, khedive He was a young and headstrong man who resented the tutelage of the British and, relying on French support, attempted to shake off the domination of Lord Cromer This led to much friction and an acute **crisis in Jan. 1893,** in which Cromer asserted British authority to the full and increased the forces of occupation

1896-1898 RECONQUEST OF THE SUDAN by Gen **Lord Kitchener** (of Khartum) This was due less to indignation at the conditions under dervish rule than to a growing realization of the importance of the Sudan to assure and increase the Egyptian water-supply, and further to the constant advance upon the Sudan of forces of the Belgian Congo and of France For the international aspects of the Nile problem see p 748

1896, Sept. 21. Kitchener took Dongola. He proceeded with the greatest caution, building a railroad as he advanced

1897, Aug 7. The Egyptians took Abu Hamed.

1898, Apr. 8. Kitchener's victory at the **Atbara River.**

Sept. 2. BATTLE OF OMDURMAN; decisive defeat of the Khalifa, who fled The Egyptian forces took Khartum

Sept. 19. Kitchener reached Fashoda and found the French under Maj **Marchand** in occupation For the **Fashoda crisis** see p 748

1899, Jan. 19. An Anglo-Egyptian Convention established a condominium in what became known as **the Anglo-Egyptian Sudan.**

Mar. 21. Convention between Britain and France ending the Fashoda crisis The French were definitely excluded from the Bahr-el-Ghazal and from all contact with the Nile

Nov 24. Defeat and death of the Khalifa, who had been pursued into Kordofan by **Sir Reginald Wingate.**

1902, May 15. Treaty between Britain and Ethiopia, by which the latter accepted a frontier with the Sudan well removed from the Nile

Dec Opening of the Aswan Dam, first of the great storage reservoirs on the upper Nile

1904, Apr. 8 The Anglo-French entente cordiale finally brought to an end the French obstruction of British policy in Egypt. Great Britain recognized the Suez Canal Convention as in full force

1906, May 3 A British ultimatum to Turkey obliged the latter to renounce claims to the **Sinai Peninsula,** which became Egyptian territory

May 9. Agreement between Britain and King Leopold as sovereign of the Congo After years of friction, Leopold gave up his claims to the Bahr-el-Ghazal (under the Treaty of 1894), but was given the **Lado Enclave** on the upper Nile for the duration of his life

June 13. The Denshawi affair. Several British officers, on a pigeon-shooting expedition, were attacked by natives and one was killed The episode revealed popular hatred of foreign rule, and the punishment of the culprits, which was made a demonstration, served to arouse Egyptian national feeling

1907-1911. SIR ELDON GORST, resident and British consul-general, on the retirement of Lord Cromer (d 1917) Gorst attempted a more lenient policy, established friendlier relations with the khedive and encouraged popular education.

1907, Dec. 7. First Nationalist Congress and organization of a Nationalist party under leadership of **Mustapha Kamel.** The program was a liberal, pacific, and cultural one

1908, Feb. 10 Death of **Mustapha Kamel,** aged only 34, a great loss to the reviving nationalist movement

Nov. 12. The khedive, possibly to counteract the nationalist movement, appointed as premier a Christian Copt, **Butros Ghali.** This led to violent Islamic agitation

1909, Mar. 25. The government instituted a system of **press censorship** and supervision to check the extravagances of the Nationalists

July 4. A law of police supervision enabled the government to exile undesirable agitators

1910, Feb. 20. Assassination of Butros Ghali by a Nationalist fanatic The trial and execution of the assassin brought the unrest to a new pitch

June 16. On the death of Leopold II, the **Lado Enclave reverted to the Sudan.**

1911-1914. LORD KITCHENER, resident and consul-general on the death of Sir Eldon Gorst. He proceeded vigorously against disorderly agitation, but at the same time attempted to satisfy Egyptian opinion by liberal concessions.

1913, July 21 The government introduced a **new electoral law and a new constitutional system**: the old general assembly was abolished and all popular authority vested in a new legislative assembly, largely elective, which was given the power to initiate legislation and wide powers of supervising the budget, etc.

1914, Jan. 22-June 17. Meeting of the first assembly, which was then suspended during the World War

Nov 6. Proclamation of a **state of war with Turkey.**

Dec. 18. Declaration of a British protectorate over Egypt.

Dec. 19. Deposition of Abbas II, who was accused of intrigue with the Sultan of Turkey and of anti-British designs.

1914-1917. HUSSEIN KAMIL (uncle of Abbas II), proclaimed *sultan.*

(*Cont pp* 919*f*, 1081)

3. ETHIOPIA AND THE RED SEA AREA

1855. **Ras Kassa** succeeded in deposing **Ras Ali of Gondar** and thereupon conquered the rulers of Tigré, Gojjam, and Shoa, making himself king of kings, under the throne name of *Theodore.*

1855-1868. THEODORE, emperor He was supported by the Englishmen **Walter Plowden** and **John Bell** in suppressing his rebellious subordinates.

1862, Mar. The French acquired the port of **Obock** from the Sultan of Tajura

Oct. After Plowden's death Theodore, through the envoy, British consul, **C. D. Cameron,** proposed an **alliance with England** against the Turks Through an oversight no reply was made to this proposal, and Theodore, deeply offended, threw Cameron and other European traders and missionaries into prison at Magdala (Jan. 1864).

1866, Jan. Theodore received Hormuzd Rassam, a British envoy, but threw him also into prison Several ultimata from the British government failed to reach him.

1868. EXPEDITION OF SIR ROBERT NAPIER and an Anglo-Indian force to Ethiopia Napier proceeded with great caution, but found much support from local chiefs, estranged by Theodore's boundless vindictiveness and cruelty.

Apr. 10. Battle of Arogee. Theodore was defeated and committed suicide

Apr. 13. The British stormed Magdala and released the prisoners, after which Napier withdrew from the country, which relapsed into anarchy

1869. The Italian **Rubattino Company** bought the port of **Assab** on the Red Sea, to be used as a station on the new Suez-Red Sea route.

1872-1889. JOHANNES IV (ruler of Tigré), king of kings.

1872-1874. Egyptian occupation of the Red Sea coast, as far as Cape Guardafui

1875-1879. War between Ethiopia and Egypt, in which the Egyptians were successful, cutting off Ethiopia from the sea.

1882. Johannes, having defeated **Menelek,** King of Shoa, made a pact with him and designated him as his successor.

1882. The Italian government took over Assab, which became the kernel of the colony of Eritrea.

1884. Following the Egyptian withdrawal from the Sudan and the Red Sea coast, England established a protectorate over part of the Somali coast, with Zeila as the chief port The French at the same time expanded their station at Obock into a French Somali protectorate.

1885, Feb. 6. The Italians, encouraged by the British, established themselves at Massawa, whence they at once began a policy of expansion into the highlands of the interior

1887-1889. War of Johannes against the Italians. The Ethiopians attacked Massawa and on Jan 26 annihilated an Italian force in the battle of Dogali. The Italians were saved by the attacks of the Mahdist forces in northern Ethiopia, which diverted Johannes

1887. The French transferred the seat of their protectorate from Obock to Jibuti, commanding the chief caravan route to Ethiopia

1888, Feb. The British and French made an agreement regarding their spheres in Somaliland and engaged not to expand into Harrar.

Dec. Revolt of Menelek of Shoa against Johannes He was supported by the Italians, to whom he promised parts of northern Ethiopia in return for munitions

1889, Mar. 12. Death of Johannes, killed in the battle of Metemma against the Mahdists Menelek's succession was disputed by Ras Mangasha, son of Johannes The Italians supported Menelek and took over Keren and Asmara by way of reward

1889-1911. MENELEK, emperor

May 2. TREATY OF UCCIALLI between Italy and Menelek, from which the Italians derived a claim to a protectorate over all Ethiopia A supplementary agreement (Oct 1) gave Menelek a loan on the security of the Harrar customs, Harrar to revert to the Italians in default of interest payments.

Aug. 3. The Italians secured from the Sultan of Zanzibar the entire Benadir coast from Kismayu to Cape Guardafui

1890. The Italian Red Sea possessions were organized as the colony of Eritrea.

1891, Feb. 9. Menelek, having subdued Ras Mangasha, denounced the Italian claims to a protectorate, which were unjustified according to the Amharic text of the Treaty of Uccialli

Mar. 24, Apr. 15 Two Anglo-Italian agreements defined the frontiers of their Red Sea colonies England recognized the Italian protectorate over the whole of Ethiopia to within 100 miles of the Nile and Italy agreed not to interfere with the water-supply of the Atbara River

Apr. 10. Menelek's circular to the powers, claiming all territory to the Nile and to Lake Victoria.

1893, May 15. The Italian government leased Italian Somaliland to the Filonardi Company for exploitation

Dec. The Italians defeated and threw back the Mahdists who had attacked Eritrea

1894, Mar. 9. Menelek granted to his Swiss adviser, Alfred Ilg, a concession for a railway from Jibuti to the new capital, Addis Ababa, and thence westward to the Nile

May 5. Another Anglo-Italian agreement abandoned Harrar to Italy (despite the Anglo-French agreement of 1888), but gave Britain the freedom to act there until Italy should take it over.

July 17. The Italians took Kassala from the dervishes

1895, Mar. 25. The Italians began their advance into Ethiopia and took Adigrat.

Sept. Menelek declared war against the Italians.

Dec. 8. Defeat of the Italians at Amba Alagi.

1896, Mar. 1. BATTLE OF ADUA. An Italian force of some 20,000 was annihilated by some 80,000 Ethiopians under Menelek (p 745).

Mar. 18. The Italians repulsed a vigorous attack of the dervishes on Kassala.

Oct. 26. Treaty of Addis Ababa between Ethiopia and Italy, the Italians recognizing the independence of Ethiopia and restricting themselves to their coastal possessions.

1897, Mar. 20. Treaty between Ethiopia and France, defining the Somali frontier The French influence at Addis Ababa was at its height at this time and the French hoped to use Ethiopia as a base for the advance on the Nile.

May 14. Treaty of Ethiopia with Great Britain (Rodd Mission), the British abandoned much of the territory claimed in Somaliland, but failed to get Menelek to surrender his claims toward the Nile.

Dec. 25. The Italians, hard pressed by the dervishes, **ceded Kassala** to the Egyptians.

1898, June 22. An Ethiopian force, accompanied by a French mission, **reached the Nile,** but was unable to effect contact with Marchand coming from the west Other Ethiopian armies pushed to the north and south and brought all the highland territory under Menelek's control, thus founding the **modern Ethiopian Empire**

1899, Sept. Rise of the "Mad Mullah," Mohammed ben Abdullah, a Somali chief who proclaimed himself Mahdi and began systematic raids on the British and Italian possessions

1900, July 10. An Ethiopian-Italian agreement defined the frontier of their respective territories.

1901, Dec. 7. Anglo-Italian agreement defining the frontier of the Sudan and the Italian possessions There were many supplementary agreements

1902, Feb. 6. The French government agreed to subsidize the **Jibuti-Addis Ababa railroad** enterprise This led to strong protests from Britain and Italy, which demanded the internationalization of the line

Mar 18. Agreement between England and Ethiopia regarding the **Nile water-supply,** and an eventual dam at Lake Tana

May 15. Anglo-Ethiopian agreement regarding the **Sudan frontier;** Menelek gave up all claim to territory bordering the Nile

1905, Mar. 5. After years of campaigning by England, Italy, and Ethiopia against the Mad Mullah, an agreement was reached with him allowing him territory in Italian Somaliland

Mar. 16. The Italian government took over Somaliland from the Filonardi Company

1906, July 4. TRIPARTITE PACT between Great Britain, France, and Italy· they declared for the independence and integrity of Ethiopia and engaged not to interfere, but for the event of the situation becoming untenable they defined **spheres of influence** (Lake Tana region to England, the railway zone to France; a crescent-shaped belt of territory connecting Eritrea with Italian Somaliland to the west of Addis Ababa to Italy). Britain and Italy were given seats on the board of the railway company Menelek protested against the implications of the treaty and reserved his sovereign rights (Dec 10)

1907, Oct. 26. Menelek, stricken by partial paralysis, organized a cabinet to assist him

Dec. 6. An agreement between England and Ethiopia defined the frontier with **Uganda** and **East Africa.**

1908, June. Menelek named his grandson, **Lij Yasu** (12 years old), as his heir, with **Ras Tessama** as regent As Menelek became more and more helpless, a three-cornered struggle for influence developed between the supporters of Lij Yasu and those of the Empress Taitu and those of Ras Tessama For several years the empress was supreme **Growing influence of the Germans** during this period

1908. Resumption of the raids of the Mad Mullah. The British withdrew to the coast, but sporadic fighting continued until 1920, when the Mullah died (Nov 23)

1911, May 15. LIJ YASU PROCLAIMED EMPEROR, on the death of Ras Tessama

July 15. An Anglo-Italian agreement defined the boundary of **Italian Somaliland** and **British East Africa** at the mouth of the Juba River.

Dec. 12. Death of Menelek.

1916, Apr. Lij Yasu announced his conversion to Islam. This aroused a storm of opposition among the local chiefs, who were supported by the British, French, and Italian representatives, who regarded Lij Yasu as a tool of the Germans and his conversion as a step in the direction of an alliance with Turkey and Germany

Sept. 27. Lij Yasu was deposed by the head of the Ethiopian Church and fled to the Danakil country

1916-1926. The **EMPRESS ZAUDITU** (Judith), a daughter of Menelek, was proclaimed queen of kings, with Ras Tafari as heir The intestinal struggles in Ethiopia continued for several years

1918, May 21. Completion of the railroad from Jibuti to Addis Ababa (begun in 1897). (*Cont p* 1085)

4. NORTHERN AFRICA

Morocco, Algeria, Tunisia, Libya

At the beginning of the 19th century these territories were all (except Morocco) more or less under the suzerainty of the Ottoman Porte, but the local rulers were to all intents and purposes independent They engaged freely in **piratical enterprises** against European commerce in the Mediterranean and made the coast towns veritable slave emporia Their territories were organized on a tribal basis and their authority did not run far from the coast Disorder, poverty, and general backwardness were characteristic of the entire area

1816. Commissioned by the Congress of Vienna, the **British bombarded Algiers** and obliged the dey to put an **end to Christian slavery**

1827. The French consul at Algiers was slapped in the face with a fly-whisk by the dey, who ignored repeated French demands for satisfaction

1830, July 5. A FRENCH EXPEDITIONARY FORCE, after a short campaign, **took Algiers** and deposed the dey A few other coast towns were occupied, but the French seem to have been uncertain of their own further plans.

1832-1834. Attacks upon the French by **Abd el-Kader** of Mascara, proclaimed *dey* by the native chiefs After suffering several setbacks, the French recognized him as **Dey of Mascara.**

1835. A Turkish force landed at Tripoli, put an end to the independence of the country, and replaced the last Karamanli ruler by a Turkish governor.

1835-1837. Second war of the French with **Abd el-Kader.** The French were repeatedly defeated

1837, May 30. By the **Treaty of Tafna,** the French abandoned most of the hinterland of Algeria to Abd el-Kader

1840, Dec. Outbreak of the **third war with Abd el-Kader** The French sent a large expeditionary force under **Marshal Bugeaud,** who began the systematic subjugation of the interior

1841. Abd el-Kader was driven across the frontier into Morocco, where he secured the aid of the sultan

1844, Aug. 6. The French, under the Duke of Joinville, began **hostilities against Morocco,** bombarding **Tangier** and occupying **Mogador**

Aug. 14. Battle of Isly. Bugeaud completely defeated Abd el-Kader and the Moroccans.

Sept. 10 Treaty of Tangier, concluding the war of the French against Morocco. The French withdrew.

1845, Mar. 18. Convention of Lalla Maghnia, fixing the boundary between Algeria and Morocco on the Mediterranean coast

1847, Dec. 23. Abd el-Kader surrendered to Gen Lamoricière Contrary to promise, he was sent a prisoner to France He was released in 1852 by Napoleon III and died at Damascus in 1883

1848. Algeria was organized as three departments, represented in the French parliament This system was revoked by Napoleon III, who restored military rule Continued insurrections in the interior obliged the French to continue operations By 1870 they had subjugated the central part of present-day Algeria

1863. An important land law recognized private ownership in Algeria and did much to break up the tribal organization The French made staunch attempts to settle the country with military colonists, but with indifferent success

1869. The Bey of Tunis, having borrowed heavily in Europe and having failed to meet his obligations, was obliged to accept an **international financial control** of England, France, and Italy.

1878, July 8. At the **Congress of Berlin** Lord Salisbury offered the French a free hand in Tunis as compensation for the acquisition of Cyprus by Britain.

1879. Algeria was definitively put **under civil government**

1879-1881 Acute rivalry between **the French and the Italians in Tunis,** both sides struggling and intriguing for key concessions (railroad, telegraph, land grants, etc).

1881. Early French projects for a **Trans-Saharan Railway** were brought to an end with the murder of the **Flatters mission** of investigation.

1880, July 3. MADRID CONVENTION, signed by the leading European powers and the United States, by which the status and privileges of foreigners in Morocco were regulated

1881, Mar. Raids of Krumir tribes from Tunisia across the frontier into Algeria. Though there was nothing very unusual about these raids, they gave the French a convenient excuse for settling the score with the bey and concluding the competition with Italy

Apr. 30. A French naval force seized Bizerta, while a land force invaded Tunis from Algeria

May 12. TREATY OF BARDO (Kasr es-Said), by which the Bey of Tunis accepted a **French protectorate.** Loud protests from the Turkish government, from Italy and from England led to nothing, since Bismarck gave the French steady support

June 30. Outbreak of a serious **insurrection against the French** under **Ali ben Khalifa** The French were obliged to subdue southern Tunisia in a regular campaign.

July. At the same time a major **uprising against the French in Algeria** was led by **Bou Amama.** This was not suppressed until 1883

1883, June 8. The Convention of Marsa, between the French and the Bey of Tunis, gave the French effective control (through a resident-general) of Tunisian affairs

1893. Attacks of the Riff tribes of Morocco upon the Spanish possessions on the coast The Spaniards had great difficulty in maintaining themselves

1894. ABDUL AZIZ (a boy of 13) became Sultan of Morocco He was intelligent and well-intentioned, but was unable to control his powerful ministers or to keep within bounds the growing forces of European penetration By 1900 the country had fallen into complete anarchy

1896, Sept. 28. A Franco-Italian agreement brought an end to the long-drawn dispute about the **status of Italian residents in Tunis** Their nationality and that of their descendants was to be regulated by Italian law.

1898. Reorganization of the government of Algeria; decentralization of the administration; establishment of an assembly with elected members

1899, Mar. 21. Anglo-French convention defining the hinterland of Tripoli, after the Fashoda crisis. The Italians protested loudly against the large concessions to France in the Sahara

1900-1903. French occupation of the oases (Igli, Gourara Timmimun, Tidikelt, Tuat) to the southwest of Algeria These had belonged to Morocco, though the effective control of the sultan had broken down.

1900, Dec. 14 Secret Franco-Italian agreement, by which France was given a free hand in Morocco in return for a free hand for Italy in Tripoli.

1901, July 20. French agreement with Morocco giving France considerable control of the police on the frontier.

1902-1903. Growing disorder in Morocco· **rising of the pretender Omar Zarhuni.**

1904, Apr. 8. THE ENTENTE CORDIALE between England and France (p 752). This gave France a free hand in Morocco and assured her of the diplomatic support of England

May 18. Kidnaping of Mr. Perdicaris, an American citizen, by the Moroccan chieftain **Raisuli.** He was released for a ransom on June 24, but Raisuli continued for years to terrorize the country behind Tangier

Oct. 3. Franco-Spanish agreement on Morocco the northern, Mediterranean belt was reserved to Spain as a zone of influence.

1905, Jan.-Mar. Mission of St. René Taillandier to Fez, to induce the sultan to accept a far-reaching scheme of reform under French guidance.

Mar. 31. Spectacular **visit of the Emperor William II** to Tangier. Beginning of the **first Moroccan crisis** between France and Germany (p. 753)

June 3. The Sultan of Morocco invited the powers to a conference to arrange for reform

1906, Jan. 16-Apr. 7. THE ALGECIRAS CONFERENCE and the **Act of Algeciras** (p 754), giving France and Spain substantial control of Moroccan reform, but reaffirming the independence and integrity of Morocco and equality of economic opportunity. This was accepted by the sultan on June 18

1907, July 30. The French occupied Ujda (northwest Morocco) following continued disorders and the **murder of Dr. Mauchamp.**

Aug. 4. The French bombarded Casablanca and then occupied the whole Shawia region on the Atlantic coast, following serious anti-foreign outbreaks

Nov. 24. Mulai Hafid (brother of Abdul Aziz), who had been proclaimed sultan at Marakesh (May 5) was defeated by the sultan's troops

1908, Jan. 4. Mulai Hafid was proclaimed sultan at Fez.

Aug. 23. Abdul Aziz was defeated at Marakesh

Sept 3. The German government notified its intention of recognizing Mulai Hafid The other powers reluctantly followed suit (Dec 17) after Mulai Hafid had agreed to respect the Act of Algeciras and other international obligations

Sept 25. The Casablanca affair, arising from the seizure of German deserters from the French foreign legion The matter was adjusted by the Hague Court in May, 1909 (p 756)

1909, Feb. 9. FRANCO-GERMAN AGREEMENT on Morocco Germany recognized France's special political position, in return for economic concessions (p. 756)

July-Oct Attacks of the Riff tribesmen upon the Spaniards at Melilla Despite heavy losses the Spaniards began to spread in the zone reserved to them

Oct. 24. Russian-Italian agreement at Racconigi (p 757) The Russians gave the Italians a free hand in Tripoli

1910, Mar. 4. Agreement between France and Morocco. The French evacuated Udja and the sultan accepted the program of reform

1911, Apr. 2. Attack of Berber tribesmen on Fez.

Apr. 26. A French force occupied Fez on the plea of protecting foreigners

July 1. Arrival of the **German gunboat *Panther* at Agadir.** Beginning of the **second Moroccan crisis** between France and Germany (p 757).

Sept. 29 Outbreak of **war between Italy and Turkey,** following a short-term ultimatum demanding guaranties for the protection of Italians and Italian enterprises in Tripoli The war reflected Italy's determination to secure compensation for the French advance in Morocco (p. 758)

Nov. 4. Franco-German agreement regarding Morocco. In return for compensation in the French Congo, the Germans gave the French a free hand in Morocco (p 758).

Nov. 5. The Italians proclaimed the **annexation of Tripoli and Cyrenaica,** though only a few coastal towns had been taken

1912, Mar. 30. TREATY OF FEZ The sultan was obliged to accept a **French protectorate.**

May 24. Gen. Lyautey appointed resident-general in Morocco. By his judicious policy rapid strides were made in the restoration of order and the recognition of French authority.

Aug. 11. Mulai Hafid abdicated rather than rule as the client of France. He was succeeded by **Mulai Yusuf.**

Oct. 18. The Treaty of Lausanne brought the Tripolitan War to a close The Turkish sultan abandoned Tripoli, but retained religious authority (p. 759)

Nov. 27. Franco-Spanish agreement, defining the position of the Spanish zone in Morocco in relation to the French protectorate and establishing a **special status for Tangier.**

1913. Italian subjugation of the interior of Tripoli (Libya)

1914, Sept. Outbreak of a formidable **insurrection among the Arabs** (Senussi) of Libya On the entry of Italy into the World War (May, 1915) the movement assumed ever larger dimensions The Italians were obliged to withdraw from the interior and during the war held only the towns of **Tripoli** and **Homs** on the coast. **Misurata** and other ports were used as German submarine bases. (*Cont. p* 1086.)

5. WEST AFRICA AND THE SUDAN

French West Africa, Gambia, Sierra Leone, Gold Coast, Togoland, Nigeria, Cameroons, Rio de Oro, Portuguese Guinea

At the beginning of the 19th century the Portuguese, Spanish, French, British, Dutch, Danes, and Swedes all had forts or posts on the coasts of West Africa, engaged in the slave trade and in trade in gold, ivory, and oil With the abolition of the slave trade many of these stations languished and were abandoned The interior of the country had to a large extent been conquered by **Tukulor chiefs** with the aid of the pastoral Fulani tribes Various Tukulor sultans (Moslem) ruled from the Senegal to Lake Chad, the populations of these regions remaining to a large extent pagan South of the Niger lay a number of strong Negro kingdoms, **Mandingo, Ashanti, Dahomey.** Farther to the east were the empires of **Bagirmi** (dating from the 16th century), which was subjected by Wadai in 1808, and **Waidai** (dating from the 17th century), which was almost chronically at war with the Sultans of Darfur. In the eastern Sudan there arose (1805) the power of the **Senussi,** a puritanical sect of Islam (later centered at Kufra) which made a special point of keeping the infidel Christians from Moslem territory

1799. Foundation of the **British Church Missionary Society,** which carried on extensive work in West Africa

1799, July 5. **Sierra Leone** (acquired 1787 and used for the settlement of freed slaves) was made a separate British colony

1807. The British settlement on the **Gambia** was put under the government of Sierra Leone, which became a crown colony (1808)

1809. The British captured the French settlements on the Senegal

1815. **The Basel Mission** (Swiss) began active missionary work on the Gold Coast

1817. The British returned Senegal to the French

1821. **Sierra Leone,** the **Gold Coast,** and the **Gambia** were joined as the **British West African Settlements.**

1822. **Foundation of Liberia** as a colony for freed American slaves (first colonists had arrived in 1820).

1824-1827. First war of the British on the Gold Coast with the powerful rulers of **the Ashanti.**

1829. **The British Slave Trade Commissioners** took over the administration of the island of **Fernando Po,** with Spanish consent

1842-1843. The French made the first treaties with the native chiefs of the **Ivory Coast.**

1843. **Fernando Po was returned** to Spanish rule

1843. **Gambia** was separated from Sierra Leone and made a separate crown colony

1845. **Edward Saker** and the Baptist Mission established themselves at **Ambas Bay,** on the coast of the Cameroons

1846. **The British Presbyterian Mission** began its activities on the Nigerian coast By this time numerous other missionary societies (British, Swiss, German) had begun to operate Their success among the Moslem inhabitants of West Africa was rather limited

1847, July 26 Establishment of the **FREE AND INDEPENDENT REPUBLIC OF LIBERIA.** It was recognized first by Great Britain, and then by other countries

1849, Apr. 5. The French proclaimed a **protectorate over French Guinea.**

1850, Jan. 24. **The Gold Coast** was made a separate British colony

Aug. 17 Denmark sold her four posts on the Gold Coast to Great Britain.

1854-1865. GOVERNORSHIP OF GEN FAIDHERBE in Senegal He carried on successful campaigns against **El Hajj Omar,** the powerful Tukulor chieftain, who was ultimately defeated and driven eastward to the upper Niger He died in 1864, but his sons succeeded to his kingdom, which was rent by dynastic wars until its conquest by the French in 1890 Faidherbe extended and consolidated the Senegal colony.

1860. **German traders** (Woermann and Company) opened a factory **on the Cameroons coast.**

1861, Aug. 6. The British secured possession of the **Lagos coast** through treaties with the chiefs.

1862, June 3. **The United States** recognized the Republic of Liberia.

1863, Feb. 25. The French established a **protectorate at Porto Novo** on the Dahomey coast

1866, Feb. 19. The **British colonies in West Africa** were once more united under the jurisdiction of the Sierra Leone government

1871, Feb. 21. The Dutch sold El Mina and other posts on the Gold Coast to Great Britain

1873-1874. SECOND ASHANTI WAR; campaigns of **Sir Garnet Wolseley,** who entered the Ashanti capital, **Coomassie,** Feb. 4, 1874.

1878. The Mission of the White Fathers (under **Cardinal Lavigerie**) was given charge by the pope of the Catholic missions in Africa

1874, July 24. The British West African colonies were once again separated.

1879. Foundation of the **United African Company** (National African Company after 1881) by **Sir George Goldie.** This brought together a number of small British firms trading on the Nigerian coast since 1832 and made possible British expansion in this area.

1882, June 28. An **Anglo-French agreement** delimited the boundary between Sierra Leone and French Guinea.

1883. Re-establishment of the French on the coast of **Dahomey** and beginning of expansion into the interior.

1883-1888. French conquest of the upper Niger region, from Senegal. A key fort was built at **Bamaku.**

1884, July 5. Gustav Nachtigal proclaimed a German protectorate over the coast of **Togoland.**

July 12. Gustav Nachtigal proclaimed a German protectorate over the **Cameroons coast,** five days before the arrival of the British representative dispatched for the same purpose. The British resigned their rights and recognized the German protectorate May 7, 1885.

1885, Jan. 9. The Spanish proclaimed a **protectorate over Río de Oro and Spanish Guinea.**

June 5. The British proclaimed a **protectorate over the Niger River** region

Nov. 11. The boundary between **Sierra Leone and Liberia** was defined by agreement.

1885-1886. Campaigns of the French against the powerful Mandingo ruler, **Samori,** in the Ivory Coast hinterland

1886, Jan. 13. Lagos, on the west coast of Nigeria, was set up as a separate British colony.

May 12. A French-Portuguese agreement defined the frontier between French and Portuguese Guinea

July 10. THE ROYAL NIGER COMPANY was chartered and given full control of the British sphere in Nigeria This company succeeded the National African Company.

July 14. An Anglo-German agreement delimited the frontier between the **Gold Coast and Togoland.**

July 27. An Anglo-German agreement began the delimitation of the **Nigeria-Cameroons frontier.**

1889, Jan. 10. France established a formal **protectorate over the Ivory Coast.**

Aug. 10. An Anglo-French agreement defined their respective spheres on the **Gold and Ivory coasts** and on the **Senegal and Gambia.**

1890. French war with the **King of Dahomey,** who was defeated and forced to recognize the French protectorate Beginning of the French expansion into the interior.

Aug. 5. An important **Anglo-French agreement** defined their possessions in northern Nigeria by a line running from **Say to Lake Chad.**

1892. Second Dahomey War. The French deposed the king, but were confronted with further risings of the warlike natives in 1893–1894

1892. Further **conquests of the French on the upper Niger.** Col. Archinard took Segu and broke the powers of the Fulani.

Dec. 8. A **French agreement with Liberia** defined the boundary between the Liberian Republic and the Ivory Coast.

1893. Further advance of the **French on the Niger.** They took Jenné and Timbuktu, defeating the Tuaregs (Dec. 16).

Mar. 10. The colonies of **French Guinea** (hitherto Rivières du Sud) and the **Ivory Coast** formally established

Nov. 15. An Anglo-German agreement defined the **Nigerian-Cameroons boundary,** leaving the region east of Lake Chad to Germany to within 100 miles of the Nile

1893-1894. THIRD ASHANTI WAR. The natives were defeated and a British protectorate set up.

1894-1895. Abortive campaign of the French under Maj Monteil against the forces of **Samori.**

1894, Mar. 15. Franco-German agreement on the boundary between the Cameroons and the French Congo. The French were given the basin of the Shari River and the Bagirmi region, and therewith an open road to the eastern Sudan and the Nile.

June 22. Dahomey was made a French colony.

1895, Jan. 1. The Royal Niger Company proclaimed a **protectorate over Busa** on the middle Niger and **Nikki** in the hinterland of Dahomey.

June. The French possessions in West Africa were united under a governor-general

1895-1896. FOURTH ASHANTI WAR. Sir Francis Scott took **Coomassie** (Jan. 18, 1896), made the king a prisoner, and proclaimed a British protectorate (Aug. 16)

1897, July 23. A Franco-German agreement defined the boundary between Dahomey and Togoland.

1897-1898. Acute tension in Anglo-French relations arising from competition for the possession of western Nigeria The French, eager to connect their territories on the Niger with those in Dahomey, dispatched numerous expeditions into the disputed area, which took **Busa** (Feb. 13, 1897) and **Nikki** (Nov. 30). The British protested vigorously and by the spring of 1898 the two countries were on the verge of war.

1898, June 14. THE ANGLO-FRENCH CRISIS was ended by an agreement defining the frontier from the coast (between Dahomey and Lagos) to the Niger. The French retained Nikki, while the British were awarded Busa.

1898, Sept. 29. The French finally defeated and **captured Samori,** thus breaking the Mandingo power Samori was exiled to Gabun and died in 1900.

1898-1899. The French, under **Émile Gentil,** organized the entire region along the Shari and Lake Chad This expedition united near Lake Chad with other missions from the Senegal and Niger and from Algeria, thus establishing the **connection of all the French possessions.**

1899, Mar. 21. Following the **Fashoda crisis** (p. 748), an **Anglo-French agreement** excluded the French from Bahr-el-Ghazal and Darfur, but left them a free hand in Wadai, Borku, and Tibesti in the eastern Sudan.

Aug. 9. The British government took over Nigeria from the Royal Niger Company and made it a British protectorate (Jan. 1, 1900).

Nov. 14. An Anglo-German agreement settled the Togoland-Gold Coast frontier and abolished the neutral zone previously established on the upper Volta River.

1900, Mar.-Nov. Rising of the Ashantis, who besieged Coomassie. The rebellion was ultimately suppressed and the capital relieved.

Apr. 22. In the **battle of Lakhta** or **Kusseri** the French defeated and killed **Rabah Zobeir,** foster brother of the famous Sudanese slave-trader Zobeir, who since 1878 had been ravaging Wadai, Bagirmi and Bornu

May. The **French conquest of Tidikelt, Tuat, Insalah,** and other oases south of Morocco and Algeria, gave them control of the northern Sahara

June 27. A Franco-Spanish agreement defined the frontier of Río de Oro and of Spanish Guinea.

1900-1903. British conquest of northern Nigeria: Kano and Sokoto taken (Feb. 3, Mar. 15, 1903) and subdued.

1901, Sept. 26. The kingdom of **Ashanti** was definitely **annexed** and joined to the British Gold Coast colony.

1904. Reorganization of the French possessions (Mauretania, Senegal, French Guinea, Ivory Coast, Dahomey, Upper Senegal, and Niger) as **French West Africa,** with capital at Dakar.

1904. Insurrection of the Ekumekus, a fanatical sect, in southern Nigeria.

1904-1905. Serious **insurrection in the Cameroons.**

1906. Native rising in Sokoto.

Feb. 18. The British colony **Lagos** was incorporated with southern Nigeria.

1908-1909. French conquest of Mauretania by Gen. Gouraud.

1909. An **American commission investigated** the finances of **Liberia,** which was bankrupt. The United States supported the government against native insurrections and gave financial aid until an international loan was arranged for (June, 1912).

1909-1911. French conquest of Wadai.

1911, Nov. 4. By the **Franco-German agreement** settling the second Moroccan crisis (p. 757) about 100,000 sq. miles of the French

Congo were added to the German Cameroons colony.

1914. **The French occupied Tibesti,** but owing to the exigencies of the World War, were obliged to abandon the eastern Sudan in 1916 The region was reoccupied in 1920

Jan. 1. **Southern and northern Nigeria were joined** under one administration

1914, Aug. **CONQUEST OF THE GERMAN COLONIES,** Togoland, and Cameroons, by French and British forces from the neighboring colonies (p 918)

(*Cont. p.* 1088.)

6. THE CONGO REGION

(French Equatorial Africa, Spanish Guinea, Belgian Congo, Angola)

This area is inhabited by the **Bantu,** who, because of the thick tropical jungles and the consequent difficulty of communication, never built large empires comparable to those of West Africa. In the 19th century the chief "kingdoms" were those of the **Congo** (on the lower reaches of the great river), the **Ansika** (on the Congo plateau, above Brazzaville), **Lounda** (on the border between the present-day Congo State and Angola), **Manyema** (to the west of Lake Tanganyika), and **Balouba** (to the south of Manyema)

1839-1845. **The French** acquired land by treaty on both sides of the **Gabun River.**

1840. **The Portuguese** extended their possessions in Angola south to **Mossamedes.**

1849. **The French founded Libreville,** using freed slaves as settlers

1857-1859, 1863-1865. **Explorations of Paul du Chaillu** (a Franco-American) in the region of the Gabun and Ogowe Rivers

1875-1878. **Explorations of Savorgnan de Brazza** in the region north of the Congo

1876, Sept. 12. **King Leopold** of Belgium, an ardent imperialist, summoned to Brussels an international congress of geographers, explorers, and scientists and founded the **International Association for the Exploration and Civilization of Central Africa,** one of the chief purposes of which was to suppress the slave trade. Each national group was to establish a national committee to carry on the work in special areas The Belgian committee was most active, and in the years 1877–1879 began to found posts on Lake Tanganyika.

1878, Nov. 25. The Belgian committee was transformed into the **Comité d'Études du Haut-Congo. H. M. Stanley,** recently returned from his crossing of Africa by the Congo route, was engaged to establish stations in the Congo area. This he did in the years 1879–1884

1880. The French, alarmed by Stanley's activity, sent out **De Brazza,** who made treaties with the chiefs on the north side of the Congo, **founded Brazzaville** and organized a protectorate.

1882. The Comité d'Études du Haut-Congo was transformed into the **International Association of the Congo,** with trade as a main objective. A number of companies were organized to exploit the Congo region

1884, Feb. 26. **AN ANGLO-PORTUGUESE TREATY** gave Portugal both sides of the lower Congo from 5° 12′ to 8° S Lat. and inland to Noki Portugal agreed to freedom of navigation on the Congo and promised a low tariff. The treaty was intended primarily to check the French advance Owing to vigorous parliamentary opposition and to protests from France and Germany, it had to be abandoned (June 26)

Apr. 22. **The United States recognized the International Association** as a territorial power

Apr. 23 By treaty France secured the **right of pre-emption** in the event of the International Association alienating its territory.

Nov. 8. **Germany recognized the International Association.**

Nov. 15-1885, Feb. 26. **BERLIN CONFERENCE** on Congo affairs, arranged by Germany and France It provided for freedom of navigation on the Congo and Niger, free trade in the Congo Basin, abolition of slavery and the slave trade, effective occupation of territory claimed, etc.

Dec. 16. **England recognized the International Association.** France and Russia followed on Feb. 5, 1885, and the

Association took the name **Independent State of the Congo.**

1885, Feb. 5. An agreement, concluded **between France and the Congo State** in connection with the recognition of the latter, defined the frontier between the Congo State and the French Congo at the Congo River and the Ubangi, a northern confluent

Feb. 14. An agreement between the Congo State and Portugal gave the latter the Kabinda Enclave to the north of the river, and the south bank as far up as Noki.

Apr. King Leopold assumed sovereignty of the Congo State, which became his personal possession The character of the state became less and less international and the king's objective became more and more the exploitation of the country Concessionaires were granted large areas, but much of the country (the central portion) was set aside as state land (*domain de la couronne*) and as the king's private domain (*domain privé*)

Aug. 1. Leopold proclaimed the **neutrality of the Congo State** and announced its territorial claims.

Nov. 22. A treaty between France and the Congo State defined the boundary in the Manyanga region

Dec 24. An agreement between France and Germany defined the frontier between the French Congo and the Cameroons in the southern part.

1886, Apr. 27. De Brazza was made **commissioner-general** of the French Congo

May 12. A Franco-Portuguese agreement fixed the boundary of the Kabinda enclave.

Dec. 30. A German-Portuguese agreement fixed the frontier between Angola and German Southwest Africa

1887, Apr. 29. A new Franco-Congolese treaty defined the frontier as the Ubangi River and the 4th parallel N Lat

1888. The French explorer, **Paul Crampel,** opened up the region from the French Congo to Lake Chad He was followed by others (**Dybowski, Maistre**).

Dec. 11. The French colony of **Gabun was united with the French Congo.**

1888-1889. "RESCUE" OF EMIN PASHA, the governor of Equatoria, by H. M. Stanley The relief expedition had been largely financed by King Leopold and his friend Sir William MacKinnon, chairman of the Imperial British East Africa Company Its real purpose was to secure Equatoria and thereby an outlet to the upper Nile for the Congo State.

Aug. 2. Leopold designated the **Belgian State as the heir of the Congo.**

1890, May 24. The MacKinnon Treaty, concluded between Leopold and the Imperial British East Africa Company In return for a strip of territory between Lake Albert Edward and Lake Tanganyika (important for the project of an all-British Cape-to-Cairo route), the company recognized as Leopold's sphere the western bank of the upper Nile as far as Lado This agreement, while not officially recognized by the British government, was not disavowed by it

July 2. THE BRUSSELS ACT, concluding an international conference at Brussels It arranged for the systematic extirpation of the slave trade, prohibition of the sale of firearms, etc

July 3. Leopold gave the Belgian State the right to annex the Congo State after 10 years

July 11. In return the Belgian State granted the Congo a loan without interest and a subsidy for 10 years.

Nov. 14. An agreement between England and Portugal defined the frontier of Angola and South Africa.

1891, Apr. 15. The Katanga Company formed under Leopold's auspices to exploit the rich copper deposits of Katanga, after the defeat of the native king, **Msidi.**

May 25. By treaty the Congo State and Portugal divided Lounda between them

June 11. A further **Anglo-Portuguese agreement** assigned Barotseland to England Later disagreements were arbitrated by the King of Italy (May 30, 1905).

1892, May 8. The natives of the Congo were forbidden to collect ivory and rubber excepting for the state

May 15. Beginning of a great **rising of the Arab slaveholders** and traders on the upper Congo and in the Tanganyika region. The Belgians proceeded against them. The Arabs were defeated by Baron Dhanis (Nov. 22) and then by Col. Chaltin, who took their chief centers, **Nyangwe** (Mar 4, 1893) and **Kasongo** (Apr. 22).

Dec. 5. Forced labor of the Congo natives was introduced in the guise of taxes in kind and labor.

Oct. A Belgian force, under **Van Kerckhoven, reached the Nile** at Wadelai and proceeded to take over the region

assigned the Congo by the MacKinnon Treaty.

1893, June. The French, alarmed by the advance of the Belgians, sent out **Monteil** and Decazes to occupy the country from the M'Bomu River to the Nile, after futile attempts to reach an agreement with Leopold

1894, Mar. 15. A Franco-German agreement regarding the Cameroons frontier left the French free to advance through the Sudan to the Nile.

May 12 THE CONGO TREATY, between England and the Congo State In order to frustrate the French advance, the British leased to Leopold for the duration of his life the entire region west of the upper Nile from Lake Albert to Fashoda and west to 30° E Long. The region west of this (to 25° E Long.) and north of the Congo-Nile watershed, was leased to Leopold and his successors. In return England was to have a lease of a corridor 25 kilometers wide from Lake Tanganyika to Lake Albert Edward Violent protests of the Germans forced the abandonment of the lease of the strip (June 22) while the threatening attitude of the French obliged Leopold to make an agreement with them

Aug. 14. FRANCO-CONGOLESE AGREEMENT, fixing the frontier on the M'Bomu River and the Nile-Congo watershed along the parallel 5° 30′ N Lat Leopold was thus obliged to give up his claim to the northern part of the lease, but retained the region known as the **Lado Enclave.**

Sept Liotard was made French commissioner of the upper Ubangi and was sent out to establish posts in the Bahr-el-Ghazal region The French had visions of occupying the southern part of the former Egyptian Sudan and thereby forcing the British to evacuate Egypt by a threat of interference with the Nile water-supply Some even dreamed of extending the French belt from West Africa across the Nile and Ethiopia to French Somaliland

1895-1897. The Gentil mission opened up the Bagirmi country, the hinterland of the French Congo.

1895, Mar. 28. Statement of Sir Edward Grey in the British Parliament, that any French expedition to the upper Nile would be regarded as an *"unfriendly act."*

Sept. Visit of King Leopold to Paris. He made an agreement with the French to co-operate on the upper Nile, and during visits to England (Oct., Jan) attempted to bring about an adjustment of rival claims. His aim was to secure the agreement of England to a lease of the upper Nile region to the Congo State.

1896, Mar. 13. Beginning of the **Egyptian reconquest of the Sudan,** under Gen Kitchener. The main object of the reconquest was to prevent the Sudan falling into the hands of France

June. The Marchand Expedition left France, with instructions to advance to Fashoda and claim the country for France

1897, Feb. The Belgians, under Chaltin, reached the Nile at Rejaf, and, after defeating the Sudan dervishes, occupied Lado and Wadelai

Aug. Marchand reached the Bahr-el-Ghazal region, but was unable to proceed because of the low water of the rivers

Sept. Great mutiny and **rising of the Batetelas** on the upper Congo Baron Dhanis proceeded against them in force, but the insurrection was not finally suppressed until Oct. 1900

1898, July 10. Marchand reached the Nile at Fashoda and established a force.

Aug. 30. Secret Anglo-German agreement for the eventual partition of the Portuguese colonies Germany was to get the larger part of Angola (p 748)

Sept. 19. Arrival of Kitchener at Fashoda. Acute crisis in the relations of France and England (p 748)

Nov. 4. The French government ordered the **evacuation of Fashoda.**

1899. Granting of **concessions in the French Congo** to a number of rubber companies Through rubber taxes and forced labor a form of slavery was introduced not much different from that of the Congo State.

1900, June 27. An agreement between France and Spain defined the boundary of Spanish Guinea.

1902. Great **native uprising in Angola,** suppressed with difficulty.

July 5. The French possessions on the Congo were divided into two colonies. Lower Congo-Gabun, Chad

1903, May. Beginning of a large-scale agitation, first in England, then in the United States, Germany, and other countries, directed against the **conditions in the Congo.** The writings of **E. D. Morel** and the reports of the British consul, **Sir Roger Casement,** aroused great indignation.

In July 1904 Leopold sent out a commission of three to investigate Its report (Nov 1905) was very unfavorable The agitation continued until the annexation of the Congo by Belgium

Dec. 29. The French Congo was divided into four colonies Gabun, Middle Congo, Ubangi-Shari, Chad

1905. A serious **insurrection** broke out **in the French Congo.** An investigating commission under De Brazza was sent out

1906, May 9. After years of friction the **British** finally **obliged Leopold to accept a compromise** settlement of his claims on the upper Nile He was given the **Lado Enclave,** but only for the duration of his life

1907. Another **insurrection in Angola,** connected with the Herrero rising in German Southwest Africa

1908, Oct. 18. By act of the Belgian parliament, the **Congo State was annexed to Belgium.** Thenceforth the parliament exercised effective control and began the removal of abuses

Dec. 23. A Franco-Belgian agreement definitively fixed the boundaries of the French and Belgian Congos

1910, Jan. 15. The French Congo was renamed **French Equatorial Africa,** and was redivided into three colonies Gabun, Middle Congo, Ubangi-Shari

May 2. The labor tax was abolished in the Belgian Congo

May 14. An Anglo-Belgian agreement gave the Belgian Congo the west shore of Lake Albert

June 16. The Lado Enclave reverted to the Anglo-Egyptian Sudan on the death of Leopold

July 1. An extensive **program of reform** was introduced in the Belgian Congo At much the same time the French government thoroughly revised the concessions to the companies operating in the French Congo.

Aug. 11. A German-Belgian agreement fixed the frontier between the Belgian Congo and German East Africa.

1911, May 4. An Anglo-Belgian agreement defined the boundary between the Belgian Congo and Uganda

Nov. 4. THE FRANCO-GERMAN AGREEMENT ending the **second Moroccan crisis** (p 758) involved the cession by France to Germany of about 100,000 square miles of the French Congo, on the coast south beyond Spanish Guinea and in the interior two strips, one along the Sangha River to the Congo, and another to the Ubangi River

1912, July 1. Freedom of trade in the entire Belgian Congo was declared.

1913, Jan 31. The liquor trade was forbidden in the Belgian Congo

1914, Feb. 3. An Anglo-Belgian agreement fixed the boundary between the Belgian Congo and British East Africa

July. The Belgian Congo was divided into four provinces and a general program of administrative decentralization was introduced

Aug. 15 Angola was given autonomy.

(*Cont p* 1089)

7. EAST AFRICA

(Kenya, Uganda, Tanganyika, Nyasaland, Mozambique)

East Africa is inhabited almost exclusively by Negroes of the **Bantu race.** At the beginning of the 19th century the only European settlements were those of the **Portuguese,** and of these only the more southerly ones remained after the **conquests of the Arabs of Muscat** (Oman) in the late 17th century. From Cape Delgado northward to what is now Italian Somaliland the coast was under the rule of the Sultan of Muscat, who was represented by a viceroy (*Sayyid*) residing first at Mombasa, later at Zanzibar The Arabs carried on a lively trade in slaves, and in the course of time the slave-raiders penetrated farther and farther into the interior, reaching the region of the great lakes When the European powers, intent on the suppression of the slave trade and on the expansion of their commerce, began to interest themselves in this region, they were confronted first with the claims of the Arab ruler and then with the pretensions of Portugal.

1823. Adm. Owen, commanding a British squadron, raised the British flag on the south shore of **Delagoa Bay,** but this was removed after his departure, by the Portuguese.

1824-1828. **Owen occupied Mombasa** on the East African coast, the region being in dispute between the Sultan of Muscat and his local representative

1840. **Sayyid Said,** representative of the Sultan of Muscat on the East African coast, established his capital at **Zanzibar.**

1841. The first British consul-general was appointed to Zanzibar. From this time on, **British trade interests** in East Africa developed rapidly

1860-1865. Explorations of the German discoverer, **von der Decken,** in East Africa. He first outlined schemes for a German dominion in this region

1861. Under pressure from the British, the **dominions of the Sultan of Muscat were divided,** Zanzibar becoming the seat of the **Sultan Majid,** who claimed control over some thousand miles of the coast.

1862, Mar. 10. **The British and the French recognized the independence of the Sultan of Zanzibar.**

1866-1887. **Sir John Kirk,** British consul-general at Zanzibar Under his influence the sultan was induced to take measures against the slave trade. British interests became predominant and Kirk to a large extent determined the policy of the sultan

1870-1888. **Barghash Sayyid,** Sultan of Zanzibar.

1873, June 5. Under British pressure, the **sultan prohibited the export of slaves** from his dominions and closed the public slave markets of Zanzibar.

1875. Following the explorations of Livingstone (p 826), the first **British missionaries** appeared on the **Shiré River** and about Lake Nyasa. **Blantyre** was founded in 1876.

July 24. An arbitral award of President MacMahon of France assigned the south shore of **Delagoa Bay to Portugal,** rejecting the British claims.

1876. The Sultan of Zanzibar offered his continental possessions to **Sir William MacKinnon,** chairman of the British India Steam Navigation Company MacKinnon appealed to the British government for support, and, failing this, declined the offer.

1877. The first **Protestant missions** arrived in **Uganda,** following an appeal from King Mtesa (1857-1884), transmitted through Stanley

1878. **The German African Society,** as a branch of the International African Association, established a number of posts in the region between Bagamoyo and Lake Tanganyika

British missionary and trading interests organized the **African Lakes Trading Company** on Lake Nyasa.

1879. Catholic French missionaries of the **White Fathers** arrived in **Uganda.**

1883, Dec. 14. The Portuguese government granted a concession for a **railway from Delagoa Bay to the Transvaal** to the American promoter, **MacMurdo.**

1884, Feb. 26. By the abortive **Congo Treaty** (p 843) Portugal recognized British claims in the Nyasa area.

Oct. 10. Death of King Mtesa of Uganda He was succeeded by his young and headstrong son, **Mwanga,** who soon became involved in struggles with the various religious factions (Moslem-Arab; Protestant-British; Catholic-French)

Nov. 19. **Karl Peters,** moving spirit of the German colonial movement, signed the first of a long series of treaties with the native chiefs of the regions behind Bagamoyo

1885, Feb. 12. The **German East Africa Company** was chartered, to take over the claims established by Peters.

Feb. 17. The German government established a **protectorate over East Africa** from the Umba River in the south to the Rovuma in the north

Apr. 8. The **Denhardt brothers,** Germans, secured the Witu region from the local sultan, for the newly formed **Witu Company.**

May 27. The German government established a **protectorate over Witu.**

Aug. 14. The Sultan of Zanzibar was obliged to recognize the German protectorate over Witu, following a naval demonstration and an ultimatum

Oct. **Murder of Bishop Hannington** at the command of Mwanga of Uganda Beginning of a period of persecution of the Christians and general chaos in that region

1885-1896. Prolonged **wars of the British in Nyasaland** against the Arab slave-traders and their allies.

1886, May 12. France recognized the **Portuguese claims** to all territory between Angola in West Africa and Mozambique in East Africa, without prejudice to the claims of others On Dec 30 the

German government likewise recognized the Portuguese pretensions

Oct. 29, Nov. 1. After an investigation of claims by a British-German-French commission (report June 9), the British and German governments concluded an agreement defining the possessions of the Sultan of Zanzibar· the islands of Zanzibar, Pemba, and Lamu, the northern towns of Kismayu, Brava, Merka, Magdoshu, and Warsheikh, and the coastal strip (10 miles wide). The **German and British spheres of interest** were defined by a line from the mouth of the Umba River northwest around the northern base of Mt. Kilimanjaro and thence northwest to the point where the first parallel S. Lat. strikes the east coast of Lake Victoria In the north the British sphere extended to the Tana River, leaving Witu to the Germans

1887, May 24. The British East Africa Company (Sir William MacKinnon, chairman) secured from the Sultan of Zanzibar a 50-year lease of his coastal strip between the Umba and the Tana Rivers

1888, Mar. 26. Death of Barghash, **Sayyid Khalifa,** Sultan of Zanzibar

Apr. 28. The Germans secured from the sultan a 50-year lease of that part of the coast between the Rovuma and the Umba Rivers.

Sept. 3. The British East Africa Company was given a charter to develop the territory in the British sphere

Sept. Victory of the Moslem-Arab faction in Uganda; deposition and flight of Mwanga

1888-1890. Great **insurrection of the coast Arabs** in the German sphere, under **Bushiri.** In Dec 1888 the British joined the Germans in a blockade of the coast The rising was ultimately mastered by the German explorer and administrator, **Hermann von Wissmann**

1888-1890. Portuguese expeditions into the regions west of Lake Nyasa and into the Manica district, with the object of establishing Portuguese claims to the whole of the interior, which had been assigned by the British government to the newly founded South Africa Company (p. 855).

1889, Sept. 21. The British proclaimed a protectorate over the Shiré River region.

Oct. 4. Mwanga, supported by the Christians, defeated the Moslems in Uganda. Ascendancy of the Catholic faction.

Dec. Emin Pasha, the governor of Equatoria, having been "rescued" by Stanley (p. 844), arrived at Bagamoyo. He soon took service with the Germans and set out for the region west of Lake Victoria, where he was killed (1892) by Arab slave-traders

1890, Jan. 10. The British sent to the Portuguese government a stiff **ultimatum** protesting against the expeditions into the interior.

Mar. 4. The British East Africa Company secured from the Sultan of Zanzibar the concession of the **Benadir coast.**

Mar. Karl Peters, having entered Uganda by way of the Tana River country, induced Mwanga to sign a treaty, by which it was hoped that the German position in Uganda might be established

Apr. 14. A mission of the British East Africa Company, under **Frederick Jackson,** arrived in Uganda Peters withdrew to the south side of Lake Victoria and Jackson succeeded in getting Mwanga to recognize the protection of the company.

May 24. The so-called **MacKinnon Treaty,** concluded between the British East Africa Company and King Leopold as ruler of the Congo. The company recognized Leopold's rights on the west bank of the upper Nile, in return for the cession of a strip of territory between the south tip of Lake Albert Edward and the north tip of Lake Tanganyika. This agreement was not officially sanctioned by the British government

June 14. The British established a **protectorate over Zanzibar.** This was recognized by Germany in the agreement of July 1 and by France (in return for recognition of the protectorate over Madagascar) on Aug 4.

July 1. AN ANGLO-GERMAN AGREEMENT disposed of conflicting claims and aims in East Africa: in return for the cession of Heligoland (p. 741) the Germans gave up all claims to Uganda and abandoned their position in Witu. The frontier between British and German East Africa was extended on the west side of Lake Victoria as far as the frontier of the Congo State

Oct. 28. Following the suppression of the Arab rising, the **German East Africa Company ceded all its territorial rights to the German government.**

Nov. 19. The British proclaimed a **protectorate over Witu** and the coastal area as far as the Juba River.

Dec. 18. Arrival of Sir Frederick Lugard with a British force in Uganda.

He induced the king to sign a new treaty (Dec. 26) and attempted to restore peace between the religious factions. In 1891 he moved to the western areas, establishing posts and enlisting remnants of the Sudanese forces which had been in the service of Emin Pasha

1891, Mar. 24. An Anglo-Italian agreement fixed the Juba River as the boundary between British East Africa and Italian Somaliland

June 11. AN ANGLO-PORTUGUESE AGREEMENT brought to an end the long-standing dispute about claims in East Africa. Portugal was to have both banks of the Zambezi to a point 10 miles west of Zumbo, the Rovuma River was to be the northern boundary, British claims in Nyasaland were recognized, as also in Manicaland

July 30. The Portuguese government chartered the **Mozambique Company,** which was financed to a large extent by British capital, to develop the region behind Beira.

1891-1893. The Wahehe War in German East Africa

1892, Jan. Outbreak of new **religious conflicts in Uganda.** Lugard intervened energetically and secured the victory of the Protestant faction.

1892-1898. Pacification of Nyasaland through the suppression of Angoni and Arab risings, chiefly by **Sir Harry H. Johnston.**

1893, Mar. Arrival of **Sir Gerald Portal** in Uganda. The British East Africa Company had announced its intention of withdrawing and had been induced to stay on only through the intervention and financial support of the missionary interests. The government of Lord Rosebery was eager to take over the country in order to protect the approach to the headwaters of the Nile, but the anti-imperialist element in the cabinet objected. Portal raised the British flag and recommended retention of control by Britain

Feb. 22. The name of **Nyasaland** was changed to **British Central African Protectorate.**

1894, Feb. 4. Major Owen, sent out to counteract Belgian expeditions along the Nile, reached the river from Uganda and raised the British flag at Wadelai.

May 12. The Congo Treaty between King Leopold and Great Britain, along the lines of the MacKinnon Treaty (p. 845). The protests of the German government led to the cancellation of the lease, by the Congo State, of a narrow strip of territory adjacent to the German East African frontier, thus frustrating the hope of a Cape to Cairo connection through Africa

June 18. The British government formally announced a **protectorate over Uganda.**

Sept. 1. A German-Portuguese agreement defined the boundaries between German East Africa and Mozambique

1895-1899. Native risings in Mozambique greatly hindered the development of the colony.

1895, July 1. Following the dissolution of the British East Africa Company, the British government organized its sphere as **the East Africa Protectorate.**

1896, June 30. The kingdom of **Unyoro** was added to the Uganda Protectorate.

Aug. A disputed succession in Zanzibar led to a dangerous Arab movement against British rule and to a **bombardment of Zanzibar** by a British squadron

1897, Apr. 6. Slavery was abolished in Zanzibar, by decree of the sultan

July-Aug. New troubles in Uganda, provoked by King Mwanga. He was forced to flee and surrendered to the Germans

Sept. Outbreak of a great **mutiny of the Sudanese troops in Uganda,** which was not suppressed until 1898, after a regular campaign by Maj. **James MacDonald.**

Nov. Daudi Chwa was made King of Uganda. Being a small child, the country was ruled, under the British, by a regency (until 1914).

1898, Sept. Maj **C. G. Martyr** took Wadelai and Rejaf on the Nile, as part of the reconquest of the Sudan.

1899, June. Capture of Mwanga and his ally, **Kabarega of Unyoro.** These two troublesome opponents of British rule were exiled to the Seychelles

Sept. 13. First ascent of Mt. Kenya, by H. J. Mackinder.

1900, Mar. 10. A definitive **treaty between Uganda and Great Britain** regulated the form of government the country is ruled by the king (*kabaka*) with the advice and assistance of the British commissioner.

1901, Feb. 23. An Anglo-German agreement regulated the boundary between German East Africa and Nyasaland.

Dec. 26. The first railroad train reached Lake Victoria by the **Uganda Railway**, from Mombasa (surveyed 1891–1892; constructed 1896–1901, and since then the most important single factor in the opening up of the country)

1902, Apr. 1. The eastern province of Uganda was joined to British East Africa.

1902. A land grant of 500 sq miles in British East Africa to the **East African Syndicate** initiated white settlement in the upland region (regulated by the **First Crown Lands Ordinance**, Sept. 27).

1905. A serious **rising of Moslems and pagans** in the southern part of **German East Africa** led to the practical extermination of the Angonis, a powerful native tribe.

1906, Oct. 22. Executive and legislative councils were established in British East Africa, the latter composed exclusively of nominated members.

1907, May 23. The government of **Mozambique was organized**, with the establishment of a legislative council on which the European elements were represented.

July 6. The name of British Central Africa was changed back to **Nyasaland Protectorate**

Sept. 4. Nominated executive and legislative councils were established in Nyasaland

1908. Mar. 31. Opening of the **Shiré Highlands Railway** to Blantyre

1912, Feb. 26. Opening of the **railroad from Dar es-Salaam to Tabora**, the main line in German East Africa

1914, Feb. 1. The Dar es-Salaam Railroad reached the shore of Lake Tanganyika. (*Cont* p. 1090.)

8. SOUTH AFRICA

(Cape of Good Hope, Orange Free State, Natal, South African Republic, Rhodesia, German Southwest Africa)

At the end of the 18th century the Dutch were still in possession of Cape Colony, where they had established themselves in 1652. The settlement was originally designed exclusively as a refreshment station for the ships of the **Dutch East India Company** *en route* to the Spice Islands, but the need for supplies had led to the establishment of **free burghers** (1657) who were to grow grain and make wine. To provide the necessary farm labor, **slaves** were introduced from West Africa and from Asia (1657). The neighboring native tribes (**Bushmen** and **Hottentots**) were economically in a very backward state, but early efforts to prevent contact and conflict could not be maintained The need for fresh meat resulted in trade with the Hottentot cattlemen and to a gradual expansion of the burghers beyond the immediate vicinity of Capetown. The population was increased (1688–1694) by the arrival of several hundred **French Huguenot settlers** who had taken refuge in Holland after the revocation of the Edict of Nantes and whose passage to the Cape was financed by the Dutch East India Company. By 1700 there were about 1000 free burghers at the Cape. Progress during the 18th century continued to be very modest. The stiff regulations of the company served as a deterrent and European immigration was almost insignificant. Nevertheless, the tendency toward expansion remained potent Cattle farmers continued to push the frontier of settlement eastward along the coast and northward into the veld The Orange River was reached in 1760 and the Great Fish River in 1776. Graaff Reinet was founded in 1786. In the last years of Dutch rule there developed also a **demand for burgher representation** and a more liberal régime By 1795 this movement had reached the point where local magistrates were driven out and projects for a national assembly brought forward.

1795, Sept. 16. By the **capitulation of Rustenburg**, the Dutch garrison at the Cape surrendered to Adm. Elphinstone and a British fleet. The British acted under mandate from the exiled Prince of Orange, but the chief purpose of the seizure was to prevent the Cape, like Holland, from falling into the hands of the French.

1803, Feb. 21. Under the terms of the **Treaty of Amiens** (p. 590) the **British returned the Cape** to the Dutch (Batavian Republic).

1806, Jan. 10. By the **capitulation of Papendorp** the Dutch garrisons once

more surrendered to a powerful British fleet

1807. **Abolition of the slave trade** throughout the British Empire This created a serious labor problem in South Africa and brought to the fore the question of drafting the Hottentots

1809. Legal restrictions on the free movement of the Hottentots were introduced, with the object of forcing them into service

1814, May 30. By the **TREATY OF PARIS** (p 601) the British secured definitive possession of the Cape By an agreement of Aug 13 the Dutch were paid £6,000,000 funds, ostensibly by way of compensation Until 1825 the new possession was ruled autocratically by the British governor

1816. Great influx of **British missionaries** (Moravian missions, 1792, London Missionary Society, 1794; Wesleyans, 1816) The missionaries undertook to convert the natives in the eastern areas and to improve their lot Through their exertions (esp. Dr. **John Philip**) the problem of native protection was brought to the fore Philip proposed segregation of the Hottentots and their settlement on the land All proposals of this type roused strong opposition among the farmers

1820. About 4000 **British colonists** (*Albany Settlers*) settled in the eastern coastal region by the British government, giving the colony for the first time a noticeable English tinge

1822. A proclamation provided for the gradual establishment of English in place of Dutch as the official language

1824, Aug. 27. **Francis G. Farewell** and a group of merchants from the Cape declared **Natal** British, but this step was not recognized by the government The settlement was renamed **Durban** in 1835

1825. After an investigation, the British government established an **advisory council** at the Cape (3 official members; 3 nominated) to assist the governor. Two years later provision was made for an **independent judiciary.**

1826. The Cape colony was extended northward to the Orange River

1828. Through the efforts of Philip an ordinance (the **Fiftieth Ordinance**) was passed, allowing Hottentots to buy and hold land, and abolishing earlier restrictions on free movement.

The old Dutch magistracy (*landdrosts, heemraden*) was replaced by the **English judiciary system.**

1833. In Cape Colony the advisory council was replaced by a **legislative council,** similarly constituted, but with extended powers

1834. **Abolition of slavery** throughout the British Empire, with compensation to the owners In South Africa, where 35,000 slaves were freed, there was much complaint about the inadequacy of the compensation

Great invasion of the eastern regions **by the Bantu** (Kaffirs), irritated by the constant encroachment of the Dutch cattlemen and farmers The natives were driven back with some difficulty

1835. British territory was extended eastward to the Kei River (**Province of Queen Adelaide**), but the region between the Keiskamma and the Kei (Kaffraria) was left to friendly natives under supervision as well as to white settlers The British government, under pressure from philanthropic and missionary interests, disavowed the extension of Cape authority and the province had to be abandoned, much to the disgust of the settlers

1835-1837. **THE GREAT TREK** of the Dutch (Boer) cattlemen and farmers to the north and the east of the Orange River. Irritated by the restrictions on slavery and by the sympathetic native policy of the government, they sought new lands and freedom from interference About 10,000 moved northward, seriously depopulating the eastern parts of the Cape Colony. Under **A. H. Potgieter** they passed beyond the Vaal River and settled in what became the Transvaal Those under **Piet Retief** crossed the Drakensberg and began to occupy Zululand and Natal, regions largely depopulated by the ravages of **Chaka,** the great military leader of the Zulus.

1838, Feb. **Retief** and 60 followers were treacherously **slain by Dingaan,** the powerful king of the Zulus, who massacred the immigrants and thereupon destroyed Durban.

Dec. 16. In the **battle of Blood River** Dingaan was defeated by the Boers, now led by **Andreas Pretorius.** The Boers thereupon settled in Natal (**Republic of Natal**), founding **Pietermaritzburg** (1839).

1840. **Dingaan was defeated** by his rival, Umpanda, who became king of the Zulus and accepted the rule of the Boers. Immigration of the Zulus from Zululand into Natal continued unchecked

1842. War between the Boers and the British in Natal The Boers were repulsed and British authority established

1843, Aug. 8. Natal was made a British colony, with the object of protecting the natives against exploitation Thereupon many of the Boers departed, moving northward over the Vaal River

Dec. 13. By treaty with Moshesh, powerful leader of the Basutos, Basutoland became a native state under British protection A similar treaty was made with Adam Kok, the Griqua chief Thus many Voortrekkers were put under native jurisdiction

1844, May 31. Natal was combined with Cape Colony for administrative purposes

1846-1847. War of the Axe, between the British and the Kaffirs. The latter were defeated and British Kaffraria (between the Keiskamma and the Kei Rivers) was set up as a native preserve (1847)

1846. In Natal the first Location Commission set up preserves for the immigrant Zulus, under a revived tribal system Beginning of the policy of native segregation.

1848, Feb. 3. Sir Harry Smith, the British governor of the Cape, proclaimed as British territory all the region between the Orange and Vaal Rivers and the Drakensberg. The Boers were disunited, but some, under Pretorius, opposed the British. They were defeated by Smith in the battle of Boomplaats (Aug 29) and the Orange River Sovereignty became a reality

1850-1853. Great Kaffir War on the eastern frontier of Cape Colony.

1852, Jan. 17. By the SAND RIVER CONVENTION the British government recognized the independence of the Transvaal.

1853, July 1. A new constitution was introduced in the Cape Colony, after years of agitation It provided for an elected legislative council of 15 members and an elected house of assembly with 46 members The parliament was to be summoned annually by the governor, but the executive was not made responsible to it. The franchise was extended to all British subjects (white and black alike) on fulfillment of certain conditions as to employment, etc., property or salary

1854, Feb. 17. By the Convention of Bloemfontein the British government withdrew from the territory north of the Orange River, despite the protests of some of the settlers. This was the final step in the policy of withdrawal initiated by the Sand River Convention The settlers thereupon organized the Orange Free State, with a president and a volksraad

1854-1861. SIR GEORGE GREY, governor of the Cape Colony. His administration was distinguished by an active policy of native protection, under white magistrates, the ultimate object being the civilization of the blacks.

1856, July 12. Natal was made a separate colony with an elected assembly.

Dec. 16. Organization of the South African Republic (*Transvaal*), after years of confusion. Marthinius Pretorius became president, and Pretoria (founded 1855) the capital Dissenting groups stood aloof and continued their separate state organizations in Zoutpansberg, Lydenburg, and Utrecht.

Self-destruction of the Kaffirs, who slaughtered their cattle in the hope, encouraged by their prophets, that the heroes of old would return and drive out the white man. The population, deprived of food, died of starvation and in the end was reduced to about one-third of the original number. This tragedy did much to end the long-standing Kaffir problem.

1857, June 1. The South African Republic and the Orange Free State recognized each other's independence.

1858. Zoutpansberg joined the South African Republic, while Lydenburg and Utrecht united as one state.

1858. Sir George Grey recommended the federation of the colonies, including the Orange Free State, but not the South African Republic. The idea was at once repudiated by the home government.

1860. The first laborers were imported from India to work (under three-year indenture) on the sugar plantations of Natal Large numbers were imported in the course of the next generation, many of whom remained in the country after expiration of the indenture "Free" Indians also immigrated and soon became an important factor in trade and small industry.

Opening of the first railway in Cape Colony. In 1864 it reached Wellington

Lydenburg joined the South African Republic.

1860-1864. Pretorius was at the same time president of the South African Republic and of the Orange Free State, thus establishing a close bond between the two Boer states

1861. The British occupied islands in Delagoa Bay, in order to keep this strategic harbor from falling into the hands of the Transvaal

1864-1888. **Jan Brand**, president of the Orange Free State

1865-1866. **War of the Boers** of the Orange Free State against **Moshesh**, the chieftain of the Basutos Moshesh, defeated, was obliged to cede large tracts of his territory and open them to white settlement

1866. **Kaffraria was joined to Cape Colony.**

1867. **DISCOVERY OF DIAMONDS NEAR HOPETOWN,** on the Orange River By 1870 a considerable diamond industry grew up in the region between the Vaal and Orange Rivers

1867-1868. The Orange Free State defeated the Basutos, who had risen in protest against the cession of territory in 1866

1868, Mar. 12. **The British annexed Basutoland,** following a petition by Moshesh. His lands were returned to him, despite the protests of the Orange Free State.

Forces from the **Transvaal attempted to occupy Delagoa Bay,** but withdrew under protest from the British The question was ultimately arbitrated by President MacMahon of France, who awarded it to Portugal (1875).

1869, July 29. An agreement between the Transvaal and Portugal fixed the boundary in southeast Africa

1871. The town of **Kimberley was founded** and soon became the center of the great diamond industry By 1890 some six tons of diamonds were mined, valued at £39,000,000 The opening-up of this great wealth completely changed the economic set-up in South Africa

Oct. 27. **The British government annexed the diamond region** (*Griqualand West*), which had been under the rule of the Griqua (half-breed) chief, **Nikolaas Waterboer,** under the authority of the Orange Free State since 1854 The Orange Free State vigorously protested against this action, which had much to do with stimulating Boer distrust of the British.

1871-1872. The efforts of the British colonial secretary, **Lord Carnarvon,** and his special agent, the historian **James Froude,** to bring about federation of the South African colonies, were frustrated by the opposition of the Cape government (under **John Molteno**).

1871. The government of **Basutoland was taken over by the Cape Colony.**

1872. **Thomas Burgers,** a learned Dutch minister from Cape Colony, became president of the South African Republic.

1872. **Responsible government was established in Cape Colony.**

1875. Lord Carnarvon, continuing his efforts toward federation, arranged for an informal conference at London (Aug). As a result the claims of the Orange Free State to the diamond country were settled by a money payment of £90,000

1876. The Cape government extended its influence up the west coast of Africa, concluding treaties with native chiefs as far as the frontier of Angola, but this policy was disavowed by the home government.

1877-1880. **Sir Bartle Frere,** governor of Cape Colony. His purpose was to push forward the work toward federation

1877, Apr. 12. **ANNEXATION OF THE SOUTH AFRICAN REPUBLIC** by the British under **Sir Theophilus Shepstone.** This was intended as a step toward federation, but was a flagrant violation of the Sand River Convention The Boers, under the leadership of **Paul Kruger** (1825–1904), protested vigorously, but without avail

1877-1878. **Kaffir War.** As a result the British annexed all of Kaffraria. and in the following years (1879–1886) extended their authority to the northeast as far as Pondoland.

1877, Mar. 12. **The British annexed Walfish** (Walvis) **Bay** on the coast of Southwest Africa German missionaries had been active on that coast since 1842 (**Bethany Mission**), and had, in 1868, appealed to the British government for annexation This appeal had been rejected.

1879. **THE ZULU WAR,** against **Cetywayo** (king since 1872). Cetywayo had built up again the military power of the Zulus. Jan 22 he defeated the British in a **battle at Isandhlwana.** Reinforcements were rushed to the front, and July 4 Sir Garnet Wolseley won a decisive victory at **Ulundi.** Cetywayo was captured Aug 28 and peace was made with the Zulu chiefs Sept 1

1879. **Foundation of the Afrikander Bond,** a Dutch group designed to work for recognition of the Dutch language. Under the influence of **Jan Hofmeyr** it soon rallied most of the Dutch elements in the Cape Colony, but with a much larger program of South Africa for the South Africans, with gradual elimination of interference from the British government.

1880-1881. **REVOLT OF THE TRANSVAAL BOERS** against the British. Dec. 30 a Boer republic was proclaimed by Kruger, Joubert, and Pretorius. Jan. 28, 1881, the Boers repulsed a British force

under Sir George Colley at **Laing's Nek**, and Feb. 27 they again defeated and killed Colley at **Majuba Hill**. The British government, under Gladstone, was unwilling to contest the desire of the Boers for freedom, and Apr 5 concluded the **Treaty of Pretoria**, by which the South African Republic was given independence, but under the suzerainty of Great Britain

1880. Organization of the diamond industry. Two great corporations were founded the **Barnato Diamond Mining Company** (by Barney Barnato, an English Jew), and the **De Beers Mining Corporation** (by Cecil Rhodes and Alfred Beit)

1880-1881. The "Gun War" in Basutoland, resulting from the refusal of the natives to surrender their arms. As a result of this war, the British government in 1883 resumed the government of Basutoland as a crown colony

1882. Cetywayo was restored as king of the Zulus, but was opposed by the native chiefs. The troubles were ended by Cetywayo's death in 1884

1882. Establishment of Stellaland and Goshen, two Boer states in Bechuanaland This was part of the Boer expansion to the westward as far as the Kalahari Desert

1883, Apr. 16. Kruger became president of the South African Republic.

Aug. F. A. E. Luderitz, a German merchant, purchased from the natives a large tract of territory north of the Orange River. A short time before (Feb.) the German government had inquired in London whether the British government exercised any authority in this region The reply was evasive, but when Luderitz hoisted the German flag at **Angra Pequena** there was much excitement in London as well as at Capetown. The British government now announced that it regarded any claim to sovereignty in the region between Cape Colony and Angola as an infringement of Britain's legitimate rights There followed a rather acrimonious discussion between London and Berlin The Cape government, in the interval, urged the home government to annex all territory north as far as Walfish Bay But the attempt was frustrated by the **proclamation of German protection** over the region (Apr. 24, 1884), which was extended over all Namaqualand and Damaraland (Oct. 15, 1884). Sovereignty was vested in the Deutsche Kolonial Gesellschaft until it was assumed by the German government (1892).

1884, Feb. 27. The **Convention of London** further defined the relations of the South African Republic to Great Britain. The Transvaal was deprived of Stellaland and Goshen, but the British government agreed to the omission of definite reference to suzerainty, though the Transvaal government was precluded from making treaties without submitting them for approval to the British government

May. Fearful of German expansion eastward as far as the Transvaal and the cutting of the route to the north, the British, under the influence of **Cecil Rhodes** (1853–1902), concluded treaties of protection with the native chiefs of **Bechuanaland.**

Aug. The Boers, under Joubert, attempted to establish a republic in **Zululand** and thus secure themselves access to the sea on the east.

Dec. 18. In order to frustrate this move, **the British government annexed St. Lucia Bay** to Natal.

1885, Sept. 30. The **Bechuana territory was organized** as British Bechuanaland (the region between the Orange and the Molopo Rivers) and as the Bechuanaland Protectorate (north of the Molopo)

Nov. 28. The **railroad from the Cape** was opened as far as Kimberley.

1886, Dec. 30 An agreement between Germany and Portugal fixed the frontier between German Southwest Africa and Angola

1886. DISCOVERY OF GOLD on the Witwatersrand in the southern Transvaal Gold had been found in various parts of the Transvaal before this, but the rich reefs were opened up only at this time There was a wild rush to the Rand from all parts of the world. **Johannesburg** was laid out (Sept. 1886) and before long had a population of 100,000, of whom half were native workers By 1890 there were 450 mining companies on the Rand (capitalized at £11,000,000). The output was almost 500,000 ounces in 1890, and 1,210,865 ounces in 1892. Rhodes and his associates took an active part in the financing and organization of the industry, and his company (**Consolidated Goldfields**) soon controlled a large share of the business

1887, June 21 The **British annexed Zululand,** in order to block the effort of the Transvaal government to establish territorial communication with the sea.

1888. Amalgamation of the De Beers and Barnato diamond interests, giving the De Beers corporation, under Rhodes, practically a monopoly of the industry.

Feb. The **project of a customs union** between the Cape, Natal, and the

Orange Free State was much discussed, but the Transvaal, under Kruger, remained unalterably opposed to all schemes of federation.

Feb. 11. J. S. Moffat, a missionary and agent of Rhodes, concluded a **treaty with Lobengula,** king of the Matabele, by which the latter accepted British protection and promised to cede none of his extensive territories without the consent of the governor of the Cape.

Oct. 30. In a further treaty Lobengula gave the Rhodes interests **exclusive mining rights** in Matabeleland and Mashonaland.

1889. The Cape Colony and Orange Free State concluded a customs union At the same time the Free State and the Transvaal (South African Republic) concluded a defensive alliance.

Oct. 29. The British government granted a charter to the **British South Africa Company,** headed by Rhodes. It was given almost unlimited rights and powers of government in the huge area north of the Transvaal and west of Mozambique, without northern limit. The effect was to hedge in the Transvaal on the north, Rhodes cherishing the hope that gradually the Boer Republic would be forced into closer economic and political relations with the other states.

1890, July 17. Cecil Rhodes became prime minister of the Cape Colony He enjoyed the support of the Afrikander Bond, under Homeyr, the British and Dutch elements co-operating in a policy of South Africa for the South Africans

Sept. 12. The town of **Salisbury was founded** in Mashonaland, part of the dominion of the British South Africa Company.

Dec. The railroad from Capetown through the Orange Free State reached the Vaal River

1891, June 10. Dr. **L. Starr Jameson,** a close friend of Rhodes', was made administrator of the South Africa Company's territories

Dec. By an **agreement between the Cape government and the Transvaal,** the Cape advanced money to finance the building of the railway from Pretoria to the Portguese frontier, there to join the line (completed in 1889) to Delagoa Bay In return the Transvaal government agreed to construct a short line from Johannesburg to the Vaal River and to bridge the river to connect with the line to Capetown. The Cape government was to have the right to fix rates on this short line until Dec. 31, 1894.

1892, Sept. The first trains from the Cape arrived at Johannesburg. An immense traffic developed and the income from the railways came to be a vital factor in the finance of Cape Colony.

In Johannesburg **Charles Leonard** organized the foreign (*Uitlander*) element in the **National Union,** to agitate for better educational advantages, better police, easier franchise requirements, etc

1893, Apr. 22. Kruger was elected president of the South African Republic for another term of five years.

May 12. Responsible government was introduced in **Natal.**

July. War of Lobengula against the Mashonas. The South Africa Company interfered, defeated the Matabeles and took Bulawayo (Nov 4) The chiefs submitted (Jan. 1894) and the danger passed with the death of Lobengula (Jan. 23).

Nov. 13. By the **Pretoria Convention** Great Britain agreed that the Transvaal should have **Swaziland,** which, however, did not give the Boers access to the sea.

1894, Sept. 25. The **British annexed Pondoland,** thus connecting the Cape Colony with Natal.

Aug. Passage of the **Glen Grey Act** by the Cape Parliament This provided for a new native policy in the region east of the Kei River the natives were to be given self-government under native councils, together with a general council, under the British magistrate. Individual landholding was made possible. At the same time the property qualification for black voters in Cape Colony was raised and an educational test introduced

Nov. Rhodes paid a visit to Kruger and renewed his efforts to induce the Transvaal government to join the other states in a customs union. Having failed once more, Rhodes began to support the Uitlander agitation in Johannesburg and ultimately financed a **revolutionary movement against Kruger's government.**

1895, May 3. The territory of the South Africa Company south of the Zambezi was named **Rhodesia,** in honor of Rhodes

June 11. The **British annexed Tongoland** in order to block the last possible access of the Transvaal to the sea (through Swaziland and Tongoland)

July 8. Opening of the Delagoa Bay Railway from Johannesburg and Pretoria to the sea. This gave the Transvaal at least an economic outlet free of all British influence. The Delagoa Bay route being

much shorter than that to the Cape, traffic began to be diverted. This process was hastened by the imposition of prohibitive rates on the short line from Johannesburg to the Vaal River. In order to circumvent this move, the shippers began to use ox-wagons, crossing the fords (*drifts*) of the Vaal and proceeding thence to the Rand. Kruger then ordered the drifts closed, but the British government interfered vigorously and Kruger yielded to an ultimatum (Nov. 8).

Nov. 11. British Bechuanaland was attached to the Cape Colony. Northern Bechuanaland became the Bechuanaland Protectorate, but a narrow strip of it, along the Transvaal frontier, was turned over to the South Africa Company on Rhodes' plea that it was needed for the extension of the railway from Mafeking north into Rhodesia. In reality the strip was desired so that the company could station a force at Mafeking, the nearest point on the frontier to Johannesburg. When the revolution, planned for Dec., should have broken out on the Rand, Dr. Jameson was to ride in and take control of the situation. Actually the conspirators in Johannesburg decided to postpone action and Rhodes warned Jameson not to proceed. But the latter, convinced that all that was needed was a little encouragement, disregarded orders and set out on his famous raid

1895, Dec. 29—1896, Jan. 2. THE JAMESON RAID. With 660 men Jameson tried to cover the 140 miles to Johannesburg, but the Boers, who had learned of the plans, closed in on him, defeated him at **Krugersdorp** (Jan. 1) and forced his surrender at **Doorn Kop** (Jan. 2). At the demand of the British government Jameson was handed over for trial in England He was condemned, but given a light sentence The Johannesburg leaders were arrested and several condemned to death by the Transvaal courts They were ultimately released in return for a large money payment

1896, Jan. 3. The Kruger Telegram, in which the German emperor congratulated Kruger on his success in suppressing the movement This step created an acute crisis in the relations of Britain and Germany (p 744)

Jan. 6. Because of his part in the Jameson raid episode, **Rhodes was obliged to resign** as prime minister of the Cape Colony. He did not re-enter politics until 1898

Mar. In Rhodesia there was another **rising of the Matabele** and (June) Mashona tribes. This was not suppressed until Oct.

Mar. 17. The Transvaal and the Orange Free State concluded an offensive and defensive treaty, a direct reaction to the Jameson raid.

Sept. 26. Aliens Expulsion Act passed in the Transvaal. This, and

Nov. 26. The **Aliens Immigration Restriction Act** and various restrictions on the press and on public meeting, resulted in continuous friction between Great Britain and the Transvaal, culminating in a **dispute about British suzerainty** over the republic.

1897, Aug. Sir Alfred Milner became high commissioner in South Africa

Nov. 4. The railroad from the Cape reached Bulawayo, in southern Rhodesia. This line was intended by Rhodes ultimately to connect the Cape with Cairo

Dec. 1. Zululand was annexed to Natal. In Natal the growing feeling of opposition to immigration of Indians led to the prohibition of entry of "free" (i e unindentured) Indians and the closing of many occupations to those already in the country.

1898, Feb. 10. Kruger was re-elected president of the South African Republic for five years. This meant a defeat for the more progressive element among the Transvaal Boers, which favored a more generous policy toward the immigrant foreigners and an agreement with the other South African states. The result was a marked revival of the **Uitlander agitation,** which met with the fullest sympathy from Milner. By the end of the year Milner was already convinced that the only solution of the problem would be through war, and that the war would amount to little more than a slap in the face. This forward policy, however, had little response in England The cabinet, confronted with several serious international problems, was eager to avoid an unpopular war if possible, and so resisted Milner's prodding

1899, Mar. 24. The Uitlanders sent a petition with 20,000 names to Queen Victoria, recounting their numerous grievances.

May 31—June 5. The **Bloemfontein conference** between Milner and Kruger, arranged through the efforts of President Steyn of the Orange Free State Milner insisted on the immediate grant of the franchise to foreigners who had been 5 years resident in the Transvaal. This Kruger refused and the conference broke down. But July 11 the Transvaal government passed a law granting the franchise on completion of 7 years' residence. The British government thereupon proposed a

joint inquiry as to the working of this law, but Kruger countered with the suggestion of reducing the term to 5 years in return for an abrogation of suzerainty. When Britain rejected this, Kruger took back his offer. By this time (Sept.) both sides had begun to make military preparations Kruger, ever since the Jameson raid, had been convinced that the British were intent on the acquisition of the rich Transvaal, while the British had gradually come to believe that Kruger was actively furthering a plan to drive the British out of South Africa and set up a confederation of Boer republics. Feeling that further negotiation was futile, and wishing to take advantage of the small forces which the British yet had in South Africa, Kruger sent an ultimatum (Oct 9), which the British rejected The Orange Free State joined the Transvaal (Oct. 11) and war broke out Oct. 12

1899, Oct. 12—1902, May 31. THE SOUTH AFRICAN (BOER) WAR. At the outset the British had only about 25,000 men available, the Boers having a distinct advantage in numbers In addition the Boer forces were admirably equipped with small arms and with Krupp and Creusot artillery The commander-in-chief, Gen **Joubert,** hoped to push through Natal and capture Durban, thus gaining access to the sea. He brushed aside Sir George White at **Laing's Nek** (Oct. 12), suffered a temporary reverse at **Elandslaagte** (Oct. 21), but won a battle at **Nicholson's Nek** (Oct 30) and invested **Ladysmith** (Nov. 2). In the west the Boers invested **Mafeking** (Oct 13; valiant defense by Colonel Baden-Powell) and besieged **Kimberley** (Oct 15) The British, under Methuen, drove back Cronje and the Boers on the **Modder River** (Nov 28), but there soon followed the **Black Week** (Dec 10–15), when Cronje's victory at **Magersfontein** (Dec. 10–11) frustrated Methuen's efforts to relieve Kimberley and when Buller, commanding in Natal, failed (**battle of Colenso,** Dec 15) to effect the crossing of the Tugela River in the advance on Ladysmith

Buller was thereupon relieved of the supreme command, and his place was taken by Gen Lord **Roberts,** with Gen **Kitchener** as his chief-of-staff. They arrived in South Africa on Jan. 10, 1900 In the meanwhile the fighting about Ladysmith had continued indecisive. Jan 18 Buller finally managed to cross the Tugela and capture **Spion Kop** (Jan. 25), but was again forced back. A third attempt to establish himself beyond the river also met with failure (Feb. 6–7). But French began a vigorous advance to relieve **Kimberley,** which was successful (Feb 15). Cronje was defeated at **Paardeberg** (Feb 18) and obliged to surrender (Feb. 27) At the same time Buller, having finally crossed the Tugela (Feb 18), **relieved Ladysmith** (Feb 28).

The British, now heavily reinforced, were henceforth able to maintain the offensive. Roberts took **Bloemfontein** (Mar 13), and, advancing up the railroad, arrived at **Kroonstad** (May 12), while in Natal Buller drove the Boers back from Glencoe and Dundee (May 15) The **Orange Free State** having been overrun, it was annexed to the British possessions as the **Orange River Colony** (May 24) **Mafeking was relieved** (May 17–18) and the invasion of the Transvaal begun **Johannesburg was taken** (May 31) and **Pretoria occupied** (June 5) Buller then forced the passes of the Drakensberg and began the invasion from the Natal (June 10). On July 4 the forces of Roberts and Buller effected a junction at **Vlakfontein.** On Sept 3, the **Transvaal was annexed** as the Transvaal Colony Kruger fled to Delagoa Bay and went thence to Europe All efforts to interest other powers and provoke intervention failed But the Boer leaders, defeated in regular warfare, now adopted **guerrilla tactics,** thereby prolonging the war by another eighteen months. Small forces repeatedly raided into the Cape Colony, harassed the lines of communication, attacked the railway lines, etc Ultimately Kitchener (commander-in-chief since Nov. 1900) was obliged to erect a line of **blockhouses** and to organize **concentration camps,** into which some 120,000 Boer women and children were brought (about 20,000 of this number died of disease and neglect). The Boer farms were ruthlessly destroyed and the *guerrilleros* finally harried into submission At the end of the war Britain had 300,000 troops in South Africa to deal with the 60,000 to 75,000 Boers. By the **Treaty of Vereeniging** (May 31, 1902) the Boers accepted British sovereignty, but were promised representative institutions as soon as circumstances should permit, the British government promised a grant of £3,000,000 to enable them to rebuild their farms.

1903, Feb. Visit of Joseph Chamberlain, secretary for the colonies, to South Africa He convinced himself of the hopelessness of the policy initiated by Milner of establishing English supremacy throughout the conquered areas Gradually the government swung back to a policy of conciliation and Anglo-Dutch equality

Dec. The Transvaal government, under pressure from the mining interests, agreed to the **importation of Chinese coolies.** In a short time over 50,000 of them were

brought in, but their disorderliness, marked by several outbreaks and much terrorism, soon brought about vigorous agitation for their repatriation.

1904, Jan.—1908. The great **HERRERO INSURRECTION in German Southwest Africa,** which was suppressed only after many systematic campaigns, by a force of some 20,000 men

1905, Jan. **Gen. Botha** formed the organization called *Het Volk*, to agitate for the introduction of responsible government in the Transvaal A similar organization, *Orangia Unie*, sprang up in the Orange River Colony

Mar. 1. The **Earl of Selborne** succeeded Milner as high commissioner in South Africa

Apr. 25. The **Transvaal was granted a constitution,** with an elected assembly This arrangement was condemned by Botha as inadequate.

1906, Dec. 6. By a new constitutional instrument, the **Transvaal was granted responsible government.**

1907, Feb. 26. In the first Transvaal elections, Botha's party, *Het Volk*, won 37 seats, as against 21 for the Progressive Party. Botha thereupon became premier (Mar 4) and control passed to the conquered Boer element

Mar. 22. The Transvaal government passed an **Asiatic registration bill** and provided for the restriction of immigration of Indians The Indian population, led by an Indian lawyer, **Mohandas Ghandi** (1869–1948), later to become leader of the nationalist movement in India, began a long campaign of passive resistance

June 14. The Transvaal government decided to repatriate the Chinese coolies imported a few years previously

July 1. A **new constitution,** with responsible government, was established in the **Orange River Colony.**

1908, Oct. 12—1909, Feb. 3. **MEETING OF A CONSTITUTIONAL CONVENTION,** first at Durban, then at Capetown. The purpose of the meeting was to discuss the relationship of the Cape Colony, Natal, Orange River Colony, and Transvaal to each other The older ideas of federation were now brushed aside and the sentiment spread rapidly in favor of union. The convention agreed on a scheme for a **Union of South Africa,** at the head of which was to be the king, represented by the governor-general There was to be a two-chamber parliament: the **Senate,** composed of eight members from each state (province), elected by the representatives of that province in the House of Assembly, sitting with the provincial council of the province; the governor-general was to appoint eight additional members of the Senate (in recent years a number of these appointed members have been men versed in native affairs and fitted to speak for the native population), the term of the Senate was fixed at 10 years; the **House of Assembly** was to be composed of about 150 members, popularly elected, roughly on the basis of population, but in each province under the electoral arrangements in existence there, the term of the House was to be 5 years, it was to have complete budgetary control and the ministry was to be responsible to it The English and Dutch languages were both established as official languages The provinces were to be governed by an **administrator** appointed by the Union government, he was to be assisted by an **executive committee,** consisting of himself and four members elected by the provincial council, the **provincial council** was to be popularly elected, have a term of 3 years, and be indissoluble before the completion of the term The powers of the provincial governments were distinctly limited, and they were clearly subordinated to the Union government The **seat of the legislature** was established at Capetown, but the **seat of government** at Pretoria, Bloemfontein became the seat of the court of appeal

1909, Sept. 20. The draft constitution was approved by the British Parliament as the **South Africa Act.** It went into effect on May 31, 1910

1910, Apr. 27. Botha and Hertzog founded the **South African Party** as the successor to the old *Afrikander Bond* in the Cape Colony, *Het Volk* in the Transvaal, and *Orangia Unie* in the Orange Free State (this name was restored at the time of union). The party was a moderate nationalist party, aiming at equality of English and Boer and at independent status for South Africa within the British Empire

May 24. Dr Jameson founded the **Unionist Party,** an English-imperialist group.

Sept. 15. In the **first Union elections,** the South African Party won a decided victory (67 seats as against 37 for the Unionists) **Botha became prime minister** of the Union

1911, Aug. 17. Northeastern and northwestern Rhodesia were united as **Northern Rhodesia,** under the administration of the South Africa Company.

1913, June 14. An **Immigration Act** restricted the entry and free movement of Asiatics This measure was followed by extensive agitation and rioting on the part of the Indians, led by Gandhi

June 16. The Natives Land Act restricted the purchase or lease of land by natives and set aside further areas as reserves, thus extending the policy of segregation

1914, June 30. The **Smuts-Gandhi letters,** in which Smuts, as colonial secretary in the Botha cabinet, promised Gandhi that the law regarding Asiatics would be enforced in a just manner and with due regard to vested interests So much having been gained, Gandhi departed for India (July 20)

Jan. Gen Hertzog founded the **Nationalist Party** in opposition to Botha's South African Party. It drew its strength almost exclusively from the rural, Boer areas and became the organ of Boer separatism.

Sept. Botha, despite Hertzog's opposition, secured approval for a policy of supporting Great Britain in the World War and for sending an expedition against German Southwest Africa.

Oct. 13—1915, Feb. Outbreak of **rebellion in South Africa.** The Boer extremists, led by Gens De Wet, Beyers, etc., had to be suppressed by force **De Wet** was captured (Dec 1) and **Beyers** was drowned (Dec. 8). The movement then began to collapse

Dec. 25. The South African forces captured **Walfish Bay,** which had been taken by the Germans

1915, May 12. Botha took the town of **Windhoek,** the capital of German Southwest Africa

July 9. The Germans surrendered at Grootfontein. The colony was made a protectorate of the Union and placed under martial law.

(*Cont. pp.* 918, 1091.)

9. MADAGASCAR

Little is known of the original inhabitants of Madagascar, but the island was subjected to several waves of invasion from outside. **Arabs** came in before the 9th century and settled on the northwest and southeast coasts, where remnants are to be found today There was evidently also an influx of **Africans,** probably slaves of the Arabs But the bulk of the population, speaking one language of many dialects, is of **Malayo-Polynesian** and **Melanesian** stock The most advanced group, which probably arrived from overseas in the 8th to 10th centuries, is the **Hova,** light in color and of distinct Mongoloid features They moved from the east coast onto the central plateau, but not until the early 19th century were they able to establish predominance over other tribes

Madagascar was first discovered by the Portuguese **Diego Diaz** in 1500 The first Frenchmen landed in 1527, without settling **Portuguese missionaries** attempted, though unsuccessfully, to convert the natives (1600–1619) During the 17th and 18th centuries both the Dutch and the French attempted to establish posts along the coasts The **French took Diego Suarez** on the northern tip of the island in 1638 and settled on the Bay of Antongil in 1642 They founded **Fort Dauphin** (extreme southeast coast) in 1643 In 1664 the French posts were turned over to the **Société des Indes Orientales** and the island was successively called *La France Orientale* and *Ile Dauphine* But in 1672 the natives drove the French out of Fort Dauphin, which was destroyed In the following century the French once again established a foothold, this time on the island of **Ste. Marie,** off the east coast (1750–1761). In 1774 a Polish adventurer, **Benyowski,** who had escaped from Siberia, was given a commission for a French settlement He founded **Louisbourg** on the Gulf of Antongil and set himself up as ruler of the whole northeast coast Having returned to France in 1776 to ask for formal protection, he was repudiated Ultimately he received a subsidy from the United States government, returned to Madagascar and proclaimed himself an independent ruler He was attacked and slain by a French expedition in 1786

1787-1810. ANDRIANAMPOINMERINA, King of the Hovas He reunited the territory and extended the Hova authority over much of the island

1803. Under orders from Napoleon, **Sylvain Roux** and a French force established itself at **Tamatave.**

1810-1811. The British, under **Sir Robert Farquhar,** seized Mauritius, Réunion, and the French stations in Madagascar Réunion was returned by the Treaty of Paris (1814), but Farquhar's efforts to maintain the British position **in**

Madagascar were not encouraged by the home government

1810-1828. RADAMA I, King of the Hovas He was a vigorous ruler, intent on modernizing his kingdom From the British at Mauritius he secured firearms and military trainers In other ways, too, he encouraged the spread of British influence

1818. The London Missionary Society established its first posts in the country, meeting with unusual success By the end of the century almost half a million of the natives were converted to Christianity

1818-1819. The French began to occupy posts, notably Fort Dauphin But in 1825 Radama, supposedly instigated by the British, ejected them

1828-1861. RANAVALONA I, Queen of the Hovas. From the very outset she showed herself hostile to European influence (British as well as French) and also to missionary enterprise.

1829, Oct. A French squadron bombarded Tamatave in protest against the hostile policy of the government, but without real effect.

1830. The new French government of Louis Philippe ordered the withdrawal from all French stations except Ste Marie

1835. The Hova government forbade the practice of the Christian religion and forced the English missionaries to leave.

1840-1841. By treaties with the local chiefs, the French acquired a number of the islands off the northwest coast.

1845, May 13. By order of the Hova government, all foreigners were made subject to native law, including trial by ordeal By way of protest the **French and British together bombarded Tamatave** in 1846, but again without making any impression upon the government. European influence was reduced to almost nothing.

1859. A number of chiefs on the west coast accepted the French protectorate

1861-1863. RADAMA II, son of Ranavalona. The new king was a Christian, and at once reopened the country to the Europeans.

1862. The Hova government concluded **treaties with both France and Great Britain.**

1863, May 13. The Hova aristocracy (*Andriana*) revolted against the policy of the king, who was taken and strangled.

1863-1868. RASOHERINA, Queen of the Hovas

1865-1870. Exploration of Madagascar by the French scientist, **Alfred Grandidier,** whose exhaustive researches are still authoritative

1865, June 27. By **treaty with Great Britain,** Christians were again tolerated and missions protected.

1868-1883. RANAVALONA II, queen. During her reign and that of her successor (i e. till 1896) the real ruler of the country was the first minister, **Rainilaiarivony,** who was married to the last three queens in succession Rainilaiarivony was a Christian, but distinctly suspicious of French designs His policy, therefore, was to rely upon the British to resist French encroachment

1868, Aug. 8. TREATY OF FRIENDSHIP AND COMMERCE WITH FRANCE. The French recognized Hova supremacy over the entire island, but in return were given consular jurisdiction over French nationals

1869. Protestantism was proclaimed the state religion.

1877, Oct. Treaty of commerce with the British, who induced the Hova government to proclaim the **liberation of slaves.**

1879. Beginning of **friction with France,** growing directly from a dispute as to the inheritance of extensive lands which had been granted to the French consul, **Jean Laborde.**

1882. The French government claimed a protectorate over the entire northwestern part of the island, on the basis of the Treaties of 1840. The Hova government took its stand on the Treaty of 1868.

1883, June 1—1885, Dec. 17. WAR WITH FRANCE. The French government submitted a stiff ultimatum, which was rejected French squadrons thereupon bombarded **Majunga** and **Tamatave,** which was taken June 13 The war dragged on inconclusively until 1885, when the downfall of the colonialists (Jules Ferry) in France led to the conclusion of

1885, Dec. 17. The **treaty with France** which gave France control of Madagascar's foreign affairs, **Diego Suarez,** at the northern tip of the island, was ceded to France outright; a heavy **indemnity** was to be paid, and **Tamatave occupied** until the obligation had been met; France was permitted to send a resident to the court of Tananarive, but with the understanding that there should be no interference with domestic affairs.

1886. **The French occupied the Comoros Islands** (Mayotte had been taken in 1841).

1890. Great Britain (Aug. 5) and Germany (Nov 17) recognized the **French protectorate over Madagascar,** as part of the larger general colonial settlements made at that time.

1893. Further friction between the French and the Hova government, which resented the French claims to a protectorate.

1894, Nov 10—1896, Jan. 16. THE FRENCH CONQUEST. The Hova government rejected a French ultimatum embodying extensive claims. The French thereupon occupied **Tamatave** (Dec 12) and sent an expeditionary force of about 15,000 men under Gen **Duchesne** to conquer the country Duchesne landed at Majunga (Feb 1895), but was delayed for months by fever and transportation difficulties. Finally a small column was organized to push on to the capital, **Tananarive.** The place was bombarded (Sept 30) and surrendered at once The queen agreed to accept the French protectorate on condition that she retain sovereignty, but a treaty along these lines (Oct 1) was rejected by the French government.

1896, Jan. 16. The French proclaimed possession of the island, after forcing the queen to accept The immediate result of this step was the outbreak of a widespread anti-foreign and anti-Christian insurrection

Aug. 6 MADAGASCAR WAS PROCLAIMED A FRENCH COLONY. Gen **Gallieni** was sent out to pacify the island and organize the government He remained as governor-general until 1905, by which time order had been restored, administration set up, roads built, native tribunals organized, and some schools opened

1897, Feb. 28. Gallieni deposed the queen and put an end to the Hova dynasty. Ranavalona was exiled first to Réunion, then to Algeria (d. 1917). The French thenceforth ignored the primacy of the Hovas and dealt with all tribes on an equal basis

1904, Apr. 8. By the general settlement between Great Britain and France (p 752) all British claims in Madagascar were disposed of. (*Cont. p.* 1093)

J. ASIA

1. PERSIA

1794-1925. THE KAJAR DYNASTY, founded by

1794-1797. AGA MOHAMMED (crowned 1796), a brutal, avaricious, and ambitious chieftain. He managed to suppress a revolt in Georgia and also to reduce Khorasan, but his successful military operations were cut short by his assassination

1797-1835. FATH ALI SHAH, the nephew of Aga Mohammed, a ruler fond of wealth and splendor, but no general His reign was marked by the involvement of Persia in the conflicts of Europe, by the rapid infiltration of foreign influence, and by the beginning of Russia's successful advance in Central Asia

1798. The British, fearful for India, **induced the Persians to attack Afghanistan,** thus initiating a long struggle by the Persians to recover their eastern provinces

1800. Russia annexed Georgia, the last king of which, George XII, appealed for Russian support against Persia

1800. The first Malcolm mission to Persia Sir John Malcolm, representing the East India Company, concluded a political and commercial treaty, the shah was to make no peace with the Afghans unless the latter renounced their designs on India The British were to supply arms and money in the event of an attack on Persia by Afghanistan or France

1804. War with Russia. The Russians advanced on Erivan, but were forced to retire. Indecisive fighting continued in Gilan

1806. Arrival of a **French mission under Jaubert.** Napoleon offered to support the Persians in the reconquest of Georgia and in an attack on India

1807, May. Treaty of Finkenstein, between France and Persia. The French government sent out Gen. **Gardanne** with 70 officers to reorganize the Persian army, but after the conclusion of the Treaty of Tilsit (p 593) the French lost interest

1808. Mission of Sir Harford Jones. He induced the Persians to dismiss Gardanne, in return for a subsidy and the aid of British officers.

1810. Another mission under Malcolm succeeded in definitely establishing the British influence

1812. Russian victory over the Persians in the **battle of Aslanduz.**

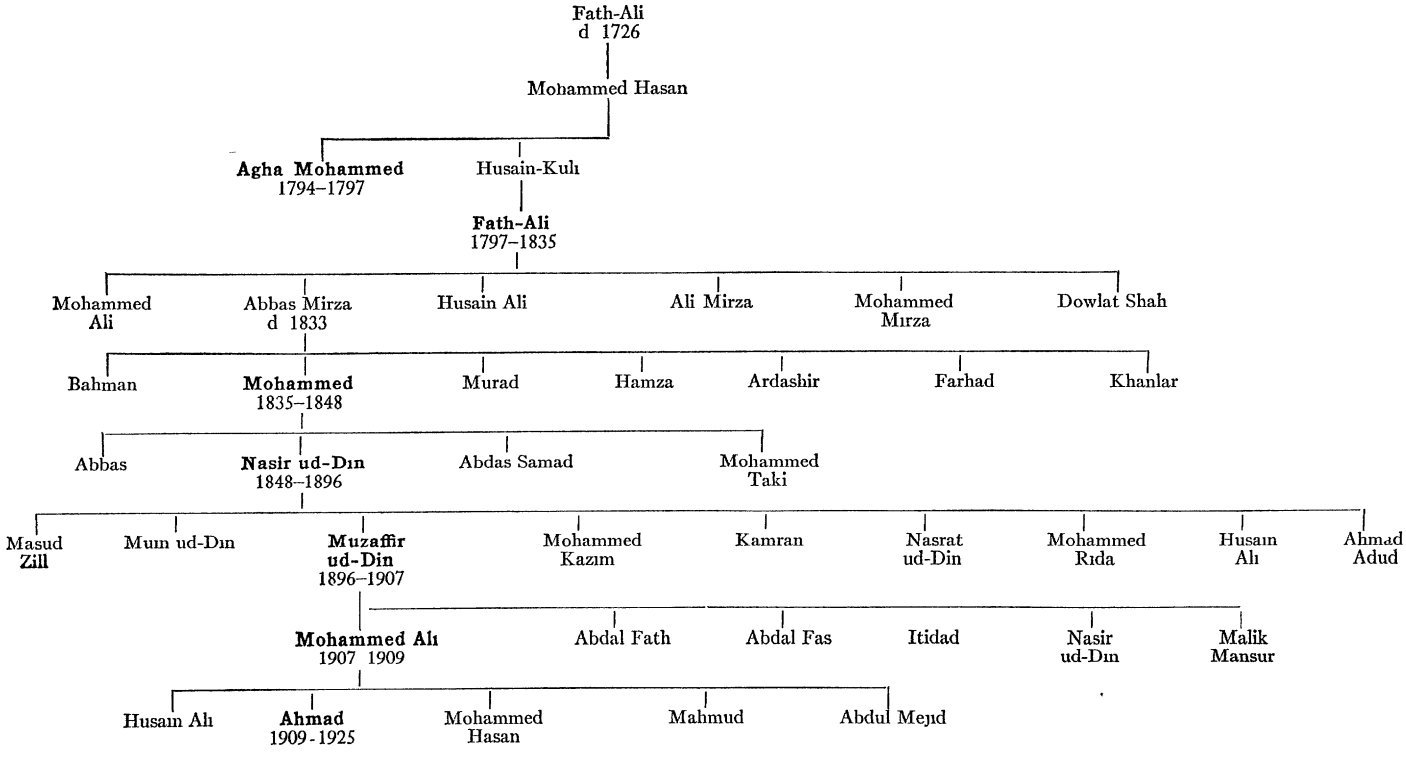
1813, Oct. 12. Treaty of Gulistan, between Russia and Persia. The latter ceded Derbent, Baku, Shirvan, Shaki, Karabagh, and part of Talish, and also gave up claims to Georgia, Daghestan, Mingrelia, Imeritia, and Abkhasia

1814, Nov. 25. Definitive treaty with England. Persia was to cancel all treaties with European powers hostile to England and to exclude all European armies hostile to England Mutual aid was to be given in case of attack, and England was to pay a subsidy of £150,000.

1821-1823. The last war with Turkey brought Persia some successes, but ended in the **Treaty of Erzerum,** which involved no territorial changes

1825-1828. War with Russia resulting from the Russian seizure of Gokcha, disputed territory The Persians were defeated by Paskievich in the **battle of Ganja** (1826), after which the Russians took Erivan and Tabriz (1827)

1828, Feb. 22. TREATY OF TURKMANCHAI: Persia ceded to Russia the provinces of Erivan and Nakhchivan, and paid a huge indemnity



1835-1848. MOHAMMED SHAH, who ascended the throne with the support of both England and Russia His general policy, however, was less friendly to England, and a military mission (1834–1838), which attempted to modernize the army, was ultimately obliged to withdraw

1837-1838. The Persians besieged Herat, which was valiantly defended (Eldred Pottinger). Finally the shah yielded to British pressure and gave up the operation

1847. Confirmation of the Treaty of Erzerum (1823), providing for delimitation of the Turkish-Persian frontier This was not actually completed until Oct 1914, England and Russia acting as arbitrators

1848-1896. NASIR UD-DIN, the son of Mohammed, and on the whole the ablest ruler of the Kajar dynasty. In his

The Kajar Dynasty

early years (till 1852) his energetic minister, **Mirza Taki Khan,** undertook extensive financial and military reforms, which promised well for the country, but which came to an end with Taki's downfall The shah himself on three occasions visited Europe (1873, 1878, 1889)

1849-1854. Russian conquest of the Syr Darya Valley, beginning the advance of Russia to the Persian frontier in Central Asia

1850. Execution of Sayyid Ali Mohammed, the *Bab* (Gateway), and founder of **Babism,** a new mystical movement in Islam In the succeeding years the numerous followers of the Bab were ruthlessly persecuted and finally (1864) expelled, most of them finding refuge in Turkey The Bab's successor, **Baha Ulla** (*Splendor of God*), gave the movement a new turn and founded **Bahaism,** a less strictly Islamic version of the new doctrine

1856. The Persians took Herat, whereupon the **British declared war** on Persia A British force took Kharak Island and occupied Bushire and (1857) Mohammerah. By the **Treaty of Paris** (1857) the shah was obliged to evacuate Afghan territory and to recognize the independence of the country. In case of dispute he was to make use of British good offices

1864. Opening of the **first telegraph** in Persia (Baghdad-Tehran-Bushire) constructed by British interests as part of the line to India The line from Europe (Odessa–Tiflis–Tehran) was opened in 1870

1872. The boundary between Persia and Afghanistan was defined.

1872. The Reuter concession, granted to Baron de Reuter, a British subject, envisaged the economic development of the country in many directions and pledged the customs by way of payment The concession proved impracticable and was cancelled by the government

1878. Establishment of **the Cossack Brigade,** a force trained by Russian officers and an important instrument for the spread of Russian influence

1884. The Russian conquest of Merv completed the subjection of Turkmenistan and brought Russia to the frontier of Persia. From this time the **growth of Russian influence** in northern Persia was rapid and almost irresistible.

1888. Opening of the lower Karun River to navigation by British interests (Lynch Brothers).

1889. Baron de Reuter secured a concession for the **Imperial Bank of Persia,** with the right to exploit the mineral wealth of Persia (except gold and silver). The bank became the focal point of British interests

1890. The government granted a concession for the production, sale, and export of tobacco, but aroused thereby so much popular and religious opposition that the concession was cancelled

1892. The British government granted Persia a loan, with the customs of the Persian Gulf coast as security.

1896. Assassination of the shah, who was succeeded by his son

1896-1907. MUZAFFAR UD-DIN, an incompetent and weak ruler, constantly in need of money for his own purposes His reign marked the **acute phase of the rivalry of Russia and Britain.**

1900, Jan. Russia, through the Banque d'Escompte de Perse (practically a branch of the Russian finance ministry) granted Persia a loan of 22½ million rubles, with the customs of all Persia, excepting the Gulf coast, as security Persia was to liquidate the earlier British loan and to accept no other offers for ten years. In Mar. 1902 the Russian government added another loan, receiving in return the **concession for a road from Julfa to Tabriz and Tehran.**

1900. Russian ships appeared at Bunder Abbas and plans were being considered for the construction of a railroad across Persia to the Gulf coast The British government made no secret of its opposition, and finally, in 1903, Lord Curzon made a grand tour of the Persian Gulf to refresh the British ascendancy there.

1901. Mr. **W. K. d'Arcy,** a New Zealander, secured a 60-year **concession to exploit for oil** through most of the country. The government was to receive £20,000 and the same amount in paid-up shares, and was to have 16% of the annual profits. The concessionaire spent much time and money in futile operations, until, in 1908, the field at Masjid Sulaiman was discovered.

1902, Dec 13. Russia induced Persia to promulgate a **new tariff,** very favorable to Russian goods and equally unfavorable to the British.

1903. The Persian customs were put under the administration of **M. Naus,** a Belgian national

1905, Dec. BEGINNING OF THE PERSIAN REVOLUTION. Opposition to the incompetent rule of the shahs went back at least until 1890, and was centered in the commercial classes and the religious leaders. Inspiration of **Jamal**

ud-Din el Afghani, the eminent teacher of Pan-Islamic ideas, who was a Persian by birth (b. near Hamadan, 1838) and was at times closely associated with Shah Nasir ud-Din. In 1905 the movement was directed at the spread of foreign interests and control and at **Ayn ud-Dola**, the powerful and corrupt minister (1903–1906), who was held chiefly responsible

1906, July. The Great *Bast* at the British legation Several thousand revolutionaries took refuge on the legation grounds The shah was obliged to yield to the popular demand. He dismissed Ayn ud-Dola and (Aug 5) agreed to the convocation of a national assembly (*majlis*).

Oct. 7. The first majlis met at Tehran and drew up a constitution of the accepted liberal type. The shah died just after signing it (Dec. 30) and was succeeded by his son

1907-1909. MOHAMMED ALI SHAH, who from the outset was hostile to the new movement and attempted to circumvent the majlis The result was

1907, Aug. The assassination of his reactionary minister, **Atabeg i-Azam,** and the establishment of a liberal ministry under **Nasir ul-Mulk.**

1907, Aug. 31. CONCLUSION OF THE ANGLO-RUSSIAN ENTENTE (p 754), by which these two powers, both uneasy about German policy in the Near East, compromised their interests in Persia. Russia recognized Britain's preponderant interest in the Persian Gulf. The southeastern part of the country was reserved as a British sphere, while the entire northern half of the country became a Russian sphere. A central belt was to be left open to concessions for either party. The Persians were in no way consulted, but were not misled by the reaffirmation, in the agreement, of the principle of the independence and integrity of Persia

1907, Dec. 15. The shah attempted a *coup d'état* and imprisoned the liberal prime minister This led to a **popular uprising** in various parts of the country, and the shah was obliged to yield

1908, June 23. Successful *coup d'état* of the shah With the secret support of the Russian legation and the aid of the Cossack Brigade, the shah shut down the assembly and had many of the liberal leaders killed Martial law was established in Tehran, but at Tabriz **the populace revolted** and seized control The shah sent an army against the city, but a deadlock ensued.

1909. Formation of the **Anglo-Persian Oil Company** to exploit the d'Arcy concession. A pipe line was constructed from the oil fields of southwestern Persia to Abadan Island in the mouth of the Shatt el-Arab and Persia soon became a leading producer of oil

Mar. 26. A Russian force invaded northern Persia and raised the siege of Tabriz Brutal action of the Russians in occupying the city for the shah.

June. Ali Kuli Khan, a leader of the Bakhtiari tribe, began the march on Tehran to defend the constitutional régime

July 12. He took the city and deposed the shah (July 16).

1909-1925. SULTAN AHMAD SHAH, the twelve-year-old son of Mohammed Ali. He was wholly under the control of the more radical elements, who set up a regent to govern the country.

1911, May 12. Arrival of W. Morgan Shuster, an American, who had been invited to order the finances of Persia. Shuster was given almost dictatorial power by the majlis, and began to organize a treasury gendarmerie The Russians, already suspicious, frustrated his attempt to secure the services of **Maj. Stokes,** a British officer, and in other ways opposed the constructive efforts of the reformer.

July 18. The ex-shah, evidently with the connivance of the Russians, left his retreat in Russia and **landed at Astrabad.** His force was defeated by the government (Sept. 5)

Nov. 5, 29. Two Russian ultimata, aiming at the dismissal of Shuster, were rejected by the majlis Thereupon **the Russians began to invade northern Persia.** Acute tension in Anglo-Russian relations

Dec. 24. The majlis was suddenly closed and locked by the action of a group of politicians, who then formed a **directory.** From this time until the outbreak of the World War, Persia was pretty much under the domination of Russia.

(*Cont. pp* 919*f*, 1106)

2. AFGHANISTAN

1793-1799. ZAMAN SHAH, the son of Timur. His reign marked the beginning of a prolonged period of dynastic conflict and tribal strife, during which the **Punjab was definitively lost** to the Sikhs Zaman at first defeated his brothers, but finally fell into the hands of his brother Mahmud, who blinded him

1799-1803. MAHMUD SHAH, who was supported by Persia

1803-1810. SHAH SHUJA, a brother of Mahmud, who seized control His reign is memorable chiefly for the **beginning of relations with the British East India Company**

1809, June 17. First agreement with the British. The latter, fearful of a Persian or French attack on India, induced the Afghans to oppose such a move and promised to support them if necessary

1810-1818. MAHMUD SHAH, having escaped from captivity and having defeated Shah Shuja, resumed the throne His main support was the vizier **Fath Ali Khan** of the Barakzai tribe, an able and energetic soldier and statesman

1816. The Persians captured Herat, but were soon driven out by the Afghans

1818. Revolt of the tribes after Fath Ali's dismissal by the shah Mahmud was unable to stay the tide and was driven out of all his territory excepting Herat, where he ruled until 1829 The rest of the country fell to the various brothers of Fath Ali, who established practically **independent khanates** such as Kabul, Kandahar, Ghazni, etc

1819. Conquest of Kashmir by Ranjit Singh, who took advantage of the confusion in Afghanistan

1826. Dost Mohammed, brother of Fath Ali, member of the Barakzai tribe and ruler of Ghazni, **captured Kabul** and began gradually to extend his influence over much of the country.

1834. Dost Mohammed took over Kandahar after defeating the local ruler In the same year **Ranjit Singh conquered Peshawar.**

1835-1839. DOST MOHAMMED became ruler of all Afghanistan and took the title of *Amir*, founding the **Barakzai dynasty.**

1837. The Persians, supported by the Russians, launched an **attack on Herat.** This offensive led to the conclusion of

1838, July 25. The Tripartite Treaty between the East India Company, Ranjit Singh and Shah Shuja, the object of which was to restore the latter to the Afghan throne and block the advance of the Persians and the Russians

1839-1842. THE FIRST AFGHAN WAR of the British against Dost Mohammed. A British force advanced to Kandahar and thence to Ghazni and Kabul Dost Mohammed was captured, deposed, and sent to India.

1839-1842. SHAH SHUJA ascended the throne again Great discontent in the country and agitation against British influence.

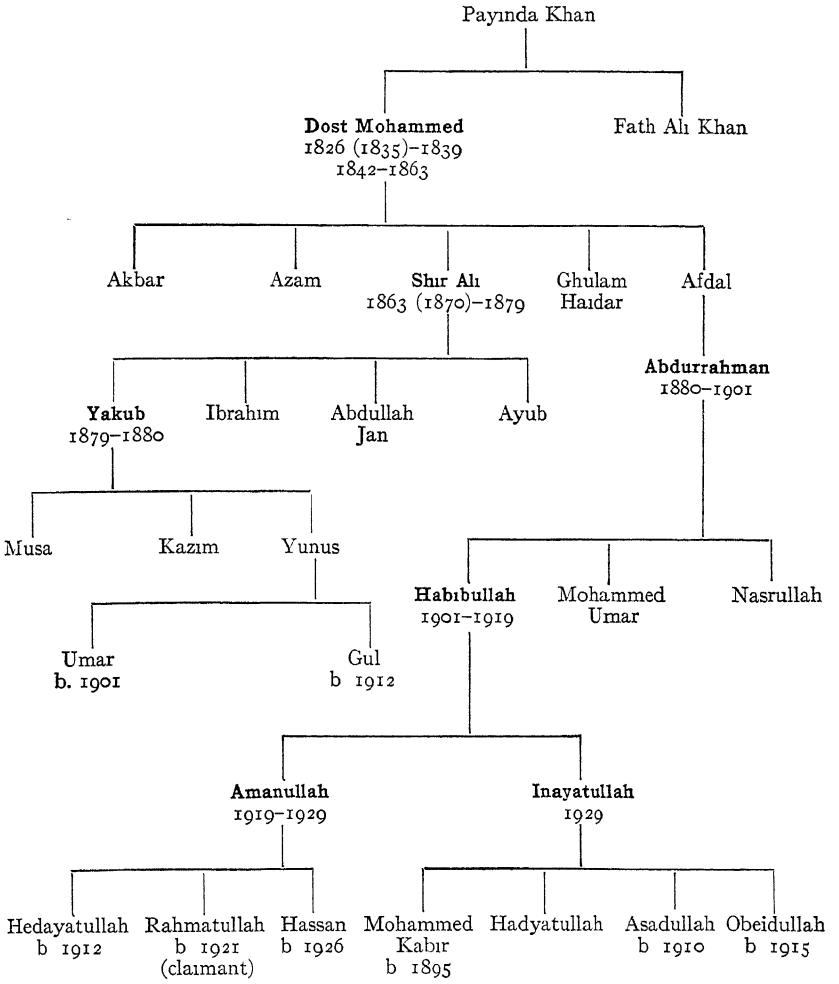
1841. Rising against the British. Murder of **Sir Alexander Burnes** and **Sir William Macnaghten,** the British envoys.

1842, Jan. The British were obliged to fall back from Kabul. In the course of the retreat they were attacked by the Afghans under **Akbar Khan** (son of Dost Mohammed) With few exceptions the entire force of over 3000 men was massacred. Shah Shuja was murdered

Sept. 14. Gen. Pollock and a punitive force from India **reoccupied Kabul** and punished the guilty, but the British government insisted on withdrawal from so exposed a position (Oct)

1842-1863. DOST MOHAMMED again ascended the throne and re-established his power, though he secured Kandahar only in 1855

1855, Mar. 30. Treaty of Peshawar, between Dost Mohammed and the British The treaty was directed against Persian designs on Herat



1856. The Persians seized Herat on the death of the local ruler This move led to the declaration of war by England (p 864) and

1857, Mar. 4. The Treaty of Paris, between England and Persia The latter power gave up its claim to Herat and recognized the independence of Afghanistan

1863. Dost Mohammed finally took Herat after a ten months' siege from the khan who had been set up after the Persian evacuation

1863-1870. Civil war following the death of Dost Mohammed His third son, **Shir Ali,** who was recognized by the British, had a hard time asserting his claim against his brothers, who for years held the upper hand

The Barakzai Dynasty

1870-1879. SHIR ALI, amir. His general policy was to lean on Russia as a counterweight to the British. The result was growing tension in relations with India

1878, June. Arrival of a Russian mission under Gen Stolietov at Kabul and conclusion of a treaty of mutual support (Aug) The Indian government thereupon insisted upon the reception of a British mission, which Shir Ali refused. The result was

1878-1879. THE SECOND AFGHAN WAR, in the course of which Shir Ali died (Feb 1879).

1879. YAKUB, the son of Shir Ali, became amir The British having overrun much of the country, he was forced to accept

May 16. The Treaty of Gandamak, by which the British were to occupy the Khyber Pass, but to pay the amir an annual subsidy of £60,000 The amir was

to conduct his foreign relations only through the Indian government British trade was to have full freedom.

Sept. 3. Native outbreak against the British. Murder of **Sir Louis Cavagnari** and his escort. The British thereupon advanced and took Kabul once more (Oct 12)

Oct. 19. Yakub abdicated and surrendered to the British.

1880-1901. ABDURRAHMAN, nephew and opponent of Shir Ali, who had been in retirement in Russia, then became amir. In a general way he accepted the Treaty of Gandamak, but throughout his reign he succeeded in playing off the British and the Russians and thereby protecting his country At the same time he subdued many of the tribes and established his authority as ruler The reign was noteworthy also for the gradual fixing of the Afghan frontiers.

1885, Apr. The Penjdeh incident, a clash between Russian and Afghan troops on the disputed border. A severe Anglo-Russian crisis ensued (p 739), but the matter was finally settled by negotiations (June 18, 1886)

1893, Nov. 12. The Durand agreement, with England, fixed the frontier with India from Chitral to Baluchistan

1895, Mar. 11. Settlement of the Pamir boundary, after years of friction with Russia Afghanistan retained a narrow strip which separated the Russian and British possessions

1901-1919. HABIBULLAH KHAN, son of Abdurrahman, amir He was a much less effective ruler and fell more and more under harem and religious influences Gradual penetration of European ideas

1905, Mar. 21. A new agreement with England reaffirmed earlier engagements This was a reply to renewed Russian activity since about 1900 (mission of commercial agents, etc)

1907, Aug. 31. The Anglo-Russian Entente, which involved compromise of Russian and British interests in Persia, included recognition by Russia of Britain's predominant position in Afghanistan Russia agreed once more to abstain from interference in Afghan affairs (*Cont p* 1109)

3. INDIA

1798-1805. LORD MORNINGTON (later **Marquis of Wellesley**) governor-general He reversed earlier policy by seeking stability through subsidiary alliances by which England supplied troops and protection in exchange for territory or monetary grants, was allowed control of the state's foreign affairs, but pledged non-intervention in internal government, and secured exclusion of every other foreign power from the state's service The **fourth Mysore war** (d Tipu 1799) led to a protectorate over Mysore; various annexations extended British control over nearly all southern India Costly **warfare with Maratha leaders** following the **Treaty of Bassein** with the Peshwa (1802) led to alarm at home, Wellesley's recall, and subsequent reversal of his policy.

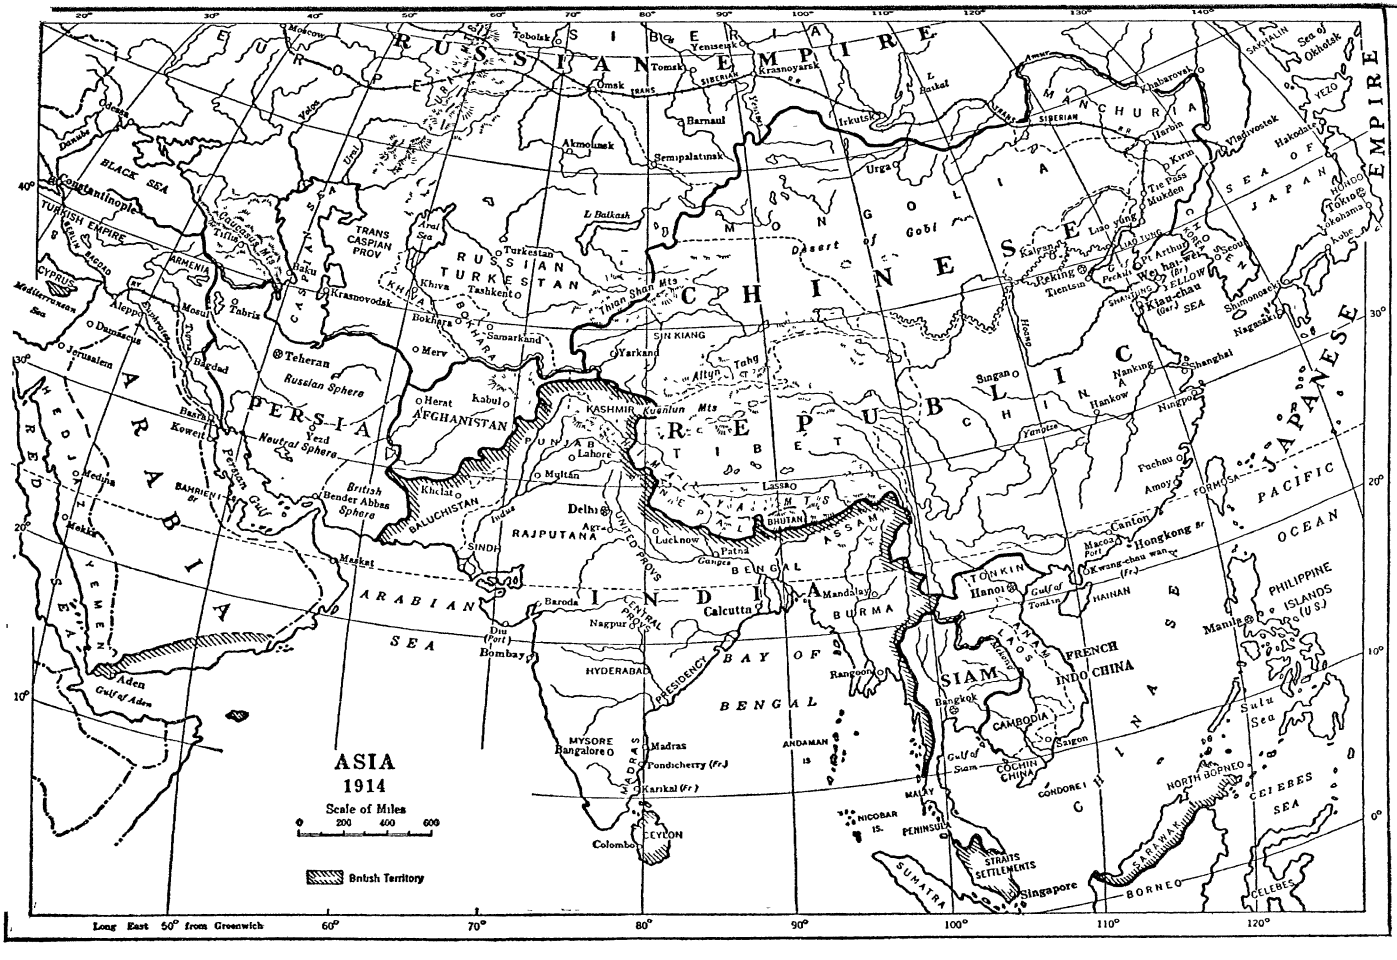
1805. Lord Cornwallis again governor-general (d. Oct)., succeeded by **Sir G. Barlow.**

1807-1813. LORD MINTO, governor-general

1809. Sutlej fixed as southern boundary, checking the advance of a Sikh confederacy under **Ranjit Singh.**

1808-1810. To curb French expansion in the east, Minto made **treaties with Sind, Persia, and Afghanistan,** and captured the French islands in the Indian Ocean and Java, which was under French control (Bourbon was later restored to France and Java to the Dutch)

1813-1823. LORD MOIRA (later **Marquis of Hastings**) governor-general



1813. Company's charter renewed for another 20 years, but its **monopoly of trade with India abolished.**

1814-1816. Gurkhas invaded from Nepal, provoking war and British acquisition of the present Kumaun Division and permanent peace with Nepal

1816-1818. The Pindari tribes, after raiding British territory, were suppressed and broken up by Hastings, hostile Maratha leaders were also defeated, leaving no native state in India proper altogether independent

1819. Occupation of Singapore by Raffles (p 875).

1824-1826. Following Burmese aggression **the first Burmese war** (see Burma) led to English acquisition of Assam, Arakan, and Tenasserim.

1827. Pretense of **subordination to the Delhi emperor abandoned;** his name removed from the coinage (1835).

1833. Company's charter renewed for 20 years, but its **monopoly of trade with China abolished;** European settlement in India allowed, law revision and codification undertaken (Macaulay)

1828-1835. LORD WM. BENTINCK, governor-general Relative peace favored reform measures ***Suttee* was made a criminal offense** (1829), bands of thugs were largely suppressed, more responsibility was given to Indians, and the vernacular was used in court

In competition with the work of Christian missionaries, who printed many vernacular texts and had begun the first vernacular newspaper (1818), **Ram Mohun Roy** organized the *Brahmo Samaj* (1828), a reform association supporting western education, which printed Hindu works in vernacular.

1835-1836. SIR C. METCALFE, governor-general, followed by

1836-1842. LORD AUCKLAND.

1839-1842. THE FIRST AFGHAN WAR (p 866)

1842-1844. EARL OF ELLENBOROUGH, governor-general Two armies sent into Afghanistan, resulting in recapture of Kabul and replacement of Dost Mohammed (p 866)

1843. Sind was annexed, following British provocation of hostilities

1844-1848. SIR H. HARDINGE, governor-general

1845-1849. First and second wars with the Sikhs, arising from disorders after Ranjit Singh's death (1839), led to acquisition of territory including **Kashmir,** and annexation of the **Punjab,** reform of its government, and permanent loyalty of the Sikhs

1848-1856. EARL OF DALHOUSIE, governor-general, accelerated public works, introducing a uniform postal rate and telegraph service and developing roads, irrigation canals, and **railways** (first line opened 1853) **Regular steamship service to England** via Suez overland route had been established in 1843.

Dalhousie adhered consistently, even when an adopted son might rule, to the **doctrine of lapse** (disavowed 1859), whereby states with no heirs in the ruling line fell to the paramount power, he annexed seven principalities

1852. Second Burmese war (p. 872) led to annexation of Pegu (lower Burma) and British dominion over entire east coast of Bay of Bengal

1856. Annexation of Oudh, which aroused increasing resentment.

1856-1862. EARL CANNING, governor-general

1857-1858. THE GREAT MUTINY. Fear of forcible conversion inflamed undisciplined and discontented sepoys (four-fifths of the army was native), who mutinied at **Meerut** (May 10, 1857) The rising spread through northern and central India (**massacre at Cawnpore** June 27) and was suppressed with difficulty (first **relief of Lucknow** by Havelock Sept 25, final relief by Campbell Nov 16) **Siege and capture of Delhi** (June–Sept) led to banishment of Bahadur Shah (d 1862) and **end of the Mogul Empire.**

1858, Sept. 1. The East India Company came to an end, the crown taking over its duties and treaty obligations Renunciation of the annexation policy was guaranteed by two *sanads* (Hindu and Moslem 1862), but Britain controlled successions and assumed responsibility for "protected" states, frequently interfering in them (from 1875 Baroda was governed by British regents). Paper currency, license taxes, and an income tax were introduced to meet the heavy debt left in 1859 **Regulation of civil service appointments** (competitive since 1853), **court reform** to include Indian magistrates, and **legislative and executive councils** (1861) including Indian representatives, all strengthened the administration, which also promoted forest conservation, agricultural experiment, famine prevention measures, and sanitation (boards in each presidency 1864).

1862-1863. Lord Elgin, viceroy, succeeded by **Lord Lawrence** (1864–1869), **Lord Mayo** (1869–1872), **Lord Northbrook** (1872–1876), and **Lord Lytton** (1876–1880)

1865. A small **war with Bhutan** led to cession of some territory for annual payment **Opening of telegraph service** to Europe.

1866. Collapse of a cotton boom which had arisen from increased production during the American Civil War.

1870-1921. Financial stability was enhanced by Mayo's decentralized policy, with fixed annual grants to provincial departments augmented by local taxes

1876. Occupation of Quetta as a safeguard against Russian encroachment in Afghanistan

1877, Jan. 1. THE QUEEN WAS PROCLAIMED *EMPRESS OF INDIA.*

1878-1881. THE SECOND AFGHAN WAR (p 867).

1880-1884. MARQUIS OF RIPON, viceroy (resigned 1884).

1884-1888. LORD DUFFERIN, viceroy, succeeded by **LORD LANSDOWNE** (to 1894).

Imperial Service troops (native forces with British officers) were put under command of the individual states, subject to the commander-in-chief only when on active service

1885 Third Burmese War (p 872), provoked by defiance of King Thibaw and his negotiations with France, **upper Burma was annexed** (Jan. 1886) and united to lower Burma in 1897.

1886. The first National Congress was convened and, although largely lacking Moslem support, came to represent the Indian voice. The Nationalist movement, led by **Surendranath Banerji, Gokhale,** and **Bal Gangadhar Tilak,** worked particularly through gymnastic societies and the press

1892. Legislative councils were enlarged and allowed, within limits, to pass on the budget

1894-1898. LORD ELGIN, viceroy.

1895. Disputed succession in Chitral led to brief war and permanent peace.

1897. Serious rising of Afridi clans in Tirah.

1898-1905. GEORGE N. (later Lord) **CURZON appointed viceroy** (took office Jan 6, 1899).

1903-1904. Expedition to Tibet under **Sir Francis Younghusband.**

1904. Co-operative credit system set up to reduce hoarding and usury (amplified with purchase and marketing societies in 1912, 52,182 co-operatives by 1922)

1905. PARTITION OF BENGAL, which seemed to favor Moslems, aroused **Nationalist opposition** (boycott on foreign goods, general violence) and led to control of meetings and the press

1905-1910. EARL MINTO, viceroy, following resignation of Lord Curzon (Aug. 12) in consequence of decision of the home government in favor of Lord Kitchener's proposals regarding Indian military administration.

1907. A meeting of the National Congress led to **rift between extremists under Tilak,** demanding complete independence, and **moderates** advocating parliamentary government.

1909, May 25. INDIAN COUNCILS ACT passed (operative Nov 15). Powers of legislative councils increased, and a majority of the members made directly elective, separate electorate for Mohammedans An Indian to be appointed to the viceroy's executive council and two Indians to the secretary's council in England (increased to three in 1919)

1910. LORD HARDINGE appointed viceroy. Wounded by anarchist bomb in Delhi (Dec 23, 1912). **Growth of Nationalist movement** influenced by: (1) the Asiatic successes in the Russo-Japanese war, (2) the dissatisfaction with the Universities Act (1904, providing greater government control in order to improve standards) and the partition of Bengal, (3) Mohammedan resentment at British acquiescence in the spoliation of European Turkey (1912), (4) the genuine desire of educated Indians for self-government. **Agitation for full self-government** in the National Congress and in the press. The movement was violent in its first years, many outrages being attempted and perpetrated, later development of a non-co-operative movement (1919 *et seq*)

1911, May 8. Agreement made with China gradually to cut off the supply of opium to China.

Dec. 12. Coronation Durbar at Delhi: king-emperor well received Transfer of the Indian capital from Calcutta to the ancient capital Delhi **Reversal of the partition of Bengal.**

1914, May 21. Komagatu Maru incident. Gurdit Singh and 400 Indians arrived at Vancouver to test the immigration laws, but were not admitted; resentment in India and some rioting near Calcutta on return of vessel (Oct 2), 16 killed

Aug. 4. British declaration of war on Germany India responded loyally with contributions of money and men. In all, about 1,400,000 men volunteered for service and took active part in the campaigns in the Near East and Africa (p 918*f.*). (*Cont. p.* IIII.)

4. INDO-CHINA

a. BURMA

The modern Burmese state was built upon the conquests of **Alaungpaya** (1752–1860), whose successors managed to repulse **invasions by the Chinese** (1766–1769), but were unable to maintain themselves in Siam (1771)

1781-1819. Bodawpaya, king Conquest of Arakan (1784) and further encroachments on Indian territory **Peace with Siam** (1793) Acquisition of the Tenasserim coast (1793)

1819-1837. Bagyidaw, king He continued the advance toward India, seizing Manipur and Assam (1822) and invading Kachar (1824) This policy of expansion soon brought him into conflict with the British East India Company

1824-1826. FIRST BURMESE WAR. Despite vigorous resistance by the Burmese, they were unable to withstand the force of a modern army The British, under Sir **Archibald Campbell,** took Rangoon, and then Syriam, Tavoy, Mergui, Martaban, and Pegu. An attempt by the Burmese to recapture Rangoon failed (1825). The British advanced up the Irrawaddy and at the same time overran Arakan. Feb 24, 1826 by the **Treaty of Yandabu** (near Ava) the British secured Assam, Arakan, and the Tenasserim coast, as well as an indemnity and the right to send a resident to Ava (discontinued 1837)

1837-1846. Tharawaddi Min, king

1846-1852. Pagan Min. Under these reigns the friction with the British continued. The Burmese rulers continued to treat the British with contempt and to hamper the development of British trade

1852-1853. SECOND BURMESE WAR. Rangoon was again taken, by Gen Godwin Pegu was also occupied and annexed (Jan 20, 1853) A revolution in the capital led to the deposition of the king and the elevation of

1853-1878. Mindon Min, described as the best king of Burma in modern times. He accepted the British gains without concluding a formal treaty, and attempted, throughout his reign, to maintain friendly relations with his neighbor.

1857. Mandalay, built by the king, **became the capital** of the country.

1862. Conclusion of a **commercial treaty with Great Britain.** The customs duty was fixed at 5% and the British were given the right to trade throughout the country

1875. A British expedition to explore the route from Bhamo into Yunnan was checked by the murder of the British interpreter

1878-1885. THIBAW, king He proved himself an apathetic and unwise ruler From the beginning of his reign he caused trouble by his interference with British trade At the same time he established contact with French interests and negotiated with them for the organization of a royal bank and for the construction of a railroad from Mandalay to the Indian frontier. This anti-British attitude resulted in

1885. THE THIRD BURMESE WAR. The British (Oct 22) sent an ultimatum demanding that Thibaw receive a British envoy and that his interference with trade be stopped, furthermore, that in future the foreign relations of Burma be conducted in accordance with the advice of the Indian government On the rejection of this ultimatum, a British steamer expedition, commanded by Gen **Sir Harry Prendergast,** occupied Mandalay (November 28). Thibaw surrendered and was sent to India

1886, Jan. 1. UPPER BURMA WAS ANNEXED by the British, but desultory guerrilla warfare continued for years The **Shan States** were not reduced until 1887 and the **Chin Hills** not until 1891.

July 24. An Anglo-Chinese convention recognized the British position in Burma. Chinese prestige was saved by a continuation of Burmese decennial tribute missions

1893. The boundary with Siam was fixed by convention.

1895. Agreement with France on the boundary with Cochin-China

1900. Agreement with China finally fixed the Burmese frontier on that side

b. SIAM

1765. Destruction of Ayuthia by the Burmese marked the end of the old Siamese kingdom After long years of war the Burmese were driven out of the country and a new dynasty (the **Chakri**) was founded

1782-1809. RAMA I (Phra Buddha Yod Fa Chulalok), first of the new line He finally brought to an end the long conflict with Burma (1793), re-established control over the local potentates throughout the country, and secured part of Cambodia through division of that state with Annam

1809-1824 RAMA II (Phra Buddha Loes Fa Nobhalai)

1824-1851. RAMA III (Phra Nang Klao), whose reign was distinguished by the reopening of **contact with the western nations.**

1826, June 20. Conclusion of a **treaty of commerce with Great Britain.** This was followed (Mar 20, 1833) by a similar treaty with the United States Both agreements left much to be desired, as they did not even provide for the establishment of consuls

1844. Cambodia passed under the protection of Siam.

1851-1868. RAMA IV (Phra Chom Klao Mongkut), who, as a monk, had made a study of western governments and who began the work of modernizing Siam

1855, Apr 18. A NEW TREATY WITH GREAT BRITAIN, modeled on the Anglo-Chinese treaty **Opening of Siam:** consuls to be established, extra-territorial system introduced, right to trade throughout the kingdom Similar treaties were concluded with the United States (1856, May 29) and with France (1856, Aug 15), and thereafter with many other powers

1863. The French established a protectorate over Cambodia After long negotiations, the Siamese gave up their claims (1867)

1868-1910. RAMA V (Phra Maha Chulalonkorn), the real founder of modern Siam. After attaining his majority (1873) he devoted himself almost entirely to the reform of his government and the improvement of his country feudal system abolished, slavery reduced and stamped out, administrative reform (central bureaucracy); taxation and finance reform, postal service; modernization of the army; introduction of the telegraph (1883); opening of the first railway (1893).

1885. Failure of a French **proposal to neutralize Siam** resulted in ever-increasing friction and continuous border disputes, culminating in

1893, May-Aug. THE SIAMESE CRISIS. The French had been trying for years to extend their dominions westward to the Mekong River, a policy which met with opposition not only from Siam but from England, which desired to preserve Siam as buffer between Burma and the French possessions Border clashes in May 1893 led to the mission of two gunboats to Bangkok in July. The Siamese fired upon them, whereupon the French submitted a stiff ultimatum (July 13) This was rejected and the French then instituted a blockade (July 31), which led to a short but acute **Anglo-French crisis** (p 742). The Siamese were obliged to yield and ultimately accepted the

Oct. 3. Franco-Siamese treaty, by which the Siamese abandoned all claim to territory east of the Mekong and paid an indemnity of three million francs The French remained in occupation of Chantabun until 1905

1896, Jan 15. An Anglo-French agreement ended the long friction between the two countries on the Siamese question The British recognized the gains made by France in 1893 and abandoned their demand for a buffer between Burma and the French colonies Both sides guaranteed the independence of Siam

1897. The King of Siam paid an extended visit to the European capitals.

1904, Feb. 13. A further treaty with France replaced the agreement of 1893. France returned Chantabun, while Siam ceded Bassac, Melupré, and that part of Luang Prabang which lay on the right (west) bank of the Mekong, also Krat on the coast

1907, Mar. 23. By agreement **France retroceded to Siam Battambong, Siemrap, and Sisophon** on the Cambodian frontier, and received in return the region of **Krat and Dansai.** France agreed to **modification of the extra-territorial system,** giving Siam jurisdiction over French Asiatics

Apr. 8. An Anglo-French convention confirmed the independence of Siam, but established **spheres of influence;** territory west of the Menam River to be the British sphere, that to the east the French sphere.

1909, Mar. 10 Great Britain gave up the system of extra-territoriality, in return for the cession of Kedah, Kelantan, Trengganu, and Perlis to the Malay States

1910-1925. RAMA VI (Vajiravudh) Educated in England, he continued the policy of modernization and westernization. irrigation projects, education, calendar reform, reduction of compulsory labor, etc.

1917, July 22. Siam declared war on Germany and Austria.

(*Cont. p.* 1114)

c. FRENCH INDO-CHINA

At the beginning of the 19th century most of present-day French Indo-China was ruled by the **Emperor of Annam.** The region was predominantly Chinese in culture and the empire acknowledged the suzerainty of the Chinese emperor. After a long period of **dynastic struggle and civil war** (1772–1802) the imperial domain had been reunited by

1802-1820. GIA LONG (Nguyen Anh), emperor, who had been supported in his struggles by the French missionary, **Pigneau de Béhaine.** Catholic missions had been active in the country since 1615 and had worked with considerable success The emperor, who was a great organizer as well as a soldier, gave the French Catholics free rein

1820-1840. MINH-MANG, emperor. A strict Confucian and a great admirer of all things Chinese, Minh-Mang was decidedly hostile to Christians, whom he suspected of supporting the rebellious provincial lords. He therefore ordered them expelled (1824 and on many later occasions)

1840-1847. THIEU-TRI, emperor. He continued the persecution of the Christians and refused flatly to receive foreign missions. During his reign the French naval commanders intervened several times to save the lives of the Christians.

1847-1883. TU DUC, emperor. He was a learned, simple, and pious ruler, who, like his predecessors, attempted to keep his country closed to outsiders. Persecution of Christians continued

1858. A joint French and Spanish expedition under Adm. **Rigault de Genouilly,** in order to put a stop to the exclusive and unfriendly attitude of the Annamite court, bombarded Tourane on the coast. Unable to proceed to the capital, Hué, the expedition turned south and **occupied Saigon** in Cochin China. The operations were interrupted by the war of the French against China, but they led ultimately to the

1862, June 5. Treaty of Saigon, by which the emperor abandoned to the French the three eastern provinces of Cochin China and agreed to pay an indemnity of 20,000,000 francs in ten years. Free exercise of the Catholic religion was to be allowed and three ports (Tourane, Balat, and Kuang-An) were to be opened to French trade.

1863-1868. Adm. de La Grandière, governor of Cochin China. He organized the system of government through admirals, so-called, which continued until 1879 Actual administration was left largely in the hands of native mandarins.

1863, Aug. 11. King Norodom (1860–1904) of Cambodia, a Hindu state dependent on both Annam and Siam and constantly threatened by these neighbors, **accepted a French protectorate.**

1867. France occupied the three western provinces of Cochin China, after an insurrection

1868. French exploration of the Mekong River, as far as Yunnan It was hoped that this would prove a useful route to penetration into southwestern China, but the river was shown to be unnavigable in the upper reaches and the French therefore began to turn their attention to the Red River of Tonkin

1873. Exploration of the Red River by Jean Dupuis, a French merchant active in China. The Annamites objected to French activity in Tonkin, but

1873-1874. FRANCIS GARNIER, with a handful of men, attacked and **took Hanoi** and conquered most of the Red River delta

1874, Mar. 15. BY A TREATY SIGNED AT SAIGON, the emperor was obliged to promise to conform his foreign policy to that of France and to recognize the French possession of Cochin China Freedom of the Christian religion was once again promised. In return France promised protection and offered to supply gunboats and officers to help suppress piracy. The French returned Hanoi, but the treaty was systematically evaded by the emperor, who now began to appeal to the Chinese for aid against the French.

1882. Insurrection in Tonkin. Death of **Henri Rivière** and a small force (1883).

1883, Aug. 25. TREATY OF HUÊ. Tu Duc was forced once more to recognize the French protectorate, which was now extended to Tonkin and Annam itself But the French still had to deal with the pirates and guerrilla Black Flags in Tonkin, who were supported by the Chinese. The result was **war with China** (p. 880), in the course of which the French suffered a setback at **Langson** (Mar. 28, 1885) which in turn led to the overthrow of Jules Ferry, the prime mover for expansion in France. But by the **Treaty of Tien-tsin** (June 9, 1885) China was obliged

to recognize the French protectorate over Tonkin.

The year 1883 was marked by severe internal strife, following the death of Emperor Tu Duc. The regents elevated and deposed several emperors in succession, and after the French control was established the native ruler was subject to French orders

1884, June 6. THE TREATY OF HUÊ gave France the right to occupy militarily any place in Annam Thereby effective French control was established

June 17. A new treaty with Cambodia gave the protecting power much more extensive control than heretofore

1885-1895. Pacification of Tonkin and Indo-China generally. There were many revolts in the interior, those in Tonkin being led by the formidable insurgent **De Tham.**

1887. Cochin China, Cambodia, Annam, and Tonkin were administratively united as the *Union Indo-Chinoise*

1893. FRANCE ACQUIRED A PROTECTORATE OVER LAOS, the interior region along the Mekong which had long been in dispute between Annam and Siam

1897-1902. Paul Doumer, governor-general He first inaugurated the far-reaching reforms and administrative arrangements which modernized the region

(*Cont p* 1114)

d. BRITISH MALAYA

The Malays settled the peninsula from Sumatra in the 14th century, but apparently never established any single control Of the various sultanates that of Malacca was as important as any.

1511 Conquest of Malacca by the Portuguese, who thenceforth controlled the trade in tin and spices until superseded by the Dutch

1602. The Dutch East India Company set up a **factory at Patani** and thenceforth rapidly extended its power at the expense of the Portuguese.

1641. THE DUTCH TOOK MALACCA from the Portuguese. For more than a century the Dutch power was dominant in the Malay Peninsula

1718- Bugis from Celebes attacked and conquered many of the Malay states, establishing dynasties in most of them.

1786. The British East India Company set up **a station at Penang,** under Francis Light. The island was ceded to the British by the Sultan of Kedah in return for a subsidy (1790).

1795. The British took Malacca to hold for the Dutch, who were under French domination at the time

1800. The British secured Province Wellesley from the Sultan of Kedah

1802. Malacca was restored to the Dutch under terms of the **Treaty of Amiens.**

1811. The British retook Malacca, which was used as a base for the expedition against Java.

1818. The Dutch recovered Malacca, under terms of the **Treaty of Vienna**

1819. FOUNDING OF SINGAPORE by **Sir Stamford Raffles.** The place had been practically abandoned for centuries, but was soon to become the strategic and commercial center of the region, completely overshadowing Malacca.

1824, Mar. 17. The Dutch ceded Malacca to Britain, in return for Bengkulen in Sumatra

1826. British treaty with Siam (p. 873) Under terms of this agreement the sultanates of Perak and Selangor were recognized as independent, while Siamese control of Kedah was acknowledged At the same time Perak ceded to Britain **Pangkor Island** and the **Sembilan Islands** for use as bases in the fight against piracy.

1850- Steady influx of Chinese laborers into the peninsula These were employed chiefly in the tin mines, though many also turned to piracy on the coast Their presence created much disturbance in many of the states and ultimately provoked British interference

1867, Apr. 1. End of the rule of the British East India Company. The Straits Settlements thenceforth had the status of a crown colony.

1873, June 20. TREATY OF PANGKOR. After serious Chinese disorders in Perak and a prolonged dynastic conflict, the British obliged the Perak chiefs to accept a British resident and to take his advice on all matters excepting religion and custom. The introduction of this system soon outraged the native chiefs, who in

1875. Rose in revolt. Murder of the British resident, **J. W. W. Birch.** The insurrection was suppressed by a British force and in the ensuing years further treaties were concluded with the other Malay states

1885, Dec. 11. British treaty with Johore, regulating relations.

1889. Nine of the smaller states were federated and became **Negri Sembilan.**

1892-1894. Two serious risings of the chiefs in Pahang were vigorously suppressed

1896, July 1. TREATY OF FEDERATION of Perak, Selangor, Negri Sembilan, and Pahang Together they were to have one British resident-general (the governor of the Straits Settlements), while retaining their separate residents

1909, Mar. 10. By treaty with Siam, Britain secured suzerainty and protection over **Kelantan, Trengganu, Kedah,** and **Perlis.** Protection was proclaimed July 14, 1909, and treaties concluded with these states in 1910 Together with Johore they comprised the Unfederated Malay States

1914, May 12 The Sultan of Johore accepted a general adviser and a further measure of British supervision and control

British Malaya was entirely under British rule or control The different states were organized as follows

Straits Settlements (crown colony) comprised Singapore, Penang, Province Wellesley, the Dindings, Malacca,

The Federated Malay States: Perak, Selangor, Negri Sembilan, Pahang.

Unfederated Malay States: Johore, Kedah, Perlis, Kelantan, Trengganu

(*Cont p.* 1114)

e. THE MALAYAN ARCHIPELAGO

Java and neighboring islands were conquered by **Hindu princes** from India during the 1st century A D Thereafter a number of Hindu empires divided the region **Islam** appears to have been introduced from India in the 10th century, but was not important until the 15th century, when Moslem leaders conquered the Hindus and drove them to Bali and other islands There followed the **Moslem empires of Demak** and later **Mataram.**

In the period from 1510–1525 the **Portuguese** discovered most of the islands and established factories on many of them (Java, Ternate, Borneo) They were succeeded at the very end of the 16th century by the Dutch and British

1596. The Dutch set up a **factory** at **Palembang** (Sumatra).

1602. The British established themselves **at Bantam** (northwest Java).

1613. The Dutch settled in **western Timor.**

1619. BATAVIA built by the Dutch. It became the headquarters of the Dutch East India Company, which monopolized the trade Not much effort was made to acquire territory, but the trade was worked to the limit

1623. Massacre of Amboina: the Dutch cut down the British settlement and forced its abandonment

1666. The Dutch took the island of Celebes from the Portuguese

1683. Acquisition of Amboina and Ternate by the Dutch

1685. The British set up a **factory at Bengkulen** (Sumatra)

During the 18th century the Dutch continued to hold the upper hand Growing ruthlessness and corruption of the company At the same time, in order to control the trade, the company was forced to exercise ever wider control over northern Java.

1769. The British East India Company opened stations in northern Borneo, but the settlements (especially **Balambangan,** 1773) had to be given up under pressure from the natives (1775).

1781. The British conquered all the Dutch settlements on the west coast of **Sumatra,** Holland having joined the armed neutrality against England

1783. By the **Treaty of Paris** the British returned the Dutch colonies, but secured the right to trade throughout the Dutch island possessions

1795. The British again captured Sumatra, and in 1796 Ternate

1798. End of the Dutch East India Company.

1808. The Dutch subdued Bantam in western Java. Mission of **Marshal Daendels,** who reorganized the Dutch possessions and began the systematic curtailment of the powers of the princes and feudal lords

1811. A British expedition captured Batavia and took over **Java.** Under the administration of **Stamford Raffles** (1811–1816) much of the old system was swept away extension of European control while retaining native administration; land leases to natives, etc

1814, 1816. Sumatra and then Java were restored to the Dutch, in accordance with the peace treaties

1824, Mar. 17. The British ceded Bengkulen (Sumatra) to the Dutch in return for Malacca end of British hold in the island

1825-1830. REVOLT OF THE JAVANESE against the Dutch, led by

Dipo Negora. The rising was suppressed only with great difficulty The ultimate effect was to oblige the Dutch to conquer the interior and to extend their control Later revolts (1849, 1888) had the same effect

1830. Introduction of the **forced culture system** by the Dutch This involved government contracts with the natives, crop control, and fixed prices — a system very lucrative to the Dutch interests

1839. Native chiefs of **Bali acknowledged Dutch control,** but disorders continued until 1849

1841. **The Sultan of Brunei,** in northern Borneo, **ceded to Sir James Brooke** the region of **Sarawak,** in return for aid against enemies Brooke became rajah of the region and ruled until 1868, when he was succeeded by his son (to 1917) and grandson (1917–) He induced the British government to take an active part in the work of suppressing piracy in the China Sea

1847. The British secured from the Sultan of Brunei **the island of Labuan,** off the northwest coast of Borneo, which it was expected would become an important naval base

1859, Apr 20. **The Dutch and Portuguese** by agreement **divided Timor** and the neighboring islands between them.

1865. The American government concluded a treaty with the Sultan of Brunei and the **American Trading Company of Borneo** acquired title to lands, but the effort to exploit the region proved abortive

1870. The Dutch introduced a **new sugar law and a new agrarian law in Java,** which involved a relaxation of the culture system and the gradual extension of private agriculture

1881. The British government issued a **charter to the North Borneo Company,** organized by Austrian and English interests. This company took over the assets of the American company and secured new concessions from the Sultans of Brunei and Sulu Protests of the Dutch and Spaniards were of no avail (Spanish claims renounced in 1885)

1888, Mar. 17. **Great Britain established a protectorate over Sarawak**

May 12. **British protectorate over North Borneo,** which, however, continued to be held and administered by the North Borneo Company

1891. June 20. The British and Dutch by treaty defined their respective **domains in Borneo,** the Dutch retaining by far the larger part

1907, Dec. **The Dutch,** after many years of warfare, finally **subdued the Achinese** in northern Sumatra (Atjeh), thus completing the pacification of Sumatra

1908. **Direct Dutch rule** was established **in Bali,** after a series of native insurrections (*Cont p.* 1116)

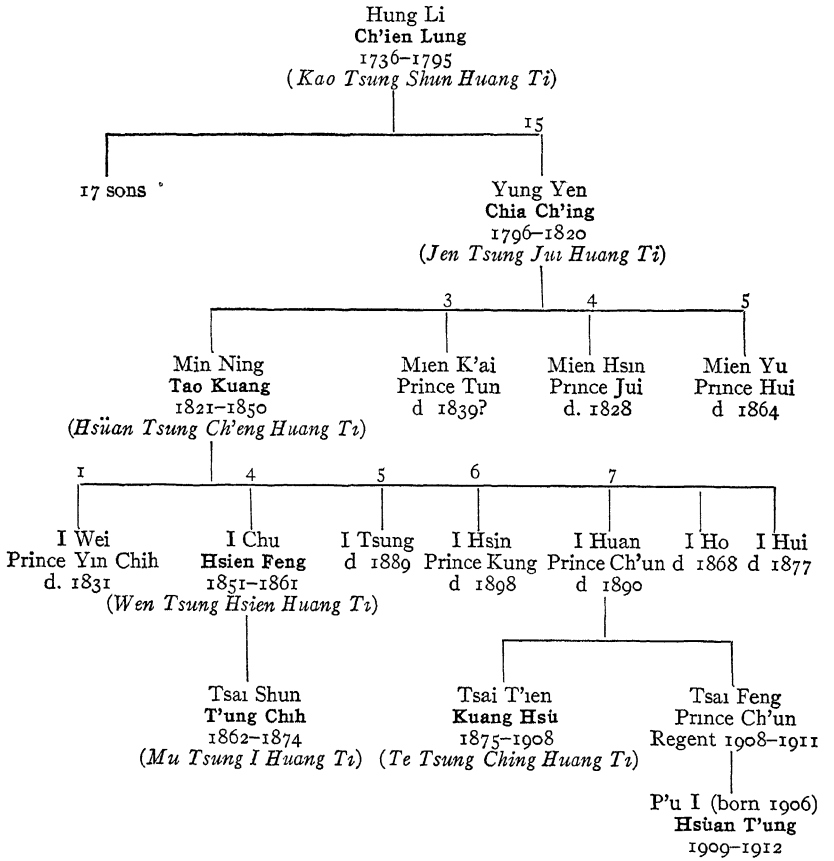
5. CHINA

1796-1820. THE CHIA CH'ING REIGN OF JEN TSUNG was filled with revolts which had been postponed only by the prestige of his father

1796-1804. Suppression of **revolt of the White Lotus Society** impoverished the three provinces of Hupei, Szechuan, and Shensi

1805. **Christian literature was proscribed,** and a Catholic priest strangled for presence in China without permission (1815)

1813. An attempt by the **Heavenly Reason Society** to seize Peking failed



Scholarship profited by labors of three brilliant critical editors **Sun Hsing-yen** (1753–1818), **Yen K'o-chün** (1762–1843), and **Juan Yüan** (1764–1849) The last prepared the best edition of the *Thirteen Classics with Commentary* and gathered in 360 vols. the best *Classical Comment of the Reigning Ch'ing Dynasty* **Robert Morrison** (1782–1834), the first Protestant missionary, translator of the Bible and author of the first Chinese-English dictionary, arrived in Canton (1807)

1816. British ambassador, **Lord Amherst,** sent away from Peking without being received

1821-1850 THE TAO KUANG REIGN OF HSÜAN TSUNG.

1821. The illicit **trade in Indian opium,** 5000 chests annually despite imperial prohibition (1800), was transferred to Lintin Island off the Canton River The conditions of trade at Canton became intolerable through local official arbitrariness and venality, recurrent conflict of principles of individual as against collective responsibility under criminal law, restrictions on personal freedom, and denial of appeal to the central government

The Manchu (Ta Ch'ing) Dynasty (1795-1912)

Note Names in plain type are personal names, taboo after a ruler ascended the throne
Names in boldface type are reign titles, or year names, adopted for reckoning time, but often applied by westerners to the emperor himself
Names in italic type are dynastic titles, or temple names, conferred posthumously to refer to the ruler
Huang Ti means simply "emperor"

1825-1831. Kashgaria was with difficulty defended against Jehangir of the Khoja family and Mohammed Ali of Khokand

1830-1834. American missionary, medical, and sinological work begun in southern China.

1834. The end of the East India Company's monopoly of British trade with China removed an important element in the Canton system of commercial regulation. The assertion of diplomatic equality by the first superintendent of British trade in China, **Lord Napier,** was followed by the temporary stoppage of trade, Napier d. Oct 11, his successors followed a "quiescent policy."

1836. Chinese proposals to legalize the importation of opium, and concern over the "drain of silver" to pay for it, led to heated discussions at Peking. Chinese policy remained weak (1837–1838) and lawlessness grew until

1839. Imperial Commissioner **Lin Tse-hsü arrived at Canton** (Mar 10), forced surrender of opium (annual import 30,000 chests, 1835–1839), and burned it. Hostilities followed (Nov.).

1840. British occupation of Chusan and Canton River forts led to an agreement (**Ch'uanpi Convention**) between Capt Chas Elliot and Ch'i-shan (Jan 1841), which was repudiated by both governments

1841-1842. THE FIRST BRITISH WAR, with seizure of several coastal ports and Chinkiang on the Grand Canal, ended in dictation by **Sir Henry Pottinger** of the

1842, Aug. 29. TREATY OF NANKING which ended the tributary status and Canton monopolistic system of maritime trade China ceded **Hongkong** (occupied Jan 1841) to Britain, opened **Canton, Amoy, Foochow** (Fuchou), **Ningpo,** and **Shanghai** to trade under consular supervision, established **uniform import tariff** of about 5% *ad valorem*, paid £21,000,000 indemnity.

1843, Oct. 8. Supplementary Treaty, also negotiated by Pottinger and Imperial Commissioner Ch'i-ying, conceded "most-favored-nation" status (later extended to other powers) and amplified the details of the new commercial system. Opium traffic continued The

1844, July 3. Treaty of Wanghsia signed by **Ch'i-ying** and by **Caleb Cushing** for the United States placed American (ultimately all foreign) residents under extra-territorial criminal and civil jurisdiction of consular and mixed courts The study of Chinese became legal for foreigners The French **Treaty of Whampoa** (Oct 24) secured **toleration of Roman Catholicism,** extended (1845) to **Protestantism.**

1846-1849. Popular opposition to foreign entrance into the city of Canton increased Anglo-Chinese friction

1851-1861. THE HSIEN FENG REIGN revealed approaching dissolution of the dynasty. Agrarian unrest due to official exactions, to natural calamities, and to absentee landlordism which centered especially in Kiangsi, found expression in the

1850-1864. T'AI P'ING REBELLION. The *Heavenly Kingdom of Great Peace* was founded in Kwangsi by a mystic, **Hung Hsiu-ch'uan,** who borrowed certain forms of Protestant doctrine With help of an able strategist, **Yang Hsiu-ch'ing,** he led disciplined forces through Hunan to Wu-ch'ang (1852) and down the river past Nanking, his capital (1853–1864), to the Grand Canal. An advance toward Peking was deflected through Shansi by floods of the Yellow River, which shifted its bed north of Shantung (1853). The rebels were repelled (1855). Neglect of the rebels to provide conquered territory with either protection or constructive administration foredoomed their régime to failure

1853-1868. Nien Fei, organized bandits of Anhuei, N Kiangsu, and Shantung, later also Shansi, profited by preoccupation of imperial troops with the T'ai P'ing and foreign invaders to plunder. They were suppressed (1865-1868) by the same men who put down the T'ai P'ing Rebellion

1854, July 12. Capture of Shanghai city by rebels (Sept. 7, 1853) led to inauguration of **foreign inspectorate of customs.**

1855-1873. Mohammedans (Panthays) in **Yünnan revolted** and set up an independent state at Tali, the ancient capital of Nan Chao

1855-1881. Miao tribesmen in Kweichow seized the opportunity to revolt

1856, Oct. 8. Lorcha *Arrow* incident at Canton precipitated Anglo-Chinese hostilities

1857-1858. Anglo-French seizure of Canton and military threat in the north forced the

1858, June 26-29. TREATIES OF TIEN-TSIN between China and Great Britain (Lord Elgin), France, the United States, and Russia China opened eleven more ports, permitted legations at Peking and trade and Christian missions in the interior; subsequent tariff and rules of trade (Nov) established a maritime customs service with foreign inspector-general (H. N. Lay) and staff, and legalized the importation of opium The **Treaty of Aigun** signed by I-shan and Nicholas Muraviev gave the north bank of the Amur to Russia. Khabarovsk founded

1859. Refusal of British demands for admission of foreign diplomats to Peking and repulse of attack on the Taku forts (June 25) before Tientsin led to

1860, Oct. 12. Occupation of Peking by 17,000 British and French troops. **Burning of the Summer Palace** to punish the court for seizure of envoys (Harry Parkes) under a flag of truce suggested unfortunate parallels with conduct of earlier barbarian invaders **Peking conventions** (Oct 24 with England, Oct. 25 with France) increased indemnities, and the French secured right of Catholic missions to hold land The Russian envoy, **Gen. Ignatiev,** secured cession (Nov 14) of the **Maritime Province.** Vladivostok was founded Eruption of the T'ai P'ing rebels from Nanking desolated Kiangsu and Chekiang.

1861. The Tsungli Yamen was created to handle foreign affairs.

1861-1864. Tseng Kuo-fan with able help, including Tseng Kuo-ch'uan, Li Hung-chang, Tso Tsung-t'ang, and the Ever-Victorious Army (1862–1863) of **F. T. Ward** and **C. G. Gordon** near Shanghai, suppressed the immensely destructive T'ai P'ing Rebellion by recapture of Anking (1861), Soochow (1863), and Nanking (1864)

1862-1874. THE T'UNG CHIH REIGN OF MU TSUNG. The Dowager Empress Tzu Hsi ruled as co-regent for her son until 1873 Under leadership of **Tseng Kuo-fan** and his protégés reform and study of the west was begun

1862-1873. Mohammedan rebellions were suppressed by **Tso Tsung-t'ang** in Shensi (1868–1870) and Kansu (capture of Suchou, 1873)

1863-1908. (Sir) Robert Hart built up the Maritime Customs Service as mainstay of government revenue and credit, with collateral services to train men, light the coast, improve rivers and harbors, and organize a postal service (1896, independent 1911)

1864-1889. Protestant missionaries in China increased from under 200 to nearly 1300, and introduced western medicine and ideas Communicants numbered 55,000 in 1893

1868-1870. Anson Burlingame, with two Chinese associates, was sent on a good-will mission to western states.

1870, June 21. The Tientsin massacre, by a mob, of a French consul and missionaries led to a mission of apology to France by Ch'ung-hou (1871–1872).

1871. Cables were laid from Vladivostok via Nagasaki to Shanghai, Hongkong, and Singapore A land line was built, Shanghai-Tientsin, in 1881.

1872-1881. 120 Chinese students were brought to the United States by **Yung Wing** (Yale 1854), and 30 sent to England and France for technical training (1876)

1874. A Japanese expedition to occupy Formosa to punish murder by natives of Liu Ch'iu islanders and Japanese (1871) was withdrawn in return for indemnity, but by revelation of Chinese military weakness served to strengthen demands (since 1867) by **Tseng Kuo-fan, Li Hung-chang,** and a small group of liberal Chinese statesmen that China undertake reform and establish representatives abroad.

1875-1908. THE KUANG HSÜ REIGN OF TE TSUNG. As the late emperor was childless, an infant cousin (born 1871), a nephew of the Dowager Empress Tzu Hsi, was adopted as second son of Wen Tsung to carry on dynastic sacrifices, and his prospective offspring was destined to be adopted son of the late emperor An uncle, **Prince Kung,** was named regent under supervision of the two dowager empresses. Personal rule 1889.

1875-1878. Tso Tsung-t'ang suppressed (1875–1876), the Tungans of the northern T'ien Shan, in revolt since 1862, and reconquered Kashgaria (1877–1878), which had become independent under **Yakub Beg** in 1866 Both areas were organized as one province, the **New Territory,** Sinkiang (Hsin chiang), with capital at Urumtsi (Tihwa)

1876. The Chefoo (or Yentai) **Convention** forced by Britain on occasion of the murder of interpreter Margary on the Burmese border (1875) opened ten additional ports, and improved the status of foreigners in China Ratified by Great Britain in 1885 with additional article relating to opium, importation of which reached an annual average (1875–1885) of 82,000 chests, an amount greatly exceeded, however, by production in China

1877-1878. Diplomatic missions, determined in 1875, established legations in London and Berlin (1877), Paris, Washington, and Tokyo (1878), Madrid and St Petersburg (1879), and Lima (1880)

1879, Sept. 15. The unratified Treaty of Livadia gave Russia much of Ili (occupied by her 1871),[1] strategic passes, and indemnity; but after Chinese threat of war

1881, Feb. 24. The Treaty of St. Petersburg negotiated by Tseng Chi-tse, returned to China most of the Ili Valley and the passes in return for more money.

A French bishop, **Pigneau de Béhaine,** had helped **Nguyen Anh** set up in **Annam** a new dynasty (1802) upon that of the interloping Tây-so'n (1788) Both alike were accorded imperial investiture in return for biennial tribute Execution of a missionary bishop (1857) served as pretext for extraction by the French expedition to China of the **Treaty of Saigon** (1862) ceding three provinces of Cochin-China, augmented by three more (1867) Seizure of Hanoi (1873) by Francis Garnier, shortly killed by Black Flag remnants of T'ai P'ing armies, led to a **second Treaty of Saigon** (1874) which opened the Red River Second seizure of Hanoi (1882) **by Henri Rivière,** likewise killed by Black Flags, preceded the forced

1883, Aug. 25. Treaty of Hué, by which Annam accepted a French protectorate with administration of Tonkin by

French residents in disregard of Chinese suzeraınty and protests (1881–1882).

1884. **Prince Kung** and the grand council were **dismissed by the Dowager Empress** Tzu Hsi for failure to repel the French A preliminary convention signed by Li Hung-chang with Capt Fournier (May 11) resulted in misunderstanding, and a French defeat at Baclé (June 23) led to **undeclared war.** French naval destruction of the new Foochow arsenal (Aug 23) and attacks on Formosa were balanced in part by reverses on the Tonkin border (**Langson** Mar 28, 1885)

1885, June 9. **The Treaty of Tientsin,** facilitated by negotiations of Robert Hart, recognized the French protectorate in Annam in return for a reciprocal promise to respect the southern frontier of China Tso Tsung-t'ang in a dying memorial urged modernization and foreign study

In Korea, a tributary to the Manchus since 1637, China evaded responsibility for persecution of Christians and for the French punitive expedition which was repulsed from Seoul (1866) China did not protest a **Japanese treaty** (1876) recognizing Korean independence, nor a Korean embassy to Japan Li Hung-chang, however (1882), sent as resident to Seoul **Yuan Shih-k'ai** who was thereafter active in intrigue against Japan, uninterrupted by the

1885, April 18. **Li-Ito Convention** for withdrawal of troops of both powers from Korea (p 886)

1886, July 24. **British protectorate in Burma** was recognized in return for continuance of decennial tribute.

1887, Dec. 1. **Portugal secured cession of Macao** on promise not to alienate it

1888. **The first imperial railway** (Tangshan-Tientsin, 80 miles) was opened and extended to Shanhaikuan (1894) and to Fengt'ai outside Peking (1896) **Chang Chih-tung** (1837–1909), governor-general of Hupei, opened **coal mines,** the great Ta-yeh **iron mines,** and the Hanyang **steel works,** as necessary preliminaries to interior railway construction

1890. **Abolition of the board of admiralty** and subsequent neglect of the new and promising navy, as a result of the resignation of Capt Lang (British) and the death of Prince Ch'un and Marquis Tseng Chi-tse

1894. **Sun Yat-sen** (Sun Wen, 1866–1925) organized at Canton the first of several **secret revolutionary societies** with which he tried ten times before 1911 to overthrow the Manchu dynasty. After his first failure (1895), he organized the Chinese in Honolulu and America, and was kidnaped and held for ten days by the Chinese legation in London (1896)

1894-1895. **THE SINO-JAPANESE WAR,** the outcome of ten years' rivalry and intrigue in Korea **Rising of the Tonghak** (*Eastern Learning*) **Society** in southern Korea led to seizure by the Japanese of the Korean queen and appointment of a regent The British ship *Kowshing* (July 25, 1894), carrying Chinese troops to Korea, sunk by the Japanese, the Korean regent declared war on China (July 27); China and Japan declared war on each other (Aug. 1) Vain efforts of the European powers and the United States to mediate. Easy victories of the Japanese at **Ping-yang** (Sept 16), off the **Yalu River, at Port Arthur** (Nov 21), and **at Wei-hai-wei** (Feb 12) destroyed the Chinese army and navy and forced the Chinese to accept

1895, Apr. 17. **THE TREATY OF SHIMONOSEKI.** *Terms* China recognized the independence of Korea and ceded to Japan the island of Formosa, the Pescadores Islands, the Liaotung Peninsula, China was to pay an indemnity of 200,000,000 taels, and to open four more ports to foreign commerce.

China's helplessness in the face of a despised Asiatic neighbor equipped with modern instruments of war was clearly revealed to all. It awakened the majority of the educated Chinese, much as the bombardments of 1863–1864 had roused the Japanese Chinese demands for reform were further stimulated by the rush of the European powers for political and economic concessions and by their efforts to set up exclusive spheres of influence Dilemma of the Chinese government native capital not available for military, railway and industrial development, foreign capital could be secured only at the expense of further extension of foreign control within the empire Revenue from the customs was limited by interlocking agreements to about 5% in 1858, and to an effective 2–3% in the later 19th century

Apr. 23. **Russia, Germany, and France intervened** and obliged Japan to return the **Liaotung Peninsula** to China in consideration of a further indemnity of 30,000,000 taels. For reasons for the intervention see p 744 All three intervening powers expected to be well repaid by the Chinese

June 20. France secured extensive territorial and commercial concessions in the southern provinces.

July 6. **Franco-Russian loan** to China (400 million francs at 4%, to run for 36 years, with the Chinese customs as security).

1896, May 23. An Anglo-German loan (£16,000,000 for 36 years at 5%, secured by the customs revenues, the administration of which was meanwhile to continue as then constituted)

June 3. **RUSSIAN-CHINESE TREATY,** secretly concluded at the coronation of Nicholas II at Moscow by **Li Hung-chang.** In return for a defensive alliance for 15 years, China granted Russia the right to build and operate the **Chinese Eastern Railway** across northern Manchuria, as a link in the Russian Trans-Siberian line to Vladivostok.

July 21. **A commercial treaty with Japan,** imposed as part of the peace settlement, gave Japan most-favored-nation status and granted all the treaty powers the right to operate industrial enterprises in treaty ports

1897, Feb. 4. Great Britain was permitted by treaty to extend the Burmese railways into Yunnan (later proved impracticable), and gained further rights in southwest China to offset the French penetration.

Nov. 14. **THE GERMANS OCCUPIED KIAOCHOW** (Chiao-chou) **Bay** with Tsingtao, on the pretext of murder of two missionaries in Shantung. The move had been long under consideration and was looked upon by the Germans as the logical sequence to the intervention in favor of China in 1895 But it precipitated the

1898. SCRAMBLE FOR CONCESSIONS, in which most of the great European powers took part.

Feb. **Britain** secured agreements to open inland waters to foreign steamers, not to alienate any part of the Yangtse River Valley to any other power, and to employ a British inspector-general of customs so long as British trade remained preponderant.

Mar. 6. **Germany** extracted a convention giving her a **99-year lease on Kiaochow Bay,** with exclusive right to build railways and develop mines in Shantung (the Tsingtao-Tsinan Railway opened in 1904) **A second Anglo-German loan** of £16,000,000 for 45 years at 4½% was secured by certain likin and salt revenues, as well as the customs

Mar. 27, May 7. **Russia** extorted from China a **25-year lease of** the southern part of the Liaotung Peninsula, including **Talien-wan** (Dairen, Dalny) and **Port Arthur,** with the right to construct a railroad from Harbin in the north to the newly leased ports

Apr. 10. **France** received a **99-year lease of Kwangchow** (Kuang-chou) **Bay** and the vicinity, with the right to extend a railway to Yunnanfu (completed 1910) and a promise not to alienate to any other power any part of the provinces bordering Tonkin.

Apr. 26. **Japan** secured a promise from China not to alienate any part of **Fukien.**

June 9. Britain secured a **99-year lease of Kowloon** (Chiu-lung) opposite Hongkong, and (July 1) a **lease of Wei-hai-wei** to run as long as the Russian occupation of Port Arthur

June 11-Sept. 16. **THE HUNDRED DAYS OF REFORM,** embarked upon by the emperor under the guidance of the radical reformer **K'ang Yu-wei** (1858–1927) and a Cantonese faction of students of foreign education, and of **Chang Chih-tung,** who wrote *Learn,* a classic appeal for reform (a million copies sold). The reformers aimed at hastening the construction of the **Peking-Hankow Railway** (1898–1905), to give western arms to the Manchu Banners, to prepare for naval training, to establish schools and a **University of Peking.** These measures met with general approval, but the decrees of Aug 30–Sept. 16 struck boldly at vital interests of the civil and military officials by abolishing sinecures and the Green Banner provincial armies, and by introducing a budget system To prevent seizure of her own person,

Sept. 22. **The empress dowager** Tzu-hsi, supported by Jung-lu, **seized the emperor** and imprisoned him. Reforms contrary to interests of the Manchus and official classes were revoked Reactionary officials were placed in control of the central government.

1899, Feb. Italian demand for a port and concession in Chekiang was rejected with a show of force and vigorous efforts to strengthen imperial defense.

In response to notes of Sept and Nov. **John Hay,** American secretary of state, secured assurances from the great powers that the **open door** to equal commercial opportunity would be maintained in spheres of special interest in China (p. 749)

Boxers, militia forces organized in Shantung and southern Chihli in response to imperial decrees, showed hostility to aggressive foreign powers by persecution of their visible representatives, Christian missionaries and converts, with encouragement

of **Yü-hsien**, Manchu governor of Shantung until he was replaced by Yuan Shih-k'ai (Dec 6)

1900. THE BOXERS, driven from Shantung into Chihli, were encouraged by an anti-foreign Manchu clique at court, which hoped to use them as auxiliaries to expel all foreigners from China Identic notes of foreign diplomats at Peking (Jan – May) by demanding suppression increased resentment A **mob attack on Fengt'ai railway station** (May 28) was followed by admission of legation guards to Peking (total 458), but repulse to Tientsin of a joint naval column of 2066 men (June 10–26). Foreign **seizure of the Taku forts** (June 17) was cited in an imperial declaration of war (June 20), disregarded as a forced document both by foreign powers and by Chinese officials outside Chihli and Shansi. Murder of the German minister, **Baron von Ketteler** (June 20), opened a **siege of the legations** which would have succeeded but for Jung-lu's protection. An **international expedition** took Tientsin (July 14) and relieved the legations (Aug. 14) Elsewhere, especially in Shansi, where Yu-hsien was now governor, at least 231 foreign civilians, chiefly missionaries, were killed by imperial order (June 24–July 24). **The court fled** (Aug 15) to Sian, whence a rescript (Dec 26) promptly accepted a joint note embodying the allied demands Russians at Blagovestchensk, in retaliation for Chinese bombardments across the Amur (July 14–15) and in fear of attack by the local Chinese, drove thousands of civilians to death in the river Russia quickly seized possession of southern Manchuria (Sept 4–Oct. 10), without being able to secure ratification of a secret convention extorted at Port Arthur (Nov 11). German troops, which had arrived late at Peking, carried out alone 35 of 46 punitive missions (Dec 12–Apr 30, 1901) After eight months' haggling between the allies, the

1901, Sept. 7. Boxer Protocol, signed by twelve powers, provided for expressions of regret, punishment of 96 officials, payment over 40 years of 450,000,000 taels with interest (or a total value of gold $738,820,707, which became more burdensome as silver depreciated), revision of the tariff to an effective 5%, fortification of an enlarged legation quarter, the razing of all forts and establishment of foreign garrisons along the railway to Shanhai-kuan. The indemnity was to be met from maritime customs surplus, native customs, and salt monopoly, the maritime customs under Hart being given charge of the native customs within 50 *li* of all treaty ports.

1902, Jan. The dowager empress with the emperor **returned to Peking** by rail. Educational, economic, and military reform immediately undertaken **Death of Li Hung-chang** (1901), **Liu K'un-i**, and **Jung-lu** (1903) left Chang Chih-tung and Yuan Shih-k'ai her ablest advisers. Intermarriage of Manchus with Chinese was for the first time sanctioned The most distinguished Chinese jurist, **Shen Chia-pen**, was ordered to revise the legal code A new code was promulgated (1910).

Sept. 5. Anglo-Chinese commercial treaty, with American and Japanese treaties of Oct 8, provided for changes in the treaty system and internal reform (largely ineffective).

1904-1905. Defeat of Russia by Japan (p 892) again revealed to the Chinese the advantages of learning the lessons of the west The Treaty of Portsmouth returned Manchuria from Russian to Chinese administration (1907). Japan retained only the leasehold in southern Liaotung which had already been definitively conceded to Russia, together with the South Manchurian Railway. Hitherto a Manchu preserve under military government, the three eastern provinces were now (1907) reorganized on a civilian basis and thrown open to Chinese settlement

1905. Boycott of American goods as a protest against further exclusion of Chinese from the United States reflected growing national consciousness

On Chang Chih-tung's recommendation of Japanese education, a **ministry of education** was created and Chinese students swarmed to Japan (15,000 there at one time).

Sun Yat-sen organized in Japan **the** *T'ung Meng Hui*, a union of societies which constantly strove to eject the Manchus from China.

1906. Preparation for constitutional government proclaimed, following the report of a mission sent in 1905 to study foreign states. But **reorganization of the ministries** (Nov 6) was followed by the appointment of Manchu princes to direct them (1907–1909).

Provision for progressive 10-year **suppression of opium cultivation and consumption** was supplemented by an agreement with Britain which cut imports from 48,530 chests (1907) to 4136 chests in 1915. At the suggestion of the United States (1909) a series of conferences began at Shanghai and later (1912) at the Hague to establish international control over the world drug traffic.

1908, Jan. 13. Foreign loans for a railway

from Tientsin to P'u-k'ou (opposite Nanking) were contracted on the basis of construction, control, and operation exclusively by the Chinese government. The line was completed and opened in Jan 1912

May 13. Remission by the United States of half her share in the Boxer indemnity made possible the establishment of Tsing Hua College (1911) and the sending of about 1100 graduates to America for advanced study (1911–1927)

Nov. 14-15. Death of the emperor and of the dowager empress. Power passed to the reactionary Prince Ch'un, regent for the

1908-1911. HSUAN T'UNG REIGN OF THE EMPEROR P'U-I (born 1906).

1908, Dec. 3. A draft constitution was published, providing for election of a parliament after nine years. This signified little, for

1909, Jan. 2. The dismissal of Yuan Shih-k'ai and the death of Chang Chih-tung (Oct 4) placed the whole administration in Manchu hands Consequently, when provincial assemblies and a national assembly met (1910), they insisted on early convocation of parliament, which was finally promised for 1913

Scholarship of a high order continued without break through the last reign of the dynasty. The state papers of **Tseng Kuo-fan** and of **Chang Chih-tung** are regarded as models of the classical style **Wang Hsien-ch'ien** (1842–1918) compiled a supplement in 320 vols (1886–1888) to the *Classical Comment of the Reigning Dynasty*, the best critical edition of the two Han histories with collected modern comment, and the *Tung Hua Lu*, a judicious selection from the official archives of the dynasty through 1874 (284 vols., 1879–1887). Baron Iwasaki Koyata purchased and took to Tokyo (1907) the library of **Lu Hsin-yüan** (1834–1894), an active critic, archaeologist, and editor of the *Shih Wan Chuan Lou Ts'ung Shu* **Miao Ch'uan-sun** (1844–1919), bibliographer and archaeologist, thereupon persuaded Governor-General Tuan Fang (1861–1911) to buy the library of the Ting family for Nanking as the **first public library in China. K'o Shao-min** (1850–1931) prepared a new standard *History of the Yüan Dynasty* **K'ang Yu'wei's** *Study of the Classics Forged in the Hsin Era* (1891) and *Study of Confucius as a Reformer* (1897) together served to focus upon early texts historical criticism of a type which had fallen in abeyance since the time of Ts'ui Shu (1740–1816) Chinese envoys to Japan, **Yang Shou-ching** (1835–1915) and **Li Shu-ch'ang** (1837–1897), found there many early editions which they reproduced in the *Ku I Ts'ung Shu* (1884). A profusion of other early documents, both Chinese and Central Asiatic, was recovered in 1907–1908 by **Aurel Stein** and **Paul Pelliot** from a temple library immured (c 1000 A.D.) at Tun-huang, the point of bifurcation of mediaeval caravan routes north and south of the T'ien Shan Mts Discovery in 1899 of a deposit of oracular inscriptions on bone and tortoise-shell from the Shang dynasty was followed quickly by their decipherment by paleographers already trained in the archaic script of ritual bronzes

1911, Oct. OUTBREAK OF THE CHINESE REVOLUTION, precipitated by discovery of the headquarters of the revolutionary organization at Hankow. The movement, fed by provincial distrust of the central railway administration of Sheng Hsuan-huai, spread rapidly through the west and south, without causing much bloodshed

Nov. 8. Yüan Shih-k'ai, who had been recalled to military command (Oct 14) was elected premier by the national assembly.

Dec. 4. Yuan signed a truce with the rebel general Li Yüan-hung, and sent T'ang Shao-i to represent him in negotiations at Shanghai

Dec. 30. Sun Yat-sen, recently returned from Europe, was **elected President of the United Provinces of China** by a revolutionary provisional assembly at Nanking

1912, Feb. 12. Abdication of the boy emperor.

Feb. 15. Yüan Shih-k'ai elected provisional president of the Chinese Republic by the national assembly **Sun Yat-sen resigned** in order to unite the country.

Mar. 10. The Nanking provisional constitution, which aimed at making the bicameral assembly supreme. Yuan Shih-k'ai soon came into conflict with the assembly through his efforts to strengthen his own power. **Formation of opposition parties:** the *Harmony or Progress Party* of **Liang Ch'i-ch'ao,** advocating a strong executive; the *Kuo Min Tang or Nationalist Party* of **Sun Yat-sen** championing the system of parliamentary government.

1913, April 8. Convocation of the elected parliament.

Apr. 21. Yuan secured from Great Britain, France, Russia, and Japan **a loan for £25,000,000,** secured by the salt tax. Fearing that this would

strengthen him even more, his opponents started the

July 10. **"Second Revolution"** in the southern provinces This movement was soon suppressed (Nanking taken, September 1)

Oct. 6. **Yuan Shih-k'ai was elected president,** and Li Yuan-hung vice president of the republic In order to prevent adoption of the constitution, Yuan

Nov. 4. **Purged the parliament of its Kuo Ming Tang members,** and soon afterward dissolved it (Jan. 10, 1914).

Nov. 5. The Chinese government recognized **the autonomy of Outer Mongolia,** which had been secured by treaty between Outer Mongolia and Russia a year before (Nov. 7, 1912).

1914, May 1. **A "constitutional compact"** promulgated by Yuan Shih-k'ai gave him a ten-year term of office, with ample powers. (*Cont p.* 1117)

6. KOREA

After the Japanese invasions under Hideyoshi (1592–1598, see p 544) and the defeat of the Koreans by the Manchus (1637), the kingdom of Korea was shut off entirely from the outside world It recognized Chinese suzerainty, though the Japanese did not entirely abandon their claims to overlordship The ensuing two centuries were a period of reasonably efficient and progressive government, and apparently of considerable prosperity. From time to time Europeans were wrecked on the treacherous coast, but for the most part these were kept as captives in the country.

1777. **Introduction of Christianity,** evidently by Chinese converted by the Jesuits at Peking The new religion made considerable progress, and by the mid-19th century there were some 10,000 converts in the kingdom Despite all prohibitions, Catholic missionaries, mostly French, stole into the country in the early 19th century

1797. **Exploration of the east coast of Korea by Capt. W. R. Broughton.**

1800-1834. **Sunjo,** king

1835-1849. **Hŏn-jong,** king

1850-1863. **Ch'ŏlchong,** king.

1864-1907. **Kojong** (usually known as I T'ae-wang [the reign title was changed in 1896 and again in 1897]), the 12-year-old grandson of King Sunjo, succeeded His father, **Hŭngsŏn,** generally known as **Tai Wen Kun** (or Tae-wŏngun), became regent, ruled directly until 1873, and was the dominant political figure until his death in 1898. From the outset he was extremely hostile to all foreign influence and especially to Christianity

1865-1870. Systematic **persecution of the Christians.** A number of French missionaries were executed

1866. **A French expedition** under Adm Roze, occupied and burned Kanghwa at the mouth of the Han River, but was unable to proceed to the capital, Seoul, after some reverses at the hands of the natives, it was obliged to withdraw

1867, Oct. Expedition of the German Jew, **Ernst Oppert,** assisted by an American, Jenkins, with the object of rifling the royal tombs (supposedly of pure gold) The landing force reached the tombs, but was unable to open them Attacks by the natives forced withdrawal

1871, May 16. **An American naval force,** under **Capt Shufeldt** and the minister to Peking, Mr. Low, tried to open Korea to foreign trade Marines were landed at the mouth of the Han, but hostilities ensued and the project had to be given up

1876, Feb. 26 **OPENING OF KOREA,** through a **treaty with Japan** Japan recognized Korean independence without eliciting a protest from China Three ports were opened to Japanese trade and Japan was permitted to have a resident at Seoul

1882, May 22 **TREATY WITH THE UNITED STATES,** negotiated by Shufeldt and by Viceroy Li Hung-chang (in charge of Chinese-Korean relations) no mention of Korean independence, but the United States secured extra-territorial rights and permission to trade Similar treaties were concluded with England (Nov 26, 1883), Russia (July 7, 1884), and other powers

July 23. **An attack by the Koreans on the Japanese legation** in Seoul led to **intervention by the Chinese** The Japanese were given compensation and the right to keep a legation guard **Yüan Shih-k'ai** became Chinese resident at Seoul and during the ensuing decade devoted himself to strengthening the Chinese influence as against Japan. In Korea the regent returned to power and there soon developed between him and the energetic **Queen**

Min a struggle for control of the government

1884, Dec. 5-7. The reform party, supported by the Japanese, hatched a conspiracy, assassinated a number of ministers and secured control of the king. The Chinese thereupon dispatched troops to Seoul, recaptured the king and the palace, but provoked further intervention by Japan The two powers were on the very verge of war, but finally concluded the

1885, Apr 18. CONVENTION OF TIEN-TSIN (*Li-Itō Convention*) both agreed to withdraw their troops and to notify each other if it became necessary in future to intervene again

May 12. The British occupied Port Hamilton in the course of the Anglo-Russian crisis, for fear lest Russia might seize a port on the Korean coast (Despite Chinese protests the British remained until Feb 27, 1887)

1894-1895. THE SINO-JAPANESE WAR, which was the direct outcome of the rivalry of the two powers for control of Korea Following an insurrection in southern Korea in the spring of 1894, the king called upon the Chinese for aid (June 10) Several thousand men were dispatched and Japan notified Thereupon the Japanese sent twice as many men and occupied Seoul (June 25) On the suggestion of the Chinese that both forces be withdrawn, the Japanese insisted first on the introduction of extensive reforms Hostilities soon broke out and war was declared Aug 1 (for the course of the war see p 881) Korea was obliged to conclude an alliance with Japan (Aug. 26) and the Japanese soon took over control of the government

1895, Apr. 17. Treaty of Shimonoseki, ending the Sino-Japanese War By this treaty the independence of Korea was recognized by China The Japanese, still in substantial control, pushed through far-reaching and for the most part unpopular reforms Opposition of the queen and the court led to the

Oct. 8. Murder of the queen, with the connivance of the Japanese resident, Miura The commanding position of Japan was, however, at once challenged by popular outbreaks and anti-reform riots The country became divided into a conservative, anti-Japanese, and a progressive, pro-Japanese party (the latter represented by the *Independence Club*, founded 1896).

1896, Feb. 10. The king fled to the Russian legation in the course of another insurrection He remained under Russian protection for a year and during this period the Russians quickly supplanted the Japanese as the dominant influence Mission of Russian advisers and instructors, foundation of the Russian-Korean Bank, timber and mining concessions to Russia, etc. The situation became so dark for the Japanese that they were glad to conclude with Russia

June 9. THE LOBANOV-YAMAGATA AGREEMENT, which established a type of condominium Russia and Japan to co-operate in the reform of army and finances. In practice the agreement proved almost worthless and the Russian penetration continued unabated

1897, Feb. 20 The king left the Russian legation and moved into the new palace **The king took the imperial title** (Oct 17)

Dec. An Anglo-Russian crisis, arising from efforts of the Russians to replace the financial adviser, **M'Leavy Brown** (since 1895), by a Russian A British naval demonstration at Chemulpo made the Russians draw back

1898, Apr. 25. THE ROSEN-NISHI AGREEMENT between Russia and Japan. Russia, involved in the international crisis following the occupation of Kiao-chow and Port Arthur (p 747), was eager to avoid friction with Japan and withdrew many of the advisers and officers By the new convention both sides engaged not to interfere with the internal affairs of Korea, but Japan was given a free hand in economic matters

Nov. Dissolution of the Independence Club and arrest of many of the leaders resulted in widespread riots and disorders The conservative (pro-Russian) and progressive (pro-Japanese) groups were now almost at open war with each other

1900, Mar. 18 The Russians attempted to secure a **concession at Masampo** for a naval station, but were foiled by the stiff opposition of Japan Despite all previous agreements, the two powers were gradually moving toward a crisis The Japanese, determined to exclude Russia from Korea, concluded with England

1902, Jan. 30. The Anglo-Japanese alliance, which again affirmed the independence of Korea The Japanese then entered upon negotiations with Russia, which was trying to exploit a great **timber concession on the Yalu River** in northern Korea (first secured in 1896). The negotiations bringing no results, the Japanese embarked on

1904, Feb. 8. THE RUSSIAN-JAPANESE WAR (p. 892) The Japanese at once occupied Seoul, and Korea was obliged

to annul all concessions made to the Russians Once again Korea fell entirely under Japanese control, and was forced to accept Japanese diplomatic and financial advisers (Aug. 22)

1905, Sept. 5. The Treaty of Portsmouth, between Russia and Japan, provided for Russian recognition of the preponderant interest, political, military and economic, of Japan in Korea and provided further that Russia should not oppose any measures for the government of Korea or its protection and control, which the Japanese government might deem necessary to take in conjunction with the Korean government

1906-1908. Prince Itō, Japanese resident-general He regulated the relations between Japan and Korea and set the Korean government on the road to reform and modernization.

1907, July 19. Abdication of the emperor under Japanese pressure His successor was a mere figurehead

July 25. The administration was placed almost entirely under **Japanese control** and the Korean army was ordered disbanded This at once led to **widespread insurrection and a war of independence,** which was suppressed only with great difficulty after years of fighting

1910, Aug 22 KOREA WAS FORMALLY ANNEXED TO JAPAN, and renamed *Chōsen.*

7. JAPAN

1793. Laxman, a Russian lieutenant, arrived at Hakodate in Hokkaidō with Japanese castaways, but failed to establish friendly relations.

1793-1837. THE PERSONAL RULE OF IENARI as *shōgun* (d 1841) was characterized by increasing extravagance and inefficiency and by signs of the breakdown of isolation and the collapse of military rule During this period lived **Ninomiya Sontoku** (1787–1856), a famous peasant-philosopher and economic reformer, **Kyokutei** (or Takizawa) **Bakin** (1767–1848), an author of adventure novels, and **Katsushika Hokusai** (1760–1849) and **Andō** (or Utagawa) **Hiroshige** (1797–1858), two of the best known ukiyo-e woodblock artists

1795. Broughton, a British explorer, visited Hokkaidō, charting parts of the coast

1797-1809. American ships traded with Japan nearly every year, on behalf of the Dutch

1798. The *Kojikiden,* a commentary to the *Kojiki,* was completed after 35 years' labor by **Motoori Norinaga** (1730–1801), the greatest of the Shintō scholars This achievement was an important event in the revival of Shintō and of the imperial cause Influential in these movements were also **Kamo Mabuchi** (1697–1769) and **Hirata Atsutane** (1776–1843)

1804. A Russian ambassador, **Rezanov,** representing the Russian-American Company, reached Nagasaki, but after six months failed to obtain a treaty In 1806–1807 his subordinates raided Sakhalin

1814. Kurozumi Munetada (1780–1850) founded the **Kurozumi sect,** the first of the modern popular Shintō sects which on the whole stress patriotism and sometimes faith-healing. This and 12 similar sects founded in the course of the next century now have over 17,000,000 believers

1837. The *Morrison,* an American ship with merchants and missionaries from Macao, visited Napa in the Ryūkyū (Ch. *Liu-ch'iu*) Islands, was bombarded at Edo and Kagoshima and failed to open relations This was but one of some half a hundred efforts to establish more extensive intercourse with Japan before 1854 One reason for these efforts was that since about 1820 the northern Pacific whaling industry had developed greatly, and more humane treatment of crews of whalers wrecked in Japanese waters was desired, particularly by the United States

1837-1853 IEYOSHI as *shōgun* This was a time when the question of opening the nation to foreign trade in compliance with the demands of the occidental nations became pressing The sentiment in favor of an imperial restoration was growing, and economic ills of the nation were acute, resulting in the impoverishment of many warriors who became *rōnin,* masterless warriors

1838. Nakayama Miki (1798–1887), a woman, founded the faith-healing **Tenri sect,** the most popular of the modern Shintō sects.

1839-1840. Conservative scholars in an effort to check the rapid growth of occidental learning had restrictive measures instituted and imprisoned two leading

scholars of the occidental school (*Rangaku*, "Dutch Learning"), who favored opening of Japan, **Watanabe Kazan** (1793–1841) and **Takano Chōei** (1804–1850)

1841-1843. **Mizuno Tadakuni** (1794–1851) carried through misguided and ineffectual reforms

1844. William II of Holland warned the *shōgun* by letter of the futility of the exclusion policy

1846. American **Commodore Biddle visited Edo Bay**, but trade was refused

1849. **Commodore Glynn** succeeded in getting American castaways at Nagasaki

1851. American **Commodore J. H. Aulick** was commissioned to open relations with Japan, but was removed from his command (Nov), **Commodore M. C. Perry** appointed as his successor (Mar 1852), Holland warned Japan of the project The Perry expedition was sent to improve treatment in Japan of American castaways from whalers, to open one or two ports for trade and supplies, especially coal for California–Shanghai steamship service; instructions pacific in nature

1853, July 8. **PERRY with four ships anchored off Uraga** in Edo Bay and remained ten days, delivering the president's letter, which was referred to the emperor and to the *daimyō*, an unprecedented course which aroused the whole nation and elicited a largely anti-foreign response

1853-1858. **IESADA** as *shōgun* The feudatories increasingly criticized the action of Edo, and the public became divided into two camps — (1) those in favor of the expulsion of the foreigners (*jōi*), led by emperor-honoring **Tokugawa Nariakira** (1800–1860), ex-Lord of Mito, and (2) the realists who saw that concessions to the foreigners were necessary, led by **Ii Naosuke** (Kamon-no-kami) (1815–1860). The two groups also divided over proposed heirs for the childless Iesada Naosuke favored **Tokugawa Iemochi**, Lord of Kii **Nariakira** favored his own son, **Hitotsubashi Yoshinobu** (Keiki), and resorted to the unprecedented stratagem of seeking imperial backing for his candidate

1854, Feb. 13. **Perry returned to Edo Bay** with more ships, hastened by fear of Russian and French efforts to get treaties, and secured the **Treaty of Kanagawa** (Mar 31), which opened two ports, permitted trade under regulations, provided better treatment of American castaways, and included most-favored-nation clause, but omitted extra-territoriality This was followed by treaties with England (Oct. 1854), Russia (Feb 1855), and Holland (Nov 1855, Jan 1856), which gave further privileges Japan was not yet really open to trade. All these treaties were signed by the *shōgun* (called by foreigners *tycoon* [*tai-kun*], and wrongly regarded by them as the "secular emperor")

1854-1855. The Dutch aided the Japanese in laying the foundations for a future navy

1856, Aug. American Consul-General **Townsend Harris** arrived at Shimoda with instructions to procure a commercial treaty

1858, Mar.-May. Growing imperial prestige was seen in an extraordinary Edo appeal to the emperor for approval of further foreign intercourse, which was refused The strong anti-foreign spirit in Kyōto became linked with a pro-emperor movement (*sonnō*)

June. **Ii Naosuke appointed** *tairō* and soon all-powerful at Edo He secured the appointment of Iemochi as the *shōgun's* heir and the signature (July 29) without imperial approval of the important commercial treaty previously arranged with Harris, which provided for unsupervised trade and permanent residence at five ports, residence at Edo and Ōsaka, an envoy at Edo, extra-territoriality, a conventional tariff, the prohibition of the import of opium, revision in 1872 or later Treaties followed with Holland (Aug. 18), Russia (Aug 19), England (Aug. 26), France (Oct 7), all on the model of the Harris treaty

1858-1866. **IEMOCHI** as *shōgun*. The anti-foreign sentiment continued unabated, and desire for the restoration of the emperor's direct rule increased rapidly

1859, Feb. Kyōto informed Edo that foreigners were to be expelled as soon as possible

1859. **Foreign merchants settled at Yokohama.** A series of attacks upon foreigners followed and resulted in foreign pressure upon Edo for redress Silver-gold exchange rate of 5 to 1 led to outflow of gold

Nov. **Yoshida Shōin** (1830–1859), a leading anti-foreign, pro-imperial spirit of Chōshū (W. Hondō), was executed for anti-Edo activities, but his teachings continued to influence the Chōshū warriors

1860, Mar. 24. **Ii Naosuke was assassinated** by former Mito men.

May 17. **First Japanese embassy** to the United States exchanged treaty ratifications in Washington.

Sept. 17. **Nariakira died,** and leadership of anti-foreign, pro-imperial movement passed to **Satsuma** (S *Kyūshū*), **Chōshū,** and **Tosa** (*Shikoku*) fiefs

1861, Mar.-Sept. Russian occupation of Tsushima.

1862, Jan. Mission to European governments. Agreement signed in London (June) postponing until 1868 opening of Niigata and Hyōgo and residence in Edo and Ōsaka

Sept. 14. An Englishman, **Richardson,** murdered by Satsuma men near Yokohama This was but one of many murderous attacks on foreigners or their employees by anti-foreign warriors

Oct. The forced residence of *daimyō* in Edo was greatly curtailed and the western *daimyō* began to congregate around the court in Kyōto

1863, Apr. Iemochi went to Kyōto in response to a summons from the emperor. This unprecedented step signified that the political center of the empire had already shifted back to Kyōto On June 5 a date (June 25) was chosen for expulsion of foreigners

June 24. Edo paid indemnity to the English for Richardson and others and announced negotiations would be undertaken for closing of ports

June 25. Chōshū forts at Shimonoseki fired on an American vessel and later on French and Dutch vessels, direct reprisals by American and French warships

Aug. 15-16. A British squadron bombarded Kagoshima, thereby convincing Satsuma that expulsion of foreigners was impracticable

Sept. ***Coup d'état*** **at Kyōto; extremist Chōshū forces expelled.**

1864. Internecine strife in Mito robbed it of all leadership in national affairs

Aug. Chōshū men defeated in pitched battle at Kyōto in effort to regain influence at court

Sept. 5-8. Allied expedition (British, Dutch, French, American) silenced Chōshū forts at Shimonoseki, thereby breaking back of anti-foreign movement Edo agreed to pay indemnity for Chōshū (Oct).

1865, Nov. Allied naval demonstration at Ōsaka secured imperial ratification of treaties

1866, June 25. Tariff convention signed with United States, England, France, and Holland 5% duty on almost all imports and exports (in force until 1899).

July-Oct. Edo engaged in **unsuccessful expedition to punish Chōshū** for its extremist activities.

Sept. Iemochi died and was succeeded by

1867. KEIKI (Hitotsubashi Yoshinobu) as *shōgun* Young leaders, like **Saigō** (1827–1877) and **Ōkubo** (1832–1878) of Satsuma, plotted to undermine Edo rule, a vigorous young ruler, **Mutshuhito** (Meiji emperor), came to the throne (Feb), Keiki, who as a Mito scion was predisposed to surrender to Kyōto, resigned (Nov), bringing almost 700 years of feudal military government to an end.

1868, Jan. 1. Hyōgo (Kobe) **and Ōsaka opened to foreign trade.**

Jan. 3. THE EMPEROR assumed direct control of the nation; western clans seized power at Kyōto, remaining Tokugawa forces defeated in civil war (July 4, **battle of Ueno** in Edo)

Mar. The emperor received French, Dutch, and British representatives.

Apr. 6. Charter oath by the emperor promised a deliberative assembly, decision of public affairs by public opinion

Nov. Capital moved to Edo, renamed **Tōkyō** (*Eastern capital*) Meanwhile the year period was changed to Meiji marking the beginning of

1868-1912. THE MEIJI PERIOD. The anti-foreign policy of the imperial party was dropped as soon as it came to power, and Japan entered upon a period of great borrowing from the Occident comparable only to the period of the imitation of China The remnants of military rule and feudalism were abolished, a strong centralized bureaucratic government fashioned along occidental lines was built up under the able leadership of the Meiji emperor, and Japan became a modern world power **Rapid industrialization** on western models took place, and, as a consequence, the wealth and population of the land multiplied In the fields of science, education, philosophy, and even art and literature great transformations were wrought by the impact of occidental civilization, and for a few decades many of the native traits and institutions were somewhat discredited if not completely superseded

1869, Mar. The *daimyō* of Satsuma, Chōshū, Tosa, and Hizen offered their lands to the emperor as a step toward the abolition of feudalism; others followed this example

July. *Daimyō* were appointed governors of their former estates with one-

tenth their former revenue. Representatives of the 276 fiefs, appointed by their lords, met in an assembly (*kogishō*), this body lacked legislative power, was prorogued in 1870 and abolished in 1873

1871, Aug. 29. Imperial decree abolished the fiefs and substituted prefectures (*ken*, at first 71, now 44, with 3 prefectural cities [*fu*]). First regular government **postal service established** (Tōkyō to Ōsaka). **Ministry of education reorganized** to promote universal education **First daily newspaper.**

Sept. 3. Treaty of Tientsin with China signed as between equals Japan did not gain extra-territorial and commercial rights equal to those of the West, nor a most-favored-nation clause

Oct. The Iwakura mission (including Ōkubo and Itō) departed to seek treaty revision from the West and to prepare for reforms necessary to that end It failed to secure revision and returned Sept 1873

1872. Universal military service introduced; the army was modeled at first on the French, later on the German **First railway opened** (Tōkyō-Yokohama, 18 mi) National bank regulations issued on American model

1873, Jan 1. Solar **Gregorian calendar adopted** in place of lunar calendar British officers employed to reorganize the navy Policy of **religious toleration** permitted the propagation of Christianity once more

Oct. A peaceful policy toward Korea was chosen rather than a warlike policy

1874, April. Expedition sent via Amoy to **Formosa** to redress murder by natives of Ryūkyū sailors in Dec 1871, Japan having claimed suzerainty over Ryūkyū and China having avoided responsibility In Oct Japan agreed to recall the expedition, China to pay indemnity

1875. Assembly of prefectural governors convened (not a representative nor a legislative body). **A senate** (*Genrōin*), convened in 1876, likewise had advisory duties only (abolished 1890) Agitation for representative institutions continued, led by **Itagaki** of Tosa

1876, Feb. 26 Japanese naval demonstration secured **treaty with Korea,** recognizing the latter as independent of China and granting extra-territorial and commercial privileges to Japan

Aug. Compulsory commutation of the pensions which had been granted the warrior class, and which were a heavy financial burden, and the prohibition of the wearing of two swords signified the **end of the warrior class** as a separate group Natural resentment over this led to several disturbances including

1877, Jan.-Sept THE SATSUMA REBELLION led by **Saigō,** a leader in the restoration movement It was crushed by the modern trained army of commoners A large issue of inconvertible paper money was used to defray expenses

1878, May. Ōkubo was assassinated.

1879. Prefectural assemblies, elected by males over 25 who paid a land tax of 5 yen or more, were convened with powers to determine local budgets

1880, July. Promulgation of **revised penal code** and **code of criminal procedure,** based largely on French models, in order to remove necessity for extra-territoriality

1881. Imperial decree promised to convene a **national assembly** in 1890, fostered organization of political parties (*Jiyūtō* or **Liberal Party** by Itagaki; *Kaishintō* or **Progressive Party** by Ōkuma) in opposition to Satsuma-Chōshū bureaucracy

1882, Jan.-July. In treaty revision conference at Tōkyō foreign minister Inoue failed to secure revision.

Mar. Itō was appointed to draft a constitution and visited the Occident, being particularly impressed by the German political system (returned Sept 1883)

May 22. Korea opened to western trade by treaty with United States signed by **Commodore Shufeldt** and **Li Hung-chang** at Tientsin, which recognized Korea as a sovereign state and thus weakened the Chinese position there, this was followed by similar treaties with the European powers (1883–1886)

July A Korean mob attacked the royal palace and Japanese legation in Seoul, Japan obtained indemnity (Sept)

Oct. Bank of Japan established as central bank of European type

1883, Apr. 16. Revision of the press law with drastic libel regulations

1884. Creation of a newly organized peerage of 500 members to provide a basis for an upper house.

Dec. *Coup d'état* by pro-Japanese liberal party in Seoul; the Japanese envoy and troops were forced out by Chinese, this led to

1885, Apr. 18 CONVENTION BETWEEN ITŌ AND LI HUNG-CHANG: both powers to withdraw their troops and to inform each other of any intention to send them back to Korea, really a victory for Japan An attempt by Russia to gain a protectorate over Korea prevented Great Britain occupied Port Hamilton (Apr), but withdrew (Feb 27, 1887)

Reorganization of the cabinet on German lines with a premier (Count Itō) and nine departmental ministers responsible to him

1886, May 1—1887, July 29. Treaty revision conference in Tōkyō, conducted by Inoue as foreign minister, failed to obtain the abolition of extra-territoriality, individual negotiations were then carried on by Inoue's successor, Ōkuma

Period of **rapid commercial expansion** with government paper-making and cotton-spinning plants (200 steam factories in Japan by 1890), extension of railroads (959 miles of government lines by 1901 and 2905 of private); increase in steamship tonnage (15,000 by 1893, 1,522,000 by 1905); and unification of telegraph and postal systems (1886)

1888, Apr. Privy council created as an advisory body to the emperor **Kuroda** succeeded Itō as premier.

1889, Feb. 11. NEW CONSTITUTION PROMULGATED. The emperor's powers were carefully guarded, including the right to declare war and make peace, and power to issue ordinances having the force of laws **Bicameral Diet;** upper house of peers and representatives of merit and wealth (363 members), lower house elected through limited suffrage (463 members); the Diet had restricted control of finances

Dec. Count Yamagata became premier.

1890. The emperor formally approved the new civil, commercial, and criminal **codes of law** based on western models, in order to eliminate necessity for extra-territoriality. Mexico had already in 1888 granted Japan judicial autonomy over Mexicans in Japan The civil code was put in force, 1892 and 1898, and the commercial code, 1899

July. First general election, by males aged 25 who paid direct national taxes of 15 yen or more (460,000 qualified voters out of 42,000,000)

1891, May. Resignation of Premier Yamagata, Count Matsukata succeeding.

1892, June. Resignation of the cabinet following defeats in the Diet, **Count Itō became premier.**

1894, Mar. Rising of the anti-foreign **Tonghak Society in southern Korea** led China and Japan to send troops to Korea.

July 16. Aoki-Kimberley Treaty, signed in London, revised British Treaty of 1858, abolished extra-territoriality in 1899, prepared the way for similar treaties with other powers By Aug 4, 1899, all Occidentals were subject to Japanese courts, a new international status for Japan.

1894-1895. SINO-JAPANESE WAR — primarily a struggle for control of Korea (p 881)

July 23. Japanese forces seized the royal palace in Seoul, leading to the outbreak of hostilities; Japanese victories at **P'yŏngyang** (Sept. 16), in the naval **battle of the Yalu** (Sept 17), invasion of Manchuria, and **capture of Port Arthur** (Nov. 21) led to abortive Chinese peace overtures (Nov).

1895, Feb. 12 Japanese capture of Weihai-wei.

Apr. 17. TREATY OF SHIMONOSEKI signed by Count Itō, Count Mutsu, minister of foreign affairs, and Li Hung-chang, Chinese ambassador extraordinary. China recognized the full independence of Korea, ceded to Japan the Pescadores, Formosa, and the Liao-tung Peninsula, paid an indemnity of Tls 200,000,000, opened four more treaty ports and negotiated a new commercial treaty (signed July 21, 1896)

Nov. Japan yielded to **tripartite intervention of Russia, France, and Germany** and gave up the Liao-tung Peninsula, receiving instead from China Tls 30,000,000 additional indemnity

1896. Japanese domination and reorganization of the **Korean government,** following the murder of Queen Min (Oct 8, 1895) and the recall of the Japanese minister implicated in it (Miura), was checked by the flight of the king to the Russian legation (Feb 11), where he remained until 1897 Henceforth, Russia became Japan's rival for control of Korea

June 9. Lobanov-Yamagata Protocol, signed in St Petersburg, recognized Russia's position in Korea (pp 746, 886)

Sept. Matsukata again premier.

1897, Mar. 29 Japan adopted the gold standard; ratio, $32\frac{1}{3}$ to 1.

1898, Jan. Itō again premier.

Mar. 15. Russian agent to control Korean finances dismissed after a British and Japanese show of naval force.

Apr. 25. **Nishi-Rosen Protocol** signed, by which Russia agreed to Japanese economic penetration of Korea, both powers were to refrain from interference with internal affairs Japan increased her military and naval preparations

Apr. 26. Japan assured by the Tsung-li Yamen at Peking respecting the **non-alienation of Fukien province** to any other power

June. **Ōkuma-Itagaki ministry** of Kenseitō party formed

Nov. **Yamagata ministry** formed

1899, July 17. **Revised treaties with foreign nations took effect.** France and Austria retained consular jurisdiction until Aug 4

1900, June 6. **Boxer uprising in China.** Japan joined the international relief expedition.

Oct. **Itō formed a Kenseitō ministry**

1901, June 2. **Viscount Katsura formed a ministry.**

Aug. Plans of naval and military reorganization adopted, cabinet ministers for these departments might be civilians, but direct responsibility to the emperor was retained

1902, Jan. 30. **ANGLO-JAPANESE ALLIANCE** signed (negotiated by Hayashi in London), recognizing the independence of China and Korea and Japanese special interests in Korea, each power was to remain neutral if the other became involved in war with one power, but to make war and peace in common with its ally if another power entered the war, to remain in force five years

1904. **Continued Russian penetration of northern Korea** and failure to withdraw from Manchuria, together with breakdown of Russo-Japanese negotiations, led to Japanese severance of diplomatic relations (Feb. 6) and

1904-1905. **THE RUSSO-JAPANESE WAR.**

Feb. 8. **Japan attacked Port Arthur** (*Ryojun*), bottling up Russian fleet

Feb. 10. **War declared**

Feb. 23. **Treaty between Japan and Korea** by which the latter virtually became a protectorate of Japan in return for guaranties of integrity

May 1. Russians defeated at the **Yalu River** by Kuroki

May 30. Japanese occupied **Dalny** (Dairen) Nogi began **siege of Port Arthur,** Ōyama advanced northward, and

Aug. 25-Sept. 4. Defeated Russians at **Liaoyang.** The latter withdrew to Mukden

1905, Jan. 2. **Port Arthur surrendered.**

Feb. 20-Mar. 9. Russians defeated at **Mukden** by five combined Japanese armies under **Ōyama.**

Apr. 5 **Japanese representations** in the United States, England, France, Germany, and Austria elevated to the rank of embassies

May 27-29. In **naval battle of Tsushima Straits** the Russian fleet of 32 vessels, come from European waters, was annihilated by Japanese under **Tōgō.**

Aug. 12. **Anglo-Japanese alliance renewed** for ten years, *casus belli* redefined as attack by a single power on either party

Sept. 5. **TREATY OF PEACE signed at Portsmouth,** after a conference which began Aug 5 through Pres Roosevelt's mediation. Russia acknowledged Japan's paramount interest in Korea, transferred to Japan the lease of the Liao-tung Peninsula and the railroad to Ch'ang-ch'un, and ceded the southern half of Sakhalin. Manchuria to be evacuated by both powers and restored to China. Because of failure to obtain an indemnity the treaty was unpopular in Japan and riots occurred in Tōkyō

Nov. 17. Japan secured by treaty control of the foreign relations of Korea In 1906 Marquis (later Prince) **Itō** was appointed resident-general. A large immigration of Japanese commenced

Dec. 22. Confirmation by China of the Russo-Japanese treaty

1906, Jan. **Resignation of Premier Katsura** because of popular dissatisfaction with Portsmouth treaty **Kenseitō ministry formed by Marquis Saionji.**

Mar. 16. Bill passed lower house for **nationalization of all railways** at estimated cost of $250,000,000 By 1921 there were 6481 miles of state railways and 1993 of private

1907, June 10. **Franco-Japanese treaty** guaranteeing the "open door" and integrity of China, *status quo* in the Far East, and a most-favored-nation agreement, mutual promise regarding security of Chinese territory in which each had special interests (for Japan, Fukien and parts of Manchuria and Mongolia).

July 20. **Abdication of the Emperor of Korea** in favor of his son

July 25. **Japan obtained a protectorate over Korea** by treaty, with complete control by Japanese resident-general

July 30 **Russo-Japanese treaty** similar to the Franco-Japanese treaty (1907), with an agreement about the Chinese Eastern and Southern Manchurian railroads and spheres in Manchuria

1908, Feb. 18. Plans handed to American minister at Tōkyō for Japanese **restriction of labor emigration to the United States** (*Gentlemen's agreement*) to settle existing difficulties between the two countries

July. **Katsura succeeded Saionji as premier.**

Nov. 30. **Exchange of notes with the United States** (*Root-Takahira Agreement*) on the common policy of the *status quo* in the Pacific and "open door" and integrity of China

1909, June. Prince Itō resigned after confessed failure to reform Korean administration

Oct. 26. **Itō assassinated** by a Korean fanatic

1910, July 4. Russo-Japanese agreement demarcated spheres in Manchuria, in joint opposition to American proposals (Knox scheme of Nov 1909) and for common action in defense of their interests

Aug. 22. **KOREA ANNEXED** by treaty, and a program of development and attempted assimilation begun. Korea named *Chōsen*, and Terauchi appointed first governor-general

1911, Feb. 24. New treaty with the United States, continued restriction of emigration of Japanese laborers

July 13. **Anglo-Japanese alliance renewed** for ten years without reference to Korea. Neither party to be drawn into war with a nation with which it had a general arbitration treaty.

Aug. **Saionji succeeded Katsura as premier.**

1912, Feb. 3. Heavy naval program submitted to the Diet, involving eight super-dreadnoughts and eight armored cruisers to be commenced in 1913

July 8. **Secret Russo-Japanese treaty** further delimitated spheres in northeastern Asia

July 30. **The Meiji emperor died** and was succeeded by his son, **Yoshihito.** The year period was changed to **Taishō,** marking the beginning of

1912-1926. THE TAISHŌ PERIOD. The movements begun in the Meiji Period continued with no startling new developments The personal weakness of the Taishō emperor almost eliminated the direct control of the throne over practical politics. The World War and natural economic advance made Japan one of the great world powers

1912, Dec. 20. Prince Katsura became premier without a majority when Saionji resigned because of opposition to his retrenchment policy in Korea

1913, Feb. 12. Adm. Yamamoto succeeded Katsura as premier

May 9. **Formal protest sent the United States** against proposed anti-alien land legislation in California The bill nevertheless was signed (May 19), and Japan assured that treaty rights were not infringed

1914, Apr. Count Ōkuma formed a ministry after Yamamoto resigned because of defeat of a heavy naval budget

Aug. 15. **Japanese ultimatum to Germany** demanding withdrawal of German fleet from Far East and the surrender of Kiao-chow within a week. Since no reply was received

Aug. 23. **WAR DECLARED ON GERMANY** (*Cont pp* 918, *ff*, 1123)

K. THE PACIFIC AREA

1. GENERAL: EXPLORATION AND ANNEXATION

1513, Sept. 25. **Vasco Nuñez Balboa** (1475–1517) first sighted the Pacific from the coast of Panama

1520, Nov. 28. **MAGELLAN** (Fernão de Magelhaes, ?1480–1521) with three ships passed from the Straits of Magellan into the Pacific, which he crossed to the Ladrone and Philippine Islands in the course of 110 days Only a couple of deserted islands were sighted. Magellan was killed on the island of Cebu, but one of his ships, under **El Cano,** returned to Europe by the Cape of Good Hope, discovering **New Amsterdam Island** on the way (1522).

1527. **Portuguese traders** to the Spice Islands seem to have touched on the northwest coast of Australia.

1542. The Spaniard, **Lopez de Villalobos,** crossed from Mexico to the Philippines, discovering some of the **Caroline** and **Palau Islands** on the way

1545. The Spaniard **Ortiz de Retes** touched on the north coast of **New Guinea,** which he named. The island seems to have been sighted by the Portuguese **Antonio de Abrea** in 1511.

1565. The Spaniard **Andres de Urdaneta** discovered the **northern seaway** from the Philippines to New Spain, thus making the return voyage relatively easy For the **Spanish settlement of the Philippines** and the connection with Latin America see p. 908

1567. **Alvaro de Mendaña** (Span.) discovered the **Solomon, Marshall,** and **Ellice Islands**

1578. **Sir Francis Drake crossed the Pacific,** east to west, the first Englishman to make the voyage

1595. **Mendaña,** on a second voyage, discovered the **Marquesas** and **Santa Cruz Islands.**

1606. **Pedro Ferñandez de Quiros** (1565–1614), one of Mendaña's captains, continuing the search for new lands and a southern continent (*Terra Australis*), discovered **Tahiti** and the **New Hebrides.** One of his captains, **Luis Vaez de Torres,** sailed through **Torres Straits,** between Australia and New Guinea. In the same year the Dutchman, **Willem Janszoon,** entered Torres Straits from the west side and coasted along the west coast of York Peninsula.

1616, Oct 25. The Dutchman, **DIRK HARTOG,** landed on the island named for him on the coast of **West Australia.** During the next ten years Dutch mariners explored the west coast and part of the north coast, and in 1627 part of the south coast

1616. The Dutchmen, **Willem Cornelisz van Schouten** (1580–1625) and **Jacob Lemaire,** seeking a route to the Indies not under control of the East India Company, first rounded Cape Horn and crossed the Pacific, discovering the **Bismarck Archipelago** and exploring the north coast of New Guinea

1642-1644. **ABEL JANSZOON TASMAN** (1603–1659), in the service of the East India Company, sailed east from Mauritius, discovered the west and south side of **Tasmania** (Van Diemen's Land), touched on the west coast of **New Zealand,** and on the way back to Batavia discovered **Tonga** and **Fiji.** He proved that Australia was not part of a great Antarctic continent, though in circumnavigating Australia he did not even sight it.

1699 **William Dampier,** an Englishman, coasted along the northwest and west coasts of Australia

1721 **Jacob Roggeveen** (Dutch), sailing from east to west across the Pacific, discovered **Easter Island** and **Samoa.**

1766-1767. **Samuel Wallis** and **Philip Carteret** rediscovered **Tahiti** and explored the Solomon Islands and the New Guinea coasts

1767-1769. **Louis Antoine de Bougainville** (1729–1811), a French nobleman seeking new lands for France, explored Tahiti, Samoa, and the New Hebrides

1768-1771. **FIRST VOYAGE OF JAMES COOK** (1728–1779), the greatest explorer of the Pacific Cook's party set out to observe the transit of Venus, from Tahiti Having achieved this end, Cook sailed around New Zealand, proving its insularity, and thence discovered the east coast of Australia He passed thence to Java and home by the Cape of Good Hope.

1772-1775. SECOND VOYAGE OF JAMES COOK, this time west to east He attempted to find the Terra Australis (see p. 571) and explored the New Hebrides, New Caledonia, and Norfolk Island.

1772. The Frenchman **Kerguelen-Trémarec** discovered **Kerguelen Island.**

1776-1779. THIRD VOYAGE OF JAMES COOK, in search of a passage from Hudson Bay to the Pacific Cook discovered **Christmas Island** and (1778) **Hawaii** (Sandwich Islands), after which he passed through Bering Strait and explored the Arctic coasts of America and Asia (p 562)

1785-1788. Jean François de La Pérouse (1741–1788), one of the greatest explorers of the period, made extensive discoveries in the northwest part of the Pacific, about Japan and Siberia.

1788, Jan. 18. The first shipload of British convicts was landed at BOTANY BAY, Australia, and **England claimed Australia** east of 135° E Long. For the further development of Australia see p 896

1790. Mutineers from the British ship *Bounty* settled on little **Pitcairn Island,** the first British settlers on a Pacific island. Their descendants, by native women, still occupy the island, which was annexed by England in 1838.

1797. The first British mission was established on Tahiti, and soon afterward on the Marquesas and Friendly Islands. The English Protestants were soon followed by **French Catholics,** and, although at first the missions were rather unsuccessful, in the course of the 19th century the islands were for the most part converted

1798. Fanning Island and **Gilbert Island** were discovered.

1798. **George Bass** and **Matthew Flinders** discovered **Bass Strait,** separating Australia and Tasmania.

1802-1803. Flinders completed the exploration of the south coast of Australia and (1803) circumnavigated the continent.

During the 19th century the **development of European trade** ran parallel with the expansion of missionary activity. Sandalwood, trepang, and coconut oil the chief products Ruthless treatment of the natives (**Kanaka traffic** to Australia, i e. kidnaping and selling into slavery). Phenomenal **decline of the native populations,** due in part, no doubt, to practice of infanticide and to the **ravages of disease** brought in by the Europeans The traders, and especially the whalers, completed the exploration of the ocean, while European expeditions extended scientific study

1818-1819. The Frenchman **Freycinet** explored the coasts of New Guinea, the Mariannes, and Hawaii

1823-1824. Another Frenchman, **Duperry,** visited and studied the Gilbert, Marshall, and New Britain Islands

1826-1829. Dumont d'Urville, next to Cook the greatest explorer of the Pacific, investigated New Zealand, New Guinea, New Hebrides, Fiji, and the Mariannes

1828. The Dutch annexed western New Guinea.

1833-1835. Captain **Fitzroy,** with **Charles Darwin,** made a famous scientific voyage in the *Beagle* to Tahiti and New Zealand.

1837-1840. Dumont d'Urville, in a second voyage, explored the Louisiades, Fiji, the Solomons, Marquesas, and Tuamotus. He established the **division of the island world into** *Melanesia*, *Micronesia*, and *Polynesia*

1842. The French initiated a policy of annexation by taking the **Marquesas** and establishing a **protectorate over Tahiti and the Society Islands.** In 1844 they took over **Gambier Island** in the Tuamotus, claiming a protectorate over the entire group, which was formally annexed in 1881. In 1853 the French annexed **New Caledonia.**

1857-1859. The Austrian *Novara* expedition, one of the most fruitful scientific voyages

1864. The French annexed the Loyalty Islands.

1874-1875. The British *Challenger* expedition, under **Sir George Nares.**

1874, Oct. 10. The British government annexed Fiji, inaugurating an extensive annexationist policy which had been previously rejected by the government, but now appeared necessary in view of French and German activity and because of clamor from Australia and New Zealand

1880. Tahiti was made a French colony

1884. England annexed the southeast part of New Guinea, while the Germans appropriated the northeast as well as the islands of the Bismarck Archipelago

1885. Germany annexed the Marshall Islands and the **Solomons.**

1887. England and France established

a **condominium over the New Hebrides.**

1888. The British established a **protectorate over the Cook Islands.**

1889. England, Germany, and the United States arranged for joint **supervision of the affairs of Samoa** (p. 911).

1892. The British proclaimed a **protectorate over the Gilbert and Ellice Islands** (annexed 1915)

1898, Aug. 12. The United States annexed Hawaii (p 910). By the war with Spain the United States secured the **Philippines** (p. 909) and **Guam.**

1899. By purchase, the Germans secured from Spain **the Marianne** (Ladrone) **Islands** and the **Palau Islands.**

1899. Settlement of the Samoan dispute (p 911) The United States retained **Tutuila** and the rest of the islands went to Germany. As compensation the British secured a number of the Solomon Islands from Germany

1900. British protectorate over the Friendly Islands (Tonga) and Savage Island.

1901. The Cook Islands were turned over to New Zealand for administration.

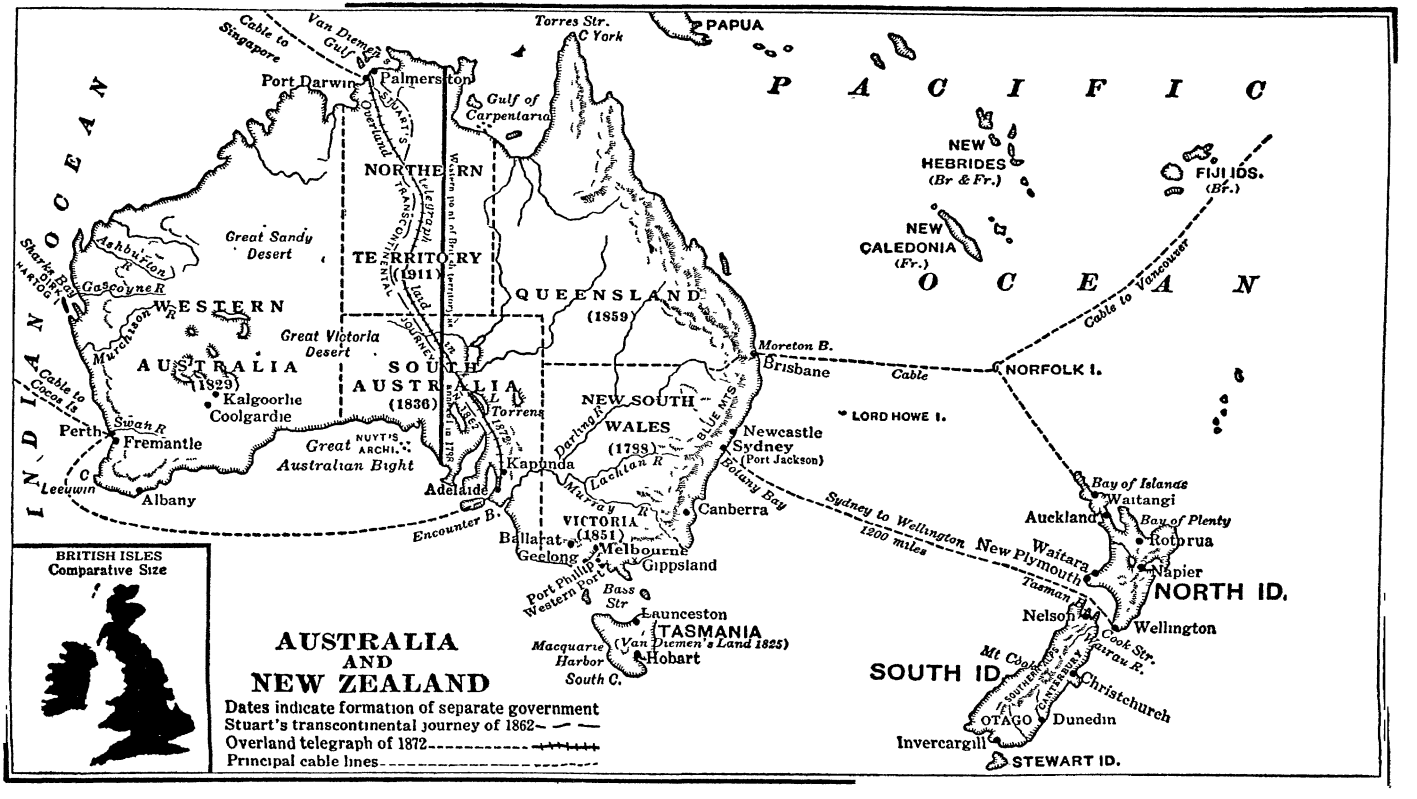
1906. British New Guinea was turned over to Australia

2. AUSTRALIA

The Dutch, who discovered and explored the western and parts of the northern and southern coasts of Australia (1613–1627) called the land **New Holland. James Cook,** who discovered and explored the east coast during his first voyage (1768–1771), called that part **New South Wales.** His favorable reports led the British government, after 1783, to consider it for possible settlement by the loyalists from America, but ultimately, after failure of convict settlements in West Africa, it was decided to use New South Wales for the establishment of criminals and offenders who crowded the British prisons after it became impossible to send them to America The plan was merely to set up a **convict colony** that would support itself

1788, Jan. 26. Capt. Arthur Philip arrived at Port Jackson (Sydney) **with the FIRST CONVICT TRANSPORTS** and convoy, 11 ships with 717 convicts, of whom about 520 were men. In the following month 15 convicts and escort were sent to organize another settlement on **Norfolk Island** (till 1803). Philip remained governor until 1792, during the most critical period of the colony: scarcity of food; uncertainty of supplies, laziness, incompetence, and quarrelsomeness of the convicts, prevalence of vice of every kind The colony was protected by the **New South Wales Corps,** raised in England and itself an unimpressive and insubordinate body The governor enjoyed absolute power and alone formulated policy. The convicts were supplied from government stores, but on expiration of their terms they were given 30 to 50 acres of land Discharged soldiers were given grants of 80 to 100 acres. The officers were more richly endowed, and some of them, like **John Macarthur,** soon became wealthy and influential

1792-1795. Francis Grose and then **William Paterson** acted as vice-governors As members of the New South Wales Corps, they provided richly for their comrades The officers were given the service of convicts and were allowed to establish a monopoly of cargoes brought to the settlement **Importation of rum** was permitted and rum soon became currency, much to the detriment of the settlement



1793. Arrival of the first free settlers (11 in all), who received free passage, tools, convict service, and land grants

1794. John Macarthur first began **sheep-raising and breeding,** which soon became a most profitable venture for himself and for the colony

1795-1800. John Hunter, governor A mild, well-intentioned administrator, he was soon at loggerheads with the officers of the Corps, through whose influence at home he was ultimately recalled

1796. George Bass, in a small boat, **discovered Bass Strait** between Australia and Tasmania Together with **Matthew Flinders** he circumnavigated Tasmania in 1798 Flinders alone in 1802–1803 **circumnavigated Australia,** proving that no strait divided New South Wales from New Holland. He suggested the name *Australia* for the continent, and it gradually came into general use

1800-1806. Philip King, governor. His main ambition was to break the power of the officers, wherefore he forbade their trading and prohibited the importa-

tion of spirits Neither policy proved much of a success, and so King, like his predecessor, was in constant conflict with the officers, of whom Macarthur was the chief leader

1803-1804. Settlement of Tasmania, carried through by the governor for fear that the French might seize it Settlements were established near present-day **Hobart** and near **Launceston.** In 1808 the convicts on Norfolk Island were transferred to Tasmania. From the very outset the settlers had much trouble with aborigines and bushrangers, i.e escaped convicts turned bandits and freebooters.

1804. Insurrection of the Irish convicts, who had been sent in large numbers after the suppression of the revolution in Ireland in 1798. The rising was put down with ruthless vigor.

1806-1809. William Bligh, governor. He was appointed in the hope that, as a well-known disciplinarian, he would be able to end the domination of the officer clique and to stop the disastrous liquor traffic But his drastic methods and fiery temperament resulted merely in the

1808, Jan. 26. Rum Rebellion. The officers, outraged by the arrest of Macarthur, induced the commander, Maj **George Johnston,** to arrest Bligh as unfit for office and to hold him captive until the arrival of a new governor (1809) Though the home government condemned this action, it accepted it and removed Bligh

1809-1821. COL. LACHLAN MACQUARIE, governor. His appointment marked the **end of rule by the naval commanders.** Macquarie took his Highland regiment to Australia and obliged the members of the New South Wales Corps to enlist in the regular force or return home, which about one-half of them did For the rest the new governor devoted himself to the systematic building-up of Sydney, to road construction, establishment of orphanages, and to unrelenting war on the vice prevalent throughout the colony **Civil courts** were established (1814) and a bank opened (1817). In 1816 the home government removed all restrictions on free emigration to Australia, thus preparing the way for a change in the character of the colony But by 1810 there were already 3000 free settlers, endowed with large blocks of land These freemen objected violently to **Macquarie's efforts to secure social equality for the emancipists** (i e. pardoned convicts or those who had served their time) and to discourage free immigration As a result, Macquarie, like earlier governors, was engaged in constant struggle, though on a different basis.

1813. Gregory Blaxland with two companions (Lawson and William Charles Wentworth) first succeeded in penetrating the confused mass of mountains along the coast, thus paving the way for the advance to the plateau of the interior.

1815. Bathurst, the first town in the interior, was founded and a road built to it from Sydney.

1817-1818. John Oxley began the exploration of the interior, following the Lachlan and Macquarie Rivers. He found the country more or less flooded, but the discovery of great grassy regions stimulated settlement. The government granted land freely to immigrants and to emancipists, in addition to whom large numbers of squatters began to occupy grazing lands. Brutal and rapid **extermination of the natives,** who had become aggressive after many outrages by the whites (kidnaping of women and children, etc) Rapid **development of bushranging** (lawlessness of escaped convicts and other bandits, who terrorized the more remote areas).

1819-1821. Inquiry of John T. Bigge, a London barrister sent out to investigate the government and the general condition of the colony. Bigge, having collected much material, recommended liberal land grants to settlers and extensive use of convict labor to open up the country.

1821-1825. SIR THOMAS BRISBANE, the eminent astronomer, served as governor after the recall of Macquarie. The period of his rule was marked by an acceleration of development Land was granted generously on condition that the grantee take over one convict for every 100 acres. **Sale of crown lands,** but not more than 4000 acres to any one person Systematic clearing of lands by convict gangs, at fixed prices Organization of large syndicates: the *Australian Agricultural Company* received a grant of 1,000,000 acres and a monopoly of the coal mining near Newcastle. The *Van Diemen's Land Company* was given a grant of 400,000 acres in Tasmania Brisbane's administration was distinguished also by the

1823. Establishment of a legislative council, the first step in the development of representative government The council consisted of 5–7 nominated members, who could act on measures submitted by the governor. In 1828 the council was enlarged by the addition of seven non-official members. Beginning of the **agitation for representative government,** in-

spired by **William C. Wentworth,** editor of the *Australian* (1824).

1824. Opening of new convict settlements, to take care of the most dangerous elements One was established at **Moreton Bay** and the town of Brisbane was founded This colony was maintained until 1842 At the same time **Norfolk Island** was reopened and the worst felons were transported thither Brutal treatment led to several serious uprisings and in 1855 the penal colony on Norfolk was given up

1824-1825. Explorations of Hamilton Hume and **William Hovell** in the region west of the mountains. They crossed the upper Murray River and ultimately reached the coast near Geelong The rich country discovered by them was soon penetrated by settlers

1825. Tasmania (Van Diemen's Land) **was separated from New South Wales** and was thenceforth administered by a lieutenant-governor and a legislative council Horrible conditions in the island with its large convict population. The bushrangers, under leaders like **Matthew Brady,** were well organized in bands and attacked settlers and natives The natives, driven to desperation by the treatment of the whites, embarked upon the **Black War,** which cost many lives The governor, **Col. George Arthur,** finally managed to track down the bushrangers, many of whom were hanged, but his efforts to corral the natives (the *Black Line*) met with failure. Finally **George Robinson,** a Methodist settler, offered to serve as conciliator. He succeeded in getting the remnants of the native tribes to submit and in 1835 the 200–300 who remained were established on Flinders Island, where efforts were made to civilize them The experiment failed By 1844 there were only 44 natives left, and these were moved back to Tasmania The last man died in 1869 and the last woman in 1876

1825-1831. RALPH DARLING, governor of New South Wales. He was much more vigorous and autocratic than his predecessor and much less favorable to the emancipists. Conflict with Wentworth over freedom of the press, drastic suppression of disorder, **Bushranging Act** (1830) — suspects to be arrested without warrant and held until proved innocent On the other hand, Darling's rule was distinguished by the extension of the council (see above) and by the introduction of **trial by jury** for criminal cases Emancipists were permitted to serve on juries, excepting in special cases Darling continued the policy of **generous land grants** and by the end of his period some 4,000,000 acres had been assigned in New South Wales, much of it in large blocks.

1825-1827. The government, alarmed by the explorations of the Frenchman, Dumont d'Urville, along the coasts, established **posts at Westernport, at Albany** on the southwest coast, **and at Melville Island** on the north coast, but none of these thrived. In 1829 the British government, however, laid claim to the whole of the continent.

1827-1830. Progress of exploration. Allan Cunningham in 1827 discovered the rich Darling Downs, in the hinterland of Brisbane. In 1828 **Charles Sturt,** seeking for the great inland sea which he was convinced existed, discovered the Darling River. On a second journey (1829–1830) he descended the Murray River to its mouth and, with great hardship, made the return trip overland to Sydney.

1829. FOUNDATION OF PERTH, in West Australia This was the work of **Thomas Peel, James Stirling,** and their associates. A huge tract of land was granted by the government and was divided among the settlers, but dispersal of the population, lack of sufficient labor, etc., led to collapse of the founders' hopes and investments West Australia led a most precarious existence for many years

1831-1838. Sir Richard Bourke, governor. The British government fixed the minimum price of land at 5 shillings per acre, thus bringing to an end the unrestricted granting of land. Half of the proceeds from land sales was to be devoted to financing of immigration, the other half to public works In 1832 the New South Wales government began the encouragement and financing of free immigration

1834-1836. FOUNDING OF SOUTH AUSTRALIA. Whalers and sealers from Tasmania and America had for some time maintained stations on the coast, but the establishment of the colony was due to the efforts of **Edward Gibbon Wakefield** (1796–1862), the famous colonial theorist. Wakefield argued that land must be sold at a "sufficient price," which meant a price sufficient to oblige the laborer to work for several years before being able to acquire land for himself In the interval the proceeds from land sales could be devoted to the importation of further labor, and thus a perpetual turnover of capital, land, and labor could be effected On Aug 2, 1834, Wakefield's followers, supported by men like the Duke of Wellington, George Grote, and others, secured for their *South Australia Association* a charter to found a colony. The first settlers were landed at Kangaroo Island in 1836, but were soon

moved to the mainland, where **Adelaide was founded.** Wakefield's theory was not closely adhered to, but the land sales resulted in widespread speculation, which ruined the beginnings of the enterprise. **Sir George Grey** (lieut.-governor (1841–1845) finally succeeded in clearing up the financial muddle and re-established the colony on the basis of cultivation and grazing

1834-1837 SETTLEMENT OF VICTORIA. This was begun by colonists from other parts of Australia and Tasmania. In 1834 **Edward Henty** and his brothers from West Australia began farming and ranching at Portland Bay and in the following year **John Batman** and his associates from Tasmania (the *Port Philip Association*) concluded a fantastic treaty with the natives at Port Philip and began to open the country. A rival group from Tasmania, led by **John Fawkner,** established itself close by. The Sydney government, ill disposed to extension of its responsibilities, warned the squatters off, but in the end could do nothing more than dissolve the association and add the region to New South Wales (1837). Batman and his friends were the **founders of Melbourne**

1837. A British parliamentary committee investigated the whole question of **transportation of convicts** and reached conclusions unfavorable to the system. Beginning of the movement to abolish it

1838. The minimum price of land was raised to 12 shillings per acre (in 1840 to £1 per acre). The government, however, issued **grazing licenses** for a small fee, thereby facilitating the occupation of large tracts in the interior. Between 1840 and 1850 the Darling Downs were opened up and New South Wales entered upon the golden age of the grazing and wool-raising industry.

1840, Nov. 18. THE LAST CONVICTS WERE LANDED IN NEW SOUTH WALES. Since 1788 between 60,000 and 75,000 had been brought in, but in 1840 there were perhaps less than 25,000 under sentence. The free population already greatly outnumbered the convicts and emancipists.

1840-1841. Edward J. Eyre explored the barren region north of Spencer Bay as far as Lake Torrens. Thence he made his way, alone with one native, across the huge deserts to Albany (West Australia).

1842. Reconstruction of the legislative council, which henceforth was to consist of 36 members, of whom 24 were to be elected by the propertied classes. Emancipists were given the vote provided they could meet the property qualifications

1844-1845. Charles Sturt, starting from Adelaide, pushed his way north into the great **Stony Desert** as far as the Diamantina. At the same time (1845) the German scientist **Ludwig Leichhardt** explored the region from Darling Downs to the Gulf of Carpentaria and as far as Port Essington (post founded 1831)

1847. By order in council the great pastoralists who had occupied land on grazing licenses were transformed into **leaseholders,** thus securing fixity of tenure. The measure reacted favorably on the sheep industry, but accentuated the conflict of pastoralists and small farmers

1848 The British government resumed transportation of convicts on the new Pentonville (conditional pardon) system. Convicts who had proved their good behavior for a couple of years in England were transported to Australia and set free on condition that they should not return to England until their sentence was completed. The new plan roused a howl of protest in New South Wales

1850-1855. Construction of the first railway (Sydney to Goulburn).

1850. Convicts were for the first time sent to **West Australia,** in response to a request from the settlers, who were desperately in need of laborers

1850, Aug. THE AUSTRALIAN COLONIES GOVERNMENT ACT passed by the British Parliament. The colonies were given the right to constitute their own legislatures, fix the franchise, alter their constitutions, determine their own tariffs, all subject to royal confirmation. Thus the Australian states, in conformity with the new colonial policy of the British government after 1837, were given self-government. A committee headed by **William Wentworth** worked out a **constitution for New South Wales** which was adopted in Nov. 1855. It provided for a legislative council appointed for life and a legislative assembly elected on a restricted franchise, together with cabinet government on the English model. At the same time the other states (excepting West Australia) adopted similar constitutions, though for the most part they provided for an elective upper house

1851. The legislative council of New South Wales unequivocally forbade the landing of further convicts on any system, and the British government yielded.

1851, July 1. VICTORIA was separated

from New South Wales and became a distinct colony

1851, Aug. 9. DISCOVERY OF GOLD in large nuggets at Ballarat (Victoria), then at Bendigo and other places Isolated finds had been made ever since 1839, but the government had discouraged the search for fear of the diversion of labor from grazing From the Victoria fields about £80,000,000 worth of gold was taken in the first decade Tremendous **influx of workers and adventurers** from all over the world The population of Victoria rose from 77,000 in 1851 to 333,000 in 1855 Recrudescence of bushranging Efforts of the government to secure some part of the new wealth, in the form of mining licenses Growing discontent on the gold fields culminated in Nov.-Dec 1854 in **open rebellion,** led by German and Irish revolutionaries who proclaimed the **Republic of Victoria.** The insurrection was put down by government troops without much trouble

1852. Foundation of the University of Sydney, followed in 1853 by that of Melbourne and later other state capitals

1852. Arrival of the first steamship at Sydney In 1856 the Peninsula and Oriental Steamship Company opened regular service, at first in competition with the fast clipper ships which had greatly reduced the time of passage from England

1853. Discontinuance of transportation to Tasmania. Since 1803 about 67,000 convicts had been landed in the island (about 4000 a year after 1841). The name *Tasmania* now definitively replaced that of *Van Diemen's Land*, and a constitution not unlike that of New South Wales was adopted

1855. The convict colony on Norfolk Island was abandoned, after several serious and bloody insurrections.

1855. The Victoria government passed an **act to restrict Chinese immigration** (33,000 had come to the gold fields since 1851) The new law provided for a poll-tax of £10 on every Chinese immigrant. In 1859 a residence tax of £4 per annum was added. Similar measures were adopted by South Australia (1857) and New South Wales (1861) despite pressure from the British government The effect was to check Chinese immigration almost completely

1855. New South Wales, having first adopted a railway gauge of 5 ft 3 in., changed to the 4 ft 8½ in. gauge, leaving Victoria with the broader gauge South Australia and West Australia and Queensland, for reasons of economy, adopted the 3 ft 6 in gauge, thus producing complete **confusion in the continental railway systems.** In all the colonies the railways soon came under the control of the state

1859. QUEENSLAND was established as a separate colony, following agitation against government from Sydney. **Brisbane** became the capital

1861. In New South Wales the **Land Occupation Act** limited the tenure of leases and permitted **selection of small holdings** for purchase The measure was intended to help the small farmer (*selector*), but gave rise to much abuse (selecting of the best part of a large sheep run, e g , and "dummying" or purchase by selectors who were mere agents of the large holders) Greater and greater efforts were made in most colonies to restrict and break up the large holdings (resumption of crown lands on expiration of leases, compulsory resale, etc) culminating (1910) in a heavy tax on unimproved estates of over £5000 value. But none of these measures proved entirely successful

1861. Robert O. Burke and **W J. Wills** headed a lavishly financed and well-equipped expedition across the desert from Melbourne, using camels for the first time. The expedition first **succeeded in crossing Australia** from south to north (Gregory River on the Gulf of Carpentaria), but the leaders lost their lives on the return journey.

1862. M'Duall Stuart, on his third attempt to cross the continent from Adelaide to Port Darwin, succeeded This expedition was of far greater scientific importance than that of Burke and Wills

1863. Administration of the Northern Territory (i e central as well as northern Australia), which, since the separation of Queensland, was no longer contiguous to New South Wales, was **assigned to South Australia,** where there was high hope of fertile territory.

1864. Beginning of the **importation of native (Kanaka) laborers** into Queensland from the Solomon and other islands The system was intended to meet the labor shortage on the sugar plantations Though officially a system of contract labor, it soon degenerated into something closely akin to slave-raiding, until regulated, to some extent, by the government.

1866. The Victoria Parliament, influenced by the writing of **David Syme,** an influential Melbourne editor, gave up free

trade and **introduced protection.** The measure led to a great constitutional conflict between the assembly and the council, which was dominated by the squatter oligarchy. Similar struggles continued until finally the farmer and industrial labor groups secured control of the political situation The other colonies followed the example of Victoria in adopting protection, with the sole exception of New South Wales, which contented itself with a tariff for revenue only.

1867. **The Public Schools Act** in New South Wales laid the basis for the modern system of compulsory education for the young

1867. **The last convicts were landed in West Australia,** which, since 1853, had received about 10,000 Thus ended the transportation system to any part of the continent

1870. **The British government withdrew imperial forces** from Australia, after which the different colonies established militia systems of their own

1872. **Opening of the telegraph line across the continent** from Adelaide to Port Darwin, which was soon afterward connected with Java and so with the lines to India and Europe

1873. **Introduction of compulsory, secular schooling in Victoria.** At the same time the Victoria government passed the **first factory act,** aimed at protection of children and women and at the maintenance of sanitary and safe working conditions This pioneer move was improved upon in 1884 and was imitated by the other colonies

1873. **The New Guinea problem** Already in 1867 the New South Wales government had appealed to London for action in the non-Dutch part of New Guinea, but the government had turned a deaf ear In 1873 Capt **Moresby** raised the British flag on the south coast, but the home government was still cool and refused to act unless the colonies agreed to assume responsibility for the administration of the territory. This some of the colonies were unwilling to do, so that Moresby's action was disavowed.

1874. Crossing of the western half of the continent by **John Forrest,** who made his way from the Murchison River across the desert to the newly constructed south-north telegraph line and thence to Adelaide.

1878. **The Queensland government annexed the islands in Torrens Straits.**

1879. Organization of the **first trade-union congress.** Unions had existed for some years previously and had embarked upon a widespread **agitation for the eight-hour day** (one of many points borrowed from the Chartists who had come to Australia after 1848). The unions became powerful factors in New South Wales, Victoria, and South Australia

1880. Meeting of the **first federal conference at Sydney,** to consider the possibility of federation of the colonies The idea had been put forward long before by W. C. Wentworth and was ardently championed by **Sir Henry Parkes,** the eminent statesman of New South Wales Homogeneity of race, common tradition, the needs of defense, etc., favored some sort of union, but the colonies were jealous of their independence and in many respects downright hostile to each other

1883-1884. **THE NEW GUINEA CRISIS.** The Queensland government, uneasy about German designs, offered to assume the administration of the island if the home government would annex it Apr 4, 1884, the Queensland government, exasperated by delay in London, proclaimed possession, but was disavowed by London. Other colonies joined in the agitation for action Ultimately, when the home government decided to act, the Germans had already laid claim to the northeastern part, leaving to the British (annexation Nov. 6, 1884) only the southeastern part This danger at the door appears to have had much to do with furthering the sentiment for federation in Australia.

1883. **Opening of the Sydney-Melbourne railway line.**

1885. The British Parliament authorized the **establishment of a federal council** to meet every two years for the discussion of inter-colonial problems. The first meeting was held at Hobart (1886), after which New Zealand no longer attended. Since the council had merely consultative power it was regarded as inadequate by Parkes and other federalists, who renewed their demands for real union.

1885. **Victoria established wages boards,** empowered to fix wages in sweated industries These boards, composed of employers and employees, with a neutral chairman, were given extensive powers to regulate entire industries A daring experiment in labor relations, the system was gradually adopted by other colonies (1908–) under pressure of the labor parties

1888. The British privy council upheld the **exclusion of the Chinese** as practiced in Victoria Thereafter the policy was enforced by all the colonies and the idea

of a "White Australia" met with general acceptance. As a matter of fact, there was growing hostility to any immigration, especially on the part of labor, and the influx of new settlers rapidly declined to a mere trickle.

1890. The Australian colonies and New Zealand agreed to support financially a British naval squadron, to be maintained in Australasian waters

1890. Responsible government was at last established **in West Australia.**

1890. A great shipping, mining, and shearing strike resulted in failure, but thereby came to mark an important turning-point in the **development of the labor movement.** In several colonies the trade unions embarked upon political activity and soon became crucial factors in the political situation.

1891, Mar.-July. THE FIRST AUSTRALASIAN FEDERAL CONVENTION met at Sydney, under the presidency of **Sir Henry Parkes.** The members were chosen from the colonial parliaments and included most of the outstanding political figures of Australia and New Zealand The convention worked out a draft constitution, which later served as a basis for the federal system, but the scheme had to be dropped because of the **opposition of New South Wales.** The result was renewed agitation for federation, especially by popular societies and leagues (1893-). The great **financial crisis of 1893,** the growth of the White Australia sentiment, and the emergence of Australian nationalism contributed further to the desire for union

1894. South Australia introduced woman suffrage, which was later adopted by the other states (West Australia, 1899, New South Wales, 1902; Tasmania, 1903, Queensland, 1905, Victoria, 1909). At the same time South Australia established **compulsory arbitration of industrial disputes,** another experiment in the settlement of labor problems

1897-1900. THE ACHIEVEMENT OF UNION. A federal convention met at Hobart in Jan 1897 (10 members from each colony except Queensland) This assembly reconsidered the draft constitution of 1891 and finally evolved the arrangement which was later accepted The federation was modeled in large measure upon the United States system, though with the responsible government characteristic of England. The united states were to be called the *Commonwealth of Australia,* and the new federal government was to be established in a new capital city to be determined later. The federal government was to have control of foreign affairs, defense, trade, tariffs, posts and telegraphs, currency, naturalization, marriage and divorce, pensions, etc At the head was to be a **governor-general,** appointed by the crown. The **executive council, or cabinet,** was to be composed of members of Parliament and responsible to Parliament. Parliament was to be bicameral the upper house (**Senate**) was to consist of six members from each state, elected directly for a six-year term, one-half renewable every three years, the **House of Representatives** was to be directly elected on the basis of populational districts. A high or **supreme court** was provided for as guardian of the constitution.

The draft constitution was submitted to the colonies for popular vote Victoria, South Australia, and Tasmania were overwhelmingly in favor, but in New South Wales the proposal was lost by a fairly small vote. In 1898 a **conference of prime ministers,** in which Queensland joined, arranged for amendments (chiefly financial) to meet the objections of New South Wales In a new election in New South Wales (1899) the amended draft was adopted After some discussion of the limitation of appeals to the British privy council, the British govment and Parliament accepted the project, which was given royal assent on July 9, 1900. West Australia then decided to join the federation (July 31) and on

1901, Jan. 1. THE COMMONWEALTH OF AUSTRALIA came into being. The first cabinet was led by **Edmund Barton,** ardent federationist and protectionist The opposition, led by **G. H. Reid,** favored a tariff for revenue only. The **Labor Party** formed the third group. Led by **J. C. Watson** and better disciplined than the other parties, it was able, from the outset, to control the balance, and thus to carry into the commonwealth field the program of state socialism already introduced in the states. In 1901 New South Wales introduced conciliation and arbitration courts and adopted a scheme for old-age pensions. The Labor Party was particularly determined in the matter of immigration restriction, to which all parties, indeed, were committed

1902. The Immigration Restriction Act (federal) provided that an immigrant, on demand, must demonstrate ability to pass a test in a European language (changed in 1905 to "a prescribed language" to spare Japanese susceptibilities). In this way Orientals and, if desired, Europeans could be excluded at will. The federal government at the same time put a stop to the importation of Kanakas into Queens-

land (they were repatriated in 1906). A high tariff on sugar protected the sugar-growers from competition from outside.

The **federal tariff** established in 1902 placed the whole continent on the protectionist system

Woman suffrage was established (1902) for all federal elections

1902-1904. Alfred Deakin, leader of the opposition, became premier, dependent on support of the Labor Party When the latter abandoned him

1904. Watson formed the first Labor cabinet, which, however, was able to maintain itself for only a few months Watson was succeeded by

1904-1905. Reid, who governed with support of the non-Labor representatives. The combination did not work very smoothly and the Reid cabinet was followed by a

1905-1908. Deakin ministry, which enjoyed the support of the Labor Party, now led by **Andrew Fisher.**

1905. British New Guinea became an Australian federal possession, and was renamed *Papua* (the Portuguese name) The territory had been but little developed (white population c. 600), but was regarded as vital for defense, especially in view of the rise of Japan and her victory over Russia

1908-1909. Second Labor cabinet (Fisher). The government was much preoccupied by foreign affairs and defense The new tariff (1908) gave British goods a 5% preference, and other efforts were made to draw closer the bonds to Great Britain, chiefly in view of the rising naval power of Germany and the gradual withdrawal of British naval forces from the Pacific. The Australian colonies had all taken part with the mother country in the South African War, and contributions had been made since 1890 to the maintenance of a naval squadron in the South Pacific In 1908 the Australian government decided on the **construction of a naval force** of its own and began work on a 22-year program

1909. The commonwealth capital was finally fixed at Canberra (New South Wales), the state government ceding the necessary territory, with a strip of land to the sea.

1909-1910. Another Deakin government, based on fusion with the following of Reid and his successor, **Joseph Cook.**

1909 Federal old-age pensions were established for those over 65 years of age and resident in Australia at least 25 (later 20) years

1909-1910. Defense Acts. After a visit and recommendations by Lord Kitchener, the Australian government introduced a system of **compulsory military training** and began to organize a regular military force

1910. The Northern Territory, administered by South Australia, **became a federal possession.**

Apr. In the general election the **Labor Party** for the first time **won a clear majority** of seats in the House of Representatives, thus ending the system of three minority parties working in combination. Fisher formed his second government, which lasted until 1913 **Continuation of the social program** (heavy tax on large and absentee properties, etc) In order to make the White Australia more secure, the government resumed the **system of assistance to desirable white immigrants,** especially with the view of settling the Northern Territory

1913. In the general election the **Fusion Party** (Joseph Cook) **secured a majority** of one Cook formed a ministry, but legislation was effectively blocked by the Labor Party, which still had a majority in the upper house To break the deadlock the governor-general dissolved both houses, and in the

1914. General election the **Labor Party recovered its majority.** Fisher formed his third government, which in 1915 was taken over by his successor, **William M. Hughes.** (*Cont. p* 1128)

3. NEW ZEALAND

New Zealand was discovered by the Dutch captain, **Tasman**, in 1642. But he did not land and the islands were not rediscovered until **Capt. Cook**, on his first voyage, landed (Oct. 7, 1769) and circumnavigated the group. The inhabitants, numbering perhaps 100,000, were located chiefly in the warmer, north island. They were **Maoris**, a people of the Polynesian family, who had probably occupied the country between 900–1400 A D Their culture was Neolithic and the practice of cannibalism was general. Tasman and Cook both had occasion to note their fighting qualities

Though several other explorers touched

New Zealand in the last quarter of the 18th century, it was only after 1792 that **whalers, sealers, and traders** began to arrive more frequently. Merchants from Sydney were interested in the fine **timber** and in the native **flax**, which was bought from the Maoris in exchange for firearms. After securing muskets, native chiefs near the coast began to attack and exterminate tribes of the interior There followed, especially after 1821, the **depredations of Hongi**, of **Te Rauparaha** (*Satan*), who carried his wars into the South Island, and of **Tu Hawaiki** (*Bloody Jack*), who dominated Otago By this time the bay whalers were establishing **permanent shore settlements** on the coast of the South Island and in Cook Strait Escaped convicts from New South Wales and beachcombers of all descriptions made these early settlements by-words for lawlessness and depravity. In the meanwhile

1814. **SAMUEL MARSDEN**, chaplain of the New South Wales penal colony, who had become acquainted with Maoris serving on whaling ships, established the **first Church of England mission** at the Bay of Islands He himself did not remain in the islands, but opened a seminary for Maori chieftains in his New South Wales home. In New Zealand three lay missionaries and their families were maintained, but little progress was made during the first decade. In 1822 a **Wesleyan mission** was opened, and in 1823 the first Anglican clergyman, **Henry Williams**, arrived and initiated a period of greater activity and success. **William Colenso** translated the Bible into Maori (1827–) and in 1842 **George Selwyn** was named first Anglican Bishop of New Zealand. The missionaries did much to teach the natives and their influence spread far and wide in a relatively short period In general the missionaries were opposed to settlement by Europeans, desiring to keep the islands for the Maoris The **first Catholic mission** was opened at Kokianga in 1838

1826. **The first New Zealand Company** was founded in England. It enjoyed powerful support and at once dispatched colonists. These, arriving at the height of the native wars, were too unfavorably impressed and insisted on going on to Australia

1833. In order to combat the spread of lawlessness, the British government appointed **James Busby as resident** in the islands. Since the British government did not claim sovereignty, Busby had no real standing and was unable to achieve much

1837. **Baron de Thierry**, a Belgian-British adventurer, arrived on the northwest coast and attempted to set up a kingdom of New Zealand on land he claimed to have bought from the natives His venture was only one of many in these years. Missionaries, traders, speculators in Australia and England began to buy land in large blocks and under frequently suspicious circumstances, so that by 1840 land claims amounted to 56,000,000 acres

1837. **Foundation of the NEW ZEALAND ASSOCIATION by Edward Gibbon Wakefield**, who had been chiefly instrumental in the colonization of South Australia (p 899). The association agitated for annexation and settlement, but met with no favorable response from the colonial office which, like the missionaries, opposed further settlement. Thereupon Wakefield and his followers organized the **New Zealand Company** (May, 1839), bought out the rights of the earlier company, and began to sell land at £1 per acre to prospective colonists and investors. The government still opposing, the company, fearful of action by a rival French enterprise (Capt. **Langlois and the Nanto-Bordelaise Company**), sent out colonists without securing permission of the government.

1840, Jan. 22. **THE FIRST BRITISH COLONISTS landed at Port Nicholson** in Cook Strait. A huge tract of land was acquired from the Maori chiefs and the town of **Wellington was founded.** In the interval the British government, also exercised by French designs, proclaimed

Jan. 30. **British sovereignty.** Capt **William Hobson** had been sent out as governor, and, with aid of the missionaries, concluded with the native chiefs

Feb. 6. **THE TREATY OF WAITANGI,** which was subscribed to by some 500 chiefs in the course of the next six months By the treaty the native leaders ceded their sovereignty to Britain, and in return were guaranteed their lands and other possessions On May 21 Hobson proclaimed British sovereignty and established the **capital at Auckland.** On Aug. 10 a British force landed at Akaroa (Banks Peninsula), only a day before the arrival of the French colonials The latter settled for a time, but all danger of French possession was obviously past.

1840-1842. Capt. **William Hobson**, governor He made desperate efforts to regulate the confused land claims, and by ordinance of June 9, 1841, voided all claims until investigated and approved by the

government. This brought him into **conflict with the New Zealand Company,** which had claims to some 20 million acres and which was sending out colonists in large numbers While the government tried to sell lands at £1 per acre, the company sold at 5*s*. Ultimately the company's rights to about 283,000 acres were recognized, but in London as in New Zealand the conflict between government and company continued for years

1840. The company established **settlers at New Plymouth,** renamed *Taranaki* in 1859

1841. The company settled the south side of Cook Strait, founding the **town of Nelson.**

1843-1845. Capt. **Robert Fitzroy,** governor. In his eagerness to bring in settlers, he permitted purchase of land direct from the natives on payment of 10*s* (soon reduced to 1*d*) per acre to the government. This measure was disallowed by the home government and Fitzroy was recalled By that time

1843-1848. THE FIRST MAORI WAR had broken out It originated from a dispute about land in the Nelson district, where the settlers took the offensive and were cut down (**massacre of Wairau**). There followed anti-foreign outbreaks in the north. Many of the tribes remained loyal and the movement at all times lacked cohesion To meet the emergency the home government sent

1845-1854. Capt. (later Sir) **GEORGE GREY** from South Australia as governor With his usual vigor he suppressed the traffic in arms and while putting down disorders asserted his personal authority and gained the confidence of many Maori leaders He cancelled his predecessor's land ordinances and forbade direct purchase on penalty of heavy fine (1846).

1846, Dec. 23. The British government conferred a constitution on New Zealand (named *New Munster* and *New Ulster*) Each province was to have its own governor, appointed council, and elected assembly. This system, obviously premature, was rescinded in 1848 Meanwhile the Maori wars in the North Island had deterred settlers from colonizing the disaffected regions, but

1846. The advent of the Russell ministry in England introduced an element friendly to the company. The government granted loans and allowed a very liberal land settlement. Under the auspices of the company other organizations took up colonization.

1848. A Scottish Free Church association settled Otago (capital Dunedin), and in

1850. An organization of **Church of England members settled Canterbury** (Christchurch) In the open regions of the South Island, where there were few natives, **sheep-raising** soon established itself (the industry was inaugurated in 1843–1844 and operated on grazing licenses issued by the government)

1851. The government began to issue **grazing leases** for 14 years, thus facilitating the **organization of large holdings.** Wool-raising became the most important industry. By 1871 there were in New Zealand 10 million sheep and wool was exported to the value of £2,700,000.

1851. The New Zealand Company was dissolved. By the terms of the settlement the members received £268,000, which became a charge on the New Zealand government

1852. A NEW CONSTITUTION WAS PROMULGATED. It provided for six provinces, each under a superintendent and each with a provincial (district) council elected on the basis of a property franchise. For the colony as a whole there was to be a governor assisted by a nominated legislative council and a house of representatives elected on the provincial franchise The regulation of native affairs was reserved to the home government (colonial office). Since the district councils were organized and functioned before the colonial assembly met, the provincial governments secured control over most affairs and until 1875 New Zealand was essentially disunited (**period of provincialism**).

1853. Grey reduced the price of crown lands to 10*s*. per acre, making possible the establishment of the small farmer.

1856. Responsible government was established in New Zealand. At the same time the provincial councils were authorized to dispose of the crown lands within their districts.

1858. The new province of Hawke's Bay was established There followed the provinces of **Marlborough** (1859), **Southland** (1861–1870), and **Westland** (1873)

1860-1870. THE SECOND MAORI WAR. Like the first, this was a series of outbreaks, confined almost entirely to the North Island. The main cause was the rapid acquisition of native land by the government and the growing feeling of the

natives that they were doomed. Development of the **king movement**, which aimed at union of the Maori tribes under a king This was never more than partially successful There followed (1865–) the **Hau-Hau movement**, a religious movement compounded of native mythology and Judaeo-Christian lore, the basic idea being opposition to Christianity as well as to European domination Like the first war, the second, concentrated particularly in the Taranaki and Waikato country, was a matter of guerrilla warfare, and therefore difficult to deal with Australian troops were sent to aid the government, but the **campaigns of Generals Pratt and Cameron** were indecisive.

1861-1867. **SIR GEORGE GREY**, governor for the second time He did what he could to restore order and introduced the system of **confiscating the lands of rebels.** At the same time he made concessions to the Maoris (four chiefs being admitted to the legislative assembly in 1867) By 1870 the native disorders had been for the most part suppressed. During the remainder of the century the Maoris declined rapidly in numbers

1861. **Discovery of gold in Otago** and (1865) in **Westland.** The result, as in similar cases elsewhere, was a great inrush of miners, so that the population rose from 100,000 in 1861 to 250,000 in 1870 The South Island became by far the most populous and rich and so it remained throughout the rest of the century

1862. **The government abandoned its right to pre-emption of native lands** and established free trade in such lands In 1865 a **native land court** was established to investigate titles before sale Under this system the Maoris were quickly separated from their lands, so that by 1892 most of the good land was in the hands of the settlers

1863. **Opening of the first railroad** (Christchurch to Ferrymead). The railways were from the start state-owned and operated

1865. **The capital was transferred from Auckland to Wellington,** removing a longstanding grievance.

1870. **The British government withdrew its troops** from New Zealand, following the conclusion of the Maori War

1870-1890. **The "continuous ministry" of Sir Harry Atkinson,** representing primarily the large pastoral, landed interests, was in power during most of twenty years The period was one of deep depression, following the gold rush boom. To meet the situation the government, inspired by **Sir Julius Vogel,** embarked upon a policy of heavy borrowing, extensive railroad building and public works construction generally. In 1873 the **ownership of native land was individualized,** which made purchase from the natives easier Extensive program of **assisted immigration** for settlers carefully selected in England by an agent of the New Zealand government The population rose from 256,000 whites in 1871 to about 772,000 in 1901

1870. **Steamship connection** was established with San Francisco. The **New Zealand Shipping Company** (1873) also contributed to improvement of communications

1875. **The district councils were abolished** (effective Nov 1, 1876), thus ending the period of provincialism. New Zealand was thenceforth under one government

1876. **Opening of the transoceanic cable to Australia.**

1881. **Chinese Immigrants Act,** similar to the regulations introduced in Australia to restrict the influx of Orientals.

1882. Successful **introduction of meat refrigeration** on transoceanic steamers For New Zealand this invention was epoch-making Sheep thenceforth were raised not merely for wool, but for food. Furthermore, refrigeration made possible the **development of a great dairy industry** to provide the English market

1887. **Annexation of the Kermadec Islands** to New Zealand Already in 1871 the New Zealand government had appealed to England to annex Samoa, but these appeals proved fruitless The New Zealanders throughout took a frankly imperialist view of southern Pacific affairs

1888. **Adoption of a protective tariff,** under pressure from Labor groups. One effect of this change was that the Atkinson party began to divide and disintegrate

1889. **Introduction of manhood suffrage,** another concession to popular agitation

1890. In the general election **the Liberal-Labor Party,** led by **John Ballance,** defeated the Conservatives. For more than 20 years the progressive elements controlled policy. Under **Richard Seddon** (prime minister 1893–1906) an energetic social program was realized, which gave New Zealand a world reputation for state socialistic experiment In the land question the government acted to restrict and break up large holdings through taxes on unimproved values and absentee estates. Every effort

was made to establish small farmers on the land Stringent **factory laws** (1894, 1901) and **progressive income tax.** The Labor Department, under **W. Pember Reeves** (1891–) instituted many other measures, some of which are listed below

1893. **Adoption of woman suffrage.**

1894. Establishment of **industrial conciliation and arbitration boards,** with obligatory clauses. In practice the result was rapid **growth of trade-unionism** and regulation of all industrial conditions by the arbitration courts (wages, hours, factory conditions, etc) This was the key measure in the New Zealand social program.

1897. **The eight-hour day** established by law

1898. Introduction of **old-age pensions**

1899. **Further restriction of oriental immigration:** an educational test was introduced, as in Australia

1900. **The Cook Islands,** as well as **Savage Island** and **Suvorov Island,** were **annexed to New Zealand.**

1903. New tariff arrangements provided for **preferential treatment of British goods.** New Zealand was extremely loyal to the empire and, like Australia, contributed to the upkeep of the British Pacific squadron New Zealand sent a contingent to participate in the South African War.

1906-1911. **Joseph Ward became prime minister** on the death of Seddon

During these years New Zealand enjoyed great prosperity, but politically the governing Liberal-Labor Party began to disintegrate and in 1909 the **Labor Party** organized separately Rapid spread of a strike movement, inspired by the **Federation of Labor** (founded 1907)

1907, Sept. 26. **NEW ZEALAND WAS GIVEN THE STATUS OF A DOMINION** within the British Empire

1909. The government decided to pay for a battleship to be added to the British navy.

1911. **A system of universal military training** for those between 14 and 41 was established to meet the growing tension in international affairs.

Oct. **Defeat of the Liberals** in the election After an interim cabinet

1912. **W. F. Massey,** leader of the Reform (Conservative) Party, became prime minister. The **Reform Party** drew its support from the small farmers and dairymen, chiefly in the North Island, which, since 1906, had again passed the South Island in population and which became ever more influential One of the first acts of the new government was to transform the crown leaseholders into freeholders

1913. **Foundation of the United Federation of Labor and of the Social Democratic Party,** designed to protect the interests of the industrial workers

(*Cont p* 1131)

4. THE PHILIPPINES

1521, Mar. 15. The islands were discovered by **Magellan,** who was killed there (Apr. 25) in a fight with the natives

1525-1527. In order to strengthen Castilian claims against Portugal, Charles V sent out an expedition under **García Jofre de Loyasa,** who died en route The expedition visited Mindanao, but Portuguese opposition was encountered and no results were obtained.

1527. Under orders from home, **Cortés** (in Mexico) sent out **Alvaro Saavedra Ceron,** whose fleet was dispersed without accomplishing anything

1529. Lack of success in these efforts induced Charles V to conclude with Portugal the **Treaty of Saragossa,** by which the line of demarcation in the Far East was fixed 297.5 leagues east of the Moluccas, which remained Portuguese. The Philippines, though within Portuguese jurisdiction, were not occupied by Portugal

1532. Charles V granted **Pedro de Alvarado** authority to conduct discovery and colonization in the Pacific. Alvarado abandoned the project in order to attempt the conquest of Quito

1541. The viceroy of New Spain, **Antonio de Mendoza,** was given authority for the same purpose but was to share the results with Alvarado.

1542-1543. Mendoza sent out **Ruy Lopez de Villalobos,** who landed and named the islands, though he was then driven off by the natives and later captured by the Portuguese.

1565-1571. Under instructions from Philip II, the viceroy **Velasco** sent out an expedition under **Miguel Lopez de Legazpi,** who made the first settlement (San Miguel), subjugated the natives and

founded **Manila** (May 19, 1571). An *audiencia* was established at Manila (1583) and the islands were subordinated to the government of New Spain

1762, Sept. 22. An English fleet bombarded Manila and took the city (Oct 5).

1764, Mar. 31 The British evacuated Manila on the conclusion of peace

1892. Organization of native secret societies directed against Spanish rule

1896, Aug. 26. Beginning of the native insurrection, led by **Emilio Aguinaldo.** Execution (Dec. 30) of **Dr. José Rizal,** one of the most prominent native leaders

1897, Dec. 14. Pact of Biac-na-bato between the governor-general, Primo de Rivera, and Aguinaldo, bringing the insurrection to an end. Reforms to be introduced within 3 years; Aguinaldo and other leaders left the islands in return for a money payment

1898, Apr. 21. Outbreak of the **Spanish-American War.**

May 1. Adm. Dewey's victory over the Spanish fleet in Manila Bay

May 19. Arrival of Aguinaldo, who proceeded to organize a native army under American auspices

June 12 Aguinaldo proclaimed independence and organized a provisional government, with himself as president

Aug. 13. Manila captured by American forces, assisted by Aguinaldo

Dec. 10. By the **Treaty of Paris** Spain ceded the islands to the United States for $20,000,000. Government of the islands put in the hands of Gen **Elwell S. Otis.**

1899, Jan. 5. Aguinaldo protested against American sovereignty and called on the Filipinos to declare independence

Jan. 20. The Malolos Constitution proclaimed. Aguinaldo named president of the rebel government The insurrection against American rule began Feb 4

Mar. 4. Arrival of the **first Philippine Commission,** under **J. G. Schurman.** Apr 4 it promised "the amplest liberty of self-government," but the revolt went on.

1900, Feb. 6. Second Philippine Commission, headed by **Judge William H. Taft.** It reached Manila (June 3) and began to take over the administration and to organize a government.

Dec. 23. Formation of the Filipino **Federal Party,** aiming at peace under the sovereignty of the United States.

1901, Mar. 2. The Spooner amendment to the army appropriation bill authorized the president of the United States to establish civil government in the Philippines

Mar. 23. Capture of Aguinaldo by Gen **Frederick Funston** as a result of a stratagem Aguinaldo took the oath of allegiance to the United States (Apr 2) and issued a proclamation advising submission. Guerrilla warfare continued to some extent until Apr 1902.

July 4. Judge Taft inaugurated first civil governor of the islands.

Sept. 1. Three Filipinos were added to the Philippine Commission

1902, Jan 21. Bureau of Education established

June 12. Judicial system established: supreme court of seven justices, and sixteen courts of first instance

July 1. Philippine Bill passed by Congress, the first organic law for the government of the islands bicameral legislature, consisting of appointive upper house and elected assembly, with veto power reserved to United States Congress.

1903, Mar. 2. Coinage established (silver peso—50¢)

Dec. 22. "Friars' Lands" (c. 400,000 acres) purchased from the Catholic Church for $7,237,000

1904, Feb. 1. Gen **Luke E. Wright** inaugurated as governor

1906, Apr. 2. Henry Clay Ide inaugurated as governor

Sept. 20. James F. Smith, governor

1907, Jan. 9 Election law, providing for 80 delegates to the Assembly.

Mar. 12. Formation of the **Partido Union Nacionalista,** advocating independence

July 30. Election for the first Assembly. 105,000 voters elected 32 Nationalists, 20 Independents, and 16 Progressives. The Assembly met Oct 16 and became the lower house of the legislature, of which the Philippine Commission formed the upper house

1908, May 12. The number of members of the commission was increased to nine, of whom four were to be Filipinos

1909, Oct. 6. The Payne-Aldrich Tariff, allowing free importation into the United States of limited quantities of

Philippine products (sugar and tobacco) and of unlimited quantities of hemp

Nov. 11. W. Cameron Forbes appointed governor-general

1913, June 1. English became the official language, but the use of Spanish was to be permitted until 1920

Aug. 21. Francis B. Harrison, governor-general

Oct. 3. The Underwood Tariff removed restrictions on the free import of Philippine sugar and tobacco into the United States

(*Cont. p.* 1132)

5. HAWAII

1778, Jan. 18. The islands were discovered by Capt **James Cook** and were named the *Sandwich Islands*. Cook was killed there by the natives (Feb 14, 1779)

1810. Kamehameha I (1795–1819) conquered most of the islands and established his dynasty

1820. Arrival of the **first American missionaries.**

1826. Treaty of friendship and commerce with the United States Treaties were signed with Great Britain (1836) and with France (1839)

1842, Dec. 19. The United States recognized the independence of the islands

1843, Nov. 28. In a convention, England and France recognized the independence of the islands and promised not to annex them. A representative form of government had been introduced in 1840 and the king appointed a number of Americans to administrative and judicial office

1851. In reply to French demands on the island government, the American government warned France and took the stand that annexation by a European power would not be permitted

1875, Jan. 30. Reciprocity Treaty with the United States Hawaiian sugar admitted to the United States free of duty The United States was given the use of Pearl Harbor for a coaling and naval station in 1887 when the treaty was extended

1891, Jan. 20. Lydia Liliuokalani became queen Growing constitutional unrest

1893, Jan. 14. *Coup d'état* and new constitution promulgated by the queen American residents organized a **committee of safety.** American marines landed (Jan 16) to protect life and property.

Jan. 17. Provisional government organized Monarchy declared abolished.

Feb. 1. The American minister proclaimed a protectorate

Feb. 14. Treaty of annexation by the United States signed This was withdrawn by President Cleveland (Mar 9), and a special commissioner sent out. The commissioner, **James H. Blount,** reported the revolution engineered by Americans supported by the American minister Efforts of American government to restore the queen were wrecked by the opposition of the provisional government.

1894, July 4. Republic of Hawaii proclaimed (**Sanford B. Dole,** president). This was recognized by the United States (Aug 7)

Dec. 8. A royalist revolt broke out, but was soon suppressed

1897, June 16 Treaty of annexation signed with the United States This was ratified by the Hawaiian Senate (Sept 9) and by the United States Congress July 7, 1898 (**Newlands' Joint Resolution**).

1898, Aug. 12. Formal transfer of the islands to the United States.

1900, April 30. The islands organized as a territory of the United States Unlike Puerto Rico, Hawaii pays its tariff duties, internal revenue collections, and income tax to the federal treasury

An acute labor shortage existed on the islands, resulting in considerable **immigration of Japanese.** The government encouraged immigration of Spanish, Portuguese, and Filipino laborers and excluded Japanese, Chinese, and Koreans In 1910 the total population was 192,000, of whom only 26,000 were Hawaiians and 12,500 part-Hawaiians, on the other hand there were 80,000 Japanese and 21,500 Chinese

1919. Pearl Harbor fortifications and dry-dock completed.

In recent years the population has increased rapidly (426,654 in 1940) and the sugar and pineapple industry has been further expanded. The islands have also become a center of tourist traffic and an important station on the Trans-Pacific air route.

(*Cont. p.* 1134.)

6. SAMOA

1722. The Samoan Islands were discovered by the Dutchman, **Jacob Roggeveen.** American and European activity dates from about 1790

1872, Apr. 9. A number of chiefs petitioned for annexation by the United States

1878, Jan. 16. Treaty of friendship and commerce with the United States, which secured the harbor of **Pago Pago** as a coaling and naval station

1879, Jan. 24. Similar treaty with Germany, which secured the harbor of **Apia.**

1880, Mar. 24. Agreement between United States, England, and Germany, recognizing **Malietoa Talavou** as king and providing for an executive council consisting of one American, one German, and one Englishman

Nov. 8. Death of the king Civil war between rival factions. The three powers recognized (July 12, 1881) **Malietoa Laupepa** as king

1887, June 25-July 26. Conference on the affairs of Samoa at Washington, the United States, England, and Germany taking part.

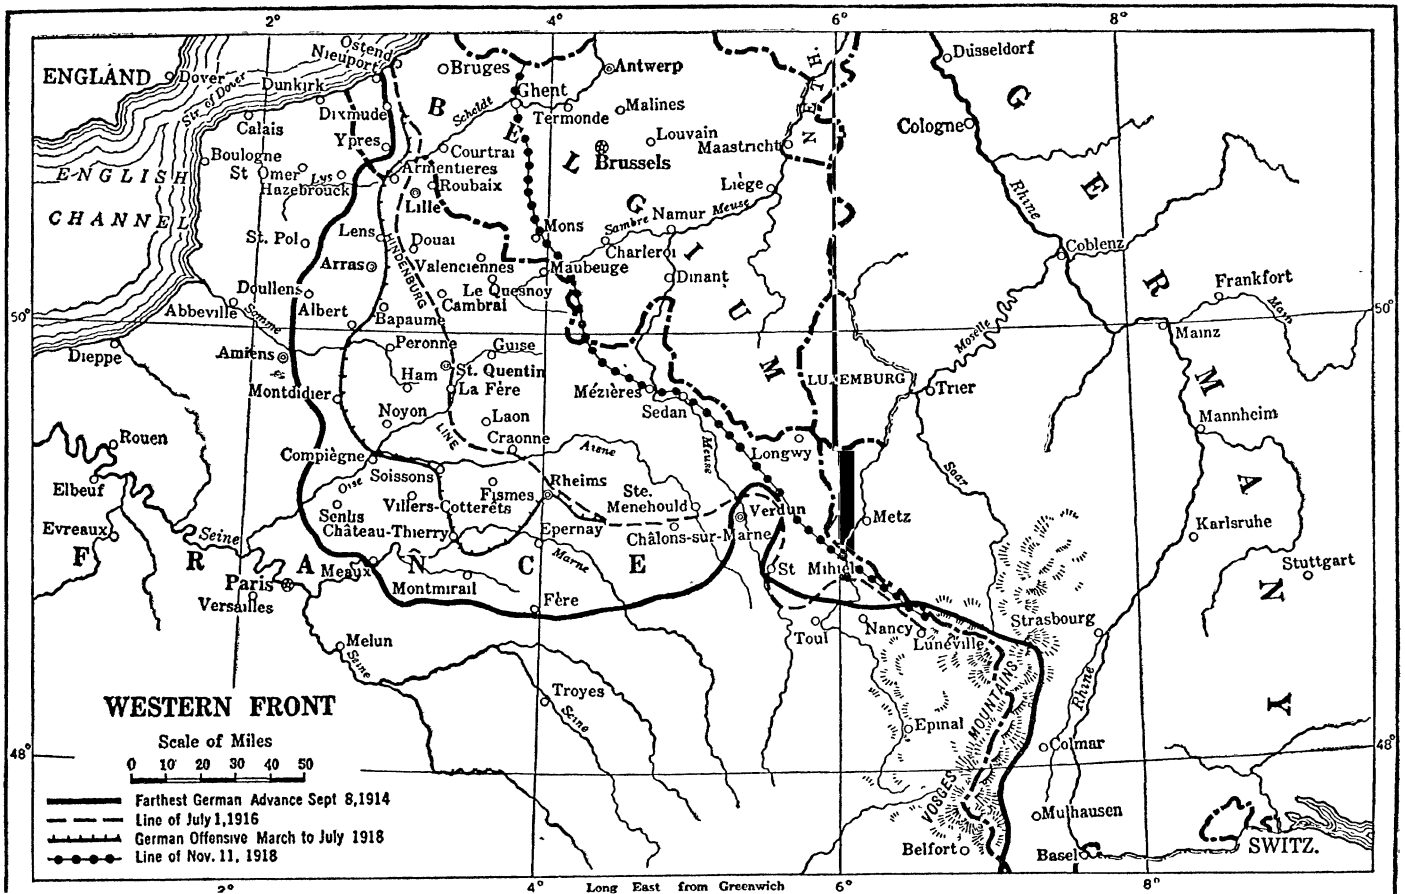
July 24. Demanding satisfaction of claims, the Germans landed troops and proclaimed **Tamasese** king Malietoa surrendered and was exiled.

1888, Sept. 4. Native revolt under **Mataafa** directed against the Germans.

1889, Mar. 15-16. Terrific hurricane in Apia Harbor Three American and three German warships driven ashore

Apr. 29-June 14. New Samoan Conference of the three powers at Berlin

June 14. The Samoa Act. The three powers recognized **Malietoa** as king and made provision for joint supervision of the administration



1898, Aug. 22. Death of Malietoa. Mataafa and other chiefs landed by a German warship Mataafa was elected king (Nov 12), but was rejected by the American and British consuls Civil war broke out between Mataafa and **Malietoa Tana,** son of the dead king Mataafa was successful (Jan 1899) and a provisional government was set up

1899, Mar. 15. British and American warships bombarded Apia as a protest against Mataafa and his German supporters

May 13. Arrival of a joint American-British-German commission This declared the monarchy abolished

Nov. 14. Anglo-German Treaty, by which England relinquished rights to Savaii and Upolu in favor of Germany, and rights to Tutuila and other islands in favor of the United States The three powers signed this treaty Dec. 2 and it was ratified Feb. 16, 1900

The American islands, of which **Tutuila** was the most important, were put under the control of the navy department. Pago Pago became a naval base.

VI. Two World Wars and the Inter-War Period

A. THE FIRST WORLD WAR

1. THE WESTERN FRONT, 1914

German strategy was based on the **Schlieffen Plan** (drafted in 1905), which provided for the concentration of the main German forces on the French front, the passage through Belgium, and a huge wheeling movement to encircle Paris This plan required a massing of forces on the German right flank, but even before the outbreak of war the German chief of the general staff, **Gen. Helmuth von Moltke** (1906–Sept 14, 1914, d June 18, 1916, nephew of the great Moltke of Bismarckian times), had transferred some divisions from the right to the left (Lorraine) wing, in order to block an invasion of South Germany The German forces on the eastern (Russian) frontier were relatively few in number and were intended merely to delay the invaders until a decisive victory could be won in the west

The **French plan of campaign** (Plan 17) had been drawn up in 1913 by **Gen. Joseph Joffre** (chief of the general staff, July 28, 1911–Dec 12, 1916), under the influence of the teaching of **Gen. Ferdinand Foch.** The plan ignored the danger of a great German advance through Belgium and depended entirely on a vigorous French offensive on the right wing and center The French reckoned on a Russian advance in the east with about 800,000 men on the 18th day of mobilization **England** was expected to contribute about 150,000

The Germans concentrated about 1,500,000 men, organized in seven armies as follows 1st (**Von Kluck**) and 2d (**Von Bulow**) on the Belgian front, 3d (**Von Hausen**) opposite Liège; 4th (**Prince Albrecht of Württemberg**), 5th (**Crown Prince Wilhelm**) at Luxemburg, 6th (**Prince Rupprecht of Bavaria**) at Metz, 7th (**Von Heeringen**) at Strassburg.

Aug. 4. In the night the **Germans crossed the frontier** of Belgium Armies I and II were obliged to pass through a narrow strip between Holland and the Ardennes, heavily guarded by the fortifications of **Liège.** Aug 5–6 the Germans (**Gen. von Emmich**) by a night attack got past the forts, which were then reduced by heavy artillery (Aug 6–17) The Belgians fell back on Brussels and then Antwerp, destroying the bridges of the Meuse

Aug. 20. Von Kluck entered Brussels, after driving the Belgians back in the **battle of Tirlement** (Aug 18–19).

In the meanwhile the **French offensive** (five armies) had been developing in the region between Mézières and Belfort, Joffre hoping for a break-through on either side of Metz.

Aug. 14-25. Battle of the Frontiers (Lorraine) The French invasion was checked almost at once and the French armies driven out of Lorraine with heavy losses The 3d and 4th armies were also driven back from Luxemburg, the western wing (**Gen. Lanrezac**) being defeated in the **battle of Charleroi** (Aug 21–24) and forced to fall back for 12 days **Namur** taken by the Germans (Aug 25), **Longwy** (Aug 27), **Montmédy** (Aug. 30), **Soissons** (Sept 1), **Laon** (Sept. 2), **Rheims** (Sept 3); **Maubeuge** (Sept 7)

The **British expeditionary force** (four infantry and one cavalry divisions, about 90,000 men), under the command of **Sir John French** (till Dec 1915), had begun to land at Le Havre (Aug 7–17) and to concentrate on the left of the French 5th army, at **Le Cateau** and **Maubeuge.**

Aug. 23. Battle of Mons. First contact between Germans and English The latter were obliged to fall back with the French 5th army Further delaying action fought by the British (**Gen. Smith-Dorrien**) at **Le Cateau** (Aug. 26).

Spectacular German advance, as the French and British fell back to the **Marne River.** The French government moved to Bordeaux (Sept 3–Dec 1914) Joffre hastily formed a 6th army (**Gen. Maunoury**) on his left, to outflank the German 5th army. In the meanwhile Moltke, believing a decision had already been reached by Aug 25, detailed six corps from the 2d and 3d armies to serve on the Russian front. Two of these were actually dispatched, later being sadly needed on the German flank,

and arriving too late in the east to be of much use

Aug. 30. **Von Kluck** gave up his advance to the west of Paris, in order to keep contact with Von Bulow's 2d army By Sept 4 Von Kluck realized the danger threatening him from Maunoury's 6th French army before Paris On the same day Moltke ordered Kluck and Bulow to turn southwest to meet this danger In the course of the operation a gap was allowed to open between the 1st and 2d German armies

Sept. 5-12 **BATTLE OF THE MARNE.** Maunoury and Kluck tried to outflank each other (**battle of the Ourcq**). Strongly urged by **Gen. Galliéni** (military governor of Paris), Joffre decided to order a general counter-offensive (Sept 5) in the hope of breaking in on the right and rear of Bulow's 2d army Sept 6–9, no decision Kluck's efforts to outflank Maunoury increased the gap between the German 1st and 2d armies, but the British and French failed to take full advantage of this Sept 9, Von Kluck and Von Bulow began to fall back (oral instructions of **Col. Hentsch**, from German headquarters in Luxemburg) The whole German line began to withdraw west of Verdun Cautious advance of the British and French

Sept. 13. The Germans stood, north of the Aisne River. All efforts of the Allies to dislodge them ended in failure (**battles of the Aisne**, Sept 15–18, of **Picardy**, Sept 22–26; and of **Artois**, Sept. 27–Oct 10).

Sept. 22-25. Repeated German assaults at **Verdun.** **St. Mihiel**, on the left bank of the Meuse, taken

Oct. 1-9. Operations at **Antwerp** Germans (**Von Beseler**) brought up siege guns and finally obliged the Belgian army, with small British supporting force, to evacuate

Oct. 10-Nov. 10. **THE RACE FOR THE SEA.** Germans took **Ghent** (Oct 11), **Bruges** (Oct 14) and **Ostend** (Oct 15) From this time until Dec 22 there was almost uninterrupted fighting in Artois The Germans failed to push through to the **Channel ports**, the Belgians having flooded the district of the Yser (**battle of the Yser**, Oct 18-Nov. 30) Farther south the Germans took **Lille** (Oct 12) and massed great numbers of troops for an attack southeast of **Ypres.** But they did not succeed either in taking the town or wiping out the salient at that point (**first battle of Ypres**, Oct 30–Nov. 24)

Dec. 14-24. The Allies launched a general attack along the whole front from Nieuport to Verdun, but failed to make any substantial gains Heavy fighting continued throughout the winter in Champagne (**first battle of Champagne**, Dec 20, 1914–Mar 17, 1915).

By the end of 1914 the line on the western front had become fairly well fixed and the war had become a **war of position**, confined largely to trench warfare All but a tip of Belgium was in the hands of the Germans The Belgian government was established at **Le Havre**, while the occupied area was governed successively by **Gen von der Goltz** (to Nov 1914), **Gen. von Bissing** (to Apr 1917), and **Gen. von Falkenhausen** (to the end of the war) The Germans also retained about one-tenth of the territory of France (21,000 sq kilometers), including many of the most valuable coal and iron mines and several important industrial areas The line, which in the course of the next three years did not vary by more than 10 miles, left to the Allies **Verdun, Rheims,** and **Soissons** in Champagne and thence turned northward between **Noyon** (Ger), **Montdidier** (Fr), **Peronne** (Ger), **Albert** (Fr.), **Bapaume** (Ger), **Arras** (Fr), **Lens, La Bassée** (Ger.), **Armentières, Ypres** (Brit), **Passchendaele, Dixmude** (Ger), **Nieuport** (Brit), **Ostend** (Ger).

2. THE EASTERN FRONT, 1914

The Russian plan of campaign (**Grand Duke Nicholas Nicolaievich** commander in chief, Aug. 3, 1914–Sept. 5, 1915) was concerned primarily with the war with Austria; large forces were therefore concentrated on the Galician frontier. The Austrians (**Archduke Frederick** commander in chief, **Gen. Conrad von Hötzendorff**, chief of staff, 1912–1917, commander in chief, 1917–July 16, 1918) on their part had drawn plans which depended on German support through an advance on the **Narev River.** Pressure elsewhere prevented the Germans from keeping this engagement, but the Austrians, unable to abandon eastern **Galicia**, with its valuable oil-wells, decided to attempt an advance from **Lemberg** toward **Lublin** and **Cholm**, to cut the railways to Warsaw

Aug. 26-Sept. 2. The Austrians, under **Gen. von Auffenberg**, won a great victory over the Russians (**battle of Zamosc-Komarov**), but at once the Russians (**Gen. Brusilov**) with much larger forces began to drive back the Austrian right wing.

Sept 3 The Russians took Lemberg The Austrian left wing was forced to fall back The **battle of Lemberg** (Sept 8–12) obliged the Austrians to abandon eastern Galicia The Russians took **Czernowitz** in the Bukovina (Sept 15) and **Jaroslav** (Sept 21) At the same time the Russians invested the key fortress of **Przemysl** (Sept 16) and launched an attack upon the passes of the Carpathians leading into northern Hungary (Sept 24)

On the **Serbian front** the Austrians were able to concentrate fewer forces than originally intended They bombarded **Belgrade** (July 29), and crossed the **Drina River** (Aug 13) to begin the first invasion of Serbia The Serbs, however, repulsed them (**battle of the Tser and the Jadar,** Aug 17–21) and obliged the Austrians to withdraw from Serbian territory In Sept the Serbs crossed the Save River and invaded **Syrmia,** while the Austrians again crossed the Drina (Sept 8) The Serbs took **Zemlin** (Zemun) Sept 10, but were unable to continue the advance into Austrian territory The two opponents fought the long-drawn **battle of the Drina** (Sept 8–17), which was followed by a long series of desultory engagements on the heights along the river The Serbs were ultimately forced to retreat, and the Austrians were able to take **Belgrade** (Dec 2)

The decisive battles on the eastern front in 1914, however, were fought and won not by the Austrians, but by the Germans. In response to French appeals for action against the Germans, the Russians formed two armies to invade **East Prussia** from the east and from the south The 1st army (Gen **Rennenkampf**) began the advance from between Kovno and Grodno Aug 17 and defeated the German 8th army (Gen. **von Prittwitz**) in the **battle of Gumbinnen** (Aug 19–20) The German commander, having completely lost his nerve, decided on a retreat to the Vistula, despite the objections of his chief of staff, Col (later Gen) **Max Hoffmann,** one of the few geniuses of the war On learning of Prittwitz' decision, the German high command at once dismissed him and decided to send to the eastern front Gen (later Field-Marshal) **Erich von Ludendorff,** who had distinguished himself in the taking of Liège and who was recognized as an outstanding staff officer. Ludendorff, a junior officer, was to serve as chief of staff to Gen (later Field-Marshal) **Paul von Beneckendorff und von Hindenburg,** a retired officer of no great distinction, who was intended to shield Ludendorff with his seniority.

Aug. 23. Hindenburg and Ludendorff arrived at Marienburg, only to find that their arrangements had been anticipated by Hoffmann The essence of this joint plan was to withdraw the German army from in front of Rennenkampf and to concentrate it against the second Russian army (**Gen. Samsonov**), which was beginning the invasion of East Prussia from the southeast Throughout these and later operations the Germans were aided greatly by the interception of unciphered Russian messages, and by the unreadiness of Rennenkampf to do much to relieve Samsonov, apparently because of a long-standing personal feud between the two men

Aug. 26-30. BATTLE OF TANNENBERG. The Germans completely defeated Samsonov's army on both wings Brilliant work of **Gen. von François,** who managed to surround the Russian forces from the west The Germans took over 100,000 prisoners Samsonov, in desperation, shot himself on the field

The Germans then turned on Rennenkampf's army, which was obliged to fall back when attacked on the left flank

Sept. 6-15. BATTLE OF THE MASURIAN LAKES. The Germans (Gen , later Field Marshal, **von Mackensen**) drove the enemy into the difficult lake country and succeeded in capturing 125,000 men Completely demoralized, the Russians began to fall back, while the Germans advanced to the lower Niemen River and occupied the *gouvernement* of Suvalki. Early in Oct most of the German troops on this front had to be withdrawn for operations farther south, so that the Russians were able to invade **East Prussia** for the second time.

In the meanwhile it was necessary for the Germans to do something to relieve the Austrians **Hindenburg,** who now enjoyed an immense if somewhat fictitious prestige, was made **commander in chief of the German armies in the East** (Sept 18) The plan, as worked out by the German and Austrian staffs, was for a great combined attack on Poland The Austrians took the offensive in Galicia (Oct 4), relieved **Przemysl** and forced the Russians to withdraw from the Carpathians In the meantime the Germans (**von Mackensen**), advancing on the Austrian left, pushed on toward the Vistula.

Oct. 9-20. BATTLES OF WARSAW AND IVANGOROD. Mackensen advanced as far as **Warsaw** (Oct 12), but was obliged to fall back when the Russians counter-attacked against the Austrians farther east The Austrians retreated to **Cracow,** while the Russians commenced the second investment of **Przemysl** (Nov. 10) and renewed the invasion of

northern Hungary (Nov. 15) Farther west, heavy fighting about Cracow (**battle of Cracow,** Nov 16–Dec 2)

In order to relieve the pressure in the south, Hindenburg and Ludendorff planned a great offensive, which, it was hoped, would knock the Russians out before the onset of winter They appealed to the high command for the transfer of large forces from the west, but the demand was rejected by Gen **Erich von Falkenhayn** (minister for war, 1906–Jan 21, 1915, chief of the general staff, Sept 14, 1914–Aug 29, 1916), whose attention at this time was concentrated on the drive for the Channel ports Hindenburg was therefore obliged to get along with the forces at his disposal He sent Von Mackensen and the 9th army to the north toward Thorn, whence a German advance was begun to the southeast (Nov. 11)

Nov. 16-25. THE BATTLES OF LODZ AND LOWICZ. A confused and bloody conflict in mud and snow For a time the Russians, having brought up reinforcements, threatened to surround the Germans, but in early Dec the Germans were themselves strengthened by the arrival of new divisions from the west front **Lodz** fell to the Germans (Dec 6)

On the **Galician front** the Austrians attempted an offensive to coincide with the German advance

Dec. 5-17. BATTLE OF LIMANOVA. The Austrians were successful, but failed to break the Russian position before Cracow Throughout the winter the Russians were within 30 miles of the city

In **Serbia** the Austrians met with even less success Having taken Belgrade (Dec 2), they were soon confronted with a formidable Serbian force on the **Morava River.**

Dec. 3-6. Battle of Kolubara. The Austrians were defeated and forced to recross the frontier. **Belgrade** retaken by the Serbs (Dec 15). End of the second invasion of Serbia

3. THE WAR AT SEA, 1914

The **British Grand Fleet** (Adm **Sir John Jellicoe,** commander, Aug 4, 1914–Nov. 29, 1916) consisted of 20 dreadnoughts and a corresponding number of battle cruisers, cruisers, destroyers, and other craft The fleet was based on **Scapa Flow, Cromarty,** and **Rosyth,** with **Harwich** as the base for destroyers and submarines A second fleet, consisting largely of pre-dreadnought types, guarded the Channel The **Germans** had a **High Seas Fleet** of 13 dreadnoughts, based on the North Sea ports On both sides an early engagement was looked for, but the Germans remained in port, despite the efforts of Adm **von Tirpitz** to bring about a more active policy Nothing was done by the Germans to prevent the landing of the British expeditionary force in France

1914, Aug. 28. British cruisers, supported by battle cruisers (Adm **Sir David Beatty**) raided **Heligoland Bight.** The German cruisers came out and drove the English off, but Beatty, coming up with the battle cruisers, was able to sink three ships of the enemy

The Germans now devoted their attention to mine-laying and **submarine work.** The *U* 9 sank the three old cruisers *Hogue, Cressy,* and *Aboukir* (Sept 22), the *Hawke* sunk by submarine (Oct. 15) After an attempted German submarine raid on **Scapa Flow** (Oct 18) the Grand Fleet was withdrawn from that base and concentrated, for a time, on the west coast of Scotland. Oct 27 a German mine sank the superdreadnought *Audacious* off the north coast of Ireland

Apart from these and other occasional sinkings, the war in the North Sea was restricted to raids, chiefly by German battle cruisers (Adm **von Hipper**), on the English coast (Nov 3 — **raid on Yarmouth;** Dec 16 — **bombardment of Scarborough and Hartlepool**).

1915, Jan. 24. Naval action off the **Dogger Bank** between the British and German battle-cruiser squadrons Hipper, though outnumbered, did much damage to the British flagship and ultimately got away, losing only his poorest ship, the *Blucher*

When the war broke out, there were eight German cruisers on foreign stations, mostly on the China station When **Japan** declared war (see p 893), the commander, Adm **Count von Spee,** left for the South American coast with the cruisers *Scharnhorst, Gneisenau,* and *Nurnberg* He bombarded **Papeete** (Sept 22) and destroyed the British cable station at **Fanning Island** At **Easter Island** (Oct 12–18) Von Spee was joined by the cruisers *Dresden* (from the West Indies) and *Leipzig* (from the California coast). Together they proceeded to the Chilian coast

In the meanwhile **Adm. Cradock,** with three old ships, had been ordered to hunt down Spee

1914, Nov. 1. NAVAL ACTION OFF CORONEL. **Von Spee** destroyed two of Cradock's ships (the *Monmouth* and the *Good Hope;* the *Glasgow* escaped)

To meet the danger from the German squadron, all available Allied ships were assembled off the southeast coast of South America Three battle cruisers were hastily dispatched from the Grand Fleet to the South Atlantic

Dec. 8. BATTLE OF THE FALKLAND ISLANDS. **Von Spee** made the fatal decision to stop to attack the **Falklands** on his way homeward The British squadron (**Adm Sturdee**), with the battle cruisers and some lighter cruisers, came down upon the Germans unexpectedly and sank four of five of their ships (*Scharnhorst, Gneisenau, Leipzig,* and *Nurnberg*) Only the *Dresden* escaped Heroic death of Adm von Spee, his two sons, and 1800 men.

Several of the German cruisers still abroad caused great damage to Allied shipping The *Emden* (Capt **von Müller**) left the China station for the Indian Ocean Between Sept 10 and Nov 9 she bombarded **Madras** (Sept 22) and captured several ships before she was sunk at Cocos Island The German cruiser *Konigsberg* was also very destructive until located and shut into the mouth of the Rufigi River The *Dresden,* having escaped from the Falklands, engaged in commerce-destroying until cornered at Juan Fernandez, where she was blown up by her own crew (Mar 14, 1915)

4. THE WAR IN THE COLONIES, 1914-1918

Most of the German colonies were seized by the British and French during the first months of the war

1914, Aug. 26. Togoland defense force capitulated to an Anglo-French force The colony was divided between the English and the French in agreements of Aug 26, 1914, and Dec 27, 1916.

1914, Aug. 30. A New Zealand expeditionary force occupied **Samoa.**

1914, Sept. 11. An Australian force landed on the **Bismarck Archipelago.** German forces in **New Guinea** surrendered to Australians (Sept 21).

1914, Sept 7. A British force from Nigeria invaded the **Cameroons** and took **Duala** (Sept 27) The French also invaded the colony from the south and east. The Germans were obliged to fall back, and ultimately crossed into Spanish territory (Feb. 9, 1916)

1914, Sept. 19. An English force landed at **Lüderitz Bay,** German Southwest Africa. The Union of South Africa decided to prosecute the war in the German colony, and **Gen. Botha** crossed the Orange River, taking **Swakopmund** (Jan 14, 1915). He defeated the German forces at **Riet** and **Treckkopje** (Apr. 26, 1915), took **Windhoek** (May 12, 1915) and finally forced the 3500 German and colonial troops to capitulate at **Otawi** (July 9, 1915).

1914, Aug. 8. The British opened hostilities in German East Africa by bombarding the coast towns of **Bagamoyo** and **Dar-es-Salaam.** Indian forces were then brought to East Africa for the campaign. But the German commander (Gen. **von Lettow-Vorbeck**) defeated a greatly superior landing force in the **battle of Tanga** (Nov 2–5, 1914) There was a certain amount of skirmishing throughout the winter of 1914–1915, but the campaign remained desultory until in Nov 1915 the British secured naval control of **Lake Tanganyika,** and landing forces took **Tanga** (July 7, 1916) and **Bagamoyo** (Aug. 15, 1916). **Gen. Smuts,** with a force of Afrikanders and Portuguese, now began to push the operations **Dar-es-Salaam** fell (Sept 4), **Lindi** (Sept 16) and **Tabora** (Sept 19) Lettow-Vorbeck and his troops were obliged to fall back to the southeast corner of the colony. The campaign was resumed in 1917, when the Germans defeated their enemies at **Mahiwa** (Oct. 15–18, 1917) and began the invasion of Portuguese East Africa Lettow-Vorbeck advanced almost to the mouth of the Zambezi, but then fell back to **Lake Nyasa.** Nov 2, 1918, he began the invasion of **Rhodesia.** The armistice went into effect Nov 14, 1918, at which time the Germans were still in the field

1914, Aug. 23. Japan declared war on Germany and began to land forces in Shantung for an attack on the German position at **Tsingtao.** The Japanese were joined by a British detachment. The bombardment of **Tsingtao** was begun in Oct., and was accompanied by an attack from the land side An assault on Oct 31 failed, but Nov 7 the fortress was obliged to capitulate. During this same period the Japanese naval forces occupied a number of the German islands (**Marshall Islands, Marianne, Palaw, Carolines).**

5. THE OTTOMAN FRONT, 1914-1915

At the outbreak of the war, the policy of **Turkey** was determined primarily by **Enver Pasha**, the minister of war, whose pro-German inclinations were well known At the height of the July crisis (July 27) the Turks themselves proposed to the Germans the conclusion of an alliance directed against Russia The Germans accepted, and the treaty, which was known only to a few of the Turkish ministers, was concluded Aug. 1. The Turks were to enter the war as soon as hostilities were opened by Russia against Germany or Austria (which adhered to the pact). Actually the Turkish government, with the assent of its allies, remained neutral for some time, in order to complete the necessary military preparations.

1914, Aug. 11. The powerful German cruisers *Goeben* and *Breslau* arrived at the Dardanelles, and were allowed to pass through These two cruisers, stationed in the Mediterranean, had bombarded **Bona** and **Philippeville** in French Africa (Aug. 3) and had then gone on to Messina The British Adm **Milne** watched for them at the northern end of the Straits of Messina, but the German Adm **Souchon** left by the southern end (Aug. 6). A small British squadron (Adm **Troubridge**) followed the German ships, but did not dare attack Milne acted too leisurely to prevent the ships from reaching the Dardanelles Their presence at Constantinople not only served to reveal the trend of Turkish policy, but also helped the Germans to establish a firm influence over that policy The ships were officially bought by the Turkish government to take the place of two battleships that were building in England and had been taken over by the British government

Aug.-Oct. Many efforts were made by the English government to secure the neutrality of Turkey, by offering a guaranty of independence and integrity and by promising concessions in the matter of the capitulations The Turkish government, in the interval, declared the **capitulations abolished** (Sept. 7), but probably never seriously considered either neutrality or alliance with the western powers Longdrawn negotiations for an alliance with Russia were probably meant only as a blind.

Oct. 29. Turkish warships, including the two German cruisers, suddenly bombarded **Odessa, Sevastopol,** and **Theodosia** on the Russian Black Sea coast. England and her allies at once severed relations and sent an ultimatum. **Russia declared war** (Nov 2) and **England** and **France** followed (Nov 5), England on the same day proclaiming the **annexation of the island of Cyprus** (occupied since 1878, see p 736)

Nov. 14. The sultan, as khalif, proclaimed a **Holy War** (*Jihad*) against all those making war on Turkey or her allies In the sequel this move proved to be of slight importance

Dec. 18. The British proclaimed a **protectorate over Egypt** (occupied since 1882, see p 832), and hastily began to concentrate troops for the defense of this strategic area (Dec. 1 — first units of the Australian and New Zealand expeditionary force [**Anzac**] arrived in Egypt)

Gen. Liman von Sanders, head of the German military mission in Constantinople, urged the Turks to attempt the invasion of the Ukraine from Odessa, evidently in the hope of bringing Rumania in on the side of the central powers But **Enver Pasha** from the outset insisted on a campaign against the Russians in the **Caucasus region.**

Dec. 17. The Turks began their offensive against **Kars**

Dec. 29-1915, Jan. 2. Battle of Sarikamish. The Turks advanced and took **Tabriz** (Jan 8), but this important town was retaken by the Russians (Jan 30) and the whole Turkish offensive gradually ran out The Caucasus front remained quiet until Apr. (1915) when the Turks began the deportation and **massacre of the Armenians,** whom they accused of aiding the Russian invader. The Armenians rose in revolt at **Van** (Apr. 20) and held the fortress until relieved by a Russian force (May 19). After months of desultory fighting the Russians were finally obliged to abandon Van (Aug 3, 1915), which was then reoccupied by the Turks (Aug. 5).

In the interval the Turks had initiated **operations against Egypt** also A force, after making its way across the Sinai Desert, attacked the **Suez Canal** (Feb 3-4, 1915), but was easily repulsed. Nevertheless, the constant threat of another such attack obliged the British to keep large numbers of troops in Egypt throughout the war

The entry of Turkey into the conflict had extended tremendously the area of possible operations In view of the deadlock that had been reached on the west front before the end of 1914, the idea was soon advanced in England (notably by **Winston Churchill,** supported by **Lloyd George** and by **Lord Kitchener**) that it would be wiser to allow

the French armies to hold the western front, while England should devote her newly raised armies to an attempt to attack the enemy in some more vulnerable spot, preferably in the Near East, where a resounding success might serve to bring in the Balkan states on the side of the Entente This idea was entertained sympathetically by a few French generals (**Gallieni, Franchet-d'Esperey**), but on the whole met with the most vigorous opposition from **Sir John French, Joffre** and the other commanders in France, who stuck to the idea that a decision could be reached only in the main theater of war, and that all available forces must be massed there for another attempt at a breakthrough.

The exponents of an eastern campaign (**Easterners**) continued to raise the issue and advanced three different courses of action (1) It was proposed to land a force in the **Gulf of Alexandretta,** which might cut the railway between Syria and Anatolia, prevent a Turkish campaign against Egypt, and encourage the Arabs to break with the Constantinople government (2) It was proposed to send a force to **Saloniki,** a force strong enough to bring Greece and Bulgaria into the war on the Allied side, this force to march either up the Vardar to relieve the Serbs, or else to Constantinople and thence by way of the Danube against Austria. (3) It was proposed to make an attack on the **Dardanelles,** land a force and thus capture the Turkish capital All these schemes, however, had to be shelved because of the insistence of the generals that the newly raised forces be sent to France.

1915, Jan. 2. The Russians appealed to England for a diversion to relieve the pressure of the Turks in the Caucasus The War Council, after much debate, finally (Jan 13) decided on a naval action against the Dardanelles, with Constantinople as the objective Later (Feb 16) it was decided to send one division of troops, which was to be reinforced from Egypt

The Greek government (**Eleutherios Venizelos,** prime minister since 1910) offered to aid the Allied operations with a number of divisions (Mar. 5), but this policy was rejected by **King Constantine,** whereupon **Venizelos resigned** (Mar. 6). It appears that the Russian government was also opposed to the participation of Greece, because of suspicion of Greek designs on Constantinople.

Mar. 4. The Russian foreign minister, **Sazonov,** handed to the French and British representatives a note claiming for Russia, in the event of success, **Constantinople** and a strip along the northern side of the Bosporus, Sea of Marmora, and Dardanelles, as well as **Thrace** to the **Enos-Midia** line, and the Asiatic side of the Bosporus to the **river Sakaria.** To this England and France agreed, the latter reluctantly, on condition that Constantinople be made a free port and that merchant ships should be free to pass through the Straits Further English and French claims in Asiatic Turkey were to be defined later (Mar. 12)

Feb. 19. The British began the naval action against the Dardanelles, and occupied the island of **Lemnos** as a base (Feb 23) The forts were soon silenced and several companies of marines were landed without great difficulty, suggesting that more extensive military operations at this time would have been relatively easy

Mar. 18. Adm **de Robeck** and 18 warships tried to force the Narrows. Four ships struck mines, whereupon Robeck gave up the attempt, probably somewhat prematurely

The interval of more than a month that followed was used by the Turks (Gen **Liman von Sanders** put in command) to strengthen the defenses and to concentrate about 100,000 men The British sent out about 75,000 men, under the command of **Sir Ian Hamilton.**

Apr. 25. LANDING OF THE BRITISH at several places at the tip of the peninsula, while Australian troops made a feint farther north and a French force landed on the Asiatic side Poor coordination between the different parties; heroic resistance of the Turks, who managed to keep the various landing parties off the heights and prevented their coalescence (distinguished work of **Mustafa Kemal,** later leader of the Turk national revival, see p. 1094).

Several months of futile fighting ensued, during which the troops suffered from heat, lack of water, flies, etc.

May 12. Hostile submarines began to appear off the Straits British warships *Goliath, Triumph,* and *Majestic* sunk. Allied submarines ultimately penetrated to Constantinople on a raid (Aug. 1), but for the most part the British squadron was withdrawn to **Mudros** excepting when needed for attack

Aug. 6. LANDING AT SUVLA, after many additional divisions had been sent out from England The plan was to cut behind the Turkish position and so reach the Narrows Four days of heavy fighting (**battle of Sari Bair,** Aug. 6–10). Timid and confused leadership on the British side, staunch resistance of the Turks, who succeeded in retaining the heights

This second failure turned opinion in England against the whole project. Hamilton was replaced by **Sir Charles Munro** and preparations were made for evacuation (Oct 16)

Dec. 19-20—1916, Jan. 8-9. The British forces were withdrawn from Gallipoli without loss, much to the astonishment of the British command With the failure of the effort at the Dardanelles, the Straits remained closed and Russia was pretty effectively cut off from supplies which her allies might have furnished her

6. THE WESTERN FRONT, 1915

The operations in France during this year were devoid of broader interest The commanders on both sides persisted in the belief that a decision was to be won in this area, and consequently devoted as many men and guns as possible to renewed efforts to break through the opponents' line None of these "offensives" had a notable permanent effect All were characterized by appalling loss of life

1915, Jan. 8-Feb. 5. In heavy fighting along the **La Bassée Canal** and in the **Soissons** region the Germans made some slight gains.

Feb. 16-Mar. 30. After terrific bombardments of the German positions in eastern **Champagne**, the French attacked, with but insignificant results

Mar. 10-13. The British launched a vigorous attack in the vicinity of **Neuve Chapelle** and succeeded in breaking through the German line for a short distance Inadequate preparation and management deprived them of any permanent gain

Mar. 30-Apr. 15. Heavy French attacks on the German salient at **St. Mihiel** left the situation much as it was before

Apr. 22-May 25. SECOND BATTLE OF YPRES. The original Allied plans for a major offensive were more or less frustrated by the **use of gas** (chlorine) by the Germans (Apr 22) Though the French had advance information of what was coming, they had made no preparation for it. The troops fled, leaving Ypres exposed The Germans gained some ground at first, but were apparently themselves skeptical of the effect of the new weapon and unprepared to take full advantage of the situation. In the end the chief significance of the German offensive lay in the fact that it prevented the full participation of the British in the offensive planned by Joffre for May.

May 9-June 18. SECOND BATTLE OF ARTOIS. After an unprecedented bombardment, the French (**Gen. Pétain**) succeeded in breaking through on a six-mile front north of Arras and facing Douai. The advance was about three miles in depth, but was secured at a loss of about 400,000 men

The western front was unusually quiet during most of the summer, the Allies utilizing this period for preparation of a "great offensive" for the autumn.

Sept. 22-Nov. 6. SECOND BATTLE OF CHAMPAGNE. This was the key operation in Joffre's great offensive. The French attacked on a front between Rheims and the Argonne, making use of an immense concentration of artillery as well as man-power. The Germans, however, held their own on the heights between Rheims and Ste. Menehould, so that after many weeks of desperate fighting Joffre had little to show.

Sept. 25-Oct. 15. THIRD BATTLE OF ARTOIS. This was merely the British contribution to the great offensive in Champagne The British here first used gas Greatly outnumbering the Germans, they succeeded in driving the enemy back toward Lens and Loos (**battle of Loos,** Sept 25–Oct 8), but then failed to realize on this advantage by hesitation in the use of the reserve In this way the operation remained without great importance.

The failure of the great offensive of French and British, which Joffre had hoped would work like a pair of pincers to force the German withdrawal from northern France, left the situation in the west substantially what it was a year previous

7. THE EASTERN FRONT, 1915

During the winter months the fighting on the Russian front was inconclusive

1915, Feb. 4-22. Winter battle in Masuria. The Germans advanced and took **Memel** (Feb. 17). Further German offensive in East Prussia (**battle of Augustovo Forest,** Mar. 9–10) But in this area the Russians offered stout resistance. They

won a victory between Kovno and Grodno (**battle of Przasnysz,** Feb 22–27) and retook Memel (Mar 18), though the Germans succeeded in driving them out of this valuable seaport a few days later (Mar. 21).

The idea of Hindenburg and Ludendorff was to concentrate more and more troops in the east, in the hope of enveloping the Russians by an advance from East Prussia to the southeast. But Falkenhayn insisted on the attempt to reach a decision in the west. This difference of view led to acute tension and a threat by Hindenburg to resign Ultimately the emperor decided that the newly formed 10th army should be sent to the east, but Falkenhayn managed to have it sent to the Galician front, partly in order to relieve the Austrians, partly to act as the southern shear in a movement to force the further withdrawal of the Russians from Poland

Mar. 22. The Russians had at last taken **Przemysl** and were in a position to break through the Carpathian passes into northern Hungary.

Apr. 2-25. Austrians, with the aid of a **German South Army** (Gen. von Linsingen) succeeded in driving the Russians back from the Carpathians. An 11th army, under Gen. **von Mackensen,** was then formed to co-operate with the Austrian forces, from the region southeast of Cracow, in the direction of Przemysl.

May 2. Beginning of the great **Austro-German offensive in Galicia.** The Russians, already suffering severely from lack of rifles, artillery, ammunition, and clothing, gave way at once (**battle of Gorlice-Tarnow**). The Austro-German armies crossed the Dunajec (May 3–5) and took **Jaroslav** (May 14). By May 15 they had reached the San and forced a crossing (**battle of the San,** May 15–23) **Przemysl** was retaken (June 3) and gradually the whole Russian south front collapsed. **Lemberg** fell (June 22) and farther east **Zuravno** (June 5) and **Stanislav** (June 8) The Dniester River was crossed June 23–27. By the end of June the Austro-German forces had advanced almost 100 miles, had liberated **Galicia** and **Bukovina,** and had taken huge numbers of prisoners The Russian armies on this front were completely demoralized

The failure of the British to achieve a success at the Dardanelles enabled the Germans to postpone a projected campaign in Serbia designed to make direct contact with the Turks, and to exploit further their great successes against Russia The offensive in Galicia had been accompanied by a smaller **advance in Courland** (Apr 26–) and had resulted in the taking of **Libau** (May 7) It was now planned to organize a much greater movement in northern Poland as part of a pincers movement to trap the Russians

July 1. Beginning of the **second great offensive.** The **Austrians** (Archduke Joseph Ferdinand) took **Lublin** and **Cholm** (July 31) and stormed **Ivangorod** (Aug. 4). In Courland the **Germans** took **Windau** (July 18) and **Mitau** (Aug 1), while in northern Poland the Germans (Gen. von Gallwitz with the 12th army) advanced to the Narev and took **Warsaw** (Aug. 4–7). The Germans took **Kovno** (Aug. 18) and stormed the key fortress of **Novo-Georgievsk** (Aug 20). **Brest-Litovsk** fell into their hands (Aug 25) and **Grodno** (Sept. 2) In the south the Austrians managed to take **Lutsk** (Aug 31) and **Dubno** (Sept 8) The capture of **Vilna** (Sept. 19) may be taken as marking the end of the great offensive

Sept. 6-16. The Russians offered some resistance to the Austrians (**battle of Tarnopol**) and to the Germans (**battle of Dvinsk,** Sept 9–Nov. 1), and in Courland **Riga** was held, but when the German advance came to a stop in Sept the Russians had lost all of Poland, Lithuania, and Courland, to say nothing of the larger part of a million men Their only success lay in escaping complete envelopment and capture The line in Sept. ran from west of Riga and Dvinsk almost due south to Baranovici(German) and Pinsk (Russian) and thence farther south to Dubno (Austrian), Tarnopol (Russian), and Czernowitz (Austrian)

Sept. 5. The **Grand Duke Nicholas Nicolaievich** was relieved of the supreme command and sent as viceroy to the Caucasus The supreme command was taken over by the tsar in person.

8. NAVAL OPERATIONS—SUBMARINE WARFARE

From the very beginning of the war the question of neutral shipping had arisen in aggravated form. Both the British and French governments issued new and more rigorous **interpretations of contraband** (Aug. 20, 25, 1914), adding greatly to the list of contraband goods. To this the United States government replied (Oct. 22)

stating that it would insist on the observance of the existing rules of international law. Nevertheless the British continued to revise the list of contraband and to modify the Declaration of London of 1909 Nov 2 they declared the North Sea a military zone, and Jan 30, 1915, the British admiralty warned British merchant ships to fly neutral ensigns or none in the vicinity of the British Isles

1915, Feb. 4. The German government announced that a submarine **blockade of Great Britain** would begin Feb 18 To this the London government replied with an order in council (Mar 11) wiping out distinctions in contraband and ordering the seizure of all goods presumably destined for the enemy Cotton was declared contraband Mar 18.

Mar. 28. First passenger ship sunk by German submarine (*S S Falaba*)

May 1. First American ship (*Gulflight*) sunk without warning

May 7. ***LUSITANIA* SUNK OFF THE COAST OF IRELAND,** with a loss of 1198 lives, including 139 Americans Before the ship left New York a warning against sailing on her had been inserted in the newspapers by the German embassy, but it is not true that a submarine was sent out specially to sink her. The captain failed to observe instructions to zigzag his course, and so came within range of the submarine The *Lusitania* carried a part-cargo of small arms and munitions

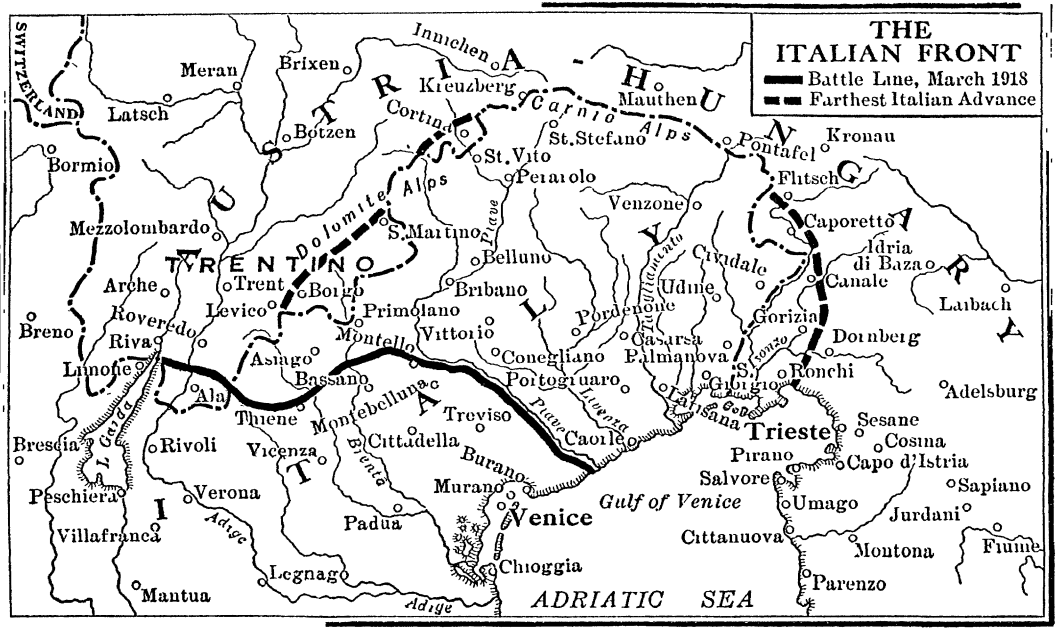
The sinking of the *Lusitania* brought the United States and Germany to the verge of war, and created a much greater tension than had developed between the American and Allied governments over questions of contraband and blockade In a speech of May 9 **President Wilson** struck a strong note and defined American policy, though the note of protest to Berlin (May 13) was somewhat milder in tone, demanding reparation and abstinence from such practices in the future

June 8. **William J. Bryan** resigned as American secretary of state, because of unwillingness to follow the president in his policy Bryan was succeeded by **Robert Lansing.**

On the very next day a much stronger note was dispatched to Berlin, without eliciting a disavowal or assurance for the future A third note was sent on July 21.

Aug. 19. **Sinking of the *Arabic*,** with the loss of two American lives This new offense resulted in a second period of acute tension, but the German ambassador at Washington, **Count Bernstorff,** finally persuaded his government of the real danger of war

Sept. 1. The German government gave assurances that no liners would be sunk in future without warning and without some provision for the safety of non-combatants, provided the ship made no effort to offer resistance or to escape These assurances were reasonably well observed during the remainder of the year, and so the first phase of the submarine warfare came to an end



9. THE INTERVENTION OF ITALY

On the plea that the Austrian action against Serbia was an offensive action and therefore incompatible with the terms of the **Triple Alliance,** the Italian government in July, 1914, refused to join the Central Powers, and declared neutrality instead (Aug. 3) But almost from the outset the Italian government maintained that, under Art VII of the Triple Alliance, Italy was entitled to some compensation to counterbalance the Austrian gains in the Balkans These claims were advanced the more persistently when the foreign ministry was given to **Baron Sonnino** (Nov. 3), following the sudden demise of **Marquis di San Giuliano** (Oct 16)

The necessity for making some concession to Italy in order to keep her neutral was fully recognized in Berlin, but the Austrian foreign minister (**Count Berchtold**) refused to entertain all suggestions of territorial cessions.

1914, Dec. 20. **Prince Bulow,** former German chancellor, arrived in Rome on special mission He admitted the Italian claim to the Trentino and the German government made every effort to persuade the Austrians to give in (Mission of Count von Wedel to Vienna, Jan. 16, 1915)

1915, Jan. 13. **Count Burian** appointed Austro-Hungarian foreign minister to replace Berchtold Burian finally agreed to the cession of territory (Mar 9), but was willing to offer only the **Trentino,** to be transferred only after the conclusion of peace This was not enough to satisfy the Italians, who were already veering toward the side of intervention and were already negotiating with the Entente powers Sonnino demanded of Austria the immediate cession of the **South Tyrol,** the district of **Gorizia** and **Gradisca,** the establishment of **Trieste** and its neighborhood as

a free state, the cession to Italy of the **Curzolari Islands** off the Dalmatian coast, full sovereignty over the island of **Saseno** and over **Valona** on the Albanian coast (Italian occupation of Saseno, Oct 30, 1914, "provisional" occupation of Valona, Dec 26, 1914) These demands were entirely too exorbitant, from the Austrian point of view, but the Germans finally (May 10) induced their allies to agree to substantially all the Italians held out for. As it turned out, the Austrians yielded too late.

Apr. 26 England, France, Russia, and Italy concluded **the secret treaty of London. Salandra,** the Italian prime minister, had envisaged Italian intervention on the Entente side almost since the beginning of war. but the non-interventionists, led by **Giolitti,** were too strong to make that at first a practicable policy During the winter, however, the interventionist movement gathered strength (**Mussolini** broke with the Socialist Party and became an active proponent of intervention) The western powers, meeting with failure on the western front, were ready to offer much Negotiations were embarked upon in Feb 1915, but were delayed by the opposition of Sazonov to the assignment of the Dalmatian coast to Italy, in view of the Serbian aspirations in that region Under the terms of the treaty as finally concluded, a military convention was to be drawn up to protect Italy against the full force of Austrian attack The political clauses promised Italy the **South Tyrol** and **Trentino, Gorizia, Gradisca, Trieste, Istria,** the most important **Dalmatian islands,** and the southern part of the province of **Dalmatia, Saseno** and **Valona,** full sovereignty over the **Dodecanese Islands** (occupied since 1912), in the event of the partition of Turkey, Italy was to have the province of **Adalia;** in the event of England and France enlarging their empires by the addition of German colonies, Italy was to receive extensions of her territory in **Libya, Eritrea,** and **Somaliland.** Italy was further to receive a loan, and ultimately part of the war indemnity. The Entente powers were to support Italy in preventing the Holy See from taking diplomatic steps for the conclusion of peace. Italy was to commence hostilities within a month of the signature of the treaty

May 3. The Italian government denounced the Triple Alliance

May 10. Conclusion of a **naval convention** between England, France, and Italy

May 23. Italy mobilized and declared war on Austria-Hungary. Germany at once severed diplomatic relations (May 24), but for various financial reasons Italy did not declare war on Germany until Aug 28, 1916.

May 29 The Italian government "formally" occupied **Valona. Albania** being in a state of anarchy (flight of Prince William von Wied, Sept 3, 1914; provisional government of Essad Pasha at Durazzo, Oct 4, 1914), this little state, the independence of which had been guaranteed by the powers (Dec. 20, 1912), now became a prey to its neighbors

June 26 The **Montenegrins** occupied **San Giovanni di Medua.**

July 4. The **Serbians** occupied **Durazzo,** which they evacuated again July 17, under pressure from the Italian government

Aug. 31. **Durazzo** reoccupied by the **Serbs**

Dec. 20. **Durazzo** occupied by the **Italians.**

1915. FIRST BATTLES OF THE ISONZO. The first two years of Italy's participation in the war were taken up with the fighting of 11 successive battles on the Isonzo, along a front of only about 60 miles The Austrians (commander **Archduke Eugene**) held the two important bridgeheads at **Gorizia** and **Tolmino.** The Italians (**Gen. Luigi Cadorna,** commander in chief, May 23, 1915–Nov 7, 1917) tried to force the passage, but their total advance never exceeded 10 or 12 miles The Isonzo battles of 1915 were the first (June 29–July 7), second (July 18–Aug 10), third (Oct. 18–Nov 3), and fourth (Nov. 10–Dec. 10).

10. THE BALKAN SITUATION, 1914-1915

The three Balkan states, Greece, Bulgaria, and Rumania, all more or less exhausted by the Balkan Wars of 1912–1913, proclaimed neutrality at the beginning of the European conflict In the early months of the war the Russians entertained high hopes of securing the aid of **Rumania,** which would have been an important factor in the Galician campaign On various occasions (July 30, Sept 16) they attempted to bait the Bucharest government with promises of Transylvania, but so long as **King Carol** lived (d Oct 10, 1914) there was no hope of Rumanian intervention, since the king strongly regretted Rumania's failure to side with her Austrian and German allies of prewar days **King Ferdinand** felt morally less bound, but the prime minister, **Ion Bratianu**

(premier and foreign minister Jan. 14, 1914–Feb. 6, 1918), was determined to drive a hard bargain

1914, Dec. 6. Bratianu rejected allied suggestions that Rumania guarantee Greece against Bulgarian attack or that Rumania make concessions in the Dobrudja to secure Bulgarian support

1915, Jan 25. He refused to join Greece in support of Serbia On the contrary he set an ever higher price on Rumanian support

May 3. The Rumanians asked not only for **Transylvania,** but also for part of **Bukovina** and the **Banat.**

July. The Russians were prepared to concede most of these demands, but Bratianu was then unwilling to act unless the Allies had 500,000 men in the Balkans and the Russians 200,000 in Bessarabia (Nov 1915).

THE POSITION OF BULGARIA became crucial after the entry of Turkey into the war in Nov.

1914, Nov. 9. In order to secure Bulgarian help the Allies at once offered Bulgaria the **Enos-Midia line** in eastern Thrace and, after the war, the (1912) **uncontested zone of Macedonia** as far as the Vardar River, this territory being in the possession of Serbia

It was clear almost from the outset, however, that such an offer would not prove attractive, since the Bulgarians aspired not only to part of **Thrace,** but to most of **Macedonia,** the **Kavalla-Drama-Seres** region of western Thrace, and also that part of **Dobrudja** lost to Rumania in 1913

1915, Jan. As the Dardanelles campaign was being decided on, the Allies offered to **Greece** the Turkish city of **Smyrna** and its hinterland, on condition that the Greeks cede the **Kavalla** region to Bulgaria and join a Balkan bloc in support of Serbia **Venizelos** favored this policy strongly, but **King Constantine** preferred the sparrow in the hand to the pigeon on the roof (Jan 24, 29)

Mar. 6. **Venizelos** fell from power when the king refused to adopt his policy of aiding the Allies at the Dardanelles (see p 920). His successor, **M. Gounaris** (Mar 9–Aug 22) was less favorable toward the Entente

Apr. 12. He rejected a second offer of the Smyrna region, on the plea that the Allies would not guarantee Greek territory (i.e. against Bulgaria).

May 7. The **Allies,** more eager than ever to secure the aid of Bulgaria in view of the failure at the Dardanelles, gave **Serbia** a conditional guaranty of the eventual acquisition of Bosnia and Herzegovina and "a wide access to the Adriatic," as compensation for the part of Macedonia that was required to bring in Bulgaria

May 29. A definite offer along these lines was made to **Bulgaria.** But the Sofia government treated these advances dilatorily, and was already leaning to the Central Powers, which were prepared to promise whatever Bulgaria wanted, and were not embarrassed by the fact that Bulgarian aspirations were directed chiefly to Serbian and Greek territory

July 22. The **Germans** persuaded the **Turks** to cede to Bulgaria a strip of territory along the **Maritza River** (definitive agreement Sept 22). Aug 8 the Bulgarian government secured from Germany and Austria a loan of 400 million francs

Sept. 6. **Bulgaria concluded an alliance** and military convention with Germany and Austria, providing for mutual aid against attack by a neighboring state, for a German-Austrian campaign against Serbia within 30 days, and for Bulgarian participation five days later Bulgaria was to receive **Macedonia,** and, if Rumania joined in the war, **Dobrudja** also; if Greece proved hostile, Bulgaria was to receive the **Kavalla** region as well

Sept. 21 The **Bulgarians began to mobilize.** The Serbs, being directly threatened, appealed to Greece for aid, under the terms of the Treaty of May, 1913 **Venizelos,** who had won in the elections of June, 1915, and had returned to power Aug 22, was as eager as ever to intervene, but made it a condition that the Allies furnish the 150,000 troops which Serbia was required to supply under the treaty terms

Sept. 24. The English and French governments gave a promise to this effect Venizelos then secured the secret consent of the king to the landing of the Allied forces at **Saloniki,** but publicly the request of the Allies to land was rejected (Sept. 28)

Oct. 3-5. One **British** and one **French** division were **landed at Saloniki,** followed by two more French divisions at the end of the month King Constantine now refused to support Venizelos to the extent of joining in the war; the prime minister resigned (Oct 5, 1915) and was succeeded by **M. Zaimis** (Oct 6–Nov 5, 1915).

Oct. 6. Beginning of the **great Austro-German campaign in Serbia (Gen. von Mackensen). Belgrade** fell (Oct. 9) and **Semendria** (Oct. 11).

Oct. 11. The **Bulgarians** crossed the Serbian frontier

Oct. 14. Bulgaria and Serbia declared war on each other. England and **France declared war on Bulgaria** (Oct. 15, 16), and so did Russia and Italy (Oct. 19) The Allies made great efforts to induce Greece to join, the English offering them the island of **Cyprus** (Oct 16), but this offer too was rejected (Oct 20)

Nov. 5. Zaimis resigned and was succeeded by **M. Skouloudis** (Nov. 6, 1915–June 21, 1916) The Greek government then declared its benevolent neutrality (Nov 8) and agreed not to interfere with the Allied forces at Saloniki, in return for a guaranty of the eventual restoration of Greek territory (Nov 24)

Oct. 22. The **Bulgarians** (Gen Jekov) took **Uskub** (Skoplje), and then (Oct 28) **Pirot. Nish** fell (Nov. 5). An attempt of the British and French from Saloniki to block the Bulgar advance on the Strumitsa (Nov. 3–5) and on the Cerna (Nov 12) was brushed aside The Allies were again repulsed on the lower Vardar (Dec 4–10) and forced to retreat to Greek territory The British were, by this time, prepared to give up the whole Saloniki adventure, but the French, under Gen **Sarrail.** persisted in staying The result was that even greater forces were tied up at Saloniki, without being able to accomplish much

Nov. 16. The **Bulgarians** took **Prilep,** then **Pristina** (Nov 23), **Prizrend** (Nov 29), and **Monastir** (i e Bitolje, Dec. 2) The **Serbs** were now in full flight into **Albania,** the Bulgars pursuing them and taking **Dibra** and **Okhrid** (Dec 8) and ultimately **Elbasan** (Feb 2, 1916)

Dec. 2. The **Austrians** took **Plevlje,** and then **Ipek** (Dec 6). **Mt. Lovchen,** guarding Montenegro, was stormed (Jan 10, 1916) and **Cettinje** taken (Jan. 13) **King Nicholas** laid down his arms and retired to Italy.

1916, Jan. 11. The **French occupied Corfu** as a refuge for the Serbian troops. The Greek government refused its consent, but the Serbs were landed nevertheless (Jan 15)

Jan. 23. The **Austrians took Scutari,** then **San Giovanni di Medua** (Jan. 25) and **Berat** (Feb. 17) The **Albanian provisional government,** under Italian protection at Durazzo, left for Naples (Feb 24), and the town was taken by the Austrians from the Italians (Feb 27) Mountain warfare between the Austrians and the Italians in Albania continued until the end of the war.

11. THE MESOPOTAMIAN CAMPAIGN, 1914-1916

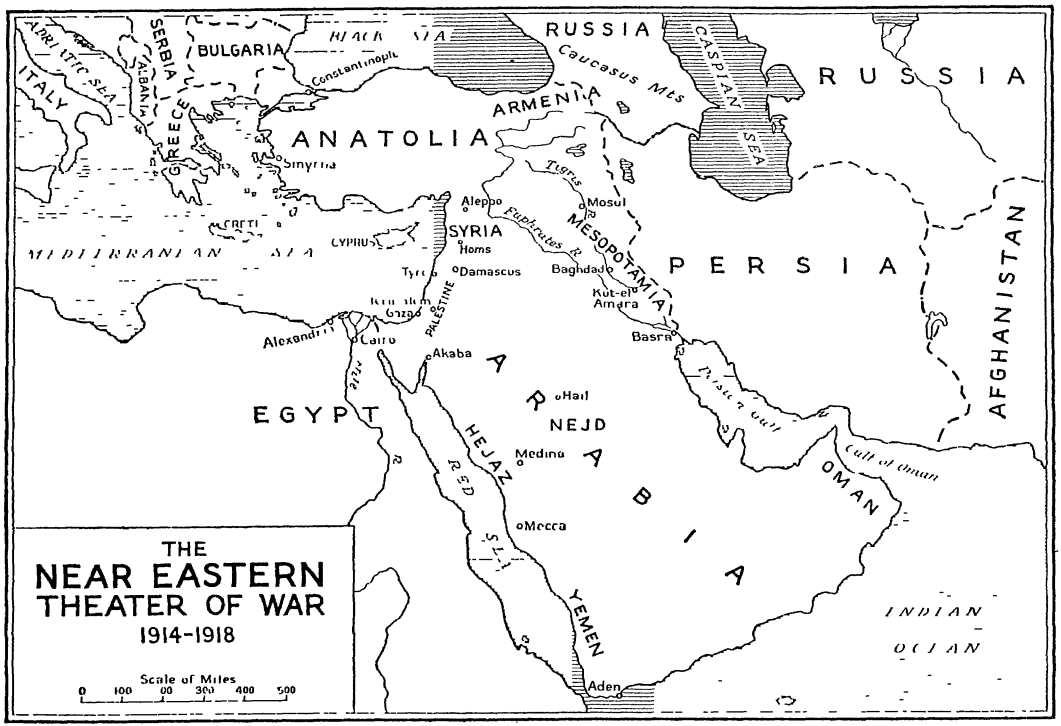
This campaign, which grew later to large dimensions and absorbed thousands of men, began very modestly when a British force from India occupied **Basra** (Nov. 22, 1914) in order to protect the oil pipeline from Persia Then, for the sake of greater security, the British began to extend the sphere of their occupation

1914, Dec. 4-8. Fighting about **Qurna,** which was taken by the Anglo-Indian forces (Dec 9)

1915, Apr. 11-13. Sir **John Nixon** repulsed Turkish attacks on Basra

June 3. Gen. **Townshend** took the town of **Amara** on the Tigris, and then **Nasiriya** on the Euphrates (July 25). Beginning of a general advance toward Baghdad

Sept. 28. BATTLE OF KUT-EL-AMARA. Townshend defeated the Turks and drove them as far as Azizya.



Nov. 11. Beginning of the **advance on Baghdad.**

Nov. 22-24. BATTLE OF CTESIPHON. The engagement was indecisive, but both armies began to fall back, Townshend retreating as far as Kut, which was reached Dec 3

Dec. 7-Apr 29, 1916. SIEGE OF KUT-EL-AMARA. Three attempts were made by the British to relieve the garrison (Jan 18–21, Mar. 8, Apr. 1–9), but the armies were hampered by floods and mud and the operations failed Efforts were made to buy off the Turks, but these too led to no result.

1916, Apr. 29. CAPITULATION OF KUT-EL-AMARA, with 10,000 men

In the effort to divert the Turkish forces and to establish contact with the British, the **Russians** in Nov , 1915, had begun an advance into **western Persia,** which was followed by an offensive in **Armenia** They took **Kasvin** (Nov. 2), **Hamadan** (Dec. 14), **Kirmanshah** (Feb. 26, 1916), **Karind** (Mar 12), and, turning westward toward the flank of the Turkish force in Mesopotamia, they took **Khanikin** (May 15) and **Rowanduz** (May 15), a detachment actually joining hands with the British on the Tigris.

The British had occupied **Bushire** (Aug. 8, 1915)

1916, Jan. 11. Beginning of the Russian offensive in Armenia The Russians took **Koprikoi** (Jan 18), and, after a battle of three days, **Erzerum** (Feb 16) and **Mush** (Feb 18) **Bitlis** fell (Mar. 2), and then **Trebizond** (Apr. 17) and **Erzingan** (July 25)

June 5. The Turks began a counter-offensive in western Persia They drove the Russians out of **Khanikin** (June 5), and retook **Kirmanshah** (July 1) and **Hamadan** (Aug 10)

Aug. 15. In **Armenia** the Turks also took the offensive, taking **Bitlis** and **Mush** (Aug 15), but losing them again to the Russians (Aug 24)

IN EGYPT during this period large numbers of troops were kept concentrated to meet the double threat of trouble from the Senussi tribes in the west and from the Turks advancing on the Suez Canal

1915, Nov. 14. Rising of the Senussi, who drove the Egyptian forces out of a number of posts along the Mediterranean (actions at **Wadi Senab,** Dec 11, and **Wadi Majid,** Dec 25) They were defeated at **Agagiya** (Feb 26, 1916) and the town of **Sollum** was reoccupied (Mar. 14). The British were also obliged to carry on a campaign against the **Sultan of Darfur** (Mar 1–Dec 31, 1916)

1916, Apr. 23. A small Turkish force under the command of Col **Kress von Kressenstein,** surprised an Anglo-Egyptian force at **Qatia** and temporarily seized several posts commanding the approach to the Suez Canal

July 19. Second Turk attack on the Canal, this time with larger forces The Turks were almost surrounded in the action near **Rumani** (Aug 4), and were obliged to retreat

12. POLITICAL CHANGES, 1915-1916

During the first years of the war the Allied powers gradually evolved arrangements for heightening the productive efficiency of their countries, and made some effort to establish closer co-ordination of action between themselves.

a. ENGLAND

1915, May 25. The **Asquith ministry** (since 1908) was reorganized as a coalition Churchill resigned as first lord of the admiralty (May 27) and was succeeded by Arthur Balfour An inner group of the cabinet, first called the **War Committee** and then (June 7) the **Dardanelles Committee,** took over the conduct of operations A ministry of munitions was set up (July 2).

June 3. An Allied conference met in Paris to establish concerted action in economic matters This was followed (Nov 25) by arrangements for inter-Allied munitions control, and by numerous measures designed to restrict trade with Germany, even by the method of rationing the supply of raw materials, etc , to neutrals (Dec. 23, introduction of the **Black List;** Jan 27, 1916, establishment of the **Shipping Control Commission;** Feb. 23, 1916, organization of a **ministry of blockade** in England)

1916, Jan. 6. The British Parliament passed the **compulsory military service bill,** despite the opposition of Labor groups. Thus far the British had attempted to raise more forces by volunteer enlistment. At first this method had been quite successful, and by the beginning of 1916 the British had a million men in France But by that time other methods had become urgently necessary

Apr. 20. Sir Roger Casement, the Irish leader, landed on the Irish coast from a German submarine, to start a rebellion

Apr. 24. Beginning of the **great Easter Rebellion** in Dublin and other sections of Ireland After a week of fighting and much bloodshed the insurrection was suppressed (May 1) Several of the leaders, including Casement, were tried and executed (Aug 3).

June 5. Field-Marshal Lord Kitchener, on secret mission to Russia, was lost when *H M S Hampshire,* on which his party was traveling, was torpedoed off the Orkney Islands

July 7. David Lloyd George became secretary of state for war to succeed Kitchener

Dec. 4. The Asquith cabinet resigned. Lloyd George formed a **war cabinet** (Dec 7–10), in which Balfour took the place of Sir Edward Grey at the foreign office.

b. FRANCE

1915, Oct. 13. M. Delcassé resigned as French foreign minister and was succeeded by the prime minister, M. Viviani.

Oct. 29. **The Viviani cabinet resigned,** and a new ministry was organized by **M. Briand,** in which the premier himself took the portfolio for foreign affairs

1916, Dec. 12. The Briand cabinet was reorganized, and an inner committee of five ministers formed a kind of war cabinet

c. ITALY

1916, June 11. The Salandra Cabinet resigned, and was succeeded by the **Boselli cabinet** (to Oct 25, 1917).

d. RUSSIA

1915, June 26. The Russian war minister, Gen. **Sukhomlinov,** was removed and later tried for malfeasance

1916, Feb. 1. The Russian minister-president **Goremykin resigned,** and was succeeded by **M. Sturmer.**

July 22. The Russian foreign minister, **M. Sazonov,** resigned and the functions of the foreign ministry were taken over by M Sturmer.

Nov. 24. M. Sturmer resigned and was followed by M. Trepov.

e. AUSTRIA-HUNGARY

1916, Oct. 21. The Austrian prime minister, **Count Sturgkh,** was assassinated His place was taken (Oct. 28) by **Dr. von Korber.**

Nov. 21. The old emperor, **Francis Joseph, died,** and was succeeded by his grandnephew, Charles.

Dec. 14. The Korber ministry in Austria resigned, and was followed by a cabinet under **Count Clam-Martinitz.** Count Czernin took the place of Count Burian as Austro-Hungarian foreign minister

f. GERMANY

1916, Nov. 20. The German foreign minister, **von Jagow, resigned.** His place was taken by **Dr. A. Zimmermann.**

13. VERDUN AND THE SOMME, 1916

Both **Joffre** and **Falkenhayn** were still convinced, at the end of 1915, that a military decision could be reached only on the French front Joffre planned for a great Anglo-French offensive to begin in the summer, to be supported by simultaneous Russian and Italian offensives **Sir Douglas Haig** (who succeeded Sir John French as commander in chief of the British forces Dec. 19, 1915) would have preferred to arrange for an offensive in Flanders, but Joffre insisted on operations in the Somme area, where the British and French could collaborate more easily. Continued argument and friction between Joffre and Haig as to the extent of front which the British should take over.

In the meanwhile Falkenhayn, having disposed of the threat from the east, was able to bring almost half a million men to the west front and to carry out his long-cherished plan for a crushing blow The plan was not so much for a break-through as for mere attrition The French were to be bled white at Verdun, a salient with poor communications and hard to hold and yet a place which for sentimental reasons if for no other would have to be fought for to the end. The French, having lost faith in forts, had taken away most of the guns about Verdun, and Joffre, intent on preparations for the Somme offensive, ignored warnings of danger in that area.

1916, Feb. 21. BEGINNING OF THE BATTLE OF VERDUN. The **Germans** (Crown Prince Wilhelm in command) concentrated 1400 guns on a short front of 8 miles on the right bank of the Meuse After a devastating bombardment they took **Fort Douaumont** (Feb 25) French reinforcements (Gen Pétain) were rushed to this sector, but the defense was hampered by the bottle-mouth of the salient

Mar. 6-Apr. 10. Renewal of the attack, this time on both sides of the salient. Terrific loss of life on both sides. **Gen. Nivelle** replaced Gen Pétain and the French began a series of vigorous counter-attacks (May).

June 2. The **Germans** finally took **Fort Vaux,** and before the end of the month the works of **Thiaumont** (June 23). Heavy attacks continued until July 11, when the Germans went over to the defensive. The French losses have been estimated at about 350,000, the German at somewhat less But Verdun did not bring a decision much nearer.

The immediate effect of the assault on Verdun was felt in the preparation for the Somme offensive. The French were obliged to reduce their contribution from 40 divisions to 16 and their front of attack from 25 miles to 10, so that the operation was in the main a British one.

July 1. OPENING OF THE BATTLE OF THE SOMME. After a long and intensive bombardment the British advanced on a front of 15 miles toward Bapaume, while the French objective was Péronne. Though the Germans were outnumbered at least six to one at first, the British had but little success The heavily laden infantry was unable to move fast enough to keep up with an extraordinarily rigid time schedule British losses on one day were 60.000, heavier than in this or any other war

July-Aug. The battle continued, both sides fighting desperately and the Allies gradually pushing forward

Sept. 15. First use of tanks by the British. These had been suggested long before, but the military authorities had been hostile to the idea, and even when they were finally used there were far too few (only 18 on the field) to gain the fullest advantage

Nov. 18. End of the battle of the Somme, which gradually ran out in rain and mud. The Allies had conquered about 125 sq. miles of territory, but nothing of prime strategic importance The maximum advance was about 7 miles British losses were over 400,000 and French almost 200,000. The German losses were between 400,000 and 500,000

Oct. 24-Dec. 18. The French (Gen Mangin) **counter-attacked at Verdun,** retaking Forts Douaumont and Vaux (Nov. 2) and making a total advance of about two miles. These operations left the situation at Verdun much as it was early in the year. Both sides were seriously exhausted after the arduous and costly, but wholly inconclusive, operations of 1916.

14. THE WAR AT SEA. BATTLE OF JUTLAND

The second half of 1915 and the first half of 1916 were not marked by any striking events of naval warfare The Germans continued their efforts to reduce British preponderance by submarine and mine destruction, and at the same time extended their operations against merchant shipping.

1916, Feb. 21. The German government notified the United States government that thenceforth armed merchantmen would be treated as cruisers **The "extended" submarine campaign** began Mar. 1.

Mar. 24. The *Sussex* sunk by torpedo in the Channel with the loss of American lives There followed another acrimonious dispute between Washington and Berlin, the Germans showing themselves unwilling to make any concession until what amounted to an American ultimatum induced them to give up unrestricted submarine warfare for the time being (May 10)

In the meanwhile (Jan. 1916) **Adm. Scheer** had succeeded Adm Pohl in the command of the German High Seas Fleet. The famous minister of Marine, **Adm. von Tirpitz, resigned** (Mar 14) as a protest against the emperor's unwillingness to make full use of German sea-power He was succeeded by **Adm. von Capelle.**

Apr. 24-25. A German squadron raided and bombarded **Yarmouth** and **Lowestoft.** Submarines appeared off the Scottish naval bases.

May 31-June 1 BATTLE OF JUTLAND (SKAGERRAK). May 30 **Adm. Hipper** with the German battle-cruiser squadron had been sent to show himself off the Norwegian coast May 31 he came into contact with **Adm. Beatty** and the British battle cruisers, running south-east before the Grand Fleet Though decidedly outnumbered Hipper and the Germans, through superior marksmanship, sank two of Beatty's ships Beatty, sighting the German High Seas Fleet (Adm. Scheer) coming up in battle array, turned to the north to meet Jellicoe and the Grand Fleet, which was hastening to his assistance. The German fleet, having been sucked in, met the Grand Fleet just before 6 P M **Jellicoe** tried to deploy across Scheer's line of retreat, but **Scheer** turned about suddenly and made away to the south and then to the east, coming up on the flank of the British, in pursuit Scheer turned again, launching a torpedo attack, which obliged Jellicoe to fall back Scheer then sent Hipper and the battle cruisers to attack while the High Seas Fleet effected its escape. Night fell, leaving the two fleets steaming southwest about 6 miles apart But at 9 P M. Scheer turned east and made for Horns Reef, forcing his way through the tail end of Jellicoe's forces, still steaming south. The German fleet reached Horns Reef in safety at 3 30 in the night Each fleet lost six ships in the Jutland engagement, but the British ships lost totaled almost twice the tonnage of the Germans Scheer had to yield to the superiority of the British in capital ships, but in battle-cruiser warfare the Germans were completely victorious They showed themselves

brilliant in maneuvering and in marksmanship

Aug. 19, Oct. 26-27. German raids on the English coast. At the same time German light cruisers slipped through the blockade and ravaged commerce in the Atlantic, later returning through the lines to home ports (*Moewe*, Dec 26, 1915–Mar. 14, 1916, Nov 26, 1916–Mar 22, 1917; *Seeadler*, Nov 22, 1916–Aug 2, 1917; *Wolff*, Dec 1, 1916–Feb 24, 1918) The German commercial submarine *Deutschland* made a trip to America and back (July 10, 1916, at Norfolk, Va)

15. THE ITALIAN FRONT, 1916

1916, Feb. 15-Mar. 17 The fifth battle of the Isonzo, which, like the previous engagements, led to no substantial change

The Austrian chief of staff, Gen **Conrad,** had for some time been urging upon the German high command the desirability of massing troops in the Trentino for an attack upon the Italian rear and flank, but **Falkenhayn** had flatly refused to contribute forces which he needed for the operations at Verdun The result was that the Austrians decided to make the try alone. As many troops as possible were withdrawn from the Russian front and prepared for an advance on the Asiago plateau

May 15-June 3 The Austrian offensive in the Trentino. The Italians were taken by surprise and the Austrians took **Asiago** and **Arsiero** (May 31). But it soon became evident that the Austrians lacked sufficient forces to break through, the more so as the Italians hastily brought up reserves from the Isonzo front. The Italian lines held and by June 17 a counter-offensive was launched When this came to a close (July 7) most of the territory had been recovered, but the Italian losses were about 150,000 men

Aug. 6-17. Sixth battle of the Isonzo. The Italians finally took **Gorizia** (Aug. 9).

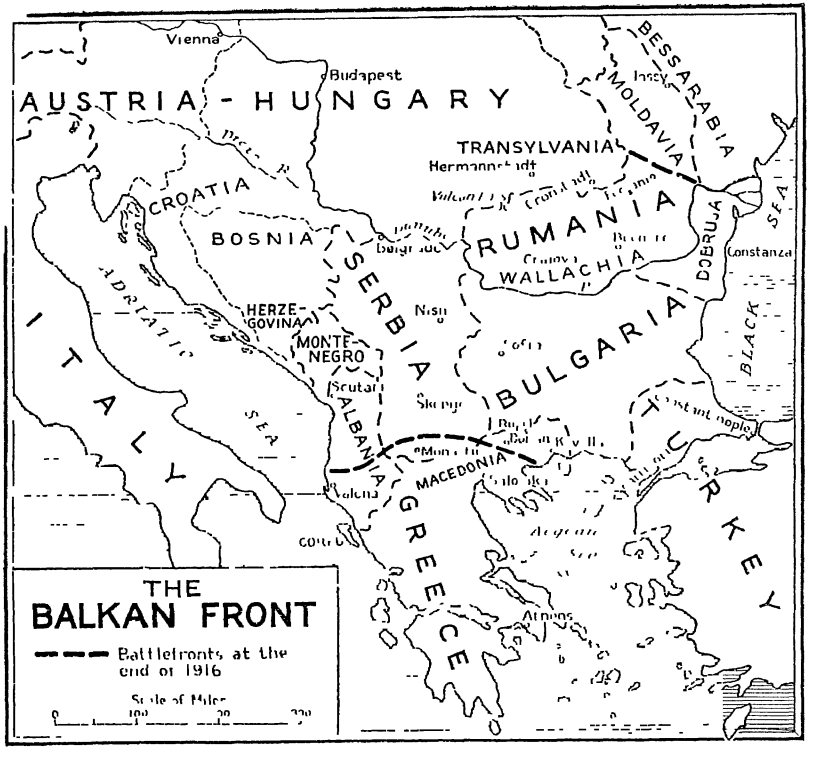
Sept. 14-18. Seventh battle of the Isonzo.

Oct. 9-12. Eighth battle of the Isonzo.

Oct. 31-Nov. 4. Ninth battle of the Isonzo.

16. THE EASTERN FRONT, 1916

1916, Mar. 19-Apr. 30. Battle of Lake Naroch. This inconclusive Russian offensive was intended solely to relieve the pressure of the Germans at Verdun



June 4. BEGINNING OF THE GREAT BRUSILOV OFFENSIVE, initiated somewhat prematurely in order to meet the Italian appeals for action to distract the Austrians in the Trentino Brusilov (appointed to the command of the Russian southern front, Apr 4) had planned the offensive for June 15, to coincide with Joffre's great offensive on the Somme But the Brusilov offensive was meant to be followed by an even larger operation farther north The objective in the south was **Kovel,** an important railway center, but the advance extended over a front of 300 miles The Austrians, taken by surprise, fell back at once, leaving many prisoners in Russian hands. The **Russians took Lutsk** (June 8) and **Czernowitz** (June 18) Heavy fighting continued about Kovel, Tarnopol, and Baranovici (**battles of the Strypa,** June 11–30, **Baranovici,** July 2–9, **Kovel,** July 28–Aug 17) until Sept The Russians advanced from 25 to 125 kilometers in the region from Pinsk south to Czernowitz and they took half a million prisoners, but they had difficulties in moving their own troops from north to south, and ultimately the offensive was stopped by the arrival of 15 divisions of Germans from the west front The Russians had failed to take either Kovel or Lemberg Their losses were about a million men, and the whole operation left the army demoralized and discontented.

17. THE BALKAN FRONT, 1916

Throughout the summer and autumn of 1916 the **Greek situation** continued to be most unsatisfactory from the Entente viewpoint

1916, May 26. A **Bulgarian-German** force occupied **Fort Rupel** in Greek Macedonia, this action enhancing the suspicion that King Constantine was secretly bound to the Central Powers

June 6-22. The **"pacific blockade" of**

Vienna
Budapest
AUSTRIA - HUNGARY

THE
BALKAN FRONT
Battlefronts at the end of 1916
Scale of Miles

Greece by the Entente Powers France and England sent Greece an ultimatum (June 21) demanding demobilization of the Greek army and the institution of responsible government The Greek government yielded The **Skouloudis ministry resigned** and a Zaimis cabinet was organized The army was put on a peace footing (June 27) and new elections were arranged for

July 25. The reconstituted Serbian army, which had been shipped from Corfu to Saloniki, came into action on that front Russian troops from France and an Italian contingent also arrived (July 30, Aug 11)

Aug. 2-21. Battle of Doiran. The Allies began the advance against the Bulgarians on the Saloniki front.

Aug. 17-19. Battle of Florina. The Bulgars and Germans counter-attacked and pushed back the Saloniki forces. They took **Seres** (Aug. 19), **Drama,** and **Kavalla** (Sept 18), where the fourth Greek army corps voluntarily surrendered

Aug. 30. A Venizelist, pro-Ally movement, fostered by Gen. Sarrail, took place at Saloniki.

Sept. 29. Venizelos and Adm. Condouriotis **established a provisional government** in Crete. Venizelos then (Oct 9) went to Saloniki, where the **provisional government declared war on Germany and Bulgaria** (Nov. 23).

Oct. 10 The **Entente Powers,** incensed by the surrender of the Greek forces at Kavalla, **submitted an ultimatum** to Athens demanding the surrender of the Greek fleet The Athens government (**Lambros ministry,** Oct 10–May 3, 1917) yielded (Oct 11), whereupon the Entente Powers demanded (Nov 19) the dismissal of the representatives of the Central Powers at Athens and the surrender of war material. These demands were rejected (Nov 30) and in consequence **French and British** landing parties **debarked at Piraeus.** They withdrew again Dec 1 after conflicts with the Greeks Dec 6 there were clashes between the Greek government supporters and the Venizelists

Dec. 8. Blockade of Greece. The Allies demanded (Dec 14) the complete withdrawal of Greek forces from Thessaly. The Athens government once more gave in (Dec 15), but Dec 19 the British government decided to recognize the provisional government of Venizelos

Oct. 5-Dec. 11. The Allied forces under Sarrail began a great offensive in Macedonia (**battle of the Cerna and Monastir, or first battle of Monastir**). **Monastir** (Bitolje) was taken (Nov 19) and the Allies finally pushed forward as far as Lake Okhrid On the Bulgarian frontier no advance was made

18. THE INTERVENTION OF RUMANIA

Since the spring of 1916 the Russian government had been redoubling its efforts to bring Rumania into the war The success of the Brusilov offensive and the readiness of the Russian government and its allies to recognize the Rumanian claims to the Bukovina and Banat as well as to Transylvania resulted in the conclusion of a political and military agreement (Aug 18)

1916, Aug. 27. RUMANIA DECLARED WAR ON AUSTRIA-HUNGARY. Germany declared war on Rumania, and Italy finally declared war on Germany (Aug 28). Turkey and Bulgaria declared war on Rumania a few days later (Aug 30, Sept 1 respectively)

The Rumanians should probably have entered the war in June, when the Russian offensive began, but they had wanted to wait for the harvest and were, in fact, very inadequately prepared even then

Aug. 28. The Rumanians began the **invasion of Transylvania** and took **Kronstadt** (Brasov) and **Hermannstadt** (Sibiu)

Sept. 27-29. The **Austro-German forces,** hastily assembled in Transylvania and commanded by the former chief of staff, Gen von Falkenhayn (replaced by Hindenburg, Aug. 29), counter-attacked and surrounded the Rumanians at Hermannstadt (**battle of Sibiu**).

Sept. 26-Nov 23. Operations of a Bulgarian-German force under Gen von Mackensen, in the **Dobrudja. Silistria** was taken (Sept 10), then **Constantza** (Oct. 22) and **Cernavoda** (Oct 25).

Oct. 7-9. Battle of Kronstadt (Brasov) The Austro-German forces retook the city and advanced to the Carpathian passes

Nov. 10-14. Falkenhayn forced the Vulcan Pass into Rumania and began the invasion of Wallachia.

Nov. 23. Mackensen's troops crossed the

Danube at Sistova and Simnitza and advanced toward Bucharest, as did Falkenhayn coming from Craiova

Dec. 1-5. The Rumanians tried to counter-attack on the Arges River, but were completely defeated (**battle of Argesul**). The Rumanian government was hastily moved to Jassy, and the capital, **Bucharest, fell into the hands of the enemy** (Dec. 6)

1917, Jan. The Austro-German forces continued the advance both in the Dobrudja and in Moldavia **Braila** was taken (Jan 5) and **Focsani** (Jan 8). By the middle of Jan the Rumanians had reached the Sereth River, where the campaign came to a stop Most of Rumania, with important wheat-and-oil-producing areas, was in the hands of the Central Powers

19. PEACE NEGOTIATIONS, 1916-1917, AND THE INTERVENTION OF THE UNITED STATES

From the very outbreak of the war, **President Wilson** appears to have felt that ultimately the opportunity would present itself for the United States government to step in as mediator The president himself regarded the work of peacemaking as his great mission, and was prepared to act at once when the moment was opportune.

1916, Jan.-Feb. The president's close friend and intimate adviser, **Col. Edward M. House,** visited Europe and consulted with the leading statesmen His conferences with Sir Edward Grey resulted in the so-called **House Memorandum** of Feb 22, which stated that the president was ready, whenever England and France thought the time opportune, to propose a peace conference If the proposal were accepted by the Allies but rejected by Germany, the United States would probably enter the war on the Allied side The terms on which the United States would mediate would include the restoration of Belgium and Serbia, the retrocession of Alsace-Lorraine to France, the acquisition of Constantinople by Russia, and the transfer of the Italian-speaking parts of Austria to Italy. Poland was to be independent Germany would retain some colonies and perhaps be given more At that time the Allied soldiers and statesmen were still hoping for victory in the 1916 offensive, but the offer illuminates the sympathies of Wilson, House, Page, and other American statesmen.

Public opinion in the United States was still distinctly divided, but sentiment for peace was prevalent, excepting in the eastern states where, almost from the outset, there was some feeling for intervention on the Allied side (influence of English propaganda, etc) The president was re-elected (Nov. 7, 1916) very largely on a platform of peace, but he applied himself almost at once to the resumption of his mediatory efforts.

Dec. 12. The German government appealed to the United States to inform the Entente governments that the Central Powers were **prepared to negotiate peace.** This offer appears to have been designed to anticipate any move by Wilson and may have been intended to divide the Allies or to prepare the way for the introduction of unrestricted submarine warfare In any event, the military situation, after the wiping-out of Rumania, could hardly have been more favorable, a fact which was not overlooked in the drafting of the German note Failure of the Germans to mention any specific terms, and the fact that all the advantages were on their side, made it relatively easy for the Allied governments (new energy of the Lloyd George and Briand cabinets) to reject the German advances (Dec 30)

Dec. 18 President Wilson transmitted his own proposals to the warring powers He suggested that the belligerents state their terms for peace and for arrangements to guarantee the world against renewal of conflict The German, Austrian, and Turkish governments replied (Dec. 26) in an appreciative way, but reiterated their opinion that the best method would be to call a meeting for exchange of views No definite terms were mentioned The Allied Powers in their reply (Jan 10, 1917) named specific terms These included the restoration of Belgium, Serbia, and Montenegro, the evacuation of French, Russian, and Rumanian territory, with just reparation, the reorganization of Europe on the basis of nationalities, the restoration of territory previously taken from the Allies, the liberation of Italians, Slavs, Rumanians, and Czechoslovaks from foreign rule, the freeing of subject nationalities under Turkish rule and the expulsion of the Turks from Europe

The far-reaching nature of the Allied terms, at a moment when the military situation was by no means in their favor, estranged even Wilson, who still stuck by

the idea of **"peace without victory"** (speech to the Senate, Jan 22) The first step, however, was to elicit from the Germans a concrete statement of aims These were confidentially communicated to the president on Jan 29 restitution of the part of Alsace occupied by the German forces, acquisition of a strategical and economic zone between Germany and Poland on the one hand and Russia on the other, return of colonies and the granting to Germany of colonial territory in accord with her population and economic needs, restoration of occupied France, renunciation of economic obstacles to normal commerce, compensation for German enterprises and civilians damaged by the war, freedom of the seas, etc

Though this program was anything but hopeful, the president and the German ambassador, **Count Bernstorff,** continued to negotiate It was felt that the Allies were rapidly coming to the point where they would be unable to continue the war without American aid and that, when that time came, they would have to accept American mediation and a compromise peace without victory But these discussions were cut short by the decision of the Germans to begin unrestricted submarine warfare

1917, Jan 8. A meeting of the highest military and civil officials of Germany, **at Pless,** finally concluded that the unrestricted use of the submarine was the only method by which England could be brought to her knees and the war won It was calculated that shipping could be sunk at the rate of 600,000 tons a month and that in six months England would have to yield. It was understood that the decision would probably mean war with the United States, but it was felt that the conflict would be over before the full weight of America could be thrown in The chancellor, Bethmann-Hollweg, and men like Helfferich were not convinced of the soundness of the policy, but offered no other solution. To counterbalance the hostility of the United States, the foreign minister, Herr von Zimmermann, sent instructions to the German minister in Mexico to work for an **alliance with Mexico and Japan** directed against the United States (Jan 19)

Jan. 31. The United States was notified that **unrestricted submarine war** would begin on Feb 1

Feb. 3. The United States government severed relations with the German government. In response to an appeal from the president, Brazil, Bolivia, Peru, and other Latin-American states followed suit China did likewise (Mar 14)

The president had decided not to declare war until the Germans had committed an overt act Several American ships were in fact sunk during Feb and Mar At the same time the British secret service intercepted and deciphered the **Zimmermann note,** revealing German plans against the United States

Apr 6. THE UNITED STATES DECLARED WAR ON GERMANY, following the president's war message to the Senate (April 2) War was not declared on Austria-Hungary until Dec 7, 1917

1917, Feb.-June. Secret negotiations between the Emperor Charles of Austria and his foreign minister, Count Czernin, **and the French and British governments.** The emperor seems to have been determined, from the time of his accession (Nov. 1916), to make peace, even without Germany. The negotiations were carried on through his brother-in-law, **Prince Sixtus of Bourbon,** who was serving in the Belgian army. After several secret meetings in Switzerland, Prince Sixtus went to Vienna, with the full knowledge and approval of the French foreign office, and had a conference with the emperor and Czernin He returned to Paris with a letter from Charles (dated Mar 24) in which the writer promised to use his influence with his allies to support "the just French claims relative to **Alsace-Lorraine."** Belgium was to be restored, with compensation for her losses, so also Serbia, which was to have access to the Adriatic The emperor was also not opposed to Russia's acquisition of Constantinople.

This offer was well received by **Poincaré** and **Briand** and also by **Lloyd George.** The one flaw was the failure to offer adequate gains to Italy In the ensuing negotiations, which continued till June (second visit of Prince Sixtus to Vienna, May 6–8), it became clear that the Austrians were willing to turn over the **Trentino** to Italy, but not **Trieste,** and that the Italians (statement of Sonnino at the **St. Jean de Maurienne conference,** Apr. 19–21) were unwilling to accept anything short of the full terms of the Treaty of London (see p 925) Efforts continued to be made by Poincaré and Lloyd George, but the French prime minister, **M. Ribot** (succeeded Briand, Mar 20), took a hopeless attitude and indeed the Italians made no move in the direction of concessions.

20. CAMPAIGNS IN ASIATIC TURKEY, 1916-1917

1916, Apr. 26. Anglo-Russian-French agreement with regard to the future partition of Asiatic Turkey. This agreement had been maturing ever since Mar 1915, when France and England promised Russia Constantinople and the Straits It provided that in the independent Arab state that was to be formed, **England** should have as a sphere of influence Mesopotamia and in Syria the ports of Haifa and Acre The **French sphere** was to include the coastal strip of Syria, the Adana vilayet, Cilicia and southern Kurdistan, with Kharput **Palestine** was to be under an international administration **Russia** was to receive Armenia and part of Kurdistan and northern Anatolia westward from Trebizond to a point to be determined later

May 9. THE SYKES-PICOT AGREEMENT between England and France This made the French and British claims more specific The territories mentioned in the above agreement were to be the French and British administrative zones, while the rest of Arabia was to be divided into French and British spheres of influence, though organized as an Arab state or federation of states

1917, Apr. 19-21. The St Jean de Maurienne Agreement. In return for recognition of the Sykes-Picot Agreement, Italy was given further concessions in the regions of Adalia and Smyrna

Through the Sykes-Picot Agreement the British were involving themselves in serious difficulties for the future, because these agreements were not entirely compatible with other agreements made with Arab chieftains, agreements which, indeed, were not compatible with each other.

a. ARABIA

1914, Oct. 31. Lord Kitchener had offered **Hussein,** the Grand Sherif of Mecca, a conditional guaranty of independence Negotiations between the sherif and the British government were definitely embarked upon in July, 1915.

1915, July 14. Hussein submitted his terms for entering upon a campaign against the Turks. Britain was to recognize the independence of the Arab countries south of 37° N. L.

Oct. 24. The British reply took exception to the Arab claims to the Mersina-Alexandretta region and to Syria west of Damascus, Hama, Homs, and Aleppo For the rest the boundaries of the future Arab state were accepted with respect to "those portions of the territories therein in which Great Britain is free to act without detriment to her ally, France"

Nov. 5. Hussein accepted the British proposals with regard to Mersina and Alexandretta, but held out for Beirut and Aleppo, as well as Baghdad and Basra, though he was willing to recognize the British right to temporary occupation of the latter places

Dec. 21. The French government accepted the idea of Arab administration of western Syria, but only under French influence

1916, Jan. 30. The British accepted Hussein's terms, leaving the exact status of Baghdad and Basra, and of the sphere of French influence in Syria, undetermined

b. NEJD

1915, Dec. 25. The government of India, after long negotiations with **Ibn Sa'ud,** King of Nejd, concluded an agreement with him (ratified July 18, 1916) by which it recognized Nejd, Qatif, Jubail, and territories along the Persian Gulf coast of Arabia as the independent possessions of Ibn Sa'ud, despite the obvious contradiction between these concessions and those offered to Hussein.

c. ARAB REVOLT

1916, June 5. Beginning of the **Arab revolt in the Hijaz** Attack on the Turkish garrison at Medina.

June 7. Hussein proclaimed the **independence of the Hijaz.** The garrison of Mecca surrendered (June 10)

Oct. 29. Hussein proclaimed King of the Arabs. He summoned all Arabs to make war on the Turks.

Dec. 15. The British government recognized Hussein as King of the Hijaz.

It was largely in order to strengthen the Arab insurrection that **Sir Archibald Mur-**

ray (commander in Egypt, since Mar 19, 1916) decided on a cautious offensive in Sinai and Palestine.

1916, Nov. 15. Beginning of the advance.

Dec. 21. The British took El Arish, after building a railway and pipeline across the desert They then took the fortified posts of **Magdhaba** (Dec 23) and **Rafah** (Jan 9, 1917)

1917, Mar. 26-27. First battle of Gaza The cavalry had surrounded the town, but through a misunderstanding was recalled

Apr. 17-19. Second battle of Gaza The Turks, in the interval, had strengthened their position and had been reinforced by German troops (*Asienkorps*, under von Falkenhayn) The British were forced back with heavy losses

June 28 Murray was replaced by **Sir Edmund Allenby.**

July 6. Emergence of the spectacular war hero, **Col. T. E. Lawrence,** who galvanized the Arab movement and took Aqaba, thus beginning the brilliant thrusts against the Turkish garrisons and especially against the guards of the Hijaz railway, the most important link in the Turkish communications

d. MESOPOTAMIA

Operations on the Mesopotamian front were also resumed in the autumn of 1916, with **Sir Stanley Maude** in command. After troops and supplies had been collected in large numbers and careful preparations had been made

1916, Dec. 13. The advance was begun toward **Kut-el-Amara.**

1917, Jan. 9-Feb. 24. Battle of Kut. The city was taken Feb 23 The victorious British then pursued the Turks toward Baghdad.

Mar. 11. BAGHDAD OCCUPIED BY THE BRITISH.

The British campaign in Mesopotamia was accompanied by a new **Russian advance in western Persia.**

1917, Mar. 2. The **Russians took Hamadan,** then **Kirmanshah** (Mar. 12), **Karind** (Mar. 17), and **Khanikin** (Apr 4)

Apr. 23. The British reached Samarra, 80 miles north of Baghdad.

July 8. The Russians began to retreat from western Persia one of the effects of the Russian Revolution

Sept. 29. The British captured Ramadi on the Euphrates, and then (Nov. 6) **Tikrit** on the Tigris, these points marking the farthest extent of the advance in Mesopotamia in 1917

21. THE WESTERN FRONT, 1917

The operations of 1917 were prefaced by important changes in the German and French high commands.

1916, Aug. 29. Hindenburg succeeded von Falkenhayn as chief of staff of the German field armies, with **Gen. von Ludendorff** as quartermaster-general. Despite their constant advocacy of a concentration of forces on the eastern front, both Hindenburg and Ludendorff now came to share the opinion of Falkenhayn, that a decision could be reached only on the French front.

Dec. 12. Gen. Nivelle succeeded Joffre as commander in chief of the French armies Nivelle had distinguished himself in the fighting at Verdun. His energy and dash made a profound impression, and his appointment, it was hoped, would lead to a more fruitful campaign.

Nivelle, like his predecessor, hoped to effect a break-through and planned a great French offensive in the direction of Laon, this to be introduced by a preliminary Franco-English advance on both sides of the Somme The execution of this plan was delayed by **disagreement between Nivelle and Haig,** who himself would have preferred an offensive in Flanders and who resented being put more or less under Nivelle. The friction that ensued required a number of conferences between French and English statesmen (Jan.–Mar. 1917).

In the interval **Ludendorff** had decided that the western front could be made stronger and more defensible if some of the bulges could be eliminated A strong new position was therefore constructed, which became known as the *Hindenburg Line.* After completely destroying the area between, and after mining the roads

1917, Feb. 23. The Germans effected a preliminary withdrawal between Arras and Soissons.

Mar. 4-Apr. 5. The main withdrawal was carried through The Germans abandoned **Bapaume, Péronne, Roye, Noyon, and Chauny.**

Though this move on the part of the Germans dislocated the French plans, Nivelle was still optimistic. His own generals warned him and the members of the new **cabinet of Ribot** (succeeded Briand, Mar 20) and Painlevé (minister of war) brought pressure upon him to give up the plan This opposition was overcome by Nivelle's threat to resign, which the government yielded to from consideration of public opinion

Apr. 9-May 4. BATTLE OF ARRAS. The British 3d army (Gen **Allenby**) began the advance after a thorough bombardment and heavy gas attack (use of the gas projector) **Canadian troops took Vimy Ridge** and the British made a total advance of about 4 miles, without, however, effecting a break-through. On the Somme they advanced to near St Quentin

Apr. 16-20. SECOND BATTLE OF THE AISNE and THIRD BATTLE OF CHAMPAGNE. Nivelle's plans had been so well advertised that the Germans had been able to concentrate large forces in the area of attack The whole operation failed, in the fighting till May 21 the French took only the **Chemin des Dames,** and this with very heavy losses. Discontent and mutiny became widespread in the weary army, till 16 corps were affected (May–June)

May 15. Nivelle was dismissed and his place taken by **Gen. Pétain,** who did what he could to redress the grievances of the troops and wisely decided to stand on the defensive until the American reinforcements could make themselves felt At the same time the government proceeded with the greatest rigor against socialist and pacifist agitators Twenty-three leaders were executed

22. THE SUBMARINE WAR, 1917

The German high command reckoned confidently on winning the war through the destruction of the English food-supply The prospects were, indeed, excellent Already in the last months of 1916 German submarines had destroyed 300,000 tons of shipping a month By the beginning of 1917 the Germans had about 120 submarines, the number being increased to 134 by Oct 1917

1917, Apr. Submarine warfare reached the high point In this month alone 875,000 tons of shipping were destroyed, more than half of it British. This figure exceeded the German estimates (600,000) and brought the British admiralty to the point of despair. Finally, owing largely to the insistence of Lloyd George, the admiralty agreed to try **convoying** merchant ships (first convoy, May 10) The system proved to be an unqualified success At the same time the British increased the numbers of their destroyers and submarine chasers, developed the depth bomb and the system of scouting with hydroplanes Shipbuilding was pushed to the very limit

By Oct. 1917 the Germans had destroyed about 8,000,000 tons of shipping, but they had lost 50 submarines and their campaign was becoming less and less effective By the beginning of 1918 the Allies were building more new tonnage than was being destroyed The German gamble on the submarine had failed

23. THE BRITISH OFFENSIVES, 1917

The collapse of the Nivelle offensive gave **Haig** greater freedom to act than he had enjoyed before In view of the great destructiveness of the submarines, based on the Belgian coast, Haig was more determined than ever to start an **offensive in Flanders** and to try to roll up the German right flank The French command was not enthusiastic about the plan, and pointed out that it could co-operate only to the extent of launching lesser attacks on the Verdun and Champagne fronts

1917, June 7. Battle of Messines (till June 14). The British 2d army (Gen. **Plumer**) launched a surprise attack on **Messines Ridge,** and was entirely successful in straightening the Ypres salient

July 31-Nov. 10. THIRD BATTLE OF YPRES. Despite the opposition of Lloyd George and the skepticism of some of his subordinates, Haig proceeded hopefully to the main offensive The third battle of Ypres (or **Passchendaele**) was a series of 8 heavy attacks, carried through in driving rain and fought over ground waterlogged and muddy No break-through was effected and the total gain was about 5 miles of territory, which made the Ypres salient more inconvenient than ever and cost the British about 400,000 men The British forces were almost as demoralized

by this operation as the French by the Nivelle offensive

Aug. 20-Dec. 15. Second battle of Verdun. Intended to serve as relief for the British in Flanders The French, after careful preparations, gained several key positions, even on the east bank of the Meuse

Oct. 23-Nov. 1. Battle of Malmaison. The French, attacking along the Chemin des Dames, managed to cut off a German salient northeast of **Soissons.** The Germans fell back to the Oise-Aisne Canal

Nov. 20-Dec. 3. Battle of Cambrai First great tank raid Without preliminary bombardment the British launched a surprise attack with 380 tanks Without much trouble they penetrated the three German lines and were on the point of breaking through into open country, but the exhausted troops were unable to take advantage of the situation. The operation had been planned as a limited one and inadequate reserves were on hand The British advanced 5 miles in the direction toward **Cambrai** on a 6-mile front, but Nov 30 the Germans suddenly counter-attacked on both flanks of the salient and forced the British to give up much of the ground they had conquered.

24. THE RUSSIAN FRONT, 1917

The situation in the east was dominated, in 1917, by the developments of the **Russian Revolution** (see p 1028) But the provisional government (**Paul Miliukov,** foreign minister, Mar 15–May 16, 1917) was strongly in favor of prosecution of the war in the hope of realizing the national aspirations The same was true of **Alexander Kerensky** (minister of war, May 16, prime minister, July 16), who hoped to combat disruptive tendencies and galvanize the country by a new military effort

1917, July 1. Brusilov began a **great offensive on the Galician front** (battles of **Brzezany, Koniuchy,** and **Zloczow**). The Russians advanced until the Germans counter-attacked

July 18-28. Battle of East Galicia. The Germans and Austrians drove the Russians back and retook **Halicz, Tarnopol, Stanislav** (July 24–26), and **Czernowitz** (Aug 3).

Aug. 1. Brusilov was succeeded by Gen. Kornilov.

Sept. 3-5. Battle of Riga. The Germans attacked Kornilov, surrounded and took Riga (Sept. 3).

Sept 8-14. Kornilov marched on Petrograd as leader of a counter-revolutionary movement, which failed

Oct. 11-20. The Germans, having overrun much of Latvia, **conquered the Baltic Islands** (**Oesel** taken, Oct 16, **Moon Island** and **Dago,** Oct. 17–18)

Nov. 7 (Oct. **25** O S.). **Bolshevik *coup d'état* in Russia.**

Nov. 28. The new Bolshevik régime offered the Germans an armistice and peace

Dec. 15. Armistice concluded on the eastern front.

25. THE BALKAN SITUATION, 1917

The Macedonian front was quiet during the winter of 1916–1917, but operations were resumed in March

1917, Mar. 11-19. Second battle of Monastir and **battle of Lake Presba.**

May 5-19. Battle of the Vardar (or **Doiran**). These engagements were inconclusive, but they served to convince the Allied powers that success on this front would be impossible so long as the Greek government was unreliable

June 11-12. The newly arrived French envoy (**M. Jonnart**) presented an Allied ultimatum, demanding the abdication of King Constantine and the renunciation of the claims of the Greek crown prince At the same time Allied troops invaded Thessaly and a French force occupied the Isthmus of Corinth.

June 12 Constantine abdicated in favor of his second son, Alexander.

June 26. Venizelos became premier, replacing M Zaimis, who had succeeded Lambros on May 3.

June 27. The Greek government severed relations with the Central Powers and definitely **entered the war on the Allied side.**

26. THE COLLAPSE OF ITALY, 1917

During the first part of 1917 the Italian effort continued to center on the Isonzo

1917, May 12-June 8. Tenth battle of the Isonzo.

Aug. 17-Sept. 12. Eleventh and last battle of the Isonzo. As a result of two years of operations the Italians had advanced only about 10 miles, or halfway to Trieste

In part the Italian failure was due to inadequate artillery and ammunition Gen **Cadorna** had already tried to persuade England and France to send supplies and men in large numbers, so that a knock-out blow might be delivered against war-weary Austria Gen Foch and Lloyd George were distinctly favorable to this plan, but Haig had his way and proceeded to the offensive in Flanders.

In the meanwhile **Ludendorff** decided to follow the annihilation of Serbia and Rumania with a similar assault on Italy, which would relieve the pressure on Austria Six divisions of German troops were sent to reinforce the nine Austrian divisions on the Isonzo front It was decided to attack on the Upper Isonzo, near Caporetto, in the hope of breaking through and advancing as far as the Tagliamento River

Oct. 24-Dec. 26. THE CAPORETTO CAMPAIGN (sometimes called the **twelfth battle of the Isonzo**) The German-Austrian forces attacked after a short bombardment, but in heavy fog. The Italian forces, worn down by long and inconclusive fighting under trying conditions, broke at once The Austro-German advance on the first day was fully 10 miles. In three days they were through the hills and almost prevented the completely demoralized enemy from crossing the Tagliamento **The Italians fell back to the Piave.** French and British troops were hurried to Italy to help hold the front (Nov 3, 4). The Austro-German forces, outrunning their supply system, were obliged to slow down The line became fixed on the Piave River, after the Italians had lost almost 300,000 men taken prisoner and even more than that in deserters

Nov. 7. Gen. Cadorna was replaced by Gen. Diaz, who devoted himself to establishing a defensive position and above all to restoring the morale of the troops

27. POLITICAL DEVELOPMENTS, 1917-1918

In the summer of 1917 peace no longer appeared to be far in the future The inability of both sides to win a decision on the battlefield and the victory of the revolution in Russia led to a wide spread of defeatism, pacifism, and socialism

a. FRANCE

1917, Mar. 17. The Briand cabinet was obliged to resign, and was succeeded by a ministry in which **Alexandre Ribot** was premier and **M. Painlevé** foreign minister It was this cabinet, led by a tired septuagenarian, that had to bear the full brunt of the discontent arising from Nivelle's ill-starred offensive Deserted by the Socialists, who were outraged by the government's refusal of passports to delegates to the Socialist conference at Stockholm, Ribot resigned (Sept 9)

Sept. 12. M. Painlevé formed a cabinet, in which Ribot became foreign minister. This proved to be merely a transition government, unable to stem the tide of war-weariness

Oct. 23. M. Barthou succeeded M. Ribot as foreign minister

Nov. 16. The Painlevé cabinet fell. Formation of the great **ministry of Georges Clemenceau,** in which the prime minister was also minister of war, while **M. Pichon** was given the foreign office Clemenceau's policy was one of victory *sans phrase* He set out at once to hunt down the preachers of disaffection (**Malvy, Humbert, Bolo Pasha, Caillaux**) and to organize the country for victory

b. AUSTRIA-HUNGARY

In **Austria-Hungary** the continuance of the war and the failure of the emperor's peace efforts resulted in much instability.

1917, May 23. The Hungarian ministry of Count Tisza resigned.

June 15-Aug. 9. Count Esterhazy's ministry in Hungary

Aug. 21-1918, Oct. 24. Count Wekerle's ministry in Hungary

1917, June 18 The cabinet of Count **Clam-Martinitz** in Austria resigned, being succeeded by a new government under **Dr. von Seidler**, which continued in office until June 21, 1918

1918, Apr. 15. Count Czernin, the Austrian foreign minister, was **replaced by Baron Burian**, who continued in office until Oct. 25, 1918.

c. GERMANY

In Germany the growing unrest led to certain important promises by the government

1917, Apr. 7. The Emperor William, as King of Prussia, in an **Easter Message** announced the end of the famous three-class system of voting in Prussia The introduction of a system of equal, direct, and secret suffrage was announced somewhat later (July 11)

July 14. The Chancellor, Theobald von Bethmann-Hollweg, having lost the support of the Conservatives, National Liberals, and Center and having long since become objectionable to the military men, **was allowed to retire.**

July 14-Oct. 30. Chancellorship of Dr George Michaelis, an almost unknown official who was the appointee of the high command and served chiefly as a cloak for the **power of Ludendorff,** who henceforth directed political as well as military affairs

July 19. Under the leadership of **Matthias Erzberger** and his Catholic Center Party, the **Reichstag passed a resolution** in favor of a peace of understanding, without annexations (212 Centrists, majority Socialists and National Liberals against 126 Conservatives, National Liberals and Independent Socialists) The new chancellor declared that his aims were attainable within the limits of the resolution as "he understood it" But the German government, like the Austrian, allowed Socialist delegates to attend the conference at Stockholm

Aug. 5. Richard von Kuhlmann succeeded Zimmermann as German secretary for foreign affairs

Oct. 30 Count Hertling replaced Michaelis as chancellor.

d. ITALY

In Italy the **Boselli cabinet resigned** at the height of the Caporetto disaster (Oct 25)

Oct. 29. A new Italian cabinet was formed by Orlando.

The peace offers of Austria, as transmitted through Prince Sixtus (see p 936), had failed, but they were followed almost at once by new efforts by **Pope Benedict.** After informal soundings in Berlin and in the Allied capitals

Aug. 1. The pope put forward outline proposals to serve as a basis for peace. These included disarmament, arbitration, freedom of the seas, renunciation of indemnities, evacuation and restoration of occupied territory, and conciliatory examination of conflicting claims as in Alsace-Lorraine, the Trentino, the Balkans, Poland, etc To these suggestions the Central Powers replied accepting the general principles, but evading a commitment with regard to territorial claims The Allied powers and the United States from the first took an unfriendly stand, insisting that the rulers of Germany were not to be trusted and that it would be impossible to negotiate until Germany had made a definite statement with regard to Belgium and Alsace-Lorraine The pope made repeated efforts to secure from Berlin a clear statement on these points. The German government, however, though ready to restore Belgium, was unready to make any concessions on Alsace-Lorraine and furthermore refused to publish any terms It is reasonably clear that at this time, when pacifist sentiment ran fairly high in all countries and extended even into governing circles, **the Alsace-Lorraine question** had become the great obstacle to negotiation Even the efforts of the Socialists, whose program was not so very different from that advanced by the pope, were unable to make any headway. **The Socialist Congress** which met at **Stockholm** (May 10–) and was enthusiastically supported by the Russian, German, Austrian, and Scandinavian groups, was frustrated by the absence of English, French, and American representatives, whose governments had refused them passports

28. THE SETTLEMENTS IN THE EAST, 1917-1918

While discussion of peace between the western powers led to an *impasse*, the winter of 1917–1918 produced a settlement in the east

1916, Nov. 5. The Germans, being in occupation of Poland, announced the formation of an **independent Polish state.** The object of this move, inspired by the military men, was to win over the Poles and induce them to enlist on the German side This hope was sadly disappointed

1917, Mar. 30. The Russian provisional government recognized the independence of Poland

Apr. 5. The British government adhered to the principle of an independent and united Poland

Sept. 12. The Central powers granted a constitution to what was formerly Russian Poland, and appointed a regency council (Oct 15).

Nov. 7. The Bolshevik Revolution in Russia (see p 1029). **Lenin** and his followers, who regarded the war as a capitalist and imperialist venture, were in favor of a peace without annexations or indemnities, and were determined to make peace, which the Russian people yearned for. The old Russian Empire, indeed, was already dissolving

Nov. 20. The Ukrainians proclaimed the **Ukrainian People's Republic.**

Nov. 21. The Bolshevik government, having invited all belligerents (Nov. 8) to make peace on the basis of no annexations and no indemnities, and having elicited no reply, opened separate discussions with the Central powers

Nov. 28. The local diet proclaimed the **independence of Estonia.**

Dec. 3. Opening of peace conference at Brest-Litovsk. Germany (Von Kühlmann), Austria (Czernin), and their allies negotiated an armistice with Russia (represented by **Trotsky**).

Dec. 6. Finland proclaimed its independence.

Dec. 23. Proclamation of the Moldavian (i e. Bessarabian) **Republic.**

Dec. 25. The Central Powers accepted the principle of no annexations and no indemnities on condition that the Allied Powers accept it within 10 days Trotsky's appeals brought no response and there was nothing to moderate the German demands (these were laid down by the German general staff, and were regarded as too extreme by Von Kuhlmann).

1918, Jan. 4. Beginning of the peace discussions at Brest, after a suspension of ten days. Trotsky refused to recognize the new Baltic states without a plebiscite, and much acrimonious discussion ensued

Jan. 12. Latvia declared its independence.

Feb. 1. The Central Powers recognized the independence of the Ukraine.

Feb. 9. TREATY OF PEACE between the Central Powers and the Ukraine signed at Brest-Litovsk.

Feb. 10. Trotsky declared the war ended, without peace having been made

Feb. 18. The Germans at once resumed hostilities. They took **Dvinsk** (Feb. 18), **Dorpat** (Feb. 24), **Reval** (Feb. 25), **Pskov** (Feb. 25), and **Narva** (Mar 4), advancing to within 100 miles of Petrograd.

Feb. 28. The Russians, at the insistence of Lenin, renewed negotiations at Brest

Mar. 2. At the request of the Finnish government the **Germans occupied the Aaland Islands.**

Mar. 3. The Russians signed the TREATY OF BREST-LITOVSK, abandoning Poland, Lithuania, the Ukraine, the Baltic provinces, Finland, and Transcaucasia

Mar. 3. In order to clear the Bolsheviks out of the Ukraine the Germans and Austrians sent an expeditionary force. They occupied **Kiev** (Mar. 3), **Odessa** (Mar. 13), **Nicolaiev** (Mar. 17), **Kharkov** (Apr. 8), and then invaded the Crimea, taking **Sevastopol** (May 1) The Ukraine henceforth became an important granary for the Central Powers, though the returns were never as great as anticipated Under German direction Gen. **Skoropadski was proclaimed Hetman of the Ukraine** (Apr. 29)

Apr. 3. German forces landed in Finland itself. They took **Helsingfors** (Apr. 13) and **Viborg** (Apr 30). After a five-day battle between Lahti and Tavastehus **the Whites,** supported by the Germans, **defeated the Reds** and the Finnish civil war came to an end (May 7)

June 4. The Lithuanian Assembly elected Duke William of Württemberg king.

Oct. 8. The Finnish Assembly proclaimed Prince Frederick Charles of Hesse king German troops remained in Finland until Dec 16, 1918

RUMANIA was likewise obliged to make peace in the winter of 1918

1917, Aug. 6-Sept 3. Battle of Putna. After the failure of the Brusilov offensive (see p 940) the Germans and Austrians began the **invasion of northern Moldavia.** Though it had been reorganized by the French general **Berthelot,** the Rumanian army was forced to fall back

Dec. 6. Truce of Focsani Hostilities between the Central Powers and Rumania ceased

1918, Feb 6. A German ultimatum demanded the opening of peace negotiations at once **Bratianu resigned** and was succeeded by **Averescu** as premier and foreign minister

Mar. 5. Preliminary peace between the Central Powers and Rumania

May 7 DEFINITIVE TREATY OF BUCHAREST. Rumania was obliged to cede **Dobrudja** to Bulgaria and to turn over the Carpathian passes to Austria-Hungary The Germans took a 90-year lease of the Rumanian oil-wells

Apr 9. The Moldavian Republic (Bessarabia) proclaimed its union with Rumania The Russian government protested against this (Apr 23), but the union was recognized by the Central Powers in the Treaty of Bucharest

29. OPERATIONS IN THE WEST, 1918

The tremendous gains made by the Germans in the east did not serve to improve the situation with respect to the western powers On the contrary, it was generally felt that the terms imposed on Russia and Rumania were irrefutable proof of Germany's expansionist aims. In the west the demands for peace died away and the governments were able to take a stronger line than ever

1918, Jan. 5. Lloyd George, in an address to the Trades Unions Congress, **formulated the British war aims.** These included the restoration of Belgium, Serbia, Montenegro, and the occupied parts of France, Italy, and Rumania In addition, a "reconsideration" of the great wrong done to France in 1871, the establishment of an independent Poland "comprising all those genuinely Polish elements who desire to form part of it"; genuine self-government of the nationalities in the Austro-Hungarian Monarchy, satisfaction of the Italian national claims, and of Rumanian aspirations, "recognition of the separate national conditions" of Arabia, Armenia, Mesopotamia, Syria, and Palestine Lloyd George envisaged further some future organization to limit armaments and prevent war

Jan. 8. in an address to Congress **President Wilson outlined** a peace program consisting of **Fourteen Points,** as follows (1) Open covenants openly arrived at (2) Absolute freedom of navigation alike in peace and war, except as the seas might be closed by international action to enforce international covenants (3) The removal, so far as possible, of all economic barriers (4) Adequate guaranties that armaments would be reduced to the lowest point consistent with domestic safety (5) An impartial adjustment of all colonial claims on the principle that the interests of the population must have equal weight with the claims of the government. (6) The evacuation of Russian territory and the free determination of her own political and national policy (7) Evacuation and restoration of Belgium (8) Evacuation and restoration of French territory and righting of the wrong done to France in the matter of Alsace-Lorraine (9) Readjustment of the frontiers of Italy along clearly recognizable lines of nationality (10) Opportunity for autonomous development for the peoples of Austria-Hungary (11) Evacuation and restoration of Rumanian, Serbian, and Montenegrin territory, together with access to the sea for Serbia. (12) The Turkish parts of the Ottoman Empire to be given a secure sovereignty, but the other nationalities to be given an opportunity for autonomous development, and the Dardanelles to be permanently opened to the ships of all nations under international guaranties (13) An independent Poland, to include territories indisputably Polish, with free and secure access to the sea (14) A general association of nations to be formed to afford mutual guaranties of political independence and territorial integrity to great and small states alike

The Allied war aims could be realized only through military victory, and prospects of this were not very good at a time when the Germans were able to transfer troops from the east to the west and when

the American forces were not yet numerous enough to make much difference. Some efforts had been made, however, to establish greater co-ordination of effort among the Allies, and after the Italian disaster at Caporetto

1917, Nov. 27. The Supreme War Council had been established, consisting of the leading statesmen, with their military advisers (first Sir Henry Wilson, Foch, Cadorna, and Bliss) Even this new board was unable to establish harmony The British and French were continually dickering about the extent of their respective fronts, the use of the reserves, etc

The Germans, now disillusioned about the submarine campaign, fully cognizant of the war-weariness of their allies, and feeling acutely the pinch of the blockade, decided to stake everything on a decision in the west, which it was hoped could be reached before the Americans arrived in great force **Ludendorff** planned a series of crushing blows to be delivered against the English on a 60-mile front south of Arras, by which he hoped to break through, roll up the opposing forces, and drive them westward to the sea

The British expected an attack, but not along the southern part of their front, so that the 5th army (Gen Gough) was left holding an extensive front with relatively few forces.

1918, Mar. 21-Apr. 5. THE GREAT MARCH OFFENSIVE. After cleverly concealed preparations, the Germans began with a bombardment of 6000 guns and a heavy gas attack They advanced from **St Quentin** in a heavy fog, which recurred for several days The British line broke and in a few days the Germans drove in the British line to a depth of about 40 miles, taking **Péronne, Ham, Bapaume, Chauny, Noyon,** and even **Montdidier.** The hasty and generous supply of reserves by the French helped to check the advance

Mar. 26. In the midst of the crisis a **conference at Doullens** named Gen **Foch** to co-ordinate operations on the west front.

Apr. 14. Foch named commander in chief of the Allied armies in France. In practice the national commanders (Haig, King Albert, Pershing) retained extensive control

Apr. 9-29. Battles of the Lys. The second great German blow, delivered south of Ypres on a short front. **The Germans stormed Messines Ridge** and took **Armentières,** opening up a wide breach in the British front Lack of reserves made it impossible for them to take full advantage of the situation

May 27-June 6. (THIRD) BATTLE OF THE AISNE Ludendorff, in order to draw the French reserves from Flanders preparatory to the main offensive there, arranged an attack upon the French between Soissons and Rheims, along the strong and therefore weakly held **Chemin des Dames** The French were taken by surprise and driven back 13 miles on the first. day The Germans took **Soissons** (May 29) and May 30 reached the Marne River, only 37 miles from Paris The new salient was 40 miles deep.

June 9-14. Battle of the Matz. Ludendorff, astounded at his own success in Champagne, gave up the idea of an offensive in Flanders and undertook to join up the Soissons and Noyon salients by an attack toward Compiègne The Germans advanced about six miles, but the move had been hastily prepared and the French were able to meet it

June 4. The American forces at Château-Thierry The 2d division, collaborating with the French, managed to break the German advance In this engagement the Americans first played a substantial rôle

July 15-Aug. 7. (SECOND) BATTLE OF THE MARNE. Ludendorff threw his weary troops into yet another attack west and east of Rheims East of Rheims no progress was made, and west of the city, though the **Germans crossed the Marne,** they made but little progress against strong French and American forces. **July 18 Foch ordered a counter-attack,** in which nine American divisions took part The Germans were forced back over the Marne to the Vesle River, while the French retook **Soissons** (Aug 2). The Allied counter-offensive was of importance chiefly because it frustrated Ludendorff's plan for a great attack in Flanders, and because it enabled Foch to take the initiative in the months to come.

30. THE ACTION AT ZEEBRUGGE AND OSTEND

Naval operations during the years 1917–1918 were confined largely to submarine and destroyer activities **The Germans** repeatedly **raided the English coast** (Apr 20, 26, 1917, Jan 14, Feb 15, 1918) and **attacked British convoys** in the North Sea (Oct 17, Dec 12, 1917) But there were no larger engagements, excepting for a British **light cruiser attack off Heligoland,** which was beaten back (Nov. 17, 1917).

In order to meet the constant menace from the submarine, Adm Keyes of the Dover Patrol had long urged an operation against the submarine bases, Zeebrugge and Ostend, on the Belgian coast

1918, Apr. 23. After months of careful preparation an **attack was made on the mole at Zeebrugge** while three old cruisers were run in and sunk in the canal entrance A similar operation at Ostend was unsuccessful, and even at Zeebrugge the blocking was not complete

Oct. 17-20. The British, in their advance, took Zeebrugge, Ostend, and the other Channel ports

Nov. 21. Following the armistice **the German High Seas Fleet surrendered to the British at Rosyth.**

1919, June 21. The German fleet (10 battleships, 9 armored cruisers, 8 smaller cruisers, 50 torpedo boats, 102 submarines, totaling about 500,000 tons) **was scuttled** by the crews under command of Adm Reuter, **at Scapa Flow,** where the fleet had been interned.

31. THE WAR IN THE AIR, 1914-1918

Although only France had done much before the war to develop the military use of the airplane, throughout the war the British and the Germans were the main antagonists

1914, Aug. 30. The first German airplane raid on Paris.

Sept. 22, Oct. 8, Nov. 21. British airplanes raided the German flying-fields at **Düsseldorf, Cologne,** and **Friedrichshafen.**

Dec. 21. The first German air raid on England (Dover)

On the western front, and on other fronts to a less extent, the airplane was used for reconnaissance, but almost immediately (Sept. 1914) experiments were made by the British in wireless communication between airplanes and artillery, in aerial photography, and in bomb-dropping There was not much aerial combat until the middle of 1915.

1915, Oct. The Germans began the use of the **Fokker** plane, equipped with a device allowing the pilot to shoot through the propeller This plane was so superior that, for the better part of a year, **it gave the Germans mastery of the air,** though the British, with a greater number of planes, kept carrying the fight over the German lines. Great German fighters of this period were **Oswald Boelcke** (d Oct 28, 1916) and **Max Immelmann** (d. June 1916)

1916, April. Battle of Verdun, including heavy air fighting between Germans and French. The French, with the **Nieuport 3** and the **Spad 3,** succeeded in securing mastery of the air. Great French fighters were **René Fonck** and **Georges Guynemer** (d Sept. 1917)

July. Battle of the Somme. The British, with the new **De Havilland** and **Farman Experimental** planes, definitely put an **end to German Fokker supremacy.** Great British fighters **Albert Ball** (d May 7, 1917), **J. T. B. McCudden** (d. July, 1918), **W. A. Bishop,** and **Edward Mannock** (d July, 1918)

Sept. The Germans introduced the **Albatross and Halberstadt planes** and developed formation flying This re-established something like a balance on the British front, though the British had a distinct superiority in numbers and continued to take the offensive

1917. The British began to use the **Scouting Experimental** and **Bristol Fighter.** This period was marked by the spectacular achievements of **Manfred von Richthofen** (d Apr 21, 1918) and by the development of ever larger formations and more intricate tactics

1918. The Allied superiority became more marked, and American air squadrons began to take part (Apr) The British did much in the development of large-scale bombardment, especially of munitions centers At sea much use was made of the airplane for scouting and for submarine-chasing.

During these years the Germans continued their raids on England, first with **Zeppelins,** then with airplanes, with the object of drawing back British air forces from France, of interrupting industry, and of demoralizing the civil population

1915, Jan. 19 First German airship raid on England

Oct. 13 The worst of the **Zeppelin raids** on eastern England and London There were 19 such raids in 1915 and 41 air raids in 1916 On Sept 2, 1916, London was raided by 14 Zeppelins at once But by the end of 1916 the British had elaborated a fairly good defense against airships (fighting plane, anti-aircraft guns, searchlights, sirens, etc) The Germans used 80 Zeppelins in the course of the war, of which only 7 remained at the time of the armistice

1916, Nov. 28. First German airplane raid on London There were a great many of these in the course of 1917–1918, first by daylight, then by night. There was a considerable loss of life and property, but the raids do not appear to have achieved any marked results

32. THE RUSSIAN SITUATION, 1918

The **Treaty of Brest-Litovsk** put the Russian régime at the mercy of the Germans and plans were at once evolved by the Allies for reconstituting the eastern front in order to prevent the transfer of German forces to the west

1918, May 24. General Poole arrived at **Murmansk** to arrange for an expeditionary force, which landed June 23 The British were joined later by American contingents (Sept 4) and other Allied forces They seized part of the railway from Murmansk (opened for service Dec 8, 1916), and, after a pro-Entente revolution at **Archangel,** took over that port (Aug 1–2) As a result a practical state of war existed between the Allied governments and the Russian Bolshevik government

May 26. About 100,000 **Czech troops,** many of whom had deserted from the Austrian armies to the Russians, began hostilities against the Bolsheviks, while being transported across Siberia to Vladivostok. They seized **Samara, Simbirsk,** and **Kazan** on the Volga, and in eastern Siberia they took **Omsk, Irkutsk,** and other points on the Trans-Siberian Railway Aug. 13 they declared war on Germany and were recognized as a nation by the British (Aug 13) and the Americans (Sept 3)

July 26. The Japanese government accepted an American proposal for **joint action in Siberia** in support of the Czechs

Aug. 3. A British force was landed at Vladivostok, followed by a Japanese force (Aug 11) and later by Americans and French

Sept. 5. Japanese forces took **Khabarovsk.**

Oct. 14. British forces reached **Irkutsk.** Contact established with the Czechs, who controlled the railway in western Siberia.

Nov. 18. A counter-revolutionary coup led by Adm **Kolchak** overthrew the All-Russian (anti-Bolshevik, but liberal) government at Omsk **Kolchak became Dictator of All Russia,** controlling much of Siberia and part of eastern Russia

In the **TRANSCAUCASIAN REGION** there ensued a similar conflict between the Russians, Germans, and Turks on the one hand and the British on the other.

1917, Sept. 20 Proclamation of the **Transcaucasian Republic.**

1918, Jan. 27. Gen **Dunsterville** with a British force set out from Baghdad for the Caspian to assure the British position in the oil regions of western Persia He reached **Enzeli** (Feb 17) The British took **Kirmanshah** (Feb 25)

Feb. 24. The Turks began an advance into Armenia. They took **Trebizond** (Feb. 24) and **Erzerum** (Mar 12), then **Van** (Apr 5), **Batum** (Apr. 15), and **Kars** (Apr. 27)

May 26. Georgia, Azerbaijan, and Armenia declared their independence.

June 8. Georgia and Armenia concluded a peace with Germany and Turkey.

June 12. A German force having been landed at Poti, the Germans advanced and **took Tiflis** (June 12). The Turks meanwhile advanced and took **Tabriz** (June 14).

July 26. The Bolshevik government at Baku was overthrown, after which a British force occupied the city (Aug 4)

Aug. 26-Sept. 14. The British defended Baku against vigorous Turkish attacks, but were finally obliged to abandon the city to the Turks.

Nov. 17. After the armistice, the **British reoccupied Baku** and then the whole of Georgia, including Batum (Dec. 27) After the surrender of the Turkish army the **British also occupied Mosul** (Nov 4).

33. THE COLLAPSE OF TURKEY

On the Palestine front the new British commander, Gen **Allenby**, had begun his advance in Oct 1917

1917, Oct. 31. After a month of heavy fighting between Gaza and Beersheba, the British took the latter town and began rolling up the enemy line, thus forcing the **evacuation of Gaza** (Nov. 7) and **Jaffa** (Nov 16)

Dec. 8 ALLENBY TOOK JERUSALEM. The British advance was delayed by the fact that Allenby was obliged to send large contingents to France to meet the crisis of Mar 1918 The operations of the spring of 1918 were confined to Trans-Jordania In the interval the Turks devoted themselves more and more to the Transcaucasian situation, neglecting the Palestine front

1918, Sept. 18. Beginning of the great British offensive in Palestine **Battles of Megiddo.** The British broke the Turkish lines near the Mediterranean and began to roll up the enemy forces, which were surrounded by cavalry. The German corps managed to escape into Trans-Jordania, and thence to Damascus and Aleppo. The British, assisted materially by the Arabs under Lawrence, were now able to push northward.

Oct. 1-2 British and Arabs took Damascus, then Beirut (taken by French naval forces, Oct. 7), **Homs** (Oct. 15), **Aleppo** (Oct. 26)

Oct. 13. The new Turkish sultan, **Mohammed VI** (succeeded Mohammed V July 3, 1918), **dismissed his Young Turk ministers** (Talaat and Enver) and appointed **Izzet Pasha as grand vizier.** The Turks then (Oct. 14) appealed to President Wilson to arrange an armistice Having received no reply, they liberated **Gen. Townshend** and sent him to the British naval commander in the Aegean, **Adm. Calthorpe.**

Oct. 30. ARMISTICE CONCLUDED AT MUDROS to take effect the next day. The Turks were obliged to open the Straits, repatriate Allied prisoners, demobilize their armies, sever relations with the Central Powers, and place Turkish territory at the disposal of the Allies for military operations

Nov. 12. The Allied fleet passed the Dardanelles and arrived at Constantinople (Nov 13).

34. THE COLLAPSE OF BULGARIA

The Bulgarian front was really the first to break down. Under **Gen. Guillaumat** (succeeded Sarrail Dec. 22, 1917) the forces at Saloniki had been reorganized and greatly strengthened. Guillaumat, having been recalled to France in June 1918, did much to convince the English and French authorities of the desirability of a great attack in the Balkans There were then 29 divisions (over 700,000 men) available at Saloniki, with **Gen. Franchet d'Esperey** in command.

1918, Sept. 15-24. Battles of Dobropolje or Monastir-Doiran. The Allies (Italians on the left, Serbs in the center, French, English, and Greeks on the right) began a great offensive all the way from Albania to the Struma River. The Serbs advanced almost 40 miles in a week and threatened to drive a wedge into the German-Bulgarian forces. On the right the British were less successful, but the Bulgarians, who had been taking soundings for peace since June (June 18, Germanophil Radoslavov cabinet succeeded by **Malinov government**), were unable to hold out longer. They appealed for an armistice.

Sept. 30. ARMISTICE CONCLUDED WITH BULGARIA AT SALONIKI: The Bulgarian army was to be demobilized at once and its equipment put into Allied custody; Greek and Serb territory still occupied was to be evacuated, all means of transport to be put at the disposal of the Allies; Bulgarian territory to be available for Allied operations.

Gen. Franchey d'Esperey's plan was to take advantage of the situation not only to break the communication between Germany-Austria and Turkey, but to attack the Turks in Thrace and force the opening of the Straits. A force was indeed sent into Thrace, and reached the **Maritza River** (Oct. 30). Other forces took over strategic positions in Bulgaria, crossed the whole country, and effected the **passage of the Danube** at Rustchuk (Nov. 10).

Oct. 4. Tsar Ferdinand of Bulgaria abdicated and was succeeded by his son Boris

Nov. 10. The Allies having entered **Rumania,** that government now **reentered the war** on the Allied side (Nov. 8, resignation of the **Marghiloman ministry**

and formation of a new government under Gen **Coanda**).

In the center **the Serbs** continued their advance after the armistice They took **Vranje** (Oct 5), **Nish** (Oct 11), and finally **Belgrade** (Nov 1) Having crossed the Danube they continued the advance into the **Banat of Temesvar**, which was occupied by the end of November

On the extreme left the **Italians** carried through the **conquest of Albania**, over which they had proclaimed a protectorate as early as June 3, 1917. They took **Elbasan** (Oct. 7), **Durazzo, Ipek**, and **Novi Bazar** (Oct 14), **San Giovanni** (Oct 29), **Scutari** (Oct. 31), and **Antivari** (Nov. 4)

35. THE END OF THE HAPSBURG MONARCHY

By the summer of 1918 the **Hapsburg Monarchy** was already in full process of dissolution. Disorders were common in the larger centers, parliamentary government had had to be given up, and desertions from the army had reached a large scale. In Russia, in France, and in Italy there had been formed Czech, Polish, and Yugoslav legions which were fighting for the Allies, while national councils of these subject nationalities were springing up not only in the provincial capitals, but in Paris and London

1918, Apr. 10. Meeting of the Congress of Oppressed Austrian Nationalities in Rome. Here the Czech, Yugoslav, Polish, and Rumanian representatives proclaimed the right of self-determination, denounced the Hapsburg government as an obstacle to free development of the nations, and recognized the need for fighting against it

Apr. 21. The Italian government recognized the Czechoslovak National Council as a *de facto* government

May 29. Secretary **Lansing** declared the sympathy of the United States for the Czechoslovaks and Yugoslavs

June 3. Allied declarations were made supporting the national aspirations of Poles, Czechoslovaks, and Yugoslavs.

June 30. Italy and France officially recognized the **independence of Czechoslovakia.** Britain followed suit Aug 13, and the United States Sept. 3.

In view of the rapid disintegration of the monarchy the Austrians made a last bid for military victory.

June 15-24. Battle of the Piave. The Austrians crossed the river, but were unable to maintain their position. They withdrew again after losing some 100,000 men. From this time on there was steady demoralization of the army.

Sept. 15. The Austrian government appealed to President Wilson to call an informal conference to discuss peace. This plea was rejected by Wilson.

Oct. 4. The Austrians joined the Germans in appealing for an armistice (see p 951)

Oct. 16. The Emperor Charles proclaimed the reorganization of the non-Hungarian part of **the monarchy as a federal state,** with complete self-government for the subject nationalities. This move was patently belated

Oct. 21. THE CZECHOSLOVAKS DECLARED THEIR INDEPENDENCE.

Oct. 24-Nov. 4. BATTLE OF VITTORIO VENETO. Gen. Diaz, after much prodding from the Allies, attacked the Austrian front all the way from the Trentino to the Adriatic. The Austrians held out for a week on the Monte Grappa, the key position in the center, but on the lower Piave they collapsed completely. The Italians advanced to **Vittorio Veneto** (Oct. 30), by which time the Austrian armies were in a state of dissolution, several hundred thousand being captured and the remainder streaming back toward home. The **Italians took Trieste** (Nov 3) and **Fiume** (November 5)

Oct. 27. Count Julius Andrassy (succeeded Burian as Austrian foreign minister, Oct. 25) notified Wilson that Austria was willing to recognize the rights of the subject nationalities and to make a separate peace

Oct. 29. THE YUGOSLAV NATIONAL COUNCIL at Agram (Zagreb) **proclaimed the independence of the Yugoslavs.**

Oct. 29. The Austrians offered to surrender unconditionally to the Italians.

Meanwhile disorders in both Vienna and Budapest had resulted in revolutionary changes

Oct. 30. Formation of a **German National Council in Vienna,** for the German provinces.

Nov. 1. Establishment of an independent Hungarian government, under Count Michael Karolyi.

Nov. 3. CONCLUSION OF AN ARMISTICE between the Allied Powers and Austria-Hungary complete demobilization of the armies and withdrawal of troops fighting with the Germans, surrender of half the equipment, evacuation of territories still occupied and of territory in dispute between Austrians, Italians, and Slavs, Allied occupation of strategic points, surrender of the fleet, etc

Nov. 7. A Yugoslav conference at Geneva decided for the union of Croatia and Slovenia with Serbia and Montenegro

Nov. 12. Abdication of the Emperor Charles.

Nov. 13. PROCLAMATION OF THE AUSTRIAN REPUBLIC.

Nov. 16. PROCLAMATION OF THE HUNGARIAN REPUBLIC.

Nov. 24. PROCLAMATION OF THE UNITED KINGDOM OF THE SERBS, CROATS, AND SLOVENES at Zagreb. King Peter of Serbia became king, with Prince Alexander as regent

Dec. 1. King Nicholas of Montenegro having opposed union was declared deposed by the parliament, which then voted for union with the new kingdom.

Dec. 1. A national assembly of the Rumanians of **Transylvania** and the Banat at Alba Julia voted for union of these regions with **Rumania.**

36. THE ALLIED VICTORY IN THE WEST

After the second battle of the Marne the Allied forces, together with the Americans, gradually went over to a sustained offensive, consisting at first of a series of local attacks, but later merging into a general movement

1918, Aug. 8-11. Battle of Amiens. The British, after careful and well-concealed preparation, attacked with 450 tanks They advanced about eight miles the first day, after which the German lines tightened

Aug. 21-Sept. 3. Second battles of the Somme and of Arras. The British and French gradually extended their attacks They took **Roye** (Aug 27), **Bapaume** (Aug. 28), **Noyon** (Aug. 28), and **Péronne** (Aug. 31), and obliged the Germans to fall back to the Hindenburg Line

Sept. 12-13. The American forces, attacking on both sides of the **St. Mihiel** salient, pinched out that area, capturing some 15,000 of the enemy

Sept. 26-Oct. 15. BATTLES OF THE ARGONNE AND OF YPRES (Sept 28–Oct 2) Foch's plan was to execute a pincer movement with an American thrust north through the Argonne and a British thrust eastward toward Cambrai and farther north toward Lille If successful this would have cut the main lateral German railway and forced a general withdrawal But at both ends the advance was much slower than expected By mid-October the Americans had got through part of the Argonne, while the British had taken **St. Quentin, Lens,** and **Armentières** (Oct. 1–2).

These blows, together with the news of the surrender of Bulgaria, shook the nerve of Gen Ludendorff, who, in something of a panic, demanded (Sept 29) that the government initiate armistice and peace negotiations while the army could still hold out.

Sept. 30. Hertling and his fellow ministers resigned.

Oct. 4. Prince Max of Baden, a Liberal, named chancellor and foreign minister, with support of the Center, Progressive, and Socialist Parties On the same day **the German and Austrian governments appealed to President Wilson for an armistice,** accepting the **Fourteen Points** (see p 944) as a basis for peace There followed an exchange of notes between Berlin and Washington that extended over several weeks, Wilson demanding evacuation of occupied territories, insisting that the Allies could negotiate only with a democratic government, etc In the interval Ludendorff regained some of his composure and began to talk of resistance, renewal of the war in the spring, etc The home situation, however, was bad and the democratic tide strong The government (Oct 27) accepted **Ludendorff's resignation.** He was succeeded as quartermaster-general by **Gen. von Groner.**

During Oct the British continued to advance in the north. They took **Ostend, Zeebrugge, Roubaix, Lille,** and **Douai** (Oct 18), **Bruges** (Oct 19) and **Valenciennes** (Nov. 1) By that time the American troops also resumed the advance. The Germans began to withdraw rapidly, and by Nov 10 the Americans were at **Sedan.** Foch was then planning still another thrust east of Metz, and arranging for the mis-

sion of a force through Austria to attack Bavaria

Nov. 3. Mutiny broke out **in the German fleet** at Kiel, the crews refusing to put to sea on a series of cruiser raids planned by Adm Scheer The mutiny spread rapidly to Hamburg, Bremen, and Lubeck and thence to the whole of northwestern Germany

Nov. 7-8. Revolution broke out in Munich. The king abdicated In Berlin, too, the pressure was great and the ministry convinced itself that the abdication of William II was imperative if the monarchy was to be preserved The emperor, who was at Spa, resisted the suggestion, but Prince Max, feeling that he was unable to wait,

Nov. 9 ANNOUNCED THE ABDICATION IN BERLIN. Scheidemann, the Socialist leader, then **proclaimed the German Republic.**

Nov. 10. William II, having been told by Hindenburg and Groner that they were unable to guarantee the loyalty of the army, took their advice and **fled to Holland.** Meanwhile

Nov. 8. The German armistice commission, headed by **Mathias Erzberger,** the leader of the Center Party, was received by Foch in his railway coach near Compiègne The terms submitted by the Allies were designed to make Germany helpless and to make certain the acceptance of the peace terms to be worked out The armistice provided for the immediate evacuation of occupied territory on the west front and of all territory west of the Rhine, which was to be occupied by Allied forces. The **treaties of Brest-Litovsk** and **Bucharest** were to be renounced and German troops were to be withdrawn from Rumania, Austria-Hungary, Turkey, and eventually Russia Germany was to surrender 5000 locomotives, 5000 motor lorries, and 150,000 freight cars She was to turn over 160 submarines and a large number of other warships The armistice, harsh though the terms were, had to be accepted. It was concluded for a period of 30 days, but was periodically renewed until peace was signed

Nov. 11. AT 11 A.M. HOSTILITIES CEASED ON THE WEST FRONT The Allies at once began to take over the occupied and western German territories The last German troops crossed the frontier of France Nov. 18 and the frontier of Belgium Nov. 26. French troops occupied Strassburg Nov 25, while British and American troops began the occupation of Germany Dec. 1.

WORLD WAR LOSSES

The number of known dead has been placed at about 10,000,000 men, the wounded at about 20,000,000, distributed among the chief combatants as follows (round numbers):

	Dead	Wounded	Prisoner
Great Britain ...	947,000	2,122,000	192,000
France	1,385,000	3,044,000	446,000
Russia	1,700,000	4,950,000	2,500,000
Italy	460,000	947,000	530,000
United States ...	115,000	206,000	4,500
Germany .	1,808,000	4,247,000	618,000
Austria-Hungary	1,200,000	3,620,000	2,200,000
Turkey ..	325,000	400,000	

The total direct cost of the war has been figured at $180,500,000,000, and the indirect cost at $151,612,500,000

37. THE PEACE SETTLEMENTS

a. THE TREATY OF VERSAILLES

1919, Jan. 18. The Peace Conference was formally opened at Paris, with 70 delegates representing 27 of the victorious powers The Germans were excluded until the terms were ready for submission The German request for a peace on the basis of Wilson's **Fourteen Points** had been granted by the Allied Note of Nov. 5, 1918, with two reservations, but the Fourteen Points receded into the background as the conflict of views and interests developed at the conference **President Wilson,** received with the wildest enthusiasm when he arrived in Europe in mid-December, represented the new idealism in international relations and was intent primarily on securing the adoption of a plan for a **League of Nations,** to be included in the peace treaty **Lloyd George,** the chief representative of Great Britain and the empire, was more or less disposed to make a moderate peace, but was deeply committed by promises made in the general election recently held, to the effect that the war criminals would be brought to justice and that Germany would be made to pay for the war **Clemenceau,** in turn, was frankly the exponent of the old diplomacy, being intent on revenge, on the interests of France, and on provisions for the security of France. Both England and France were bound further by their agreements with Italy, by commitments in the

Near East, etc. The Italian prime minister, **Orlando,** played a secondary rôle, but the foreign minister, **Sonnino,** stood forth as an unbending champion of Italian claims against Austria and against the new Yugoslav state

The plenary sessions of the conference were of little significance, for the decisions rested from the start with the **Supreme Council,** the **Big Ten,** composed of President Wilson and the prime ministers and foreign ministers of the five chief powers (Wilson, Lansing, Lloyd George, Balfour, Clemenceau, Pichon, Orlando, Sonnino, Saionji, Makino). Russia was not represented, though the **Russian situation** was of vital import The wars of the counter-revolution were in full swing and the fate of the new states on Russia's western frontiers depended on the outcome Clemenceau having refused to invite delegates of the warring parties to Paris, a conference was arranged for at the Prinkipo Islands The Bolshevik government was apparently anxious for some kind of adjustment, but **Kolchak** and **Denikin,** the two leading figures of the counter-revolution, refused to enter upon discussion and the whole project fell flat Public opinion in both France and England was violently anti-Bolshevik and it seems hardly likely that an agreement could have been reached

Jan. 25. The conference unanimously adopted a resolution for the **creation of a League of Nations.** A committee was appointed to draft a constitution, and other committees were organized to deal with reparations and various territorial questions

Feb. In the middle of the month **President Wilson returned** for a time **to America** and **Lloyd George** to London

Mar. 25. After the return of Wilson and Lloyd George, the statesmen devoted themselves to the working out of the German treaty. The Council of Ten was replaced by the **Council of Four,** for the expedition of business.

Apr. 28. The **Covenant of the League of Nations** (worked out by a committee consisting of Wilson, House, Cecil, Smuts, Bourgeois, and Venizelos) was presented in final form. The League was to consist of the signatory states and others admitted by two-thirds vote The members were to afford each other mutual protection against aggression, to submit disputes to arbitration or inquiry, to abstain from war until three months after an award All treaties between members which were incompatible with these obligations were declared abrogated, all subsequent treaties were to be registered with the League The League was to devote itself to problems of disarmament, labor legislation, health problems, international administration, etc. A permanent secretariat was provided for, to be located at Geneva (**Sir Eric Drummond,** first secretary-general) All member states were to be represented by one vote in a **General Assembly,** while a **Council,** consisting of representatives of the five great powers and four others chosen by the Assembly, was to fill the position of executive (Belgium, Brazil, Greece, and Spain were first chosen for the Council). The League, the covenant of which was an integral part of the peace treaty, came into effect in Jan 1920

The drafting of the peace terms was marked by violent conflict between the members of the Council of Four Clemenceau insisted on the separation of the **left bank of the Rhine** from Germany, and desired also the annexation of the **Saar Basin** to France These demands were opposed by Wilson and Lloyd George, and French security was finally arranged for otherwise, Wilson having ordered preparations for his return home (Apr 7). Other serious disputes arose from the demands of England and France that Germany should be required to meet the **costs of the war,** a proposition to which Wilson objected The **Polish claims,** supported by France, also caused friction, as did the **Japanese pretensions** in Shantung and the **Italian claims** in Dalmatia, neither of which Wilson was prepared to recognize All these questions were finally settled by compromise in order to keep the conference together (the Italian delegates left the conference Apr 23 and did not return until May 6)

May 7. The treaty was submitted to the German delegation, which had arrived Apr 29 The Germans (**Count Brockdorff-Rantzau,** chief of the delegation) protested vigorously that the terms were not in keeping with the conditions on which Germany had laid down her arms and that many of the clauses were impossible of fulfillment. Nevertheless the victorious powers made only slight modifications in the draft and the Germans, after an acute domestic crisis, decided that they would be unable to resist and that their only possible course was to sign.

June 28. SIGNATURE OF THE TREATY OF VERSAILLES in the Hall of Mirrors at Versailles The treaty provided for the **League of Nations** and for the following territorial cessions by Germany: **Alsace-Lorraine** to France, **Moresnet, Eupen,** and **Malmédy** to Belgium, with a plebiscite in Malmédy after cession, **the**

Saar area to be under international administration for 15 years, after which a plebiscite was to be held, France exploiting the coal mines in the meanwhile, northern and central **Schleswig** were to decide their allegiance by plebiscite, in the east, Germany was to cede the larger part of **Posen** and **West Prussia** to Poland, a plebiscite was to be held in **Upper Silesia; Danzig** was to be a free state within the Polish customs union, plebiscites were to be held in parts of **East Prussia** to decide whether they should go to Poland or remain with Germany, **Memel** was ceded to the Allies, the **German colonies** were also ceded to the Allies, to be organized as mandates under supervision of the League Germany, in **Art. 231,** accepted sole responsibility for causing the war She was henceforth to keep an **army of not more than 100,000 men,** was to have no large guns and only a limited number of smaller ones **The navy** was limited to six warships and a corresponding number of other craft, Germany was to have **no submarines or military aircraft;** the fortifications of **Heligoland** were to be dismantled, the Allies were to occupy the **Rhineland** for 15 years, and longer if necessary, and a belt 30 miles wide on the **right bank of the Rhine** was to be **demilitarized.** The **Kiel Canal** was opened to the warships and merchant shipping of all nations, and the **German rivers** were internationalized The former **emperor** and other offenders were to be tried The Germans were required to pay for all **civilian damage** caused during the war, the final bill to be presented by May 1, 1921, in the interval Germany was to pay five billion dollars, the rest to be paid in 30 years Germany was to hand over all **merchant ships** of more than 1600 tons, half of those between 800 and 1600 tons and a quarter of her **fishing fleet.** She was to build 200,000 tons of shipping for the victors annually for five years Large quantities of **coal** were to be delivered to France, Belgium, and Italy for ten years Germany was to bear the **cost of the armies of occupation** She bound herself further to agree to the sale of German property in Allied countries

July 7. The German government ratified the treaty, as did France (Oct. 13), Great Britain (Oct 15), Italy (Oct. 15), and Japan (Oct 30) The United States government never ratified it, the Senate having first proposed amendments, which failed of the necessary votes The United States government also refused to ratify the **treaty of alliance signed with England and France** (June 28) providing for assistance in case of attack by Germany. This treaty thus also failed of effect.

b. THE TREATY OF ST. GERMAIN

1919, Sept. 10. Austria signed the treaty which had been submitted July 20. This treaty merely registered the break-up of the Hapsburg Monarchy, at the same time penalizing the new Austrian Republic as the representative of the old régime Austria recognized the **independence of Czechoslovakia, Yugoslavia, Poland, and Hungary,** these states being obliged to give guaranties of protection of minorities **Eastern Galicia,** the **Trentino, South Tyrol, Trieste,** and **Istria** were ceded by Austria **The army** was limited to 30,000 men and Austria, like Germany, was to pay **reparations** for 30 years **The union of Austria with Germany** was forbidden, except with consent of the Council of the League

c. THE TREATY OF NEUILLY

1919, Nov. 27. The Bulgarians signed the treaty of peace, which deprived them of a seaboard on the Aegean and gave them only an economic outlet Bulgaria recognized the **independence of Yugoslavia.** She agreed to pay **reparations** of $445,000,000. Her **army** was reduced to 20,000 men, and she was obliged to surrender most of her war materials

d. THE TREATY OF TRIANON

1919, Mar. 22. The republican government headed by **Count Karolyi** was overthrown by a **Bolshevik coup,** headed by Alexander Garbai and **Bela Kun.** This government became involved in war with most of Hungary's neighbors when it became known that territory was to be assigned to them Ultimately the **Rumanians invaded and took Budapest** (Aug 4) just after the Bolsheviks had been overthrown (Aug 1). The monarchists then regained control and appointed **Adm. Horthy as regent** (Feb. 1920) The Rumanians were finally induced to withdraw (Dec. 10, 1919), under pressure from the Allies, but only after they had carried away most of what was movable

1920, June 4. The Hungarians signed the Treaty of Trianon, by which the old Hungary was shorn of almost three-quarters of its territory and two-thirds of its inhabitants Czechoslovakia was given **Slovakia,** Austria received **western Hungary,** Yugoslavia took **Croatia-Slavonia** and part of the **Banat of Temesvar,** and Rumania received the rest of the **Banat,**

Transylvania, and part of the **Hungarian plain.** Hungary agreed to pay **reparations,** to keep an **army** of only 35,000 men, to assume part of the old Austro-Hungarian debt, to hand over war criminals, etc

e. THE TREATY OF SÈVRES

In the settlement of the Turkish question the Allies were much hampered by the downfall of the tsarist régime in Russia, the withdrawal of Russian claims to Constantinople, and the publication by the Bolsheviks of the secret treaties revealing the Allied plan of partition President Wilson in particular opposed the former program, while American opinion showed little interest in assuming responsibility for either the Straits area or Armenia The question dragged on through 1919, while in Turkey a nationalist movement under **Mustapha Kemal** (see p 1094) was building up a strong opposition to the Allied plans

1919, May 15. The Greeks, with the support of the Allies, **landed troops at Smyrna,** acting as agents for Allied interests The Italians also landed troops in southwestern Anatolia

1920, Apr. 18. At a **conference** of the Allied prime ministers **at San Remo** the main lines of the Turkish treaty were agreed upon.

Aug. 20. The feeble and helpless government of the sultan, protected by an international force of occupation at Constantinople, signed the **Treaty of Sèvres.** By this treaty the sultan's government renounced all claims to non-Turkish territory **The Kingdom of the Hijaz was recognized as independent.** Syria became a mandate of France, and **Mesopotamia** (with Mosul), as well as **Palestine,** became British mandates **Smyrna** and its hinterland were to be administered by Greece for five years, after which a plebiscite was to be held The **Dodecanese** and **Rhodes** went to Italy, while **Thrace** and the remainder of the **Turkish islands** in the Aegean were assigned to Greece **Armenia** was recognized as independent The **Straits** were to be internationalized and the adjoining territory demilitarized **Constantinople** and the strip of territory to the Chatalja lines remained Turkish, as did the remainder of **Anatolia.** This treaty was not recognized by the Turkish nationalists who, under Mustapha Kemal's leadership, continued to build up a military force in Anatolia and to organize a government in defiance of the sultan and the victorious allied powers As a result of nationalist successes the Treaty of Sèvres was ultimately replaced by the Treaty of Lausanne (p 1095).

B. EUROPE

1. INTERNATIONAL AFFAIRS

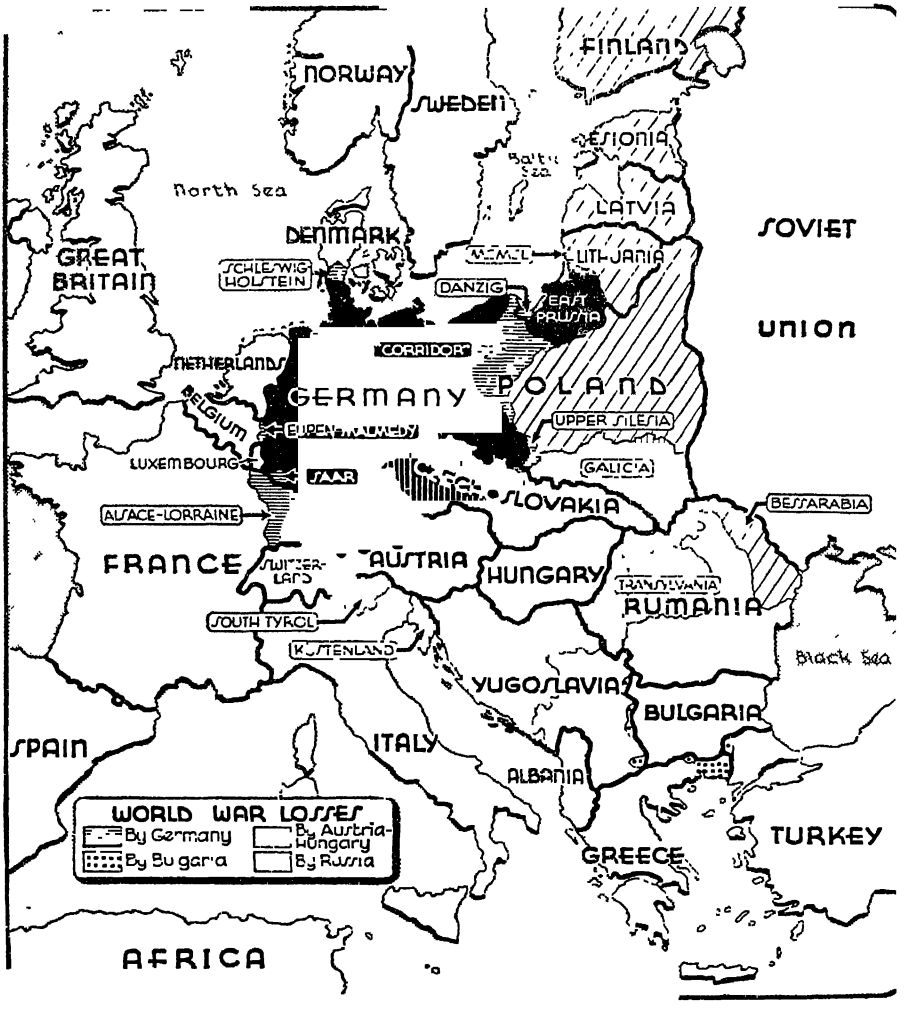
International affairs since the First World War have involved the following **major problems:** (1) The attempt to establish collective security by means of new international bodies, the League of Nations, and the World Court, without creating any form of superstate, (2) the unwillingness of the non-European powers, the United States, Japan, and the British Dominions in particular, to assume responsibility for anything outside their respective spheres of interest, (3) the efforts of Japan to dominate the Far East by force and of the United States to dominate the Americas by a "good neighbor policy", (4) the struggle between French efforts to maintain the position of leadership on the continent of Europe established by the peace settlements and German endeavors to evade or revise the terms imposed in 1919, (5) the problem of restoring world trade and general prosperity in a war-impoverished world, (6) the attempts to attain security and prosperity by neo-mercantilist ideas imposed dictatorially as emergency measures

The era between the wars may be divided chronologically into three phases: (1) The period of settlement (from the peace treaties to the Dawes Plan, 1924), (2) the period of fulfillment (1924 to the evacuation of the Rhineland, 1930), (3) the period of repudiation and revision (1930-1939)

a. THE PERIOD OF SETTLEMENT

1919, June 28. Conclusion of defensive treaties between France, England, and the United States. England and the United States were to come to France's assistance in case of aggression by Germany The United States Senate refused to ratify this agreement and also rejected the Versailles Treaty (Nov 19), thus knocking out one of the keystones in the international peace structure established at Paris

1919-1922. The Vilna dispute, between Poland and Lithuania Gen **Pilsudski** took the town from the Bolsheviks (Apr 19, 1919) The **Curzon line** (Dec 8) established a boundary depriving Poland of the city, which was retaken by the Bolsheviks (June 15, 1920) The Lithuanians took it when the Russians evacuated (Aug. 24), but were driven out by Polish freebooters under Gen **Zeligowski** (Oct. 9) By decision of the League a plebiscite was to be held to decide the fate of the city, but this was later abandoned (Mar 3, 1921) A **plebiscite** (Jan 8, 1922) held by Zeligowski decided for Poland and the Vilna Diet voted for union. Apr 8 it was incorporated with Poland, though Lithuania refused to recognize this disposition of the question.



1919-1920. The Teschen conflict between Poland and Czechoslovakia The Czechs had occupied the disputed area (Jan 1919) and serious clashes took place (May). The supreme council decided for a plebiscite (Sept. 27), but disorders continued (Mar., May, 1920) until the conference of ambassadors divided the territory (July 28)

1919-1920. The Polish-Russian War, resulting from the effort made by the Poles to push their frontier east to the frontier of 1772. After an initial advance they were repulsed (p 1033)

1919-1921. The Burgenland dispute between Austria and Hungary. The strip of territory had been assigned to Austria by the peace treaties, it being only 15 miles from Vienna The population, too, was predominantly German But Hungarian irregulars were in occupation and refused to evacuate (Aug 1921) Through Italian mediation a plebiscite was arranged for. This was held (Dec. 1921) and gave Austria most of the area, though Ödenburg went to Hungary

1919-1922. The Greek invasion of Anatolia (see p 1094)

1919-1924. The Fiume question. President Wilson had rejected the Italian claim to the town and the coast south of it (Apr 14, 1919), whereupon the Italians had withdrawn from the peace conference. A compromise, suggested by M Tardieu, which would have created a buffer state of Fiume (May 30), was rejected by Yugoslavia **D'Annunzio** led a filibustering expedition which occupied the town and set up a visionary government (Sept. 12) The matter was finally left to Italy and Yugoslavia to settle (Mar. 6, 1920). The **Treaty of Rapallo** (Nov. 12) made Fiume an independent city and gave Italy Zara

and a number of Dalmatian islands But a Fascist coup (Mar 3, 1922) overthrew the local government, and government troops took control (Mar 17) By a treaty of Jan. 27, 1924, Yugoslavia abandoned claims to Fiume, but received **Porto Barros** in return.

1919-1922. The Upper Silesian question. The peace treaties had provided for a plebiscite in this valuable area It was held Mar. 20, 1921 (see p 997) and returned 717,122 votes for Germany as against 483,154 for Poland But an armed rising under the Polish commissioner **Korfanty** (May 3, 1922) was acquiesced in by the French commander acting for the League. Aug 1922, the Council of Ambassadors referred the matter to the League and the League Council accepted a **scheme of partition** by which a majority of the population and more than half of the territory were awarded to Germany, while Poland was given the principal mining and industrial districts

1920, Jan. 10. Official **birth of the League of Nations.** The Assembly met for the first time Nov 15 In the first years the League was entrusted with many of the territorial questions and with a host of other problems

Jan. 23. The Dutch government refused to surrender the **former Emperor William,** though it later agreed to intern him

Feb.-Mar. The **plebiscites in North Schleswig** gave the northernmost zone to Denmark and the remainder to Germany

Apr. 19-26. The San Remo Conference of the Allied powers, to discuss various territorial problems and to dispose of the Class A mandates

June 19-22. Conferences of Hythe and Boulogne, to discuss the Near-Eastern situation and the reparations problem

July 5-16. The Spa Conference, where the Germans submitted a scheme of reparations payments and signed a disarmament engagement The Allies decided to apportion reparations money as follows France, 52%; British Empire, 22%, Italy, 10%, Belgium, 8%, the smaller powers to receive the rest

Aug. 14. Treaty between Czechoslovakia and Yugoslavia, which became the foundation of the **Little Entente.** Its purpose was to enforce observance of the peace treaty by Hungary and to forestall a possible restoration of the Hapsburgs

1921, Jan. 24-30. Paris Conference, to discuss reparations

Feb. 19. Treaty between Poland and France, providing for mutual assistance in case of attack

Feb. 21-Mar. 14. London Conference, dealing with reparations Schedules of payment were worked out for the Germans and the latter made counter-proposals The application of sanctions was agreed upon in case Germany refused to accept the Paris proposals

Mar. 3. Offensive and defensive **treaty between Poland and Rumania**

Mar. 8. The French occupied Dusseldorf, Duisberg, and **Ruhrort,** after an ultimatum to Germany had been evaded

Mar. 24. The reparation commission declared **Germany in default,** though the Germans, reaching other figures on payments already made, denied the default

Apr. 23. Rumania joined Czechoslovakia in the Little Entente

Apr. 27. The reparation commission announced that Germany should pay a **total of 132,000,000,000 gold marks.**

Apr. 29-May 5. London Conference on reparations. It sent an ultimatum to Germany demanding one milliard gold marks by the end of the month on penalty of occupation of the Ruhr. The Germans raised the money by borrowing in London, and accepted the payment schedules

June 7. Treaty between Yugoslavia and Rumania, completing the Little Entente

Aug. 24, 25. By separate treaties the **United States made peace with Austria and Germany.**

Oct. 6. The Loucheur-Rathenau Agreement, arranging for payments in kind

Oct. 20. The Aaland Islands Convention signed at Geneva. It provided for the neutralization and non-fortification of the group

Oct. 20. The former **Emperor Karl arrived in the Burgenland** by airplane and began a march on Budapest Czechoslovakia and Yugoslavia mobilized and the Hungarians, unable to face another war, did not dare restore their Hapsburg king **Karl was exiled** (Nov. 7) to Madeira, where he died (Apr. 1, 1922) leaving a widow, the former Empress **Zita,** and a number of children, the eldest of whom is Otto, claimant to the Hapsburg thrones

Nov. 12-1922, Feb. 6. THE WASHINGTON CONFERENCE, which met at the invitation of the United States government to consider naval armaments and Far-Eastern questions Great Britain,

France, Italy, Belgium, the Netherlands, China, Japan, and Portugal were represented Russia, not yet recognized by the United States, was not invited, despite her great interests in the Far East The conference resulted (1) in the **Four-Power Pacific Treaty,** Dec 13 (United States, Great Britain, France, and Japan), by which the signatories guaranteed each other's rights in insular possessions in the Pacific and promised to consult if their rights should be threatened The Anglo-Japanese Alliance came to an end, (2) the **Shantung Treaty** (Feb 4) by which Japan returned Kiao-chow to China, (3) two **Nine-Power Treaties** (Feb 6) guaranteeing the territorial integrity and administrative independence of China and reiterating the principle of the "Open Door", (4) The **naval armaments treaty** (Feb 6) providing for a 10-year naval holiday during which no new capital ships (defined as ships over 10,000 tons with guns larger than 8-inch) were to be built, and establishing a ratio for capital ships of 5-5-3-1 67-1 67 This meant that Great Britain and the United States were each allowed 525,000 tons, Japan 315,000, and France and Italy each 175,000 Total tonnage of aircraft-carriers was restricted and a maximum size fixed for capital ships, aircraft-carriers and cruisers.

1922, Feb. 15. The Permanent Court of International Justice was opened at The Hague

Mar. 13-17. Conference at Warsaw of the Baltic states and Poland, provided for arbitration and a defensive league in the event of attack by another power

Apr. 10-May 19. GENOA CONFERENCE, including Germany and Russia, called to consider the Russian problem and the general economic questions of the world The conference broke down on the insistence of France on the recognition by Russia of the pre-war debt

Apr. 16. Rapallo Treaty of alliance between Germany and Russia, in which both renounced reparations, etc

May 31. The reparation commission, despite protests from France, granted Germany a moratorium for the remainder of the year, it having become clear that payments were resulting in the collapse of the mark and creating an impossible transfer problem.

June 30. The new **Danube Statute** went into effect

Aug. 1. Lord Balfour, the British foreign secretary, sent a note to the Allied Powers indebted to Great Britain offering to abandon all further claims for payment and all claims to reparations, provided a general settlement could be made which would end "the economic injury inflicted on the world by the present state of things" If the United States, which had not demanded a share of reparations payments, should refuse to cancel the debts owed by European governments, then Great Britain would have to insist on receiving enough from her debtors to pay her own obligations to the United States The American attitude was that reparations and inter-Allied debts were not connected problems, so that German default on reparations would not excuse default on Allied payments to the United States.

Aug. 7-14. London Conference. Poincaré demanded, as conditions for a moratorium, a series of "productive guaranties," among them appropriation of 60% of the capital of the German dyestuff factories on the left bank of the Rhine, and exploitation and contingent expropriation of the state mines in the Ruhr British and French policy now diverged sharply, as the former refused Poincaré's scheme and Poincaré refused to grant a moratorium.

Nov. 20-1923, Feb. 4. First Lausanne Conference, to conclude peace between Turkey and Greece (p 1095)

Dec. 9-11. Second London Conference. Bonar Law offered to cancel Allied debts to Great Britain even if Great Britain had to continue to pay the United States. Poincaré remained adamant, since the reparations expected from Germany were theoretically much greater than the French debt to Great Britain

Dec. 26. The reparation commission again declared **Germany in default** on the motion of M. Barthou, the French representative The point at issue was a minor delay in deliveries of timber

1923, Jan. 2-4. Paris Conference. British and Italian schemes for bond issues, etc., were rejected by the French.

Jan. 9. Germany declared in default on coal deliveries.

Jan. 11. FRENCH AND BELGIAN TROOPS BEGAN THE INVASION AND OCCUPATION OF THE RUHR DISTRICT. The British government refused to take any part in it and in a note of Aug. 11 declared that the "Franco-Belgian action . . was not a sanction authorized by the treaty." The Italian government, though technically associated, took no active part. The activities of the

M.I C.U M (*mission interalliée de contrôle des usines et des mines*), sent into the heart of Germany to supervise business enterprises under military protection, were not, according to the Franco-Belgian note (Jan 10), to disturb the normal life of the civilian population But the German government urged **passive resistance** on the people of the Ruhr and recklessly inflated the currency to defray the expense of supporting idle workers and compensating their employers The French fomented a **separatist movement** in the Rhineland, which failed, after some bloodshed, to establish an independent buffer state

Apr. 23-July 24. Second Lausanne Conference, on the Near East (p 1095)

Sept. 26. End of passive resistance in the Ruhr. German paper marks had sunk to the point of being worth less than the paper they were printed on The effect of the financial collapse could not be confined to Germany. The French franc fell about 25% and by Nov. the French were willing to make an agreement directly with the Ruhr mine operators to secure deliveries **Stanley Baldwin,** British prime minister, secured a promise of American cooperation to avert the complete economic and financial collapse of the world

Nov. 30 Two committees were organized to investigate the German economic problem as it touched reparations.

1924, Apr. 9. THE DAWES PLAN. The committee under the chairmanship of the American, **Charles G. Dawes,** presented its report Based on the slogan, "Business, not politics," this Dawes plan provided for a reorganization of the German *Reichsbank* under Allied supervision Reparation payments of one milliard gold marks were to be made annually, increasing by the end of five years to two milliard, five hundred thousand Germany was to receive a foreign loan of 800,000,000 gold marks

Apr. 16. The Germans accepted the Dawes Plan.

July 16-Aug. 16. A conference at London adopted the Dawes Plan The *Reichstag* promptly passed the necessary legislation. Of the loan, $110,000,000 was taken up in the United States, the rest in Europe.

b. THE PERIOD OF FULFILLMENT

1924, Oct. 2. The Geneva Protocol (protocol for the pacific settlement of international disputes). This was the product of continued efforts to strengthen the international machinery and to overcome the weakness in the League structure resulting from the absence of Russia, Germany, and the United States. A **draft treaty of mutual assistance,** based on proposals made by Lord Robert Cecil and Colonel Réquin, had attempted a definition of the aggressor and had submitted an ingenious scheme for combining the advantages of a general guaranty and a local system of alliances The objection of Great Britain and the Dominions to the regional and continental character of the plan had led to its rejection by the League Assembly (Sept 1923).

The Geneva Protocol, brought forward by **Ramsay MacDonald,** British prime minister, and drafted by Beneš and Politis, was unanimously recommended to the governments members of the League It provided for compulsory arbitration of all disputes and defined the aggressor as the nation unwilling to submit its case to arbitration. The decisive factor in the rejection of the scheme was the **opposition of the British Dominions,** which regarded the risks in this mutual insurance scheme as too unequal: "We live in a fireproof house, far from inflammable materials" (M. Dandurand for Canada). The newly elected Conservative government in England therefore rejected the Protocol (Mar. 1925)

1925, Feb. 9. The German government proposed a **Rhineland mutual guaranty pact.** The idea was taken up by the British, who were seeking some European arrangement to replace the Geneva Protocol. **Aristide Briand,** who became French foreign minister in Apr. 1925, accepted the suggestion on condition that Germany join the League.

Feb. 11, 19. International Opium Conventions providing more effective control of production and trade in opium.

June 17. Arms Traffic Convention, dealing with international trade in arms and munitions A protocol was also signed, prohibiting use of poison gas

Aug. 25. The French **evacuated Düsseldorf, Duisburg,** and **Ruhrort.**

Sept. 1-4. A committee of jurists met in London to draft a security pact

Oct. 5-16. LOCARNO CONFERENCE AND TREATIES (signed Dec. 1) The treaties included (1) a **treaty of mutual guaranty** of the Franco-German and Belgo-German frontiers (signed by Germany, France, Belgium, and by Great Britain and Italy as guarantors); (2) **arbitration treaties** between Germany and Poland and Ger-

many and Czechoslovakia; (3) **arbitration treaties** between Germany and Belgium and Germany and France, (4) a **Franco-Polish** and a **Franco-Czechoslovakian treaty for mutual assistance** in case of attack by Germany The effect of the treaties was very far-reaching For some years the "spirit of Locarno" gave the European powers a sense of security, though Britain had guaranteed only the western frontiers of Germany and Germany had not specifically bound herself to refrain from aggression to the east and south Realizing this, France secured herself by alliances with Poland and the states of the Little Entente and proceeded with a program of fortifying the German frontier (Maginot line) and reorganization of the army

1926, Mar. 17. The admission of Germany to the League was postponed because of complications raised by Spain and Brazil regarding seats on the council

May 18-26. First meeting of the preparatory commission for a disarmament conference. This had been appointed by the League in 1925 to tackle the problem of disarmament, foreshadowed in the Treaty of Versailles The United States was represented, but not Russia (until 1927) The commission held many sessions during the next years.

June 10. Spain announced withdrawal from the League, but later rescinded this decision

Sept. 8. Germany admitted to the League and given a permanent seat on the council

1927, Jan. 31. End of the **Inter-Allied Commission of Military Control** in Germany Problems of German armament were henceforth put under jurisdiction of the League

May 4-23. International Economic Conference at Geneva, some fifty countries being represented.

June 20-Aug. 4. Great Britain, the United States, and Japan met in a **three-power naval conference at Geneva** in an effort to reach an agreement on cruisers, destroyers, and submarines The conference failed to reach agreement

Nov. 30-Dec. 3. At a meeting of the preparatory commission on disarmament, **Maxim Litvinov,** for Russia (now admitted to the meetings), **proposed complete and immediate disarmament,** but this was rejected as a communist trick.

1928, Apr. 13. Mr. Kellogg, American secretary of state, submitted to the Locarno powers a **plan for the renunciation of war,** the suggestion flowing out of American-French negotiations.

Apr. 21. M. Briand, for France, put forward his draft for a treaty outlawing war

June 23. Explanatory note on the **Kellogg-Briand Pact** sent to England, Germany, Italy, and Japan and to the allies of France and to the British Dominions There was almost immediate and universal adherence, since the pact only involved renunciation of aggressive war and made no provision for sanctions.

Aug 27. THE KELLOGG-BRIAND PACT signed at Paris (*Pact of Paris*)

Sept. 3-26. The ninth assembly of the League implemented the Kellogg-Briand Pact by a general act providing for conciliation and arbitration and an **optional clause** like that of the World Court, acceptance of which involved compulsory arbitration This was accepted by 23 nations, in some cases with reservations

1929, Jan. 5. General Act of Inter-American arbitration, analogous to the above, signed at the Pan-American Conference in Washington.

Jan. 19. Appointment of the Young Committee to re-examine the reparations problem and make final disposition of it

Feb. 9. Litvinov Protocol, an eastern pact for renunciation of war, signed at Moscow by Russia, Poland, Rumania, Estonia, and Latvia

Apr. 12. Report of the Young Committee, to which the Germans made some counter-proposals.

June 7. THE YOUNG PLAN. Responsibility of transferring payments from German marks into foreign currency was to be undertaken by Germany and was to be made under a new institution, the **Bank for International Settlements** at Basel On the directorate of this bank all the principal central banks were to be represented Germany was to pay annuities ending in 1988 and increasing gradually for the first 36 years But only Rm 660,000,000 were unconditionally payable annually. The transfer of the rest of the annuity might be postponed for two years These safeguards were meant to cover any possible crisis in transfer. The unconditional annuity was secured by a mortgage on German state railways The total annuity of Rm 1,707,000,000 was less than Germany had been paying with apparent ease under the Dawes Plan, so that experts and diplomats had no doubt that the Young Plan was a permanent settlement

Aug. 6-31. Hague Conference on the Young Plan. The Germans accepted it and were rewarded by **evacuation of the Rhineland,** before June, 1930

Sept. 5-9. M Briand proposed a European federal union. The plan was discussed by the League, but nothing came of it

1930, Jan. 21-Apr. 22. LONDON NAVAL CONFERENCE. It led to a treaty, signed by Great Britain, the United States, France, Italy, and Japan, regulating submarine warfare and limiting the tonnage and gun-caliber of submarines The limitation of aircraft-carriers, provided for by the Washington Treaty, was extended Great Britain, the United States, and Japan also agreed to scrap certain warships by 1933 and allocated tonnage in other categories An "escalator clause," permitting an increase over specified tonnages if national needs of any one signatory demanded it, was included The agreements were to run until 1936

Oct. 5-12. First Balkan Conference at Athens These met annually for several years and were the basis for the **Balkan Entente.**

Nov 6-Dec. 9. Final meeting of the preparatory commission on disarmament. It adopted by majority vote a draft convention to be discussed at a disarmament conference called by the League Council for Feb 1932 This draft was not approved by the German and Russian representatives, and was much criticized by the Swedish and American delegates The most obnoxious clauses preserved rights and obligations secured by previous treaties, which France interpreted as including strict maintenance of the military clauses of the Treaty of Versailles, thus barring the way to German equality in armament and to revision in general

c. THE PERIOD OF REPUDIATION AND REVISION

The years following 1930 were dominated by the great international **economic depression,** which almost ruined world trade and brought many nations to the verge of bankruptcy. The tension in domestic affairs led to a marked turn toward dictatorial forms of government and to widespread repudiation of financial and moral obligations in the effort to solve domestic problems A number of less favored nations embarked frankly upon a policy of territorial expansion.

1931, May 11. The failure of the Austrian Credit-Anstalt, caused largely by the artificial and impracticable restrictions on commerce and finance imposed by the Succession States of the old monarchy, precipitated an alarming financial and diplomatic crisis in central Europe which threatened to involve the whole continent. A guaranty of the Credit-Anstalt's foreign debts by the Austrian government, backed by a foreign exchange credit from ten of the largest central banks (arranged through the Bank for International Settlements), failed to check the panic Foreign funds were rapidly withdrawn from Germany. The Bank of France, actuated by the purely political motive of forcing the abandonment of a proposed customs union between Austria and Germany, refused financial support for the Austrian bank

June 16. The Bank of England, despite difficulties at home, advanced 150,000,000 schillings to the Austrian National Bank. Everywhere, from Austria to Australia, governments, banks, and corporations were exposed to immediate bankruptcy and were in terror of fascist or communist uprisings

June 20. President Hoover, persuaded by expert opinion that one factor in the crisis was the always difficult problem of transferring sums due as reparation and war-debt payments from one currency to another, **proposed a moratorium** of one year on all intergovernmental debts French opposition, chiefly political, caused disastrous delay

July 6. Hoover announced **acceptance of the moratorium** by all important creditor governments. The moratorium showed that there was, in fact, a close connection between inter-Allied debts and reparations, though Hoover reiterated that there was no such connection European governments regarded the moratorium as an American acknowledgment that inter-Allied debts and reparations would stand or fall together

Aug. 19. Layton-Wiggin Report, from an international committee of bankers which had met at Basel It called for a six months' extension of all foreign credits to Germany, expressed in terms of foreign currencies, so that these were "frozen." Germany never after became fully solvent in international transactions, i.e. she remained unable to pay promptly and in full principal and interest on long- and short-term foreign obligations

Sept. 21 The Bank of England was forced off the gold standard, in spite of credits of £25,000,000 each from the Federal Reserve Bank of New York and the Bank of France, and the formation

(Aug 24) of a National Coalition ministry which was to balance the budget Since then Great Britain has experimented with a managed paper currency, and the fluctuations of sterling exchange have been followed by the numerous currencies, such as the Scandinavian, which have been tied to sterling. The depreciation of these currencies in terms of those of countries which remained on the gold standard and did not devalue, amounted to an export subsidy which temporarily stimulated trade and eventually forced devaluation by almost all other countries. But trade was greatly contracted in the absence of any fixed medium of exchange Capital showed a tendency to flee from one country to another and back again, in a vain attempt to escape the shrinkage of assets involved in devaluation

Sept. 18. Japanese army leaders, acting apparently without orders from Tokyo, took advantage of the hopeless world situation and of recurrent disorders in China to **occupy Mukden, Ch'ang-ch'un,** and **Kirin,** important Manchurian towns The result was the opening of an unofficial war between China and Japan that completely changed the complexion of affairs in the Far East (p. 1119).

1932, Jan. 4. Occupation of Shanhaikwan by Japanese troops completed Japanese military control of South Manchuria

Jan. 29. Naval and military **intervention by Japanese at Shanghai**

Feb. 2-July. MEETING OF THE DISARMAMENT CONFERENCE at Geneva, 60 nations represented, including the United States and Russia. The session led to nothing chiefly because of the divergence of view between France and the other powers The French proposed a system of international police and insisted that security must precede disarmament The Germans demanded equality In June President Hoover suggested the division of national forces into "police components" and "defense components," the latter to be reduced by one-third This plan also failed because of many objections.

Mar. 3. The Chinese driven back from Shanghai.

May. Following mediation by the League, the **Japanese withdrew from Shanghai.**

June 16-July 9. LAUSANNE CONFERENCE. Representatives of Germany, France, Belgium, Great Britain, Italy, and Japan reached an agreement which set aside the German reparation debt and substituted for it 5% bonds for Rm 3,000,000,000, to be deposited with the Bank for International Settlements and issued when and if it became possible to market them at a price of 90% or better, within the ensuing 15 years Ratification of this agreement was made conditional on a satisfactory agreement between the associated powers and their creditors (i e United States) This agreement became impossible when the American Congress (Dec) passed a resolution that "it is against the policy of Congress that any of the indebtedness of foreign powers to the United States should in any manner be cancelled or reduced" Technically, then, the failure of the Lausanne Agreement meant a return to the Young Plan Actually Germany made no payments and the National Socialist government repudiated the international form of "interest slavery" England and several other European debtors made small "token payments" to the United States until Congress ruled against such payments Since then only Finland has paid her installments in full (The total sum borrowed from the United States was $10,338,000,000, of which $3,261,000,000 was borrowed after Nov. 11, 1918 Between 1923 and 1930 separate agreements were negotiated by a **World War Foreign Debt Commission,** created by Congress, which decided each debtor's capacity to pay and arranged principal and interest payments for a period of 62 years The original 5% interest was reduced for every debtor, thus cancelling a varying portion of the debt. Payments actually came chiefly from Great Britain — almost $2,000,000,000 — and France — almost $500,000,000 The total actually paid by all debtors remained under $3,000,000,000).

Oct. 4. Lytton Report, drawn by a commission appointed by the League on motion of the Japanese member (Dec. 10, 1931) to investigate the situation in Manchuria China had appealed to the League under Arts. XI, X, and XV of the Covenant. The commission's findings were mostly adverse to Japan, but instead of ordering Japan out of Manchuria, it proposed a settlement recognizing Japan's special interest there and making **Manchuria an autonomous state** under Chinese sovereignty but under Japanese control

1933, Feb. 25. The **Lytton Report** was adopted almost *in toto* by the League, despite its rejection by Japan. Japan gave notice of withdrawal from the League (Mar. 27). The whole episode proved to be **the first serious blow at the League structure** and Japan's example proved a stimulus to aggression elsewhere.

Feb. 2-Oct. 14. Meeting of the Disarmament Conference, after the United States government had engineered (Dec 11, 1932) a **No Force Declaration,** by which Germany, France, Great Britain, and Italy had promised "not in any circumstances to attempt to resolve any present or future differences between them by resort to force" The conference discussed a plan put forward by **M. Herriot** along familiar French lines, but this was nullified by German opposition (advent of Hitler, Jan 30) **Ramsay MacDonald** put forward (Mar 16) a scheme by which European armies would be reduced by almost half a million men, and France and Germany would be given equality Despite strong American support, this proposal also failed because of German insistence that Storm Troops should not be counted as effectives The conference adjourned in June, to meet again in Oct. In the interval desperate attempts were made to reach an agreement. Great Britain, France, Italy, and the United States were ready not to increase armaments for four years and at the end of that time to allow Germany all such armaments as the other powers had The Germans insisted on having at least "defensive" weapons at once

Feb. In view of the danger from the new nationalist Germany, the **Little Entente was reorganized** and given a permanent council

Mar. Mussolini proposed a four-power pact between England, France, Germany, and Italy

June 12-July 27. INTERNATIONAL ECONOMIC CONFERENCE at London It disregarded war debts and reparations and tried to secure an agreement on currency stabilization This was blocked by President Roosevelt's repudiation of it in his message to the conference (July 3) The conference failed

July 15. Conclusion of the Four-Power Pact, proposed by Mussolini, but in a much diluted form. It merely reiterated the adherence of the signatories to the Covenant of the League, the Locarno Treaties, and the Kellogg-Briand Pact

Oct. 14. Germany announced her withdrawal from the Disarmament Conference and from the League of Nations (Oct 23)

1934, Feb. 9. Conclusion of the Balkan Pact between Turkey, Greece, Rumania, and Yugoslavia It was the counterpart of the Little Entente and was designed to protect the Balkans from encroachment by other powers. The great weakness of the pact was the absence of Bulgaria

May 29-June 11. The Disarmament Conference met for a brief session, but last-minute efforts to reach an accommodation were wrecked by the stiff French attitude

Sept. 19. Russia joined the League of Nations, another reflection of fear of the new Germany

Dec. 19. Japan denounced the naval agreements of 1921 and 1930.

1935, Jan. 7. Franco-Italian Agreement, dealing with conflicting interests in Africa, but meant to pave the way to Franco-Italian co-operation in the event of action by Germany

Mar. 16. GERMANY FORMALLY DENOUNCED THE CLAUSES OF THE TREATY OF VERSAILLES CONCERNING HER DISARMAMENT, reintroduced conscription, and announced that her army would be increased to 36 divisions This step was based on the failure of the other powers to disarm as provided in the peace treaties and on the steady growth of French and Russian military establishments

Apr. 11. Stresa Conference between England, France, and Italy establishing a common front in view of the German action.

Apr. 17 The League formally condemned Germany's unilateral repudiation of the Versailles Treaty

May 2. Franco-Russian Alliance concluded for five years. Each promised the other aid in case of unprovoked aggression.

June 18 Anglo-German Naval Agreement. Germany to have a naval force (including submarines) of not more than 35% that of Great Britain This separate agreement estranged France.

Sept. BEGINNING OF THE ETHIOPIAN CRISIS (p 1085).

Oct. 3. The League Council declared that Italy had "resorted to war in disregard of her obligations under Art XII," though neither Italy nor Ethiopia had declared war.

Oct. 11. Representatives of 51 nations voted in the League Assembly to impose sanctions on Italy, under Art. XVI.

Nov. 18. These sanctions went into effect. They included embargoes on arms, credit and raw materials (not oil), and a prohibition of imports from Italy Several countries made reservations, leaving loopholes in the scheme. Italy proceeded despite the almost complete unanimity of the nations. Acute tension developed between Italy and England, the leader in the

international action In the course of the winter England concluded with France, Spain, Yugoslavia, Greece, and Turkey agreements providing for mutual support in the event of war arising from action taken under the League. England concentrated an immense naval force in the Mediterranean, but was obliged to withdraw it to Alexandria, in view of the exposure of Malta to air attack

1936, Mar. 7. GERMAN REOCCUPATION OF THE RHINELAND, violating the Treaty of Versailles and the Locarno Treaties The Germans took advantage of the Ethiopian crisis and pleaded the danger from the Franco-Russian combination

Mar. 12. Great Britain, France, Belgium, and Italy denounced the German violation of the Locarno Treaties. The League also recognized this violation, but, despite acute danger of war between Germany and France, the crisis blew over, due largely to England's unwillingness to invoke sanctions Hitler's vague proposals for a new agreement came to naught through his refusal to consider the extension of the agreement to eastern Europe.

May 5. The Italian army occupied Addis Ababa, bringing to an end the Ethiopian war (p 1086). Complete **collapse of the League as a political machine.** Ethiopia, though a member of the League, was abandoned to her fate and Italian aggression, like the Japanese in Manchuria, had proved successful in the face of world opinion and even the application (though incomplete) of sanctions

July 18. BEGINNING OF THE CIVIL WAR IN SPAIN. From the beginning the insurgents were supported by Italy and Germany, while the Russians assisted the government The League was helpless, but Great Britain and France arranged an international **agreement against intervention,** which was generally ignored by the powers interested The Spanish War divided Europe into fascist and non-fascist groups.

Oct. 25. A German-Italian Pact established the Berlin-Rome Axis, marking the division of Europe into contending groups

Nov. 14. Germany denounced international control of her waterways Only France, Czechoslovakia, and Yugoslavia protested

Nov. 17. A German-Japanese agreement, followed by an Italian-Japanese agreement, directed against communism and the Third International (*The Anti-Comintern Pact*).

1937, Jan. 2. An agreement between Great Britain and Italy for mutual respect of interests and rights in the Mediterranean and the maintenance of the independence and integrity of Spain This failed to affect the situation materially

Mar. 25. Conclusion of a **non-aggression and neutrality pact** for five years **between Italy and Yugoslavia** The latter agreed to recognize Italian possession of Ethiopia, while Italy made extensive trade concessions The agreement brought to an end the long-standing feud between the two powers and reflected Premier Stoyadinovich's anxiety to establish a middle position between the French and the Italians

Sept. 9. The Nyon Conference and Agreement, to deal with piracy in the Mediterranean in connection with the Spanish civil war Nine powers adopted a system of patrol zones, though England and France assumed the chief burden. Italy, unable to frustrate this action, belatedly joined in the scheme

Nov. 17. Visit of Lord Halifax, member of the British cabinet, **to Hitler,** with the aim of discovering the German objectives and, if possible, striking some peaceful settlement The evidence would indicate that Halifax returned deeply impressed with the magnitude of the German program, especially in central and eastern Europe

Dec. 1-17. The French foreign minister, **M Delbos,** paid an extended visit to France's allies (Poland, Rumania, Yugoslavia, and Czechoslovakia) in the hope of reanimating the French alliance system and preparing for any German moves in central and eastern Europe Apparently he found but little readiness to take a strong stand against so formidable an opponent as Germany had become Poland and Yugoslavia, at least, hoped to maintain a free hand policy

1938, Mar THE AUSTRO-GERMAN CRISIS and the annexation of Austria by Germany (p 1009) created remarkably little tension in international relations Italy, which might have been expected to offer stiff opposition, was so bound up with Spanish and Mediterranean affairs that Mussolini had to accept the inevitable as graciously as possible France, at the moment, was in the midst of a cabinet crisis. The British appear to have been reconciled to the German move from the outset Beyond a few half-hearted attempts to revive the Stresa front of 1935, the powers acquiesced and accepted the *fait accompli.*

Mar. **16-19. The Polish-Lithuanian crisis,** following on the heels of the German action Since Lithuania capitulated at once to the Polish ultimatum (p 1040), the affair had no broader effects

Apr **16. CONCLUSION OF THE ANGLO-ITALIAN PACT,** which had been under negotiation for some time The British being eager to free themselves of Italian hostility in the Mediterranean and Near East and Mussolini apparently desiring some counter-weight to the oppressive friendship of Hitler, the two parties succeeded in liquidating their differences Great Britain was to recognize Italian sovereignty over Ethiopia and use her influence to induce other states to do likewise Italy was to respect Spanish territory and withdraw her "volunteers" at the end of the war (at that time regarded as very near) Italy was to desist from hostile propaganda in the Near East, and both powers were to collaborate in maintaining the *status quo* in the Red Sea The provisions of the agreement were to come into force as soon as the Spanish affair had been settled

May **3-9. Visit of Hitler to Rome,** a great and impressive state function evidently designed to demonstrate the solidarity of the Rome-Berlin Axis

July **19-21 State visit of King George VI and Queen Elizabeth to Paris,** clearly meant as a counter-demonstration of Anglo-French solidarity.

Aug. **21-23. Meeting of the Little Entente statesmen** at Bled (Yugoslavia) The three powers **recognized Hungary's right to rearm** and arranged for the conclusion of non-aggression pacts

Sept. **THE GERMAN-CZECH CRISIS** and the dismemberment of Czechoslovakia as a result of the **Munich agreements** (p 1012) The German action against Czechoslovakia brought the European world closer to another World War than any issue of the preceding 20 years. Czechoslovakia was abandoned not only by her allies of the Little Entente, but by France, despite numerous assurances by the French government that treaty obligations would be respected. The Russian government appeared ready to support Czechoslovakia, but in the last analysis neither France nor Britain was willing to go the limit The nature of the German national claim and the relative weakness of France and England (especially in air forces) brought the decision for peace and the capitulation of the western powers at Munich As a result of Hitler's immense victory the **Little Entente disappeared as an important factor** in international relations What remained of Czechoslovakia fell entirely under German influence Much the same was true of Hungary and the other Danubian countries The Czech alliances with Russia and France became all but valueless, and the Franco-Russian alliance of 1935 lost most of its significance Germany now emerged as the strongest power on the Continent

Nov. **16. The Anglo-Italian Agreement of Apr. 16 was put into force,** despite the fact that the conditions of enforcement had been only very imperfectly fulfilled The British were obviously eager to prevent any recrudescence of the Mediterranean tension

Nov. **26. Poland and Russia suddenly renewed their non-aggression pact.** Poland, directly exposed to the German advance eastward, now required closer relations with Russia and, indeed, made efforts to build up a barrier of Baltic and Balkan states to join with Poland in the interest of the *status quo*

Nov. **30.** Astounding **anti-French demonstrations in the Italian Chamber of Deputies** (demands for Corsica and Tunisia, which were then taken up by the government-controlled press) ushered in a period of acute **tension between France and Italy,** which became even more accentuated with the fascist victories in Spain

Dec. **6. France and Germany concluded a pact** by which they guaranteed the inviolability of the existing frontier and provided for consultation with the aim of settling any disputes pacifically

Dec. **17** An Italian note to France declared the agreement of 1935 invalid because ratifications had not been exchanged France rejected this argument

Dec. **24. The declaration of Lima** was adopted by 21 American republics. It reaffirmed their solidarity and decision to oppose any foreign intervention or activity threatening their sovereignty (p 1062)

1939, Mar. **THE SLOVAK CRISIS** and the **ANNIHILATION OF THE CZECHOSLOVAK STATE** (p. 1012 *f.*) None of the great powers made a move to check the German annexation of the rump Czech state or the Hungarian conquest of Ruthenia (Carpatho-Ukraine) Yet Hitler's action served to disillusion those who held that his aims were restricted to German territories.

Mar. 23 German annexation of Memel after pressure upon Lithuania which extracted a peaceful settlement. At the same time Hitler submitted stiff demands regarding **Danzig** and **Pomorze** (the "Polish Corridor") to Warsaw Faced by the project of limitless German expansion on the continent,

Mar. 31. The British government pledged **Anglo-French aid to the Poles** in case of action threatening Polish independence This was later (Apr. 6) expanded into a pact of mutual assistance

Apr. 7 **Italian invasion and conquest of Albania** (p 1020) Despite the violation of the Anglo-Italian pact, Britain made no move

Apr. 7. The victorious nationalist government in **Spain joined Germany, Italy and Japan in the Anti-Comintern Pact**

Apr. 13 The **Franco-British pledge** was extended to **Rumania and Greece.**

Apr. 15 **President Roosevelt,** in a letter to Hitler and Mussolini, asked assurances against attack on 31 nations of Europe and the Near East In response Hitler publicly restated German grievances and claims and denied aggressive intentions.

May 12. Announcement of an **Anglo-Turkish mutual assistance pact,** to be followed by a French-Turkish agreement purchased at the expense of the Sanjak of Alexandretta

May 17. Sweden, Norway and Finland rejected a German offer of a bilateral non-aggression pact, preferring to maintain a rigid neutrality Denmark, Estonia and Latvia, however, accepted the German proposal In the interval the British made every effort to draw Russia into the anti-aggression front The Russians, profoundly suspicious, insisted not only on complete reciprocity in defense, but on guarantee of the independence of the Baltic States which, incidentally, objected to such guarantees

May 22. Conclusion of a political and **military alliance between Germany and Italy** marking the full development of the Rome-Berlin Axis.

June 23. **Treaty between France and Turkey** by which the Republic of Hatay was abandoned to Turkey in return for a promise of mutual aid in case of aggression.

Aug. 20-Sept. 1. **THE DANZIG-POLISH CRISIS.** After months of agitation and recrimination punctuated by incidents on the Danzig-Polish frontier, the long-anticipated crisis broke when Albert Forster, Nazi leader in Danzig, announced publicly that the hour of deliverance was near At the same time the world was startled by the conclusion of a trade treaty between Germany and Soviet Russia, followed by

Aug 21. The announcement that Germany and Russia were about to conclude a non-aggression pact Coming after months of negotiation between England, France and Russia and the mission of a military delegation to Moscow, this move was regarded as a demonstration of Bolshevik perfidy The *volte-face* of the Russians was evidently due in large measure to Poland's refusal to admit Russian forces in the event of war Discussion of Russia's inclusion in a peace front was at once dropped. In England and France as well as in Germany military preparations were initiated, the Germans concentrating forces in Slovakia as well as along the Corridor

Aug 22. The British government reiterated its pledges to Poland, but at the same time appealed to Germany for a truce in eastern Europe and negotiation of German claims

Aug. 23. **The German-Russian pact** was signed at Moscow by the German foreign minister, artisan of the Anti-Comintern Pact of 1936 It provided not only for abstention of either party from attack on the other, but for neutrality of either party if the other were attacked by a third power Each signatory promised not to join any group of powers "which is directly or indirectly aimed at the other party." As a result of this amazing agreement the Anti-Comintern Pact at once collapsed, Japan resuming freedom of action.

Aug. 24. **President Roosevelt** appealed to King Victor Immanuel, to Hitler and to President Moscicki of Poland suggesting direct negotiations between Germany and Poland, arbitration or conciliation. Poland agreed to conciliation by a third party.

The British parliament met in special session and voted the government practically dictatorial powers, at the same time **England and Poland signed a pact of mutual assistance.** Poland began to call up reserves

Forster was proclaimed "supreme head" of the Danzig Free State.

Aug. 25. In discussion with the British ambassador, Hitler renewed his demand for a free hand against Poland. Roosevelt again appealed to Hitler to seek a peaceful solution.

Aug. 26. Premier Daladier of France appealed to Hitler, receiving in reply (Aug 27) a plea for German-French peace but also a reiteration of the German demands on Poland

Aug. 28. The British government replied to Hitler, again urging a truce and repeating former warnings of British action in case of German aggression British shipping was recalled from the Baltic and Mediterranean. In Germany emergency rationing was introduced On all sides military preparations were accelerated

Aug. 29. Hitler reiterated to Britain his extreme demands on Poland and refused to negotiate until these demands were met. He called for arrival of a Polish plenipotentiary in Berlin within 24 hours

Aug. 30. The Poles decreed partial mobilization, while in Germany a six-man "cabinet council for defense of the Reich" was set up under the presidency of Goering.

Aug. 31. The German government published a **16-point proposal to Poland.** This was of rather moderate tenor, but before it could be transmitted to Warsaw, communications were cut off On this same day the Russian Supreme Soviet ratified the pact with Germany and Hitler, claiming his proposals to Poland had been rejected, gave the order to march

Sept. 1. GERMAN ATTACK ON POLAND on land and in the air. Forster proclaimed the **reunion of Danzig and Germany.** England and France mobilized but expressed readiness to negotiate if German forces were withdrawn from Poland. Italy declared the intention of remaining neutral

Sept. 2. Italy proposed a five-power conference to discuss the situation, but England refused negotiation so long as the Germans remained on Polish soil. Hitler having failed to reply to the Anglo-French notes, these two powers sent an ultimatum, to which Hitler replied by a note blaming England for encouraging the Poles in a policy of persecution and provocation. The German government having rejected the Anglo-French demands for withdrawal from Poland,

Sept. 3. ENGLAND AND FRANCE DECLARED WAR ON GERMANY, thus initiating the Second European War of the twentieth century.

2. THE BRITISH ISLES

a. GREAT BRITAIN

Great Britain's losses in the First World War were 750,000 killed and about 1,500,000 wounded Her total expense exceeded £8,000,000,000 and her burden of domestic and foreign debt was ten times what it had been in 1914 She was faced with the problem of returning soldiers to industry and introducing social reforms loudly demanded by the laboring classes and was confronted at the same time with increased competition in foreign trade in a world generally disorganized and impoverished In Ireland, India, Egypt, and Palestine she was confronted with urgent and almost insoluble problems. Even the self-governing Dominions demonstrated an enhanced national feeling and a reluctance to be committed to any share in future European wars.

1918, Dec. 14. The Khaki Election, with an electorate increased by the granting of suffrage to all men of 21 and over and to women over 30. The coalition government won a huge majority on a platform promising punishment of the German "war criminals," full payment by the defeated powers of the costs of war, and the prevention of dumping of foreign goods in Great Britain These promises greatly hampered Lloyd George's freedom of action at the Paris Peace Conference (p 951)

1919-1922. COALITION GOVERNMENT OF DAVID LLOYD GEORGE.

1919, Mar. 24-29. Strike of coal miners, ending with recognition by the workers of the recommendations of a royal commission (**Sankey Commission**).

Oct. 18. Another great strike of miners, who won a favorable compromise settlement.

Dec. 9. Milner report on the government of Egypt (p. 1081)

Dec. 23. GOVERNMENT OF IRELAND ACT passed, providing for the division of Ireland (p. 972).

1921, Mar. 3. The Emergency Unemployment Act increased unemployment payments to 20*s.* a week for men and 18*s.* for women There were at this time almost 1,000,000 unemployed

Mar. 31. Great coal strike begun as government control of the mines

ended and proposals for nationalization had been rejected The strike ended July 1 when the miners accepted a government offer of subsidy and increase of wages

Dec. 6. TREATY WITH IRELAND (p 972)

1922, Feb. 28. End of the British protectorate over Egypt (p. 1083)

Sept. 15. Appeal of Lloyd George to the Dominions for support in the **Near-Eastern crisis** (p 1095) This was rejected

Oct. 19 The Unionists decided to withdraw their support from the Lloyd George government, which thereupon resigned

Oct. 23-1923, May 20. CABINET OF A. BONAR LAW.

Nov. 15. General election. The Conservatives (Unionists) received a majority of the seats The Liberals split between the followers of Asquith and Lloyd George. The Labor Party (142 seats) became for the first time His Majesty's Opposition.

1923, May 22—1924, Jan 22. CABINET OF STANLEY BALDWIN, following Bonar Law's retirement owing to illness

Oct. 1-Nov. 8. Imperial Conference. This recognized the right of the Dominions to make treaties with foreign powers

Dec. 6. A general election to pass upon Baldwin's scheme for a protective tariff to relieve unemployment resulted in heavy loss for the Conservatives and a decided gain for Labor.

1924, Jan. 22-Nov. 4. FIRST LABOR CABINET, under Ramsay MacDonald; Philip Snowden, formerly a clerk, became chancellor of the exchequer, and **Arthur Henderson,** formerly an iron worker, became home secretary

Feb. 1. *De jure* **recognition of Soviet Russia.**

Aug. 8. Commercial treaty with Russia, giving British goods most-favored-nation treatment and promising Russia a British loan if and when the debt of the former tsarist government should have been settled These treaties were opposed by the Liberals and Conservatives

Oct. 29. The general election turned out a great victory for the Conservatives, owing largely to the so-called **Zinoviev letter** (Oct 25), in which the Third International supposedly instructed British subjects to provoke revolution.

1924, Nov. 7-1929, June 4. SECOND BALDWIN MINISTRY.

Nov. 21. The new government **denounced the treaties with Russia.**

1925, Mar. 12. Rejection of the Geneva Protocol by Great Britain (p 959).

May 1. Cyprus (annexed in 1914) **made a crown colony.**

Dec. 3. Signature of the Irish boundary agreement, fixing the frontier between Northern Ireland and the Irish Free State.

1926, May 1. Strike of coal miners, after a commission report adverse to continuation of government subsidy

May 3-12. GENERAL STRIKE, in sympathy with coal miners It involved about 2,500,000 of the 6,000,000 trade-union members in Great Britain. Volunteers, largely from the upper classes, maintained essential transport and other services. The Trade-Union Council called off the strike May 12 with an understanding that negotiations on wages and hours would be resumed But the miners' union continued to strike until Nov 19, when it surrendered unconditionally

Oct. 19-Nov. 18. Imperial Conference. Its report declared that Great Britain and the Dominions "are autonomous communities within the British Empire, equal in status, in no way subordinate one to another in any aspect of their domestic or external affairs, though united by a common allegiance to the crown and freely associated as members of the British Commonwealth of Nations"

1927, May 26. Trade agreement with Russia abrogated, following much friction as to communist agitation in England

June 28. Trade-Union Law, declaring certain strikes and lockouts illegal.

1928, July 2. An act of Parliament extended the **franchise to women** on the same terms as men.

Dec. 20. Treaty with China, recognizing the Nanking government and Chinese tariff autonomy, China to abolish coast and interior duties

1929, May 30. In the **general election** the Labor Party was victorious, securing 288 seats against 260 for the Conservatives.

June 5-1931, Aug. 24. SECOND MacDONALD CABINET.

Sept. 28-Nov. 1. Visit of Prime Minister MacDonald to the **United States and Canada.**

Oct. 1. Diplomatic relations with Russia resumed.

1930, Jan. 21. Opening of the **London Naval Conference** (p. 961).

June 10. Publication of the **Simon Report** on the government of India (p. 1113).

Oct. 1-Nov. 14. Imperial Conference. MacDonald rejected a Canadian proposal for preferential tariff to help Dominion wheat because of Labor policy of free trade and cheap bread

1931, July. Report of the **May Committee** of financial experts They claimed the deficit for the fiscal year would be over £100,000 sterling and suggested drastic economies, including a cut in the dole to the unemployed This report caused a **split in the cabinet,** the majority rejecting the proposals as too burdensome to the workers. There were, at this time, over 2,000,000 unemployed

Aug. 24. Resignation of the MacDonald cabinet, the result of the financial crisis and disagreement as to remedies

Aug. 25-Oct. 27. A NATIONAL COALITION GOVERNMENT formed to include Conservatives, Liberals, and Labor members, with MacDonald as prime minister The Labor Party opposed this coalition and expelled those of its leaders who favored it MacDonald, Snowden, Thomas, and others formed a new **National Labor group.** Henderson became leader of the old Labor Party

Sept. 10. Passage of a bill embodying most of the economies urged by the May Committee caused rioting in London, Liverpool, Glasgow, and other large cities.

Sept. 15. Mutiny of sailors in the navy, at Invergordon

Sept. 21. England forced to abandon the gold standard. The pound sterling fell from par ($4 86) to $3.49.

Oct. 27. A general election gave the coalition government a majority of almost 500 seats over the combined opposition. The government was reformed under MacDonald.

1931, Oct. 27—June 7, 1935. NATIONAL COALITION CABINET under MacDonald.

Dec. THE STATUTE OF WESTMINSTER passed by Parliament, giving force of law to the changes in empire relations worked out by the Imperial Conference in 1926.

1932, Feb. 29. Protective Tariff Acts, including a new "corn law" which guaranteed British farmers about $1 a bushel for a specified quantity of home-grown wheat. Abandonment of free trade.

July 21-Aug. 20. Ottawa Imperial Economic Conference. A series of rather grudging agreements for a carefully limited amount of imperial preference led to the resignation (Sept 28) of the free-trade Liberal members of the cabinet, who went into opposition under the lead of **Sir Herbert Samuel.** The Liberals who remained in the government were led by **Sir John Simon.**

1933, June 12-July 27. World Economic Conference at London (p 963). The failure of this conference led the British government to extend its neo-mercantilist policy of economic nationalism. Campaign to "buy British" Managed paper currency, control of foreign exchanges through an exchange equalization fund, free trade and *laisser-faire* definitely abandoned. Gradual but slow recovery took place. The budget was kept in balance.

1935, Feb. 1-3. Anglo-French Conference at London regarding action to be taken with reference to Germany's announcement of rearmament. England and France joined in an invitation to Germany to help re-establish confidence and security by concluding pacts of mutual assistance in eastern Europe, guaranteeing Austrian independence, collaborating in disarmament, rejoining the League, etc. Germany expressed willingness to conclude an air pact, but refused to consider an eastern pact, which England and France thought should come first.

Mar 4. The British government announced that the international situation was such that **England would have to put her defenses in shape.** Most of the new expenditure was devoted to the fleet.

May 6-9. Silver jubilee of George V, an impressive demonstration of loyalty and solidarity.

June 7. Reconstruction of the cabinet, following a general election which continued the majority of the coalition government. **Stanley Baldwin became prime minister** and Sir Samuel Hoare foreign secretary.

June 18. Conclusion of the **Anglo-German naval agreement** (p 963): Germany to have not more than 35% of the British tonnage. This agreement made a most unfavorable impression in France and resulted in cooling of the Anglo-French relationship.

Aug. 2. The Government of India Act passed by Parliament (p. 1113).

Sept. The Ethiopian crisis (p. 991). The British government, especially after the failure of the Hoare-Laval plan to victimize Ethiopia, gave way to a

strong current of British opinion Under the lead of **Anthony Eden,** who now became foreign secretary, Britain assumed the guidance of the League of Nations in the **imposition of sanctions,** etc The result was acute danger of war in the Mediterranean France, Turkey, Greece, and Yugoslavia all agreed to support England in case of conflict, but in the end the London government shrank from extreme measures (oil sanction, e g) and the League action failed Uncertainty regarding the possible attitude or action of Germany no doubt influenced the British cabinet, as did also the military unpreparedness of the country at that time

1936, Jan 20. Death of George V.

1936, Jan. 20-Dec. 10 EDWARD VIII.

Mar. 25. The London Naval Agreement, signed by England, France, and the United States after Japan and Italy had abandoned the conference No quantitative limitation was reached, but limitation of tonnage and size of guns in each ship category was agreed to

Apr. 30. The government announced plans for the construction of 38 warships, the largest building program since 1921.

Aug. 27. Conclusion of the **Anglo-Egyptian Treaty** on terms very favorable to the Egyptian Nationalists (p 1084)

Dec. 10. Abdication of Edward VIII, the first voluntary abdication in English history The Baldwin ministry and the Dominion governments had refused to consent to a morganatic marriage between the king and **Mrs. Wallis Warfield Simpson,** an American-born lady whose second divorce had not yet become final Edward, apparently at odds with his ministers on other matters also (social policy, etc), insisted on his right to shape his own life and abdicated rather than abandon his plan He became **Duke of Windsor** and in June 1937 married Mrs Simpson in France

1936- . GEORGE VI, brother of Edward VIII, became king

1937, Jan. 2. Signature of the **Anglo-Italian Mediterranean Agreement,** which, it was hoped, would bring to an end the dangerous antagonism in that sea. But the general statements of principle of which the agreement consisted proved of very little value in the sequel. On the contrary, the Mediterranean situation became ever more serious with the development of the **Spanish civil war** (p 983) and the open flouting of the **non-intervention agreements** by the Italian government From the outset the British government had worked for non-intervention, in order to prevent the generalization of the conflict By this policy the government stood despite flagrant violations of the principle by other powers

May 28. Neville Chamberlain became prime minister on the retirement of Stanley Baldwin Chamberlain had been chancellor of the exchequer He was confronted at the outset with a most difficult and dangerous European situation, which overshadowed all issues of purely domestic character Abandoning the rather aimless, opportunist policy of Baldwin, Chamberlain held that in order to secure peace, it must be definitely worked for He therefore sought to reach agreements with powers like Germany and Italy, even at the expense of considerable concessions. This became known as the *policy of appeasement*

July 8. Publication of the Peel Report recommending the ending of the **Palestine mandate** and the division of the country into Arab and Jewish states, England to retain a mandate only over Jerusalem, Bethlehem, and a corridor to the sea Parliament refused to commit itself to this scheme and the opposition to it on the part of both Jews and Arabs resulted in its reconsideration (p 1101).

July. Outbreak of hostilities in China. Though British interests were deeply involved and suffered enormous damage, the government avoided challenging Japan in any way, even when the British ambassador was badly injured in an attack of Japanese planes upon the ambassadorial party The British government co-operated with the United States and France in protests against Japanese bombing and injury of European interests, but for the rest the British were too deeply involved in Europe and too weak navally in the Far East to do more than protest

Nov. 17. Visit of Lord Halifax to Chancellor Hitler at Berchtesgaden. This was the first concrete step in the policy of appeasement and was obviously intended to elicit a statement of German claims.

1938, Feb. 20. Resignation of Anthony Eden, British foreign secretary and outstanding champion of the system of collective security and action He resigned in protest against the prime minister's determination to seek an agreement with Italy without waiting for a settlement of the Spanish problem. Lord Halifax became foreign secretary in his place.

Mar. In the **Austrian annexation crisis** (p 1019) the British government played but a small part, having appar-

ently reconciled itself to this development after Halifax's visit to Hitler

Apr. 16. Conclusion of the **Anglo-Italian Agreement,** for which Chamberlain had been working for some time (For terms see p 965) The agreement was to come into force as soon as the Italian "volunteers" were withdrawn from Spain

Apr. 25. Conclusion of a three-year **agreement with Ireland,** bringing to an end a feud which had continued for years (p 973)

Sept. THE GERMAN-CZECH CRISIS AND THE MUNICH AGREEMENTS (p. 1012) During the entire development of the Czech problem in the summer, the British government had played a leading rôle, sending **Lord Runciman** as mediator and working generally for a compromise As the crisis reached the peak, Chamberlain twice flew to Germany to confer with Hitler and ultimately went to Munich to sign the instrument of German victory By way of compensation he brought back a **peace pact with Germany** which apparently he rated highly, but which other people viewed with considerable skepticism The desire to appease the national claims of the Germans and the feeling of inferiority in the matter of preparedness appear to have been at the root of Chamberlain's yielding

Nov. 2. Ratification of the Anglo-Italian Pact of Apr. 16, which went into force Nov 16 The conditions originally laid down had not been fulfilled, but Chamberlain was evidently eager to do what was possible to satisfy Mussolini and prevent too close co-operation between Rome and Berlin

Nov. 17. Conclusion of **trade agreements between Great Britain, Canada, and the United States.** These had been under negotiation for a long time and involved substantial sacrifices on all sides They were taken as an indication of growing co-operation between the English-speaking nations.

Dec. 1. Opening of a "national register" for war service This was entirely voluntary, but was looked upon as an important item of preparedness. After the crisis of 1938 the British government pushed its preparations to the utmost, going so far as to buy large numbers of planes in the United States.

1939, Jan. Visit of Chamberlain and Lord Halifax to Rome. The visit was said to be purely exploratory and indeed appeared to have no very significant consequences.

Mar. 31 British-French pledge to Poland (p. 966), marking the end of the policy of appeasement. The British government, disagreeably surprised by German annexation of Czechoslovakia and Memel, and alarmed by the German threat to Poland, made an epochal departure in foreign policy and devoted itself to building up an anti-aggression pact After the Italian conquest of Albania (p. 1020) guarantees were given to Greece and Rumania, a mutual assistance pact was concluded with Turkey, and the British government finally embarked on the arduous task of bringing Russia into the *"peace front"* At the same time

Apr. 27. The British government introduced conscription for men of 20–21 years, in order to increase the forces by 300,000 men Expenditure for armament was fixed at three billion dollars for one year

Apr. 28. Hitler, in a great *Reichstag* speech, denounced the Anglo-German naval agreement of 1935.

May 17. The British published a **new plan for Palestine** (p 1102), after abortive negotiations with both Arabs and Jews The new scheme met with a storm of opposition from both parties to the dispute.

King George and Queen Elizabeth **arrived in Canada** for an extended visit, followed (June 8–11) by a **visit to the United States** obviously intended to strengthen Anglo-Saxon ties in the face of threatening war in Europe.

Aug. 20-Sept. 1. The Danzig-Polish crisis (p 966) and the

Sept. 3. OUTBREAK OF WAR BETWEEN ENGLAND AND GERMANY.

b. IRELAND

1916, Apr. 24-29. THE EASTER REBELLION, led by P H Pearse and the Sinn Fein party, relying on German aid. Suppression by the British (p. 929).

1917, June 15. Amnesty granted the rebels of 1916.

July 11. Release of Eamon de Valera, Sinn Fein leader, who was re-elected to Parliament.

Oct. 25-27. A Sinn Fein convention at Dublin adopted a constitution for the Irish Republic and elected **De Valera president.**

1918, Mar. 6. Death of John Redmond, leader of the Irish Nationalist group in the British Parliament.

Apr. 17. Adoption of conscription for **Ireland.** The Irish Nationalists thereupon deserted the British Parliament and organized opposition to the measure, which was never very successful

May 18. **De Valera** and other Sinn Fein leaders again arrested

June 25. **Conscription was given up.**

Dec. 14. Great victory of the Sinn Fein candidates in the elections for the British Parliament

1919, Jan. 21. **The Sinn Fein members** of Parliament, having decided not to attend, **organized a parliament** of their own for Ireland (the *Dail Eireann*) and declared Irish independence

Feb. 3. **Escape of De Valera** from prison, he took refuge in the United States

Sept. 12. **The Dail was suppressed** and the headquarters of the Sinn Fein party raided

Nov. 26. **Suppression of the Sinn Fein** movement; **beginning of war** between the Sinn Fein and the British forces attacks on the constabulary, arson, etc

1920, May 15. **Arrival of British reinforcements** (*Black and Tans*) and initiation of a **policy of reprisal.** There followed several months of ferocious conflict

Dec. 23. **PASSAGE OF THE GOVERNMENT OF IRELAND ACT** by the British Parliament: **Northern Ireland** and **Southern Ireland** each to have its own parliament, and each to retain representatives in the British Parliament. A **Council for Ireland,** representing the two parts, was to attempt to effect common action in common affairs.

1921, May 13. **Elections** in the North the Government of Ireland Act was generally accepted and the new system went into effect. In Southern Ireland the **Sinn Fein won 124 out of 128 seats.**

June 28. The Parliament for Southern Ireland was opened, but only the four delegates not members of the Sinn Fein attended The Sinn Feiners declared themselves the Dail Eireann and rejected the settlement proposed

July 14-21. **Conferences of De Valera** and **Sir James Craig** (representing Northern Ireland) with Lloyd George and other British representatives. De Valera rejected offers of Dominion status for Ireland

Oct. 11.–Dec. 6. **Second conference** with **the British leaders;** De Valera did not attend and the negotiations for the Sinn Fein were conducted by **Arthur Griffith** and **Michael Collins.**

Dec. 6. **THE IRISH REPRESENTATIVES SIGNED A TREATY** with the British government which granted Ireland **Dominion status** as the **Irish Free State** (Northern Ireland retaining the right of keeping the existing arrangement).

Dec. 8. **De Valera denounced the settlement** made by Griffith

1922, Jan. 7. **The Dail Eireann accepted the settlement,** 64–57

Jan. 9. **Resignation of De Valera.** Griffith became president of the executive council and Collins prime minister The Dail ratified the treaty (Jan 14).

Mar. 15. **De Valera organized a new Republican Society** and began an **insurrection** against his former colleagues, irregular forces resumed the methods of assassination and arson formerly used against the British

June 16. The Government forces won a great victory in the elections

Aug. 12. **Death of Arthur Griffith.**

Aug. 22. **Assassination of Michael Collins** by the Republicans.

Sept. 9. **WILLIAM T. COSGRAVE BECAME PRESIDENT** of the executive council and, with the aid of **Kevin O'Higgins,** began a policy of rigorous repression of De Valera's movement

Oct. 25 **THE DAIL ADOPTED A CONSTITUTION,** providing for a two-chamber parliament (a senate, with 12-year term, one-fourth renewable annually, with suspensive veto, a chamber of deputies, popularly elected and with exclusive power in financial affairs, the lower chamber to elect the president)

Dec. 6. The constitution went into effect and the **Irish Free State was officially proclaimed.**

1923, Aug. 14. **De Valera was captured** by government forces, and imprisoned

Sept. 10. **Ireland was admitted to the League of Nations.**

1924, July 16. **De Valera was liberated.** He and his Republicans continued to refuse to take their seats in the Dail, rejecting the necessary oath of loyalty to the king

1925, Dec. 3. **Boundary with the State of Northern Ireland** fixed after long negotiations Compromise proposals having failed, the boundary envisaged in 1920 was retained, but Southern Ireland was relieved of the obligation to assume part of the British national debt.

1926, Mar. 11. De Valera resigned as head of the Sinn Fein

1927, July 10. Assassination of Kevin O'Higgins, dominant figure of the government Popular condemnation of the tactics of the Republicans A drastic public-safety law enacted Candidates for the Dail henceforth required to promise acceptance of the oath in advance

Aug. 12. De Valera and other Republican leaders agreed to take the oath and assume their seats in the Dail

Sept. 15. Elections The government party had 61 seats against 57 for the Republicans, but failed to secure a clear majority and had to rely on support of the Independents

1930, Mar. 27. Resignation of Cosgrave, who was soon re-elected (Apr 2 80 votes against 65 for De Valera)

1931, Oct. Passage of a new public-safety law to meet the revival of Republican agitation and activity, stimulated by economic stress The Republican army was declared illegal and military tribunals set up to deal with sedition, illegal drilling, etc

1932, Feb. Elections. The Republicans won 72 seats against 65 for the government The Labor deputies supported the Republicans, thus giving them a majority

Mar. DE VALERA ELECTED PRESIDENT, with a program of abolishing the oath to the king, suspension of land annuity payments, establishment of a high protective tariff, etc

May 19. The Dail passed a law abolishing the oath, but this was held up by the Senate, with an opposition majority.

July. Outbreak of tariff war with Great Britain, following long abortive negotiations concerning the land annuities which the Irish government suspended

1933, Jan. 2. De Valera dissolved the Dail and in the ensuing elections (Jan 24) secured for his party a clear majority of one.

May 3 The Dail abolished the oath of loyalty and soon afterward voted that the approval of the governor-general should no longer be necessary to put legislation into effect, appeals to the British Privy Council were made illegal

July 23. Formation of the National Guard (*Blue Shirts*) in opposition to De Valera's Republican army

Sept. 3. Union of the National Guard and the Center (Cosgrave Party) to form the *United Ireland Party*, under Gen Owen O'Duffy. There followed a period of disorder and conflict between the two groups.

Sept. 22. Resignation of O'Duffy, a reflection of disapproval of his methods by the more moderate opposition elements Cosgrave became leader of the United Ireland Party.

1934-1935. Continuation of the tariff war with Great Britain Ireland suffered tremendously from the loss of her export markets, and much discontent developed. The government tried to meet the situation by encouraging the diversification of crops and the establishment of industrial self-sufficiency, but these measures had only qualified success.

1935, Jan. Conclusion of a coal and cattle agreement with Great Britain which enabled the Irish to get rid of at least some of their meat.

July. Anti-Catholic riots in Belfast, leading to expulsion of Catholic families, and reprisals by the Free State government.

1936, Feb. 17. Conclusion of an Anglo-Irish trade pact, bringing to an end the disastrous tariff war. The Irish government agreed to pay the land annuities

June. Abolition of the Senate. De Valera proposed a new constitution involving the abolition of the governor-generalship.

Nov. 3. THE NEW CONSTITUTION reintroduced the Senate, but as a functional body The relationship to Great Britain was ignored

1937, June 14. Parliament approved the draft constitution, which was to be submitted to popular vote.

July 16. The elections resulted in a stalemate, the De Valera party winning exactly one-half of the seats.

1938, Jan. 17. Opening of conversations between the Irish and British governments in the hope of a broader settlement.

Feb. 9. The elections in Northern Ireland resulted in an overwhelming victory for the Unionists, thus blasting any hope there might have been of merger of the Free State and Northern Ireland

Apr. 25. CONCLUSION OF AN AGREEMENT WITH GREAT BRITAIN for three years. The Ulster (Northern Ireland) problem had to be shelved, but other outstanding questions were adjusted Ireland was to pay £10,-

000,000 in satisfaction of land-annuity claims. All recent tariff barriers were thrown down Great Britain turned over to the Free State (*Eire* or *Ireland* in the new constitution) the coast defenses of Cobh, Bere Haven, and Lough Swilly. This agreement, restoring close friendly relations between Ireland and England, was approved by the Irish opposition, which also joined the government party in electing

May 4. DR. DOUGLAS HYDE FIRST PRESIDENT under the new constitution. Hyde was one of the leaders of the Gaelic cultural revival, and a Protestant His election was taken as a persuasive gesture toward Northern Ireland.

June 17. The elections resulted in a great **victory for De Valera,** who became prime minister under the new system The growing danger of war in Europe led to ever closer relations between Ireland and England, though negotiations for union of North and South Ireland were actively pressed by De Valera.

3. THE LOW COUNTRIES

a. BELGIUM

Of all the countries involved in the First World War, **Belgium,** an unwilling participant, suffered most The total damage was estimated at over $7,000,000,000, but the country showed extraordinary recuperative power and soon returned to a peace basis Politically the country was ruled by the Catholic and Socialist parties One of the major questions at issue was the demand of the Flemish for recognition of their language.

1919, May 9. A new electoral law introduced **universal suffrage** and gave the franchise to certain classes of women.

May 30. By agreement with Great Britain, Belgium was given the **mandate over part of German East Africa** (Ruanda and Urundi) This was later confirmed by the League of Nations

June 28. By the Treaty of Versailles, Belgium acquired the German districts of **Eupen, Malmédy, and Moresnet.**

Nov. 16. In the elections the **Catholic Party lost its majority,** though it was still the largest party (73 seats as against 70 for the Socialists)

1920, Sept. 7. Military convention with France. In the following years Belgium acted closely with France in most questions of international import.

1921, Nov. 28. The elections restored the **majority of the Catholic Party.**

1922, Jan. 1. A law went into effect putting **Flemish on a par with French** as an official language.

1923, Jan. 11. Invasion of the Ruhr, by French and Belgian troops (p. 958).

July 27. The use of Flemish was introduced in the University of Ghent.

1925, Apr. 3. A treaty with the Netherlands settled a long-standing dispute regarding the **navigation of the Scheldt.**

Apr. 5. The Socialists secured a majority in the elections

Oct 16 Belgium was a party to the **Locarno Treaties** (p 959).

1926, May 22. A treaty with England and France formally abrogated the Treaty of 1839.

July. Financial crisis The king was given dictatorial powers for six months to solve the problem Devaluation and stabilization of the Belgian franc A new currency unit, the *Belga,* equal to five Belgian francs, was introduced

1929, May 26. In the **elections** the Catholics regained their preponderance.

1932, July 18 Enactment of **new language regulations.** Henceforth French was to be the administrative language only of the Walloon provinces, while in Flanders the Flemish language was to be official In Brussels and Brabant there were to be two sets of higher officials In the secondary schools instruction was to be given in the language prevailing in the district.

July 19. Conclusion of the **Ouchy Convention** between Belgium, Luxemburg, and Holland The three parties agreed to gradual reduction of economic barriers between them.

Sept. 14. The government was granted extraordinary power to deal with the alarming budget deficits The world-wide depression struck Belgium very hard in view of the cessation of German reparations payments The government stuck to the gold standard and tried to meet the situation by reduction of salaries, flotation of loans, and steady increase of taxation.

1933, Mar. 16 The victory of the National Socialists in Germany obliged the government to take precautionary measures 150,000,000 francs were devoted to

fortifications along the Meuse and Belgium thenceforth constantly increased appropriations for defense In Dec 1936 the term of service for the infantry was extended from seven to eighteen months

1934, Feb 17. Death of King Albert I, the result of a mountaineering accident He was succeeded by his son

1934-1944. LEOPOLD III.

July 12. The government prohibited the formation of military units and the wearing of uniforms by political organizations This law was directed at the **growing fascist movement,** and also at the **Labor Defense Militia.** Both organizations were dissolved

1935, Mar. 25. Paul Van Zeeland, eminent financier, formed a **Government of National Unity,** which was given decree powers for a year to cope with the desperate financial situation Van Zeeland devalued the belga by 28%, undertook the conversion of the public debt, concluded trade agreements, and, in fact, managed to balance the budget. Nevertheless, strikes and unrest continued, and in the

1936, May 24. Parliamentary elections the fascists, led by **Léon Degrelle,** and generally called *Rexists*, won 21 seats Van Zeeland, after reforming his government, introduced an extensive

June 24. Social improvement program, roughly the equivalent of the Popular Front program in France minimum wage, 40-hour week in certain industries, free holidays, increase of unemployment allowance, etc

Oct. 14. BELGIUM DENOUNCED THE MILITARY ALLIANCE WITH FRANCE AND RESUMED LIBERTY OF ACTION. This step resulted from the German reoccupation of the Rhineland and was generally taken as a reflection of Belgium's determination not to become embroiled with Germany through connection with the Franco-Russian alliance.

Oct. 22. Martial law was proclaimed to check the **excesses of the Rexists.** Degrelle himself was arrested

1937, Oct. 13. THE GERMAN GOVERNMENT, in a note to Brussels, **guaranteed the inviolability and integrity of Belgium** so long as the latter abstained from military action against Germany This assurance was regarded as a valuable gain for the policy of neutrality.

Oct. 24. Resignation of Van Zeeland, following charges of corruption in connection with the National Bank. After a prolonged cabinet crisis, **Paul Janson** (Liberal) formed a new coalition government, which

1938, May 13. Gave way to a coalition headed by **Paul Spaak** (Moderate Socialist)

Oct. 16. The municipal elections showed a distinct falling-off of support for the extremist groups on both Right and Left (Rexists only 5% of the total), but the coalition of Catholics, Liberals, and Socialists became harder and harder to work and the political situation therefore remained uncertain.

1939, Feb.-Mar. A prolonged **cabinet crisis** resulted from failure to construct a parliamentary majority On advice of the Pierlot ministry the king dissolved parliament and called new elections. In a letter to Pierlot he denounced political squabbling in time of national danger

Apr. 2. The **elections** brought no great change, though the Rexist deputies dropped from 21 to only 4.

Apr. 18. Pierlot formed a **Catholic-Liberal government.**

Aug. 23. King Leopold issued an **appeal for peace** in behalf of Belgium, Holland and the Scandinavian states This proved of no avail Belgium mobilized but proclaimed neutrality in the European War that broke out on Sept. 3 (p. 967)

b. THE KINGDOM OF THE NETHERLANDS

Though the Netherlands took no part in the World War, the nation suffered considerably through interference with trade. Toward the end of the war the government was obliged to submit to stringent regulations by the Allies and to permit the requisitioning of Dutch shipping

1919, Aug. 9. A new electoral law provided for direct election of deputies by all men and women 23 years of age or older

1920, Jan. 23. The Dutch government refused the Allied demand for the surrender of the **former German Emperor William.** He lived in retirement, first at Amerongen, then at Doorn

1926, Nov.—1927, July. A great **communist revolt in Java** and the East Indies was suppressed only with difficulty.

1928, Apr. 4. Las Palmas Island, in dispute between Holland and the United States, was assigned to Holland by arbitration.

1930, Dec. 22. Conclusion of the **Oslo Agreements** between the three

Scandinavian countries, Holland, Belgium, and Luxemburg. The contracting parties promised not to raise tariffs without notification and consultation July 19, 1932, Holland, Belgium, and Luxemburg concluded the **Ouchy Convention** arranging for more specific reduction of tariffs The Oslo Agreements were renewed in 1937, but on July 1, 1938, the trade agreement had to be dropped

1931, Dec. 22. The Dutch government, despite free-trade traditions, **began to increase the tariff** and to set up import quotas, in order to help the agricultural and dairying interests, hard hit by the world depression

1933, Feb. 7. Mutiny on the training ship *Zeven Provincien* in East Indian waters This resulted from reduction of pay Mutiny and disorders were finally put down with some loss of life

Apr. 26. Following the elections, **Dr. Colijn constructed a crisis cabinet** which attempted to deal with the serious financial situation and to check the growth of extremist movements on both Right and Left.

1934, May. The government was granted **emergency powers to regulate trade and industry** Restriction of agricultural production, program of public works to relieve unemployment **Drastic measures against extremists:** National Socialists, Revolutionary Socialists, and Socialists debarred from holding office Despite these measures, the National Socialists continued to increase their numbers and influence throughout 1935

1936. In view of developments in Germany, the government felt obliged to strengthen its defenses In 1937–1938 the advance of Japan in China exposed the Dutch East Indies to possible Japanese aggression and led to a strengthening of naval forces in the Far East

1937, Jan. 7. Marriage of Princess Juliana (heiress to the throne) **to Prince Bernhard of Lippe-Biesterfeld.**

May 26 The elections proved to be a **setback for the National Socialist movement.** The Liberal Democratic Party showed a marked gain.

1939, June 30 Resignation of the Colijn government, which was reformed amidst much party dissension.

4. FRANCE

The acquisition of Alsace-Lorraine and of mandates in Africa and Syria (pp. 1088, 1098) did not compensate victorious France for her losses in the war, which had been fought largely on French soil The 1,385,000 French soldiers known to be dead; 700,000 seriously wounded, 2,344,000 other wounded, 446,000 prisoners or missing meant a loss of man-power proportionately greater than that suffered by any other belligerent. Of Frenchmen who in 1914 were aged between 20 and 32, more than half were killed Property damage in the war zone in the north and east of France included 300,000 houses destroyed, and as many more damaged; 6,000 public buildings and 20,000 workshops and factories destroyed or badly damaged, 1,360,000 head of livestock killed or confiscated, thousands of acres of farm land and forest ravaged by shell fire These figures explain the intensity of the postwar demand for security and reparation Since most Frenchmen believed Germany solely responsible for the war, these losses, which brought suffering to almost every French household, stood in the way of any compromise or cooperation between France and post-war Germany.

1919, July 12. A new Electoral Law introduced the *scrutin de liste* and a measure of proportional representation The effect of this was to make it more difficult than ever for any one party to secure a majority

Nov. 16. Elections. The coalition which had governed under Clemenceau split into a Right *Bloc National* (Clemenceau, Millerand, Poincaré, Briand) and a *Cartel des Gauches*, led by Herriot The Royalists, Socialists, and Communists were not included in either group The elections gave a majority to the *Bloc National*, which was also victorious in the senatorial elections of Jan. 1920

1920, Jan. 17. Presidential election. Clemenceau was defeated by Paul Deschanel, a reflection of political and public opinion which held the Treaty of Versailles too lenient.

1920, Jan. 17-Sept. 15. PRESIDENCY OF PAUL DESCHANEL.

Jan. 18. Resignation of Clemenceau.

Jan. 19-Sept 24. Cabinet of Alexandre Millerand.

Apr. 23. Joseph Caillaux, former prime minister, sentenced to three years' imprisonment and other penalties after conviction of dealings with the enemy.

Sept. 15. Resignation of President Deschanel on account of ill health

1920, Sept. 23—1924, June 11. PRESIDENCY OF ALEXANDRE MILLERAND, who, like Poincaré before him, tried to make the office an effective one

Dec. 30. The Socialist Party, at the Tours Congress, voted to unite with the **Third International.**

1921, Jan. 13 The General Confederation of Labor dissolved by court order This organization (C G T) was the center of the syndicalist movement, which had been joined by many unions

Jan. 16-1922, Jan 12. Cabinet of Aristide Briand.

Feb. 19. Defensive Treaty with Poland.

Mar. 9. Peace Treaty with Turkey ending hostilities in Cilicia

May 28. Diplomatic relations with the Vatican resumed (ruptured in 1904)

June 28. By agreements with the railroad companies the government granted concession till 1950 or 1960 and guaranteed expenses and interest and principal payments

1922, Jan. 15-1924, June 1. Cabinet of Raymond Poincaré, with a program of forcing reparations payments from Germany, chiefly to meet the expense of restoration of the devastated regions, on which 20 milliard francs had already been spent

Dec. 15. The Workingmen's Compensation Act of 1898 was extended to agricultural laborers

1923, Jan. Invasion of the Ruhr (p 958)

Apr. 1. Compulsory military service reduced to one and one-half years.

1924, Jan. 6. The Catholic Church was given the right to reoccupy its former property under a system of "*diocesan associations*"

Jan. 25. Treaty with Czechoslovakia, providing for mutual aid in the event of unprovoked attack by a third power

May 11. The elections gave the *Cartel des Gauches* a majority in the Chamber, as a result of the failure of Poincaré's policy of coercing Germany Poincaré resigned.

June 11. Resignation of President Millerand. This was forced by Herriot, leader of the Radical Socialist Party, the strongest group in the Chamber, who refused to form a government while Millerand was president, on the plea that the president had abandoned the traditional neutrality and had openly sided with the Right.

1924, June 13—1931, June. PRESIDENCY OF GASTON DOUMERGUE.

June 14—1925, Apr. 10. Édouard Herriot, prime minister.

Oct 28. *De jure* **recognition of Soviet Russia.**

1925, Feb 2. Embassy at the Vatican again suppressed, but a special arrangement made for representation of Alsace and Lorraine The anti-clerical policy of the government caused a storm of protest from all factions of the Right, and it was finally decided (May, 1925) to retain an embassy at the Vatican.

Apr. Beginning of the insurrection in Morocco (p 1087)

July. Rising of the Druses in the Lebanon against French rule (p 1098)

July 26. Agreement with Spain for common action in Morocco

Oct. 16 The Locarno Treaties (p 959).

Nov. 27—1926, July 15. Three **ministries of Aristide Briand.**

1926, June 10. Treaty with Rumania.

July 15. Fall of the Briand ministry as a result of the financial crisis The franc had declined to the value of 2¢ and the budget could not be balanced, despite the imposition of new taxes and increases of income and other taxes Bond issues could not be floated, since the old obligations could not be met War debt, post-war extravagance, and the failure of reparations payments made a partial repudiation of the debt inevitable.

1926, July 28—1929, July 26. National Union ministries of Poincaré. Briand remained as minister for foreign affairs Six former premiers sat in the cabinet The new government voted new taxes and drastic economies which balanced the budget. The franc rose to about 4¢

Aug. 10. The two chambers, sitting as a national assembly, incorporated a **sinking-fund measure** in the constitution. Income from the tobacco monopoly and from inheritance taxes was to be used to redeem part of the national debt

1927, July 13. The system of *scrutin d'arrondissement* restored for the elections

Nov. 11. Treaty with Yugoslavia.

1928, Mar. 28. Military service reduced to one year.

Apr. 22-29. Elections gave the National Union government a majority.

May 24. Conviction of four **Alsatian autonomists,** who for some time

had been agitating for separate status through the *Heimatsbund*.

June 24. The franc was devalued from 19 3¢ to 3 92¢, this being a disguised repudiation of about four-fifths of the national debt The measure hit the *rentier* class hardest and explains later opposition to further devaluation.

Aug. 27. The Kellogg-Briand Pact (p. 960).

1929, July 27. Resignation of Poincaré, on account of ill health There followed a series of short-lived cabinets, based on shifting parliamentary blocs rather than on genuine party groupings

1930, Feb. 3. Treaty with Turkey.

Apr. 30. A National Workmen's Insurance Law passed after years of discussion. It insured 9,000,000 workers against sickness, old age, and death. Workers contributed 3% of wages, employers an equal amount The state contributed in some cases

June 30. End of the evacuation of the Rhineland (p 999)

1931, June—1932, May. PRESIDENCY OF PAUL DOUMER. Briand was passed over, since his efforts at international conciliation had estranged the Right Death of Briand (Mar. 7, 1932)

1932, May 6. President Doumer assassinated by a Russian *émigré* named Gourgoulov, apparently insane

1932, May- PRESIDENCY OF ALBERT LEBRUN.

May. The elections gave the Left parties a majority.

June-Dec. Second **ministry of Édouard Herriot.** He resigned because the government proposal to pay the scheduled debt installment to the United States was voted down by the Chamber There followed five short-lived ministries in the next 13 months All were concerned with keeping France on the gold standard and with balancing the budget without resorting to inflation.

1933, Dec. The Stavisky case. Stavisky, a Russian promoter, involved in the floating of a fraudulent bond issue by the municipal pawnshop of Bayonne, fled to escape arrest and when cornered was alleged to have committed suicide Royalists and fascists stirred up an agitation against the republic which recalled the Dreyfus case It was believed that important officials and politicians were involved and that their guilt was being concealed. The full facts were never made known.

1934, Feb. 6-7. Serious riots in Paris and other cities, resulting from the Stavisky case.

Feb. 8. Coalition cabinet under ex-President **Doumergue,** including leaders of all parties except Royalists, Socialists, and Communists, formed to avert civil war (general strike Feb 12–13)

Oct. 9. Assassination, at Marseilles, of **King Alexander of Yugoslavia** and Foreign Secretary **Barthou,** who had been busily engaged (Apr–June) in a grand tour of European capitals in the hope of building up a strong alliance system against the new Nazi Germany

Nov. Fall of the Doumergue ministry, Doumergue having proposed a constitutional reform by which change of ministry should, as in England, necessitate a new election The coalition was reorganized under **Flandin.**

1935, Jan. 7. Agreement between France and Italy with regard to Africa In this accord France made a number of concessions to Italy (status of Italians in Tunisia, frontier rectifications, part ownership in the Ethiopian Railway, etc.), all in the hope of establishing a strong front against the growing German menace.

May. The Flandin cabinet was overthrown when it demanded quasi-dictatorial powers to save the franc A **Laval ministry** followed

May 2. Conclusion of the **alliance treaty with Soviet Russia.** For some time the French government had labored not only to resuscitate its alliance with the Little Entente powers and Poland, but to bring Germany and Poland and Russia into an eastern pact which would serve to maintain the *status quo*. Both Germany and Poland evaded this suggestion and, after the announcement of German rearmament (p 963), the French government hurried into the alliance with Russia, an arrangement by no means popular with the more conservative elements in France

July 27. The government was granted **emergency financial powers** and embarked upon a policy of retrenchment Reduction of state salaries led to much disorder

Nov. 3. Merger of various Socialist groups to form a *Socialist and Republican Union*. This group soon established close relations with the Communists and with the Radical Socialists, to form a **Popular Front,** the main objective of which was to counteract the agitation of the reactionary groups (**Col. de La Roque** and his *Croix de Feu*, etc). To meet this new pressure from the Left,

Dec. 28. The government ordered political leagues dissolved. Most of them promptly re-emerged as political "parties."

1936, Jan. 22. Downfall of the Laval government, which was thoroughly discredited by its half-and-half attitude toward Italy during the Ethiopian crisis (p 991) and which was further suspected of supporting the reactionary currents There followed a **cabinet under Albert Sarraut** which was nothing more than a stop-gap

May 3. The **parliamentary elections gave the Popular Front a majority** in the Chamber of Deputies and led to the formation of the

June 5. FIRST POPULAR FRONT MINISTRY, under **Léon Blum,** leader of the Socialist Party The cabinet was composed of Radical Socialists and Socialists, and enjoyed the support of the Communists A great **wave of sit-down strikes** (300,000 workers out) accompanied this important change and led at once to the introduction of a far-reaching **program of social reform:** establishment of the 40-hour week (June 12), reorganization and ultimately nationalization of the Bank of France, suppression of fascist groups (June 30), nationalization of the munitions industry (July 17), compulsory arbitration of labor disputes, vacations with pay, etc. These measures, hailed by the workers as marking the dawn of a new era, at once aroused the hostility of the capitalist and employing classes ; Rapidly rising costs of production brought with them rising prices The franc began to sink steadily and capital started to flee the country in large amounts. To the increasing financial difficulties was added the **enhanced tension in international affairs** following the German reoccupation of the Rhineland, the Italian victory in Ethiopia, the collapse of the League system (on which France had depended so much), and the outbreak of civil war in Spain. The government was obliged to expend huge sums on further rearmament and, after Belgium's resumption of neutrality, to undertake the **fortification of the Belgian frontier.** In the Spanish affair Premier Blum felt impelled to follow the British lead and adopt a policy of non-intervention **Anglo-French relations** had grown so cool as a result of Laval's Italian policy that Blum looked upon revival of close relations as worth any cost.
